This semi-annual status report is divided into two sections: Scanning Tunneling Microscopy Lab and Aeronomy Lab. The Scanning Tunneling Microscopy (STM) research involves studying solar cell materials using the STM built at Florida Tech using a portion of our initial Jove equipment funding. One result of the participation in the FSEC project will be to design and build an STM system which is portable. This could serve as a prototype STM system which might be used on the Space Shuttle during a Spacelab mission, or onboard the proposed Space Station. The scanning tunneling microscope is only able to image the surface structure of electrically conductive crystals; by building an atomic force microscope (AFM) the surface structure of any sample, regardless of its conductivity, will be able to be imaged. With regards to the Aeronomy Lab, a total of four different mesospheric oxygen emission codes were created to calculate the intensity along the line of sight of the shuttle observations for 2972A, Herzberg I, Herzberg II, and Chamberlain bands. The thermosphere-ionosphere coupling project was completed with two major accomplishments: collection of 500 data points on modulation of neutral wind with geophysical variables, and establishment of constraints on behavior of the height of the ionosphere as a result of interaction between geophysical and geometrical factors. The magnetotail plasma project has been centered around familiarization with the subject in the form of a literature search and preprocessing of IMP-8 data. Derived from text

(Contract NAS2-13721)
(NASA-CR-195117; NAS 1.26:195117) Avail: CASI HC A03/MF A01

The Research Institute for Advanced Computer Science (RIACS) was established by the Universities Space Research Association (USRA) at the NASA Ames Research Center (ARC) on 6 June 1983. RIACS is privately operated by USRA, a consortium of universities with research programs in the aerospace sciences, under contract with NASA. The primary mission of RIACS is to provide research and expertise in computer science and scientific computing to support the scientific missions of NASA ARC. The research carried out at RIACS must change its emphasis from year to year in response to NASA ARC's changing needs and technological opportunities. A flexible scientific staff is provided through a university faculty visitor program, a post doctoral program, and a student visitor program. Not only does this provide appropriate expertise but it also introduces scientists outside of NASA to NASA problems. A small group of core RIACS staff provides continuity and interacts with an ARC technical monitor and scientific advisory group to determine the RIACS mission. RIACS activities are reviewed and monitored by a USRA advisory council and ARC technical monitor. Research at RIACS is currently being done in the following areas: Parallel Computing, Advanced Methods for Scientific Computing, High Performance Networks and Technology, and Learning Systems. Parallel compiler techniques, adaptive numerical methods for flows in complicated geometries, and optimization were identified as important problems to investigate for ARC's involvement in the Computational Grand Challenges of the next decade. THE FUTURE OF AEROSPACE: PROCEEDINGS OF A SYMPOSIUM HELD IN HONOR OF ALEXANDER H. FLAX
1993 83 p Symposium was held in Washington, DC, 28 Feb. 1992
(LC-93-83945; ISBN-0-309-04881-8) Copyright Avail: Issuing Activity

This volume consists of papers and speakers' remarks presented during a symposium entitled 'The Future of Aerospace,' held Feb. 28, 1992. Topics covered include the defense industry and the new world order, the future of manned spaceflight, the current outlook for the aviation industry, applying technology to new airplane development, and the future of rotary wing aircraft. For individual titles, see N94-25066 through N94-25070.

With the end of the Cold War, the aerospace industry is faced with serious challenges in maintaining a capable defense industrial base while considerable downsizing occurs. This paper covers the unique military technologies that allowed U.S. military forces to prevail during the Persian Gulf War, such as C3I, defense suppression, and precision-guided weapons, and the author's recommendations on how the government and aerospace industry should plan to maintain such capabilities in the future. This paper examines the future of manned spaceflight in context of past accomplishments and possible future benefits of space exploration.

Three technological advances mentioned are a device called the rotating wall vessel, also known as the 'bioreactor,' which allows the study of the growth of cells in three dimensions; the use of microgravity to produce high-quality electronic, magnetic, and superconducting thin films; and mining of helium-3 from the lunar surface for use in future fusion reactions with deuterium. The author then makes recommendations on how NASA should meet the challenges of manned spaceflight. CASI

From an engineering perspective, we may be entering the most exciting, rewarding, and interesting time during which one can work in the U.S. air transportation industry. At the same time, we may be entering a period of steadily declining U.S. leadership in civil aeronautics - if we allow ourselves to become complacent. This paradox stems from the fact that world airline economics are in dreadful shape, even though opportunities for technical advances in civil aviation abound. To maintain our leadership in this environment, we must shift our focus from 'high-tech' to cost-conscious designs made possible through concurrent engineering, coupled with better-than-ever customer support. There is a misconception today about what technology really is. Technology has now come to mean specific things: fault-tolerant computers, portable satellite phones, featherweight composite materials. But these individual items, however important they may be, are not examples of the true meaning of the word technology. Instead, these are examples of technical excellence. A higher form of technology is at work behind these specific pieces of equipment: the technology based on human experience, wisdom, and judgment. In aviation, the ultimate technology means listening to the customer and adding value to the airplane. In Boeing's design process, every new technology development must earn its way onto an airplane by adding value in one of three ways: increased safety, improved operational efficiency and economic utility, and greater customer satisfaction. Higher-order technology, the technology of knowing how to apply examples of technical excellence, is now shaping the development of two exciting classes of airplane. One is the development of large subsonic transports, including the potential for new airplanes larger than any current commercial transports. The other is the prospect of a high-speed civil transport (HSCT). Although these two categories of airplane are very different, they do have one thing in common: A successful design will depend on how technical excellence is applied to the satisfaction of the customer. By themselves, individual examples of technical excellence will not produce a winning design. A good airplane is the result of good decisions, not just good components. Derived from text

Advances in rotary wing aircraft technology will improve performance of future helicopters in three broad mission segments, defined as vertical takeoff and landing, horizontal flight, and hovering flight. This paper addresses technologies associated with these three mission segments in the areas of propulsion, rotary-wing aerodynamics, and materials and structures. The paper also examines the economic outlook for rotary wing aircraft in future commercial and military markets. CASI

The Air Force Office of Scientific Research (AFOSR) manages all basic research conducted by the U.S. Air Force. To accomplish this task, AFOSR solicits proposals for research through a general Broad Agency Announcement (BAA) and through specialized BAA's published in the Commerce Business Daily. This general BAA outlines the Air Force Defense Research Sciences Program and is reprinted in Section 4, Proposal Guidance, for your convenience. AFSOR invites proposals for basic research in many broad areas. Section 2 of this pamphlet describes those areas in greater detail. DTIC

The JSC NASA/ASEE Summer Faculty Fellowship Program was conducted by Texas A&M University and JSC. The objectives of the program, which began nationally in 1964 and at JSC in 1965, are as follows: (1) to further the professional knowledge of qualified engineering and science faculty members; (2) to stimulate an exchange of ideas between participants and NASA; (3) to enrich and refresh the research and teaching activities of participants' institutions; and (4) to contribute to the research objectives of the NASA centers. Each faculty fellow spent at least 10 weeks at JSC engaged in a research project in collaboration with a NASA/JSC colleague. This document is a compilation of the final reports on the research projects completed by the faculty fellows during the summer of 1993. For individual titles, see N94-25349 through N94-25366.

DATA ANALYSIS AND INTERPRETATION OF LUNAR DUST EXOSPHERE c91
George A. Andrews, Jr. *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 15 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

The lunar horizon glow observed by Apollo astronauts and recorded during the Surveyor missions is believed to result from the scattering of sunlight off lunar fines suspended in a dust layer above the lunar surface. For scale heights of tens of kilometers, theory and astronaut's observations suggest that the size of the dust particles will be smaller than 0.1 microns in radius and will act as Rayleigh scatters. This means that the dust scattered light will be 100 percent polarized at a 90 degree scattering angle and will depend on wavelength to the inverse fourth power ('bluing'). Believing these signatures to be observable from ground based telescopes, observational data in the form of CCD images has been collected from McDonald Observatory's 36 in. telescope, and the reduction and analysis of this data is the focus of the present report. MODELLING THE SHUTTLE REMOTE MANIPULATOR SYSTEM: ANOTHER FLEXIBLE MODEL c37
Alan A. Barhorst *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1

Dec. 1993 17 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

High fidelity elastic system modeling algorithms are discussed. The particular system studied is the Space Shuttle Remote Manipulator System (RMS) undergoing full articulated motion. The model incorporates flexibility via a methodology the author has been developing. The technique is based in variational principles, so rigorous boundary condition generation and weak formulations for the associated partial differential equations are realized, yet the analyst need not integrate by parts. The methodology is formulated using vector-dyad notation with minimal use of tensor notation, therefore the technique is believed to be affable to practicing engineers. The objectives of this work are as follows: (1) determine the efficacy of the modeling method; and (2) determine if the method affords an analyst advantages in the overall modeling and simulation task. Generated out of necessity were Mathematica algorithms that quasi-automate the modeling procedure and simulation development. The project was divided into sections as follows: (1) model development of a simplified manipulator; (2) model development of the full-freedom RMS including a flexible movable base on a six degree of freedom orbiter (a rigid-body is attached to the manipulator end-effector); (3) simulation development for item 2; and (4) comparison to the currently used model of the flexible RMS in the Structures and Mechanics Division of NASA JSC. At the time of the writing of this report, items 3 and 4 above were not complete. Author (revised)

THE ROLE OF VISUAL CONTEXT IN MANUAL TARGET LOCALIZATION c53

Susan R. Barry *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 14 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

During space flight and immediately after return to the 1-g environment of earth, astronauts experience perceptual and sensory-motor disturbances. These changes result from adaptation of the astronaut to the microgravity environment of space. During space flight, sensory information from the eyes, limbs, and vestibular organs is reinterpreted by the central nervous system in order to produce appropriate body movements in the microgravity. This adaptation takes several days to develop. Upon return to earth, the changes in the sensory-motor system are no longer appropriate to a 1-g environment. Over several days, the astronaut must re-adapt to the terrestrial environment. Alterations in sensory-motor function may affect eye-head-hand coordination and, thus, the crewmember's ability to manually locate objects in extrapersonal space. Previous reports have demonstrated that crewmembers have difficulty in estimating joint and limb position and in pointing to memorized target positions on orbit and immediately postflight. The ability to point at or reach toward an object or perform other manual tasks is essential for safe Shuttle operation and may be compromised particularly during re-entry and landing sequences and during possible emergency egress from the Shuttle. An understanding of eye-head-hand coordination and the changes produced during space flight is necessary to develop effective countermeasures. This summer's project formed part of the study of the sensory cues use in the manual localization of objects. Author (revised)

PARALLEL PROCESSING METHODS FOR SPACE BASED POWER SYSTEMS c20

F. C. Berry *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 15 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

This report presents a method for doing load-flow analysis of a power system by using a decomposition approach. The power system for the Space Shuttle is used as a basis to build a model for the load-flow analysis. To test the decomposition method for doing load-flow analysis, simulations were performed on power systems of 16, 25, 34, 43, 52, 61, 70, and 79 nodes. Each of the power systems was divided into subsystems and simulated under steady-state conditions. The results from these tests have been found to be as accurate as tests performed using a standard serial simulator. The division of the power systems into different subsystems was done by assigning a processor to each area. There were 13 transputers available, therefore, up to 13 different subsystems could be simulated at the same time. This report has preliminary results for a load-flow analysis using a decomposition principal. The report shows that the decomposition algorithm for load-flow analysis is well suited for parallel processing and provides increases in the speed of execution. Author

A PROTOTYPE TO AUTOMATE THE VIDEO SUBSYSTEM ROUTING FOR THE VIDEO DISTRIBUTION SUBSYSTEM OF SPACE STATION FREEDOM c32

Jessie M. Bethly Betz *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 10 p (For primary document see N94-25348 06-99)
Avail: CASI HC A02/MF A03

The Video Distribution Subsystem (VDS) for Space Station Freedom provides onboard video communications. The VDS includes three major functions: external video switching; internal video switching; and sync and control generation. The Video Subsystem Routing (VSR) is a part of the VDS Manager Computer Software Configuration Item (VSM/CSCI). The VSM/CSCI is the software which controls and monitors the VDS equipment. VSR activates, terminates, and modifies video services in response to Tier-1 commands to connect video sources to video destinations. VSR selects connection paths based on availability of resources and updates the video routing lookup tables. This project involves investigating the current methodology to automate the Video Subsystem Routing and developing and testing a prototype as 'proof of concept' for designers. Author (revised)

INVESTIGATION OF HAND CAPABILITIES UNDER A VARIETY OF PERFORMANCE CONDITIONS AND AN ATTEMPT TO EXPLAIN PERFORMANCE DIFFERENCES c54

Ram R. Bishu and Lisa Bronkema *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 14 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

Human capabilities such as dexterity, manipulability, and tactile perception are unique and render the hands as a very versatile, effective and a multipurpose tool. This is especially true for environments such as the EVA environment. However, with the use of the protective EVA gloves, there is much evidence to suggest that human performance decreases. In order to determine the nature and cause of this performance decrement, several performance tests were run which studied the effects of gloves on strength, tactile feedback, and range of motion. Tactile sensitivity was measured as a function of grip strength, and the results are discussed. Equipment which was developed to measure finger range of motion along with corresponding finger strength values is discussed. The results of these studies have useful implications for improved glove design. Author (revised)

MEASURING TRACK DENSITIES IN LUNAR GRAINS BY IMAGE ANALYSIS c91

George E. Blanford *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 10 p (For primary document see N94-25348 06-99)
Avail: CASI HC A02/MF A03

We have developed techniques to use digitized scanning electron micrographs and computer image analysis programs to measure track densities in lunar soil grains. Tracks were formed by highly ionizing solar energetic particles and cosmic rays during near surface exposure on the

Moon. The track densities are related to the exposure conditions (depth and time). Distributions of the number of grains as a function of their track densities can reveal the modality of soil maturation. We used a sample that had already been etched in 6 N NaOH at 118 C for 15 h to reveal tracks. We determined that back-scattered electron images taken at 50 percent contrast and approximately 49.8 percent brightness produced suitable high contrast images for analysis. We ascertained gray-scale thresholds of interest: 0-230 for tracks, 231 for masked regions, and 232-255 for background. We found no need to set an upper size limit for distinguishing tracks. We did use lower limits to exclude noise: 16 pixels at 15000x, 4 pixels at 10000x, 2 pixels at 6800x, and 0 pixels at 4600x. We used computer counting and measurement of area to obtain track densities. We found an excellent correlation with manual measurements for track densities below 1x10(exp 8) sq cm. For track densities between 1x10(exp 8) sq cm to 1x10(exp 9) sq cm, we found that a regression formula using the percentage area covered by tracks gave good agreement with manual measurements. Finally we used these new techniques to obtain a track density distribution that gave more detail and was more rapidly obtained than using manual techniques 15 years ago. Author (revised)

UNIFIED APPROACH FOR INCOMPRESSIBLE FLOWS c34

Tyne-Hsien Chang *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 6 p (For primary document see N94-25348 06-99)
Avail: CASI HC A02/MF A03

An unified approach for solving both compressible and incompressible flows was investigated in this study. The difference in CFD code development between incompressible and compressible flows is due to the mathematical characteristics. However, if one can modify the continuity equation for incompressible flows by introducing pseudocompressibility, the governing equations for incompressible flows would have the same mathematical characters as compressible flows. The application of a compressible flow code to solve incompressible flows becomes feasible. Among numerical algorithms developed for compressible flows, the Centered Total Variation Diminishing (CTVD) schemes possess better mathematical properties to damp out the spurious oscillations while providing high-order accuracy for high speed flows. It leads us to believe that CTVD schemes can equally well solve incompressible flows. In this study, the governing equations for incompressible flows include the continuity equation and momentum equations. The continuity equation is modified by adding a time-derivative of the pressure term containing the artificial compressibility. The modified continuity equation together with the unsteady momentum equations forms a hyperbolic-parabolic type of time-dependent system of equations. The continuity equation is modified by adding a time-derivative of the pressure term containing the artificial compressibility. The modified continuity equation together with the unsteady momentum equations forms a hyperbolic-parabolic type of time-dependent system of equations. Thus, the CTVD schemes can be implemented. In addition, the boundary conditions including physical and numerical boundary conditions must be properly specified to obtain accurate solution. The CFD code for this research is currently in progress. Flow past a circular cylinder will be used for numerical experiments to determine the accuracy and efficiency of the code before applying this code to more specific applications. Author (revised)

NON-INVASIVE OPTICAL DETECTION OF GLUCOSE IN CELL CULTURE NUTRIENT MEDIUM c51

Gerald L. Cote *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 11 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

The objective of the proposed research was to begin the development of a non-invasive optical sensor for measuring glucose concentration in the output medium of cell cultures grown in a unique NASA bioreactor referred to as an integrated rotating-wall vessel (IRWV). The input, a bovine serum based nutrient media, has a known glucose concentration. The cells within the bioreactor digest a portion of the glucose. Thus, the non-invasive optical sensor is needed to monitor the decrease in glucose due to cellular consumption since the critical parameters for sustained cellular productivity are glucose and pH. Previous glucose sensing techniques have used chemical reactions to quantify the glucose concentration. Chemical reactions, however, cannot provide for continuous, real time, non-invasive measurement as is required in this application. Our effort while in the fellowship program was focused on the design, optical setup, and testing of one bench top prototype non-invasive optical sensor using a mid-infrared absorption spectroscopy technique. Glucose has a fundamental vibrational absorption peak in the mid-infrared wavelength range at 9.6 micron. Preliminary absorption data using a CO2 laser were collected at this wavelength for water based glucose solutions at different concentrations and one bovine serum based nutrient medium (GTSF) with added glucose. The results showed near linear absorption responses for the glucose-in-water data with resolutions as high at 108 mg/dl and as low as 10 mg/dl. The nutrient medium had a resolution of 291 mg/dl. The variability of the results was due mainly to thermal and polarization drifts of the laser while the decrease in sensitivity to glucose in the nutrient medium was expected due to the increase in the number of confounders present in the nutrient medium. A multispectral approach needs to be used to compensate for these confounders. The CO2 laser used for these studies was wavelength tunable (9.2 to 10.8 micrometers), however, it was to unstable across wavelengths to test the multispectral approach. From this research, further NASA support was obtained to continue the work throughout the year in which a more stable light source will be used at smaller, near-infrared, wavelengths. It is anticipated that a more compact, non-invasive, optical glucose sensor will be realized which can be used with a bioreactor on future space shuttle missions. It is also anticipated that a multispectral optical sensor may be used to determine the concentration of other molecules needed within the NASA bioreactor, such as fructose and galactose. Author

A GEOCHEMICAL STUDY OF ACAPULCOITE AND LODRANITE METEORITES c90

Stephen W. Field *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 13 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

Lodranites and acapulcoites (primitive achondrites) are two classes of meteorites with geochemical signatures similar to chondrite meteorites. Lodranites and acapulcoites, however, have few or none of the chondrules characteristic of the chondrites. Texturally the primitive achondrites appear to have been recystallized though planetary igneous or metamorphic processes. A study of five primitive achondrites, two lodranites, two acapulcoites, and one supposedly intermediate acapulcoite/lodranite, were analyzed petrographically and geochemically to determine the igneous and metamorphic processes which have affected them. Acapulcoites show little evidence of melt extraction. The geochemistry of lodranite samples indicates silicate and metal/sulfide melts were removed from the rocks. The mineralogy and geochemistry of the intermediate meteorite suggest the rock is a metal rich acapulcoite and not a lodranite. Author

LOADING, ELECTROMYOGRAPH, AND MOTION DURING EXERCISE c52

Fernando Figueroa *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 11 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

A system is being developed to gather kineto-dynamic data for a study to determine the load vectors applied to bone during exercise on equipment similar to that used in space. This information will quantify bone loading for exercise countermeasures development. Decreased muscle loading and external loading of bone during weightlessness results in cancellous bone loss of 1 percent per month in the lower extremities and 2 percent per month in the calcaneous. It is hypothesized that loading bone appropriately during exercise may prevent the bone loss. The system consists of an ergometer instrumented to provide position of the pedal (foot), pedaling forces on the foot (on the sagittal plane), and force on the seat. Accelerometers attached to the limbs will provide acceleration. These data will be used as input to an analytical model of the limb to determine forces on the bones and on groups of muscles. EMG signals from activity in the muscles will also be used in conjunction with the equations of mechanics of motion to be able to discern forces exerted by specific muscles. The tasks to be carried out include: design of various mechanical components to mount transducers, specification of mechanical components, specification of position transducers, development of a scheme to control the data acquisition instruments (TEAC recorder and optical encoder board), development of a dynamic model of the limbs in motion, and development of an overall scheme for data collection analysis and presentation. At the present time, all the hardware components of the system are operational, except for a computer board to gather position data from the pedals and crank. This board, however, may be put to use by anyone with background in computer based instrumentation. The software components are not all done. Software to transfer data recorded from the EMG measurements is operational, software to drive the optical encoder card is mostly done. The equations to model the kinematics and dynamics of motion of the limbs have been developed, but they have not yet been implemented in software. Aside from the development of the hardware and software components of the system, the methodology to use accelerometers and encoders and the formulation of the appropriate equations are an important contribution to the area of biomechanics, particularly in space applications. FAILURE DETECTION AND RECOVERY IN THE ASSEMBLY/CONTINGENCY SUBSYSTEM **c32**

Rex E. Gantenbein *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 15 p (For primary document see N94-25348 06-99)

Avail: CASI HC A03/MF A03

The Assembly/Contingency Subsystem (ACS) is the primary communications link on board the Space Station. Any failure in a component of this system or in the external devices through which it communicates with ground-based systems will isolate the Station. The ACS software design includes a failure management capability (ACFM) that provides protocols for failure detection, isolation, and recovery (FDIR). The the ACFM design requirements as outlined in the current ACS software requirements specification document are reviewed. The activities carried out in this review include: (1) an informal, but thorough, end-to-end failure mode and effects analysis of the proposed software architecture for the ACFM; and (2) a prototype of the ACFM software, implemented as a C program under the UNIX operating system. The purpose of this review is to evaluate the FDIR protocols specified in the ACS design and the specifications themselves in light of their use in implementing the ACFM. The basis of failure detection in the ACFM is the loss of signal between the ground and the Station, which (under the appropriate circumstances) will initiate recovery to restore communications. This recovery involves the reconfiguration of the ACS to either a backup set of components or to a degraded communications mode. The initiation of recovery depends largely on the criticality of the failure mode, which is defined by tables in the ACFM and can be modified to provide a measure of flexibility in recovery procedures. INTEGRATED RISK MANAGEMENT **c81**

J. L. Hunsucker *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 14 p (For primary document see N94-25348 06-99)

Avail: CASI HC A03/MF A03

The purpose of this report is to first present a basis or foundation for the building of an integrated risk management plan and them to present the plan. The integration referred to is across both the temporal and the hierarchical dimensions. Complexity, consequence, and credibility seem to be driving the need for the consideration of risk. Reduction of personal bias and reproducibility of the decision making process seem to be driving the consideration of a formal risk plan. While risk can be used as either a selection tool or a control tool, this paper concentrates on the selection usage. Risk relies on stated purpose. The tightness of the definition of purpose and success is directly reflected in the definition and control of risk. Much of a risk management plan could be designed by the answers to the questions of why, what, who, when, and where. However, any plan must provide the following information about a threat or risk: likelihood, consequence, predictability, reliability, and reproducibility. While the environment at NASA is seen as warm, but not hot, for the introduction of a risk program, some encouragement is seen if the following problems are addressed: no champion, no commitment of resource, confused definitions, lack of direction and focus, a hard sell, NASA culture, many choices of assessment methods, and cost. The plan is designed to follow the normal method of doing work and is structured to follow either the work break down structure or a functional structure very well. The parts of the plan include: defining purpose and success, initial threat assessment, initial risk assessment, reconciling threats and parameters, putting part of the information down and factoring the information back into the decision process as it comes back up, and developing inferences. Two major suggestions are presented. One is to build an office of risk management to be used as a resource by managers in doing the risk process. Another is to form a pilot program to try out the details in the plan and modify the method where needed. Author

STRATEGIES FOR RECRUITING ADDITIONAL AFRICAN AMERICANS INTO THE NASA JSC SUMMER FACULTY FELLOWS PROGRAM **c80**

Ladelle M. Hyman *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 15 p (For primary document see N94-25348 06-99)

Avail: CASI HC A03/MF A03

African Americans have participated sporadically in the NASA JSC Summer Faculty Fellows Program--none in 1992 and four in 1993. There is a pool of African Americans who are both qualified to provide services and willing to participate in initiatives which support technologies required for future JSC programs. They can provide human support and handle mission operations, spacecraft systems, planet surface systems, and management tools. Most of these faculty teach at historically black colleges and universities (HBCU's). This research will document the current recruitment system, critique it, and develop a strategy which will facilitate the diversification of the NASA JSC Summer Faculty Fellows Program. While NASA currently mails notices to HBCU's, such notices have generated few applications from, and fewer selections of, targeted faculty. To increase the participation of African Americans in the NASA JSC Summer Faculty Fellows Program, this participant will prepare a strategy which includes a document which identifies HBCU-targeted faculty and enumerates more formally extensive and intensive communication procedures. A fifteen-minute panel discussion, which will include a video, will be delivered during the annual meeting of the American Society for Engineering Education (ASEE) to be held in Edmonton, Alberta, Canada, June 26-29, 1994. An announcement letter will be mailed to targeted faculty; follow-up telephone calls and personal visits will be made and a checklist flowchart will be completed by key NASA personnel or designee. Although initially limited to NASA JSC's recruitment of African Americans, this strategy may be broadened to include other NASA sites and other targeted minority groups. Author

IMAGE REMAPPING STRATEGIES APPLIED AS PROTHESES FOR THE VISUALLY IMPAIRED **c54**

Curtis D. Johnson *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 11 p (For primary document see N94-25348 06-99)

Avail: CASI HC A03/MF A03

Maculopathy and retinitis pigmentosa (rp) are two vision defects which render the afflicted person with impaired ability to read and recognize visual patterns. For some time there has been interest and work on the use of image remapping techniques to provide a visual aid for individuals with these impairments. The basic concept is to remap an image according to some mathematical transformation such that the image is warped around a maculopathic defect (scotoma) or within the rp foveal region of retinal

sensitivity. NASA/JSC has been pursuing this research using angle invariant transformations with testing of the resulting remapping using subjects and facilities of the University of Houston, College of Optometry. Testing is facilitated by use of a hardware device, the Programmable Remapper, to provide the remapping of video images. This report presents the results of studies of alternative remapping transformations with the objective of improving subject reading rates and pattern recognition. In particular a form of conformal transformation was developed which provides for a smooth warping of an image around a scotoma. In such a case it is shown that distortion of characters and lines of characters is minimized which should lead to enhanced character recognition. In addition studies were made of alternative transformations which, although not conformal, provide for similar low character distortion remapping. A second, non-conformal transformation was studied for remapping of images to aid rp impairments. In this case a transformation was investigated which allows remapping of a vision field into a circular area representing the foveal retina region. The size and spatial representation of the image are selectable. It is shown that parametric adjustments allow for a wide variation of how a visual field is presented to the sensitive retina. This study also presents some preliminary considerations of how a prosthetic device could be implemented in a practical sense, vis-a-vis, size, weight and portability.

NEAR SURFACE ANALYSIS c46
Gordon G. Johnson *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 11 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

This is a study to assist in the understanding of earth near surface structure. Higher order moments are used to detect the density distribution as well as to seek patterns found in geological structures. It is shown how higher order moments at points outside a mass structure are determined as well as how to recover the mass distribution from the higher order moments. It is interesting to note that the first moment at a point P outside the mass structure, V(sub O)(P), is the entire mass and the second moment, V(sub 1)(P), is the potential at P due to the mass structure. Usually only the mass and the potential function are used to determine the density distribution in a body. An infinite function sequence (V(sub n)(P))(sub n=0)(sup infinity) is required to uniquely determine the density distribution.

INFLUENCE OF TEST CONFIGURATION ON THE COMBUSTION CHARACTERISTICS OF POLYMERS AS IGNITION SOURCES c25
Howard L. Julien *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 13 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

The experimental evaluation of polymers as ignition sources for metals was accomplished at the NASA White Sands Test Facility (WSTF) using a standard promoted combustion test. These tests involve the transient burning of materials in high-pressure oxygen environments. They have provided data from which design decisions can be made; data include video recordings of ignition and non-ignition for specific combinations of metals and polymers. Other tests provide the measured compositions of combustion products for polymers at select burn times and an empirical basis for estimating burn rates. With the current test configuration, the detailed analysis of test results requires modeling a three-dimensional, transient convection process involving fluid motion, thermal conduction and convection, the diffusion of chemical species, and the erosion of sample surface. At the high pressure extremes, it even requires the analysis of turbulent, transient convection where the physics of the problem are not well known and the computation requirements are not practical at this time. An alternative test configuration that can be analyzed with a relatively-simple convection model was developed during the summer period. The principal change constitutes replacing a large-diameter polymer disk at the end of the metal test rod with coaxial polymer cylinders that have a diameter nearer to that of the metal rod. The experimental objective is to assess the importance of test geometries on the promotion of metal ignition by testing with different lengths of the polymer and, with an extended effort, to analyze the surface combustion in the redesigned promoted combustion tests through analytical modeling of the process. The analysis shall use the results of cone-calorimeter tests of the polymer material to model primary chemical reactions and, with proper design of the promoted combustion test, modeling of the convection process could be conveniently limited to a quasi-steady boundary layer analysis where the economical solution of parabolic equations is involved. The products for the summer period are: (1) a conceptual-level redesign of the test apparatus, and (2) the development and use of an approximate integral boundary layer analysis to demonstrate the influence of geometry changes prior to testing. A computer code STAN5, an accurate numerical boundary layer model whose earlier versions were developed for the NASA Lewis Research Center by the Fellow, also was installed and validated on the WSTF and New Mexico State University computer systems as a starting point in the development of a more detailed fluid mechanics and combustion model.

CONSIDERATIONS REGARDING THE DEPLOYMENT OF HYPERMEDIA AT JSC c82
Charles J. Kacmar *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 1 Dec. 1993 15 p (For primary document see N94-25348 06-99)
Avail: CASI HC A03/MF A03

Electronic documents and systems are becoming the primary means of managing information for ground and space operations at NASA. These documents will utilize hypertext and hypermedia technologies to aid users in structuring and accessing information. Documents will be composed of static and dynamic data consisting of user-defined annotations and hypermedia links. The report consists of three major sections. First, it provides an overview of hypermedia and surveys the use of hypermedia throughout JSC. Second, it briefly describes a prototypical hypermedia system that was developed in conjunction with this work. This system was constructed to demonstrate various hypermedia features and to serve as a platform for supporting the electronic documentation needs for the MIDAS system developed by the Intelligent Systems Branch of the Automation and Robotics Division (Pac92). Third, it discusses emerging hypermedia technologies which have either been untapped by vendors or present significant challenges to the Agency.

The JSC NASA/ASEE Summer Faculty Fellowship Program was conducted by Texas A&M University and JSC. The objectives of the program, which began nationally in 1964 and at JSC in 1965, are (1) to further the professional knowledge of qualified engineering and science faculty members; (2) to stimulate an exchange of ideas between participants and NASA; (3) to enrich and refresh the research and teaching activities of participant's institutions; and (4) to contribute to the research objectives of the NASA centers. Each faculty fellow spent at least 10 weeks at JSC engaged in a research project in collaboration with a NASA/JSC colleague. A compilation of the final reports on the research projects completed by the faculty fellows during the summer of 1993 is presented. For individual titles, see N94-25368 through N94-25384.

DESIGN AND TESTING OF A UNIQUE RANDOMIZED GRAVITY, CONTINUOUS FLOW BIOREACTOR c51
Carroll B. Lassiter *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering

Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 15 p (For primary document see N94-25367 06-99)
Avail: CASI HC A03/MF A03

A rotating, null gravity simulator, or Couette bioreactor was successfully used for the culture of mammalian cells in a simulated microgravity environment. Two limited studies using Lipomyces starkeyi and Streptomyces clavuligerus were also conducted under conditions of simulated weightlessness. Although these studies with microorganisms showed promising preliminary results, oxygen limitations presented significant limitations in studying the biochemical and cultural characteristics of these cell types. Microbial cell systems such as bacteria and yeast promise significant potential as investigative models to study the effects of microgravity on membrane transport, as well as substrate induction of inactive enzyme systems. Additionally, the smaller size of the microorganisms should further reduce the gravity induced oscillatory particle motion and thereby improve the microgravity simulation on earth. Focus is on the unique conceptual design, and subsequent development of a rotating bioreactor that is compatible with the culture and investigation of microgravity effects on microbial systems. The new reactor design will allow testing of highly aerobic cell types under simulated microgravity conditions. The described reactor affords a mechanism for investigating the long term effects of reduced gravity on cellular respiration, membrane transfer, ion exchange, and substrate conversions. It offers the capability of dynamically altering nutrients, oxygenation, pH, carbon dioxide, and substrate concentration without disturbing the microgravity simulation, or Couette flow, of the reactor. All progeny of the original cell inoculum may be acclimated to the simulated microgravity in the absence of a substrate or nutrient. The reactor has the promise of allowing scientists to probe the long term effects of weightlessness on cell interactions in plants, bacteria, yeast, and fungi. The reactor is designed to have a flow field growth chamber with uniform shear stress, yet transfer high concentrations of oxygen into the culture medium. The system described allows for continuous, on line sampling for production of product without disturbing fluid and particle dynamics in the reaction chamber. It provides for the introduction of substrate, or control substances after cell adaptation to simulated microgravity has been accomplished. The reactor system provides for the nondisruptive, continuous flow replacement of nutrient and removal of product. On line monitoring and control of growth conditions such as pH and nutrient status are provided. A rotating distribution valve allows cessation of growth chamber rotation, thereby preserving the simulated microgravity conditions over longer periods of time. Author (revised)

AN EVALUATION OF THREE-DIMENSIONAL SENSORS FOR THE EXTRAVEHICULAR ACTIVITY HELPER/RETREIVER c54
Michael Magee *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 8 p (For primary document see N94-25367 06-99)
Avail: CASI HC A02/MF A03

The Extravehicular Activity Retriever/Helper (EVAHR) is a robotic device currently under development at the NASA Johnson Space Center that is designed to fetch objects or to assist in retrieving an astronaut who may have become inadvertently de-tethered. The EVAHR will be required to exhibit a high degree of intelligent autonomous operation and will base much of its reasoning upon information obtained from one or more three-dimensional sensors that it will carry and control. At the highest level of visual cognition and reasoning, the EVAHR will be required to detect objects, recognize them, and estimate their spatial orientation and location. The recognition phase and estimation of spatial pose will depend on the ability of the vision system to reliably extract geometric features of the objects such as whether the surface topologies observed are planar or curved and the spatial relationships between the component surfaces. In order to achieve these tasks, accurate sensing of the operational environment and objects in the environment will therefore be critical. The qualitative and quantitative results of empirical studies of three sensors that are capable of providing three-dimensional information to the EVAHR, but using completely different hardware approaches are documented. The first of these devices is a phase shift laser with an effective operating range (ambiguity interval) of approximately 15 meters. The second sensor is a laser triangulation system designed to operate at much closer range and to provide higher resolution images. The third sensor is a dual camera stereo imaging system from which range images can also be obtained. The remainder of the report characterizes the strengths and weaknesses of each of these systems relative to quality of data extracted and how different object characteristics affect sensor operation. DEVELOPMENT OF PROGRAMMABLE ARTIFICIAL NEURAL NETWORKS c63
Andrew J. Meade *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 14 p (For primary document see N94-25367 06-99)
Avail: CASI HC A03/MF A03

Conventionally programmed digital computers can process numbers with great speed and precision, but do not easily recognize patterns or imprecise or contradictory data. Instead of being programmed in the conventional sense, artificial neural networks are capable of self-learning through exposure to repeated examples. However, the training of an ANN can be a time consuming and unpredictable process. A general method is being developed to mate the adaptability of the ANN with the speed and precision of the digital computer. This method was successful in building feedforward networks that can approximate functions and their partial derivatives from examples in a single iteration. The general method also allows the formation of feedforward networks that can approximate the solution to nonlinear ordinary and partial differential equations to desired accuracy without the need of examples. It is believed that continued research will produce artificial neural networks that can be used with confidence in practical scientific computing and engineering applications.

ROBOTICS IN A CONTROLLED, ECOLOGICAL LIFE SUPPORT SYSTEM c54
Gaines E. Miles and Kimberly J. Krom *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 27 p (For primary document see N94-25367 06-99)
Avail: CASI HC A03/MF A03

Controlled, Ecological Life Support Systems (CELSS) that utilize plants to provide food, water and oxygen could consume considerable amounts of labor unless crop production, recovery and processing are automated. Robotic manipulators equipped with special end-effectors and programmed to perform the sensing and materials handling tasks would minimize the amount of astronaut labor required. The Human Rated Test Facility (HRTF) planned for Johnson Space Center could discover and demonstrate techniques of crop production which can be reliably integrated with machinery to minimize labor requirements. Before the physical components (shelves, lighting fixtures, etc.) can be selected, a systems analysis must be performed to determine which alternative processes should be followed and how the materials handling tasks should be automated. Given that the current procedures used to grow crops in a CELSS may not be the best methods to automate, then what are the alternatives? How may plants be grown, harvested, processed for food, and the inedible components recycled? What commercial technologies current exist? What research efforts are underway to develop new technologies which might satisfy the need for automation in a CELSS? The answers to these questions should prove enlightening and provide some of the information necessary to perform the systems analysis. The planting, culturing, gathering, threshing and separation, food processing, and recovery of inedible portions of wheat were studied. The basic biological and materials handling processes of each task are defined and discussed. Current practices at Johnson Space Center and other NASA centers are described and compared to common production practices in the plant production industry. Technologies currently being researched which might be applicable are identified and illustrated. Finally, based on this knowledge, several scenarios are proposed for automating the tasks for wheat. MODELLING EARLY FAILURES IN SPACE STATION FREEDOM **c38**

Sharon E. Navard *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 13 p (For primary document see N94-25367 06-99)

Avail: CASI HC A03/MF A03

A major problem encountered in planning for Space Station Freedom is the amount of maintenance that will be required. To predict the failure rates of components and systems aboard Space Station Freedom, the logical approach is to use data obtained from previously flown spacecraft. In order to determine the mechanisms that are driving the failures, models can be proposed, and then checked to see if they adequately fit the observed failure data obtained from a large variety of satellites. For this particular study, failure data and truncation times were available for satellites launched between 1976 and 1984; no data past 1984 was available. The study was limited to electrical subsystems and assemblies, which were studied to determine if they followed a model resulting from a mixture of exponential distributions. Author

A COMPARATIVE EVALUATION PLAN FOR THE MAINTENANCE, INVENTORY, AND LOGISTICS PLANNING (MILP) SYSTEM HUMAN-COMPUTER INTERFACE (HCI) Final Report **c81**

Scott P. Overmyer *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 15 p (For primary document see N94-25367 06-99)

Avail: CASI HC A03/MF A03

The primary goal of this project was to develop a tailored and effective approach to the design and evaluation of the human-computer interface (HCI) to the Maintenance, Inventory and Logistics Planning (MILP) System in support of the Mission Operations Directorate (MOD). An additional task that was undertaken was to assist in the review of Ground Displays for Space Station Freedom (SSF) by attending the Ground Displays Interface Group (GDIG), and commenting on the preliminary design for these displays. Based upon data gathered over the 10 week period, this project has hypothesized that the proper HCI concept for navigating through maintenance databases for large space vehicles is one based upon a spatial, direct manipulation approach. This dialogue style can be then coupled with a traditional text-based DBMS, after the user has determined the general nature and location of the information needed. This conclusion is in contrast with the currently planned HCI for MILP which uses a traditional form-fill-in dialogue style for all data access and retrieval. In order to resolve this difference in HCI and dialogue styles, it is recommended that comparative evaluation be performed which combines the use of both subjective and objective metrics to determine the optimal (performance-wise) and preferred approach for end users. The proposed plan has been outlined in the previous paragraphs and is available in its entirety in the Technical Report associated with this project. Further, it is suggested that several of the more useful features of the Maintenance Operations Management System (MOMS), especially those developed by the end-users, be incorporated into MILP to save development time and money. MODELING AND ANALYSIS OF SELECTED SPACE STATION COMMUNICATIONS AND TRACKING SUBSYSTEMS **c32**

Elmer Raydean Richmond *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 15 p (For primary document see N94-25367 06-99)

Avail: CASI HC A03/MF A03

The Communications and Tracking System on board Space Station Freedom (SSF) provides space-to-ground, space-to-space, audio, and video communications, as well as tracking data reception and processing services. Each major category of service is provided by a communications subsystem which is controlled and monitored by software. Among these subsystems, the Assembly/Contingency Subsystem (ACS) and the Space-to-Ground Subsystem (SGS) provide communications with the ground via the Tracking and Data Relay Satellite (TDRS) System. The ACS is effectively SSF's command link, while the SGS is primarily intended as the data link for SSF payloads. The research activities of this project focused on the ACS and SGS antenna management algorithms identified in the Flight System Software Requirements (FSSR) documentation, including: (1) software modeling and evaluation of antenna management (positioning) algorithms; and (2) analysis and investigation of selected variables and parameters of these antenna management algorithms i.e., descriptions and definitions of ranges, scopes, and dimensions. In a related activity, to assist those responsible for monitoring the development of this flight system software, a brief summary of software metrics concepts, terms, measures, and uses was prepared. INVESTIGATING PYROLYSIS/INCINERATION AS A METHOD OF RESOURCE RECOVERY FROM SOLID WASTE **c54**

Bobby J. Robertson and Christopher S. LeMay *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 11 p (For primary document see N94-25367 06-99)

Avail: CASI HC A03/MF A03

Pyrolysis/incineration (P/I) is a physicochemical method for the generation of recoverable resources from solid waste materials such as inedible plant biomass (IPB), paper, plastics, cardboard, etc. P/I permits the collection of numerous gases with a minimal amount of solid residue. Pyrolysis, also known as starved air incineration, is usually conducted at relatively high temperatures (greater than 500 deg C) in the absence of oxygen. Incineration is conducted at lower temperatures in the presence of oxygen. The primary purpose of this study was to design, construct, and test a model P/I. The system design includes safety requirements for temperature and pressure. The objectives of this study were: (1) to design and construct a P/I system for incorporation with the Hybrid Regenerative Water Recovery System; (2) to initiate testing of the P/I system; (3) to collect and analyze P/I system data; (4) to consider test variables; and (5) to determine the feasibility of P/I as an effective method of resource recovery. A P/I system for the recovery of reuseable resources from solid waste materials was designed, constructed, and tested. Since a large amount of inedible plant biomass (IPB) will be generated in a space-based habitat on the lunar surface and Mars, IPB was the primary waste material tested in the system. Analysis of the effluent gases was performed to determine which gases could be used in a life support system. Author

DEVELOPMENT OF A MODEL TO ASSESS ORTHOSTATIC RESPONSES **c52**

Marilyn Rubin *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 15 p (For primary document see N94-25367 06-99)

Avail: CASI HC A03/MF A03

A major change for crewmembers during weightlessness in microgravity is the redistribution of body fluids from the legs into the abdomen, thorax, and head. The fluids continue to be sequestered in these areas throughout the flight. Upon reentry into gravity on landing, these same body fluids are displaced again to their normal locations, however, not without hazardous incidence to the crewmembers. The problem remains that upon landing, crewmembers are subject to orthostasis, that is, the blood flowing into the legs reduces the blood supply to the brain and may result in the crewmember fainting. The purpose of this study was to develop a model of testing orthostatic responses of blood pressure regulating mechanisms of the cardiovascular system, when challenged, to maintain blood pressure to the brain. To accomplish this, subjects' responses were assessed as they proceeded from the supine position of progressive head-up tilt positions of 30 deg, 60 deg, and 90 deg angles. A convenience sample consisted of 21 subjects, females (N=11) and males (N=10), selected from a list of potential subjects available through the NASA subject screening office. The methodology included all non-invasive measurements of blood pressure, heart rate, echocardiograms, cardiac output, cardiac stroke volume, fluid shifts in the thorax, ventricular ejection and velocity times, and skin blood perfusion. The Fischer statistical analysis was done of all data with the significance level at .05. Significant differences were demonstrated in many instances of changes of posture for all variables. Based on the significance of the findings of this study, this model for assessing orthostatic responses does provide an adequate challenge to the blood pressure regulatory systems. While individuals may use different adaptations to incremental changes in gravity, the subjects, in aggregate, demonstrated significant adaptive cardiovascular changes to orthostatic challenges which were presented to them. Orthostatic intolerance, following space flight, has received substantial attention because of the possibility that it compromises astronaut safety and reduces the ability of astronauts to function at peak performance levels upon return to a one-g environment. Many pre- and post-flight studies are performed to evaluate changes in hemodynamic responses to orthostatic challenges after shuttle missions. The purpose of this present project is to validate bioimpedance as a means to acquire stroke volume and other hemodynamic information in these studies. In this study, ten male and ten female subjects were subjected to simultaneous measurements of thoracic bioimpedance and Doppler ultrasonic velocimetry under supine, 10 degree head down and 30 degree head up conditions. Paired measurements were made during six periods of five seconds breath holding, over a two minute period, for each of the three positions. Stroke volume was calculated by three bioimpedance techniques and ultrasonic Doppler. Author (revised)

CONCEPTUAL COMMUNICATIONS SYSTEM DESIGN IN THE 25.25-27.5 AND 37.0-40.5 GHz FREQUENCY BANDS **c32**
Michael W. Thompson *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 15 p (For primary document see N94-25367 06-99)
Avail: CASI HC A03/MF A03

Future space applications are likely to rely heavily on Ka-band frequencies (20-40 GHz) for communications traffic. Many space research activities are now conducted using S-band and X-band frequencies, which are becoming congested and require a degree of pre-coordination. In addition to providing relief from frequency congestion, Ka-band technologies offer potential size, weight, and power savings when compared to lower frequency bands. The use of the 37.0-37.5 and 40.0-40.5 GHz bands for future planetary missions was recently approved at the 1992 World Administrative Radio Conference (WARC-92). WARC-92 also allocated the band 25.25-27.5 GHz to the Intersatellite Service on a primary basis to accommodate Data Relay Satellite return link requirements. Intersatellite links are defined to be between artificial satellites and thus a communication link with the surface of a planetary body, such as the moon, and a relay satellite orbiting that body are not permitted in this frequency band. This report provides information about preliminary communications system concepts for forward and return links for earth-Mars and earth-lunar links using the 37.0-37.5 (return link) and 40.0-40.5 (forward link) GHz frequency bands. In this study we concentrate primarily on a conceptual system for communications between earth and a single lunar surface terminal (LST), and between earth and a single Mars surface terminal (MST). Due to large space losses, these links have the most stringent link requirements for an overall interplanetary system. The earth ground station is assumed to be the Deep Space Network (DSN) using either 34 meter or 70 meter antennas. We also develop preliminary communications concepts for a space-to-space system operating at near 26 GHz. Space-to-space applications can encompass a variety of operating conditions, and we consider several 'typical' scenarios described in more detail later in this report. Among these scenarios are vehicle-to-vehicle communications, vehicle-to-geosyncronous satellite (GEO) communications, and GEO-to-GEO communications. Additional details about both the interplanetary and space-to-space communications systems are provided in an 'expanded' final report which has been submitted to the Tracking and Communications Division (TCD) at the NASA Johnson Space Center. LOADING, ELECTROMYOGRAPH, AND MOTION DURING EXERCISE **c52**
Beth A. Todd *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 11 p (For primary document see N94-25367 06-99)
Avail: CASI HC A03/MF A03

A bicycle ergometer system has been developed to determine forces acting in specific muscles and muscle groups for both cycling and isometric exercise. The bicycle has been instrumented with encoders, accelerometers, and load cells. A harnessing system has been developed to keep subjects in place during isometric exercise. EMG data will also be collected with electrodes attached to various muscles on the subject's leg. Data has been collected for static loading and will be collected for cycling in both an earth-based laboratory and on the KC-135. Once the data is analyzed, the forces will be entered into finite element models of bones of the lower extremities. A finite element model of the tibia-fibula has been generated from the experimental subject's MRI data. The linear elastic isoparametric brick elements representing the bones are connected by linear elastic isoparametric shell elements placed at the locations of ligaments. Models will be generated for the calcaneus and the femur. Material properties for the various tissues will be taken from the literature. The experimentally determined muscle forces will be applied to the models to determine the stress distribution which is created in the bones. Author

MODELING OF THE GROUND-TO-SSFMB LINK NETWORKING FEATURES USING SPW **c32**
John C. Watson *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 15 p (For primary document see N94-25367 06-99)
Avail: CASI HC A03/MF A03

This report describes the modeling and simulation of the networking features of the ground-to-Space Station Freedom manned base (SSFMB) link using COMDISCO signal processing work-system (SPW). The networking features modeled include the implementation of Consultative Committee for Space Data Systems (CCSDS) protocols in the multiplexing of digitized audio and core data into virtual channel data units (VCDU's) in the control center complex and the demultiplexing of VCDU's in the onboard baseband signal processor. The emphasis of this work has been placed on techniques for modeling the CCSDS networking features using SPW. The objectives for developing the SPW models are to test the suitability of SPW for modeling networking features and to develop SPW simulation models of the control center complex and space station baseband signal processor for use in end-to-end testing of the ground-to-SSFMB S-band single access forward (SSAF) link. SOFTWARE ENGINEERING METHODOLOGIES AND TOOLS **c61**

Lawrence M. Wilcox *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 15 p (For primary document see N94-25367 06-99)
Avail: CASI HC A03/MF A03

Over the years many engineering disciplines have developed, including chemical, electronic, etc. Common to all engineering disciplines is the use of rigor, models, metrics, and predefined methodologies. Recently, a new engineering discipline has appeared on the scene, called software engineering. For over thirty years computer software has been developed and the track record has not been good. Software development projects often miss schedules, are over budget, do not give the user what is wanted, and produce defects. One estimate is there are one to three defects per 1000 lines of deployed code. More and more systems are requiring larger and more complex software for support. As this requirement grows, the software development problems grow exponentially. It is believed that software quality can be improved by applying engineering principles. Another compelling reason to bring the engineering disciplines to software development is productivity. It has been estimated that productivity of producing software has only increased one to two percent a year in the last thirty years. Ironically, the computer and its software have contributed significantly to the industry-wide productivity, but computer professionals have done a poor job of using the computer to do their job. Engineering disciplines and methodologies are now emerging supported by software tools that address the problems of software development. This paper addresses some of the current software engineering methodologies as a backdrop for the general evaluation of computer assisted software engineering (CASE) tools from actual installation of and experimentation with some specific tools. SPACE STATION FLEXIBLE DYNAMICS UNDER PLUME IMPINGEMENT **c18**

Trevor Williams *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 14 p (For primary document see N94-25367 06-99)
Avail: CASI HC A03/MF A03

Assembly of the Space Station requires numerous construction flights by the Space Shuttle. A particularly challenging problem is that of control of each intermediate station configuration when the shuttle orbiter is approaching it to deliver the next component. The necessary braking maneuvers cause orbiter thruster plumes to impinge on the station, especially its solar arrays. This in turn causes both overall attitude errors and excitation of flexible-body vibration modes. These plume loads are predicted to lead to CMG saturation during the approach of the orbiter to the SC-5 station configuration, necessitating the use of the station RCS jets for desaturation. They are also expected to lead to significant excitation of solar array vibrations. It is therefore of great practical importance to investigate the effects of plume loads on the flexible dynamics of station configuration SC-5 as accurately as possible. However, this system possesses a great many flexible modes (89 below 5 rad/s), making analysis time-consuming and complicated. Model reduction techniques can be used to overcome this problem, reducing the system model to one which retains only the significant dynamics, i.e. those which are strongly excited by the control inputs or plume disturbance forces and which strongly couple with the measured outputs. The particular technique to be used in this study is the subsystem balancing approach which was previously developed by the present investigator. This method is very efficient computationally. Furthermore, it gives accurate results even for the difficult case where the structure has many closed-spaced natural frequencies, when standard modal truncation can give misleading results. Station configuration SC-5 is a good example of such a structure. Author (revised)

A MULTIMEDIA ADULT LITERACY PROGRAM: COMBINING NASA TECHNOLOGY, INSTRUCTIONAL DESIGN THEORY, AND AUTHENTIC LITERACY CONCEPTS **c80**

Jerry W. Willis *In* NASA. Johnson Space Center, National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, Volume 2 Dec. 1993 13 p (For primary document see N94-25367 06-99)
Avail: CASI HC A03/MF A03

For a number of years, the Software Technology Branch of the Information Systems Directorate has been involved in the application of cutting edge hardware and software technologies to instructional tasks related to NASA projects. The branch has developed intelligent computer aided training shells, instructional applications of virtual reality and multimedia, and computer-based instructional packages that use fuzzy logic for both instructional and diagnostic decision making. One outcome of the work on space-related technology-supported instruction has been the creation of a significant pool of human talent in the branch with current expertise on the cutting edges of instructional technologies. When the human talent is combined with advanced technologies for graphics, sound, video, CD-ROM, and high speed computing, the result is a powerful research and development group that both contributes to the applied foundations of instructional technology and creates effective instructional packages that take advantage of a range of advanced technologies. Several branch projects are currently underway that combine NASA-developed expertise to significant instructional problems in public education. The branch, for example, has developed intelligent computer aided software to help high school students learn physics and staff are currently working on a project to produce educational software for young children with language deficits. This report deals with another project, the adult literacy tutor. Unfortunately, while there are a number of computer-based instructional packages available for adult literacy instruction, most of them are based on the same instructional models that failed these students when they were in school. The teacher-centered, discrete skill and drill-oriented, instructional strategies, even when they are supported by color computer graphics and animation, that form the foundation for most of the computer-based literacy packages currently on the market may not be the most effective or most desirable way to use computer technology in literacy programs. This project is developing a series of instructional packages that are based on a different instructional model - authentic instruction. The instructional development model used to create these packages is also different. Instead of using the traditional five stage linear, sequential model based on behavioral learning theory, the project uses the recursive, reflective design and development model (R2D2) that is based on cognitive learning theory, particularly the social constructivism of Vygotsky, and an epistemology based on critical theory. Using alternative instructional and instructional development theories, the result of the summer faculty fellowship is LiteraCity, a multimedia adult literacy instructional package that is a simulation of finding and applying for a job. The program, which is about 120 megabytes, is distributed on CD-ROM.

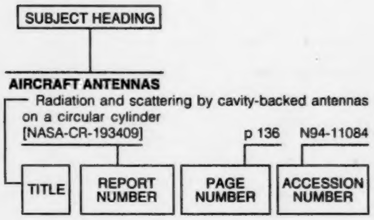
SUBJECT INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 32 NUMBER 6

Typical Subject Index Listing



The subject heading is a key to the subject content of the document. Titles, report numbers, and accession numbers of pertinent documents are provided under each subject heading. When the title is insufficiently descriptive of the document content, a title extension is added, separated from the title by three hyphens. The report number helps to indicate the type of document cited (e.g., NASA report, NASA translation, NASA contractor report). The accession number is the number by which the document abstracts are arranged in this journal and by which the document is sold or requested. The page number helps you locate the citation in the abstract section. The titles, with title extensions if present, are arranged under each subject heading in ascending accession number order. The subject headings have been selected from the latest revision of the *NASA Thesaurus*.

A

A STARS
UV spectral variability in the Herbig Ae star HR 5999. 11: The accretion interpretation
[NASA-CR-189313] p 2599 N94-23334
Observational studies of the clearing phase in proto-planetary disk systems
[NASA-CR-195182] p 2604 N94-25265
ABERRATION
Polarization analysis of a balloon-borne solar magnetograph
[NASA-CR-193908] p 2345 N94-24852
ABLATION
The internal structure and dynamics of the railgun plasma armature between infinitely wide ablating rails
[DE94-001473] p 2198 N94-23208
Computational model of surface ablation from tokamak disruptions
[DE94-002204] p 2550 N94-23474
Pellet ablation in the large helical device
[NIFS-260] p 2551 N94-24358
ABLATIVE MATERIALS
Micromechanical simulation of damage progression in carbon phenolic composites p 2231 N94-24446
ABORT APPARATUS
Regulated drag area parachute
[AD-D015992] p 2170 N94-25051
ABORT TRAJECTORIES
Optimal RTLS abort trajectories for an HL-20 personnel launch vehicle p 2165 N94-25114
ABRASION RESISTANCE
A preliminary evaluation of the phosphazene resin PPZ
[AD-A273674] p 2263 N94-25410
ABSORBERS (MATERIALS)
High energy collimating fine grids for HESP program
[NASA-CR-189317] p 2209 N94-24767
ABSORPTION COOLING
Enhanced absorption cycle computer model
[DE94-001997] p 2271 N94-23793
ABSORPTION SPECTRA
Algorithm-development activities
[NASA-CR-193225] p 2420 N94-23538
Development of an analytical-numerical model to predict radiant emission or absorption
[NASA-CR-194860] p 2453 N94-23624
Radiative forcing calculations for SF6 and CH4 using a correlated k-distribution transmission model
[DE94-001855] p 2397 N94-23700
Using contour maps to search for red-shifted 511 keV features in BATSE GRB spectra p 2585 N94-24455
ABSORPTION SPECTROSCOPY
Tropospheric Ozone Lidar Intercomparison Experiment, TROLIX 1991
[MPIM-102] p 2402 N94-24108
Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field
[NASA-CR-191490] p 2344 N94-24360
Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357
ABSORPTIVITY
Algorithm-development activities
[NASA-CR-193225] p 2420 N94-23538
ABSTRACTS
Bibliography of Lewis Research Center technical publications announced in 1992
[NASA-TM-106035] p 2590 N94-23562
Aircraft flight safety: A bibliography
[AGARD-R-805] p 2173 N94-24091
ABUNDANCE
Coronal abundances and their variation
[NASA-CR-194811] p 2626 N94-23276
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
AC GENERATORS
Controllability of free-piston Stirling engine/linear alternator driving a dynamic load
[NASA-TM-106497] p 2521 N94-24302
ACCELERATED LIFE TESTS
Review of super Ni/Cd cell designs and performance
p 2391 N94-23348
Airport pavement test machine design and cost study
[DOT/FAA/CT-93/51] p 2192 N94-24072
ACCELERATION (PHYSICS)
An investigation into acceleration determination for airborne gravimetry using the global positioning system
[ISBN-0-315-59470-5] p 2175 N94-24176
ACCELERATION STRESSES (PHYSIOLOGY)
Artificial gravity in space flight
[AD-A273420] p 2427 N94-24928
ACCELEROMETERS
The pre-development of the Aristoteles calibration mechanism p 2209 N94-24006
Integrated accelerometer assembly
[CA-PATENT-1322107] p 2344 N94-24184
ACCEPTOR MATERIALS
Magnetic resonance study of zinc-related defects in silicon with optimized EPR spectrometer
[PB93-224640] p 2561 N94-23223
ACCESS TIME
Design and implementation issues of end-to-end protocols in high-speed networks
[PB94-110905] p 2467 N94-23752
ACCIDENTS
Continuum representations of cellular solids
[DE94-001706] p 2375 N94-23217
ACCRETION DISKS
UV spectral variability in the Herbig Ae star HR 5999. 11: The accretion interpretation
[NASA-CR-189313] p 2599 N94-23334
Protoplanetary disks: Theory and observation by millimeter and sub-millimeter arrays
[REPT-331] p 2603 N94-24983
Observational studies of the clearing phase in proto-planetary disk systems
[NASA-CR-195182] p 2604 N94-25265
ACCUMULATIONS
Synthesis of passive microwave and radar altimeter data for estimating accumulation rates of polar snow
[NASA-CR-194864] p 2382 N94-23573
ACCURACY
Accuracy control in Monte Carlo radiative calculations
p 2321 N94-23639
ACETIC ACID
Scanning probe lithography. 2: Selective chemical vapor deposition of copper into scanning tunneling microscope-defined patterns
[AD-A273304] p 2547 N94-25144
ACETYLENE
Polydiacetylene thin films for nonlinear optical applications p 2225 N94-24347
Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789
ACID RAIN
Chemistry on the mesoscale: Modeling and measurement issues p 2413 N94-24390
ACIDS
Curing phthalonitriles with acid
[AD-D015996] p 2261 N94-25054
ACOUSTIC ATTENUATION
JAPE 91: Influence of terrain masking of the acoustic propagation of helicopter noise p 2528 N94-24214
Comparison between 1-minute and 15-minute averages of turbulence parameters p 2528 N94-24218
ACOUSTIC DUCTS
The acoustic and instability waves of jets confined inside an acoustically lined rectangular duct
[NASA-CR-191586] p 2334 N94-24602
ACOUSTIC EMISSION
Acoustic target detection and classification using neural networks p 2529 N94-24221
Investigation of the effects of manufacturing variations and materials on fatigue crack detection methods in gear teeth
[NASA-CR-195093] p 2373 N94-24769
ACOUSTIC FREQUENCIES
Ground characterization for JAPE
p 2527 N94-24213
Some subjects in digital audio, noise shaping, sample rate conversion, dynamic range compression and testing
[ISBN-9-09-005162-7] p 2530 N94-25220
ACOUSTIC IMPEDANCE
Ground characterization for JAPE
p 2527 N94-24213
Comparisons of calculated and measured helicopter noise near instrument hill p 2528 N94-24215
ACOUSTIC INSTABILITY
The acoustic and instability waves of jets confined inside an acoustically lined rectangular duct
[NASA-CR-191586] p 2334 N94-24602
ACOUSTIC MEASUREMENT
JAPE 91: Influence of terrain masking of the acoustic propagation of helicopter noise p 2528 N94-24214
Preliminary analysis of amplitude and phase fluctuations in the JAPE multiple tone data to distances of 500 meters p 2528 N94-24216
Fiber optic detection of ultrasound and its application to cure monitoring
[ISBN-0-315-83424-2] p 2544 N94-24466
Global acoustic mapping of ocean temperatures (GAMOT)
[AD-A273387] p 2418 N94-24719
Investigation of the effects of manufacturing variations and materials on fatigue crack detection methods in gear teeth
[NASA-CR-195093] p 2373 N94-24769
ACOUSTIC PROPAGATION
Diffraction analysis of transient acoustic waves: Half-plane in a layered medium
[PB94-110988] p 2526 N94-23726
Joint Acoustic Propagation Experiment (JAPE-91) Workshop

A comparison of two multi-variable integrator windup protection schemes [NASA-CR-194436] p 2190 N94-23590

The Fifth European Space Mechanisms and Tribology Symposium [ESA-SP-334] p 2355 N94-23985

Low melting temperature alloy deployment mechanism p 2356 N94-23997

Periscope mechanism for SWAN instrument p 2357 N94-24000

Opening mechanism for ISO/CVV cover release p 2357 N94-24001

An Earth observation telescope refocusing mechanism p 2359 N94-24014

Inter orbit link antenna pointing mechanisms design using standard actuators p 2359 N94-24016

Precision Displacement Mechanism (PDM) p 2360 N94-24026

Development of a Low-Temperature Gear Motor (LOG) p 2361 N94-24032

A novel rotary actuator for spacecraft p 2361 N94-24034

Design and performances of electromagnetic initiators for space mechanisms: An alternative to pyrotechnic system p 2315 N94-24037

Recharge mechanism based on shape memory alloy p 2362 N94-24039

Controller modeling and evaluation for PCV electro-mechanical actuator p 2371 N94-24441

Design and application of electromechanical actuators for deep space missions [NASA-CR-195134] p 2365 N94-24842

Collocated tunable wavenumber sensor/actuators for smart structures [AD-A273697] p 2314 N94-25488

ADA (PROGRAMMING LANGUAGE)

Update of GRASP/Ada reverse engineering tools for Ada [NASA-CR-193890] p 2455 N94-24111

The Adam language: Ada extended with support for multiway activities [NASA-CR-4565] p 2456 N94-24480

An automated tool to facilitate code translation for software fault tree analysis [AD-A273205] p 2457 N94-24556

ADAPTERS

Precision drive and speed reduction device [AD-D016004] p 2367 N94-25046

ADAPTIVE CONTROL

Adaptive data rate control TDMA systems as a rain attenuation compensation technique p 2287 N94-22821

A novel process monitoring and control system based on a neural manufacturing concept [DE94-001516] p 2471 N94-23011

Real-time dynamics and control strategies for space operations of flexible structures [NASA-CR-194794] p 2203 N94-23618

Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction [NASA-CR-189645] p 2525 N94-23698

Identification of integrated airframe: Propulsion effects on an F-15 aircraft for application to drag minimization [NASA-TM-4532] p 2188 N94-24106

Change-point detection and adaptive control of time-varying systems [AD-A273509] p 2475 N94-24943

Probabilistic assessment of smart composite structures [NASA-TM-106358] p 2378 N94-25188

Genetic algorithms in control systems engineering [RR-470] p 2463 N94-25315

Adaptive predictive control of the benchmark plant [OUEL-1972/93] p 2477 N94-25470

ADAPTIVE FILTERS

Maximum likelihood modal parameter identification and realization of stochastic systems p 2157 N94-24265

Linear and nonlinear adaptive filtering and their application to speech intelligibility enhancement [ISBN-9-09-005342-5] p 2304 N94-25292

ADAPTIVE OPTICS

Sodium-layer laser guide stars [DE93-019621] p 2349 N94-23490

Low power ground-based laser illumination for electric propulsion applications [NASA-CR-194444] p 2219 N94-23555

ADDITION RESINS

A preliminary evaluation of the phosphazene resin PPZ [AD-A273674] p 2263 N94-25410

ADDITIVES

Processing of YBCO superconductors for improved levitation force [DE94-001326] p 2559 N94-22994

Polyimide processing additives [NASA-CASE-LAR-13669-2] p 2252 N94-23079

New method for increasing machine service-life, phase 2 [PB93-200707] p 2354 N94-23533

Capillary electrokinetic separations with optical detection [DE94-001639] p 2233 N94-23716

Overcharge and overdischarge protection of ambient temperature secondary lithium cells [NASA-CASE-NPO-18343-1-CU] p 2310 N94-23823

Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160

Isothiazolone volatility study of a water bottom from fuel treated with Kathon (tm) FP1.5 biocide [AD-A273165] p 2266 N94-24728

The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics [AD-A273164] p 2262 N94-25136

ADENOSINE TRIPHOSPHATE

The evolution of energy-transducing systems. Studies with an extremely halophilic archaebacterium [NASA-CR-193803] p 2422 N94-24807

The evolution of energy-transducing systems. Studies with archaebacteria [NASA-CR-195129] p 2422 N94-24811

ADHESION

Selective hydrogen separation by palladium-based composite membranes [PB93-201671] p 2254 N94-23431

Static adhesion in preloaded contacts subjected to long-term vacuum exposure p 2363 N94-24043

Laser-deposited biocompatible films and methods and apparatuses for producing same [AD-D016017] p 2350 N94-24952

ADHESION TESTS
Evaluation of the fracture resistance and durability of adhesive bonded joints p 2160 N94-24278

ADHESIVE BONDING
Computer based expert system for battle damage repair of composite structures p 2157 N94-24262
Evaluation of the fracture resistance and durability of adhesive bonded joints p 2160 N94-24278
High temperature adhesive
[AD-D016019] p 2258 N94-24737
Ultrasonic process for curing adhesives
[AD-A273175] p 2259 N94-24788

ADHESIVES
Computer based expert system for battle damage repair of composite structures p 2157 N94-24262
High temperature adhesive
[AD-D016019] p 2258 N94-24737
Ultrasonic process for curing adhesives
[AD-A273175] p 2259 N94-24788

ADIABATIC CONDITIONS
Analytical skin friction and heat transfer formula for compressible internal flows
[NASA-CR-191185] p 2170 N94-25173

ADIABATIC FLOW
Analytical skin friction and heat transfer formula for compressible internal flows
[NASA-CR-191185] p 2170 N94-25173

ADJOINTS
Boundary layer receptivity and control
p 2327 N94-24141
Signatures of selfadjoint pencils
[PB94-111127] p 2457 N94-24599

ADSORPTION
Ordered organic thin films self-assembled from the vapor phase p 2223 N94-24339
Diffusion on Cu surfaces p 2251 N94-24428
Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790
Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3
[DE93-613824] p 2566 N94-25332
Use of scanning tunneling microscope in corrosion studies
[VTT-TIED-1416] p 2250 N94-25346

ADVANCED LAUNCH SYSTEM (STS)
Approximate optimal guidance for the advanced launch system
[NASA-CR-4568] p 2198 N94-24752
Advanced launch system. Advanced development oxidizer turbopump program
[NASA-CR-193920] p 2367 N94-25174

ADVANCED SOLID ROCKET MOTOR (STS)
Flame trench analysis of NLS vehicles
p 2199 N94-23249
Properties and processing characteristics of low density carbon cloth phenolic composites p 2231 N94-24450
Analysis and effects of the advanced solid rocket motor on the Space Shuttle elements
[NASA-CR-193879] p 2200 N94-24664

ADVANCED VERY HIGH RESOLUTION RADIOMETER
An AVHRR cloud classification database typed by experts
[AD-A273560] p 2416 N94-25162

ADVECTION
A geometric weighted elliptic grid regeneration method for 3D unstructured ALE hydrodynamics
[DE94-000309] p 2448 N94-22980
Locally modified Bott-scheme for highly convective flows
[MPIM-99] p 2400 N94-23157
A two-dimensional dispersion module for the TOUGH2 simulator
[DE94-002262] p 2335 N94-24655

AERIAL PHOTOGRAPHY
Optical component MAC Europe ground truth report: Flevoland 1991 (Netherlands)
[BCRS-92-27] p 2382 N94-23177
Application of ERS-1 active microwave instrumentation data to remote sensing of snow
[PB93-224756] p 2382 N94-23224

AERIAL RECONNAISSANCE
Imaging System (INEL) T805 prototype
[DE94-002807] p 2382 N94-23492
UAV current technology and future trends
p 2154 N94-24245

AEROACOUSTICS
Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464
Unsteady jet flow computation towards noise prediction
[NASA-CR-194449] p 2153 N94-23553
Sound radiation due to boundary layer transition
p 2332 N94-24163
Variability of measured sonic boom signatures. Volume 1: Technical report
[NASA-CR-191483-VOL-1] p 2526 N94-24172
Variability of measured sonic boom signatures. Volume 2: Data report
[NASA-CR-191483-VOL-2] p 2526 N94-24173
Validation of the ROTAC code for the rotor noise prediction
[PB93-204311] p 2529 N94-24514
Fan noise research at NASA
[NASA-TM-106512] p 2530 N94-25172
The ISL rotor bench
[ISL-R-108/92] p 2185 N94-25301
Study of the blade/vortex interaction: Acoustics, aerodynamics and models
[ISL-R-104/92] p 2340 N94-25463

AEROBES
Chemical characterization of some aerobic liquids in CELSS p 2422 N94-23241

AERODYNAMIC CHARACTERISTICS
Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285
An experimental investigation of a Mach 3.0 high-speed civil transport at supersonic speeds
[NASA-TP-3365] p 2169 N94-24311
NASA/USRA advanced design program
[NASA-CR-195548] p 2180 N94-24492
Aerodynamic characteristics and pressure distributions for an executive-jet baseline airfoil section
[NASA-TM-4529] p 2169 N94-24586
Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle
[NASA-TM-4533] p 2170 N94-24716
Weasel works SA-150: Design study of a 100 to 150 passenger transport aircraft
[NASA-CR-195489] p 2183 N94-24975
NASA LaRC Workshop on Guidance, Navigation, Controls, and Dynamics for Atmospheric Flight, 1993
[NASA-CP-10127] p 2162 N94-25096
X-31 aerodynamic characteristics determined from flight data p 2164 N94-25109
Nonlinear aerodynamic modeling using multivariate orthogonal functions p 2164 N94-25110
Modeling transonic aerodynamic response using nonlinear systems theory for use with modern control theory p 2164 N94-25112
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 2: Maneuver descriptions and section guide
[AD-A273685] p 2185 N94-25440

AERODYNAMIC CONFIGURATIONS
The airplane: A simulated commercial air transportation study
[NASA-CR-195525] p 2182 N94-24837
Numerical flow simulation for complete vehicle configurations
[AD-A273588] p 2170 N94-24849
The Bunny: A simulated commercial air transportation study
[NASA-CR-195537] p 2183 N94-25001
Effect of aeroelastic-propulsive interactions on flight dynamics of a hypersonic vehicle p 2164 N94-25113

AERODYNAMIC DRAG
Experimental study of a turbulent boundary layer in presence of external manipulators of NACA 0009 profile in the transonic regime
[ISBN-0-315-57633-2] p 2333 N94-24177
Design of a resistojet for Space Station Freedom
[NASA-CR-195506] p 2221 N94-24979

AERODYNAMIC FORCES
LinAir: A multi-element discrete vortex Weissinger aerodynamic prediction method
[NASA-TM-108786] p 2167 N94-23557
Torque equilibrium attitudes for the Space Station
p 2208 N94-24449
Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773

AERODYNAMIC HEAT TRANSFER
Stagnation region heat transfer: The influence of turbulence parameters, Reynolds number and body shape
[NASA-TM-106504] p 2334 N94-24481

AERODYNAMIC HEATING
Prediction of three sigma maximum dispersed density for aerospace applications p 2207 N94-23654
Thermal-fluid analysis of the fill and drain operations of a cryrogenic fuel tank
[NASA-TM-104273] p 2334 N94-24495
Analysis and effects of the advanced solid rocket motor on the Space Shuttle elements
[NASA-CR-193879] p 2200 N94-24664

AERODYNAMIC INTERFERENCE
Aerodynamic characteristics and pressure distributions for an executive-jet baseline airfoil section
[NASA-TM-4529] p 2169 N94-24586
A numerical study of airplanes flying in proximity
[AD-A273373] p 2173 N94-24718

AERODYNAMIC LOADS
Computation of the loads on the AH-1/OLS model rotor in forward flight and comparison with wind tunnel tests
[ISL-CO-230/92] p 2176 N94-23146
Leading-edge votex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques
[NASA-TP-3374] p 2166 N94-23512
Issac, Jason Cherian ses in transonic flow
[NASA-CR-194837] p 2167 N94-24052
Validation of the ROTAC code for the rotor noise prediction
[PB93-204311] p 2529 N94-24514

AERODYNAMIC NOISE
Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464
Sound radiation due to boundary layer transition
p 2332 N94-24163
The radiated noise from isotropic turbulence revisited
[NASA-CR-191547] p 2333 N94-24356
Fan noise research at NASA
[NASA-TM-106512] p 2530 N94-25172

AERODYNAMIC STABILITY
Radially constructed cruciform parachute
[CA-PATENT-1323021] p 2168 N94-24182
NASA advanced design program. Design and analysis of a radio-controlled flying wing aircraft
[NASA-CR-195515] p 2180 N94-24589
A numerical study of airplanes flying in proximity
[AD-A273373] p 2173 N94-24718
Wind tunnel test of a variable-diameter tiltrotor (VDTR) model
[NASA-CR-177629] p 2181 N94-24796
Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades
[NASA-TM-108758] p 2182 N94-24953

AERODYNAMIC STALLING
An experimental investigation of the effect of upper surface blowing on dynamic stall
[NASA-CR-194863] p 2165 N94-22894
Computational study of GA(W)-1: Airfoil near stall
[PB93-226249] p 2165 N94-23116
Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion
[NASA-TM-109681] p 2167 N94-23975
Thrust vectoring theory, laboratory and flight tests
p 2155 N94-24251
Effect of an extendable slat on the stall behavior of a VR-12 airfoil
[NASA-TP-3407] p 2171 N94-25187

AERODYNAMICS
Local grid refinement method for the euler equations
[PB93-223329] p 2317 N94-22985
JPRS report: Science and technology. Central Eurasia: Space
[JPRS-USP-93-006] p 2194 N94-23015
Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades
[PB93-226223] p 2317 N94-23114
Control algorithms for effective operation of variable-speed wind turbines
[DE94-002607] p 2394 N94-23704
Aeronautical engineering: A continuing bibliography with indexes (supplement 298)
[NASA-SP-7037(298)] p 2153 N94-23711
Aeronautical engineering: A continuing bibliography with indexes (supplement 299)
[NASA-SP-7037(299)] p 2153 N94-23973
Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100
Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160
Integrated Airframe Design Technology
[AGARD-R-794] p 2177 N94-24313
Research in progress and other activities of the Institute for Computer Applications in Science and Engineering
[NASA-CR-191576] p 2444 N94-25090
Effect of aeroelastic-propulsive interactions on flight dynamics of a hypersonic vehicle p 2164 N94-25113
State-of-the-art engineering aeroprediction methods with emphasis on new semiempirical techniques for predicting nonlinear aerodynamics on complete missile configurations
[AD-A273680] p 2171 N94-25411

AEROELASTICITY
Issac, Jason Cherian ses in transonic flow
[NASA-CR-194837] p 2167 N94-24052
Aeroelastic, aeromechanical and vibration problems in helicopters p 2154 N94-24244
Current and future design methods for large transport aircraft p 2179 N94-24324

Structural dynamics division research and technology accomplishments for FY 1993 and plans for FY 1994 [NASA-TM-109036] p 2169 N94-24576
Nonlinear equations of motion for a panel subject to external loads [AD-A273142] p 2170 N94-24773
Wind tunnel test of a variable-diameter tiltrotor (VDTR) model [NASA-CR-177629] p 2181 N94-24796
Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades [NASA-TM-108758] p 2182 N94-24953
Effect of aeroelastic-propulsive interactions on flight dynamics of a hypersonic vehicle p 2164 N94-25113

AEROGELS
Carbon aerogels: An update on structure, properties, and applications [DE94-001528] p 2252 N94-22931

AERONAUTICAL ENGINEERING
Aeronautical engineering: A continuing bibliography with indexes (supplement 298) [NASA-SP-7037(298)] p 2153 N94-23711
Aeronautical engineering: A continuing bibliography with indexes (supplement 299) [NASA-SP-7037(299)] p 2153 N94-23973
Frameworks for integrated airframe design p 2178 N94-24318
The process network in the design and manufacturing of aircraft p 2178 N94-24319
Japanese aerospace science and technology 1992. A bibliography with indexes [NASA-SP-7104] p 2631 N94-24585
NACA collections: A directory of significant collections of the documents of the National Advisory Committee for Aeronautics [NASA-CR-195686] p 2594 N94-25541

AERONAUTICAL SATELLITES
ACTS broadband aeronautical experiment p 2279 N94-22771

AERONOMY
JOVE NASA-FIT program: Microgravity and aeronomy projects [NASA-CR-195121] p 2631 N94-24493

AEROSOLS
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis [PB93-217982] p 2347 N94-22982
Gas-grain simulation experiment module conceptual design and gas-grain simulation facility breadboard development [NASA-CR-177632] p 2598 N94-23536
Cloud-free aerosol optical depth determination over oceans from satellite radiometry [DE94-001897] p 2386 N94-23779
Participation in TOMS missions [NASA-CR-195110] p 2398 N94-24078
Session on coupled atmospheric/chemistry coupled models p 2414 N94-24398
Cloud, dust, and ozone vertical profiles from solar occultation measurements: Implications for dynamics p 2617 N94-24877
Results from the VISA project [AD-A273752] p 2406 N94-25540

AEROSPACE ENGINEERING
JPRS report: Science and technology. Central Eurasia: Space [JPRS-USP-93-006] p 2194 N94-23015
Shell buckling research at Delft, 1976 - 1992 [PB93-224442] p 2375 N94-23221
GPHS-RTG's in support of the Cassini mission [DE94-001445] p 2218 N94-23459
Space technology: A study of the significance of recognition for innovators of spinoff technologies. 1993 activities/1994, 1995 plans [NASA-CR-194836] p 2596 N94-23526
Space technology: A study of the significance of recognition for innovators of spinoff technologies. Commercial Space Expo-USA, 1993 [NASA-CR-194833] p 2596 N94-23528
NASA patent abstracts bibliography: A continuing bibliography. Section 2: Indexes (supplement 44) [NASA-SP-7039(44)-SECT-2] p 2590 N94-23712
National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers [PB94-113487] p 2194 N94-23819
Long term trending of engineering data for the Hubble Space Telescope p 2516 N94-23942
Fiscal year 1993 scientific and technical reports, articles, papers, and presentations [NASA-TM-108423] p 2590 N94-24079
Roles, uses, and benefits of general aviation aircraft in aerospace engineering education [NASA-TM-106463] p 2153 N94-24100
Probabilistic simulation of concurrent engineering of propulsion systems p 2177 N94-24317
The process network in the design and manufacturing of aircraft p 2178 N94-24319
NASA high performance computing and communications program [NASA-TM-4554] p 2591 N94-24337
The 1993 NASA/ASEE Summer Faculty Fellowship Program [NASA-CR-193862] p 2574 N94-24405
NASA technology applications team: Applications of aerospace technology [NASA-CR-194775] p 2597 N94-24494
Space Technology: A study of the significance of recognition for innovators of spinoff technologies. A case study on the impact of the space technology hall of fame award [NASA-CR-194835] p 2597 N94-24496
Japanese aerospace science and technology 1992. A bibliography with indexes [NASA-SP-7104] p 2631 N94-24585
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 20: The use of selected information products and services by US aerospace engineers and scientists: Results of two surveys [NASA-TM-109022] p 2592 N94-24649
NADA/DOD Aerospace Knowledge Diffusion Research Project. Report number 19: The US government technical report and the transfer of federally funded aerospace R/D: An analysis of five studies [NASA-TM-109061] p 2592 N94-24660
Integrated design and manufacturing for the high speed civil transport [NASA-CR-195511] p 2182 N94-24968
Spinoff 1993 [NASA-NP-211] p 2597 N94-25018
NASA LaRC Workshop on Guidance, Navigation, Controls, and Dynamics for Atmospheric Flight, 1993 [NASA-CP-10127] p 2162 N94-25096

AEROSPACE ENVIRONMENTS
The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596
Measuring the dynamics of structural changes in biological macromolecules from light scattering data p 2422 N94-24426

AEROSPACE INDUSTRY
Review of the probabilistic failure analysis methodology and other probabilistic approaches for application in aerospace structural design [NASA-TP-3434] p 2376 N94-23342
Prototype Space Technology Hall of Fame exhibit at Technology 2003: Analysis of data from computer-based questionaire [NASA-CR-194834] p 2596 N94-23540
Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion [PB94-111374] p 2194 N94-23770
Applications of CFD codes and supercomputers to aircraft design activities p 2177 N94-24316
Frameworks for integrated airframe design p 2178 N94-24318
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 20: The use of selected information products and services by US aerospace engineers and scientists: Results of two surveys [NASA-TM-109022] p 2592 N94-24649
NADA/DOD Aerospace Knowledge Diffusion Research Project. Report number 19: The US government technical report and the transfer of federally funded aerospace R/D: An analysis of five studies [NASA-TM-109061] p 2592 N94-24660
The Future of Aerospace: Proceedings of a symposium held in honor of Alexander H. Flax [LC-93-83945] p 2631 N94-25065
Defense aerospace and the new world order p 2596 N94-25066

AEROSPACE MEDICINE
Increasing accuracy in the assessment of motion sickness: A construct methodology [NASA-TM-108797] p 2420 N94-23088
Cardiopulmonary Aspects in Aerospace Medicine [AGARD-LS-189] p 2423 N94-23313
Cardiovascular and pulmonary disease in NATO aircrew: An overview p 2423 N94-23314
Screening for asymptomatic coronary heart disease p 2423 N94-23315
Aeromedical disposition for coronary artery disease p 2423 N94-23316
Primary prevention of coronary heart disease p 2423 N94-23317
Aeromedical disposition of Arrhythmias and electrocardiographic findings in aircrew p 2423 N94-23318
Echocardiographic screening of aircrew candidates p 2424 N94-23319
Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18) p 2424 N94-23320
Aortic valve disease p 2424 N94-23322
Aeromedical implications of mitral valve prolapse p 2424 N94-23323
Sarcoidosis and the aviator p 2425 N94-23325
Spontaneous pneumothorax, cysts and bullae p 2425 N94-23326
Asthma in aircrew p 2425 N94-23327
Arterial hypertension and the aviator p 2425 N94-23328
Cytokines and immune surveillance in humans [NASA-CR-194801] p 2425 N94-23331
Fluid-loading solutions and plasma volume: Astro-ade and salt tablets with water [NASA-TP-3456] p 2426 N94-23544
Vision impairment and corrective considerations of civil airmen [DOT/FAA/AM-93/21] p 2426 N94-23623
Visual Problems in Night Operations [AGARD-LS-187] p 2431 N94-23976
Index to FAA Office of Aviation Medicine Reports: 1961 through 1993 [DOT/FAA/AM-94/1] p 2426 N94-24093
EEG and chaos: Description of underlying dynamics and its relation to dissociative states [NASA-CR-195171] p 2428 N94-24799
Specification list and function structure for a full-body dynamometer to be used aboard Space Station Freedom [NASA-CR-195508] p 2439 N94-24835
Evaluation of bioimpedance for the measurement of physiologic variables as related to hemodynamic studies in space flight p 2427 N94-25378
Loading, electromyograph, and motion during exercise p 2427 N94-25380

AEROSPACE PLANES
A conceptual design of an unmanned test vehicle using an airbreathing propulsion system [NASA-CR-195550] p 2189 N94-25085

AEROSPACE SAFETY
Develop advanced nonlinear signal analysis topographical mapping system [NASA-CR-195128] p 2388 N94-24827

AEROSPACE SCIENCES
JPRS report: Science and technology. Central Eurasia: Space [JPRS-USP-93-006] p 2194 N94-23015
Parallel unstructured grid generation for computational aerosciences [NASA-CR-192244] p 2466 N94-23483
Prototype Space Technology Hall of Fame exhibit at Technology 2003: Analysis of data from computer-based questionaire [NASA-CR-194834] p 2596 N94-23540
Fiscal year 1993 scientific and technical reports, articles, papers, and presentations [NASA-TM-108423] p 2590 N94-24079
The Ninth National Space Symposium [ISBN-0-9616962-7-3] p 2598 N94-25006

AEROSPACE SYSTEMS
JPRS report: Science and technology. Central Eurasia: Space [JPRS-USP-93-006] p 2194 N94-23015
A reference model for space data system interconnection services p 2305 N94-23847
ATOS-1: Designing the infrastructure for an advanced spacecraft operations system p 2197 N94-23849
NASA/Goddard Space Flight Center's testbed for CCSDS compatible systems p 2197 N94-23855
Distributed computing environments for future space control systems p 2464 N94-23911
Operational characterisation of requirements and early validation environment for high demanding space systems p 2519 N94-23959
The 1993 NASA/ASEE Summer Faculty Fellowship Program [NASA-CR-193862] p 2574 N94-24405

AEROSPACE TECHNOLOGY TRANSFER
Aerospace applications of batteries p 2390 N94-23346
A compilation of technology spinoffs from the US Space Shuttle Program p 2578 N94-24424
NASA technology applications team: Applications of aerospace technology [NASA-CR-194775] p 2597 N94-24494
Space Technology: A study of the significance of recognition for innovators of spinoff technologies. A case study on the impact of the space technology hall of fame award [NASA-CR-194835] p 2597 N94-24496

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 20: The use of selected information products and services by US aerospace engineers and scientists: Results of two surveys
[NASA-TM-109022] p 2592 N94-24649

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 21: US aerospace industry librarians and technical information specialists as information intermediaries: Results of the phase 2 survey
[NASA-TM-109064] p 2593 N94-24709

Iowa satellite project ISAT-1
[NASA-CR-195517] p 2206 N94-24838

Spinoff 1993
[NASA-NP-211] p 2597 N94-25018

AEROSPACE VEHICLES

NASA high performance computing and communications program
[NASA-TM-4554] p 2591 N94-24337

Evaluation of advanced materials through experimental mechanics and modelling p 2374 N94-24454

AEROTHERMODYNAMICS

Effects of shock strength on shock turbulence interaction p 2332 N94-24165

AFRICA

The AGRHYMET data communications project
p 2280 N94-22776

AFTERGLOWS

Diffusion in electronegative discharges with magnetic fields
[AD-A273826] p 2304 N94-25521

AGE FACTOR

Chronic obstructive pulmonary disease
p 2425 N94-23324

AGING (MATERIALS)

Time dependent behavior of a graphite/thermoplastic composite and the effects of stress and physical aging
[NASA-TM-109047] p 2228 N94-23280

Effect of irradiation on the stress corrosion cracking behavior of Alloy X-750 and Alloy 625
[DE94-001759] p 2244 N94-23792

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues
[AD-A273664] p 2251 N94-25451

AGRICULTURE

Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991
[PB93-230654] p 2386 N94-23755

Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167

AILERONS

Cockpit control system conceptual design
[NASA-CR-195543] p 2190 N94-24551

Aircraft wing structural detail design (wing, aileron, flaps, and subsystems)
[NASA-CR-195487] p 2183 N94-24974

AIR BAG RESTRAINT DEVICES

Projected effectiveness of airbag supplemental restraint systems in US Army helicopter cockpits
[AD-A273250] p 2174 N94-25141

AIR BREATHING BOOSTERS

Conceptual design of a two stage to orbit spacecraft
[NASA-CR-195536] p 2204 N94-24620

AIR BREATHING ENGINES

A conceptual design of an unmanned test vehicle using an airbreathing propulsion system
[NASA-CR-195550] p 2189 N94-25085

Hypersonic vehicle control law development using H(infinity) and micron-synthesis p 2163 N94-25104

AIR CONDITIONING

US Department of Energy phaseout of CFC-refrigerants
[DE94-001668] p 2397 N94-23016

AIR CONDITIONING EQUIPMENT

Fault detection in HVAC systems using fuzzy models
[OUEL-1977/93] p 2373 N94-25475

AIR FILTERS

Microbiological analysis of debris from Space Transportation System (STS)-55 Spacelab D-2
[NASA-CR-193883] p 2421 N94-24310

AIR FLOW

Flow quality studies of the NASA Lewis Research Center Icing Research Tunnel diffuser
[NASA-TM-106311] p 2192 N94-23091

Calibration of HYPULSE for hypervelocity air flows corresponding to flight Mach numbers 13.5, 15, and 17
[NASA-CR-191578] p 2192 N94-23564

The 3-D CFD modeling of gas turbine combustor-integral bleed flow interaction p 2189 N94-23658

The 3-D numerical study of airflow in the compressor/combustor prediffuser and dump diffuser of an industrial gas turbine p 2324 N94-23660

Zone fire modeling with natural building flows and a zero order shaft model
[PB94-112166] p 2270 N94-23735

AIR JETS

Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles
[NASA-TM-106450] p 2167 N94-23592

AIR LAND INTERACTIONS

Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734

Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387

Session on coupled land surface/hydrological/atmospheric models
p 2414 N94-24395

AIR LAUNCHING

Design of an airborne launch vehicle for an air launched space booster
[NASA-CR-195534] p 2198 N94-24860

GRYPHON: Air launched space booster
[NASA-CR-195497] p 2199 N94-25022

AIR LOCKS

An opening mechanism for the scientific airlock outer hatch p 2360 N94-24027

AIR NAVIGATION

An overview of a generic multi-sensor integrated navigation system design
[CTN-94-60916] p 2174 N94-24120

Differential GPS for air transport: Status
p 2162 N94-25100

Application of aircraft navigation sensors to enhanced vision systems p 2176 N94-25495

AIR POLLUTION

US Department of Energy phaseout of CFC-refrigerants
[DE94-001668] p 2397 N94-23016

Reduction of nitric oxide over platinum, rhodium and platinum-rhodium single crystal surfaces
[PB93-230092] p 2232 N94-23482

Exploratory report nickel and nickel compounds
[PB93-223998] p 2242 N94-23496

Exploratory report antimony and antimony compounds
[PB93-224004] p 2397 N94-23497

Estimation of delays and emissions at four-way junctions with different forms of regulation, principally four-way mandatory stop
[PB94-105236] p 2398 N94-23813

Alternative control techniques document: NOx emissions from stationary reciprocating internal combustion engines
[PB94-104494] p 2398 N94-24476

EPA's survey of in-use driving patterns: Implications for mobile source emission inventories
[PB94-118502] p 2399 N94-24525

Carbon and hydrogen isotope composition and C-14 concentration in methane from sources and from the atmosphere: Implications for a global methane budget
[NASA-CR-195166] p 2399 N94-25092

Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations
[AD-A273662] p 2251 N94-25449

Results from the VISA project
[AD-A273752] p 2406 N94-25540

AIR QUALITY

Federal alternative fuel program light duty vehicle operations
[DE93-040663] p 2264 N94-22878

US Department of Energy phaseout of CFC-refrigerants
[DE94-001668] p 2397 N94-23016

EPA's survey of in-use driving patterns: Implications for mobile source emission inventories
[PB94-118502] p 2399 N94-24525

AIR SAMPLING

Carbon and hydrogen isotope composition and C-14 concentration in methane from sources and from the atmosphere: Implications for a global methane budget
[NASA-CR-195166] p 2399 N94-25092

AIR TRAFFIC

Conflict-free trajectory planning for air traffic control automation
[NASA-TM-108790] p 2174 N94-25272

AIR TRAFFIC CONTROL

The FAA satellite communications program
p 2279 N94-22772

Airport surface operations requirements analysis
[NASA-CR-191508] p 2172 N94-23288

An examination of the operational error database for air route traffic control centers
[DOT/FAA/AM-93/22] p 2175 N94-24472

ASR-9 microburst detection algorithm
[AD-A273591] p 2415 N94-24850

Aircraft accident report: In-flight loss of propeller blade and uncontrolled collision with terrain Mitsubishi MU-2B-60, N86SD, Zwingle, Iowa, 19 April 1993
[PB93-910409] p 2174 N94-25175

Conflict-free trajectory planning for air traffic control automation
[NASA-TM-108790] p 2174 N94-25272

Automation and cognition in air traffic control: An empirical investigation
[DOT/FAA/AM-94/3] p 2176 N94-25444

AIR TRAFFIC CONTROLLERS (PERSONNEL)

Harmonisation of man-machine interface experiments in the context of the development of PHARE advanced tools
[PB93-204725] p 2430 N94-23744

An examination of the operational error database for air route traffic control centers
[DOT/FAA/AM-93/22] p 2175 N94-24472

AIR TRANSPORTATION

NASA/USRA University Advanced Design Program, 1992-1993. The Diamondback: A simulated commercial air transportation study
[NASA-CR-195523] p 2180 N94-24462

Information systems strategy in air transport
[AD-A273125] p 2173 N94-24781

The airplane: A simulated commercial air transportation study
[NASA-CR-195525] p 2182 N94-24837

The Bunny: A simulated commercial air transportation study
[NASA-CR-195537] p 2183 N94-25001

The Gold Rush: A simulated commercial air transportation study
[NASA-CR-195528] p 2184 N94-25002

Aviation: The timeless industry p 2165 N94-25068

US general aviation: The ingredients for a renaissance. A vision and technology strategy for US industry, NASA, FAA, universities p 2162 N94-25097

Differential GPS for air transport: Status
p 2162 N94-25100

AIR WATER INTERACTIONS

Monte Carlo climate change forecasts with a global coupled ocean-atmosphere model
[MPIM-97] p 2407 N94-23156

Modes of ocean variability in the tropical Pacific as derived from Geosat altimetry
[MPIM-103] p 2382 N94-23158

Climate variability in a coupled GCM. Part 2: The Indian Ocean and monsoon
[MPIM-104] p 2401 N94-23159

Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387

Techniques and resources for storm-scale numerical weather prediction p 2414 N94-24392

Observational and modeling studies of heat, moisture, precipitation and global-scale circulation patterns
[NASA-CR-195148] p 2415 N94-24485

AIRBORNE EQUIPMENT

An overview of a generic multi-sensor integrated navigation system design
[CTN-94-60916] p 2174 N94-24120

Analysis and surveillance performance at Chicago O'Hare Airport
[DOT/FAA/RD-92/29] p 2175 N94-24127

AIRBORNE RADAR

The 94 GHz MMW imaging radar system
p 2306 N94-25493

AIRBORNE SURVEILLANCE RADAR

CF-18 AN/ALQ-126B-MG 13 IIP interface to the DREO Electronic Warfare Engagement Simulation Facility
[DREO-TN-93-4] p 2296 N94-24118

AIRBORNE/SPACEBORNE COMPUTERS

Towards the formal specification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191465] p 2466 N94-23252

Formal methods and digital systems validation for airborne systems
[NASA-CR-4551] p 2468 N94-23293

Magellan spacecraft and memory state tracking: Lessons learned, future thoughts p 2207 N94-23865

Spacecraft crew procedures from paper to computers
p 2433 N94-24188

Advanced avionics architecture and technology review. Executive summary and volume 1: Avionics tech nology. Volume 2: Avionics systems engineering
[AD-A273630] p 2186 N94-24733

AIRCRAFT ACCIDENT INVESTIGATION

Aircraft accident report: Inadvertent in-flight slat deployment, China Eastern Airlines Flight 583, McDonnell Douglas MD-11, B-2171, 950 nautical miles south of Shemya, Alaska, 6 April 1993
[PB93-910408] p 2172 N94-23579

Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993
[PB93-410407] p 2173 N94-24062

Aircraft accident report: In-flight loss of propeller blade and uncontrolled collision with terrain Mitsubishi MU-2B-60, N86SD, Zwingle, Iowa, 19 April 1993
[PB93-910409] p 2174 N94-25175

Aircraft accident/incident summary report: Controlled flight into terrain GP Express Airlines, Inc., N115GP Beechcraft C-99, Shelton, Nebraska, 28 April 1993
[PB94-910401] p 2174 N94-25273

AIRCRAFT ACCIDENTS

Development and experimental validation of computational methods to simulate abnormal thermal and structural environments
[DE94-000554] p 2268 N94-23000

Aircraft accident report: Inadvertent in-flight slat deployment, China Eastern Airlines Flight 583, McDonnell Douglas MD-11, B-2171, 950 nautical miles south of Shemya, Alaska, 6 April 1993
[PB93-910408] p 2172 N94-23579

Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993
[PB93-410407] p 2173 N94-24062

Annual review of aircraft accident data. US general aviation calendar year 1990
[PB94-126869] p 2173 N94-24841

Projected effectiveness of airbag supplemental restraint systems in US Army helicopter cockpits
[AD-A273250] p 2174 N94-25141

Aircraft accident report: In-flight loss of propeller blade and uncontrolled collision with terrain Mitsubishi MU-2B-60, N86SD, Zwingle, Iowa, 19 April 1993
[PB93-910409] p 2174 N94-25175

Aircraft accident/incident summary report: Controlled flight into terrain GP Express Airlines, Inc., N115GP Beechcraft C-99, Shelton, Nebraska, 28 April 1993
[PB94-910401] p 2174 N94-25273

AIRCRAFT ANTENNAS

L-band mobile terminal antennas for helicopters
p 2289 N94-22835

Aeronautical satellite antenna steering using magnetic field sensors p 2289 N94-22836

Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699

AIRCRAFT APPROACH SPACING

An examination of the operational error database for air route traffic control centers
[DOT/FAA/AM-93/22] p 2175 N94-24472

AIRCRAFT CARRIERS

Design project: LONGBOW supersonic interceptor
[NASA-CR-195510] p 2180 N94-24581

AIRCRAFT COMMUNICATION

ACTS broadband aeronautical experiment
p 2279 N94-22771

The FAA satellite communications program
p 2279 N94-22772

Canadian aeronautical mobile data trials
p 2279 N94-22773

Cockpit weather graphics using mobile satellite communications p 2280 N94-22775

AIRCRAFT COMPARTMENTS

Full-scale fire testing of seat component materials
[AD-A273499] p 2174 N94-24941

AIRCRAFT CONFIGURATIONS

Design project: LONGBOW supersonic interceptor
[NASA-CR-195510] p 2180 N94-24581

Configuration development study of the OSU 1 hypersonic research vehicle
[NASA-CR-195522] p 2181 N94-24591

The cetaceopteryx: A global range military transport aircraft
[NASA-CR-195519] p 2181 N94-24711

Conceptual design proposal: HUGO global range/mobility transport aircraft
[NASA-CR-195501] p 2181 N94-24787

VLCT-13: A commercial transport for the 21st Century
[NASA-CR-195492] p 2181 N94-24803

The airplane: A simulated commercial air transportation study
[NASA-CR-195525] p 2182 N94-24837

Numerical flow simulation for complete vehicle configurations
[AD-A273588] p 2170 N94-24849

A global range military transport: The ostrich
[NASA-CR-195494] p 2183 N94-24972

Weasel works SA-150: Design study of a 100 to 150 passenger transport aircraft
[NASA-CR-195489] p 2183 N94-24975

The RTL-46: A simulated commercial air transportation study
[NASA-CR-195524] p 2184 N94-25017

AIRCRAFT CONSTRUCTION MATERIALS

An evaluation of Compton scatter imaging using COMSCAN
[DREP-TM-93-38] p 2372 N94-24136

Feasibility study of shot-peening modeling
[CTN-94-60926] p 2244 N94-24170

Introduction of Ceramics into Aerospace Structural Composites
[AGARD-R-795] p 2255 N94-24228

Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260

Test methods for composites: A status report. Volume 1: Tension test methods
[AD-A273501] p 2230 N94-24942

Establishment of computerized numerical databases on thermophysical and other properties of molten as well as solid materials and data evaluation and validation for generating recommended reliable reference data
p 2246 N94-25123

AIRCRAFT CONTROL

Identification of integrated airframe: Propulsion effects on an F-15 aircraft for application to drag minimization
[NASA-TM-4532] p 2188 N94-24106

The 33rd Israel Annual Conference on Aviation and Astronautics
[ITN-94-85227] p 2153 N94-24241

Influence of active controls on the design process of a large transport aircraft p 2178 N94-24323

Cockpit control system conceptual design
[NASA-CR-195543] p 2190 N94-24551

Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data
[NASA-CR-194838] p 2190 N94-24804

NASA LaRC Workshop on Guidance, Navigation, Controls, and Dynamics for Atmospheric Flight, 1993
[NASA-CP-10127] p 2162 N94-25096

Aircraft digital flight control technical review
p 2163 N94-25106

Development of high-angle-of-attack nose-down pitch control margin design guidelines for combat aircraft
p 2164 N94-25107

X-31 aerodynamic characteristics determined from flight data p 2164 N94-25109

Nonlinear aerodynamic modeling using multivariate orthogonal functions p 2164 N94-25110

Feedback control laws for highly maneuverable aircraft
[NASA-CR-195195] p 2190 N94-25176

Proceedings of the Workshop on Augmented Visual Display (AVID) Research
[NASA-CP-10128] p 2439 N94-25490

AIRCRAFT DESIGN

Pilot-vehicle interface
[DOT/FAA/CT-92/21] p 2430 N94-23083

Summary of lift and lift/cruise fan powered lift concept technology
[NASA-CR-177619] p 2176 N94-23489

An engineering code to analyze hypersonic thermal management systems p 2320 N94-23636

The 33rd Israel Annual Conference on Aviation and Astronautics
[ITN-94-85227] p 2153 N94-24241

New features in Computational Fluid Dynamics (CFD) technology at the TASHAN Engineering Center at IAI
p 2155 N94-24249

Continuous gust response and sensitivity derivatives using state-space models p 2161 N94-24287

Integrated Airframe Design Technology
[AGARD-R-794] p 2177 N94-24313

New computing systems, future computing environment, and their implications on structural analysis and design
p 2177 N94-24314

Applications of CFD codes and supercomputers to aircraft design activities p 2177 N94-24316

The process network in the design and manufacturing of aircraft p 2178 N94-24319

Application of concurrent engineering principles to aircraft structural design p 2178 N94-24321

Some practical problems in multidisciplinary design and optimisation p 2178 N94-24322

Influence of active controls on the design process of a large transport aircraft p 2178 N94-24323

Current and future design methods for large transport aircraft p 2179 N94-24324

The integration of design and manufacturing processes at Alenia DVD p 2179 N94-24325

Trends of design methodology of airframe
p 2179 N94-24327

Aircraft empennage structural detail design
[NASA-CR-195496] p 2179 N94-24332

JB-300: An advanced medium size transport for 2005
[NASA-CR-195499] p 2179 N94-24401

The RTL-46: A simulated commercial air transportation study
[NASA-CR-195524] p 2184 N94-25017

Design project: Viper
[NASA-CR-195484] p 2184 N94-25021

The Future of Aerospace: Proceedings of a symposium held in honor of Alexander H. Flax
[LC-93-83945] p 2631 N94-25065

High-order technology: Applying technical excellence to new airplane development p 2185 N94-25069

A conceptual design of an unmanned test vehicle using an airbreathing propulsion system
[NASA-CR-195550] p 2189 N94-25085

AIRCRAFT DETECTION

Device for the selective detection of objects
[CA-PATENT-1-308-179] p 2544 N94-24489

AIRCRAFT ENGINES

Vibration isolating engine mount
[CA-PATENT-1-320-710] p 2353 N94-23215

Rolls-Royce in perspective: Past, present and future
[PNR-90882] p 2187 N94-23519

The RB211: The first 25 years
[PNR-90977] p 2187 N94-23570

Internal combustion engine with a central crankshaft and integral tandem annular pistons
[CA-PATENT-1-320-878] p 2363 N94-24055

Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993
[PB93-410407] p 2173 N94-24062

A colour image processing algorithm to identify copper-based particles in filter debris samples
[DREP-TM-93-19] p 2455 N94-24122

The 33rd Israel Annual Conference on Aviation and Astronautics
[ITN-94-85227] p 2153 N94-24241

Gas turbine and operating method of the same
[CA-PATENT-APPL-SN-2043039] p 2188 N94-24490
Effect of power system technology and mission requirements on high altitude long endurance aircraft
[NASA-CR-194455] p 2189 N94-25200

AIRCRAFT GUIDANCE
Airport surface operations requirements analysis
[NASA-CR-191508] p 2172 N94-23288

AIRCRAFT HAZARDS
Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993
[PB93-410407] p 2173 N94-24062
Aviation Weather Program (AWP)
p 2411 N94-24380
Annual review of aircraft accident data. US general aviation calendar year 1990
[PB94-126869] p 2173 N94-24841
Full-scale fire testing of seat component materials
[AD-A273499] p 2174 N94-24941

AIRCRAFT ICING
Characteristics of surface roughness associated with leading edge ice accretion
[NASA-TM-106459] p 2166 N94-23522
Close-up analysis of inflight ice accretion
[NASA-TM-106457] p 2172 N94-23523
Rime-, mixed- and glaze-ice evaluations of three scaling laws
[NASA-TM-106461] p 2173 N94-24047

AIRCRAFT INDUSTRY
Applications of CFD codes and supercomputers to aircraft design activities p 2177 N94-24316
The Future of Aerospace: Proceedings of a symposium held in honor of Alexander H. Flax
[LC-93-83945] p 2631 N94-25065
Aviation: The timeless industry p 2165 N94-25068

AIRCRAFT INSTRUMENTS
Pilot-vehicle interface
[DOT/FAA/CT-92/21] p 2430 N94-23083
Evaluation of the UH-1N instrument panel
[AD-A273145] p 2186 N94-24774

AIRCRAFT LANDING
Airport pavement test machine design and cost study
[DOT/FAA/CT-93/51] p 2192 N94-24072
Optical information in landing scenes
p 2442 N94-25511

AIRCRAFT MAINTENANCE
A colour image processing algorithm to identify copper-based particles in filter debris samples
[DREP-TM-93-19] p 2455 N94-24122
Repair of cracked aluminum aircraft structure with composite patches p 2156 N94-24259
Computer based expert system for battle damage repair of composite structures p 2157 N94-24262

AIRCRAFT MANEUVERS
Thrust vectoring theory, laboratory and flight tests
p 2155 N94-24251
Combined 1991 and 1992 Robinson-22B (R-22) parking test results
[AD-A273550] p 2193 N94-24559
Development of high-angle-of-attack nose-down pitch control margin design guidelines for combat aircraft
p 2164 N94-25107
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 2: Maneuver descriptions and section guide
[AD-A273685] p 2185 N94-25440

AIRCRAFT MODELS
An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel
[NASA-TM-106471] p 2166 N94-23299
NASA/USRA University Advanced Design Program, 1992-1993. The Diamondback: A simulated commercial air transportation study
[NASA-CR-195523] p 2180 N94-24462
The RTL-46: A simulated commercial air transportation study
[NASA-CR-195524] p 2184 N94-25017

AIRCRAFT NOISE
JAPE 91: Influence of terrain masking of the acoustic propagation of helicopter noise p 2528 N94-24214
Comparisons of calculated and measured helicopter noise near instrument hill p 2528 N94-24215
Exercise keevil: Noise levels of six military helicopters
[PB93-210722] p 2529 N94-25026
The ISL rotor bench
[ISL-R-108/92] p 2185 N94-25301

AIRCRAFT PARTS
Flush head fastener
[CA-PATENT-1308581] p 2364 N94-24175
The airplane: A simulated commercial air transportation study
[NASA-CR-195525] p 2182 N94-24837
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5A: Corrosion: General issues
[AD-A273666] p 2250 N94-25406

AIRCRAFT PERFORMANCE
Identification of integrated airframe: Propulsion effects on an F-15 aircraft for application to drag minimization
[NASA-TM-4532] p 2188 N94-24106
S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270
Conceptual design proposal: HUGO global range/mobility transport aircraft
[NASA-CR-195501] p 2181 N94-24787
The Blue Emu
[NASA-CR-195535] p 2182 N94-24817
Dumbo heavy lifter aircraft
[NASA-CR-195500] p 2182 N94-24915
A global range military transport: The ostrich
[NASA-CR-195494] p 2183 N94-24972
Design project: Viper
[NASA-CR-195484] p 2184 N94-25021
High lift aerodynamics
[NASA-CR-195183] p 2184 N94-25268
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 2: Maneuver descriptions and section guide
[AD-A273685] p 2185 N94-25440

AIRCRAFT PILOTS
Screening for asymptomatic coronary heart disease
p 2423 N94-23315
Aeromedical disposition for coronary artery disease
p 2423 N94-23316
Aeromedical disposition of Arrhythmias and electrocardiographic findings in aircrew
p 2423 N94-23318
Sarcoidosis and the aviator p 2425 N94-23325
Arterial hypertension and the aviator
p 2425 N94-23328
Vision impairment and corrective considerations of civil airmen
[DOT/FAA/AM-93/21] p 2426 N94-23623
In flight mission planning in the Copilote Electronique
p 2522 N94-25015

AIRCRAFT POWER SUPPLIES
Highly-reliable fly-by-light/power-by-wire technology
p 2162 N94-25099

AIRCRAFT PRODUCTION
The integration of design and manufacturing processes at Alenia DVD p 2179 N94-24325
The Blue Emu
[NASA-CR-195535] p 2182 N94-24817

AIRCRAFT PRODUCTION COSTS
C-17 lot 3 production contract
[AD-A273180] p 2174 N94-25153

AIRCRAFT SAFETY
Cockpit weather graphics using mobile satellite communications p 2280 N94-22775
Development and experimental validation of computational methods to simulate abnormal thermal and structural environments
[DE94-000554] p 2268 N94-23000
Airport surface operations requirements analysis
[NASA-CR-191508] p 2172 N94-23288
Initial evaluation of burn characteristics of phenolic foam runway brake arrestor material
[DOT/FAA/CT-TN93/7] p 2253 N94-23335
Aircraft accident report: Inadvertent in-flight slat deployment, China Eastern Airlines Flight 583, McDonnell Douglas MD-11, B-2171, 950 nautical miles south of Shemya, Alaska, 6 April 1993
[PB93-910408] p 2172 N94-23579
Dispersion of fire suppression agents discharged from high pressure vessels: Establishing initial/boundary conditions for the flow outside the vessel
[PB94-103660] p 2172 N94-23810
Rime-, mixed- and glaze-ice evaluations of three scaling laws
[NASA-TM-106461] p 2173 N94-24047
Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993
[PB93-410407] p 2173 N94-24062
Aircraft flight safety: A bibliography
[AGARD-R-805] p 2173 N94-24091
Aviation Weather Program (AWP)
p 2411 N94-24380
Aircraft evacuation testing: Research and technology issues
[PB94-107620] p 2173 N94-24750
Annual review of aircraft accident data. US general aviation calendar year 1990
[PB94-126869] p 2173 N94-24841
Aviation system safety risk management tool analysis. Volume 2: Appendices
[AD-A273502] p 2173 N94-24864
Full-scale fire testing of seat component materials
[AD-A273499] p 2174 N94-24941

AIRCRAFT SPECIFICATIONS
A global range military transport: The ostrich
[NASA-CR-195494] p 2183 N94-24972
Design project: Viper
[NASA-CR-195484] p 2184 N94-25021

AIRCRAFT STABILITY
NASA advanced design program. Design and analysis of a radio-controlled flying wing aircraft
[NASA-CR-195515] p 2180 N94-24589
A numerical study of airplanes flying in proximity
[AD-A273373] p 2173 N94-24718
Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data
[NASA-CR-194838] p 2190 N94-24804

AIRCRAFT STRUCTURES
Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction
[NASA-CR-189645] p 2525 N94-23698
A prediction method for the compressive strength of impact damaged composite laminates
[CTN-94-60925] p 2229 N94-24137
Flush head fastener
[CA-PATENT-1308581] p 2364 N94-24175
The 33rd Israel Annual Conference on Aviation and Astronautics
[ITN-94-85227] p 2153 N94-24241
Repair of cracked aluminum aircraft structure with composite patches p 2156 N94-24259
Development of a damage tolerance tool to analyze multiple-site damage in aircraft structure
p 2157 N94-24261
Computer based expert system for battle damage repair of composite structures p 2157 N94-24262
Integrated stress and strength analysis of airplane structures using the data processing tool ISSY
p 2178 N94-24320
Application of concurrent engineering principles to aircraft structural design p 2178 N94-24321
Some practical problems in multidisciplinary design and optimisation p 2178 N94-24322
Aircraft empennage structural detail design
[NASA-CR-195496] p 2179 N94-24332
Aircraft wing structure detail design
[NASA-CR-195485] p 2180 N94-24498
NASA advanced design program. Design and analysis of a radio-controlled flying wing aircraft
[NASA-CR-195515] p 2180 N94-24589
Ultrasonic process for curing adhesives
[AD-A273175] p 2259 N94-24788
Test methods for composites: A status report. Volume 1: Tension test methods
[AD-A273501] p 2230 N94-24942
Aircraft empennage structural detail design
[NASA-CR-195486] p 2183 N94-24969
The Bunny: A simulated commercial air transportation study
[NASA-CR-195537] p 2183 N94-25001
The Gold Rush: A simulated commercial air transportation study
[NASA-CR-195528] p 2184 N94-25002
Test methods for composites: A status report. Volume 3: Shear test methods
[AD-A273561] p 2230 N94-25163

AIRCRAFT WAKES
A new experimental apparatus for the study of the unsteady flowfield over an airfoil in pitching and heaving motions using laser Doppler anemometry
[ISL-CO-229/92] p 2165 N94-23149
LDA measurements of the unsteady near wake behind an airfoil undergoing transient and periodic pitching motions
[ISL-CO-215/92] p 2165 N94-23161
Feasibility of detecting aircraft wake vortices using passive microwave radiometers
[NASA-CR-191553] p 2343 N94-23498
CFD assessment of orifice aspect ratio and mass flow ratio on jet mixing in rectangular ducts
[NASA-TM-106434] p 2187 N94-24082

AIRDROPS
Radially constructed cruciform parachute
[CA-PATENT-1323021] p 2168 N94-24182

AIRFIELD SURFACE MOVEMENTS
System for automatic transportation of aircraft on the ground
[CA-PATENT-1-322-361] p 2193 N94-24785

AIRFOIL OSCILLATIONS
Aeroelastic, aeromechanical and vibration problems in helicopters p 2154 N94-24244
The influence of elastic pitch variations on helicopter flight mechanics p 2161 N94-24286
Effect of an extendable slat on the stall behavior of a VR-12 airfoil
[NASA-TP-3407] p 2171 N94-25187

AIRFOIL PROFILES

Issac, Jason Cherian ses in transonic flow [NASA-CR-194837] p 2167 N94-24052

Aerodynamic characteristics and pressure distributions for an executive-jet baseline airfoil section [NASA-TM-4529] p 2169 N94-24586

AIRFOILS

Computational study of GA(W)-1: Airfoil near stall [PB93-226249] p 2165 N94-23116

Turbine engine with induced pre-swirl at the compressor inlet [CA-PATENT-1-317-467] p 2186 N94-23253

Characteristics of surface roughness associated with leading edge ice accretion [NASA-TM-106459] p 2166 N94-23522

An analytic study of a two-phase laminar airfoil in simulated heavy rain p 2171 N94-23661

Compressible turbulent flow simulation with a multigrid multiblock method p 2342 N94-23694

Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion [NASA-TM-109681] p 2167 N94-23975

Issac, Jason Cherian ses in transonic flow [NASA-CR-194837] p 2167 N94-24052

Toward large eddy simulation of turbulent flow over an airfoil p 2172 N94-24150

Discrete sensitivity derivatives of the Navier-Stokes equations with a parallel Krylov solver [NASA-TM-106481] p 2265 N94-24301

Effect of an extendable slat on the stall behavior of a VR-12 airfoil [NASA-TP-3407] p 2171 N94-25187

AIRFRAME MATERIALS

The 33rd Israel Annual Conference on Aviation and Astronautics [ITN-94-85227] p 2153 N94-24241

AIRFRAMES

Lewis Research Center R and D Facilities [NASA-TM-109400] p 2630 N94-23135

Integrated Airframe Design Technology [AGARD-R-794] p 2177 N94-24313

Frameworks for integrated airframe design p 2178 N94-24318

AIRLINE OPERATIONS

Information systems strategy in air transport [AD-A273125] p 2173 N94-24781

The Blue Emu [NASA-CR-195535] p 2182 N94-24817

AIRLOCK MODULES

An opening mechanism for the scientific airlock outer hatch p 2360 N94-24027

AIRPORT SURFACE DETECTION EQUIPMENT

Airport surface operations requirements analysis [NASA-CR-191508] p 2172 N94-23288

AIRPORTS

Airport surface operations requirements analysis [NASA-CR-191508] p 2172 N94-23288

Performance of prefabricated geocomposite subdrainage system in an airport runway [DOT/FAA/RD-93/23] p 2192 N94-23303

System for automatic transportation of aircraft on the ground [CA-PATENT-1-322-361] p 2193 N94-24785

ASR-9 microburst detection algorithm [AD-A273591] p 2415 N94-24850

AIRSPACE

Conflict-free trajectory planning for air traffic control automation [NASA-TM-108790] p 2174 N94-25272

AIRSPEED

Characteristics of surface roughness associated with leading edge ice accretion [NASA-TM-106459] p 2166 N94-23522

AIRY FUNCTION

Stability analysis of anisotropic conical shells [PB94-119054] p 2377 N94-24645

ALBEDO

Participation in TOMS missions [NASA-CR-195110] p 2398 N94-24078

Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887

Martian mesoscale circulations induced by variations in surface optical and thermal characteristics: A numerical study p 2622 N94-24899

ALBUMINS

Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344

ALGAE

Literature study on: Remote Fraunhofer luminescence detection of algal bloom in marine environments [BCRS-92-25] p 2417 N94-23176

Factors affecting the identification of phytoplankton groups by means of remote sensing [NASA-TM-108799] p 2387 N94-24403

ALGEBRA

Tool sharing: An application of max-algebra, part 2 [MEMO-1122] p 2478 N94-22710

Tool sharing: An application of max-algebra, part 1 [MEMO-1108] p 2478 N94-22726

Median stabilization degree of a median algebra [PB93-220010] p 2479 N94-23093

Differential algebraic equations [PB93-237618] p 2481 N94-23455

Relational algebra and equational proofs [PB94-110822] p 2486 N94-23724

Sequential composition, action prefixes and process prefix [PB94-101433] p 2488 N94-24539

Coadjoint orbits and conformal field theory [DE94-002285] p 2523 N94-24658

Algebraic-geometric codes and their decoding algorithms [ETN-94-95294] p 2491 N94-25079

Data structures and amortized complexity in a functional setting [ETN-94-95307] p 2476 N94-25290

Extension problem for generalized multi-monogenic functions in Clifford analysis [DE93-616818] p 2493 N94-25433

ALGORITHMS

On dynamic input-output linearization of discrete-time nonlinear systems [MEMO-1123] p 2447 N94-22711

Algorithms for speech coding systems based on linear prediction [EUT-92-E-260] p 2447 N94-22731

On the numeric integration of dynamic attitude equations [NASA-CR-194788] p 2448 N94-23073

The explicit computation of integration algorithms and first integrals for ordinary differential equations with polynomials coefficients using trees [NASA-CR-194787] p 2448 N94-23074

Linear algorithm for flattening list graphs [PB93-220648] p 2448 N94-23097

On the numerical computation of invariant manifolds [W-9306] p 2480 N94-23140

A reliable algorithm for optimal control synthesis [NASA-CR-194809] p 2472 N94-23332

A DTM-based path planning method for planetary rovers p 2370 N94-23423

A knowledge based system for scientific data visualization [NASA-CR-194879] p 2452 N94-23507

A working algorithm to isolate integrable surfaces in E cubed [SSCL-PREPRINT-761] p 2452 N94-23518

The computation of R(sub 0) for discrete-time epidemic models with dynamic heterogeneity [CWI-AM-R9301] p 2420 N94-23521

Algorithm-development activities [NASA-CR-193225] p 2420 N94-23538

Implementation and evaluation of the new wind algorithm in NASA's 50 MHz doppler radar wind profiler [NASA-CR-194880] p 2408 N94-23576

A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670

Implementing abstract multigrid or multilevel methods p 2483 N94-23682

A multilevel adaptive projection method for unsteady incompressible flow p 2341 N94-23690

Control algorithms for effective operation of variable-speed wind turbines [DE94-002607] p 2394 N94-23704

Algorithm on addition chains with restricted memory [PB94-118692] p 2454 N94-23759

Exercises in multiprogramming [PB94-101458] p 2454 N94-23768

Typechecker for bijective pure type systems [PB94-110814] p 2454 N94-23817

The instant sequencing task: Toward constraint-checking a complex spacecraft command sequence interactively p 2504 N94-23875

Participation in TOMS missions [NASA-CR-195110] p 2398 N94-24078

System for Anomaly and Failure Detection (SAFD) system development [NASA-CR-193907] p 2372 N94-24174

Satellite autonomous navigation and orbit determination using magnetometers p 2156 N94-24258

Maximum likelihood modal parameter identification and realization of stochastic systems p 2157 N94-24265

Failure-proof estimation under conditions of lack of information p 2158 N94-24267

Structure in gamma ray burst time profiles: Correlations with other observables p 2579 N94-24431

MERILL: An equational reasoning system in standard ML: A user guide (prerelease version 0.4) [PB93-204501] p 2456 N94-24534

An efficient data assimilation algorithm with a gaussian covariance structure [AD-A273152] p 2418 N94-24671

ASR-9 microburst detection algorithm [AD-A273591] p 2415 N94-24850

New directions in network flows [AD-A273467] p 2468 N94-24939

Algebraic-geometric codes and their decoding algorithms [ETN-94-95294] p 2491 N94-25079

Development and application of new algorithms for the simulation of viscous compressible flows with moving bodies in three dimensions [AD-A273514] p 2338 N94-25157

An AVHRR cloud classification database typed by experts [AD-A273560] p 2416 N94-25162

An analysis of gamma ray burst time histories [NASA-CR-195191] p 2629 N94-25199

Data structures and amortized complexity in a functional setting [ETN-94-95307] p 2476 N94-25290

Unwrapping the phase response functions for nonlinear systems [RR-465] p 2462 N94-25311

Two-dimensional pattern analysis and classification using a complex orthogonal estimation algorithm [RR-475] p 2463 N94-25321

Kernels of anti-causal operators and the multivariable generalized predictive control problem [MATHS-REPT-A-191] p 2476 N94-25428

Advances in generalized and constrained generalized predictive control with application to a dynamometer model [MATHS-REPT-A-192] p 2476 N94-25429

New algorithm for minimizing (chi)(sup 2) functionals with constraints [DE93-616800] p 2463 N94-25432

Active camera calibration for a head-eye platform using a variable state dimension filter [OUEL-1975/93] p 2346 N94-25472

Validation of vision-based range estimation algorithms using helicopter flight data p 2442 N94-25506

ALIGNMENT

Rack Insertion End Effector (RIEE) automation p 2368 N94-23242

Hubble Space Telescope high speed photometer orbital verification [NASA-CR-189333] p 2204 N94-24226

ALKALI METALS

Vacancy formation energy of Li(H, D) and Na(H, D) systems [DE93-633452] p 2558 N94-22978

ALKALIES

Auto-metasomatism of the western lunar highlands: Result of closed system fractionation and mobilization of a KREEPy trapped liquid p 2615 N94-24367

ALKANES

Interactions between organized, surface-confined monolayers and vapor-phase probe molecules. 7: Comparison of self-assemblying organomercaptan monolayers deposited on gold from liquid and vapor phases [AD-A273196] p 2535 N94-24555

Synthesis and characterization of two-dimensional molecular recognition interfaces [AD-A273177] p 2536 N94-24729

ALKENES

Dispersion of Rh/Cu in a sol-gel matrix. Highly chemo- and stereoselective catalyst for the reduction of alkynes to Z-alkenes [AD-A273306] p 2262 N94-25145

ALKYL COMPOUNDS

STM studies of LB deposited alkyl substituted polyaniline and its corresponding monomer [AD-A273553] p 2257 N94-24562

Dispersion of Rh/Cu in a sol-gel matrix. Highly chemo- and stereoselective catalyst for the reduction of alkynes to Z-alkenes [AD-A273306] p 2262 N94-25145

ALKYNES

Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon [AD-A273232] p 2259 N94-24789

Metal-catalyzed alkynylation of (Bromophenyl)Oligophenylenes: A rapid route to thermoset precursors of high density monolithic glass-like carbon [AD-A273219] p 2260 N94-24863

Dispersion of Rh/Cu in a sol-gel matrix. Highly chemo- and stereoselective catalyst for the reduction of alkynes to Z-alkenes [AD-A273306] p 2262 N94-25145

ALL-WEATHER LANDING SYSTEMS
The 94 GHz MMW imaging radar system
p 2306 N94-25493
ALLOCATIONS
Generalized concavity in cooperative game theory: Characterizations in terms of the core
[MEMO-1121] p 2497 N94-22708
Irreducible core of a minimum cost spanning tree game
[PB94-110962] p 2489 N94-24653
ALLOYING
Internal friction associated with dislocation relaxations in virgin martensite
[PB93-226280] p 2240 N94-23119
Alloys for hydrogen storage in nickel/hydrogen and nickel/metal hydride batteries p 2391 N94-23353
Large-scale production of Si(0.8)Ge(0.2) thermoelectric alloys by mechanical alloying
[DE94-000695] p 2243 N94-23753
ALLOYS
Symposium on diffusion in ordered alloys
[AD-A273643] p 2245 N94-25033
ALPHA PARTICLES
Fusion plasma theory project summaries
[DE94-001712] p 2551 N94-23808
ALTERNATIVES
Reduced cost alternatives to premise wiring using ATM and microcellular technologies p 2314 N94-23239
ALTIMETRY
Application of aircraft navigation sensors to enhanced vision systems p 2176 N94-25495
ALTITUDE
Trends in mobile satellite communication
p 2278 N94-22763
ALTITUDE CONTROL
Design of a resistojet for Space Station Freedom
[NASA-CR-195506] p 2221 N94-24979
ALTITUDE SIMULATION
Lewis Research Center R and D Facilities
[NASA-TM-109400] p 2630 N94-23135
The effect of high altitude pressure on the power and efficiency of an airborne two-stroke engine
p 2155 N94-24253
Altitude simulation facility for testing large space motors p 2156 N94-24255
Temperature measurement using infrared imaging systems during turbine engine altitude testing
[NASA-TM-105871] p 2193 N94-25184
ALTITUDE TESTS
The effect of high altitude pressure on the power and efficiency of an airborne two-stroke engine
p 2155 N94-24253
ALUMINUM
Influence of sintering atmospheres on the aluminum sintering characteristics
[DE93-632412] p 2239 N94-22965
Analysis and test of low profile aluminum aerospace tank dome
[NASA-TP-3442] p 2375 N94-23294
Plasma ARC keyhole welding of aluminum
[PB93-201606] p 2353 N94-23449
SALI chemical analysis of provided samples
[NASA-CR-194138] p 2232 N94-23524
Repair of cracked aluminum aircraft structure with composite patches p 2156 N94-24259
Procedures for determining MATMOD-4V material constants
[DE94-002638] p 2245 N94-24520
Crashworthiness analysis using advanced material models in DYNA3D
[DE94-002988] p 2229 N94-24632
Ignition and combustion characteristics of metallized propellants, phase 2
[NASA-CR-195107] p 2266 N94-24700
Excitation mechanisms for XUV and x ray lasers
[DE93-617006] p 2351 N94-25482
ALUMINUM ALLOYS
Chromate-free talc chemical conversion coatings for aluminum alloys
[DE94-001567] p 2238 N94-22932
Damage under monotonic or cyclic loads of new AlSiFe alloys prepared by the Osprey (tm) process
[ISAL-93-0008] p 2239 N94-22972
Interplay of magnetic and superconducting heavy fermion ground states
[DE94-000680] p 2240 N94-23003
New extensions in the development of deformation processed metal-metal matrix composites
[DE94-000692] p 2227 N94-23004
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184
Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons
[PB93-201531] p 2561 N94-23428
Quantitative analysis in the Al-Mg-Si system with small amounts of Mg and Si
[PB93-201499] p 2241 N94-23446
Theory of extrusion: Advances and challenges
[PB93-201572] p 2241 N94-23447
Plasma ARC keyhole welding of aluminum
[PB93-201606] p 2353 N94-23449
Multilayer relaxation and surface structure of ordered alloys
[NASA-TM-106433] p 2243 N94-23578
High temperature, oxidation resistant noble metal-Al alloy thermocouple
[NASA-CASE-LEW-15515-1] p 2343 N94-23826
Segregation and oxidation studies of Al-Li and Al-Mg alloys
[ISBN-0-315-83993-7] p 2244 N94-24469
Investigate zero-stress replicated optics
[NASA-CR-193889] p 2545 N94-24665
Ultrasonic process for curing adhesives
[AD-A273175] p 2259 N94-24788
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues
[AD-A273663] p 2251 N94-25450
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues
[AD-A273664] p 2251 N94-25451
The mechanical property data base from an Air Force/Industry Cooperative Test Program on advanced aluminum alloys (7064 and CW67)
[AD-A273741] p 2251 N94-25531
ALUMINUM COMPOUNDS
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers
[DE94-002293] p 2350 N94-24659
ALUMINUM GALLIUM ARSENIDES
Manufacturing and characterization of GaAs/AlGaAs multiple quantumwell ridge waveguide lasers
[EUT-92-E-265] p 2348 N94-23168
Planar varactor frequency multiplier devices with blocking barrier
[NASA-CASE-NPO-18428-1-CU] p 2310 N94-23821
Magnetic field-induced saddle point in GaAs/AlGaAs short period superlattices
[REPT-A-2656] p 2568 N94-25515
ALUMINUM NITRIDES
Preparation and properties of translucent gamma-aluminium oxynitride
[ETN-94-95305] p 2263 N94-25281
ALUMINUM OXIDES
Glass-ceramic Li-Al-Si-O composition and process for its production
[CA-PATENT-APPL-SN-2043757] p 2254 N94-24129
Preparation and properties of translucent gamma-aluminium oxynitride
[ETN-94-95305] p 2263 N94-25281
Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3
[DE93-613824] p 2566 N94-25332
ALUMINUM SILICATES
Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments
[DE93-040161] p 2231 N94-22933
ALUMINUM-LITHIUM ALLOYS
Microstructural analysis of the 2195 aluminum-lithium alloy welds p 2251 N94-24448
AMAZON REGION (SOUTH AMERICA)
Effect of land use change on the carbon cycle in Amazon soils
[NASA-CR-195168] p 2399 N94-24853
Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861
AMBIENT TEMPERATURE
Status of the development of rechargeable lithium cells p 2392 N94-23354
AMBIPOLAR DIFFUSION
Diffusion in electronegative discharges with magnetic fields
[AD-A273826] p 2304 N94-25521
AMERICIUM
A survey of metallurgical research on several actinides
[DE94-002643] p 2245 N94-24747
AMIDES
The electrochemistry of the solvated electron: A study of its properties and of its applications
[ETN-94-95313] p 2236 N94-25296
AMINES
Curing phthalonitrile resins with acid and amine
[AD-D016021] p 2258 N94-24721
AMINO ACIDS
Capillary electrophoresis of biomolecules: Theory, instrumentation and applications
[ETN-94-95297] p 2236 N94-25233
AMMONIA
Contaminant effects in solid oxide fuel cells
[DE94-002963] p 2395 N94-23785
AMMONIUM COMPOUNDS
Integrated hydrometallurgical jarosite treatment
[PB93-217990] p 2232 N94-22983
AMORPHOUS MATERIALS
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184
Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189
Disorder effects on small-polaron formation and hopping
[DE94-001205] p 2534 N94-23804
Synthesis of soluble halogenated polyphenylenes: Mechanism for the coupling halogenated lithiobenzenes
[AD-A273547] p 2257 N94-24558
Demonstration of the feasibility of an integrated x ray laboratory for planetary exploration
[NASA-CR-177631] p 2598 N94-24832
Solid state synthesis of Fe-B-Si alloys
[VTT-PUBS-118] p 2250 N94-25316
Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3
[DE93-613824] p 2566 N94-25332
Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333
AMORPHOUS SILICON
Ga delta-doping layers in silicon
[PB93-224632] p 2561 N94-23222
Amorphous silicon PVMaT, phase 2A
[DE93-018221] p 2390 N94-23295
AMPLIFIER DESIGN
Broadband linearisation of high-efficiency power amplifiers p 2275 N94-22747
AMPLIFIERS
Field emitter array
[AD-D016023] p 2303 N94-25150
AMPLITUDE MODULATION
An optical ASK and FSK phase diversity transmission system
[EUT-92-E-268] p 2542 N94-23171
Modulation characteristics of a high-power semiconductor Master Oscillator Power Amplifier (MOPA)
[NASA-TM-104577] p 2308 N94-23281
Preliminary analysis of amplitude and phase fluctuations in the JAPE multiple tone data to distances of 500 meters p 2528 N94-24216
AMPOULES
Numerical modeling of physical vapor transport under microgravity conditions: Effect of thermal creep and stress p 2223 N94-24340
ANALOG CIRCUITS
APLAC: An object-oriented analog circuit simulator and design tool. 6.1 system simulations manual
[PB93-224871] p 2450 N94-23226
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2
[AD-A273703] p 2463 N94-25456
ANALOG COMPUTERS
High speed electronic analog computers using low-gain amplifiers
[AD-D015974] p 2446 N94-25034
MOS analog memory with injection capacitors
[AD-D015990] p 2312 N94-25050
ANALOG SIMULATION
Mixed analog-digital description and simulation: Proposition for VHDL-analogue
[RR-908-I] p 2450 N94-23180
ANALOG TO DIGITAL CONVERTERS
CAMAC throughput of a new RISC-based data acquisition computer at the DIII-D tokamak
[DE94-001113] p 2550 N94-23182
Study of methods and structures for handling of digitized maps for geographical information systems
[PB93-204402] p 2590 N94-23741
ANALYSIS (MATHEMATICS)
Probabilistic methods in problems of applied analysis
[PB94-110681] p 2495 N94-24571
ANALYTIC FUNCTIONS
On the Gibbs phenomenon 3: Recovering exponential accuracy in a sub-interval from a spectral partial sum of a piecewise analytic function
[NASA-CR-191560] p 2480 N94-23278

Genericity of stabilizability for time-delay systems
[PB93-237725] p 2475 N94-24762

ANALYTICAL CHEMISTRY

Fifty years of continuous improvement: What has DOE done for analytical chemistry?
[DE94-002539] p 2234 N94-24548

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5B: Corrosion: General issues
[AD-A273667] p 2250 N94-25407

ANALYZERS

A study of non-ideal focus properties of 30 deg parallel plate energy analyzers
[NIFS-263] p 2311 N94-24457

ANCHORS (FASTENERS)

A system for the challenging task of collecting samples from a comet surface p 2358 N94-24007

Planetary and asteroid missions. Getting there: Anchoring spacecraft to asteroids
[NASA-CR-195493] p 2614 N94-24333

ANECHOIC CHAMBERS

Head related transfer function pseudo-stereophony
[NASA-CASE-ARC-11919-1-NP] p 2525 N94-23312

ANEMOMETERS

Improvement of system properties of a pulsed laser Doppler anemometer with respect to an optical amplifier
[DLR-FB-93-19] p 2547 N94-25305

ANESTHESIA

The adaptive resonance theory network: (Clustering-) behaviour in relation with brainstem auditory evoked potential patterns
[EUT-92-E-264] p 2470 N94-22877

ANGLE OF ATTACK

An experimental investigation of a Mach 3.0 high-speed civil transport at supersonic speeds
[NASA-TP-3365] p 2169 N94-24311

Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data
[NASA-CR-194838] p 2190 N94-24804

Development of high-angle-of-attack nose-down pitch control margin design guidelines for combat aircraft
p 2164 N94-25107

Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108

X-31 aerodynamic characteristics determined from flight data p 2164 N94-25109

Nonlinear aerodynamic modeling using multivariate orthogonal functions p 2164 N94-25110

A study of roll attractor and wing rock of delta wings at high angles of attack p 2164 N94-25111

Effect of an extendable slat on the stall behavior of a VR-12 airfoil
[NASA-TP-3407] p 2171 N94-25187

State-of-the-art engineering aeroprediction methods with emphasis on new semiempirical techniques for predicting nonlinear aerodynamics on complete missile configurations
[AD-A273680] p 2171 N94-25411

ANGLES (GEOMETRY)

Fiber optical angular sensor: Literature study and experimental results
[PB93-204345] p 2545 N94-24529

Off-design performance of crenulated blades in a linear compressor cascade
[AD-A273744] p 2340 N94-25534

ANGULAR DISTRIBUTION

Strong interactions studies with medium energy probes
[DE94-001446] p 2540 N94-23791

ANGULAR MOMENTUM

Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064)
[DE94-002000] p 2347 N94-22974

The low noise momentum wheel MW-X: EM design and predicted properties p 2360 N94-24024

Momentum management and torque distribution
p 2159 N94-24272

Proton spin: The role of quark-gluon and hadron degrees of freedom
[DE93-616867] p 2538 N94-25341

ANGULAR VELOCITY

Momentum management and torque distribution
p 2159 N94-24272

Heterodyne array for measurement of target velocity
[AD-D016025] p 2545 N94-24722

Transient flows occurring during the accelerated crucible rotation technique
[DE93-617049] p 2567 N94-25422

ANILINE

Di(hydroxyphenyl)- 1,2,4-triazole monomers
[NASA-CASE-LAR-14440-2] p 2252 N94-23075

STM studies of LB deposited alkyl substituted polyaniline and its corresponding monomer
[AD-A273553] p 2257 N94-24562

ANIMALS

ELF communications system ecological monitoring program
[AD-A273456] p 2299 N94-24676

ANIONS

Reactivity of ambident anions in the gas phase
[PB93-232189] p 2533 N94-23713

Effects of ionizing radiation on modern ion exchange materials
[DE94-001569] p 2535 N94-24505

Free energy profiles for Li(+) and I(-) ions approaching Pt(100) surface: A molecular dynamics study
[AD-A273455] p 2536 N94-24675

ANISOTROPIC MEDIA

Time-domain analysis of conduction and displacement current distributions in inhomogeneous and anisotropic layered media
[PB94-111036] p 2403 N94-24592

ANISOTROPIC SHELLS

Stability analysis of anisotropic conical shells
[PB94-119054] p 2377 N94-24645

ANISOTROPY

Anisotropic uniaxial pressure effects in YBa2Cu3O(7-delta)
[DE94-001456] p 2557 N94-22929

A technique to measure rotordynamic coefficients in hydrostatic bearings p 2215 N94-23061

Polarizability of gyrotropic sphere
[PB93-225019] p 2524 N94-23131

Characterization of 3-D particle distributions and effects on recrystallization studied by computer simulation
[PB93-201408] p 2562 N94-23535

Exact transformation of the anisotropic Ginzburg-Landau model and its consequences
[DE94-002208] p 2562 N94-23795

Damage tolerance of pressurized graphite/epoxy tape cylinders under uniaxial and biaxial loading
[NASA-CR-195101] p 2377 N94-24587

Metallic multilayers: Experimental investigation of magnetic anisotropy and magnetic interlayer coupling
[ETN-94-95364] p 2250 N94-25242

The effect of a transport current on the surface barrier of a uniaxial anisotropic superconducting slab
[DE93-617135] p 2566 N94-25390

Surface barrier of a uniaxial anisotropic type 2 superconducting cylinder
[DE93-617137] p 2566 N94-25392

ANNEALING

Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184

The effects of texture and strain on the r-va lue of heavy gauge tantalum plate
[DE94-000690] p 2242 N94-23541

Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550

Polymer morphologh p 2226 N94-24353

ANNIHILATION REACTIONS

Strong interactions studies with medium energy probes
[DE94-001446] p 2540 N94-23791

The effect of a transport current on the surface barrier of a uniaxial anisotropic superconducting slab
[DE93-617135] p 2566 N94-25390

ANNUAL VARIATIONS

Modes of ocean variability in the tropical Pacific as derived from Geosat altimetry
[MPIM-103] p 2382 N94-23158

Climate variability in a coupled GCM. Part 2: The Indian Ocean and monsoon
[MPIM-104] p 2401 N94-23159

Modal structure of variations in the tropical climate system. Part 2: Origins of the low-frequency mode
[MPIM-96] p 2407 N94-23199

The effect of sub-surface volume scattering on the accuracy of ice-sheet altimeter retracking algorithms
[NASA-CR-194825] p 2386 N94-24060

Multiannual simulations with the Mars climate model
p 2618 N94-24881

The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896

Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897

ANNULAR FLOW

Response of an anchored annular cylindrical liquid layer to various axial excitations in zero-gravity
[LRT-WE-9-FB-3-1992] p 2266 N94-23195

ANODES

High energy density aluminum-oxygen cell
p 2393 N94-23363

A high performance H2-Cl2 fuel cell for space power applications p 2394 N94-23366

Investigation of a subsonic-arc-attachment thruster using segmented anodes
[NASA-TM-106419] p 2219 N94-23531

Arc electrode interaction study
[NASA-CR-195096] p 2310 N94-24070

Mechanisms of anode power deposition in a low pressure free burning arc
[NASA-CR-194442] p 2553 N94-25190

ANOMALIES

Galileo spacecraft anomaly and safing recovery
p 2207 N94-23864

Magellan spacecraft and memory state tracking: Lessons learned, future thoughts p 2207 N94-23865

CFD simulation of coaxial injectors
p 2342 N94-24430

ANTARCTIC REGIONS

A solar photovoltaic power system for use in Antarctica
[NASA-TM-106417] p 2395 N94-24071

Antarctic Meteorite Location and Mapping Project (AMLAMP): Antarctic meteorite location map series explanatory text and user's guide to AMLAMP data
[NASA-CR-194841] p 2603 N94-24964

ANTENNA ARRAYS

Adaptive digital beamforming for a CDMA mobile communications payload p 2274 N94-22743

Adaptive array antenna for satellite cellular and direct broadcast communications p 2275 N94-22745

Low cost antennas for MSAT vehicular applications
p 2289 N94-22830

An active K/Ka-band antenna array for the NASA ACTS mobile terminal p 2289 N94-22832

Calibration block for digital beam forming antenna
[PB93-204550] p 2294 N94-23773

A constrained optimization technique for arbitrary antenna arrays and various performance indices
[ISBN-0-315-59455-1] p 2297 N94-24179

Evaluation of EHF multi-beam adaptive arrays
[CTN-94-60898] p 2297 N94-24296

Spatial frequency multiplier with active linearly tapered slot antenna array
[NASA-TM-106494] p 2310 N94-24308

Calibration network intended for phase-array antennas at 3 GHz
[PB93-204352] p 2297 N94-24530

Layered parallel interface for an active antenna array
[AD-D016002] p 2301 N94-25045

ANTENNA COMPONENTS

Spatial frequency multiplier with active linearly tapered slot antenna array
[NASA-TM-106494] p 2310 N94-24308

Layered parallel interface for an active antenna array
[AD-D016002] p 2301 N94-25045

ANTENNA COUPLERS

Calibration block for digital beam forming antenna
[PB93-204550] p 2294 N94-23773

ANTENNA DESIGN

Electrical performance of wire mesh for spacecraft deployable reflector antennas p 2275 N94-22744

Adaptive array antenna for satellite cellular and direct broadcast communications p 2275 N94-22745

Geostationary payload concepts for personal satellite communications p 2278 N94-22765

Applicability of different onboard routing and processing techniques to mobile satellite systems
p 2278 N94-22767

Study of LEO-SAT microwave link for broad-band mobile satellite communication system p 2279 N94-22769

Low cost antennas for MSAT vehicular applications
p 2289 N94-22830

K- and Ka-band mobile-vehicular satellite-tracking reflector antenna system for the NASA ACTS mobile terminal p 2289 N94-22831

An active K/Ka-band antenna array for the NASA ACTS mobile terminal p 2289 N94-22832

Microstrip monopulse antenna for land mobile communications p 2289 N94-22833

Isolated and coupled superquadric loop antennas for mobile communications applications
p 2289 N94-22834

Rigorous analysis of thick microstrip antennas and wire antennas embedded in a substrate
[EUT-92-E-263] p 2290 N94-22876

Experimental modification and identification of the DSS-13 antenna control system model
p 2291 N94-23260

Performance of the X-/Ka/KABLE-band dichroic plate in the DSS-13 beam waveguide antenna
p 2291 N94-23261

The down, release, and deployment of the RADARSAT SAR antenna p 2305 N94-23986

A constrained optimization technique for arbitrary antenna arrays and various performance indices
[ISBN-0-315-59455-1] p 2297 N94-24179

Integrated reflector antenna design and analysis
[NASA-CR-195164] p 2300 N94-24678

Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699
Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas
[NASA-CR-195167] p 2301 N94-25005

ANTENNA FEEDS
Data relay system satellite: The development of an antenna pointing mechanism for the inter-orbit link antenna p 2359 N94-24015
Inter orbit link antenna pointing mechanisms design using standard actuators p 2359 N94-24016

ANTENNA RADIATION PATTERNS
Study of LEO-SAT microwave link for broad-band mobile satellite communication system p 2279 N94-22769
Low cost antennas for MSAT vehicular applications p 2289 N94-22830
A constrained optimization technique for arbitrary antenna arrays and various performance indices
[ISBN-0-315-59455-1] p 2297 N94-24179
Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699
Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas
[NASA-CR-195167] p 2301 N94-25005
Method and apparatus of generating sum or difference signals corresponding to an apparent beam in a monopulse radar system
[AD-D015998] p 2302 N94-25056

ANTHROPOMETRY
Hand controller commonality evaluation process p 2435 N94-24197
Establishing a relationship between maximum torque production of isolated joints to simulate EVA ratchet push-pull maneuver: A case study p 2437 N94-24206
Development of a force feedback anthropomorphic teleoperation input device for control of robot hands
[NASA-CR-195109] p 2437 N94-24329
Concepts and embodiment design of a reentry recumbent seating system for the NASA Space Shuttle
[NASA-CR-195504] p 2438 N94-24667
Conceptual design of an astronaut hand anthropometry device
[NASA-CR-195490] p 2439 N94-24956

ANTIBODIES
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-195102] p 2420 N94-23633

ANTIFERROMAGNETISM
Spin-polaron theory of high-T(c) superconductivity. 2: Electronic structure of the CuO2 planes
[DE93-019197] p 2556 N94-22919
Spin-hole doping in the Kondo insulator Ce3Bi4Pt3 studied by neutron scattering
[DE93-040107] p 2557 N94-22925
Photo-induced antiferromagnetic interlayer coupling in Fe superlattices with iron silicide spacers
[DE94-001345] p 2559 N94-22995
The renormalization group for flag manifolds
[DE93-616846] p 2491 N94-25213
The Haldane energy gap of a doped linear-chain Heisenberg antiferromagnet
[DE93-617130] p 2567 N94-25426

ANTIMATTER
A scalar-vector model of quark-antiquark interaction under linear confinement
[DE93-616871] p 2538 N94-25317

ANTIMONIDES
Electronic structure and high pressure phase transition in LaSb and CeSb
[DE93-617051] p 2567 N94-25423

ANTIMONY
Exploratory report antimony and antimony compounds
[PB93-224004] p 2397 N94-23497

ANTIMONY COMPOUNDS
Exploratory report antimony and antimony compounds
[PB93-224004] p 2397 N94-23497

ANTIREFLECTION COATINGS
A new automatic design method to develop multilayer thin film devices for high power laser applications
[DE93-632490] p 2347 N94-22967
Design refinement of multilayer optical thin film devices with two optimization techniques
[DE93-634228] p 2542 N94-22979
Inertial confinement fusion
[DE94-002602] p 2551 N94-23703
Analysis for the computational modeling of finite cladding and lossy coating effects in fibers
[PB94-111085] p 2544 N94-23732
Tunable lasers pumped by visible laser diodes
[AD-D016000] p 2350 N94-25044

ANTISUBMARINE WARFARE AIRCRAFT
S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270

AORTA
Aortic valve disease p 2424 N94-23322

APERTURES
A comparison of free-space and fiber mixer performances
[AD-A273558] p 2547 N94-25161

APHELIONS
Northern hemisphere dust storms on Mars p 2619 N94-24885

APOGEES
Kalman filtering applied to real-time monitoring of apogee maneuvers p 2196 N94-23923

APOLLO LUNAR EXPERIMENT MODULE
Catalog of Apollo experiment operations
[NASA-RP-1317] p 2194 N94-23292

APOLLO LUNAR SURFACE EXPERIMENTS PACKAGE
Catalog of Apollo experiment operations
[NASA-RP-1317] p 2194 N94-23292

APOLLO 17 FLIGHT
Catalog of Apollo 17 rocks. Volume 1: Stations 2 and 3 (South Massif)
[NASA-CR-194854] p 2613 N94-24058

APPLICATIONS OF MATHEMATICS
Discrete applied mathematics
[AD-A273552] p 2488 N94-24561

APPLICATIONS PROGRAMS (COMPUTERS)
Transient analysis of circuits including frequency-dependent components using transgyrator and convolution
[PB93-225001] p 2308 N94-23130
A system for managing information at ATLAS
[DE94-001337] p 2590 N94-23190
Programming in Fortran M
[DE94-000541] p 2450 N94-23207
Advanced X ray Astrophysics Facility-Imaging (AXAF-I) thermal analyses using Integrated Thermal Analysis System (ITAS) program p 2320 N94-23635
Some useful innovations with TRASYS and SINDA-85 p 2322 N94-23647
Enhanced absorption cycle computer model
[DE94-001997] p 2271 N94-23793
SPOT4 Operational Control Center (CMP) p 2197 N94-23856
A quick uplink, expandable executable for the NSSC-1 of the Hubble Space Telescope p 2305 N94-23859
ASPT software source code: ASPT application software package, host component
[CTN-94-60907] p 2455 N94-24116
ASPT software source code: ASPT signal excision software package
[CTN-94-60904] p 2296 N94-24133
ASPT software source code: ASPT application software package, VME-C30 component
[CTN-94-60906] p 2455 N94-24135
Three dimensional study of an airplane wing and its wake in the subsonic regime
[ISBN-0-315-58963-9] p 2168 N94-24178
Using computer graphics to design Space Station Freedom viewing p 2434 N94-24191
ACES spectral display software: Software description
[SK-1600-99-003] p 2455 N94-24297
PROPWR: A versatile tool for 1/3 octave processing and narrowband line tracking
[DREA-TC-93-303] p 2297 N94-24298
Integrated stress and strength analysis of airplane structures using the data processing tool ISSY p 2178 N94-24320
Some practical problems in multidisciplinary design and optimisation p 2178 N94-24322
MERILL: An equational reasoning system in standard ML: A user guide (prerelease version 0.4)
[PB93-204501] p 2456 N94-24534
The HEC NexGen software development project
[AD-A273512] p 2460 N94-24822
Parametric uncertainty reduction in robust multivariable control
[AD-A273412] p 2460 N94-24927
Modeling and analysis of selected space station communications and tracking subsystems p 2306 N94-25374
A multimedia adult literacy program: Combining NASA technology, instructional design theory, and authentic literacy concepts p 2585 N94-25384

APPROXIMATION
Loss probabilities in batch-arrival bulk-service queues with finite capacity
[MEMO-1106] p 2493 N94-22724
Asymptotic analysis: Working note no. 3, boundary layers
[DE94-002299] p 2318 N94-23213
Out of plane gradients in laminated composites
[NASA-CR-194875] p 2228 N94-23566
On the differentiation matrix for Daubechies-based wavelets on an interval
[NASA-CR-191582] p 2487 N94-24291
Center for modeling of turbulence and transition: Research briefs, 1993
[NASA-TM-106383] p 2333 N94-24336
A comparison of approximate interval estimators for the Bernoulli parameter
[NASA-CR-191585] p 2458 N94-24680
Approximate optimal guidance for the advanced launch system
[NASA-CR-4568] p 2198 N94-24752
Approximation to nonlinear equations using nonlinear rational models
[RR-448] p 2492 N94-25306
Liapunov stability in chemical engineering
[MATHS-REPT-A-184] p 2236 N94-25427

AQUEOUS SOLUTIONS
Preparing polymeric matrix composites using an aqueous slurry technique
[NASA-CASE-LAR-14771-1] p 2252 N94-23076
Stress corrosion cracking properties of 15-5PH steel p 2251 N94-23244
Measurement of interfacial tension by use of pendant drop video techniques
[DE93-000168] p 2345 N94-24831

ARC DISCHARGES
Measurement of electron temperature and density in the DIII-D neutral beam ion source arc chamber
[DE94-001099] p 2553 N94-24746

ARC JET ENGINES
Investigation of a subsonic-arc-attachment thruster using segmented anodes
[NASA-TM-106419] p 2219 N94-23531
Arc electrode interaction study
[NASA-CR-195096] p 2310 N94-24070
Mechanisms of anode power deposition in a low pressure free burning arc
[NASA-CR-194442] p 2553 N94-25190

ARC WELDING
Weldability of Accelerated-Cooled (AcC) high strength TMCP steel X80
[VTT-TIED-1413] p 2251 N94-25419

ARCHAEBACTERIA
The evolution of energy-transducing systems. Studies with an extremely halophilic archaebacterium
[NASA-CR-193803] p 2422 N94-24807
The evolution of energy-transducing systems. Studies with archaebacteria
[NASA-CR-195129] p 2422 N94-24811

ARCHES
Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280

ARCHITECTURE
Wind climate and urban geometry
[ISBN-9-03-860132-8] p 2416 N94-25261

ARCHITECTURE (COMPUTERS)
Design of integrated architectures for low level image processing
[ETN-94-95183] p 2445 N94-22901
Representation and specification of architectures for heterogeneous internetworking: Using a knowledge based approach
[LAAS-93088] p 2445 N94-22903
AMICAL: An aid for architectural synthesis and exploration of control circuits
[ETN-94-95177] p 2308 N94-23154
Automated parallelization of timed Petri-net simulations
[NASA-CR-191574] p 2451 N94-23341
Implementing the space shuttle data processing system with the space generic open avionics architecture
[NASA-CR-188254] p 2199 N94-23571
Advanced design concepts for open distributed systems development
[PB94-110897] p 2454 N94-23751
Concepts and techniques for an active database approach to office procedure support
[PB94-110749] p 2590 N94-23816
Telerobotic rendezvous and docking vision system architecture
[NASA-CR-191329] p 2204 N94-23828
An OSI architecture for the deep space network p 2305 N94-23848
The Ulysses spacecraft control and monitoring concepts and realities p 2502 N94-23862
Making adaptable systems work for mission operations: A case study p 2506 N94-23883
High performance, low cost, self-contained, multipurpose PC based ground systems p 2516 N94-23943
The design of a standard message passing interface for distributed memory concurrent computers
[DE94-002536] p 2446 N94-24536
High-performance computing and communications
[DE94-002215] p 2457 N94-24566

Optical wavelet transform processor
[AD-A273625] p 2546 N94-24731
Advanced avionics architecture and technology review. Executive summary and volume 1: Avionics tech nology. Volume 2: Avionics systems engineering
[AD-A273630] p 2186 N94-24733
The HEC NexGen software development project
[AD-A273512] p 2460 N94-24822
Study on fine grain dynamic dataflow computer
[REPT-946] p 2446 N94-24981
Ground based mission planning systems
p 2522 N94-25014
The design of the EMPS multiprocessor executive for distributed computing
[ETN-94-95336] p 2468 N94-25062
Advanced Information Processing System (AIPS)
p 2165 N94-25115
Appendix A: Proposed statement of work, 1994
p 2272 N94-25194
Design of a walking robot
[NASA-CR-195200] p 2367 N94-25274
Transputer benchmarks and performance comparisons with other computing machines
[RR-467] p 2446 N94-25312
Advanced control structures: A transputer-based multi-robot system
[RR-468] p 2446 N94-25313
Horatio: Libraries for vision applications, release 2.0
[OUEL-1967/92] p 2593 N94-25326
The transputer
[AD-A273688] p 2446 N94-25438

ARCTIC REGIONS
National Academy of Sciences-Academy of Sciences of the USSR Workshop on the Mechanics of Ice and its Applications
[AD-A273338] p 2419 N94-25088

ARGON
Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects
[NASA-CR-195126] p 2534 N94-24487

ARGON PLASMA
Modelling of thermal argon plasmas
[ETN-94-95363] p 2554 N94-25300

ARIANE LAUNCH VEHICLE
A cross-disciplinary response to improve test activities: The corporate memory capitalization in Ariane4 test domain p 2508 N94-23899
Liquid rocket propulsion Retrospective and prospects
p 2154 N94-24243

ARMATURES
The internal structure and dynamics of the railgun plasma armature between infinitely wide ablating rails
[DE94-001473] p 2198 N94-23208
Design and application of electromechanical actuators for deep space missions
[NASA-CR-195134] p 2365 N94-24842

ARRHYTHMIA
Aeromedical disposition of Arrhythmias and electrocardiographic findings in aircrew
p 2423 N94-23318
Sarcoidosis and the aviator p 2425 N94-23325

ARTERIES
Aeromedical disposition for coronary artery disease
p 2423 N94-23316
Arterial hypertension and the aviator
p 2425 N94-23328

ARTERIOSCLEROSIS
Primary prevention of coronary heart disease
p 2423 N94-23317

ARTIFICIAL GRAVITY
Artificial gravity in space flight
[AD-A273420] p 2427 N94-24928

ARTIFICIAL HEART VALVES
Image processing for acquisition of fluid rest time in the running of an artificial heart valve p 2316 N94-22858

ARTIFICIAL INTELLIGENCE
Artificial neural networks: Application to the optical recognition of music partitions
[ETN-94-95166] p 2470 N94-22884
Interpretation of evolutive environment by a multisensory perception machine
[LAAS-93111] p 2471 N94-22907
A novel process monitoring and control system based on a neural manufacturing concept
[DE94-001516] p 2471 N94-23011
Nuclear propulsion control and health monitoring
p 2217 N94-23071
Glossary knowledge engineering
[NLR-TP-91435-U] p 2471 N94-23137
Expanding the KATE toolbox p 2477 N94-23247
Link monitor and control operator assistant: A prototype demonstrating semiautomated monitor and control
p 2292 N94-23267
Neural network research in Finland. Symposium
[PB93-224822] p 2472 N94-23463
A review of European applications of artificial intelligence to space
[NASA-TM-108769] p 2453 N94-23568
Arc consistency problem: An exercise in parallel programming with shared objects
[PB94-110590] p 2466 N94-23706
Logic of capabilities
[PB94-110715] p 2473 N94-23747
Epistemic logic for defeasible reasoning using a meta-level architecture metaphor
[PB94-110723] p 2473 N94-23748
Design and specification of a generic task model for solving boolean constraint satisfaction problems
[PB94-118841] p 2486 N94-23762
Structured constraint satisfaction
[PB94-119039] p 2497 N94-23764
Two applications of a generic task model for solving boolean constraint satisfaction problems
[PB94-119047] p 2487 N94-23765
ATOS-1: Designing the infrastructure for an advanced spacecraft operations system p 2197 N94-23849
Mission activities planning for a Hermes mission by means of AI-technology p 2502 N94-23858
Influence of a new generation of operations support systems on current spacecraft operations philosophy: The users feedback p 2507 N94-23894
PILOT: An intelligent distributed operations support system p 2508 N94-23895
Combining real-time monitoring and knowledge-based analysis in MARVEL p 2477 N94-23900
Constraint-based scheduling p 2510 N94-23904
Intelligent tutoring and aiding in satellite ground control p 2443 N94-23929
An intelligent planning and scheduling system for the HST servicing missions p 2520 N94-23964
Software reuse in spacecraft planning and scheduling systems p 2520 N94-23966
Making intelligent systems team players: Additional case studies
[NASA-TM-104786] p 2473 N94-24068
Evaluation of computer-aided instruction techniques for the crew interface coordination position
p 2429 N94-24438
Compositional architecture for simple design formally specified in DESIRE
[PB94-119013] p 2474 N94-24543
Human-like robots for space and hazardous environments
[NASA-CR-195549] p 2365 N94-24703
In flight mission planning in the Copilote Electronique
p 2522 N94-25015
ROSAT mission planning using artificial intelligence methods
[DLR-FB-93-14] p 2476 N94-25345
The use of knowledge systems
[ETN-94-95318] p 2477 N94-25431

ARTIFICIAL SATELLITES
SIMSAT: An object oriented architecture for real-time satellite simulation p 2197 N94-23940
Satellite situation report, volume 33, number 4
[NASA-TM-109677] p 2205 N94-24824
Iowa satellite project ISAT-1
[NASA-CR-195517] p 2206 N94-24838
Mars Operational Environmental Satellite (MOES): A post-Mars Observer discovery mission
p 2620 N94-24890
Steady motions of rigid body satellites in a central gravitational field
[AD-A273742] p 2206 N94-25532

ASCENT
Analysis and effects of the advanced solid rocket motor on the Space Shuttle elements
[NASA-CR-193879] p 2200 N94-24664

ASIA
JPRS report: Science and technology. Central Eurasia: Space
[JPRS-USP-93-006] p 2194 N94-23015

ASPECT RATIO
Optimization of orifice geometry for cross-flow mixing in a cylindrical duct
[NASA-TM-106436] p 2481 N94-23593
Issac, Jason Cherian ses in transonic flow
[NASA-CR-194837] p 2167 N94-24052
CFD assessment of orifice aspect ratio and mass flow ratio on jet mixing in rectangular ducts
[NASA-TM-106434] p 2187 N94-24082
Vibrations of variable cross section Timoshenko beams p 2160 N94-24279
The Triton Design concepts and methods
[NASA-CR-195542] p 2184 N94-25004

ASSAYING
Evaluation of ovostatin and ovostatin assay
p 2422 N94-24437

ASSESSMENTS
Increasing accuracy in the assessment of motion sickness: A construct methodology
[NASA-TM-108797] p 2420 N94-23088

ASSIMILATION
Next generation initiation techniques
p 2412 N94-24383
Examples of data assimilation in mesoscale models
p 2412 N94-24384
An efficient data assimilation algorithm with a gaussian covariance structure
[AD-A273152] p 2418 N94-24671
Modeling and data assimilation for Mars Observer
p 2620 N94-24889

ASTEROID MISSIONS
Planetary and asteroid missions. Getting there: Anchoring spacecraft to asteroids
[NASA-CR-195493] p 2614 N94-24333
Near Earth asteroid rendezvous
[NASA-CR-195518] p 2195 N94-24808

ASTEROIDS
Planetary and asteroid missions. Getting there: Anchoring spacecraft to asteroids
[NASA-CR-195493] p 2614 N94-24333

ASTHMA
Asthma in aircrew p 2425 N94-23327

ASTRONAUT PERFORMANCE
Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt?
[NASA-CR-188256] p 2427 N94-24227
The role of visual context in manual target localization
p 2429 N94-25351

ASTRONAUTS
Crew interface analysis: Selected articles on space human factors research, 1987 - 1991
[NASA-TM-104756] p 2433 N94-24185
Concepts and embodiment design of a reentry recumbent seating system for the NASA Space Shuttle
[NASA-CR-195504] p 2438 N94-24667

ASTRONOMICAL CATALOGS
Catalog of infrared observations, third edition
[NASA-RP-1294] p 2600 N94-25387

ASTRONOMICAL INTERFEROMETRY
Prospects for very-high-resolution solar physics with the Simuris inteferometric mission p 2625 N94-22848
LOLA: Lunar Optical Long-baseline Array. 1992-1993 space design
[NASA-CR-195533] p 2298 N94-24582
LOITA: Lunar Optical/Infrared Telescope Array
[NASA-CR-195532] p 2546 N94-24816

ASTRONOMICAL MAPS
100 GHz map of 3C 446
[PB94-104882] p 2599 N94-23705
The 1404+286: A non-ideal calibrator for VLBI observations
[PB94-104908] p 2599 N94-24521

ASTRONOMICAL MODELS
Tensor-scalar cosmological models and their relaxation toward general relativity
[PB93-220796] p 2601 N94-23099
Optical model analyses of galactic cosmic ray fragmentation in hydrogen targets
[NASA-TP-3404] p 2540 N94-23509
The scattering and collision of gravitational waves in Friedmann-Robertson-Walker open universes
[MATHS-REPT-A-193] p 2406 N94-25430

ASTRONOMICAL OBSERVATORIES
Lunar science strategy: Exploring the Moon with humans and machines p 2605 N94-23376
Opening mechanism for ISO/CVV cover release
p 2357 N94-24001
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535

ASTRONOMICAL PHOTOMETRY
Hubble Space Telescope high speed photometer orbital verification
[NASA-CR-189333] p 2204 N94-24226
Infrared and SiO maser observations of OH/IR stars
[PB94-104890] p 2599 N94-24780

ASTRONOMICAL SATELLITES
The next Japanese solar satellite
p 2625 N94-22846
Solar physics and the Coronas project
p 2625 N94-22847
The Submillimeter Wave Astronomy Satellite (SWAS) solar array system p 2361 N94-24029

ASTRONOMICAL SPECTROSCOPY
Flux measurements using the BATSE spectroscopic detectors p 2580 N94-24435
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535

ASTRONOMY
Some challenging problems of the structured and dynamical solar atmosphere p 2624 N94-22838

Prospects for future solar-wind missions
p 2624 N94-22841

ASTROPHYSICS

Semiempirical studies of atomic structure
[DE94-001588] p 2531 N94-22937

AstroMail: Electronic mail for the astrophysics community
[NASA-CR-194877] p 2591 N94-24099

Ultraviolet, visible, and gravity astrophysics: A plan for the 1990's
[NASA-NP-152] p 2603 N94-24973

ASYMMETRY

A measurement of the forward-backward asymmetry and sin(sup 2)(theta)(sub W) from the process Z(sup 0) (yields) (mu)(sup +)(mu)(sup (minus)) at (radical)s = 1.8 TeV
[DE94-001908] p 2532 N94-23018

Proposed additions to the SHADOW ray-tracing code for general-asymmetric perfect-crystal optics
[DE94-001291] p 2560 N94-23188

On the effect of the damping coefficients on the trajectories of symmetric and non-symmetric stores
p 2155 N94-24250

ASYMPTOTIC METHODS

Loss probabilities in batch-arrival bulk-service queues with finite capacity
[MEMO-1106] p 2493 N94-22724

Energy estimates and asymptotic analysis in the theory of shells
[PB93-225738] p 2374 N94-23113

Asymptotic analysis: Working note no. 3, boundary layers
[DE94-002299] p 2318 N94-23213

ASYMPTOTIC PROPERTIES

Control of the internal stresses in plane elasticity
[PB93-225514] p 2374 N94-23112

Stability behavior of systems obtained by index-reduction
[PB93-237709] p 2481 N94-23439

Asymptotic confidence intervals for the length of the shortt under random censoring
[PB93-237816] p 2494 N94-23774

ASYMPTOTIC SERIES

Asymptotic analysis: Working note no. 3, boundary layers
[DE94-002299] p 2318 N94-23213

Maximal type test statistics based on conditional processes
[PB94-111614] p 2494 N94-23771

Bounds and asymptotic expansions for solutions of the free boundary problems related to sequential decision versions of a bioequivalence problem
[AD-A273551] p 2495 N94-24560

Stable non-Gaussian diffusive profiles
[PB93-238053] p 2489 N94-24610

Approximate optimal guidance for the advanced launch system
[NASA-CR-4568] p 2198 N94-24752

ATHLETES

Left ventricular hypertrophy and athlete's heart
p 2424 N94-23321

ATLAS LAUNCH VEHICLES

Liquid rocket propulsion: Retrospective and prospects
p 2154 N94-24243

ATMOSPHERIC ATTENUATION

Adaptive data rate control TDMA systems as a rain attenuation compensation technique
p 2287 N94-22821

ATMOSPHERIC BOUNDARY LAYER

Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734

ATMOSPHERIC CHEMISTRY

Solar-terrestrial environmental laboratory
p 2630 N94-23336

Radiative forcing calculations for SF6 and CH4 using a correlated k-distribution transmission model
[DE94-001855] p 2397 N94-23700

Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812

The atmospheric effects of stratospheric aircraft: A third program report
[NASA-RP-1313] p 2398 N94-24104

Report of the proceedings of the Colloquium and Workshop on Multiscale Coupled Modeling
[NASA-CP-3217] p 2410 N94-24374

Grand challenge scientific questions in coupled modeling p 2412 N94-24382

Chemistry on the mesoscale: Modeling and measurement issues p 2413 N94-24390

Session on coupled atmospheric/chemistry coupled models p 2414 N94-24398

Measurement of HO2 and other trace gases in the stratosphere using a high resolution far-infrared spectrometer
[NASA-CR-195173] p 2404 N94-24738

Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897

ATMOSPHERIC CIRCULATION

Atmospheric numerical modeling resource enhancement and model convective parameterization/scale interaction studies
[NASA-CR-194769] p 2400 N94-23124

Atmospheric flow in heterogeneous vegetated regions
[W-9303] p 2401 N94-23175

Scientific investigations of atmospheric processes
[NASA-CR-194805] p 2401 N94-23271

Diagnostic budgets of analyzed and modelled tropical plumes
[NASA-CR-194853] p 2409 N94-23621

Implementation of a state of the art automated system for the production of cloud/water vapor motion winds from geostationary satellites
[NASA-CR-195087] p 2410 N94-24125

Scientific goals of the Cooperative Multiscale Experiment (CME) p 2411 N94-24381

Parameterization of sub-grid scale convection
p 2413 N94-24386

The role of radiation in mesoscale flows: Physics, parameterizations, codes p 2413 N94-24389

Joint sessions on moisture processes and cumulus parameterization p 2414 N94-24393

Session on cumulus parameterization
p 2414 N94-24394

CAPE for CaPE p 2416 N94-24409

Observational and modeling studies of heat, moisture, precipitation and global-scale circulation patterns
[NASA-CR-195148] p 2415 N94-24485

Northern hemisphere tropospheric mid-latitude circulation after violent volcanic eruptions
[MPIM-107] p 2403 N94-24491

Workshop on Atmospheric Transport on Mars
[NASA-CR-194855] p 2616 N94-24871

The NASA/GISS Mars general circulation model: Preliminary experiments p 2616 N94-24872

A diagnostic model to estimate winds and small-scale drag from Mars Observer PMIRR data
p 2617 N94-24874

Eddy mixing coefficient values derived from simulations with the NASA Ames Mars GCM p 2617 N94-24875

Aspects of the Martian global circulation
p 2618 N94-24879

Regarding tracer transport in Mars' winter atmosphere in the presence of nearly stationary, forced planetary waves p 2618 N94-24882

Northern hemisphere dust storms on Mars
p 2619 N94-24885

Modeling and data assimilation for Mars Observer
p 2620 N94-24889

A study of cloud motions on Mars. 2: Some examples of observations and analyses since 1969
p 2620 N94-24891

Evidence for dust transport in Viking IR thermal mapper opacity data p 2620 N94-24892

Dust transport in the Martian atmosphere
p 2621 N94-24894

Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap
p 2621 N94-24895

Diagnostic calculations of the circulation in the Martian atmosphere p 2622 N94-24898

Martian mesoscale circulations induced by variations in surface optical and thermal characteristics: A numerical study p 2622 N94-24899

Three-dimensional numerical simulation of thermal tides in the Martian atmosphere p 2622 N94-24901

The Mars Aerial Platform (MAP) mission
p 2622 N94-24903

Mars Observer: Applications to atmospheric transport
p 2623 N94-24904

A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements
[AD-A273803] p 2406 N94-25537

ATMOSPHERIC COMPOSITION

Overview of global greenhouse effects
[DE93-041165] p 2396 N94-22887

In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-194810] p 2397 N94-23277

Cloud-free aerosol optical depth determination over oceans from satellite radiometry
[DE94-001897] p 2386 N94-23779

High precision double four bar linkage mechanism for interferometric linear scanning p 2359 N94-24013

Ethylene trace-gas techniques for high-speed flows
[NASA-TM-106491] p 2169 N94-24335

Chemistry on the mesoscale: Modeling and measurement issues p 2413 N94-24390

Session on coupled land surface/hydrological/atmospheric models
p 2414 N94-24395

Design of a vehicle based system to prevent ozone loss
[NASA-CR-195498] p 2180 N94-24479

Mesospheric and lower thermospheric winds, temperatures densities, and volume emission rates
[NASA-CR-195147] p 2403 N94-24486

Measurement of HO2 and other trace gases in the stratosphere using a high resolution far-infrared spectrometer
[NASA-CR-195173] p 2404 N94-24738

Particle sizes and composition of Mars atmospheric dust based upon Viking and Mariner 9 observations
p 2618 N94-24878

Regarding tracer transport in Mars' winter atmosphere in the presence of nearly stationary, forced planetary waves p 2618 N94-24882

The influence of orography on the transport of atmospheric constituents p 2619 N94-24886

Carbon and hydrogen isotope composition and C-14 concentration in methane from sources and from the atmosphere: Implications for a global methane budget
[NASA-CR-195166] p 2399 N94-25092

ATMOSPHERIC CORRECTION

Optimization of techniques to reconstruct images disturbed by atmospheric turbulence in the near infra-red
[PB93-199784] p 2298 N94-24630

ATMOSPHERIC DENSITY

Prediction of three sigma maximum dispersed density for aerospace applications p 2207 N94-23654

ATMOSPHERIC EFFECTS

Goals of ground-based solar observations
p 2624 N94-22840

Evaluation of inorganic zinc-rich primers using Electrochemical Impedance Spectroscopy (EIS)
p 2237 N94-23233

Optical subnet concepts for the deep space network
p 2292 N94-23269

SeaWiFS technical report series. Volume 11: Analysis of selected orbit propagation models for the SeaWiFS mission
[NASA-TM-104566-VOL-11] p 2417 N94-23338

Diffuse panel studies: Conclusions
p 2384 N94-23606

The atmospheric effects of stratospheric aircraft: A third program report
[NASA-RP-1313] p 2398 N94-24104

A small satellite design for deep space network testing and training
[NASA-CR-195526] p 2205 N94-24702

Embodiment design for a multipropellant resistojet
[NASA-CR-195505] p 2221 N94-24834

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations
[AD-A273662] p 2251 N94-25449

ATMOSPHERIC ELECTRICITY

Lightning, atmospheric electricity, and climate change
[DE94-002003] p 2408 N94-23471

ATMOSPHERIC ENTRY

Analysis and effects of the advanced solid rocket motor on the Space Shuttle elements
[NASA-CR-193879] p 2200 N94-24864

ATMOSPHERIC GENERAL CIRCULATION MODELS

Estimates of monthly mean soil moisture for 1979-1989
[NASA-TM-104571] p 2407 N94-23132

Climate variability in a coupled GCM. Part 2: The Indian Ocean and monsoon
[MPIM-104] p 2401 N94-23159

Modal structure of variations in the tropical climate system. Part 2: Origins of the low-frequency mode
[MPIM-96] p 2407 N94-23199

On testing two major cumulus parameterization schemes using the CSU regional atmospheric modeling system
[DE94-000703] p 2407 N94-23284

A regional analysis of cloudy mean spherical albedo over the marine stratocumulus region and the tropical Atlantic Ocean
[NASA-CR-194771] p 2409 N94-24049

Session on modeling of radiative transfer processes
p 2414 N94-24397

The NASA/GISS Mars general circulation model: Preliminary experiments p 2616 N94-24872

Optimal gains for a single polar orbiting satellite
p 2208 N94-24873

Eddy mixing coefficient values derived from simulations with the NASA Ames Mars GCM p 2617 N94-24875

The annual pressure cycle on Mars: Results from the LMD Martian atmospheric general circulation model
p 2619 N94-24884

ATMOSPHERIC MODELS

NOAA Federal/State Cooperative Program in Atmospheric Modification Research. Collected publication titles and abstracts [PB93-198125] p 2396 N94-22913

Atmospheric numerical modeling resource enhancement and model convective parameterization/scale interaction studies [NASA-CR-194769] p 2400 N94-23124

Monte Carlo climate change forecasts with a global coupled ocean-atmosphere model [MPIM-97] p 2407 N94-23156

Locally modified Bott-scheme for highly convective flows [MPIM-99] p 2400 N94-23157

Atmospheric flow in heterogeneous vegetated regions [W-9303] p 2401 N94-23175

Scientific investigations of atmospheric processes [NASA-CR-194805] p 2401 N94-23271

Modelling TOVS radiances of synoptic systems [NASA-CR-194847] p 2408 N94-23620

Diagnostic budgets of analyzed and modelled tropical plumes [NASA-CR-194853] p 2409 N94-23621

Radiative forcing calculations for SF6 and CH4 using a correlated k-distribution transmission model [DE94-001855] p 2397 N94-23700

Cloud-free aerosol optical depth determination over oceans from satellite radiometry [DE94-001897] p 2386 N94-23779

Model atmosphere analysis of selected luminous B stars [NASA-CR-195098] p 2599 N94-24051

Participation in TOMS missions [NASA-CR-195110] p 2398 N94-24078

Report of the proceedings of the Colloquium and Workshop on Multiscale Coupled Modeling [NASA-CP-3217] p 2410 N94-24374

Atmospheric Radiation Measurement (ARM)/CART site p 2411 N94-24379

Scientific goals of the Cooperative Multiscale Experiment (CME) p 2411 N94-24381

Grand challenge scientific questions in coupled modeling p 2412 N94-24382

Next generation initiation techniques p 2412 N94-24383

Examples of data assimilation in mesoscale models p 2412 N94-24384

Measurement and modeling of moist processes p 2413 N94-24385

Parameterization of sub-grid scale convection p 2413 N94-24386

Coupled land surface/hydrologic/atmospheric models p 2413 N94-24387

Incorporation of the planetary boundary layer in atmospheric models p 2413 N94-24388

The role of radiation in mesoscale flows: Physics, parameterizations, codes p 2413 N94-24389

Chemistry on the mesoscale: Modeling and measurement issues p 2413 N94-24390

Validation of mesoscale models p 2413 N94-24391

Joint sessions on moisture processes and cumulus parameterization p 2414 N94-24393

Session on cumulus parameterization p 2414 N94-24394

Session on coupled land surface/hydrological/atmospheric models p 2414 N94-24395

Joint sessions on modeling of boundary layer and radiative transfer processes p 2414 N94-24396

Session on coupled atmospheric/chemistry coupled models p 2414 N94-24398

Session on validation of coupled models p 2414 N94-24399

Session on techniques and resources for storm-scale numerical weather prediction p 2415 N94-24400

LRAT: Lightning Radiative Transfer p 2416 N94-24443

Workshop on Atmospheric Transport on Mars [NASA-CR-194855] p 2616 N94-24871

Particle sizes and composition of Mars atmospheric dust based upon Viking and Mariner 9 observations p 2618 N94-24878

Aspects of the Martian global circulation p 2618 N94-24879

Multiannual simulations with the Mars climate model p 2618 N94-24881

Analyzing Martian winds and tracer concentrations using Mars Observer data p 2619 N94-24883

Evidence for dust transport in Viking IR thermal mapper opacity data p 2620 N94-24892

Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893

Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap p 2621 N94-24895

Two-dimensional modeling of thermal inversion layers in the middle atmosphere of Mars p 2622 N94-24900

Three-dimensional numerical simulation of thermal tides in the Martian atmosphere p 2622 N94-24901

Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992 [AD-A273400] p 2416 N94-25071

Collection and evaluation of numerical models with the aim to investigate the impact of aircraft emissions [DLR-MITT-93-06] p 2400 N94-25414

A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements [AD-A273803] p 2406 N94-25537

Results from the VISA project [AD-A273752] p 2406 N94-25540

ATMOSPHERIC MOISTURE

Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean [NASA-CR-194852] p 2408 N94-23542

Uncertainties in climate data sets [NASA-CR-194848] p 2408 N94-23577

Modelling TOVS radiances of synoptic systems [NASA-CR-194847] p 2408 N94-23620

MAMS data for the Convection and Moisture Experiment (CAMEX) [NASA-TM-108435] p 2409 N94-24080

GEWEX Water Vapor Project (GVaP) p 2411 N94-24378

Measurement and modeling of moist processes p 2413 N94-24385

Joint sessions on moisture processes and cumulus parameterization p 2414 N94-24393

Water cycle research associated with the CaPE hydrometeorology project (CHymP p 2416 N94-24414

Observational and modeling studies of heat, moisture, precipitation and global-scale circulation patterns [NASA-CR-195148] p 2415 N94-24485

Vertical transport of water in the Martian boundary layer p 2622 N94-24902

ATMOSPHERIC OPTICS

Sodium-layer laser guide stars [DE93-019621] p 2349 N94-23490

Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887

ATMOSPHERIC PHYSICS

The role of radiation in mesoscale flows: Physics, parameterizations, codes p 2413 N94-24389

ATMOSPHERIC PRESSURE

Three-dimensional numerical simulation of thermal tides in the Martian atmosphere p 2622 N94-24901

Mars Observer: Applications to atmospheric transport p 2623 N94-24904

ATMOSPHERIC RADIATION

Atmospheric Radiation Measurement (ARM)/CART site p 2411 N94-24379

ATMOSPHERIC REFRACTION

IRIG radar calibration catalog. Version 2: The IRIG error model reference for radar calibrations [AD-A273344] p 2303 N94-25155

ATMOSPHERIC SCATTERING

Micro pulse laser radar [NASA-CASE-GSC-13493-1] p 2294 N94-23827

Particle sizes and composition of Mars atmospheric dust based upon Viking and Mariner 9 observations p 2618 N94-24878

ATMOSPHERIC SOUNDING

A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research [DE94-000565] p 2381 N94-23001

Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean [NASA-CR-194852] p 2408 N94-23542

Uncertainties in climate data sets [NASA-CR-194848] p 2408 N94-23577

Convective organization in the Pacific ITCZ: Merging OLR, TOVS, and SSM/I information [NASA-CR-194850] p 2408 N94-23619

Interferometer scan unit mechanism definition p 2358 N94-24012

Intercomparison of remote and balloon-borne sensors operated at JAPE-91 p 2527 N94-24210

Joint sessions on moisture processes and cumulus parameterization p 2414 N94-24393

Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels [NASA-CR-194858] p 2404 N94-24843

Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP) [AD-A273401] p 2301 N94-24926

Northern Exposure 1992: An investigation of transauroral HF radio skywave propagation [AD-A273363] p 2303 N94-25089

ATMOSPHERIC TEMPERATURE

An analysis of solar mesospheric temperatures for the upper stratosphere and mesosphere [NASA-CR-194861] p 2626 N94-23626

Comparison between 1-minute and 15-minute averages of turbulence parameters p 2528 N94-24218

Mesospheric and lower thermospheric winds, temperatures densities, and volume emission rates [NASA-CR-195147] p 2403 N94-24486

The NASA/GISS Mars general circulation model: Preliminary experiments p 2616 N94-24872

Analyzing Martian winds and tracer concentrations using Mars Observer data p 2619 N94-24883

The annual pressure cycle on Mars: Results from the LMD Martian atmospheric general circulation model p 2619 N94-24884

Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893

Dust transport in the Martian atmosphere p 2621 N94-24894

Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap p 2621 N94-24895

Diagnostic calculations of the circulation in the Martian atmosphere p 2622 N94-24898

Two-dimensional modeling of thermal inversion layers in the middle atmosphere of Mars p 2622 N94-24900

Three-dimensional numerical simulation of thermal tides in the Martian atmosphere p 2622 N94-24901

Mars Observer: Applications to atmospheric transport p 2623 N94-24904

Thermistor controlled current source versatile temperature sensor [AD-D015979] p 2345 N94-25037

A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements [AD-A273803] p 2406 N94-25537

ATMOSPHERIC TIDES

Mars dust-driven tides and their impact on the thermosphere p 2617 N94-24876

Three-dimensional numerical simulation of thermal tides in the Martian atmosphere p 2622 N94-24901

ATMOSPHERIC TURBULENCE

A review of the Workshop on Fatigue Life Methodologies for Wind Turbines [DE94-002039] p 2394 N94-23472

Joint Acoustic Propagation Experiment (JAPE) p 2527 N94-24208

Comparison between 1-minute and 15-minute averages of turbulence parameters p 2528 N94-24218

Beamforming in an acoustic shadow p 2528 N94-24219

Continuous gust response and sensitivity derivatives using state-space models p 2161 N94-24287

Optimization of techniques to reconstruct images disturbed by atmospheric turbulence in the near infra-red [PB93-199784] p 2298 N94-24630

A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements [AD-A273803] p 2406 N94-25537

ATOMIC BEAMS

Method and apparatus for producing a thermal atomic oxygen beam [NASA-CASE-LEW-15614-1] p 2534 N94-23825

Optical spin polarization and state-sensitive detection of a cesium atomic beam [ATR-92(8436)-1] p 2534 N94-24077

Matter-wave interferometry with laser cooled atoms [AD-A273249] p 2536 N94-24717

ATOMIC CLUSTERS

Density functional studies: First principles and semi-emperical calculations of clusters and surfaces [DE94-002836] p 2561 N94-23214

ATOMIC COLLISIONS

Report of the Joint Seminar on Solid State Physics, Atomic and Molecular Physics, and Materials Science in the Energy Region of Tandem Accelerators [DE93-508268] p 2548 N94-22924

Optical spin polarization and state-sensitive detection of a cesium atomic beam [ATR-92(8436)-1] p 2534 N94-24077

Ultracold atoms in traps and fountains [ETN-94-95325] p 2537 N94-25239

Intramultiplet mixing for Ne(**)(3p)+He at superthermal energies [ETN-94-95327] p 2538 N94-25240

Modelling of thermal argon plasmas [ETN-94-95363] p 2554 N94-25300

ATOMIC FORCE MICROSCOPY

Condensed-phase thermal decomposition of TATB investigated by Atomic Force Microscopy (AFM) and Simultaneous Thermogravimetric Modulated Beam Mass Spectrometry (STMBMS) [DE94-000396] p 2232 N94-23298

ATOMIC INTERACTIONS
Optical spin polarization and state-sensitive detection of a cesium atomic beam [ATR-92(8436)-1] p 2534 N94-24077
Diffusion on Cu surfaces p 2251 N94-24428
ATOMIC PHYSICS
Report of the Joint Seminar on Solid State Physics, Atomic and Molecular Physics, and Materials Science in the Energy Region of Tandem Accelerators [DE93-508268] p 2548 N94-22924
Theoretical atomic physics for fusion [DE94-000712] p 2533 N94-23543
ATOMIC RECOMBINATION
Modelling of thermal argon plasmas [ETN-94-95363] p 2554 N94-25300
ATOMIC STRUCTURE
Atomic probes of surface structure and dynamics [DE94-001651] p 2530 N94-22720
Spin-polaron theory of high-T(c) superconductivity. 2: Electronic structure of the CuO2 planes [DE93-019197] p 2556 N94-22919
Semiempirical studies of atomic structure [DE94-001588] p 2531 N94-22937
Relativistic configuration interaction calculation of the correlation energies of highly-charged ions [DE94-001055] p 2532 N94-22988
Density functional studies: First principles and semi-emperical calculations of clusters and surfaces [DE94-002836] p 2561 N94-23214
Polydiacetylene thin films for nonlinear optical applications p 2225 N94-24347
A survey of metallurgical research on several actinides [DE94-002643] p 2245 N94-24747
The structure and catalytic properties of supported platinum catalysts [ETN-94-95357] p 2236 N94-25250
Electronic structure and high pressure phase transition in LaSb and CeSb [DE93-617051] p 2567 N94-25423
ATOMIZING
Fundamental rocket injector/spray programs at the Phillips Laboratory p 2211 N94-23039
Shear coaxial injector instability mechanisms p 2213 N94-23047
Ignition and combustion characteristics of metallized propellants, phase 2 [NASA-CR-195107] p 2266 N94-24700
ATOMS
Matter-wave interferometry with laser cooled atoms [AD-A273249] p 2536 N94-24717
ATROPHY
Skeletal muscle metabolism in hypokinetic rats [NASA-CR-195082] p 2420 N94-24124
ATTACK AIRCRAFT
Birdstrike resistant crew enclosure program [AD-A273700] p 2463 N94-25453
ATTENUATION COEFFICIENTS
Optical properties and emissivities of liquid metals and alloys p 2248 N94-25129
ATTENUATORS
Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror p 2384 N94-23602
ATTITUDE (INCLINATION)
Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264
ATTITUDE CONTROL
Torque equilibrium attitudes for the Space Station p 2208 N94-24449
An Earth albedo model: A mathematical model for the radiant energy input to an orbiting spacecraft due to the diffuse reflectance of solar radiation from the Earth below [NASA-TM-104596] p 2195 N94-24497
Near Earth asteroid rendezvous [NASA-CR-195518] p 2195 N94-24808
ATTITUDE STABILITY
Numerical simulation of Ulysses nutation p 2207 N94-24017
AUDIO DATA
Aeronautical audio broadcasting via satellite p 2274 N94-22741
Some subjects in digital audio, noise shaping, sample rate conversion, dynamic range compression and testing [ISBN-9-09-005162-7] p 2530 N94-25220
Modeling of the ground-to-SSFMB link networking features using SPW p 2306 N94-25381
AUDIO EQUIPMENT
Effects of atmospheric variations on acoustic system performance p 2527 N94-24211
AUDIO SIGNALS
The HDTV digital audio matrix [BBC-RD-1993/9] p 2295 N94-24085
Linear and nonlinear adaptive filtering and their application to speech intelligibility enhancement [ISBN-9-09-005342-5] p 2304 N94-25292
AUDITORY PERCEPTION
Auditory spectro-temporal pattern analysis [AD-A273554] p 2427 N94-24865
On the auditory discrimination of spectral shape [ETN-94-95306] p 2530 N94-25289
AUDITORY SIGNALS
Head related transfer function pseudo-stereophony [NASA-CASE-ARC-11919-1-NP] p 2525 N94-23312
Dimensional analysis of acoustically propagated signals p 2528 N94-24217
Auditory spectro-temporal pattern analysis [AD-A273554] p 2427 N94-24865
AUDITORY STIMULI
On the auditory discrimination of spectral shape [ETN-94-95306] p 2530 N94-25289
AUGER SPECTROSCOPY
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel [DE94-000466] p 2242 N94-23457
AUGMENTATION
Reliability enhancement of Navier-Stokes codes through convergence enhancement p 2216 N94-23064
AURORAL ZONES
High latitude cusp signature observations for southward IMF B sub Z [AD-A273801] p 2406 N94-25536
AURORAS
Computer assisted analysis of auroral images obtained from high altitude polar satellites [NASA-CR-194873] p 2400 N94-23084
PULSAUR 2 [NASA-CR-194832] p 2209 N94-23484
Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP) [AD-A273401] p 2301 N94-24926
AUSTENITE
Tensile properties of 21-6-9 stainless steel at elevated temperatures [DE94-001852] p 2240 N94-23017
AUSTENITIC STAINLESS STEELS
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel [DE94-000466] p 2242 N94-23457
AUTOCORRELATION
Composite sequences for rapid acquisition of direct-sequence spread spectrum signals [CTN-94-60901] p 2300 N94-24696
Direct measurement of turbulent dissipation rate using dual laser doppler velocimeters [AD-A273740] p 2340 N94-25530
AUTOMATA THEORY
A method for the general simultaneous full decomposition of sequential machines: Algorithms and implementation [EUT-92-E-267] p 2445 N94-23170
PROGRIL: A language for the definition of protocol grammars [EUT-93-E-270] p 2449 N94-23172
Viewing hybrid systems as products of control systems and automata [NASA-CR-194792] p 2472 N94-23300
Fixed points and shift cycles in cellular automata [RR-459] p 2492 N94-25309
AUTOMATED RADAR TERMINAL SYSTEM
Analysis and surveillance performance at Chicago O'Hare Airport [DOT/FAA/RD-92/29] p 2175 N94-24127
AUTOMATIC CONTROL
Viewing hybrid systems as products of control systems and automata [NASA-CR-194792] p 2472 N94-23300
A reference Martian mission for a long range rover p 2606 N94-23382
Feasibility study of an automatic vehicle for planetary exploration p 2369 N94-23399
Rover: Autonomous concepts for Mars exploration p 2369 N94-23400
Mechanical design of a planetary rover p 2369 N94-23403
Automation technology for remote sample acquisition p 2369 N94-23407
Marsohkod movement control p 2370 N94-23418
Perspective of creation of means for collecting information concerning transport situation p 2370 N94-23420
Sensing and modelling concepts for autonomous and remote mobile robot control p 2370 N94-23421
Bond graph modeling, simulation, and reflex control of the Mars planetary automatic vehicle p 2370 N94-23424
Operations concepts for Mars missions with multiple mobile spacecraft p 2501 N94-23852
Real-time automated failure identification in the Control Center Complex (CCC) p 2272 N94-23892
PILOT: An intelligent distributed operations support system p 2508 N94-23895
NASDA knowledge-based network planning system p 2508 N94-23898
Expert diagnostics system as a part of analysis software for power mission operations p 2516 N94-23944
Autonomous Space Processor for Orbital Debris (ASPOD) [NASA-CR-195521] p 2204 N94-24621
Conflict-free trajectory planning for air traffic control automation [NASA-TM-108790] p 2174 N94-25272
Automation and cognition in air traffic control: An empirical investigation [DOT/FAA/AM-94/3] p 2176 N94-25444
Automatic pressure control system for the Wright Laboratory Compressor Research Facility [AD-A273827] p 2194 N94-25522
AUTOMATIC FLIGHT CONTROL
UAV current technology and future trends p 2154 N94-24245
AUTOMATIC FREQUENCY CONTROL
A pattern jitter free AFC scheme for mobile satellite systems p 2285 N94-22809
AUTOMATIC LANDING CONTROL
Infrared sensors and systems for enhanced vision/autonomous landing applications p 2439 N94-25491
AUTOMATIC WEATHER STATIONS
The evaluation of ASOS for the Kennedy Space Center's Shuttle Landing Facility [NASA-CR-195685] p 2416 N94-25271
AUTOMATION
System for automatic transportation of aircraft on the ground [CA-PATENT-1-322-361] p 2193 N94-24785
AUTOMOBILE ENGINES
Rolls-Royce in perspective: Past, present and future [PNR-90882] p 2187 N94-23519
AUTOMOBILE FUELS
Federal alternative fuel program light duty vehicle operations [DE93-040663] p 2264 N94-22878
New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane [PB94-112786] p 2233 N94-23801
AUTOMOBILES
Federal alternative fuel program light duty vehicle operations [DE93-040663] p 2264 N94-22878
Method for simulating a vehicle shock test: Design and realization of the required implementation tools [ECL-92-14] p 2352 N94-22885
EPA's survey of in-use driving patterns: Implications for mobile source emission inventories [PB94-118502] p 2399 N94-24525
AUTOMORPHISMS
Number of moduli of families of curves on toric surfaces [PB93-230381] p 2479 N94-23121
Algebraic-geometric codes and their decoding algorithms [ETN-94-95294] p 2491 N94-25079
AUTONOMOUS NAVIGATION
Perception and 3D environment modeling for mobile robot autonomous navigation [LAAS-93117] p 2471 N94-22908
UAV current technology and future trends p 2154 N94-24245
Satellite autonomous navigation and orbit determination using magnetometers p 2156 N94-24258
Design of a wheeled articulating land rover [NASA-CR-195520] p 2365 N94-24806
Overall system concepts in mission planning p 2521 N94-25009
AUTONOMY
Open EDI [VTT-TIED-1353] p 2588 N94-22734
The Mars 96 balloon guiderope: An autonomous system in extreme environment conditions p 2369 N94-23412
The remote-operated autonomous-robot concept: From deep sea to outer space applications p 2370 N94-23413
Experiments with a small behaviour controlled planetary rover p 2371 N94-23427
Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264
Human-like robots for space and hazardous environments [NASA-CR-195549] p 2365 N94-24703
Design of a walking robot [NASA-CR-195200] p 2367 N94-25274
An evaluation of three-dimensional sensors for the extravehicular activity helper/retreiver p 2444 N94-25369

AUTOREGRESSIVE PROCESSES
Temporal aggregation in a periodically integrated autoregressive process
[PB93-230480] p 2479 N94-23122
Two-dimensional pattern analysis and classification using a complex orthogonal estimation algorithm
[RR-475] p 2463 N94-25321
Parametric and nonparametric discriminants for regional earthquakes and explosions
[AD-A273807] p 2406 N94-25538

AUXILIARY POWER SOURCES
Development of a power electronics unit for the Space Station plasma contactor
[NASA-TM-106486] p 2222 N94-25201

AUXILIARY PROPULSION
Power console development for NASA's electric propulsion outreach program
[NASA-TM-106428] p 2218 N94-23372

AVIATION METEOROLOGY
Aviation Weather Program (AWP)
p 2411 N94-24380
The evaluation of ASOS for the Kennedy Space Center's Shuttle Landing Facility
[NASA-CR-195685] p 2416 N94-25271

AVIONICS
Implementing the space shuttle data processing system with the space generic open avionics architecture
[NASA-CR-188254] p 2199 N94-23571
S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270
Advanced avionics architecture and technology review. Executive summary and volume 1: Avionics tech nology. Volume 2: Avionics systems engineering
[AD-A273630] p 2186 N94-24733
New Advances in Mission Planning and Rehearsal Systems
[AGARD-LS-192] p 2521 N94-25008
Overall system concepts in mission planning
p 2521 N94-25009
Future space transportation system architecture avionics requirements p 2162 N94-25098
New Technologies for Space Avionics, 1993
[NASA-CR-195157] p 2272 N94-25193
Appendix A: Proposed statement of work, 1994
p 2272 N94-25194

AXIAL FLOW
Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles
[NASA-TM-106450] p 2167 N94-23592
Hydrodynamics of stirred gas-liquid dispersions
[ETN-94-95368] p 2339 N94-25254

AXIAL FLOW TURBINES
Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades
[PB93-226223] p 2317 N94-23114

AXIAL LOADS
Damage tolerance of pressurized graphite/epoxy tape cylinders under uniaxial and biaxial loading
[NASA-CR-195101] p 2377 N94-24587

AXIAL STRAIN
Constitutive modelling of fiber-reinforced concrete under uniaxial tensile loading
[VTT-JULK-774] p 2379 N94-25385

AXIAL STRESS
Damage tolerance of pressurized graphite/epoxy tape cylinders under uniaxial and biaxial loading
[NASA-CR-195101] p 2377 N94-24587
Assessment of impact damage of composite rocket motor cases
[NASA-CR-195143] p 2220 N94-24595

AXIOMS
On the reduced game property for and the axiomatization of the tau-value
[MEMO-1128] p 2497 N94-22716
Reduced game properties of egalitarian division rules for cooperative games
[PB94-111689] p 2521 N94-24523

AXISYMMETRIC BODIES
Development of a code for wall contour design in the transonic region of axisymmetric and square nozzles
[NASA-CR-194857] p 2167 N94-23625

AXISYMMETRIC FLOW
Supersonic minimum length nozzle design for dense gases p 2171 N94-23656
BEM solution for the simulation of axisymmetric viscous sintering
[PB93-237717] p 2336 N94-24761
Analytical skin friction and heat transfer formula for compressible internal flows
[NASA-CR-191185] p 2170 N94-25173

B

B STARS
Model atmosphere analysis of selected luminous B stars
[NASA-CR-195098] p 2599 N94-24051
Observational studies of the clearing phase in proto-planetary disk systems
[NASA-CR-195182] p 2604 N94-25265

B-2 AIRCRAFT
B-2 bomber: Assessment of DOD's response to mandated certifications and reports
[AD-A273179] p 2184 N94-25152

BACKGROUND RADIATION
The current status of observational constraints on cosmic strings
[DE94-001505] p 2601 N94-23010

BACKSCATTERING
Analysis of a proposed Compton backscatter imaging technique
[DE93-040537] p 2371 N94-22935
Examination of the physical, electrical, and microwave evolution of water into young sea ice
[AD-A273559] p 2418 N94-24918
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A273568] p 2419 N94-24944
Measuring track densities in lunar grains by image analysis p 2623 N94-25355

BACKWARD FACING STEPS
A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670
Computation of turbulent flows over backward and forward-facing steps using a near-wall Reynolds stress model p 2172 N94-24145

BACTERIA
Investigation of evolution-related aspects of bacterial rhodopsins
[NASA-CR-194826] p 2420 N94-23501
Microbiological analysis of debris from Space Transportation System (STS)-55 Spacelab D-2
[NASA-CR-193883] p 2421 N94-24310
Factors affecting the identification of phytoplankton groups by means of remote sensing
[NASA-TM-108799] p 2387 N94-24403
Symbiosis in marine luminous bacteria
[AD-A273540] p 2422 N94-24791
The evolution of energy-transducing systems. Studies with an extremely halophilic archaebacterium
[NASA-CR-193803] p 2422 N94-24807
Design and testing of a unique randomized gravity, continuous flow bioreactor p 2423 N94-25368

BAFFLES
Shock-induced turbulent flow in baffle systems
[DE94-001532] p 2319 N94-23470
Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror
p 2384 N94-23602
Responses of a finite baffled plate subject to turbulent and mean flow excitations
[NASA-CR-191570] p 2334 N94-24605

BALANCE
The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896

BALANCING
Balancing for unstable nonlinear systems
[MEMO-1118] p 2469 N94-22705

BALL BEARINGS
Tribological characteristics of ball bearings lubricated with a sputtered molybdenum disulphide film in a vacuum under a high thrust load p 2355 N94-23992
In-vacuum performance of Fomblin Z25-lubricated, 52100 steel bearings with TiC-coated balls
p 2358 N94-24011
An Earth observation telescope refocusing mechanism
p 2359 N94-24014
The development of dry-lubricated ceramic cages
p 2363 N94-24045

BALLISTIC RANGES
Advanced ballistic range technology
[NASA-CR-195198] p 2165 N94-25169

BALLISTIC TRAJECTORIES
Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268

BALLOON FLIGHT
Results of the 1993 NASA/JPL balloon flight solar cell calibration program
[NASA-CR-195158] p 2395 N94-24563

BALLOON SOUNDING
Balloon experiments at Mars 96 project
p 2608 N94-23396

BALLOON-BORNE INSTRUMENTS
The Mars 96 balloon guiderope: An autonomous system in extreme environment conditions p 2369 N94-23412
Intercomparison of remote and balloon-borne sensors operated at JAPE-91 p 2527 N94-24210
Results of the 1993 NASA/JPL balloon flight solar cell calibration program
[NASA-CR-195158] p 2395 N94-24563
Polarization analysis of a balloon-borne solar magnetograph
[NASA-CR-193908] p 2345 N94-24852

BANACH SPACE
Lacunary series as quadratic differentials in conformal dynamics
[PB93-238061] p 2481 N94-23547
Multigrid method for integral equations and automatic programs p 2464 N94-23696
The least energy critical set
[DE93-616820] p 2493 N94-25434

BAND STRUCTURE OF SOLIDS
A valence-fluctuation theory of cuprate superconductivity
[DE94-000887] p 2558 N94-22942

BANDPASS FILTERS
Radar target discrimination systems using artificial neural network topology
[AD-D015984] p 2301 N94-25041

BANDWIDTH
Wide band fiber-optic communications
p 2304 N94-23231
Experimental modification and identification of the DSS-13 antenna control system model
p 2291 N94-23260
Theoretical investigation of variable periodicity (graded) multilayers for hard x ray applications
[NASA-CR-194824] p 2543 N94-23502
Reducing video frame rate increases remote optimal focus time
[NASA-TM-104018] p 2431 N94-23970

BARIUM COMPOUNDS
The elastic and electromechanical properties of BaTiO3 single crystal through the ferroelectric transition
[DE94-001437] p 2557 N94-22927

BARIUM ION CLOUDS
Artificial plasma experiments. Chemical release observations associated with the CRRES program
[NASA-CR-194871] p 2550 N94-23565

BARIUM OXIDES
The de Haas-van Alphen measurements in Ba(0.6)K(0.4)BiO3
[DE93-041169] p 2556 N94-22920

BAROCLINIC WAVES
Global ocean modeling on the Connection Machine
[DE94-000888] p 2417 N94-23517

BAROTROPIC FLOW
Global ocean modeling on the Connection Machine
[DE94-000888] p 2417 N94-23517
An adaptive multigrid model for hurricane track prediction p 2416 N94-23687

BAROTROPISM
Nonlinear dynamics applied to atmospheric prediction
[AD-A273437] p 2404 N94-24674

BARRIER LAYERS
Planar varactor frequency multiplier devices with blocking barrier
[NASA-CASE-NPO-18428-1-CU] p 2310 N94-23821

BARS
Analysis of the effects of wake passage on heat transfer in a linear turbine cascade
[AD-A273729] p 2339 N94-25446

BARYONS
A quark structure of hadrons and nuclei
[DE93-616872] p 2539 N94-25474

BASALT
Basaltic Volcanism and Ancient Planetary Crusts
[NASA-CR-193151] p 2614 N94-24363
Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts
p 2614 N94-24365
Major element chemistry of Apollo 14 mare basalt clasts and highland plutonic clasts from lunar breccia 14321: Comparison with neutron activation results
p 2614 N94-24366
Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component
p 2615 N94-24370
A dynamic melting model for the origin of Apollo 15 olivine-normative and quartz-normative mare basalts
p 2615 N94-24371

BATHS
Detection of velocity in high temperature liquid metals
p 2247 N94-25127

BAYES THEOREM
On non-informativeness in a classical Bayesian inference problem
[MEMO-COSOR-92-35] p 2494 N94-23143

Bayesian decision theory with imprecise prior probabilities applied to replacement problems
[PB93-237634] p 2481 N94-23456
Decision making with imprecise probabilities
[PB94-111622] p 2494 N94-23772
Density estimation by maximum quantum entropy
[DE94-002626] p 2569 N94-24516
Bounds and asymptotic expansions for solutions of the free boundary problems related to sequential decision versions of a bioequivalence problem
[AD-A273551] p 2495 N94-24560

BCH CODES
Box codes of lengths 48 and 72 p 2292 N94-23265

BEACONS
Sodium-layer laser guide stars
[DE93-019621] p 2349 N94-23490

BEAM INJECTION
Investigation of the heat handling capabilities of DIII-D neutral beamline internal components
[DE94-001107] p 2553 N94-24756

BEAM SPLITTERS
Design refinement of multilayer optical thin film devices with two optimization techniques
[DE93-634228] p 2542 N94-22979

BEAM WAVEGUIDES
Performance of the X-/Ka/KABLE-band dichroic plate in the DSS-13 beam waveguide antenna
p 2291 N94-23261

BEAMFORMING
Adaptive digital beamforming for a CDMA mobile communications payload p 2274 N94-22743
Adaptive array antenna for satellite cellular and direct broadcast communications p 2275 N94-22745
Geostationary payload concepts for personal satellite communications p 2278 N94-22765
Study of LEO-SAT microwave link for broad-band mobile satellite communication system p 2279 N94-22769
Characterization of germanium stripe x ray lasers
[DE93-019629] p 2347 N94-22867
Calibration block for digital beam forming antenna
[PB93-204550] p 2294 N94-23773
Effects of atmospheric variations on acoustic system performance p 2527 N94-24211
Beamforming in an acoustic shadow
p 2528 N94-24219
Layered parallel interface for an active antenna array
[AD-D016002] p 2301 N94-25045
Preprocessor and adaptive beamformer for linear-frequency modulation active signals
[AD-D016008] p 2302 N94-25048

BEAMS (SUPPORTS)
Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281

BEARINGS
The Fifth European Space Mechanisms and Tribology Symposium
[ESA-SP-334] p 2355 N94-23985
Interferometer scan unit mechanism definition
p 2358 N94-24012
The development of dry-lubricated ceramic cages
p 2363 N94-24045
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090
Flex bearing UUEC, volume 2
[NASA-CR-193901] p 2365 N94-24588
Influence of backup bearings and support structure dynamics on the behavior of rotors with active supports
[NASA-CR-195106] p 2365 N94-24751

BELLMAN THEORY
Approximate optimal guidance for the advanced launch system
[NASA-CR-4568] p 2198 N94-24752

BENDING
Energy estimates and asymptotic analysis in the theory of shells
[PB93-225738] p 2374 N94-23113
Vectorization and parallelization of the finite strip method for dynamic Mindlin plate problems
p 2483 N94-23679
Vibrations of variable cross section Timoshenko beams p 2160 N94-24279
Nonlinear analysis using a modal based reduction technique p 2161 N94-24288
Fiber optical angular sensor: Literature study and experimental results
[PB93-204345] p 2545 N94-24529
Buckling of circular cylindrical shells subjected to combined loads (axial compression, normal pressure, bending and transverse shear loading)
[PB93-215358] p 2378 N94-24745

BENDING FATIGUE
Investigation of the effects of manufacturing variations and materials on fatigue crack detection methods in gear teeth
[NASA-CR-195093] p 2373 N94-24769

BENDING VIBRATION
Vibrations of variable cross section Timoshenko beams p 2160 N94-24279
Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281

BENZENE
Dispersion of Rh/Cu in a sol-gel matrix. Highly chemo- and stereoselective catalyst for the reduction of alkynes to Z-alkenes
[AD-A273306] p 2262 N94-25145

BERYLLIUM ALLOYS
Interplay of magnetic and superconducting heavy fermion ground states
[DE94-000680] p 2240 N94-23003

BESSEL FUNCTIONS
A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667
Analysis for the computational modeling of finite cladding and lossy coating effects in fibers
[PB94-111085] p 2544 N94-23732
Probabilistic methods in problems of applied analysis
[PB94-110681] p 2495 N94-24571

BETHE-SALPETER EQUATION
A scalar-vector model of quark-antiquark interaction under linear confinement
[DE93-616871] p 2538 N94-25317

BIAS
Temporal behavior of the electron density profile during limiter biasing in the HYBTOK-2 tokamak
[NIFS-257] p 2552 N94-24456

BIBLIOGRAPHIES
Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database Shock Physics Index
[DE94-001679] p 2589 N94-23126
Bibliographic Retrieval System (BARS). Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database. Volume 1: UNIX version query guide customized application for INGRES
[DE94-001703] p 2589 N94-23127
Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database, Shock Physics Index (SPHINX) database, Volume 2: UNIX version user's guide
[DE94-001704] p 2589 N94-23128
Bibliography of Lewis Research Center technical publications announced in 1992
[NASA-TM-106035] p 2590 N94-23562
Aeronautical engineering: A continuing bibliography with indexes (supplement 298)
[NASA-SP-7037(298)] p 2153 N94-23711
NASA patent abstracts bibliography: A continuing bibliography. Section 2: Indexes (supplement 44)
[NASA-SP-7039(44)-SECT-2] p 2590 N94-23712
Aeronautical engineering: A continuing bibliography with indexes (supplement 299)
[NASA-SP-7037(299)] p 2153 N94-23973
Aircraft flight safety: A bibliography
[AGARD-R-805] p 2173 N94-24091
Japanese aerospace science and technology 1992. A bibliography with indexes
[NASA-SP-7104] p 2631 N94-24585
Management. A bibliography for NASA managers
[NASA-SP-7500(27)] p 2586 N94-24708
Selected bibliography 2: Diamond surface chemistry
[AD-A273518] p 2565 N94-25160

BIG BANG COSMOLOGY
A brief history of the universe
[DE93-616843] p 2604 N94-25210

BIMETALS
Organometallic chemistry of bimetallic compounds
[DE94-002313] p 2238 N94-22897

BINARY ALLOYS
New extensions in the development of deformation processed metal-metal matrix composites
[DE94-000692] p 2227 N94-23004
Multilayer relaxation and surface structure of ordered alloys
[NASA-TM-106433] p 2243 N94-23578
Crystal growth of organics for nonlinear optical applications p 2225 N94-24348
Segregation and oxidation studies of Al-Li and Al-Mg alloys
[ISBN-0-315-83993-7] p 2244 N94-24469

BINARY CODES
Box codes of lengths 48 and 72 p 2292 N94-23265
Binary block codes for correcting asymmetric or unidirectional errors
[ETN-94-95337] p 2460 N94-25063
On chain coding of line drawings
[ISBN-9-06-275778-2] p 2462 N94-25252

BINARY DATA
Box codes of lengths 48 and 72 p 2292 N94-23265
Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669

BINARY MIXTURES
Comparison of numerical simulation and experimental data for steam-in-place sterilization
p 2326 N94-23669
Microscopic dynamics in dense helium-neon mixtures: Neutron scattering, kinetic theory and computer simulations
[ISBN-9-07-386105-5] p 2537 N94-25228

BINARY PHASE SHIFT KEYING
Low cost coherent demodulation for mobile satellite terminals p 2284 N94-22803
Estimation of frequency offset in mobile satellite modems p 2285 N94-22807
Transmission over EHF mobile satellite channels
p 2287 N94-22820

BINARY STARS
Chromospheric activity in agol binaries
[AD-A273546] p 2602 N94-24557
Choice of filters for the detection of gravitational waves from coalescing binaries. 2: Detection in coloured noise
[DE93-616844] p 2604 N94-25211
A parallel algorithm for filtering gravitational waves from coalescing binaries
[DE93-616845] p 2604 N94-25212

BINDERS (MATERIALS)
Selection of polymer binders and fabrication of SiC fiber-reinforced reaction-bonded silicon nitride matrix composites
[NASA-CR-194874] p 2255 N94-24223
Collocated tunable wavenumber sensor/actuators for smart structures
[AD-A273697] p 2314 N94-25488

BINOMIALS
A comparison of approximate interval estimators for the Bernoulli parameter
[NASA-CR-191585] p 2458 N94-24680

BIOASTRONAUTICS
Cytokines and immune surveillance in humans
[NASA-CR-194801] p 2425 N94-23331
Crew interface analysis: Selected articles on space human factors research, 1987 - 1991
[NASA-TM-104756] p 2433 N94-24185
Specification list and function structure for a full-body dynamometer to be used aboard Space Station Freedom
[NASA-CR-195508] p 2439 N94-24835
Conceptual design of an astronaut hand anthropometry device
[NASA-CR-195490] p 2439 N94-24956
Evaluation of bioimpedance for the measurement of physiologic variables as related to hemodynamic studies in space flight p 2427 N94-25378
Loading, electromyograph, and motion during exercise
p 2427 N94-25380

BIOCHEMISTRY
Capillary electrophoresis of biomolecules: Theory, instrumentation and applications
[ETN-94-95297] p 2236 N94-25233

BIOCONVERSION
Considerations in implementing integrated biomass energy systems in developing countries
[DE93-018720] p 2395 N94-24499

BIODEGRADABILITY
Aqueous alkaline cleaners: An alternative to organic solvents
[AD-A273510] p 2260 N94-24848

BIODYNAMICS
Use of infrared telemetry as part of a nonintrusive inflight data collection system to collect human factors data
p 2434 N94-24193
Hand controller commonality evaluation process
p 2435 N94-24197
Development of biomechanical models for human factors evaluations p 2437 N94-24205
Establishing a relationship between maximum torque production of isolated joints to simulate EVA ratchet push-pull maneuver: A case study p 2437 N94-24206

BIOELECTRIC POTENTIAL
Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454

BIOFEEDBACK
Autogenic-feedback training: A potential treatment for post-flight orthostatic intolerance in aerospace crews
[NASA-TM-108785] p 2426 N94-24102

BIOINSTRUMENTATION
A chemical sensor and biosensor based totally automated water quality monitor for extended space flight: Step 1 p 2443 N94-24447

Evaluation of bioimpedance for the measurement of physiologic variables as related to hemodynamic studies in space flight p 2427 N94-25378

BIOLOGICAL EFFECTS
Research for electric energy systems
[DE94-001839] p 2293 N94-23719

BIOLOGICAL EVOLUTION
SETI: Search for extraterrestrial intelligence. An international interdisciplinary seminar, star days
[PB93-230597] p 2444 N94-23754
The evolution of energy-transducing systems. Studies with an extremely halophilic archaebacterium
[NASA-CR-193803] p 2422 N94-24807

BIOLOGY
A biological survey for the nation
[LC-93-85920] p 2421 N94-24704

BIOMASS
Considerations in implementing integrated biomass energy systems in developing countries
[DE93-018720] p 2395 N94-24499
Nutrients and light as factors controlling phytoplankton biomass on the Dutch continental shelf (North Sea), 1988-1990
[PB94-111143] p 2418 N94-24601
Investigating pyrolysis/incineration as a method of resource recovery from solid waste
p 2444 N94-25375

BIOMASS ENERGY PRODUCTION
Considerations in implementing integrated biomass energy systems in developing countries
[DE93-018720] p 2395 N94-24499

BIOREACTORS
Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357
Design and testing of a unique randomized gravity, continuous flow bioreactor p 2423 N94-25368

BIPOLAR TRANSISTORS
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers
[DE94-002293] p 2350 N94-24659
Method of fabricating a receptor-based sensor
[AD-D016026] p 2344 N94-24723
The 5th Engineering Foundation Conference: Advanced Heterostructure Transistors
[AD-A273508] p 2312 N94-24819
Method for fabricating self-aligned gate diffused junction field effect transistor
[AD-D015975] p 2312 N94-25035
On the characterization and optimization of high-speed silicon bipolar transistors
[ETN-94-95367] p 2313 N94-25253

BIRD-AIRCRAFT COLLISIONS
Birdstrike resistant crew enclosure program
[AD-A273700] p 2463 N94-25453

BIREFRINGENT FILTERS
A theoretical investigation of electrically tunable birefringent optical filters as the special discriminator in hyperspectral imaging systems
[AD-A273743] p 2547 N94-25533

BISMUTH ALLOYS
Spin-hole doping in the Kondo insulator Ce3Bi4Pt3 studied by neutron scattering
[DE93-040107] p 2557 N94-22925

BISMUTH OXIDES
The de Haas-van Alphen measurements in Ba(0.6)K(0.4)BiO3
[DE93-041169] p 2556 N94-22920

BIT ERROR RATE
Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805
Performance of the unique-word-reverse-modulation type demodulator for mobile satellite communications
p 2286 N94-22813
DS-SSMA capacity for a mobile satellite system
p 2286 N94-22814
Diversity reception for advanced multi-satellite networks: A CDMA approach p 2286 N94-22816
Pseudo-coherent demodulation for mobile satellite systems p 2287 N94-22819
Error coding simulations p 2306 N94-24439
Bounds and simulation results of 32-ary and 64-ary quadrature amplitude modulation for broadband-ISDN via satellite
[NASA-TM-106484] p 2202 N94-25095
On chain coding of line drawings
[ISBN-9-06-275778-2] p 2462 N94-25252
DCT quantization matrices visually optimized for individual images p 2442 N94-25509

BIT SYNCHRONIZATION
Improved frame synchronization schemes for INMARSAT-B/M SCPC and TDM channels
p 2285 N94-22806

BIVARIATE ANALYSIS
Setting test limits under prescribed consumer loss
[MEMO-1107] p 2478 N94-22725

BL LACERTAE OBJECTS
100 GHz map of 3C 446
[PB94-104882] p 2599 N94-23705

BLACK BODY RADIATION
Activities of NIST (National Inst. of Standards and Technology) p 2384 N94-23605

BLADE SLAP NOISE
Unstructured adaptive mesh computations of rotorcraft high-speed impulsive noise
[NASA-CR-195090] p 2529 N94-24307
Validation of the ROTAC code for the rotor noise prediction
[PB93-204311] p 2529 N94-24514
Study of the blade/vortex interaction: Acoustics, aerodynamics and models
[ISL-R-104/92] p 2340 N94-25463

BLADE TIPS
Bent-tip blade for aircraft rotary-wing
[CA-PATENT-1-315-259] p 2176 N94-23254
Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285
Unstructured adaptive mesh computations of rotorcraft high-speed impulsive noise
[NASA-CR-195090] p 2529 N94-24307

BLADE-VORTEX INTERACTION
Validation of the ROTAC code for the rotor noise prediction
[PB93-204311] p 2529 N94-24514
Study of the blade/vortex interaction: Acoustics, aerodynamics and models
[ISL-R-104/92] p 2340 N94-25463

BLASIUS FLOW
Boundary layer receptivity and control
p 2327 N94-24141

BLAST LOADS
The plastic response of a cylindrical shell subjected to an internal blast wave with a finite width shock front
p 2154 N94-24246

BLOCK COPOLYMERS
Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763
Center for advanced electrical and structural polymers
[AD-A273415] p 2259 N94-24783
Morphology of highly textured polyethylene/polyethylene- propylene semicrystalline diblock copolymers
[AD-A273683] p 2263 N94-25413

BLOCK DIAGRAMS
Binary block codes for correcting asymmetric or unidirectional errors
[ETN-94-95337] p 2460 N94-25063

BLOOD FLOW
Image processing for acquisition of fluid rest time in the running of an artificial heart valve p 2316 N94-22858
Development of a model to assess orthostatic responses p 2427 N94-25376

BLOOD PLASMA
Fluid-loading solutions and plasma volume: Astro-ade and salt tablets with water
[NASA-TP-3456] p 2426 N94-23544

BLOOD PRESSURE
Development of a model to assess orthostatic responses p 2427 N94-25376

BLOWING
Vortex generation and wave-vortex interaction over a concave plate with roughness and suction
[NASA-CR-191589] p 2337 N94-24869

BLUNT BODIES
Stability of hypersonic flow of a detonable gas mixture in the stagnation region of a blunt body and a forward facing step p 2154 N94-24248

BODY CENTERED CUBIC LATTICES
The effects of texture and strain on the r-va lue of heavy gauge tantalum plate
[DE94-000690] p 2242 N94-23541

BODY FLUIDS
Fluid-loading solutions and plasma volume: Astro-ade and salt tablets with water
[NASA-TP-3456] p 2426 N94-23544

BODY-WING AND TAIL CONFIGURATIONS
The cetaceopteryx: A global range military transport aircraft
[NASA-CR-195519] p 2181 N94-24711
The airplane: A simulated commercial air transportation study
[NASA-CR-195525] p 2182 N94-24837

BOLTED JOINTS
Computer based expert system for battle damage repair of composite structures p 2157 N94-24262

BOLTS
Split spline screw
[NASA-CASE-GSC-13434-1] p 2352 N94-23082

BOLTZMANN TRANSPORT EQUATION
Effect of high frequency field on the transport properties of superlattice
[DE93-617047] p 2568 N94-25447

BOLTZMANN-VLASOV EQUATION
Modification in the kinetic solution for magnetized plasmas
[DE93-613687] p 2555 N94-25343

BOMBER AIRCRAFT
Birdstrike resistant crew enclosure program
[AD-A273700] p 2463 N94-25453

BOND GRAPHS
Bond graph modeling, simulation, and reflex control of the Mars planetary automatic vehicle
p 2370 N94-23424

BONDED JOINTS
Final postflight hardware evaluation report RSRM-28 (STS-53)
[NASA-CR-193902] p 2200 N94-24112
Attachment methods in composite joints - analysis of test results by controlled experiments method
p 2158 N94-24269
Evaluation of the fracture resistance and durability of adhesive bonded joints p 2160 N94-24278
Postflight hardware evaluation 360T021 (RSRM-21, STS-45), revision A
[NASA-CR-193904] p 2201 N94-24965

BONDING
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis
[PB93-217982] p 2347 N94-22982

BONE DEMINERALIZATION
Loading, electromyograph, and motion during exercise
p 2427 N94-25359

BONES
Loading, electromyograph, and motion during exercise
p 2427 N94-25359

BOOLEAN ALGEBRA
Phased-mission system analysis using Boolean algebraic methods
[NASA-CR-191564] p 2451 N94-23340
Design and specification of a generic task model for solving boolean constraint satisfaction problems
[PB94-118841] p 2486 N94-23762
Structured constraint satisfaction
[PB94-119039] p 2497 N94-23764
Two applications of a generic task model for solving boolean constraint satisfaction problems
[PB94-119047] p 2487 N94-23765
Expert system rule-base evaluation using real-time parallel processing
[AD-A273701] p 2469 N94-25454

BOOLEAN FUNCTIONS
Logic synthesis on programmable networks
[ETN-94-95174] p 2449 N94-23151
Design and specification of a generic task model for solving boolean constraint satisfaction problems
[PB94-118841] p 2486 N94-23762
Two applications of a generic task model for solving boolean constraint satisfaction problems
[PB94-119047] p 2487 N94-23765
Area-power-delay trade-off in logic synthesis
[ISBN-9-09-005332-8] p 2461 N94-25080

BOOMS (EQUIPMENT)
Stiffening of deployable space booms: Automated Protein Crystal Growth Facility
[NASA-CR-195547] p 2196 N94-24820

BOOSTER ROCKET ENGINES
STE thrust chamber technology: Main injector technology program and nozzle Advanced Development Program (ADP)
[NASA-CR-193919] p 2221 N94-25019
GRYPHON: Air launched space booster
[NASA-CR-195497] p 2199 N94-25022

BOOSTER ROCKETS
Design of an airborne launch vehicle for an air launched space booster
[NASA-CR-195534] p 2198 N94-24860

BORATES
The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics
[AD-A273164] p 2262 N94-25136

BOREHOLES
Decomposition of multi-component measurements into P and S waves
[ISBN-9-09-005197-X] p 2405 N94-25251

BORING MACHINES
Development/drilling test of auger boring machine on board Mars rover for Mars exploration
p 2369 N94-23402

BORON ALLOYS
Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons
[PB93-201531] p 2561 N94-23428

BORON ISOTOPES

Synthesis and in-vivo detection of boronated compounds for use in BNCT
[DE94-001899] p 2233 N94-23780

BOSON FIELDS

The Haldane energy gap of a doped linear-chain Heisenberg antiferromagnet
[DE93-617130] p 2567 N94-25426

BOSONS

A measurement of the forward-backward asymmetry and sin(sup 2)(theta)(sub W) from the process Z(sup 0) (yields) (mu)(sup +)(mu)(sup (minus)) at (radical)s = 1.8 TeV
[DE94-001908] p 2532 N94-23018

Photon-photon collisions at the next linear collider: Theory
[DE93-041025] p 2534 N94-23803

Cosmic wake fields
[DE93-616849] p 2604 N94-25215

The determination of the branching ratios of the Z(zero) boson into heavy quarks using neural networks
[ETN-94-95381] p 2538 N94-25246

BOTTLES

Impact damage in filament wound composite bottles
p 2231 N94-24421

BOUNDARIES

High strain rate superplasticity in metals and composites
[DE94-001521] p 2229 N94-24547

Stability of premixed laminar flames in a stagnation point flow to general disturbances
[AD-A273429] p 2234 N94-24673

Nonlinear dynamics applied to atmospheric prediction
[AD-A273437] p 2404 N94-24674

BOUNDARY CONDITIONS

Coupled frequencies of a hydroelastic rectangular system
[LRT-WE-9-FB-4-1992] p 2375 N94-23196

The theoretical accuracy of Runge-Kutta time discretizations for the initial boundary value problem: A careful study of the boundary error
[NASA-CR-191561] p 2480 N94-23272

Out of plane gradients in laminated composites
[NASA-CR-194875] p 2228 N94-23566

A direct approach to finding unknown boundary conditions in steady heat conduction
p 2322 N94-23645

Convection equation modeling: A non-iterative direct matrix solution algorithm for use with SINDA
p 2323 N94-23651

An analytic study of a two-phase laminar airfoil in simulated heavy rain p 2171 N94-23661

An application of small-gap equations in sealing devices p 2325 N94-23668

Response-coefficient method for heat-conduction transients with time-dependent inputs
p 2326 N94-23671

Multigrid and cyclic reduction applied to the Helmholtz equation p 2304 N94-23676

Study of a local absorbing boundary condition for the modeling of an infinite external domain in the time-domain finite-element package FEMAXT
[PB94-111002] p 2294 N94-23728

Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281

Dynamics of the atmosphere of Mars: Review of some outstanding problems p 2620 N94-24888

Modelling the Shuttle Remote Manipulator System: Another flexible model p 2371 N94-25350

Unified approach for incompressible flows
p 2342 N94-25356

BOUNDARY ELEMENT METHOD

A direct approach to finding unknown boundary conditions in steady heat conduction
p 2322 N94-23645

Unsteady three-dimensional thermal field prediction in turbine blades using nonlinear BEM
p 2325 N94-23665

A dual reciprocal boundary element formulation for viscous flows p 2325 N94-23666

BEM solution for the simulation of axisymmetric viscous sintering
[PB93-237717] p 2336 N94-24761

BOUNDARY INTEGRAL METHOD

Classical scattering theory of waves from the view point of an eigenvalue problem and application to target identification
[DE94-000472] p 2525 N94-23206

BOUNDARY LAYER CONTROL

Drag reduction at a plane wall p 2327 N94-24140

Boundary layer receptivity and control
p 2327 N94-24141

Large-eddy simulation of flow in a plane, asymmetric diffuser p 2328 N94-24147

Coherent structures over grooved surfaces
[ETN-94-95308] p 2339 N94-25291

BOUNDARY LAYER EQUATIONS

Multigrid methods for a semilinear PDE in the theory of pseudoplastic fluids p 2341 N94-23689

BOUNDARY LAYER FLOW

Measurement of kinematically unstationary separated flows p 2315 N94-22854

Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736

Optimal feedback control of turbulent channel flow
p 2327 N94-24139

On the large eddy simulation of turbulent flows in complex geometry p 2329 N94-24148

An analysis for high Reynolds number inviscid/viscid interactions in cascades
[NASA-CR-4519] p 2169 N94-24606

Turbulence models and Reynolds analogy for two-dimensional supersonic compression ramp flow
[NASA-TM-106474] p 2337 N94-25119

Detailed description of two calculation programs for incompressible, steady state boundary layer flows, applied to determine the aerodynamic characteristics of NACA12 and OA312 foils at low Reynolds numbers
[ISL-N-604/92] p 2171 N94-25461

BOUNDARY LAYER SEPARATION

Evaluation of turbulence models in the PARC code for transonic diffuser flows
[NASA-TM-106391] p 2168 N94-24084

Large-eddy simulation of flow in a plane, asymmetric diffuser p 2328 N94-24147

Advanced ballistic range technology
[NASA-CR-195198] p 2165 N94-25169

BOUNDARY LAYER STABILITY

Relationship between transition and modes of instability in supersonic boundary layers
[NASA-CR-4562] p 2336 N94-24725

BOUNDARY LAYER TRANSITION

Sound radiation due to boundary layer transition
p 2332 N94-24163

Workshop on Computational Turbulence Modeling
[NASA-CP-10130] p 2333 N94-24460

Aerodynamic characteristics and pressure distributions for an executive-jet baseline airfoil section
[NASA-TM-4529] p 2169 N94-24586

Computational fluid mechanics
[NASA-CR-194765] p 2337 N94-24859

Vortex generation and wave-vortex interaction over a concave plate with roughness and suction
[NASA-CR-191589] p 2337 N94-24869

BOUNDARY LAYERS

Measurement of kinematically unstationary separated flows p 2315 N94-22854

The use of near-wall hot-wire probes for time-resolved skin-friction measurements p 2316 N94-22857

Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055

Asymptotic analysis: Working note no. 3, boundary layers
[DE94-002299] p 2318 N94-23213

Computation of turbulent flows over backward and forward-facing steps using a near-wall Reynolds stress model p 2172 N94-24145

Large eddy simulation of a boundary layer with concave streamwise curvature p 2328 N94-24146

Sound radiation due to boundary layer transition
p 2332 N94-24163

GEWEX Cloud Systems Study (GCSS)
p 2411 N94-24377

A vorticity dynamics based model for the turbulent dissipation: Model development and validation
[NASA-TM-106177] p 2336 N94-24713

Computational fluid mechanics
[NASA-CR-194765] p 2337 N94-24859

BOUNDARY VALUE PROBLEMS

A nonlinear degenerating parabolic problem from the theory of type 2 superconductors
[MEMO-1112] p 2555 N94-22730

Asymptotic analysis: Working note no. 3, boundary layers
[DE94-002299] p 2318 N94-23213

The theoretical accuracy of Runge-Kutta time discretizations for the initial boundary value problem: A careful study of the boundary error
[NASA-CR-191561] p 2480 N94-23272

Uniform convergence of multigrid V-cycle iterations for indefinite and nonsymmetric problems
p 2482 N94-23677

Wavelet multiresolution analyses adapted for the fast solution of boundary value ordinary differential equations
p 2485 N94-23691

A nonconforming multigrid method using conforming subspaces p 2485 N94-23695

Error due to the stopping of the Newton iteration in implicit linear multistep methods
[PB94-101425] p 2487 N94-23786

Energy and maximum norm estimates for nonlinear conservation laws
[NASA-CR-195091] p 2569 N94-24109

Bounds and asymptotic expansions for solutions of the free boundary problems related to sequential decision versions of a bioequivalence problem
[AD-A273551] p 2495 N94-24560

Stability analysis of anisotropic conical shells
[PB94-119054] p 2377 N94-24645

Characteristic method for one-dimensional scalar hyperbolic conservation laws with stiff source terms
[PB93-237675] p 2491 N94-24954

The state space method for integro-differential equations of convolution type with rational matrix symbols
[ETN-94-95379] p 2491 N94-25244

BRAGG ANGLE

Modifications to 8x8 dynamical theory: Polarizations redefined according to x ray diffraction convention
[DE94-001290] p 2560 N94-23187

Proposed additions to the SHADOW ray-tracing code for general-asymmetric perfect-crystal optics
[DE94-001291] p 2560 N94-23188

BRAGG CELLS

Advanced technology for a satellite multichannel demultiplexer/demodulator
[NASA-CR-194435] p 2202 N94-23631

BRAIN

Static image method for computing the electric potential due to sources in a layered sphere
[PB93-224970] p 2308 N94-23105

Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454

Interaction of tacrine at M(1) and M(2) cholinoceptors in guinea pig brain p 2421 N94-24294

BRAKES (FOR ARRESTING MOTION)

Electromagnetic brake/clutch device
[NASA-CASE-GSC-13502-1] p 2354 N94-23969

Studies of Shuttle orbiter arrestment system
[NASA-TP-3370] p 2177 N94-24304

BRANCHING (MATHEMATICS)

The cusp horseshoe and its bifurcations in the unfolding of an inclination-flip homoclinic orbit
[W-9307] p 2480 N94-23141

The determination of the branching ratios of the Z(zero) boson into heavy quarks using neural networks
[ETN-94-95381] p 2538 N94-25246

BRASSES

Laser soldering of Sn plated brass integrator assembly housings
[DE94-001149] p 2270 N94-23790

BRAYTON CYCLE

Utilization of recently developed codes for high power Brayton and Rankine cycle power systems
p 2222 N94-23641

BRAZIL

Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861

BRAZING

Determination of the compatibility between structural alloys and molten metals at high temperatures
[DE94-000954] p 2241 N94-23434

BREADBOARD MODELS

Gas-grain simulation experiment module conceptual design and gas-grain simulation facility breadboard development
[NASA-CR-177632] p 2598 N94-23536

Micro-gravity compatible drive (MGCD)
p 2355 N94-23988

BREATHING APPARATUS

Computer control of an electro-mechancial regulator for providing positive pressure breathing and an electronic G-valve for human +Gz research
[DCIEM-93-05] p 2437 N94-24299

BRECCIA

Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts
p 2614 N94-24365

Major element chemistry of Apollo 14 mare basalt clasts and highland plutonic clasts from lunar breccia 14321: Comparison with neutron activation results
p 2614 N94-24366

Polytopic vector analysis in igneous petrology: Application to lunar petrogenesis p 2615 N94-24368

BREEDING (REPRODUCTION)

Generalized linear mixed models and their application in plant breeding research
[ETN-94-95335] p 2460 N94-25061

BREMSSTRAHLUNG

Low p(sub T) photon production in proton-nucleus collisions at 18 GeV/c
[DE94-001380] p 2532 N94-23007

BRIDGMAN METHOD

Two micron stimulated emission of activated insulating crystals
[REPT-94-002] p 2565 N94-25025

BRIGHTNESS

Luminance-brightness mapping: The missing decades
[ETN-94-95351] p 2428 N94-25298

BRIGHTNESS DISCRIMINATION

Luminance-brightness mapping: The missing decades
[ETN-94-95351] p 2428 N94-25298

BRIGHTNESS TEMPERATURE

Synthesis of passive microwave and radar altimeter data for estimating accumulation rates of polar snow
[NASA-CR-194864] p 2382 N94-23573

An investigation of current and future satellite and in-situ data for the remote sensing of the land surface energy balance
[NASA-CR-195138] p 2387 N94-24596

Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-194858] p 2404 N94-24843

BRILLOUIN EFFECT

The elastic and electromechanical properties of BaTiO3 single crystal through the ferroelectric transition
[DE94-001437] p 2557 N94-22927

BRILLOUIN ZONES

Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation
[DE93-617053] p 2567 N94-25424

BRITTLE MATERIALS

Evaluation of multiaxial fracture models for technical ceramics
[ISBN-9-03-860192-1] p 2263 N94-25299

BRITTLENESS

Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009

Micromechanical failure modes in brittle matrix composites p 2255 N94-24232

BROADBAND

Broadband linearisation of high-efficiency power amplifiers p 2275 N94-22747

ACTS broadband aeronautical experiment
p 2279 N94-22771

Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793

Propagation model for the Land Mobile Satellite channel in urban environments p 2283 N94-22796

Multi-ion, multi-event test of ion cyclotron resonance heating
[NASA-CR-194859] p 2540 N94-23495

Wide bandwidth differential amplifier
[AD-D015985] p 2303 N94-25217

BROADCASTING

Worldwide survey of direct-to-listener digital audio delivery systems development since WARC-1992
p 2273 N94-22736

ESA personal communications and digital audio broadcasting systems based on non-geostationary satellites p 2273 N94-22737

Direct broadcast satellite-radio, space-segment/receiver tradeoffs p 2273 N94-22738

Direct broadcast satellite-radio, receiver development
p 2273 N94-22739

Utilizing a TDRS satellite for direct broadcast satellite-radio propagation experiments and demonstrations p 2274 N94-22740

Aeronautical audio broadcasting via satellite
p 2274 N94-22741

The possibilities for mobile and fixed services in the 20/30 GHz frequency bands p 2276 N94-22752

Design and implementation considerations of a MSAT packet data network p 2280 N94-22778

Satellite communications systems and technology. Volume 1: Analytical chapters
[NASA-TM-109398] p 2293 N94-23627

An introduction to digital modulation and OFDM techniques
[BBC-RD-1993/10] p 2295 N94-24086

BROKEN SYMMETRY

On spontaneous symmetry breaking mechanism in light-front quantized field theory
[DE93-633211] p 2568 N94-22968

Flavor changing strings and domain walls
[DE93-633217] p 2532 N94-22970

Defects in electro-optically active polymer solids
p 2223 N94-24342

Cosmic wake fields
[DE93-616849] p 2604 N94-25215

Phase structure of the two-dimensional phi(4) field theory within thermo-field dynamics
[DE93-616850] p 2570 N94-25337

Superconducting cosmic strings near the electroweak scale and cosmic-ray propagation
[MPI-PHE/93-05] p 2629 N94-25459

BROMIDES

Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789

Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790

Metal-catalyzed alkynylation of (Bromophenyl)Oligophenylenes: A rapid route to thermoset precursors of high density monolithic glass-like carbon
[AD-A273219] p 2260 N94-24863

BROMINATION

A method to remove intercalates from bromine and iodine intercalated carbon fibers
[NASA-TM-106443] p 2222 N94-23591

Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789

BRONCHI

Chronic obstructive pulmonary disease
p 2425 N94-23324

Asthma in aircrew p 2425 N94-23327

BROWNIAN MOVEMENTS

Bounds and asymptotic expansions for solutions of the free boundary problems related to sequential decision versions of a bioequivalence problem
[AD-A273551] p 2495 N94-24560

BRUSH SEALS

Brush seals for cryogenic applications
p 2216 N94-23063

BSCCO SUPERCONDUCTORS

Heavy ion irradiation of Bi-2223 silver-clad tapes for superconducting current density enhancement
[DE93-017416] p 2556 N94-22886

Thermomechanical processing of Ag-clad Bi2Sr2CaCu2O(x) superconductors
[DE94-002347] p 2563 N94-24624

BUCKLING

Shell buckling research at Delft, 1976 - 1992
[PB93-224442] p 2375 N94-23221

Review of a variational method applied to magnetoelastic buckling problems
[PB94-111184] p 2562 N94-23769

Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260

Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280

Structural design criteria for filament-wound composite shells
[NASA-CR-195125] p 2229 N94-24402

Stability analysis of anisotropic conical shells
[PB94-119054] p 2377 N94-24645

Buckling of circular cylindrical shells subjected to combined loads (axial compression, normal pressure, bending and transverse shear loading)
[PB93-215358] p 2378 N94-24745

BUDGETING

Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion
[PB94-111374] p 2194 N94-23770

Strategies in transition p 2498 N94-23833

Toward lowering the cost of mission operations
p 2519 N94-23960

New mission requirements methodologies for services provided by the Office of Space Communications
p 2519 N94-23961

BUFFER STORAGE

Loss probabilities in batch-arrival bulk-service queues with finite capacity
[MEMO-1106] p 2493 N94-22724

Fast simulation of packet loss rates in a shared buffer communications switch
[NASA-CR-191556] p 2457 N94-24638

BUILDINGS

A prediction model of signal degradation in LMSS for urban areas p 2284 N94-22797

Zone fire modeling with natural building flows and a zero order shaft model
[PB94-112166] p 2270 N94-23735

Active control of buildings during earthquakes
[NASA-TM-109033] p 2271 N94-24473

Collaborating with our customers: NIST building and fire research laboratory
[PB94-110194] p 2272 N94-24955

Wind climate and urban geometry
[ISBN-9-03-860132-8] p 2416 N94-25261

BUOYANCY

Survival suit for submarine personnel: Summary of evaluation studies
[PB93-204634] p 2430 N94-23743

BURAN SPACE SHUTTLE

Liquid rocket propulsion: Retrospective and prospects
p 2154 N94-24243

BURNERS

Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 2: Effect of spray parameters on the performance of several hafnia-yttria and zirconia-yttria coatings
[NASA-TP-3296] p 2242 N94-23467

BURNING RATE

Theory and computation of optimal low- and medium-thrust transfers
[NASA-CR-194812] p 2217 N94-23275

Calculation of flame spread on lining materials by the field model KAMELEON. Project 5 of the EUREFIC fire research programme
[PB93-201614] p 2268 N94-23450

Burning rate of double-base propellant in the presence of plasma p 2155 N94-24252

Solid rocket combustion simulator technology using the hybrid rocket for simulation
[NASA-CR-195142] p 2265 N94-24578

Influence of test configuration on the combustion characteristics of polymers as ignition sources
p 2238 N94-25365

BURNOUT

Reburning rich-lean kinetics
[PB93-220887] p 2232 N94-23100

Modal test of the Brazilian satellite launcher (VLS) configuration burn-out of the first stage
p 2156 N94-24257

BUSHINGS

The development of the SOHO SUMER mechanisms
p 2361 N94-24028

BUTADIENE

Particle nucleation and growth in butadiene emulsion polymerization
[ETN-94-95300] p 2262 N94-25236

BY-PRODUCTS

Reduction of hydrocarbon impurities in 200 l/h helium liquefier-refrigerator system
[NIFS-259] p 2271 N94-24459

C

C (PROGRAMMING LANGUAGE)

Horatio: Libraries for vision applications, release 2.0
[OUEL-1967/92] p 2593 N94-25326

C BAND

Precipitation measurement using SIR-C: A feasibility study. Investigation at nadir
[NASA-CR-195103] p 2410 N94-24126

C++ (PROGRAMMING LANGUAGE)

An object-oriented approach for parallel self adaptive mesh refinement on block structured grids
p 2469 N94-23697

CADMIUM

Integrated hydrometallurgical jarosite treatment
[PB93-217990] p 2232 N94-22983

CADMIUM COMPOUNDS

Photoinduced charge separation in solid state and molecular systems
[DE94-001727] p 2563 N94-24537

CADMIUM TELLURIDES

Magnetic resonance studies of 3d transition metal impurities in compound semiconductors
[PB93-232197] p 2243 N94-23714

Thin film cadmium telluride photovoltaic cells
[DE94-000201] p 2395 N94-24509

CALCIUM TUNGSTATES

Contribution of all excited states to ZFS of a (sup 6) S-state
[DE93-617007] p 2568 N94-25483

CALCULUS

Simple calculus of finite probabilistic processes
[PB93-223782] p 2493 N94-23108

Relational algebra and equational proofs
[PB94-110822] p 2486 N94-23724

Sequential composition, action prefixes and process prefix
[PB94-101433] p 2488 N94-24539

Combinatory reduction systems: Introduction and survey
[PB94-110582] p 2457 N94-24570

A type-theoretic approach to higher-order modules with sharing
[AD-A273566] p 2458 N94-24693

CALIBRATING

Eye-gaze control of the computer interface: Discrimination of zoom intent
[DE94-000480] p 2429 N94-22997

FTIR quantification of industrial hydraulic fluids in perchloroethylene p 2264 N94-23243

Calibration of HYPULSE for hypervelocity air flows corresponding to flight Mach numbers 13.5, 15, and 17 [NASA-CR-191578] p 2192 N94-23564

The Fifth Calibration/Data Product Validation Panel Meeting [NASA-TM-108270] p 2383 N94-23595

Cross-calibration survey (VISNIR) p 2383 N94-23599

MODIS calibration p 2383 N94-23600

Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror p 2384 N94-23602

Activities of NIST (National Inst. of Standards and Technology) p 2384 N94-23605

Calibration of a helium-cooled infrared spatial radiometer and grating spectrometer p 2384 N94-23607

Infrared calibration p 2384 N94-23608

Concept of ASTER calibration requirement p 2384 N94-23609

VNIR and SWIR transfer radiometers developed at NRLM for preflight laboratory cross-calibration p 2385 N94-23610

In-flight cross-calibration of ASTER/TIR and MODIS-N p 2385 N94-23611

ASTER TIR subsystem and calibration p 2385 N94-23612

Calibration block for digital beam forming antenna [PB93-204550] p 2294 N94-23773

Digital test signal generation: An accurate SNR calibration approach for the DSN p 2305 N94-23912

Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field [NASA-CR-191490] p 2344 N94-24360

Improved pressure measurement system for calibration of the NASA LeRC 10x10 supersonic wind tunnel [NASA-TM-106470] p 2344 N94-24362

The 1404+286: A non-ideal calibrator for VLBI observations [PB94-104908] p 2599 N94-24521

Calibration network intended for phase-array antennas at 3 GHz [PB93-204352] p 2297 N94-24530

Results of the 1993 NASA/JPL balloon flight solar cell calibration program [NASA-CR-195158] p 2395 N94-24563

Hubble Space Telescope high speed photometer science verification test report [NASA-CR-189322] p 2205 N94-24710

Analysis of SOFCAL calibration data [NASA-CR-193910] p 2345 N94-25000

Active camera calibration for a head-eye platform using a variable state dimension filter [OUEL-1975/93] p 2346 N94-25472

CALIFORNIUM

A survey of metallurgical research on several actinides [DE94-002643] p 2245 N94-24747

CALORIMETERS

Fire safety engineering research in Norway [PB93-201630] p 2268 N94-23429

Calculation of flame spread on lining materials by the field model KAMELEON. Project 5 of the EUREFIC fire research programme [PB93-201614] p 2268 N94-23450

Analysis of SOFCAL calibration data [NASA-CR-193910] p 2345 N94-25000

CAMERAS

Stereo for gazing and converging cameras. Part 1: Basic geometry [OUEL-1915/92] p 2343 N94-23162

Speech versus manual control of camera functions during a telerobotic task p 2436 N94-24199

The effects of spatially displaced visual feedback on remote manipulator performance p 2436 N94-24201

Preliminary design of a satellite observation system for Space Station Freedom [NASA-CR-195514] p 2209 N94-24840

Active camera calibration for a head-eye platform using a variable state dimension filter [OUEL-1975/93] p 2346 N94-25472

Simulation of a passive millimeter wave sensor p 2346 N94-25499

Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505

A model-based approach for detection of objects in low resolution passive-millimeter wave images p 2442 N94-25507

CAMOUFLAGE

Experimental evaluation of camouflage effectiveness in the thermal infrared [FEL-93-A043] p 2381 N94-22896

CANARD CONFIGURATIONS

Dumbo heavy lifter aircraft [NASA-CR-195500] p 2182 N94-24915

The AC-120: The advanced commercial transport [NASA-CR-195491] p 2182 N94-24966

CANCER

Annual research progress report, fiscal year 1992. Volume 2: Department of Clinical Investigation [AD-A273584] p 2427 N94-24945

CANONICAL FORMS

Infinite divisible and stable distributions modulo 1 [PB94-110640] p 2495 N94-23815

Wiener-Hopf factorization of rational matrix functions in terms of realizations: An alternative version [ETN-94-95380] p 2491 N94-25245

CAPACITANCE

Calibration network intended for phase-array antennas at 3 GHz [PB93-204352] p 2297 N94-24530

Carbon supercapacitors [DE94-002652] p 2311 N94-24748

CAPACITORS

Limiting factors for carbon based chemical double layer capacitors p 2394 N94-23365

Carbon supercapacitors [DE94-002652] p 2311 N94-24748

MOS analog memory with injection capacitors [AD-D015990] p 2312 N94-25050

CAPE KENNEDY LAUNCH COMPLEX

A prototype expert/information system for examining environmental risks of KSC activities p 2400 N94-23237

CAPILLARY FLOW

Interpretation of discrepancies in mass spectroscopy data obtained from different experimental configurations p 2237 N94-23245

Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface [PB93-237691] p 2480 N94-23438

Capillary electrokinetic separations with optical detection [DE94-001639] p 2233 N94-23716

Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe [AD-A273830] p 2571 N94-25524

CAPILLARY TUBES

Transient studies of capillary-induced flow p 2325 N94-23662

Electrophoresis in open capillaries: Some fundamental aspects [ETN-94-95290] p 2236 N94-25232

Capillary electrophoresis of biomolecules: Theory, instrumentation and applications [ETN-94-95297] p 2236 N94-25233

CARBIDES

Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing [NASA-TM-106381] p 2242 N94-23550

CARBOHYDRATE METABOLISM

Skeletal muscle metabolism in hypokinetic rats [NASA-CR-195082] p 2420 N94-24124

CARBON

Carbon aerogels: An update on structure, properties, and applications [DE94-001528] p 2252 N94-22931

Limiting factors for carbon based chemical double layer capacitors p 2394 N94-23365

Hairy carbon electrodes studied by cyclic voltammetry and battery discharge testing p 2394 N94-23367

Theoretical considerations for Reaction-Formed Silicon Carbide (RFSC) formation by molten silicon infiltration into slurry-derived preforms [NASA-TM-106414] p 2222 N94-23500

Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas [NASA-CR-189214] p 2364 N94-24090

Carbon supercapacitors [DE94-002652] p 2311 N94-24748

CARBON ARCS

A review of wiring system safety in space power systems [NASA-CR-194439] p 2203 N94-23632

CARBON COMPOUNDS

New tribocoating combination for vacuum operation p 2355 N94-23990

Laboratory detection of C5S by pulsed-discharge-nozzle Fourier-transform microwave spectroscopy [JTN-94-80519] p 2235 N94-24984

CARBON CYCLE

Effect of land use change on the carbon cycle in Amazon soils [NASA-CR-195168] p 2399 N94-24853

Human impacts on soil carbon dynamics of deep-rooted Amazonian forests [NASA-CR-195127] p 2399 N94-24861

CARBON DIOXIDE

Feasibility study on a CO2 global recycling system using natural energy [DE94-714889] p 2397 N94-23026

Performance of the Carbon Dioxide Information Analysis Center (CDIAC) [DE94-002190] p 2397 N94-23794

Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects [NASA-CR-195126] p 2534 N94-24487

Effect of land use change on the carbon cycle in Amazon soils [NASA-CR-195168] p 2399 N94-24853

Cloud, dust, and ozone vertical profiles from solar occultation measurements: Implications for dynamics p 2617 N94-24877

Impact of the CO2 and H2O clouds of the Martian polar hood on the polar energy balance p 2618 N94-24880

The annual pressure cycle on Mars: Results from the LMD Martian atmospheric general circulation model p 2619 N94-24884

The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896

CARBON DIOXIDE LASERS

Remote vibration measurements at a sud aviation alouette 3 helicopter with a CW CO2-laser system [AD-A273818] p 2190 N94-25516

CARBON FIBER REINFORCED PLASTICS

The use of expanding monomers in carbon fibre composites [ISBN-0-315-83550-8] p 2226 N94-22890

Optimization of laminate orientation to enhance failure properties [ISBN-0-315-83539-7] p 2227 N94-22892

Preparing polymeric matrix composites using an aqueous slurry technique [NASA-CASE-LAR-14771-1] p 2252 N94-23076

Intelligent Material Systems and Structures (IMSS). Part 5: Fiber optic registration of deformation in carbon laminates 91/92 [PB93-204600] p 2544 N94-23723

CARBON FIBERS

A method to remove intercalates from bromine and iodine intercalated carbon fibers [NASA-TM-106443] p 2222 N94-23591

CARBON ISOTOPES

Carbon and hydrogen isotope composition and C-14 concentration in methane from sources and from the atmosphere: Implications for a global methane budget [NASA-CR-195166] p 2399 N94-25092

CARBON MONOXIDE

High-resolution soft x ray photoionization studies of selected molecules [DE94-000568] p 2532 N94-23002

Reburning rich-lean kinetics [PB93-220887] p 2232 N94-23100

Carbon monoxide fuel cells as a source for Mars rover electric power p 2314 N94-23409

Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion [PB94-109873] p 2187 N94-23709

CO-to-H2 conversion factor in dwarf irregular galaxies [REPT-333] p 2603 N94-24985

High spatial resolution observations of CO in CRL 618 [REPT-334] p 2604 N94-24986

CARBON TETRACHLORIDE

Thermoelectric cooled, purge-and-trap device for enhancing the utility of fiber optic VOC sensors [DE94-001772] p 2541 N94-22722

CARBON 13

Effect of land use change on the carbon cycle in Amazon soils [NASA-CR-195168] p 2399 N94-24853

CARBON 14

Effect of land use change on the carbon cycle in Amazon soils [NASA-CR-195168] p 2399 N94-24853

Carbon and hydrogen isotope composition and C-14 concentration in methane from sources and from the atmosphere: Implications for a global methane budget [NASA-CR-195166] p 2399 N94-25092

Manual on measurement of methane and nitrous oxide emissions from agriculture [DE93-616429] p 2399 N94-25167

CARBON-PHENOLIC COMPOSITES

Micromechanical simulation of damage progression in carbon phenolic composites p 2231 N94-24446

Properties and processing characteristics of low density carbon cloth phenolic composites p 2231 N94-24450

CARBONACEOUS CHONDRITES

Correlated petrographic, electron microprobe, and ion microprobe studies of selected primitive and processed phase assemblages in meteorites [NASA-CR-194827] p 2601 N94-23499

CARBONATES

Advanced research and technology development of MCFCs [DE94-001918] p 2389 N94-22723

Overview of molten carbonate fuel cell technology development
[DE94-001911] p 2394 N94-23781

CARBORANE
Synthesis and in-vivo detection of boronated compounds for use in BNCT
[DE94-001899] p 2233 N94-23780

CARBOXYLIC ACIDS
Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763

CARDIAC OUTPUT
Responses to LBNP in men with varying profiles of strength and aerobic capacity: Implications for flight crews
[NASA-TP-3346] p 2426 N94-23530

CARDIAC VENTRICLES
Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18)
p 2424 N94-23320
Left ventricular hypertrophy and athlete's heart
p 2424 N94-23321

CARDIOLOGY
Cardiovascular and pulmonary disease in NATO aircrew: An overview p 2423 N94-23314
Screening for asymptomatic coronary heart disease
p 2423 N94-23315
Left ventricular hypertrophy and athlete's heart
p 2424 N94-23321

CARDIOVASCULAR SYSTEM
Cardiovascular and pulmonary disease in NATO aircrew: An overview p 2423 N94-23314
Sarcoidosis and the aviator p 2425 N94-23325
Arterial hypertension and the aviator
p 2425 N94-23328
Responses to LBNP in men with varying profiles of strength and aerobic capacity: Implications for flight crews
[NASA-TP-3346] p 2426 N94-23530
Autogenic-feedback training: A potential treatment for post-flight orthostatic intolerance in aerospace crews
[NASA-TM-108785] p 2426 N94-24102
Development of a model to assess orthostatic responses p 2427 N94-25376

CARGO AIRCRAFT
Conceptual design proposal: HUGO global range/mobility transport aircraft
[NASA-CR-195501] p 2181 N94-24787
Dumbo heavy lifter aircraft
[NASA-CR-195500] p 2182 N94-24915
A global range military transport: The ostrich
[NASA-CR-195494] p 2183 N94-24972

CARRIER DENSITY (SOLID STATE)
Transparent conducting thin films for spacecraft applications
[NASA-TM-106466] p 2218 N94-23370

CARRIER FREQUENCIES
Estimation of frequency offset in mobile satellite modems p 2285 N94-22807
Theoretical and simulated performance for a novel frequency estimation technique p 2285 N94-22808
A pattern jitter free AFC scheme for mobile satellite systems p 2285 N94-22809
Dual frequency optical carrier technique for transmission of reference frequencies in dispersive media
[NASA-CASE-NPO-18007-2-CU] p 2543 N94-23270

CARRIER MOBILITY
Large-scale production of Si(0.8)Ge(0.2) thermoelectric alloys by mechanical alloying
[DE94-000695] p 2243 N94-23753

CARRIER TO NOISE RATIOS
Analysis of open-loop conical scan pointing error and variance estimators p 2291 N94-23263

CARTESIAN COORDINATES
A mixed method Poisson solver for three-dimensional self-gravitating astrophysical fluid dynamical systems
p 2484 N94-23684
Finite-element method for computing three-dimensional electromagnetic fields in inhomogeneous media (1993)
[PB94-111101] p 2298 N94-24637

CARTS
Preliminary results on time-varying feedback stabilization of a nonholonomic car-like mobile robot
[INRIA-RR-1512] p 2475 N94-24963

CASCADE FLOW
Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades
[PB93-226223] p 2317 N94-23114
Analysis of the effects of wake passage on heat transfer in a linear turbine cascade
[AD-A273729] p 2339 N94-25446

CASSINI MISSION
GPHS-RTG's in support of the Cassini mission
[DE94-001445] p 2218 N94-23459
Development of the Cassini Ground Data System in a multimission environment p 2500 N94-23845
Distributed science operations for JPL planetary missions p 2500 N94-23850
Science planning and sequencing for Cassini
p 2504 N94-23871

CASTING
Materials Science and Engineering
[DE94-003018] p 2228 N94-23493
The importance of properties in modeling
p 2246 N94-25121

CATALOGS (PUBLICATIONS)
Catalog of data bases and reports
[DE93-040597] p 2588 N94-22875
Catalog of Apollo experiment operations
[NASA-RP-1317] p 2194 N94-23292
Satellite situation report, volume 33, number 4
[NASA-TM-109677] p 2205 N94-24824

CATALYSIS
Advances in direct oxidation methanol fuel cells
p 2393 N94-23361
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763
Metal-catalyzed alkynylation of (Bromophenyl)Oligophenylenes: A rapid route to thermoset precursors of high density monolithic glass-like carbon
[AD-A273219] p 2260 N94-24863
Design of novel catalysts for the partial oxidation of methane to methanol
[PB94-114212] p 2235 N94-24920

CATALYSTS
Composite fiber structures for catalysts and electrodes
p 2393 N94-23364
Hairy carbon electrodes studied by cyclic voltammetry and battery discharge testing p 2394 N94-23367
Development of durable high-temperature catalysts for natural gas combustion
[PB93-226447] p 2232 N94-23477
Reduction of nitric oxide over platinum, rhodium and platinum-rhodium single crystal surfaces
[PB93-230092] p 2232 N94-23482
New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane
[PB94-112786] p 2233 N94-23801
Fundamental study of NO(x) control in catalytic combustion
[PB94-112323] p 2398 N94-23818
Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789
Design of novel catalysts for the partial oxidation of methane to methanol
[PB94-114212] p 2235 N94-24920
Dispersion of Rh/Cu in a sol-gel matrix. Highly chemo- and stereoselective catalyst for the reduction of alkynes to Z-alkenes
[AD-A273306] p 2262 N94-25145
The structure and catalytic properties of supported platinum catalysts
[ETN-94-95357] p 2236 N94-25250

CATALYTIC ACTIVITY
Fundamental study of NO(x) control in catalytic combustion
[PB94-112323] p 2398 N94-23818
The structure and catalytic properties of supported platinum catalysts
[ETN-94-95357] p 2236 N94-25250

CATASTROPHE THEORY
The Hamiltonian double-zero eigenvalue
[W-9304] p 2479 N94-23138

CATHODES
Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296
A high performance H2-Cl2 fuel cell for space power applications p 2394 N94-23366
Power console development for NASA's electric propulsion outreach program
[NASA-TM-106428] p 2218 N94-23372
Arc electrode interaction study
[NASA-CR-195096] p 2310 N94-24070
In situ and ex situ spectroelectrochemical and x ray absorption studies on rechargeable, chemically-modified and other MnO2 materials
[DE94-001387] p 2234 N94-24545

CATHODIC COATINGS
Arc electrode interaction study
[NASA-CR-195096] p 2310 N94-24070
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 4: Oil/Gas Pipeline
[AD-A273665] p 2250 N94-25405
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5A: Corrosion: General issues
[AD-A273666] p 2250 N94-25406

CATIONS
Effects of ionizing radiation on modern ion exchange materials
[DE94-001569] p 2535 N94-24505
Free energy profiles for Li(+) and I(-) ions approaching Pt(100) surface: A molecular dynamics study
[AD-A273455] p 2536 N94-24675
Electrochemical and electronic properties of neural and oxidized soluble orthogonally-fused thiophene oligomers
[AD-A273283] p 2260 N94-24815

CAUCHY PROBLEM
Periodic nonlinear Schroedinger equation and invariant measures
[PB93-238012] p 2487 N94-23775
Cauchy problem for periodic KDV-type equations
[PB93-238020] p 2487 N94-23776
A numerical investigation of the artificial compressibility method for the solution of the Navier-Stokes equations
[CRANFIELD-AERO-9213] p 2340 N94-25486

CAUCHY-RIEMANN EQUATIONS
Extension problem for generalized multi-monogenic functions in Clifford analysis
[DE93-616818] p 2493 N94-25433

CAVITATION FLOW
Computational fluid dynamic modelling of cavitation
p 2215 N94-23060
Hydro-elastic analysis using a selection of commercial analysis programs
[PB94-118734] p 2376 N94-24478

CAVITIES
Spontaneous pneumothorax, cysts and bullae
p 2425 N94-23326
Experimental cavity pressure measurements at subsonic and transonic speeds. Static-pressure results
[NASA-TP-3358] p 2169 N94-24464

CAVITY RESONATORS
Optimization of energy transfer in microwave electrothermal thrusters p 2216 N94-23065
CFD modeling of microwave electrothermal thrusters
p 2216 N94-23066
An active antenna for ELF magnetic fields
p 2303 N94-25192

CELESTIAL MECHANICS
Comparison of time integration methods for the evolution of galaxies
[PB94-111671] p 2602 N94-24522

CELL CATHODES
Advanced research and technology development of MCFCs
[DE94-001918] p 2389 N94-22723
Overcharge and overdischarge protection of ambient temperature secondary lithium cells
[NASA-CASE-NPO-18343-1-CU] p 2310 N94-23823

CELLS (BIOLOGY)
Cellular and tissue injury during nonfreezing cold injury and frostbite
[AD-A270883] p 2423 N94-22732
Measuring the dynamics of structural changes in biological macromolecules from light scattering data
p 2422 N94-24426
Photonic technology for implementation of generalizable neural networks: A synthetic approach
[AD-A273497] p 2474 N94-24622
An exploratory stochastic model for toxic effects on cells
[AD-A273438] p 2422 N94-25146
Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357
Design and testing of a unique randomized gravity, continuous flow bioreactor p 2423 N94-25368

CELLULOSE
Composite fiber structures for catalysts and electrodes
p 2393 N94-23364

CEMENTS
Alternatives for reinforcement: Fiber composites
[VTT-TIED-1412] p 2230 N94-25386

CENTAUR LAUNCH VEHICLE
Liquid rocket propulsion: Retrospective and prospects
p 2154 N94-24243

CENTER OF GRAVITY
Mass properties measurement system dynamics
p 2368 N94-23235
Mass properties measurement system: Dynamics and statics measurements p 2368 N94-23236

CENTER OF MASS
Mass properties measurement system dynamics
p 2368 N94-23235

CENTRAL NERVOUS SYSTEM
A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure
[AD-A273488] p 2427 N94-24950

CENTRAL PROCESSING UNITS
ATOS-1: Designing the infrastructure for an advanced spacecraft operations system p 2197 N94-23849
Transputer benchmarks and performance comparisons with other computing machines
[RR-467] p 2446 N94-25312

CENTRIFUGAL COMPRESSORS
Gas turbine and operating method of the same
[CA-PATENT-APPL-SN-2043039] p 2188 N94-24490

CERAMIC COATINGS
Fire-resistant barriers for composite materials
[AD-D016014] p 2230 N94-24735
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072
Plasma sprayed thermal barrier coatings: Production, characterization and testing
[ISBN-9-03-860082-8] p 2555 N94-25439

CERAMIC FIBERS
Development of silicon nitride composites with continuous fiber reinforcement
[DE94-001996] p 2227 N94-23022
Ceramic silicon-boron-carbon fibers from organic silicon-boron-polymers
[NASA-CASE-ARC-11956-1-SB] p 2253 N94-23311
An overview on the main available ceramic composites and their processing routes p 2255 N94-24229

CERAMIC MATRIX COMPOSITES
A numerical analysis of crack propagation in microcracking ceramic and ceramic composites
[DE94-001192] p 2253 N94-23183
Engine materials characterization and damage monitoring by using x ray technologies
[NASA-TP-3328] p 2372 N94-24074
Glass-ceramic Li-Al-Si-O composition and process for its production
[CA-PATENT-APPL-SN-2043757] p 2254 N94-24129
Introduction of Ceramics into Aerospace Structural Composites
[AGARD-R-795] p 2255 N94-24228
An overview on the main available ceramic composites and their processing routes p 2255 N94-24229
Ceramic matrix composites: Challenges and opportunities p 2255 N94-24230
Interface evaluation in ceramic composites
p 2255 N94-24231
Micromechanical failure modes in brittle matrix composites p 2255 N94-24232
Micromechanical characterization of ceramic-matrix composites using the instrumented microindentation technique p 2256 N94-24233
Role of interfaces on the cyclic fatigue behaviour of ceramic matrix composites p 2256 N94-24234
Mechanical behavior of CMCs: Crack growth resistance and creep aspects p 2256 N94-24235
Microstructure and micromechanical behaviour of CMCs p 2256 N94-24236
Ceramic matrix composite parts design
p 2256 N94-24237
CMC design consequences p 2256 N94-24238
Integrated approach in modelling, testing, and design of gradient-CVI derived CMC components
p 2256 N94-24239
Ultrasonic nondestructive evaluation as a tool for the development of aerospace structural ceramic composites p 2257 N94-24240
The effects of anisotropy on the nonlinear behavior of bridged cracks in long strips
[NASA-CR-194453] p 2377 N94-24604
Nanodesigning of hierarchical multifunctional ceramics
[AD-A273466] p 2257 N94-24677

CERAMICS
Gas-pressure forming of superplastic ceramic sheet
[DE94-001520] p 2252 N94-22930
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis
[PB93-217982] p 2347 N94-22982
A numerical analysis of crack propagation in microcracking ceramic and ceramic composites
[DE94-001192] p 2253 N94-23183
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184
Theoretical considerations for Reaction-Formed Silicon Carbide (RFSC) formation by molten silicon infiltration into slurry-derived preforms
[NASA-TM-106414] p 2222 N94-23500
Combustion synthesis and engineering of nanoparticles for electronic, structural and superconductor applications
[DE94-001865] p 2254 N94-23720
Development of a theory of the wear of ceramics
[DE94-002773] p 2254 N94-23783
Metal-mullite reactions
[DE94-002038] p 2244 N94-23811
The tribology of some MoS2-lubricated engineering ceramics p 2356 N94-23993
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090
Introduction of Ceramics into Aerospace Structural Composites
[AGARD-R-795] p 2255 N94-24228
Integrated approach in modelling, testing, and design of gradient-CVI derived CMC components
p 2256 N94-24239
Superconducting energy storage
[DE94-002248] p 2395 N94-24654
Nanodesigning of hierarchical multifunctional ceramics
[AD-A273466] p 2257 N94-24677
Durability evaluation of ceramic components using CARES/LIFE
[NASA-TM-106475] p 2258 N94-24682
Ferroelectric thin films 3
[AD-A273394] p 2565 N94-25027
Conformal method of fabricating and optical waveguide on a semiconductor substrate
[AD-D015988] p 2546 N94-25043
Nuclear magnetic resonance imaging with short gradient pulses
[AD-D016006] p 2537 N94-25047
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072
Preparation and properties of translucent gamma-aluminium oxynitride
[ETN-94-95305] p 2263 N94-25281
Evaluation of multiaxial fracture models for technical ceramics
[ISBN-9-03-860192-1] p 2263 N94-25299
Critical currents in YBaCuO-ceramics
[DE93-617140] p 2263 N94-25404
The complete stress field due to a dislocation located anywhere in two bonded quarter planes
[OUEL-1990/93] p 2379 N94-25478
The pressure loaded volumetric ceramic receiver 500 kW version design and construction
[DLR-MITT-93-02] p 2396 N94-25479

CEREBRAL CORTEX
Customizable VLSI artificial neural network chips based on a novel technology
[DE94-001418] p 2307 N94-23008

CERIUM
Spin-hole doping in the Kondo insulator Ce3Bi4Pt3 studied by neutron scattering
[DE93-040107] p 2557 N94-22925

CERIUM COMPOUNDS
Electronic structure and high pressure phase transition in LaSb and CeSb
[DE93-617051] p 2567 N94-25423

CERIUM OXIDES
Anomalous magnetoresistance behavior of superconducting Nd(2-x)Ce(x)CuO(4-y) single crystal
[DE94-000806] p 2558 N94-22941

CERMETS
Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346

CERTIFICATION
Formal methods and digital systems validation for airborne systems
[NASA-CR-4551] p 2466 N94-23293
Aircraft evacuation testing: Research and technology issues
[PB94-107620] p 2173 N94-24750
Pilot-vehicle interface handbook, chapter 19. Volume 2: Digital systems validation
[DOT/FAA/CT-88/10-VOL-2] p 2438 N94-24830

CESIUM IODIDES
CsI(Tl)-photodiode detectors for spectroscopy at low radiation levels
[MPI-PHE/92-22] p 2314 N94-25457

CHAINS
Algorithm on addition chains with restricted memory
[PB94-118692] p 2454 N94-23759

CHANGE DETECTION
VLSI-based video event triggering for image data compression
[NASA-TM-106500] p 2345 N94-25116

CHANNEL FLOW
Turbulent separated flows above an obstacle in an open channel p 2316 N94-22859
Flow visualization study in high aspect ratio cooling channels for rocket engines p 2213 N94-23049
CFD analyses of coolant channel flowfields
p 2214 N94-23050
Optimal feedback control of turbulent channel flow
p 2327 N94-24139
Large eddy simulation of a boundary layer with concave streamwise curvature p 2328 N94-24146
Dynamic localization and second-order subgrid-scale models in large eddy simulations of channel flow
p 2329 N94-24149
Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164
A vorticity dynamics based model for the turbulent dissipation: Model development and validation
[NASA-TM-106177] p 2336 N94-24713

CHANNELS (DATA TRANSMISSION)
Land mobile satellite propagation measurements in Japan using ETS-V satellite p 2282 N94-22790
Measurements on the satellite-mobile channel at L and S bands p 2282 N94-22791
Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793
Improved frame synchronization schemes for INMARSAT-B/M SCPC and TDM channels
p 2285 N94-22806
A protocol for satellite access via use of spot-beams
p 2286 N94-22811
System services and architecture of the TMI satellite mobile data system p 2286 N94-22817
Transmission over EHF mobile satellite channels
p 2287 N94-22820
Low rate data bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems
[NASA-TM-109408] p 2208 N94-23480
High-rate data link general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT satellite systems
[NASA-TM-109384] p 2208 N94-23481

CHAOS
Chaos in plasma simulation and experiment
[DE94-001574] p 2549 N94-22963
Chaotic phenomena in plasma, 2
[DE93-508286] p 2549 N94-22964
Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data
[DE94-001575] p 2550 N94-23211
On the estimation of the correlation dimension and its application to radar reflector discrimination
[NASA-CR-4564] p 2309 N94-23304
Lacunary series as quadratic differentials in conformal dynamics
[PB93-238061] p 2481 N94-23547
EEG and chaos: Description of underlying dynamics and its relation to dissociative states
[NASA-CR-195171] p 2428 N94-24799
Validating identified nonlinear models with chaotic dynamics
[RR-469] p 2523 N94-25314
Controlling regular and chaotic dynamics in the Duffing-Ueda oscillator
[RR-477] p 2523 N94-25323
Correlations in the actions of periodic orbits derived from quantum chaos
[DE93-616866] p 2571 N94-25340

CHARACTER RECOGNITION
Image remapping strategies applied as protheses for the visually impaired p 2444 N94-25363

CHARACTERIZATION
Chemical characterization of some aerobic liquids in CELSS p 2422 N94-23241
Joint Acoustic Propagation Experiment (JAPE-91) Workshop
[NASA-CP-3231] p 2526 N94-24207
Ground characterization for JAPE
p 2527 N94-24213
Seafloor characterization/Galapagos propagating rift
[AD-A273586] p 2419 N94-25165
Metallic multilayers: Experimental investigation of magnetic anisotropy and magnetic interlayer coupling
[ETN-94-95364] p 2250 N94-25242
The structure and catalytic properties of supported platinum catalysts
[ETN-94-95357] p 2236 N94-25250

CHARGE CARRIERS
Photo-induced antiferromagnetic interlayer coupling in Fe superlattices with iron silicide spacers
[DE94-001345] p 2559 N94-22995

CHARGE COUPLED DEVICES
Characterization of CCD-based imaging x ray detectors for diffraction experiments
[DE93-041343] p 2556 N94-22921
Development of a power electronics unit for the Space Station plasma contactor
[NASA-TM-106486] p 2222 N94-25201
Data analysis and interpretation of lunar dust exosphere p 2623 N94-25349
CHARGE EXCHANGE
Pions and neutrinos as probes of the nucleon and nuclear few-body system
[DE93-040127] p 2531 N94-22928
CHARGE TRANSFER
High-T(c) superconducting superlattices
[DE93-019200] p 2556 N94-22864
Pions and neutrinos as probes of the nucleon and nuclear few-body system
[DE93-040127] p 2531 N94-22928
Anisotropic uniaxial pressure effects in YBa2Cu3O(7-delta)
[DE94-001456] p 2557 N94-22929
Strong interactions studies with medium energy probes
[DE94-001446] p 2540 N94-23791
Photoinduced charge separation in solid state and molecular systems
[DE94-001727] p 2563 N94-24537
CHARGED PARTICLES
Measuring electrically charged particle fluxes in space using a fiber optic loop sensor
[NASA-CR-191328] p 2544 N94-23829
CHARM (PARTICLE PHYSICS)
Strong interactions studies with medium energy probes
[DE94-001446] p 2540 N94-23791
CHARPY IMPACT TEST
Irradiation damage behavior of low alloy steel wrought and weld materials
[DE94-000519] p 2239 N94-22999
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184
Weldability of Accelerated-Cooled (AcC) high strength TMCP steel X80
[VTT-TIED-1413] p 2251 N94-25419
CHARRING
Laser soldering of Sn plated brass integrator assembly housings
[DE94-001149] p 2270 N94-23790
Postflight hardware evaluation RSRM-29 (STS-54). Appendix D: Nozzle postfire data
[NASA-CR-193898] p 2199 N94-24057
Micromechanical simulation of damage progression in carbon phenolic composites p 2231 N94-24446
CHEBYSHEV APPROXIMATION
Implementation and parallelization of fast matrix multiplication for a fast Legendre transform
[DE94-002184] p 2478 N94-22975
On the Gibbs phenomenon 3: Recovering exponential accuracy in a sub-interval from a spectral partial sum of a piecewise analytic function
[NASA-CR-191560] p 2480 N94-23278
Relaxation schemes for Chebyshev spectral multigrid methods p 2484 N94-23688
Generalized Gaussian quadrature rules for systems of arbitrary functions
[AD-A273610] p 2491 N94-24947
CHECKOUT
SATCOM simulator speeds MSS deployment and lowers costs p 2287 N94-22822
CHEMICAL ANALYSIS
Correlated petrographic, electron microprobe, and ion microprobe studies of selected primitive and processed phase assemblages in meteorites
[NASA-CR-194827] p 2601 N94-23499
SALI chemical analysis of provided samples
[NASA-CR-194138] p 2232 N94-23524
Chemically sensitive interfaces on SAW devices
[DE94-001832] p 2526 N94-23718
An analytical ultra-high vacuum tribometer for solid lubricant studies p 2361 N94-24033
Polytopic vector analysis in igneous petrology: Application to lunar petrogenesis p 2615 N94-24368
The chemistry of particulate formation in fluorocarbon plasmas
[DE94-001500] p 2552 N94-24546
Fifty years of continuous improvement: What has DOE done for analytical chemistry?
[DE94-002539] p 2234 N94-24548
Bioregenerative life support systems for microgravity
[NASA-CR-195516] p 2422 N94-24810
The evolution of energy-transducing systems. Studies with archaebacteria
[NASA-CR-195129] p 2422 N94-24811
CHEMICAL BONDS
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis
[PB93-217982] p 2347 N94-22982
Density functional studies: First principles and semi-emperical calculations of clusters and surfaces
[DE94-002836] p 2561 N94-23214
Planar poly(p-phenylene) derivatives: Ladder formation for maximization of extended conjugation
[AD-A273220] p 2260 N94-24922
CHEMICAL COMPOSITION
Relationship of microstructure and mechanical properties for V-Cr-Ti alloys
[DE94-001431] p 2238 N94-22718
Coronal abundances and their variation
[NASA-CR-194811] p 2626 N94-23276
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
Catalog of Apollo 17 rocks. Volume 1: Stations 2 and 3 (South Massif)
[NASA-CR-194854] p 2613 N94-24058
Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts
p 2614 N94-24365
Melt rock components in KREEPy breccia 15205: Petrography and mineral chemistry of KREEP basalts and quartz-normative mare basalts p 2616 N94-24372
Demonstration of the feasibility of an integrated x ray laboratory for planetary exploration
[NASA-CR-177631] p 2598 N94-24832
CHEMICAL EFFECTS
Effects of ionizing radiation on modern ion exchange materials
[DE94-001569] p 2535 N94-24505
CHEMICAL ENGINEERING
Liapunov stability in chemical engineering
[MATHS-REPT-A-184] p 2236 N94-25427
CHEMICAL EQUILIBRIUM
Study of improved methods for predicting chemical equilibria
[DE94-001647] p 2568 N94-22719
Development of durable high-temperature catalysts for natural gas combustion
[PB93-226447] p 2232 N94-23477
CHEMICAL EVOLUTION
SETI: Search for extraterrestrial intelligence. An international interdisciplinary seminar, star days
[PB93-230597] p 2444 N94-23754
CHEMICAL FRACTIONATION
Basaltic Volcanism and Ancient Planetary Crusts
[NASA-CR-193151] p 2614 N94-24363
CHEMICAL PROPERTIES
Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772
Investigation of the ultrafiltration technique using military greases
[AD-A273633] p 2261 N94-25029
CHEMICAL PROPULSION
NASA Propulsion Engineering Research Center, volume 2
[NASA-CR-194719-VOL-2] p 2209 N94-23028
Performance assessment of low pressure nuclear thermal propulsion p 2217 N94-23070
CHEMICAL REACTIONS
Economics of electron beam and electrical discharge processing for post-combustion NO(x) control in internal combustion engines
[DE93-019574] p 2351 N94-22865
Organometallic chemistry of bimetallic compounds
[DE94-002313] p 2238 N94-22897
Di(hydroxyphenyl)- 1,2,4-triazole monomers
[NASA-CASE-LAR-14440-2] p 2252 N94-23075
Reburning rich-lean kinetics
[PB93-220887] p 2232 N94-23100
Phase transformations in Cu-Zr multilayers
[DE94-000393] p 2241 N94-23297
Reduction of nitric oxide over platinum, rhodium and platinum-rhodium single crystal surfaces
[PB93-230092] p 2232 N94-23482
Reactivity of ambident anions in the gas phase
[PB93-232189] p 2533 N94-23713
Energy transfer in solid explosives
[DE94-001523] p 2265 N94-23778
Metal-mullite reactions
[DE94-002038] p 2244 N94-23811
Hot hydrogen testing of metallic turbo pump materials
[NASA-CR-193880] p 2244 N94-24066
Fracture kinetics analysis of empirical and semi-empirical corrosion fatigue relations p 2159 N94-24277
Convective instabilities in traveling fronts of addition polymerization p 2226 N94-24352
The chemistry of particulate formation in fluorocarbon plasmas
[DE94-001500] p 2552 N94-24546
Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772
Collection and evaluation of numerical models with the aim to investigate the impact of aircraft emissions
[DLR-MITT-93-06] p 2400 N94-25414
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations
[AD-A273662] p 2251 N94-25449
CHEMICAL REACTORS
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis
[PB93-217982] p 2347 N94-22982
CHEMICAL VAPOR INFILTRATION
An overview on the main available ceramic composites and their processing routes p 2255 N94-24229
CMC design consequences p 2256 N94-24238
Integrated approach in modelling, testing, and design of gradient-CVI derived CMC components
p 2256 N94-24239
CHEMICAL WARFARE
Operation Friction: Development and introduction of personal cooling for CH124 Sea King aircrew
[DCIEM-93-06] p 2433 N94-24119
CHEMILUMINESCENCE
Capillary electrokinetic separations with optical detection
[DE94-001639] p 2233 N94-23716
CHEMISORPTION
Diffusion on Cu surfaces p 2251 N94-24428
Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790
CHEMOTHERAPY
Synthesis and in-vivo detection of boronated compounds for use in BNCT
[DE94-001899] p 2233 N94-23780
CHEST
Spontaneous pneumothorax, cysts and bullae
p 2425 N94-23326
CHICKENS
Evaluation of ovostatin and ovostatin assay
p 2422 N94-24437
CHINA
Activities of Academia Sinica
[DE93-614529] p 2541 N94-25335
CHIPS (ELECTRONICS)
A CDMA synchronisation scheme
p 2285 N94-22810
Towards the formal specification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191465] p 2466 N94-23252
The HDTV digital audio matrix
[BBC-RD-1993/9] p 2295 N94-24085
SEMATECH, a case study: Analysis of a government-industry partnership
[AD-A273166] p 2586 N94-24683
Crosstalk analysis of synchronous and asynchronous optical chip interconnects with direct detection
[AD-A273261] p 2311 N94-24685
CHIRAL DYNAMICS
Proceedings of the 1993 Bi-Isotropics Workshop on Novel Microwave Materials
[PB93-224772] p 2290 N94-23225
Weak interactions in a bilocal chiral theory
[DE93-616887] p 2539 N94-25477
CHIRP SIGNALS
Choice of filters for the detection of gravitational waves from coalescing binaries. 2: Detection in coloured noise
[DE93-616844] p 2604 N94-25211
CHLORIDES
Investigation of evolution-related aspects of bacterial rhodopsins
[NASA-CR-194826] p 2420 N94-23501
CHLORINE
A high performance H2-Cl2 fuel cell for space power applications p 2394 N94-23366
Structures of Cl(-)(H2O)(n) and F(-)(H2O)(n) (n equal to 2,3...15) clusters: Molecular dynamics computer simulations
[AD-A273474] p 2537 N94-24940
CHLORINE COMPOUNDS
FTIR quantification of industrial hydraulic fluids in perchloroethylene p 2264 N94-23243
CHLOROFLUOROCARBONS
US Department of Energy phaseout of CFC-refrigerants
[DE94-001668] p 2397 N94-23016

Design of a vehicle based system to prevent ozone loss
[NASA-CR-195498] p 2180 N94-24479
Ozone depletion, paradigms, and politics
[DE94-001600] p 2398 N94-24506

CHLOROPHYLLS
Algorithm-development activities
[NASA-CR-193225] p 2420 N94-23538

CHOLESTEROL
Structure of cholesteryl-4-vinylbenzoate
[AD-A273686] p 2567 N94-25441

CHOLINE
Interaction of tacrine at M(1) and M(2) cholinoceptors in guinea pig brain p 2421 N94-24294

CHOLINERGICS
Interaction of tacrine at M(1) and M(2) cholinoceptors in guinea pig brain p 2421 N94-24294

CHROMIUM ALLOYS
Relationship of microstructure and mechanical properties for V-Cr-Ti alloys
[DE94-001431] p 2238 N94-22718
Effect of neutron irradiation on tensile properties of V-Cr-Ti alloys
[DE94-001433] p 2240 N94-23194
Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784

CHROMOSPHERE
Some challenging problems of the structured and dynamical solar atmosphere p 2624 N94-22838
The calculation of theoretical chromospheric models and the interpretation of solar spectra from rockets and spacecraft
[NASA-CR-195083] p 2626 N94-23569
Excitation of XUV radiation in solar flares
[NASA-CR-193703] p 2627 N94-24094
The resonance lines of MG2 as diagnostics of the upper solar chromosphere
[NASA-CR-195084] p 2627 N94-24300
Chromospheric activity in agol binaries
[AD-A273546] p 2602 N94-24557

CHRONOLOGY
Orbital debris and near-Earth environmental management: A chronology
[NASA-RP-1320] p 2598 N94-24644

CINEMATOGRAPHY
Quantitative assessment of human motion using video motion analysis p 2436 N94-24203

CIRCUIT BOARDS
PULSAUR 2
[NASA-CR-194832] p 2209 N94-23484
Digital data, composite video multiplexer and demultiplexer boards for an IBM PC/AT compatible computer p 2447 N94-25377
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2
[AD-A273703] p 2463 N94-25456

CIRCUIT PROTECTION
A review of wiring system safety in space power systems
[NASA-CR-194439] p 2203 N94-23632

CIRCUIT RELIABILITY
Formal verification of digital circuits described in VHDL
[ETN-94-95165] p 2306 N94-22883
A review of wiring system safety in space power systems
[NASA-CR-194439] p 2203 N94-23632

CIRCUITS
Progress on the design of a data push architecture for an array of optimized time tagging pixels
[DE93-041011] p 2307 N94-22955
Performance analysis of the combined EDS maglev propulsion, levitation, and guidance system
[DE94-001346] p 2352 N94-22996
Calibration block for digital beam forming antenna
[PB93-204550] p 2294 N94-23773
Worst case analysis: Earth sensor assembly for the tropical rainfall measuring mission observatory
[NASA-CR-189320] p 2311 N94-24754
From circuit to signal: Development of a piecewise linear simulator
[ISBN-9-09-005713-7] p 2462 N94-25263

CIRCULAR CYLINDERS
Buckling of circular cylindrical shells subjected to combined loads (axial compression, normal pressure, bending and transverse shear loading)
[PB93-215358] p 2378 N94-24745
Unified approach for incompressible flows
p 2342 N94-25356

CIRCULAR ORBITS
Global coverage Mobile Satellite Systems: System availability versus channel propagation impairments
p 2284 N94-22798
Steady motions of rigid body satellites in a central gravitational field
[AD-A273742] p 2206 N94-25532

CIRCULAR POLARIZATION
Germanium x ray phase plates for the production of circularly polarized x rays
[DE94-002908] p 2545 N94-24550

CITIES
Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS
p 2283 N94-22795
Propagation model for the Land Mobile Satellite channel in urban environments p 2283 N94-22796
A prediction model of signal degradation in LMSS for urban areas p 2284 N94-22797
Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop
[PB93-220135] p 2407 N94-23129

CIVIL AVIATION
Simplified, inverse, ejector design tool
[NASA-CR-194438] p 2166 N94-23511
Vision impairment and corrective considerations of civil airmen
[DOT/FAA/AM-93/21] p 2426 N94-23623
The atmospheric effects of stratospheric aircraft: A third program report
[NASA-RP-1313] p 2398 N94-24104
An experimental investigation of a Mach 3.0 high-speed civil transport at supersonic speeds
[NASA-TP-3365] p 2169 N94-24311
Information systems strategy in air transport
[AD-A273125] p 2173 N94-24781
Annual review of aircraft accident data. US general aviation calendar year 1990
[PB94-126869] p 2173 N94-24841
Aviation: The timeless industry p 2165 N94-25068
US general aviation: The ingredients for a renaissance. A vision and technology strategy for US industry, NASA, FAA, universities p 2162 N94-25097

CLADDING
Evaluation of inorganic zinc-rich primers using Electrochemical Impedance Spectroscopy (EIS)
p 2237 N94-23233
Weld cladding of hard surfaces
[PB93-201598] p 2353 N94-23448
Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor
[DE94-000331] p 2543 N94-23461
Analysis for the computational modeling of finite cladding and lossy coating effects in fibers
[PB94-111085] p 2544 N94-23732

CLAMPS
Multipurpose clamping device with electrical connector for in orbit attachment of payloads p 2361 N94-24035
Analysis of impactor residues in tray clamps from the Long Duration Exposure Facility. Part 2: Clamps from Bay B of the satellite
[NASA-TM-104784] p 2386 N94-24095

CLASSICAL MECHANICS
On the connection of classical mechanics, physical kinetics and quantum theory
[DE93-616823] p 2570 N94-25207

CLASSIFICATIONS
Security aspects of space operations data
p 2515 N94-23937
Method for selection of wavelength bands for multispectral classification
[PB93-204378] p 2388 N94-24741
Evaluation of the use of remote-sensing data to identify crop types and estimate irrigated acreage, Uvalde and Medina Counties, Texas, 1989
[PB93-193159] p 2388 N94-24809
An AVHRR cloud classification database typed by experts
[AD-A273560] p 2416 N94-25162
Remote vibration measurements at a sud aviation alouette 3 helicopter with a CW CO2-laser system
[AD-A273818] p 2190 N94-25516

CLASSIFIERS
Preliminary analysis of the JAPE ground vehicle test data with an artificial neural network classifier
p 2529 N94-24222

CLAYS
Demonstration of the feasibility of an integrated x ray laboratory for planetary exploration
[NASA-CR-177631] p 2598 N94-24832
Drying deformable media: Kinetics, shrinkage and stresses
[ETN-94-95314] p 2236 N94-25302

CLEANERS
Aqueous alkaline cleaners: An alternative to organic solvents
[AD-A273510] p 2260 N94-24848

CLEANING
Aqueous alkaline cleaners: An alternative to organic solvents
[AD-A273510] p 2260 N94-24848

CLEARANCES
Combined 1991 and 1992 Robinson-22B (R-22) parking test results
[AD-A273550] p 2193 N94-24559

CLIMATE
Overview of global greenhouse effects
[DE93-041165] p 2396 N94-22887
Climate variability in a coupled GCM. Part 2: The Indian Ocean and monsoon
[MPIM-104] p 2401 N94-23159
Modal structure of variations in the tropical climate system. Part 2: Origins of the low-frequency mode
[MPIM-96] p 2407 N94-23199
Uncertainties in climate data sets
[NASA-CR-194848] p 2408 N94-23577
Northern hemisphere tropospheric mid-latitude circulation after violent volcanic eruptions
[MPIM-107] p 2403 N94-24491
Multiannual simulations with the Mars climate model
p 2618 N94-24881

CLIMATE CHANGE
Catalog of data bases and reports
[DE93-040597] p 2588 N94-22875
Overview of global greenhouse effects
[DE93-041165] p 2396 N94-22887
Monte Carlo climate change forecasts with a global coupled ocean-atmosphere model
[MPIM-97] p 2407 N94-23156
Lightning, atmospheric electricity, and climate change
[DE94-002003] p 2408 N94-23471
GEWEX p 2385 N94-23614
Performance of the Carbon Dioxide Information Analysis Center (CDIAC)
[DE94-002190] p 2397 N94-23794
Mission operations update for the restructured Earth Observing System (EOS) mission p 2499 N94-23839
GEWEX Continental-scale International Project (GCIP)
p 2411 N94-24376
Snow modeling, water resources, climate change
[PB93-201770] p 2399 N94-24633
Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167
Collection and evaluation of numerical models with the aim to investigate the impact of aircraft emissions
[DLR-MITT-93-06] p 2400 N94-25414

CLIMATOLOGY
Monte Carlo climate change forecasts with a global coupled ocean-atmosphere model
[MPIM-97] p 2407 N94-23156
Modes of ocean variability in the tropical Pacific as derived from Geosat altimetry
[MPIM-103] p 2382 N94-23158
Climate variability in a coupled GCM. Part 2: The Indian Ocean and monsoon
[MPIM-104] p 2401 N94-23159
Evaluating NOAA satellite products for global climate monitoring p 2384 N94-23604
Cloud-free aerosol optical depth determination over oceans from satellite radiometry
[DE94-001897] p 2386 N94-23779
GEWEX Continental-scale International Project (GCIP)
p 2411 N94-24376
GEWEX Cloud Systems Study (GCSS)
p 2411 N94-24377
GEWEX Water Vapor Project (GVaP)
p 2411 N94-24378
Atmospheric Radiation Measurement (ARM)/CART site p 2411 N94-24379
Scientific goals of the Cooperative Multiscale Experiment (CME) p 2411 N94-24381
Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387
Observational case studies and diagnostic analyses of long-lived large-amplitude inertia-gravity waves
[AD-A273545] p 2404 N94-24794
The annual pressure cycle on Mars: Results from the LMD Martian atmospheric general circulation model
p 2619 N94-24884
Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992
[AD-A273400] p 2416 N94-25071
Wind climate and urban geometry
[ISBN-9-03-860132-8] p 2416 N94-25261

CLINICAL MEDICINE
Arterial hypertension and the aviator
p 2425 N94-23328

Autogenic-feedback training: A potential treatment for post-flight orthostatic intolerance in aerospace crews [NASA-TM-108785] p 2426 N94-24102

Annual research progress report, fiscal year 1992. Volume 2: Department of Clinical Investigation [AD-A273584] p 2427 N94-24945

CLOCKS

Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805

CLOSED ECOLOGICAL SYSTEMS

Chemical characterization of some aerobic liquids in CELSS p 2422 N94-23241

Recent advances in SPE (tm) water electrolyzer p 2393 N94-23362

Microbial biofilm formation and its consequences for the CELSS program [NASA-CR-195146] p 2438 N94-24706

Bioregenerative life support systems for microgravity [NASA-CR-195516] p 2422 N94-24810

Robotics in a controlled, ecological life support system p 2444 N94-25371

CLOSURE LAW

Reliability in second moment turbulence closures revisited [NASA-TM-106469] p 2326 N94-24063

Toward modeling wingtip vortices p 2171 N94-24142

CLOUD COVER

Convective organization in the Pacific ITCZ: Merging OLR, TOVS, and SSM/I information [NASA-CR-194850] p 2408 N94-23619

Atmospheric Radiation Measurement (ARM)/CART site p 2411 N94-24379

Session on modeling of radiative transfer processes p 2414 N94-24397

Session on coupled atmospheric/chemistry coupled models p 2414 N94-24398

Impact of the CO2 and H2O clouds of the Martian polar hood on the polar energy balance p 2618 N94-24880

CLOUD PHYSICS

NOAA Federal/State Cooperative Program in Atmospheric Modification Research. Collected publication titles and abstracts [PB93-198125] p 2396 N94-22913

A regional analysis of cloudy mean spherical albedo over the marine stratocumulus region and the tropical Atlantic Ocean [NASA-CR-194771] p 2409 N94-24049

GEWEX Cloud Systems Study (GCSS) p 2411 N94-24377

Joint sessions on moisture processes and cumulus parameterization p 2414 N94-24393

Session on cumulus parameterization p 2414 N94-24394

LRAT: Lightning Radiative Transfer p 2416 N94-24443

A study of cloud motions on Mars. 2: Some examples of observations and analyses since 1969 p 2620 N94-24891

CLOUD SEEDING

NOAA Federal/State Cooperative Program in Atmospheric Modification Research. Collected publication titles and abstracts [PB93-198125] p 2396 N94-22913

CLOUDS

Cloud, dust, and ozone vertical profiles from solar occultation measurements: Implications for dynamics p 2617 N94-24877

Shocked clouds in the Cygnus Loop [NASA-CR-195190] p 2600 N94-25178

CLOUDS (METEOROLOGY)

Chemistry on the mesoscale: Modeling and measurement issues p 2413 N94-24390

Further studies to extend and test the area-time-integral technique applied to satellite data [NASA-CR-195132] p 2415 N94-24705

A study of cloud motions on Mars. 2: Some examples of observations and analyses since 1969 p 2620 N94-24891

An AVHRR cloud classification database typed by experts [AD-A273560] p 2416 N94-25162

CLUSTER ANALYSIS

The adaptive resonance theory network: (Clustering-) behaviour in relation with brainstem auditory evoked potential patterns [EUT-92-E-264] p 2470 N94-22877

Process and representation in graphical displays p 2433 N94-24187

Designers' models of the human-computer interface p 2433 N94-24188

CLUTCHES

Electromagnetic brake/clutch device [NASA-CASE-GSC-13502-1] p 2354 N94-23969

CLUTTER

Precipitation measurement using SIR-C: A feasibility study [NASA-CR-195104] p 2409 N94-24048

Estimation of the rain signal in the presence of large surface clutter [NASA-CR-195105] p 2409 N94-24087

Precipitation measurement using SIR-C: A feasibility study. Investigation at nadir [NASA-CR-195103] p 2410 N94-24126

On the analysis of clear air radar echoes severely contaminated by clutter p 2306 N94-24423

Radar target discrimination by spectrum analysis [AD-D015982] p 2301 N94-25040

Radar target discrimination systems using artificial neural network topology [AD-D015984] p 2301 N94-25041

CMOS

Floating well based design methodology aimed to improve latch-up immunity in a CMOS/DMOS smart power technology [LAAS-93093] p 2556 N94-22905

A qualified radiation hardened nonvolatile memory for space and tactical weapons applications [DE94-001211] p 2559 N94-23186

COAGULATION

On the stability of the process of formation of combustion generated particles by coagulation and simultaneous shrinkage due to particle oxidation p 2159 N94-24274

The influence of flow type, particle type and gravity on orthokinetic coagulation [ETN-94-95333] p 2267 N94-25060

COAL DERIVED GASES

Contaminant effects in solid oxide fuel cells [DE94-002963] p 2395 N94-23785

COALESCING

BEM solution for the simulation of axisymmetric viscous sintering [PB93-237717] p 2336 N94-24761

COASTAL WATER

Nutrients and light as factors controlling phytoplankton biomass on the Dutch continental shelf (North Sea), 1988-1990 [PB94-111143] p 2418 N94-24601

COASTS

Analysis of vulnerability to the impacts of sea level rise: A case study for The Netherlands [PB94-111150] p 2399 N94-24573

COATING

Total light loss optic spectroscopy: Progress towards a fiber optic Raman organic vapor sensor [DE94-002545] p 2234 N94-24549

Birdstrike resistant crew enclosure program [AD-A273700] p 2463 N94-25453

COATINGS

Transparent conducting thin films for spacecraft applications [NASA-TM-106466] p 2218 N94-23370

Infrared analysis of vapor phase deposited tricresylphosphate (TCP) [NASA-TM-106423] p 2253 N94-23371

COAXIAL FLOW

A modelling of the noise from simple co-axial jets. Part 2: In a simulated flightstream [ISVR-TR-226] p 2525 N94-22959

COBALT ALLOYS

New extensions in the development of deformation processed metal-metal matrix composites [DE94-000692] p 2227 N94-23004

Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons [PB93-201531] p 2561 N94-23428

Metal band drives in spacecraft mechanisms p 2355 N94-23987

Robotic weld overlay coatings for erosion control [DE94-002665] p 2258 N94-24749

Comparative M-H characteristics of 1-5 and 2-17 type samarium-cobalt permanent magnets to 300 C [NASA-CR-194440] p 2312 N94-24870

COBALT COMPOUNDS

Magnetic properties of NdCo3 and its gamma phase hydride NdCo3H(4.1) [REPT-A-2655] p 2567 N94-25412

COBALT OXIDES

Applications of x ray absorption fine structure to the in situ study of the effect of cobalt in nickel hydrous oxide electrodes for fuel cells and rechargeable batteries p 2391 N94-23347

COCKPITS

Pilot-vehicle interface [DOT/FAA/CT-92/21] p 2430 N94-23083

Cockpit/NVG visual integration issues p 2432 N94-23983

Cockpit control system conceptual design [NASA-CR-195543] p 2190 N94-24551

Pilot-vehicle interface handbook, chapter 19. Volume 2: Digital systems validation [DOT/FAA/CT-88/10-VOL-2] p 2438 N94-24830

Cockpit control system [NASA-CR-195488] p 2190 N94-24957

Projected effectiveness of airbag supplemental restraint systems in US Army helicopter cockpits [AD-A273250] p 2174 N94-25141

Expert system rule-base evaluation using real-time parallel processing [AD-A273701] p 2469 N94-25454

CODE DIVISION MULTIPLE ACCESS

Adaptive digital beamforming for a CDMA mobile communications payload p 2274 N94-22743

A European mobile satellite system concept exploiting CDMA and OBP p 2279 N94-22768

ROCSAT-1 telecommunication experiments p 2279 N94-22770

ACTS advanced system concepts and experimentation p 2280 N94-22780

Odyssey personal communications satellite system p 2282 N94-22787

First satellite mobile communication trials using BLQS-CDMA p 2284 N94-22801

A CDMA synchronisation scheme p 2285 N94-22810

Diversity reception for advanced multi-satellite networks: A CDMA approach p 2286 N94-22816

Handover aspects for a Low Earth Orbit (LEO) CDMA Land Mobile Satellite (LMS) system p 2288 N94-22824

Reduced cost alternatives to premise wiring using ATM and microcellular technologies p 2314 N94-23239

CODERS

A high quality voice coder with integrated echo canceller and voice activity detector for mobile satellite applications p 2286 N94-22812

High resolution encoder-motor used in the orbital spin scan radiometer, GOES VAS satellites p 2209 N94-24038

Encoders for space applications p 2363 N94-24046

Error coding simulations p 2306 N94-24439

Evaluation of the efficiency and fault density of software generated by code generators p 2465 N94-24445

A constrained joint source/channel coder design and vector quantization of nonstationary sources [NASA-CR-195145] p 2301 N94-24707

A soft robot interface [OUEL-1948/92] p 2463 N94-25468

CODES

Algebraic-geometric codes and their decoding algorithms [ETN-94-95294] p 2491 N94-25079

CODING

A high quality voice coder with integrated echo canceller and voice activity detector for mobile satellite applications p 2286 N94-22812

Box codes of lengths 48 and 72 p 2292 N94-23265

Error coding simulations p 2306 N94-24439

A constrained joint source/channel coder design and vector quantization of nonstationary sources [NASA-CR-195145] p 2301 N94-24707

Algebraic-geometric codes and their decoding algorithms [ETN-94-95294] p 2491 N94-25079

On chain coding of line drawings [ISBN-9-06-275778-2] p 2462 N94-25252

COEFFICIENT OF FRICTION

Contact analysis of rough rail surfaces p 2270 N94-23589

New pin-on-disk equipment for vacuum tribometry p 2360 N94-24023

An analytical ultra-high vacuum tribometer for solid lubricant studies p 2361 N94-24033

An assessment of solid lubricant films for use in high temperature space applications p 2363 N94-24044

COEFFICIENTS

A technique to measure rotordynamic coefficients in hydrostatic bearings p 2215 N94-23061

Multigrid methods for differential equations with highly oscillatory coefficients p 2484 N94-23685

COERCIVITY

Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons [PB93-201531] p 2561 N94-23428

Comparative M-H characteristics of 1-5 and 2-17 type samarium-cobalt permanent magnets to 300 C [NASA-CR-194440] p 2312 N94-24870

COGNITION

Multi-sensoral approach to night flight: Perceptive and Cognitive limitations p 2432 N94-23981

Automation and cognition in air traffic control: An empirical investigation [DOT/FAA/AM-94/3] p 2176 N94-25444

COGNITIVE PSYCHOLOGY
Epistemic logic for defeasible reasoning using a meta-level architecture metaphor
[PB94-110723] p 2473 N94-23748
Mental images p 2429 N94-23980
Process and representation in graphical displays
p 2433 N94-24187
The use of analytical models in human-computer interface design p 2434 N94-24190
Automation and cognition in air traffic control: An empirical investigation
[DOT/FAA/AM-94/3] p 2176 N94-25444

COHERENCE
Ray and wave optics modeling of laboratory x ray lasers
[DE93-019940] p 2541 N94-22868

COHERENT RADAR
High latitude cusp signature observations for southward IMF B sub Z
[AD-A273801] p 2406 N94-25536

COHERENT RADIATION
High-order sum and difference-frequency generation in helium
[DE94-001064] p 2348 N94-23181

COLD DRAWING
Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550

COLD FLOW TESTS
SSME fuel preburner injector characterization
p 2211 N94-23037
Dual-bell altitude compensating nozzles
p 2215 N94-23057

COLD PLASMAS
Computational model of surface ablation from tokamak disruptions
[DE94-002204] p 2550 N94-23474
Stabilization of the external kink and other MHD issues
[DE94-001541] p 2552 N94-24502

COLD WATER
Survival suit for submarine personnel: Summary of evaluation studies
[PB93-204634] p 2430 N94-23743

COLD WEATHER
Cellular and tissue injury during nonfreezing cold injury and frostbite
[AD-A270883] p 2423 N94-22732

COLD WELDING
Static adhesion in preloaded contacts subjected to long-term vacuum exposure p 2363 N94-24043

COLD WORKING
Lubrication in cold rolling: Numerical simulation using multigrid techniques
[ISBN-9-09-005313-1] p 2262 N94-25230

COLLIMATORS
High energy collimating fine grids for HESP program
[NASA-CR-189317] p 2209 N94-24767

COLLISION AVOIDANCE
Control of a serpentine manipulator with collision avoidance p 2368 N94-23232

COLLISION PARAMETERS
Intramultiplet mixing for Ne(**)(3p)+He at superthermal energies
[ETN-94-95327] p 2538 N94-25240

COLLISIONAL PLASMAS
Characterization of heat transport and radiation hydrodynamics in collisional laser plasmas using collective Thomson scattering
[DE94-001502] p 2349 N94-23209

COLLISIONS
Method for simulating a vehicle shock test: Design and realization of the required implementation tools
[ECL-92-14] p 2352 N94-22885
Development of a droplet breakup model considering aerodynamic and droplet collision effects
p 2213 N94-23045

COLLOIDS
Nanodesigning of hierarchical multifunctional ceramics
[AD-A273466] p 2257 N94-24677

COLONIES
Symbiosis in marine luminous bacteria
[AD-A273540] p 2422 N94-24791

COLOR
Some background information on perceptual color matching pertinent to computer applications
[PB93-200327] p 2445 N94-23788
Automating a human factors evaluation of graphical user interfaces for NASA applications: An update on CHIMES
p 2443 N94-23936
Investigation on interval edge-coloring of graphs
[PB94-110913] p 2488 N94-24541

COLOR TELEVISION
Orbital docking system centerline color television camera system test
[NASA-TM-104783] p 2205 N94-24625

COLOR VISION
Some background information on perceptual color matching pertinent to computer applications
[PB93-200327] p 2445 N94-23788

COLORIMETRY
Some background information on perceptual color matching pertinent to computer applications
[PB93-200327] p 2445 N94-23788

COLUMBUS SPACE STATION
Mission activities planning for a Hermes mission by means of AI-technology p 2502 N94-23858
Columbus system support for telescience operations
p 2505 N94-23877
The Columbus logistics support at the APMC: Requirements and implementation aspects
p 2515 N94-23935

COMBINATORIAL ANALYSIS
Thermal analysis of combinatorial solid geometry models using SINDA p 2323 N94-23650
The Third Twente Workshop on Graphs and Combinatorial Optimization
[PB94-110947] p 2486 N94-23722
Discrete applied mathematics
[AD-A273552] p 2488 N94-24561
Combinatory reduction systems: Introduction and survey
[PB94-110582] p 2457 N94-24570
The Third Twente Workshop on Graphs and Combinatorial Optimization: Abstracts and late extended abstracts
[PB94-110954] p 2489 N94-24652
Sensitivity analysis of list scheduling heuristics
[PB93-237766] p 2468 N94-24764

COMBUSTIBLE FLOW
An experimental study of characteristic combustion-driven flows for CFD validation
p 2212 N94-23040
Study of streamwise vorticity-stirred combustion
[NASA-CR-194450] p 2234 N94-24565
Conservation equations for reacting gas flow
[PB94-111168] p 2334 N94-24574
HYPULSE combustor analysis
[NASA-CR-191579] p 2336 N94-24771

COMBUSTION
Evaporation and combustion of LOX under supercritical and subcritical conditions p 2211 N94-23035
Reburning rich-lean kinetics
[PB93-220887] p 2232 N94-23100
Calculation of flame spread on lining materials by the field model KAMELEON. Project 5 of the EUREFIC fire research programme
[PB93-201614] p 2268 N94-23450
Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion
[PB94-109873] p 2187 N94-23709
Extinguishment of combustible porous solids by water droplets
[PB93-198893] p 2270 N94-23740
Energy transfer in solid explosives
[DE94-001523] p 2265 N94-23778
Multiple shock initiation of LX-17
[DE94-001524] p 2265 N94-23807
Modelling the ignition of boron/titanium particles
p 2159 N94-24273

COMBUSTION CHAMBERS
CFD analyses of combustor and nozzle flowfields
p 2210 N94-23033
Axisymmetric single shear element combustion instability experiment p 2213 N94-23044
Numerical investigation of two- and three-dimensional heat transfer in expander cycle engines
p 2213 N94-23048
Computational Fluid Dynamics (CFD) applications in rocket propulsion analysis and design
p 2214 N94-23054
Shock tunnel studies of scramjet phenomena, supplement 7
[NASA-CR-191572] p 2319 N94-23513
Shock tunnel studies of scramjet phenomena, supplement 8
[NASA-CR-191573] p 2320 N94-23532
The 3-D CFD modeling of gas turbine combustor-integral bleed flow interaction p 2189 N94-23658
The 3-D numerical study of airflow in the compressor/combustor prediffuser and dump diffuser of an industrial gas turbine p 2324 N94-23660
Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion
[PB94-109873] p 2187 N94-23709
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
Altitude simulation facility for testing large space motors p 2156 N94-24255
Multiple flames in counterflow spray combustion
p 2161 N94-24284
CFD simulation of coaxial injectors
p 2342 N94-24430
Heat transfer in rocket engine combustion chambers and regeneratively cooled nozzles
[NASA-CR-195094] p 2220 N94-24471
STE thrust chamber technology: Main injector technology program and nozzle Advanced Development Program (ADP)
[NASA-CR-193919] p 2221 N94-25019

COMBUSTION CHEMISTRY
Fundamental limitations of non-thermal plasma processing for internal combustion engine NO(x) control
[DE93-019622] p 2351 N94-22866
Laser diagnostics for small rockets
p 2210 N94-23032
Fundamental study of NO(x) control in catalytic combustion
[PB94-112323] p 2398 N94-23818
Multiple flames in counterflow spray combustion
p 2161 N94-24284
HYPULSE combustor analysis
[NASA-CR-191579] p 2336 N94-24771
Influence of test configuration on the combustion characteristics of polymers as ignition sources
p 2238 N94-25365

COMBUSTION EFFICIENCY
Theory and computation of optimal low- and medium-thrust transfers
[NASA-CR-194812] p 2217 N94-23275
STE thrust chamber technology: Main injector technology program and nozzle Advanced Development Program (ADP)
[NASA-CR-193919] p 2221 N94-25019

COMBUSTION PHYSICS
Fundamental limitations of non-thermal plasma processing for internal combustion engine NO(x) control
[DE93-019622] p 2351 N94-22866
Laser diagnostics for small rockets
p 2210 N94-23032
Fundamental rocket injector/spray programs at the Phillips Laboratory p 2211 N94-23039
Numerical parametric studies of spray combustion instability p 2212 N94-23041
The ignition temperature of solid explosives exposed to a fire
[DE94-001047] p 2265 N94-23436
Field models: Their present and future application in fire safety engineering
[PB93-201622] p 2269 N94-23506
Shock tunnel studies of scramjet phenomena, supplement 7
[NASA-CR-191572] p 2319 N94-23513
Shock tunnel studies of scramjet phenomena, supplement 8
[NASA-CR-191573] p 2320 N94-23532
The combustion program at CTR
p 2237 N94-24155
Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275

COMBUSTION PRODUCTS
Economics of electron beam and electrical discharge processing for post-combustion NO(x) control in internal combustion engines
[DE93-019574] p 2351 N94-22865
Fundamental limitations of non-thermal plasma processing for internal combustion engine NO(x) control
[DE93-019622] p 2351 N94-22866
Reburning rich-lean kinetics
[PB93-220887] p 2232 N94-23100
Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion
[PB94-109873] p 2187 N94-23709
Fundamental study of NO(x) control in catalytic combustion
[PB94-112323] p 2398 N94-23818
On the stability of the process of formation of combustion generated particles by coagulation and simultaneous shrinkage due to particle oxidation p 2159 N94-24274
Alternative control techniques document: NOx emissions from stationary reciprocating internal combustion engines
[PB94-104494] p 2398 N94-24476
EPA's survey of in-use driving patterns: Implications for mobile source emission inventories
[PB94-118502] p 2399 N94-24525
The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics
[AD-A273164] p 2262 N94-25136
Influence of test configuration on the combustion characteristics of polymers as ignition sources
p 2238 N94-25365

COMBUSTION STABILITY

Fundamental rocket injector/spray programs at the Phillips Laboratory p 2211 N94-23039

Numerical parametric studies of spray combustion instability p 2212 N94-23041

Spray formation processes of impinging jet injectors p 2212 N94-23042

Inherent stability of central element coaxial liquid-liquid injectors p 2212 N94-23043

Axisymmetric single shear element combustion instability experiment p 2213 N94-23044

Development of a computational testbed for numerical simulation of combustion instability p 2213 N94-23046

Shear coaxial injector instability mechanisms p 2213 N94-23047

On the stability of the process of formation of combustion generated particles by coagulation and simultaneous shrinkage due to particle oxidation p 2159 N94-24274

Multiple flames in counterflow spray combustion p 2161 N94-24284

Stability of premixed laminar flames in a stagnation point flow to general disturbances [AD-A273429] p 2234 N94-24673

STE thrust chamber technology: Main injector technology program and nozzle Advanced Development Program (ADP) [NASA-CR-193919] p 2221 N94-25019

Research in progress and other activities of the Institute for Computer Applications in Science and Engineering [NASA-CR-191576] p 2444 N94-25090

COMBUSTION SYNTHESIS

Combustion synthesis and engineering of nanoparticles for electronic, structural and superconductor applications [DE94-001865] p 2254 N94-23720

COMET NUCLEI

A system for the challenging task of collecting samples from a comet surface p 2358 N94-24007

COMET TAILS

Evolution of large-scale plasma structures in comets: Kinematics and physics [NASA-CR-194777] p 2601 N94-23251

COMMAND AND CONTROL

OASIS-CC presentation p 2385 N94-23613

Operations concepts for Mars missions with multiple mobile spacecraft p 2501 N94-23852

EOS ground data systems: A description and interface overview p 2517 N94-23948

Modeling of database constraints in active databases [AD-A273484] p 2592 N94-24691

COMMAND GUIDANCE

Intelligent systems and advanced user interfaces for design, operation, and maintenance of command management systems [NASA-CR-195172] p 2459 N94-24797

COMMERCE

First satellite mobile communication trials using BLQS-CDMA p 2284 N94-22801

The Electronics Quality/Reliability Center: Lessons learned from partnering with industry [DE94-001501] p 2309 N94-23777

Research interests and broad agency announcement 94-1 of the Air Force Office of Scientific Research [AD-A273410] p 2632 N94-25075

COMMERCIAL AIRCRAFT

Aircraft accident report: Inadvertent in-flight slat deployment, China Eastern Airlines Flight 583, McDonnell Douglas MD-11, B-2171, 950 nautical miles south of Shemya, Alaska, 6 April 1993 [PB93-910408] p 2172 N94-23579

JB-300: An advanced medium size transport for 2005 [NASA-CR-195499] p 2179 N94-24401

Information systems strategy in air transport [AD-A273125] p 2173 N94-24781

The AC-120: The advanced commercial transport [NASA-CR-195491] p 2182 N94-24966

Integrated design and manufacturing for the high speed civil transport [NASA-CR-195511] p 2182 N94-24968

The RTL-46: A simulated commercial air transportation study [NASA-CR-195524] p 2184 N94-25017

High-order technology: Applying technical excellence to new airplane development p 2185 N94-25069

COMMUNICATING

Sequential composition, action prefixes and process prefix [PB94-101433] p 2488 N94-24539

COMMUNICATION

PROGRIL: A language for the definition of protocol grammars [EUT-93-E-270] p 2449 N94-23172

Delay-insensitive communication [ETN-94-95315] p 2304 N94-25303

COMMUNICATION EQUIPMENT

Linear time algorithm to schedule trees with communication delays optimally on two machines [PB93-237782] p 2451 N94-23441

Three, four, five, six or the complexity of scheduling with communication delays [PB94-111630] p 2467 N94-23767

COMMUNICATION NETWORKS

Transparent data service with multiple wireless access p 2276 N94-22754

Internetworking satellite and local exchange networks for personal communications applications p 2276 N94-22755

Power attenuation characteristics as switch-over criterion in personal satellite mobile communications p 2277 N94-22756

Integration of mobile satellite and cellular systems p 2277 N94-22757

Interworking evolution of mobile satellite and terrestrial networks p 2277 N94-22758

Interworking and integration of the Inmarsat Standard-M with Pan-European GSM system p 2277 N94-22759

Architectures and protocols for an integrated satellite-terrestrial mobile system p 2277 N94-22760

Handover procedures in integrated satellite and terrestrial mobile systems p 2277 N94-22761

MSAT and cellular hybrid networking p 2278 N94-22762

A system architecture for an advanced Canadian wideband mobile satellite system p 2278 N94-22766

ACTS broadband aeronautical experiment p 2279 N94-22771

EUTELTRACS: The European experience on mobile satellite services p 2281 N94-22781

Systems implications of L-band fade data statistics for LEO mobile systems p 2284 N94-22799

Handover aspects for a Low Earth Orbit (LEO) CDMA Land Mobile Satellite (LMS) system p 2288 N94-22824

Study on networking issues of medium earth orbit satellite communications systems p 2288 N94-22825

The design and networking of dynamic satellite constellations for global mobile communication systems p 2288 N94-22826

Low earth orbit satellite/terrestrial mobile service compatibility p 2288 N94-22827

Generation of modules for control communication circuits: A design study used in the framework of the safe vehicle PROMETHEUS [ETN-94-95171] p 2308 N94-23165

Reduced cost alternatives to premise wiring using ATM and microcellular technologies p 2314 N94-23239

Automated parallelization of timed Petri-net simulations [NASA-CR-191574] p 2451 N94-23341

MITS architecture V1.0 [PB93-201762] p 2452 N94-23451

Source spacing in B-ISDN [PB93-201747] p 2293 N94-23508

Mean-value of product-form stochastic Petri net models of slotted-ring systems [PB94-110871] p 2494 N94-23749

Design and implementation issues of end-to-end protocols in high-speed networks [PB94-110905] p 2467 N94-23752

Multi-access laser communications terminal [NASA-CR-191251] p 2295 N94-23830

SpaceOps 1992: Proceedings of the Second International Symposium on Ground Data Systems for Space Mission Operations [NASA-CR-194486] p 2497 N94-23832

The space operations at CNES p 2498 N94-23837

A reference model for space data system interconnection services p 2305 N94-23847

The application of automated operations at the Institutional Processing Center p 2509 N94-23901

NASDA's Advanced On-Line System (ADOLIS) p 2509 N94-23903

Applications of CCSDS recommendations to Integrated Ground Data Systems (IGDS) p 2510 N94-23906

Odyssey personal communications satellite system p 2282 N94-22787

The European Mobile System (EMS) p 2282 N94-22789

Land mobile satellite propagation measurements in Japan using ETS-V satellite p 2282 N94-22790

Measurements on the satellite-mobile channel at L and S bands p 2282 N94-22791

A study of satellite motion-induced multipath phenomena p 2283 N94-22794

Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS p 2283 N94-22795

Propagation model for the Land Mobile Satellite channel in urban environments p 2283 N94-22796

Systems implications of L-band fade data statistics for LEO mobile systems p 2284 N94-22799

Low cost coherent demodulation for mobile satellite terminals p 2284 N94-22803

SATCOM simulator speeds MSS deployment and lowers costs p 2287 N94-22822

Advanced mobile satellite communications using COMETS satellite in MM-wave and Ka-band p 2288 N94-22829

Power beaming to space using a nuclear reactor-pumped laser [DE94-001208] p 2348 N94-23185

Satellite communications systems and technology. Volume 2: Site reports [NASA-TM-109399] p 2293 N94-23628

Future trends in NASA space operations p 2498 N94-23836

Worldwide vessel locating and tracking system, volume 1 [PB93-193217] p 2175 N94-24474

Preliminary far-field plume sputtering characterization of the Stationary Plasma Thruster (SPT-100) [NASA-TM-106464] p 2221 N94-24766

COMMUNICATION THEORY

Delay-insensitive communication [ETN-94-95315] p 2304 N94-25303

COMPATIBILITY

Determination of the compatibility between structural alloys and molten metals at high temperatures [DE94-000954] p 2241 N94-23434

Development testing of the two-watt RTG heat source and Hastelloy-S/T-111 alloy compatibility studies [DE94-002875] p 2243 N94-23784

NASA/Goddard Space Flight Center's testbed for CCSDS compatible systems p 2197 N94-23855

COMPENSATORS

Discrete-time H(infinity) control problem with strictly proper measurement feedback
[NASA-CR-195089] p 2473 N94-24542

Automatic pressure control system for the Wright Laboratory Compressor Research Facility
[AD-A273827] p 2194 N94-25522

COMPILERS

Code generation for the attribute evaluator of the protocol engine grammar processor unit
[EUT-93-E-271] p 2450 N94-23173

Object distribution in orca using compile-time and run-time techniques
[PB94-110574] p 2453 N94-23745

Micro SIL-1 simulator
[PB94-110889] p 2454 N94-23750

Runtime support and compilation methods for user-specified data distributions
[NASA-CR-191587] p 2458 N94-24679

Optimizing parallelization
[AD-A273565] p 2467 N94-24692

An integrated runtime and compile-time approach for parallelizing structured and block structured applications
[NASA-CR-191554] p 2458 N94-24740

RIACS/USRA
[NASA-CR-195117] p 2631 N94-25003

COMPLEX SYSTEMS

Automated parallelization of timed Petri-net simulations
[NASA-CR-191574] p 2451 N94-23341

COMPLEX VARIABLES

Edge detection using a complex wavelet
[AD-A273699] p 2493 N94-25452

COMPONENT RELIABILITY

Long term trending of engineering data for the Hubble Space Telescope p 2516 N94-23942

Reliable redundant device for mechanisms
p 2361 N94-24030

Viscous rotary damper p 2361 N94-24031

A minimum cost tolerance allocation method for rocket engines and robust rocket engine design
p 2222 N94-24419

Aviation system safety risk management tool analysis. Volume 2: Appendices
[AD-A273502] p 2173 N94-24864

An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072

Computerized testing system software conversion and development: Identifying software and hardware portability issues and solutions
[AD-A273489] p 2462 N94-25287

COMPOSITE MATERIALS

Counterrotating aircraft propulsor blades
[CA-PATENT-1-319-357] p 2186 N94-23255

Time dependent behavior of a graphite/thermoplastic composite and the effects of stress and physical aging
[NASA-TM-109047] p 2228 N94-23280

An evaluation of Compton scatter imaging using COMSCAN
[DREP-TM-93-38] p 2372 N94-24136

Attachment methods in composite joints - analysis of test results by controlled experiments method
p 2158 N94-24269

S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270

Modelling the ignition of boron/titanium particles
p 2159 N94-24273

Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275

Nonlinear analysis using a modal based reduction technique p 2161 N94-24288

Evaluation of advanced materials through experimental mechanics and modelling p 2374 N94-24454

High strain rate superplasticity in metals and composites
[DE94-001521] p 2229 N94-24547

Polythiophene derivative with a side chain chromophore as photovoltaic and photorefractive materials
[AD-A273245] p 2260 N94-24813

Center for Analysis of Heterogeneous and Nonlinear Media
[AD-A273515] p 2230 N94-25158

Alternatives for reinforcement: Fiber composites
[VTT-TIED-1412] p 2230 N94-25386

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5A: Corrosion: General issues
[AD-A273666] p 2250 N94-25406

Composites and textile reinforcement
[VTT-TIED-1424] p 2231 N94-25420

Application of body fitted-coordinates in heat conduction problems
[ETN-94-95338] p 2340 N94-25484

COMPOSITE STRUCTURES

Composite fiber structures for catalysts and electrodes
p 2393 N94-23364

Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545

Computer based expert system for battle damage repair of composite structures p 2157 N94-24262

Attachment methods in composite joints - analysis of test results by controlled experiments method
p 2158 N94-24269

The process network in the design and manufacturing of aircraft p 2178 N94-24319

Structural design criteria for filament-wound composite shells
[NASA-CR-195125] p 2229 N94-24402

Assessment of impact damage of composite rocket motor cases
[NASA-CR-195143] p 2220 N94-24595

Stability analysis of anisotropic conical shells
[PB94-119054] p 2377 N94-24645

Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699

Dynamic analysis of pretwisted elastically-coupled rotor blades
[NASA-TM-109070] p 2378 N94-24839

Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades
[NASA-TM-108758] p 2182 N94-24953

Probabilistic assessment of smart composite structures
[NASA-TM-106358] p 2378 N94-25188

Alternatives for reinforcement: Fiber composites
[VTT-TIED-1412] p 2230 N94-25386

COMPRESSED GAS

Picosecond High Pressure Gas Switch experiment
[DE93-040853] p 2307 N94-22950

COMPRESSIBILITY

Control of the internal stresses in plane elasticity
[PB93-225514] p 2374 N94-23112

Heat pipe vapor dynamics
[NASA-CR-194217] p 2327 N94-24096

Buckling of circular cylindrical shells subjected to combined loads (axial compression, normal pressure, bending and transverse shear loading)
[PB93-215358] p 2378 N94-24745

Unified approach for incompressible flows
p 2342 N94-25356

A numerical investigation of the artificial compressibility method for the solution of the Navier-Stokes equations
[CRANFIELD-AERO-9213] p 2340 N94-25486

COMPRESSIBILITY EFFECTS

Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion
[NASA-TM-109681] p 2167 N94-23975

Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164

Development and validation of RNG methodology for compressible turbulence
[AD-A273469] p 2337 N94-24929

COMPRESSIBLE BOUNDARY LAYER

Development and validation of RNG methodology for compressible turbulence
[AD-A273469] p 2337 N94-24929

COMPRESSIBLE FLOW

A multigrid multiblock solver for compressible turbulent flow
[MEMO-1125] p 2315 N94-22713

An F2D analysis of the Flow Instability Test (FIT) experiment
[DE94-001420] p 2217 N94-23193

A representation for the turbulent mass flux contribution to Reynolds-stress and two-equation closures for compressible turbulence
[NASA-CR-191569] p 2319 N94-23302

An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554

Compressible turbulent flow simulation with a multigrid multiblock method p 2342 N94-23694

Issac, Jason Cherian ses in transonic flow
[NASA-CR-194837] p 2167 N94-24052

Heat pipe vapor dynamics
[NASA-CR-194217] p 2327 N94-24096

Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164

Carrying the mass flux terms exactly in the first and second moment equations of compressible turbulence
[NASA-CR-191568] p 2335 N94-24712

Development and validation of RNG methodology for compressible turbulence
[AD-A273469] p 2337 N94-24929

Development and application of new algorithms for the simulation of viscous compressible flows with moving bodies in three dimensions
[AD-A273514] p 2338 N94-25157

Unified approach for incompressible flows
p 2342 N94-25356

COMPRESSIBLE FLUIDS

Local grid refinement method for the euler equations
[PB93-223329] p 2317 N94-22985

COMPRESSION LOADS

Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260

Properties and processing characteristics of low density carbon cloth phenolic composites p 2231 N94-24450

COMPRESSION RATIO

Integer cosine transform compression for Galileo at Jupiter: A preliminary look p 2292 N94-23266

COMPRESSION TESTS

A prediction method for the compressive strength of impact damaged composite laminates
[CTN-94-60925] p 2229 N94-24137

Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260

Structural design criteria for filament-wound composite shells
[NASA-CR-195125] p 2229 N94-24402

Test methods for composites: A status report. Volume 2: Compression test methods
[AD-A273522] p 2230 N94-24779

COMPRESSIVE STRENGTH

Developments in materials for high-field magnets
[DE94-000761] p 2307 N94-22987

A prediction method for the compressive strength of impact damaged composite laminates
[CTN-94-60925] p 2229 N94-24137

Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2
[NASA-CR-193893] p 2229 N94-24224

. Test methods for composites: A status report. Volume 2: Compression test methods
[AD-A273522] p 2230 N94-24779

The mechanical property data base from an Air Force/Industry Cooperative Test Program on advanced aluminum alloys (7064 and CW67)
[AD-A273741] p 2251 N94-25531

COMPRESSOR BLADES

Off-design performance of crenulated blades in a linear compressor cascade
[AD-A273744] p 2340 N94-25534

COMPRESSOR ROTORS

Analysis and characteristics of compressor stall precursor signals in forward and AFT swept high speed compressor
[AD-A273820] p 2171 N94-25517

COMPRESSORS

Measurement of kinematically unstationary separated flows p 2315 N94-22854

Magnetic power piston fluid compressor
[NASA-CASE-GSC-13565-1] p 2354 N94-23831

Reduction of hydrocarbon impurities in 200 l/h helium liquefier-refrigerator system
[NIFS-259] p 2271 N94-24459

Analysis and characteristics of compressor stall precursor signals in forward and AFT swept high speed compressor
[AD-A273820] p 2171 N94-25517

Automatic pressure control system for the Wright Laboratory Compressor Research Facility
[AD-A273827] p 2194 N94-25522

COMPTON EFFECT

Analysis of a proposed Compton backscatter imaging technique
[DE93-040537] p 2371 N94-22935

An evaluation of Compton scatter imaging using COMSCAN
[DREP-TM-93-38] p 2372 N94-24136

COMPUTATION

The explicit computation of integration algorithms and first integrals for ordinary differential equations with polynomials coefficients using trees
[NASA-CR-194787] p 2448 N94-23074

On the numerical computation of invariant manifolds
[W-9306] p 2480 N94-23140

Runtime support and compilation methods for user-specified data distributions
[NASA-CR-191587] p 2458 N94-24679

Efficiency of subset selection of an epsilon-best uniform population relative to selection of the best one
[PB93-237741] p 2490 N94-24763

Computing techniques in mission planning
p 2522 N94-25012

COMPUTATIONAL ASTROPHYSICS

A mixed method Poisson solver for three-dimensional self-gravitating astrophysical fluid dynamical systems p 2484 N94-23684

COMPUTATIONAL FLUID DYNAMICS

Local grid refinement method for the euler equations [PB93-223329] p 2317 N94-22985

CFD analyses of combustor and nozzle flowfields p 2210 N94-23033

Numerical parametric studies of spray combustion instability p 2212 N94-23041

Numerical investigation of two- and three-dimensional heat transfer in expander cycle engines p 2213 N94-23048

CFD analyses of coolant channel flowfields p 2214 N94-23050

Heat transfer in rocket combustion chambers p 2214 N94-23051

Computational Fluid Dynamics (CFD) applications in rocket propulsion analysis and design p 2214 N94-23054

Computation of propulsion-related flowfields using unstructured adaptive meshes p 2215 N94-23056

Computational fluid dynamic modelling of cavitation p 2215 N94-23060

CFD modeling of microwave electrothermal thrusters p 2216 N94-23066

Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades [PB93-226223] p 2317 N94-23114

POISs3: A 3D poisson smoother of structured grids [PB93-226231] p 2318 N94-23115

Computational study of GA(W)-1: Airfoil near stall [PB93-226249] p 2165 N94-23116

Locally modified Bott-scheme for highly convective flows [MPIM-99] p 2400 N94-23157

Field models: Their present and future application in fire safety engineering [PB93-201622] p 2269 N94-23506

Unsteady jet flow computation towards noise prediction [NASA-CR-194449] p 2153 N94-23553

An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids [NASA-TM-106437] p 2481 N94-23554

LinAir: A multi-element discrete vortex Weissinger aerodynamic prediction method [NASA-TM-108786] p 2167 N94-23557

Prediction of pressure drop in fluid tuned mounts using analytical and computational techniques p 2321 N94-23643

The 3-D CFD modeling of gas turbine combustor-integral bleed flow interaction p 2189 N94-23658

The 3-D numerical study of airflow in the compressor/combustor prediffuser and dump diffuser of an industrial gas turbine p 2324 N94-23660

An analytic study of a two-phase laminar airfoil in simulated heavy rain p 2171 N94-23661

An application of small-gap equations in sealing devices p 2325 N94-23668

Comparison of numerical simulation and experimental data for steam-in-place sterilization p 2326 N94-23669

A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670

Upwind MacCormack Euler solver with non-equilibrium chemistry p 2326 N94-23672

The Sixth Copper Mountain Conference on Multigrid Methods, part 1 [NASA-CP-3224-PT-1] p 2482 N94-23673

A mixed method Poisson solver for three-dimensional self-gravitating astrophysical fluid dynamical systems p 2484 N94-23684

An object-oriented approach for parallel self adaptive mesh refinement on block structured grids p 2469 N94-23697

Efficient interpolation of velocity and flux components defined on 2- and 3-dimensional non-cartesian grids [PB94-118619] p 2486 N94-23757

Thermohydrodynamic analysis of cryogenic liquid turbulent flow fluid film bearings [NASA-CR-194869] p 2363 N94-24081

CFD assessment of orifice aspect ratio and mass flow ratio on jet mixing in rectangular ducts [NASA-TM-106434] p 2187 N94-24082

New concepts for Reynolds stress transport equation modeling of inhomogeneous flows p 2171 N94-24143

Turbulence modeling for non-equilibrium flows p 2328 N94-24144

Computation of turbulent flows over backward and forward-facing steps using a near-wall Reynolds stress model p 2172 N94-24145

Large eddy simulation of a boundary layer with concave streamwise curvature p 2328 N94-24146

Large-eddy simulation of flow in a plane, asymmetric diffuser p 2328 N94-24147

On the large eddy simulation of turbulent flows in complex geometry p 2329 N94-24148

Investigation of the asymptotic state of rotating turbulence using large-eddy simulation p 2330 N94-24152

A large eddy simulation scheme for turbulent reacting flows p 2330 N94-24154

A transport equation for the scalar dissipation in reacting flows with variable density: First results p 2331 N94-24157

The production of premixed flame surface area in turbulent shear flow p 2237 N94-24158

On streak spacing in wall-bounded turbulent flows p 2331 N94-24159

Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160

Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164

Effects of shock strength on shock turbulence interaction p 2332 N94-24165

Computation of large-scale statistics in decaying isotropic turbulence p 2332 N94-24167

On the dynamics of approximating schemes for dissipative nonlinear equations p 2332 N94-24168

New features in Computational Fluid Dynamics (CFD) technology at the TASHAN Engineering Center at IAI p 2155 N94-24249

Discrete sensitivity derivatives of the Navier-Stokes equations with a parallel Krylov solver [NASA-TM-106481] p 2265 N94-24301

Integrated Airframe Design Technology [AGARD-R-794] p 2177 N94-24313

Applications of CFD codes and supercomputers to aircraft design activities p 2177 N94-24316

Modeling dynamically coupled fluid-duct systems with finite line elements [NASA-CR-193909] p 2376 N94-24359

CFD simulation of coaxial injectors p 2342 N94-24430

Workshop on Computational Turbulence Modeling [NASA-CP-10130] p 2333 N94-24460

Heat transfer in rocket engine combustion chambers and regeneratively cooled nozzles [NASA-CR-195094] p 2220 N94-24471

Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects [NASA-CR-195126] p 2534 N94-24487

Validation of the ROTAC code for the rotor noise prediction [PB93-204311] p 2529 N94-24514

Conservation equations for reacting gas flow [PB94-111168] p 2334 N94-24574

Solution of the discretized incompressible Navier-Stokes equations with iterative methods [PB94-118635] p 2335 N94-24641

A numerical study of airplanes flying in proximity [AD-A273373] p 2173 N94-24718

An integrated runtime and compile-time approach for parallelizing structured and block structured applications [NASA-CR-191554] p 2458 N94-24740

HYPULSE combustor analysis [NASA-CR-191579] p 2336 N94-24771

Projection techniques for iterative solution of A(bar x) equals (bar b) with successive right-hand sides [NASA-CR-191571] p 2490 N94-24836

Numerical flow simulation for complete vehicle configurations [AD-A273588] p 2170 N94-24849

Numerical solutions of the complete Navier-Stokes equations [NASA-CR-194780] p 2337 N94-24858

Computational fluid mechanics [NASA-CR-194765] p 2337 N94-24859

Vortex generation and wave-vortex interaction over a concave plate with roughness and suction [NASA-CR-191589] p 2337 N94-24869

Triangular spectral elements for incompressible fluid flow [NASA-CR-191588] p 2490 N94-24914

A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 1: Model development and applications [NASA-CR-193916] p 2366 N94-24998

A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 2: User's guide [NASA-CR-193917] p 2366 N94-24999

Research in progress and other activities of the Institute for Computer Applications in Science and Engineering [NASA-CR-191576] p 2444 N94-25090

LES, DNS and RANS for the analysis of high-speed turbulent reacting flows [NASA-CR-195196] p 2337 N94-25094

Modeling transonic aerodynamic response using nonlinear systems theory for use with modern control theory p 2164 N94-25112

Active control of oscillatory lift forces on a circular cylinder [AD-A273243] p 2338 N94-25140

Development and application of new algorithms for the simulation of viscous compressible flows with moving bodies in three dimensions [AD-A273514] p 2338 N94-25157

Advanced ballistic range technology [NASA-CR-195198] p 2165 N94-25169

A continuing search for a near-perfect numerical flux scheme. Part 1: AUSM+ [NASA-TM-106524] p 2338 N94-25180

Improving diffusing S-duct performance by secondary flow control [NASA-TM-106492] p 2170 N94-25182

Two-dimensional CFD modeling of wave rotor flow dynamics [NASA-TM-106261] p 2189 N94-25185

Hydrodynamics of stirred gas-liquid dispersions [ETN-94-95368] p 2339 N94-25254

High lift aerodynamics [NASA-CR-195183] p 2184 N94-25268

Detailed description of two calculation programs for incompressible, steady state boundary layer flows, applied to determine the aerodynamic characteristics of NACA12 and OA312 foils at low Reynolds numbers [ISL-N-604/92] p 2171 N94-25461

Study of the blade/vortex interaction: Acoustics, aerodynamics and models [ISL-R-104/92] p 2340 N94-25463

An adaptive streamline diffusion finite element method for hyperbolic systems in gas dynamics [PREPRINT-688] p 2340 N94-25466

A numerical investigation of the artificial compressibility method for the solution of the Navier-Stokes equations [CRANFIELD-AERO-9213] p 2340 N94-25486

COMPUTATIONAL GEOMETRY

Parallel unstructured grid generation for computational aerosciences [NASA-CR-192244] p 2466 N94-23483

COMPUTATIONAL GRIDS

A geometric weighted elliptic grid regeneration method for 3D unstructured ALE hydrodynamics [DE94-000309] p 2448 N94-22980

Local grid refinement method for the euler equations [PB93-223329] p 2317 N94-22985

Computation of propulsion-related flowfields using unstructured adaptive meshes p 2215 N94-23056

Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades [PB93-226223] p 2317 N94-23114

POISs3: A 3D poisson smoother of structured grids [PB93-226231] p 2318 N94-23115

Computational study of GA(W)-1: Airfoil near stall [PB93-226249] p 2165 N94-23116

Simulation of unsteady flows through stator and rotor blades of a gas turbine using the Chimera method p 2323 N94-23652

The Sixth Copper Mountain Conference on Multigrid Methods, part 1 [NASA-CP-3224-PT-1] p 2482 N94-23673

FAS multigrid calculations of three dimensional flow using non-staggered grids p 2341 N94-23675

Uniform convergence of multigrid V-cycle iterations for indefinite and nonsymmetric problems p 2482 N94-23677

An adaptive multigrid model for hurricane track prediction p 2416 N94-23687

A multilevel adaptive projection method for unsteady incompressible flow p 2341 N94-23690

A comparison of locally adaptive multigrid methods: LDC, FAC and FIC p 2485 N94-23692

Compressible turbulent flow simulation with a multigrid multiblock method p 2342 N94-23694

An object-oriented approach for parallel self adaptive mesh refinement on block structured grids p 2469 N94-23697

Efficient interpolation of velocity and flux components defined on 2- and 3-dimensional non-cartesian grids [PB94-118619] p 2486 N94-23757

On the dynamics of some grid adaption schemes [NASA-CR-195092] p 2454 N94-24110

Toward large eddy simulation of turbulent flow over an airfoil p 2172 N94-24150

Unstructured grid large eddy simulation of wall bounded turbulent flows p 2329 N94-24151

Unstructured adaptive mesh computations of rotorcraft high-speed impulsive noise [NASA-CR-195090] p 2529 N94-24307

Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis [NASA-CR-194795] p 2335 N94-24640

Solution of the discretized incompressible Navier-Stokes equations with iterative methods
[PB94-118635] p 2335 N94-24641

Numerical flow simulation for complete vehicle configurations
[AD-A273588] p 2170 N94-24849

COMPUTER AIDED DESIGN

A new automatic design method to develop multilayer thin film devices for high power laser applications
[DE93-632490] p 2347 N94-22967

Hypermedia support for engineering design system
[PB93-226256] p 2449 N94-23117

AMICAL: An aid for architectural synthesis and exploration of control circuits
[ETN-94-95177] p 2308 N94-23154

APLAC: An object-oriented analog circuit simulator and design tool. 6.1 system simulations manual
[PB93-224871] p 2450 N94-23226

Object oriented simulation implementation in support of robust system design
[DE93-011687] p 2452 N94-23488

Development of a code for wall contour design in the transonic region of axisymmetric and square nozzles
[NASA-CR-194857] p 2167 N94-23625

Some useful innovations with TRASYS and SINDA-85
p 2322 N94-23647

Development of biomechanical models for human factors evaluations p 2437 N94-24205

New features in Computational Fluid Dynamics (CFD) technology at the TASHAN Engineering Center at IAI

A parallel PROLOG system for distributed memory multiprocessor
[ETN-94-95173] p 2465 N94-23167

Reduced cost alternatives to premise wiring using ATM and microcellular technologies p 2314 N94-23239

Mean-value of product-form stochastic Petri net models of slotted-ring systems
[PB94-110871] p 2494 N94-23749

Design and implementation issues of end-to-end protocols in high-speed networks
[PB94-110905] p 2467 N94-23752

Applications of CCSDS recommendations to Integrated Ground Data Systems (IGDS) p 2510 N94-23906

Distributed computing environments for future space control systems p 2464 N94-23911

Deep Space Network (DSN), Network Operations Control Center (NOCC) computer-human interfaces
p 2447 N94-23917

Telemetry ground system development via the component approach p 2203 N94-23949

An engineering database management system for spacecraft operations p 2517 N94-23951

An investigation of requirements traceability to support systems development
[AD-A273167] p 2458 N94-24684

Evolving neural network connectivity
[AD-A273134] p 2490 N94-24921

A usage profile and evaluation of a wide-area distributed file system
[AD-A273590] p 2593 N94-24946

COMPUTER PROGRAMMING

VTGRAPH:Computer graphics program using ReGIS mode
[DE94-600342] p 2448 N94-23024

Software for scientific visualization: State of the art and experiences
[PB93-225183] p 2449 N94-23111

Code generation for the attribute evaluator of the protocol engine grammar processor unit
[EUT-93-E-271] p 2450 N94-23173

FEMAX finite-element package for computing three-dimensional time-domain electromagnetic fields in inhomogeneous media
[PB94-111093] p 2294 N94-23733

Object distribution in orca using compile-time and run-time techniques
[PB94-110574] p 2453 N94-23745

Micro SIL-1 simulator
[PB94-110889] p 2454 N94-23750

Making tomorrow's mistakes today: Evolutionary prototyping for risk reduction and shorter development time p 2197 N94-23902

Software reuse in spacecraft planning and scheduling systems p 2520 N94-23966

SAO mission support software and data standards, version 1.0
[NASA-CR-193906] p 2454 N94-24050

Update of GRASP/Ada reverse engineering tools for Ada
[NASA-CR-193890] p 2455 N94-24111

Evaluation of the efficiency and fault density of software generated by code generators p 2465 N94-24445

Verification and validation of models
[PB94-110566] p 2456 N94-24507

A methodology for software cost estimation using machine learning techniques
[AD-A273158] p 2459 N94-24775

Evolving neural network connectivity
[AD-A273134] p 2490 N94-24921

Reengineering real-time software systems
[AD-A273408] p 2461 N94-25074

Models of trace theory systems
[ETN-94-95361] p 2468 N94-25226

Failure detection and recovery in the assembly/contingency subsystem p 2306 N94-25360

Software engineering methodologies and tools
p 2465 N94-25382

COMPUTER PROGRAMS

Algorithms for speech coding systems based on linear prediction
[EUT-92-E-260] p 2447 N94-22731

Proof test of the computer program BUCKY for plasticity problems
[NASA-TP-3444] p 2374 N94-22960

Users manual for the Chameleon parallel programming tools
[DE94-001934] p 2465 N94-22973

Software for scientific visualization: State of the art and experiences [PB93-225183] p 2449 N94-23111
Tools reference manual for a Requirements Specification Language (RSL), version 2.0 [NASA-CR-191461] p 2445 N94-23125
Atmospheric flow in heterogeneous vegetated regions [W-9303] p 2401 N94-23175
Towards the formal specification of the requirements and design of a processor interface unit: HOL listings [NASA-CR-191465] p 2466 N94-23252
CRRES microelectronics package flight data analysis [NASA-TP-3423] p 2540 N94-23273
Image pattern recognition supporting interactive analysis and graphical visualization [NASA-CR-194878] p 2451 N94-23369
Experiments with a small behaviour controlled planetary rover p 2371 N94-23427
Transient Ejector Analysis (TEA) code user's guide [NASA-TM-106310] p 2186 N94-23466
Theoretical studies of a molecular beam generator [NASA-CR-194779] p 2540 N94-23485
OASIS-CC presentation p 2385 N94-23613
Validating a large geophysical data set: Experiences with satellite-derived cloud parameters p 2385 N94-23615
Experience of the JPL Exploratory Data Analysis Team at validating HIRS2/MSU cloud parameters p 2385 N94-23616
The Fifth Annual Thermal and Fluids Analysis Workshop [NASA-CP-10122] p 2320 N94-23634
A comparison of TSS and TRASYS in form factor calculation p 2321 N94-23638
Utilization of recently developed codes for high power Brayton and Rankine cycle power systems p 2222 N94-23641
Thermal analysis of combinatorial solid geometry models using SINDA p 2323 N94-23650
Convection equation modeling: A non-iterative direct matrix solution algorithm for use with SINDA p 2323 N94-23651
Micro SIL-1 simulator [PB94-110889] p 2454 N94-23750
Design and implementation issues of end-to-end protocols in high-speed networks [PB94-110905] p 2467 N94-23752
Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software p 2305 N94-23842
SCOS2: ESA's new generation of mission control systems p 2197 N94-23851
The application of automated operations at the Institutional Processing Center p 2509 N94-23901
Multimission image processing and science data visualization p 2518 N94-23955
From requirements to acceptance tests p 2464 N94-23962
SAO mission support software and data standards, version 1.0 [NASA-CR-193906] p 2454 N94-24050
Quantitative assessment of human motion using video motion analysis p 2436 N94-24203
New features in Computational Fluid Dynamics (CFD) technology at the TASHAN Engineering Center at IAI p 2155 N94-24249
A review of ISEAS design p 2465 N94-24410
High-performance computing and communications [DE94-002215] p 2457 N94-24566
Comparison of HF groundwave propagation models [AD-A273146] p 2299 N94-24668
The use of design automation software by government-contracted architect/engineer firms: A status report [AD-A273181] p 2459 N94-24812
COSMIC monthly progress report [NASA-CR-195153] p 2460 N94-25023
Computerized testing system software conversion and development: Identifying software and hardware portability issues and solutions [AD-A273489] p 2462 N94-25287
Failure detection and recovery in the assembly/contingency subsystem p 2306 N94-25360

COMPUTER STORAGE DEVICES
A qualified radiation hardened nonvolatile memory for space and tactical weapons applications [DE94-001211] p 2559 N94-23186
Performance of the engineering analysis and data system 2 common file system p 2576 N94-24413
Field emitter array memory device [AD-D016015] p 2311 N94-24736
MOS analog memory with injection capacitors [AD-D015990] p 2312 N94-25050

COMPUTER SYSTEMS DESIGN
Definition and realization of a formal verification tool of LUSTRE programs: The LESAR system [ETN-94-95164] p 2447 N94-22882
Resolution of Markov models on distributed memory machines [ETN-94-95182] p 2444 N94-22900
AMICAL: An aid for architectural synthesis and exploration of control circuits [ETN-94-95177] p 2308 N94-23154
SPOT4 Operational Control Center (CMP) p 2197 N94-23856
Distributed computing environments for future space control systems p 2464 N94-23911
Making intelligent systems team players: Additional case studies [NASA-TM-104786] p 2473 N94-24068
New computing systems, future computing environment, and their implications on structural analysis and design p 2177 N94-24314
Performance of the engineering analysis and data system 2 common file system p 2576 N94-24413
Extension of the critical path method [PB94-118817] p 2488 N94-24527
Real-time process logic [PB94-101441] p 2446 N94-24540
An investigation of requirements traceability to support systems development [AD-A273167] p 2458 N94-24684
Study on fine grain dynamic dataflow computer [REPT-946] p 2446 N94-24981
Mission rehearsal in the SOF-ATS program p 2522 N94-25016
The design of the EMPS multiprocessor executive for distributed computing [ETN-94-95336] p 2468 N94-25062
Designing parallel programs of parameterized granularity [ETN-94-95302] p 2468 N94-25278
A design method for parallel programs [ETN-94-95331] p 2469 N94-25282

COMPUTER SYSTEMS PERFORMANCE
Resolution of Markov models on distributed memory machines [ETN-94-95182] p 2444 N94-22900
ACOS: The performance based approach to build a parallel complex object server [PB93-223816] p 2465 N94-22986
Advanced Information Processing System (AIPS) p 2165 N94-25115

COMPUTER SYSTEMS PROGRAMS
ACOS: The performance based approach to build a parallel complex object server [PB93-223816] p 2465 N94-22986
A type declarative system for PROLOG [ETN-94-95178] p 2449 N94-23155
Design and implementation issues of end-to-end protocols in high-speed networks [PB94-110905] p 2467 N94-23752
A quick uplink, expandable executable for the NSSC-1 of the Hubble Space Telescope p 2305 N94-23859
High-performance computing and communications [DE94-002215] p 2457 N94-24566
An investigation of requirements traceability to support systems development [AD-A273167] p 2458 N94-24684

COMPUTER SYSTEMS SIMULATION
The TOPSIM 4 graphic user interface [ESA-STM-247] p 2450 N94-23228

COMPUTER TECHNIQUES
Computer assisted analysis of auroral images obtained from high altitude polar satellites [NASA-CR-194873] p 2400 N94-23084
Hypermedia support for engineering design system [PB93-226256] p 2449 N94-23117
A prototype expert/information system for examining environmental risks of KSC activities p 2400 N94-23237
Analysis for the computational modeling of finite cladding and lossy coating effects in fibers [PB94-111085] p 2544 N94-23732
Framework for interactive solving of meta-constraint satisfaction problems [PB94-118825] p 2585 N94-23761
Concepts and techniques for an active database approach to office procedure support [PB94-110749] p 2590 N94-23816
Operational characterisation of requirements and early validation environment for high demanding space systems p 2519 N94-23959
Early manufacturing considerations in design p 2177 N94-24315
Octave: A MARSYAS post-processor for computer-aideed control system design p 2465 N94-24422
Modular approach to project management [PB94-118833] p 2586 N94-24528
RITL: An information system for application reuse-in-the-large [PB94-119088] p 2592 N94-24646
The HEC NexGen software development project [AD-A273512] p 2460 N94-24822
Mission planning and mission rehearsal systems: Displays and other interactive techniques p 2522 N94-25013
Research in progress and other activities of the Institute for Computer Applications in Science and Engineering [NASA-CR-191576] p 2444 N94-25090
Measuring track densities in lunar grains by image analysis p 2623 N94-25355

COMPUTER VISION
Stereo for gazing and converging cameras. Part 1: Basic geometry [OUEL-1915/92] p 2343 N94-23162
Descent and landing phase: Vision based robust spacecraft motion estimation and elevation modeling p 2608 N94-23394
Mars 96 rover: Technical vision and navigation p 2370 N94-23417
Towards real-time stereovision systems for planetary missions p 2370 N94-23422
Remote sensing, imaging, and signal engineering [DE94-003021] p 2382 N94-23494
Telerobotic rendezvous and docking vision system architecture [NASA-CR-191329] p 2204 N94-23828
Multi-sensoral approach to night flight: Perceptive and Cognitive limitations p 2432 N94-23981
Method for selection of wavelength bands for multispectral classification [PB93-204378] p 2388 N94-24741
Object recognition through image understanding for an autonomous mobile robot [AD-A273206] p 2475 N94-24862
Proceedings of the Workshop on Augmented Visual Display (AVID) Research [NASA-CP-10128] p 2439 N94-25490
Enhanced image capture through fusion p 2346 N94-25502

COMPUTERIZED SIMULATION
Development of a multilayer interference simulation program for MSS systems p 2287 N94-22823
Characterization of germanium stripe x ray lasers [DE93-019629] p 2347 N94-22867
Novel fringe scanning/Fourier transform method of synthetic imaging [DE93-018936] p 2542 N94-22917
Development and experimental validation of computational methods to simulate abnormal thermal and structural environments [DE94-000554] p 2268 N94-23000
Texture gradient effects in tantalum [DE94-000689] p 2240 N94-23021
Nuclear propulsion control and health monitoring p 2217 N94-23071
Software for scientific visualization: State of the art and experiences [PB93-225183] p 2449 N94-23111
APLAC: An object-oriented analog circuit simulator and design tool. 6.1 system simulations manual [PB93-224871] p 2450 N94-23226
Flame trench analysis of NLS vehicles p 2199 N94-23249
Mobility analysis, simulation, and scale model testing for the design of wheeled planetary rovers p 2370 N94-23425
Visualization of results from meteorological simulations on CRAY [PB93-201358] p 2451 N94-23443
GLview user's guide [PB93-201366] p 2452 N94-23444
Calculation of flame spread on lining materials by the field model KAMELEON. Project 5 of the EUREFIC fire research programme [PB93-201614] p 2268 N94-23450
Tracking sharp interface of two fluids by the CIP (Cubic-Interpolated Propagation) scheme [DE93-508322] p 2319 N94-23460
Computational model of surface ablation from tokamak disruptions [DE94-002204] p 2550 N94-23474
Object oriented simulation implementation in support of robust system design [DE93-011687] p 2452 N94-23488
Dynamic ray tracing and its application in triangulated media [DE94-000875] p 2402 N94-23516
Global ocean modeling on the Connection Machine [DE94-000888] p 2417 N94-23517
The use of transition region characteristics to improve the numerical simulation of heat transfer in bypass transitional flows [NASA-TM-106445] p 2320 N94-23525
Simultaneous simulation and visualization using DGL [PB93-201341] p 2453 N94-23534

Characterization of 3-D particle distributions and effects on recrystallization studied by computer simulation [PB93-201408] p 2562 N94-23535

An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids [NASA-TM-106437] p 2481 N94-23554

A comparison of TSS and TRASYS in form factor calculation p 2321 N94-23638

Analysis of high vacuum systems using SINDA'85 p 2322 N94-23648

Features of a SINDA/FLUINT model of a liquid oxygen supply line p 2322 N94-23649

Simulation of unsteady flows through stator and rotor blades of a gas turbine using the Chimera method p 2323 N94-23652

Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657

Radar stimulator interface protocol, preliminary interface design and Doppler Beam Sharpening implementation [DE94-002567] p 2453 N94-23701

Control algorithms for effective operation of variable-speed wind turbines [DE94-002607] p 2394 N94-23704

Transition system specifications in stalk format with bisimulation as a congruence [PB94-110608] p 2453 N94-23707

Zone fire modeling with natural building flows and a zero order shaft model [PB94-112166] p 2270 N94-23735

Micro SIL-1 simulator [PB94-110889] p 2454 N94-23750

Enhanced absorption cycle computer model [DE94-001997] p 2271 N94-23793

SIMSAT: An object oriented architecture for real-time satellite simulation p 2197 N94-23940

Operational characterisation of requirements and early validation environment for high demanding space systems p 2519 N94-23959

Heat pipe cooled heat rejection subsystem modelling for nuclear electric propulsion [NASA-CR-191132] p 2219 N94-24061

Annual research briefs, 1993 — Center for Turbulence Research [NASA-CR-194755] p 2327 N94-24138

Unstructured grid large eddy simulation of wall bounded turbulent flows p 2329 N94-24151

Tensoral for post-processing users and simulation authors p 2333 N94-24169

The use of analytical models in human-computer interface design p 2434 N94-24190

Using computer graphics to design Space Station Freedom viewing p 2434 N94-24191

Simulation of the human-telerobot interface on the Space Station p 2436 N94-24202

Establishing a relationship between maximum torque production of isolated joints to simulate EVA ratchet push-pull maneuver: A case study p 2437 N94-24206

The effect of high altitude pressure on the power and efficiency of an airborne two-stroke engine p 2155 N94-24253

Evaluation of EHF multi-beam adaptive arrays [CTN-94-60898] p 2297 N94-24296

Probabilistic simulation of concurrent engineering of propulsion systems p 2177 N94-24317

Multi-disciplinary coupling for integrated design of propulsion systems p 2179 N94-24326

NASA high performance computing and communications program [NASA-TM-4554] p 2591 N94-24337

A study of the core module simulator floor capability p 2380 N94-24418

Weld fracture criteria for computer simulation p 2251 N94-24425

Spatial interpretation of NASA's Marshall Space Flight Center Payload Operations Control Center using virtual reality technology p 2198 N94-24432

Error coding simulations p 2306 N94-24439

Micromechanical simulation of damage progression in carbon phenolic composites p 2231 N94-24446

Systems engineering: A formal approach. Part 4: Analysis methods [PB94-101417] p 2271 N94-24475

Computer modeling of plasma flow switches-high current switching on Procyon [DE93-040189] p 2311 N94-24500

Systems engineering: A formal approach. Part 3: Modeling methods [PB94-101409] p 2456 N94-24513

Start-up simulations of the PULSAR pulsed tokamak reactor [DE94-002634] p 2552 N94-24519

A simulation and evaluation of NATO Standardization Agreement (STANAG) 4214 [AD-A273195] p 2297 N94-24554

Recent developments in the mathematical modelling and physical understanding of transport and dispersion in aquatic systems, with special reference to tidal waters [PB94-111135] p 2418 N94-24600

Crashworthiness analysis using advanced material models in DYNA3D [DE94-002988] p 2229 N94-24632

Fast simulation of packet loss rates in a shared buffer communications switch [NASA-CR-191556] p 2457 N94-24638

A two-dimensional dispersion module for the TOUGH2 simulator [DE94-002262] p 2335 N94-24655

The HEC NexGen software development project [AD-A273512] p 2460 N94-24822

Design of orbital debris shields for oblique hypervelocity impact [NASA-CR-195152] p 2205 N94-24828

Numerical flow simulation for complete vehicle configurations [AD-A273588] p 2170 N94-24849

Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap p 2621 N94-24895

The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896

Triangular spectral elements for incompressible fluid flow [NASA-CR-191588] p 2490 N94-24914

Structures of Cl(-)(H2O)(n) and F(-)(H2O)(n) (n equal to 2,3...15) clusters: Molecular dynamics computer simulations [AD-A273474] p 2537 N94-24940

Computer simulation of low energy scattering [ETN-94-95326] p 2537 N94-25082

PLANET: A hierarchical network simulator [ISBN-9-09-005693-9] p 2313 N94-25083

Simulation studies for surfaces and materials strength [NASA-CR-195185] p 2565 N94-25093

Understanding and facilitating discovery learning in computer-based simulation environment [ISBN-9-03-860242-1] p 2462 N94-25219

Microscopic dynamics in dense helium-neon mixtures: Neutron scattering, kinetic theory and computer simulations [ISBN-9-07-386105-5] p 2537 N94-25228

Numerical simulation and analysis of experimental results on stimulated Raman scattering in laser-plasma Hohlraum targets [DE93-613719] p 2554 N94-25330

Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation [DE93-617053] p 2567 N94-25424

Expert system rule-base evaluation using real-time parallel processing [AD-A273701] p 2469 N94-25454

The IRGen infrared data base modeler p 2440 N94-25496

Advanced radiometric and interferometric milimeter-wave scene simulations p 2306 N94-25498

Engineering workstation: Sensor modeling p 2441 N94-25500

COMPUTERS

ACOS: The performance based approach to build a parallel complex object server [PB93-223816] p 2465 N94-22986

CAMAC throughput of a new RISC-based data acquisition computer at the DIII-D tokamak [DE94-001113] p 2550 N94-23182

Information technology in the service society: A twenty-first century lever [ISBN-0-309-04876-1] p 2593 N94-24833

Computerized testing system software conversion and development: Identifying software and hardware portability issues and solutions [AD-A273489] p 2462 N94-25287

CONCATENATED CODES

Separable concatenated codes with iterative map decoding for Rician fading channels p 2286 N94-22815

CONCAVITY

Generalized concavity in cooperative game theory: Characterizations in terms of the core [MEMO-1121] p 2497 N94-22708

CONCENTRATION (COMPOSITION)

Quantitative analysis in the Al-Mg-Si system with small amounts of Mg and Si [PB93-201499] p 2241 N94-23446

Exploratory report nickel and nickel compounds [PB93-223998] p 2242 N94-23496

Exploratory report antimony and antimony compounds [PB93-224004] p 2397 N94-23497

Algorithm-development activities [NASA-CR-193225] p 2420 N94-23538

Bioregenerative life support systems for microgravity [NASA-CR-195516] p 2422 N94-24810

CONCENTRATORS

The hexagonal compound parabolic concentrator design and construction [DLR-MITT-93-03] p 2396 N94-25464

CONCENTRICITY

Precision drive and speed reduction device [AD-D016004] p 2367 N94-25046

CONCRETE STRUCTURES

Alternatives for reinforcement: Fiber composites [VTT-TIED-1412] p 2230 N94-25386

CONCRETES

Impacts: NIST Building and Fire Research Laboratory (technical and societal) [PB94-113420] p 2270 N94-23737

Constitutive modelling of fiber-reinforced concrete under uniaxial tensile loading [VTT-JULK-774] p 2379 N94-25385

Frost effects on the microstructure of high strength concrete, and methods for their analysis [VTT-PUBS-126] p 2379 N94-25529

CONCURRENT PROCESSING

Causal labeled transition systems: A new approach for describing the behavior of concurrent systems [LAAS-93179] p 2447 N94-22911

Simultaneous simulation and visualization using DGL [PB93-201341] p 2453 N94-23534

Models of trace theory systems [ETN-94-95361] p 2468 N94-25226

CONDUCTING POLYMERS

The electrolyte challenge for a direct methanol-air polymer electrolyte fuel cell operating at temperatures up to 200 C p 2393 N94-23360

Template synthesis of electronically conductive polymers [AD-A273673] p 2263 N94-25409

CONDUCTION BANDS

Conductors with small Fermi energies and small gap energies [DE93-040887] p 2561 N94-23432

CONDUCTIVE HEAT TRANSFER

Local grid refinement method for the euler equations [PB93-223329] p 2317 N94-22985

Conductors with small Fermi energies and small gap energies [DE93-040887] p 2561 N94-23432

A direct approach to finding unknown boundary conditions in steady heat conduction p 2322 N94-23645

A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667

Response-coefficient method for heat-conduction transients with time-dependent inputs p 2326 N94-23671

Normal zone propagation and thermal hydraulic quenchback in a cable-in-conduit superconductor [DE94-002457] p 2271 N94-24568

An extended laser flash technique for thermal diffusivity measurement of high-temperature materials p 2238 N94-25132

Application of body fitted-coordinates in heat conduction problems [ETN-94-95338] p 2340 N94-25484

CONDUCTORS

Transient analysis of conducting half-plane problem with noncausal scattering image [PB93-225027] p 2524 N94-23110

Conductors with small Fermi energies and small gap energies [DE93-040887] p 2561 N94-23432

Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply [AD-A273149] p 2299 N94-24670

Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study [AD-A273824] p 2314 N94-25539

CONFERENCES

Proceedings of the Third International Mobile Satellite Conference (IMSC 1993) [NASA-CR-194516] p 2273 N94-22735

Proceedings of Workshop on Laser Diagnostics in Fluid Mechanics and Combustion [AD-A272808] p 2347 N94-22914

Proceedings of the Fifth Users Meeting for the Advanced Photon Source [DE93-040692] p 2531 N94-22948

New welding and finishing procedures [DE94-602022] p 2352 N94-23025

NASA Propulsion Engineering Research Center, volume 2 [NASA-CR-194719-VOL-2] p 2209 N94-23028

Distributed Operating Systems and Mach. Proceedings of the Spring 1992 Graduate Seminar on Distributed Systems [PB93-224905] p 2449 N94-23103

Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop
[PB93-220135] p 2407 N94-23129

Proceedings of the 1993 Bi-Isotropics Workshop on Novel Microwave Materials
[PB93-224772] p 2290 N94-23225

Deployable video conference table
[NASA-CASE-ARC-11950-1] p 2192 N94-23310

Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18)
p 2424 N94-23320

Space Electrochemical Research and Technology
[NASA-CP-3228] p 2390 N94-23345

Neural network research in Finland. Symposium
[PB93-224822] p 2472 N94-23463

Space technology: A study of the significance of recognition for innovators of spinoff technologies. Commercial Space Expo-USA, 1993
[NASA-CR-194833] p 2596 N94-23528

Prototype Space Technology Hall of Fame exhibit at Technology 2003: Analysis of data from computer-based questionaire
[NASA-CR-194834] p 2596 N94-23540

The Fifth Annual Thermal and Fluids Analysis Workshop
[NASA-CP-10122] p 2320 N94-23634

The Sixth Copper Mountain Conference on Multigrid Methods, part 1
[NASA-CP-3224-PT-1] p 2482 N94-23673

Physics of iron
[DE94-002002] p 2402 N94-23721

Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion
[PB94-111374] p 2194 N94-23770

National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers
[PB94-113487] p 2194 N94-23819

SpaceOps 1992: Proceedings of the Second International Symposium on Ground Data Systems for Space Mission Operations
[NASA-CR-194486] p 2497 N94-23832

The Fifth European Space Mechanisms and Tribology Symposium
[ESA-SP-334] p 2355 N94-23985

Introduction of Ceramics into Aerospace Structural Composites
[AGARD-R-795] p 2255 N94-24228

The 33rd Israel Annual Conference on Aviation and Astronautics
[ITN-94-85227] p 2153 N94-24241

Proceedings of Technology and Governance in the 1990's
[PB93-192904] p 2597 N94-24312

Report of the proceedings of the Colloquium and Workshop on Multiscale Coupled Modeling
[NASA-CP-3217] p 2410 N94-24374

The 7th Annual National Conference of Black Physics Students p 2524 N94-24583

The Third Twente Workshop on Graphs and Combinatorial Optimization: Abstracts and late extended abstracts
[PB94-110954] p 2489 N94-24652

Stability of premixed laminar flames in a stagnation point flow to general disturbances
[AD-A273429] p 2234 N94-24673

Women scientists and engineers employed in industry: Why so few? A report based on a conference
[ISBN-0-309-04991-1] p 2585 N94-24698

The 5th Engineering Foundation Conference: Advanced Heterostructure Transistors
[AD-A273508] p 2312 N94-24819

Statistical methods in physical oceanography
[AD-A273612] p 2419 N94-24948

The Ninth National Space Symposium
[ISBN-0-9616962-7-3] p 2598 N94-25006

Ferroelectric thin films 3
[AD-A273394] p 2565 N94-25027

The Future of Aerospace: Proceedings of a symposium held in honor of Alexander H. Flax
[LC-93-83945] p 2631 N94-25065

National Academy of Sciences-Academy of Sciences of the USSR Workshop on the Mechanics of Ice and its Applications
[AD-A273338] p 2419 N94-25088

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues
[AD-A273664] p 2251 N94-25451

CONFIDENCE LIMITS

Subset selection for the best of two populations: Tables of the expected subset size
[PB93-237857] p 2494 N94-23546

Asymptotic confidence intervals for the length of the shortt under random censoring
[PB93-237816] p 2494 N94-23774

Subset selection with a generalized selection goal based on a loss function
[PB94-111192] p 2494 N94-23798

A comparison of approximate interval estimators for the Bernoulli parameter
[NASA-CR-191585] p 2458 N94-24680

CONFIGURATION INTERACTION

Relativistic configuration interaction calculation of the correlation energies of highly-charged ions
[DE94-001055] p 2532 N94-22988

CONFIGURATION MANAGEMENT

Guide to software configuration management
[ESA-PSS-05-09-ISSUE-1] p 2450 N94-23229

Planning: Management of predictability and uncertainty and keeping abreast of developments
p 2520 N94-23967

CONFINEMENT

Overview of the ATF stellarator program
[DE94-000371] p 2550 N94-23462

The role of the radial electric field in confinement and transport in H-mode and VH-mode discharges in the DIII-D tokamak
[DE94-002746] p 2551 N94-23782

Fusion plasma theory project summaries
[DE94-001712] p 2551 N94-23808

Solutions of the 2-D Helmoholtz equation for optical waveguides
[DE93-616840] p 2547 N94-25209

A scalar-vector model of quark-antiquark interaction under linear confinement
[DE93-616871] p 2538 N94-25317

CONFORMAL MAPPING

Computation of the loads on the AH-1/OLS model rotor in forward flight and comparison with wind tunnel tests
[ISL-CO-230/92] p 2176 N94-23146

Coadjoint orbits and conformal field theory
[DE94-002285] p 2523 N94-24658

Super Beltrami differentials and N equal to 4 superconformal anomalies
[DE93-613047] p 2491 N94-25166

Image remapping strategies applied as protheses for the visually impaired p 2444 N94-25363

CONGENITAL ANOMALIES

Echocardiographic screening of aircrew candidates
p 2424 N94-23319

CONGRESSIONAL REPORTS

Federal alternative fuel program light duty vehicle operations
[DE93-040663] p 2264 N94-22878

Proceedings of Technology and Governance in the 1990's
[PB93-192904] p 2597 N94-24312

CONGRUENCES

Transition system specifications in stalk format with bisimulation as a congruence
[PB94-110608] p 2453 N94-23707

CONICAL FLOW

Design project: LONGBOW supersonic interceptor
[NASA-CR-195510] p 2180 N94-24581

CONICAL SCANNING

Analysis of open-loop conical scan pointing error and variance estimators p 2291 N94-23263

CONICAL SHELLS

Stability analysis of anisotropic conical shells
[PB94-119054] p 2377 N94-24645

CONIFERS

The measurement and analysis of leaf spectral reflectance of two stands of loblolly pine populations
p 2389 N94-24442

CONJUGATE GRADIENT METHOD

Extending substructure based iterative solvers to multiple load and repeated analyses
[NASA-CR-194822] p 2466 N94-23504

An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554

A matrix analysis of conjugate gradient algorithms
[DE94-002546] p 2454 N94-23796

CONJUGATION

Planar poly(p-phenylene) derivatives: Ladder formation for maximization of extended conjugation
[AD-A273220] p 2260 N94-24922

CONSERVATION EQUATIONS

Conservation equations for reacting gas flow
[PB94-111168] p 2334 N94-24574

CONSERVATION LAWS

Nonlocal models in continuum mechanics
[DE93-040146] p 2316 N94-22870

An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554

Energy and maximum norm estimates for nonlinear conservation laws
[NASA-CR-195091] p 2569 N94-24109

Characteristic method for one-dimensional scalar hyperbolic conservation laws with stiff source terms
[PB93-237675] p 2491 N94-24954

CONSTELLATIONS

Odyssey personal communications satellite system
p 2282 N94-22787

CONSTITUTIVE EQUATIONS

Nonlocal models in continuum mechanics
[DE93-040146] p 2316 N94-22870

On the deformation kinetics constitutive law of plastic deformation: The rate equation p 2161 N94-24289

Constitutive modelling of fiber-reinforced concrete under uniaxial tensile loading
[VTT-JULK-774] p 2379 N94-25385

CONSTRAINTS

The instant sequencing task: Toward constraint-checking a complex spacecraft command sequence interactively p 2504 N94-23875

Planning: Management of predictability and uncertainty and keeping abreast of developments
p 2520 N94-23967

Modeling of database constraints in active databases
[AD-A273484] p 2592 N94-24691

On BRST quantization of constrained systems
[ETN-94-95386] p 2570 N94-25258

CONSTRUCTION

Limiting factors for carbon based chemical double layer capacitors p 2394 N94-23365

Accelerator-based neutrino oscillation searches
[DE94-000818] p 2626 N94-23515

A simulation system for Space Station extravehicular activity p 2434 N94-24192

Collaborating with our customers: NIST building and fire research laboratory
[PB94-110194] p 2272 N94-24955

CONTACT POTENTIALS

Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772

CONTACT RESISTANCE

Advanced research and technology development of MCFCs
[DE94-001918] p 2389 N94-22723

Fully coupled nonlinear thermomechanical analysis including general contact in PALM2D
[DE94-001661] p 2568 N94-23216

CONTACTORS

Development of a power electronics unit for the Space Station plasma contactor
[NASA-TM-106486] p 2222 N94-25201

CONTAINERLESS MELTS

Workshop on the Thermophysical Properties of Molten Materials
[NASA-CP-10121] p 2246 N94-25120

CONTAMINANTS

Contaminant effects in solid oxide fuel cells
[DE94-002963] p 2395 N94-23785

CONTAMINATION

The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596

Microbial biofilm formation and its consequences for the CELSS program
[NASA-CR-195146] p 2438 N94-24706

CONTINENTAL SHELVES

Nutrients and light as factors controlling phytoplankton biomass on the Dutch continental shelf (North Sea), 1988-1990
[PB94-111143] p 2418 N94-24601

CONTINUITY (MATHEMATICS)

Introduction to a behavioral approach for continuous time systems
[ETN-94-95301] p 2492 N94-25277

CONTINUITY EQUATION

A multigrid solver for the semiconductor equations
p 2482 N94-23674

Unified approach for incompressible flows
p 2342 N94-25356

CONTINUOUS RADIATION

Measurements and modeling of multitone, low-frequency accustic data from the Arraial do Cabo range
[AD-A273406] p 2530 N94-25073

Remote vibration measurements at a sud aviation alouette 3 helicopter with a CW CO2-laser system
[AD-A273818] p 2190 N94-25516

CONTINUUM MECHANICS

Nonlocal models in continuum mechanics
[DE93-040146] p 2316 N94-22870

Conservation equations for reacting gas flow
[PB94-111168] p 2334 N94-24574

CONTINUUMS

Continuum representations of cellular solids
[DE94-001706] p 2375 N94-23217

CONTOURS

Development of a code for wall contour design in the transonic region of axisymmetric and square nozzles
[NASA-CR-194857] p 2167 N94-23625

CONTRACT MANAGEMENT

B-2 bomber: Assessment of DOD's response to mandated certifications and reports
[AD-A273179] p 2184 N94-25152

C-17 lot 3 production contract
[AD-A273180] p 2174 N94-25153

CONTRACTORS

Panel to review EOSDIS plans
[NASA-CR-195088] p 2387 N94-24303

CONTRAROTATING PROPELLERS

Counterrotating aircraft propulsor blades
[CA-PATENT-1-319-357] p 2186 N94-23255

CONTROL BOARDS

Programmable display pushbuttons on the Space Station's telerobot control panel p 2435 N94-24198

Evaluation of the UH-1N instrument panel
[AD-A273145] p 2186 N94-24774

CONTROL EQUIPMENT

Design of central control system for Large Helical Device (LHD)
[NIFS-258] p 2553 N94-24623

Cockpit control system
[NASA-CR-195488] p 2190 N94-24957

CONTROL MOMENT GYROSCOPES

Results of a laboratory experiment that tests rotating unbalanced-mass devices for scanning gimbaled payloads and free-flying spacecraft
[NASA-TP-3458] p 2269 N94-23574

CONTROL SIMULATION

Operating the Daisy facility to perform control experiments
[ISBN-0-315-83554-0] p 2196 N94-22889

Stability questions in predictive control
[OUEL-1970/93] p 2477 N94-25469

Adaptive predictive control of the benchmark plant
[OUEL-1972/93] p 2477 N94-25470

CONTROL STABILITY

How much integral action can a control system tolerate?
[OUEL-1923/92] p 2471 N94-23147

Reduced-order modelling and control of a class of systems for which balanced truncation is Hankel-norm optimal
[OUEL-1922/92] p 2472 N94-23163

Control of a serpentine manipulator with collision avoidance p 2368 N94-23232

Design of a new high-performance pointing controller for the Hubble Space Telescope
[NASA-CR-193891] p 2364 N94-24088

Control of nonlinear systems represented in quasilinear form
[NASA-CR-194840] p 2475 N94-24760

Parametric uncertainty reduction in robust multivariable control
[AD-A273412] p 2460 N94-24927

Aircraft digital flight control technical review
p 2163 N94-25106

Stability questions in predictive control
[OUEL-1970/93] p 2477 N94-25469

CONTROL SURFACES

Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle
[NASA-TM-4533] p 2170 N94-24716

CONTROL SYSTEMS DESIGN

A novel process monitoring and control system based on a neural manufacturing concept
[DE94-001516] p 2471 N94-23011

Nuclear propulsion control and health monitoring
p 2217 N94-23071

How much integral action can a control system tolerate?
[OUEL-1923/92] p 2471 N94-23147

The Telecommunications and Data Acquisition Report
[NASA-CR-194766] p 2290 N94-23256

Experimental modification and identification of the DSS-13 antenna control system model
p 2291 N94-23260

Link monitor and control operator assistant: A prototype demonstrating semiautomated monitor and control
p 2292 N94-23267

Beam-waveguide antenna servo design issues for tracking low earth-orbiting satellites
p 2292 N94-23268

Viewing hybrid systems as products of control systems and automata
[NASA-CR-194792] p 2472 N94-23300

A reliable algorithm for optimal control synthesis
[NASA-CR-194809] p 2472 N94-23332

Conceptual design and architecture of hexapod robotic vehicles for the (L)OVLA project p 2369 N94-23405

Walking machines for space p 2369 N94-23406

Marsohkod movement control p 2370 N94-23418

Perspective of creation of means for collecting information concerning transport situation
p 2370 N94-23420

Bond graph modeling, simulation, and reflex control of the Mars planetary automatic vehicle
p 2370 N94-23424

A comparison of two multi-variable integrator windup protection schemes
[NASA-CR-194436] p 2190 N94-23590

Thrust vectoring theory, laboratory and flight tests
p 2155 N94-24251

LSS systems planning and performance program
[NASA-CR-193882] p 2196 N94-24309

Finite element based electric motor design optimization p 2315 N94-24411

Octave: A MARSYAS post-processor for computer-aideed control system design
p 2465 N94-24422

A homotopy algorithm for digital optimal projection control GASD-HADOC
[NASA-CR-193881] p 2456 N94-24470

Active control of buildings during earthquakes
[NASA-TM-109033] p 2271 N94-24473

Alternative control techniques document: NOx emissions from stationary reciprocating internal combustion engines
[PB94-104494] p 2398 N94-24476

Cockpit control system conceptual design
[NASA-CR-195543] p 2190 N94-24551

Robust stability of second-order systems
[NASA-CR-195175] p 2488 N94-24564

Design of central control system for Large Helical Device (LHD)
[NIFS-258] p 2553 N94-24623

The experimental physics and industrial control system architecture: Past, present, and future
[DE94-002639] p 2457 N94-24626

Human-like robots for space and hazardous environments
[NASA-CR-195549] p 2365 N94-24703

Controlled invariance of nonlinear systems: Nonexact forms speak louder than exact forms
[PB93-237790] p 2475 N94-24755

Control of nonlinear systems represented in quasilinear form
[NASA-CR-194840] p 2475 N94-24760

Design of a wheeled articulating land rover
[NASA-CR-195520] p 2365 N94-24806

Intelligent control of chemical vapor deposition processes
[AD-A273356] p 2261 N94-24937

Cockpit control system
[NASA-CR-195488] p 2190 N94-24957

NASA LaRC Workshop on Guidance, Navigation, Controls, and Dynamics for Atmospheric Flight, 1993
[NASA-CP-10127] p 2162 N94-25096

Parametric uncertainty modeling for application to robust control p 2163 N94-25103

Feedback control laws for highly maneuverable aircraft
[NASA-CR-195195] p 2190 N94-25176

New Technologies for Space Avionics, 1993
[NASA-CR-195157] p 2272 N94-25193

Practical evaluation of robust control for a class of nonlinear mechanical dynamic systems
[ISBN-9-03-860092-5] p 2475 N94-25224

Genetic algorithms in control systems engineering
[RR-470] p 2463 N94-25315

CONTROL THEORY

Balancing for unstable nonlinear systems
[MEMO-1118] p 2469 N94-22705

Nonlinear state space H(sub infinity) control theory
[MEMO-1119] p 2469 N94-22706

On dynamic input-output linearization of discrete-time nonlinear systems
[MEMO-1123] p 2447 N94-22711

Identification for robust control using an H(sub infinity) norm
[EUT-92-E-261] p 2470 N94-22873

Real-time dynamics and control strategies for space operations of flexible structures
[NASA-CR-194794] p 2203 N94-23618

Coordinate-free interpretations of the optimal costs for Lq problems subject to implicit systems
[PB94-118700] p 2473 N94-23760

Drag reduction at a plane wall p 2327 N94-24140

Next generation initiation techniques
p 2412 N94-24383

A homotopy algorithm for digital optimal projection control GASD-HADOC
[NASA-CR-193881] p 2456 N94-24470

Discrete-time H(infinity) control problem with strictly proper measurement feedback
[NASA-CR-195089] p 2473 N94-24542

Japanese aerospace science and technology 1992. A bibliography with indexes
[NASA-SP-7104] p 2631 N94-24585

Squaring-down and the problems of almost-zeros for continuous-time systems
[PB93-237758] p 2489 N94-24608

Discrete time minimum entropy H(infinity) control problem
[PB93-237808] p 2474 N94-24609

Asymptotic correctors: The LTR
[PB93-199701] p 2474 N94-24627

Controlled invariance of nonlinear systems: Nonexact forms speak louder than exact forms
[PB93-237790] p 2475 N94-24755

Control of nonlinear systems represented in quasilinear form
[NASA-CR-194840] p 2475 N94-24760

Genericity of stabilizability for time-delay systems
[PB93-237725] p 2475 N94-24762

NASA LaRC Workshop on Guidance, Navigation, Controls, and Dynamics for Atmospheric Flight, 1993
[NASA-CP-10127] p 2162 N94-25096

Hypersonic vehicle control law development using H(infinity) and micron-synthesis p 2163 N94-25104

Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108

Modeling transonic aerodynamic response using nonlinear systems theory for use with modern control theory p 2164 N94-25112

Optimal RTLS abort trajectories for an HL-20 personnel launch vehicle p 2165 N94-25114

Feedback control laws for highly maneuverable aircraft
[NASA-CR-195195] p 2190 N94-25176

MIMO system identification for H(infinity) robust control: A frequency domain approach with minimum error bounds
[ETN-94-95354] p 2476 N94-25262

On-line control of dynamic systems using feedforward neural networks
[RR-457] p 2476 N94-25307

The phase response of nonlinear systems
[RR-458] p 2476 N94-25308

Kernels of anti-causal operators and the multivariable generalized predictive control problem
[MATHS-REPT-A-191] p 2476 N94-25428

Advances in generalized and constrained generalized predictive control with application to a dynamometer model
[MATHS-REPT-A-192] p 2476 N94-25429

CONTROL UNITS (COMPUTERS)

AMICAL: An aid for architectural synthesis and exploration of control circuits
[ETN-94-95177] p 2308 N94-23154

CONTROL VALVES

Computer control of an electro-mechancial regulator for providing positive pressure breathing and an electronic G-valve for human +Gz research
[DCIEM-93-05] p 2437 N94-24299

Controller modeling and evaluation for PCV electro-mechanical actuator p 2371 N94-24441

Electro-rheological control valve
[AD-D015997] p 2367 N94-25055

CONTROLLABILITY

Controllability of free-piston Stirling engine/linear alternator driving a dynamic load
[NASA-TM-106497] p 2521 N94-24302

CONTROLLED ATMOSPHERES

Influence of sintering atmospheres on the aluminum sintering characteristics
[DE93-632412] p 2239 N94-22965

A pressurized thermogravimetric analyzer for use in studies of gas/solid systems
[DE94-001224] p 2342 N94-22989

CONTROLLED FUSION

Massachusetts Institute of Technology Plasma Fusion Center 1992-1993 report to the President
[DE94-001725] p 2548 N94-22721

CONTROLLERS

Nuclear propulsion control and health monitoring
p 2217 N94-23071

Spline screw multiple rotations mechanism
[NASA-CASE-GSC-13452-1] p 2352 N94-23078

A comparison of two multi-variable integrator windup protection schemes
[NASA-CR-194436] p 2190 N94-23590

Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction
[NASA-CR-189645] p 2525 N94-23698

Particle size measurement for the control of industrial crystallizers
[PB94-119104] p 2562 N94-23766
Design of a new high-performance pointing controller for the Hubble Space Telescope
[NASA-CR-193891] p 2364 N94-24088
Hand controller commonality evaluation process
p 2435 N94-24197
Aircraft empennage structural detail design
[NASA-CR-195496] p 2179 N94-24332
Neural network-based control using Lyapunov functions p 2477 N94-24433
Controller modeling and evaluation for PCV electro-mechanical actuator p 2371 N94-24441
Torque equilibrium attitudes for the Space Station
p 2208 N94-24449
A homotopy algorithm for digital optimal projection control GASD-HADOC
[NASA-CR-193881] p 2456 N94-24470
Active control of buildings during earthquakes
[NASA-TM-109033] p 2271 N94-24473
Discrete-time H(infinity) control problem with strictly proper measurement feedback
[NASA-CR-195089] p 2473 N94-24542
Discrete time minimum entropy H(infinity) control problem
[PB93-237808] p 2474 N94-24609
The experimental physics and industrial control system architecture: Past, present, and future
[DE94-002639] p 2457 N94-24626
Control of nonlinear systems represented in quasilinear form
[NASA-CR-194840] p 2475 N94-24760
The H(sub infinity) optimal controller design and reduction for the inertial hold mode of the attitude control system of the XTE spacecraft
[NASA-CR-195137] p 2366 N94-24846
Exploiting structure: Introduction and motivation
[NASA-CR-195136] p 2490 N94-24847
Parametric uncertainty reduction in robust multivariable control
[AD-A273412] p 2460 N94-24927
On-line evaluation of multiloop digital controller performance p 2163 N94-25105
Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108
Development of a power electronics unit for the Space Station plasma contactor
[NASA-TM-106486] p 2222 N94-25201
Practical evaluation of robust control for a class of nonlinear mechanical dynamic systems
[ISBN-9-03-860092-5] p 2475 N94-25224
Automatic pressure control system for the Wright Laboratory Compressor Research Facility
[AD-A273827] p 2194 N94-25522
Flight controller design using mixed H2/H infinity optimization with a singular H infinity constraint
[AD-A273831] p 2191 N94-25525

CONVECTION
Atmospheric numerical modeling resource enhancement and model convective parameterization/scale interaction studies
[NASA-CR-194769] p 2400 N94-23124
A method to simulate viscous diffusion of vorticity by convective transport of vortices at a non-solenoidal velocity
[DE94-001777] p 2318 N94-23220
On testing two major cumulus parameterization schemes using the CSU regional atmospheric modeling system
[DE94-000703] p 2407 N94-23284
Convective organization in the Pacific ITCZ: Merging OLR, TOVS, and SSM/I information
[NASA-CR-194850] p 2408 N94-23619
Convection equation modeling: A non-iterative direct matrix solution algorithm for use with SINDA
p 2323 N94-23651
A dual reciprocal boundary element formulation for viscous flows p 2325 N94-23666
Miniature convection cooled plug-type heat flux gauges
[NASA-TM-106483] p 2344 N94-24069
MAMS data for the Convection and Moisture Experiment (CAMEX)
[NASA-TM-108435] p 2409 N94-24080
Convective instabilities in traveling fronts of addition polymerization p 2226 N94-24352
Polymer morphologh p 2226 N94-24353
Parameterization of sub-grid scale convection
p 2413 N94-24386
Chemistry on the mesoscale: Modeling and measurement issues p 2413 N94-24390
CAPE for CaPE p 2416 N94-24409
Effects of thermal-solutal convection on temperature and solutal fields under various gravitational orientations
p 2267 N94-24451

CONVECTION-DIFFUSION EQUATION
On the dynamics of some grid adaption schemes
[NASA-CR-195092] p 2454 N94-24110

CONVECTIVE FLOW
Atmospheric numerical modeling resource enhancement and model convective parameterization/scale interaction studies
[NASA-CR-194769] p 2400 N94-23124
A dual reciprocal boundary element formulation for viscous flows p 2325 N94-23666
Comparison of numerical simulation and experimental data for steam-in-place sterilization
p 2326 N94-23669
Scientific goals of the Cooperative Multiscale Experiment (CME) p 2411 N94-24381
Grand challenge scientific questions in coupled modeling p 2412 N94-24382
Parameterization of sub-grid scale convection
p 2413 N94-24386

CONVECTIVE HEAT TRANSFER
Numerical investigation of two- and three-dimensional heat transfer in expander cycle engines
p 2213 N94-23048
Solution of mixed convection heat transfer from isothermal in-line fins p 2321 N94-23644
Features of a SINDA/FLUINT model of a liquid oxygen supply line p 2322 N94-23649
Prediction of three sigma maximum dispersed density for aerospace applications p 2207 N94-23654
A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667
The annual pressure cycle on Mars: Results from the LMD Martian atmospheric general circulation model
p 2619 N94-24884
Analysis of the effects of wake passage on heat transfer in a linear turbine cascade
[AD-A273729] p 2339 N94-25446

CONVERGENCE
Reliability enhancement of Navier-Stokes codes through convergence enhancement p 2216 N94-23064
Incomplete corrections in nonlinear problems
[PB93-225746] p 2479 N94-23106
Nested Krylov methods and preserving the orthogonality p 2483 N94-23681
Multigrid methods for differential equations with highly oscillatory coefficients p 2484 N94-23685
A comparison of locally adaptive multigrid methods: LDC, FAC and FIC p 2485 N94-23692
A nonconforming multigrid method using conforming subspaces p 2485 N94-23695
Infinite divisible and stable distributions modulo 1
[PB94-110640] p 2495 N94-23815
Combinatory reduction systems: Introduction and survey
[PB94-110582] p 2457 N94-24570

CONVERGENT NOZZLES
CFD modeling of microwave electrothermal thrusters
p 2216 N94-23066

CONVERGENT-DIVERGENT NOZZLES
Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055
Computation of propulsion-related flowfields using unstructured adaptive meshes p 2215 N94-23056
Theoretical studies of a molecular beam generator
[NASA-CR-194779] p 2540 N94-23485

CONVEXITY
Split spline screw
[NASA-CASE-GSC-13434-1] p 2352 N94-23082
Characterization of measures with a convex range: A generalization of Lyapounov's theorem
[PB93-220523] p 2523 N94-23094
Characterization of measures with a convex matrix-k-range
[PB93-220655] p 2479 N94-23098

CONVOLUTION INTEGRALS
The state space method for integro-differential equations of convolution type with rational matrix symbols
[ETN-94-95379] p 2491 N94-25244

COOL STARS
Chromospheric activity in agol binaries
[AD-A273546] p 2602 N94-24557

COOLANTS
SP-100 heat transport technology development
[DE94-000769] p 2218 N94-23452

COOLERS
Thermoelectric cooled, purge-and-trap device for enhancing the utility of fiber optic VOC sensors
[DE94-001772] p 2541 N94-22722

COOLING
Design of microchannels for cryostabilization of high temperature superconducting magnets
[DE94-001324] p 2559 N94-22993
Determination of the compatibility between structural alloys and molten metals at high temperatures
[DE94-000954] p 2241 N94-23434
SP-100 heat transport technology development
[DE94-000769] p 2218 N94-23452
Matter-wave interferometry with laser cooled atoms
[AD-A273249] p 2536 N94-24717
Flow and temperature distribution in a naturally stratified thermal storage tank
[AD-A273511] p 2336 N94-24821

COOLING SYSTEMS
The design of a turbine vane cooling system used in the topping cycle
[OUEL-1963/92] p 2353 N94-23164
Operation Friction: Development and introduction of personal cooling for CH124 Sea King aircrew
[DCIEM-93-06] p 2433 N94-24119
Hydride thermodynamic machines
[VTT-JULK-768] p 2571 N94-25416

COORDINATE TRANSFORMATIONS
Aeronautical satellite antenna steering using magnetic field sensors p 2289 N94-22836

COORDINATES
Tools for visualizing landscape pattern for large geographic areas
[DE94-001121] p 2388 N94-24757

COPOLYMERIZATION
Microstructure of styrene methyl methacrylate copolymers grafted onto polybutadiene seeds
[ETN-94-95360] p 2262 N94-25225

COPOLYMERS
Pyroelectric sensors in copolymer integrated on silicon
[LAAS-93044] p 2342 N94-22902
Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763
Effects of ionizing radiation on modern ion exchange materials
[DE94-001569] p 2535 N94-24505
Polythiophene derivative with a side chain chromophore as photovoltaic and photorefractive materials
[AD-A273245] p 2260 N94-24813

COPPER
Strength, acoustic evaluation and metallurgy of diffusion bonds
[DE94-001804] p 2243 N94-23717
Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789
Scanning probe lithography. 2: Selective chemical vapor deposition of copper into scanning tunneling microscope-defined patterns
[AD-A273304] p 2547 N94-25144
Dispersion of Rh/Cu in a sol-gel matrix. Highly chemo- and stereoselective catalyst for the reduction of alkynes to Z-alkenes
[AD-A273306] p 2262 N94-25145

COPPER ALLOYS
Irradiation damage behavior of low alloy steel wrought and weld materials
[DE94-000519] p 2239 N94-22999
New extensions in the development of deformation processed metal-metal matrix composites
[DE94-000692] p 2227 N94-23004
Phase transformations in Cu-Zr multilayers
[DE94-000393] p 2241 N94-23297
Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556
Multilayer relaxation and surface structure of ordered alloys
[NASA-TM-106433] p 2243 N94-23578
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784

COPPER OXIDES
Spin-polaron theory of high-T(c) superconductivity. 2: Electronic structure of the CuO2 planes
[DE93-019197] p 2556 N94-22919
Anomalous magnetoresistance behavior of superconducting Nd(2-x)Ce(x)CuO(4-y) single crystal
[DE94-000806] p 2558 N94-22941
A valence-fluctuation theory of cuprate superconductivity
[DE94-000887] p 2558 N94-22942

COPPER SELENIDES
Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296

CORE FLOW
Steady induction effects in geomagnetism. Part 1C: Geomagnetic estimation of steady surficial core motions: Application to the definitive geomagnetic reference field models
[NASA-TP-3272-PT-1C] p 2403 N94-24465

CORE SAMPLING
A system for the challenging task of collecting samples from a comet surface p 2358 N94-24007

CORONARY ARTERY DISEASE

Cardiopulmonary Aspects in Aerospace Medicine [AGARD-LS-189] p 2423 N94-23313

Aeromedical disposition for coronary artery disease p 2423 N94-23316

Primary prevention of coronary heart disease p 2423 N94-23317

CORONAS

Flue gas cleaning by pulse corona streamer [EUT-93-E-272] p 2268 N94-23174

CORRECTION

A complete public archive for the Einstein IPC [NASA-CR-189316] p 2453 N94-23559

CORRELATION

Correlation function estimator performance in non-Gaussian spherically invariant random processes [AD-A273498] p 2496 N94-24951

Detection of velocity in high temperature liquid metals p 2247 N94-25127

First results from the Fennoscandian GPS networks p 2405 N94-25204

Direct measurement of turbulent dissipation rate using dual laser doppler velocimeters [AD-A273740] p 2340 N94-25530

CORRELATION COEFFICIENTS

Synthesis of passive microwave and radar altimeter data for estimating accumulation rates of polar snow [NASA-CR-194864] p 2382 N94-23573

Radar target discrimination systems using artificial neural network topology [AD-D015984] p 2301 N94-25041

CORROSION

Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics [DE93-040094] p 2348 N94-23203

Evaluation of inorganic zinc-rich primers using Electrochemical Impedance Spectroscopy (EIS) p 2237 N94-23233

Statistical procedures for corrosion studies [PB93-199412] p 2244 N94-23802

Diffusion on Cu surfaces p 2251 N94-24428

Use of scanning tunneling microscope in corrosion studies [VTT-TIED-1416] p 2250 N94-25346

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 6: Electric Power Industry [AD-A273668] p 2250 N94-25408

A preliminary evaluation of the phosphazene resin PPZ [AD-A273674] p 2263 N94-25410

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations [AD-A273662] p 2251 N94-25449

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues [AD-A273663] p 2251 N94-25450

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues [AD-A273664] p 2251 N94-25451

CORROSION PREVENTION

Chromate-free talc chemical conversion coatings for aluminum alloys [DE94-001567] p 2238 N94-22932

Statistical procedures for corrosion studies [PB93-199412] p 2244 N94-23802

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 4: Oil/Gas Pipeline [AD-A273665] p 2250 N94-25405

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5A: Corrosion: General issues [AD-A273666] p 2250 N94-25406

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5B: Corrosion: General issues [AD-A273667] p 2250 N94-25407

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 6: Electric Power Industry [AD-A273668] p 2250 N94-25408

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings [AD-A273661] p 2251 N94-25448

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations [AD-A273662] p 2251 N94-25449

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues [AD-A273663] p 2251 N94-25450

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues [AD-A273664] p 2251 N94-25451

CORROSION RESISTANCE

Chromate-free talc chemical conversion coatings for aluminum alloys [DE94-001567] p 2238 N94-22932

Evaluation of inorganic zinc-rich primers using Electrochemical Impedance Spectroscopy (EIS) p 2237 N94-23233

New method for increasing machine service-life, phase 2 [PB93-200707] p 2354 N94-23533

Feasibility study of shot-peening modeling [CTN-94-60926] p 2244 N94-24170

Electrochemical behavior of ion-plated TiN and Cu-Cr coatings [AD-A273411] p 2235 N94-24784

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 4: Oil/Gas Pipeline [AD-A273665] p 2250 N94-25405

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5A: Corrosion: General issues [AD-A273666] p 2250 N94-25406

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5B: Corrosion: General issues [AD-A273667] p 2250 N94-25407

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 6: Electric Power Industry [AD-A273668] p 2250 N94-25408

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings [AD-A273661] p 2251 N94-25448

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations [AD-A273662] p 2251 N94-25449

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues [AD-A273663] p 2251 N94-25450

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues [AD-A273664] p 2251 N94-25451

CORROSION TESTS

Electrochemical behavior of ion-plated TiN and Cu-Cr coatings [AD-A273411] p 2235 N94-24784

CORRUGATING

Rail Corrugations [ILR-BER-59] p 2269 N94-23581

A rail corrugation theory which allows for contact patch size p 2269 N94-23582

A rail joint: The possible initiator of corrugation? p 2269 N94-23583

A linear model for corrugation and its limit of validity p 2269 N94-23584

Lateral high frequency oscillations and stability of a wheel rolling on a flexible track p 2269 N94-23585

Wear characteristics of technical dry rolling/sliding systems with relations to corrugation problems p 2269 N94-23586

Surface analysis of corrugated rail treads p 2270 N94-23587

Surface observations of stick-slip oscillations in tightly conformal wheel/rail contacts p 2270 N94-23588

COSMIC DUST

The three-dimensional structure of the infrared cirrus [NASA-CR-194870] p 2410 N94-24097

Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer [AD-A273800] p 2406 N94-25535

COSMIC RAYS

Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for February, March, 1993, and late data [PB93-198323] p 2626 N94-23738

Analysis of SOFCAL calibration data [NASA-CR-193910] p 2345 N94-25000

Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments [AD-A273639] p 2628 N94-25031

Measuring track densities in lunar grains by image analysis p 2623 N94-25355

COSMOLOGY

Two populations and models of gamma ray bursts [NASA-CR-194762] p 2629 N94-22947

The current status of observational constraints on cosmic strings [DE94-001505] p 2601 N94-23010

Tensor-scalar cosmological models and their relaxation toward general relativity [PB93-220796] p 2601 N94-23099

Structure in gamma ray burst time profiles: Correlations with other observables p 2579 N94-24431

Cosmic wake fields [DE93-616849] p 2604 N94-25215

The scattering and collision of gravitational waves in Friedmann-Robertson-Walker open universes [MATHS-REPT-A-193] p 2406 N94-25430

COST ANALYSIS

US Department of Energy phaseout of CFC-refrigerants [DE94-001668] p 2397 N94-23016

Life cycle cost modeling of conceptual space vehicles [NASA-CR-194813] p 2203 N94-23329

Coordinate-free interpretations of the optimal costs for Lq problems subject to implicit systems [PB94-118700] p 2473 N94-23760

Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion [PB94-111374] p 2194 N94-23770

Estimating the Deep Space Network modification costs to prepare for future space missions by using major cost drivers p 2520 N94-23968

A minimum cost tolerance allocation method for rocket engines and robust rocket engine design p 2222 N94-24419

Tokamak Physics Experiment (TPX) cost and performance trade studies using supercode [DE94-002720] p 2553 N94-24628

The cetaceopteryx: A global range military transport aircraft [NASA-CR-195519] p 2181 N94-24711

Advanced launch system. Advanced development oxidizer turbopump program [NASA-CR-193920] p 2367 N94-25174

Relevant costs or full costs? Explaining why managers use capacity cost allocations for short term decisions [ISBN-9-06-215364-X] p 2587 N94-25279

COST EFFECTIVENESS

Cost benefits of advanced software: A review of methodology used at Kennedy Space Center p 2464 N94-23240

Echocardiographic screening of aircrew candidates p 2424 N94-23319

A minimum cost tolerance allocation method for rocket engines and robust rocket engine design p 2222 N94-24419

Overview of the status and progress in photovoltaics research in the United States [DE94-000981] p 2395 N94-24512

PERCIVAL mission to Mars [NASA-CR-195541] p 2195 N94-24995

Aviation: The timeless industry p 2165 N94-25068

COST ESTIMATES

US Department of Energy phaseout of CFC-refrigerants [DE94-001668] p 2397 N94-23016

Cost benefits of advanced software: A review of methodology used at Kennedy Space Center p 2464 N94-23240

Life cycle cost modeling of conceptual space vehicles [NASA-CR-194813] p 2203 N94-23329

Low power ground-based laser illumination for electric propulsion applications [NASA-CR-194444] p 2219 N94-23555

Estimating the Deep Space Network modification costs to prepare for future space missions by using major cost drivers p 2520 N94-23968

A methodology for software cost estimation using machine learning techniques [AD-A273158] p 2459 N94-24775

C-17 lot 3 production contract [AD-A273180] p 2174 N94-25153

COST REDUCTION

SATCOM simulator speeds MSS deployment and lowers costs p 2287 N94-22822

Reduced cost alternatives to premise wiring using ATM and microcellular technologies p 2314 N94-23239

Task 1: Health management demonstration. Task 2: Process management environment and support of enterprise integration. Task 3: New algorithm development in the PME [NASA-CR-188268] p 2430 N94-23290

Amorphous silicon PVMaT, phase 2A [DE93-018221] p 2390 N94-23295

Review of the probabilistic failure analysis methodology and other probabilistic approaches for application in aerospace structural design [NASA-TP-3434] p 2376 N94-23342
Engineering for profitability [PNR-90990] p 2595 N94-23580
Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion [PB94-111374] p 2194 N94-23770
National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers [PB94-113487] p 2194 N94-23819
Strategies in transition p 2498 N94-23833
Future trends in NASA space operations p 2498 N94-23836
Toward lowering the cost of mission operations p 2519 N94-23960
Evaluation of turbulence models in the PARC code for transonic diffuser flows [NASA-TM-106391] p 2168 N94-24084
The Far Ultraviolet (FUV) auroral imager for the Inner Magnetospheric Imager (IMI) mission: Options p 2209 N94-24453
Advanced avionics architecture and technology review. Executive summary and volume 1: Avionics tech nology. Volume 2: Avionics systems engineering [AD-A273630] p 2186 N94-24733
New Technologies for Space Avionics, 1993 [NASA-CR-195157] p 2272 N94-25193
Appendix A: Proposed statement of work, 1994 p 2272 N94-25194
New Ways Of Doing Business (NWODB) cost quantification analysis [NASA-CR-195186] p 2586 N94-25197
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 6: Electric Power Industry [AD-A273668] p 2250 N94-25408

COSTS
Generalized concavity in cooperative game theory: Characterizations in terms of the core [MEMO-1121] p 2497 N94-22708
KSC management training system project p 2574 N94-23246
Engineering for profitability [PNR-90990] p 2595 N94-23580
A multilevel cost-space approach to solving the balanced long transportation problem p 2483 N94-23678
Toward lowering the cost of mission operations p 2519 N94-23960
Estimating the Deep Space Network modification costs to prepare for future space missions by using major cost drivers p 2520 N94-23968
Tokamak Physics Experiment (TPX) cost and performance trade studies using supercode [DE94-002720] p 2553 N94-24628
Aqueous alkaline cleaners: An alternative to organic solvents [AD-A273510] p 2260 N94-24848

COUCHES
Concepts and embodiment design of a reentry recumbent seating system for the NASA Space Shuttle [NASA-CR-195504] p 2438 N94-24667
Design of a recumbent seating system [NASA-CR-195503] p 2438 N94-24786

COUETTE FLOW
On streak spacing in wall-bounded turbulent flows p 2331 N94-24159
The influence of flow type, particle type and gravity on orthokinetic coagulation [ETN-94-95333] p 2267 N94-25060

COUGH
Asthma in aircrew p 2425 N94-23327

COULOMB POTENTIAL
Localized excitations in competing bond-order-wave, charge-density-wave and spin-density-wave systems. 2: Competing charge-density-wave and spin-density-wave [DE93-617131] p 2538 N94-25388

COUNTER ROTATION
Two stage turbine for rockets p 2215 N94-23059
Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator [NASA-TM-106468] p 2166 N94-23465

COUNTERFLOW
Extinguishment of combustible porous solids by water droplets [PB93-198893] p 2270 N94-23740
Transient phenomena in laminar spray combustion p 2160 N94-24282
Multiple flames in counterflow spray combustion p 2161 N94-24284

COUNTERMEASURES
Security aspects of space operations data p 2515 N94-23937

COUPLED MODES
Generalized three-dimensional simulation of ferruled coupled-cavity traveling-wave-tube dispersion and impedance characteristics [NASA-TP-3389] p 2310 N94-24056

COUPLERS
Internally folded scalable laser [AD-D015978] p 2350 N94-25216

COUPLING
Coupled frequencies of a hydroelastic rectangular system [LRT-WE-9-FB-4-1992] p 2375 N94-23196
Metallic multilayers: Experimental investigation of magnetic anisotropy and magnetic interlayer coupling [ETN-94-95364] p 2250 N94-25242

COUPLINGS
Space Station Freedom coupling tasks: An evaluation of their telerobotic and EVA compatibility p 2436 N94-24200

COVALENCE
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis [PB93-217982] p 2347 N94-22982

COVARIANCE
First order conditions for the maximum likelihood estimation of an exact ARMA model [PB94-110533] p 2495 N94-23814
The radiated noise from isotropic turbulence revisited [NASA-CR-191547] p 2333 N94-24356
Rao-Blackwell theorem in stereology and some counterexamples [PB94-111713] p 2496 N94-24639
An efficient data assimilation algorithm with a gaussian covariance structure [AD-A273152] p 2418 N94-24671
Optimal gains for a single polar orbiting satellite p 2208 N94-24873

CRACK CLOSURE
Fatigue life and crack growth prediction methodology [NASA-TM-109044] p 2228 N94-23279
Analysis of local delaminations caused by angle ply matrix cracks [NASA-TM-109052] p 2228 N94-24083

CRACK INITIATION
Development of a damage tolerance tool to analyze multiple-site damage in aircraft structure p 2157 N94-24261

CRACK OPENING DISPLACEMENT
Elevated temperature crack propagation [NASA-TM-106490] p 2377 N94-24715

CRACK PROPAGATION
Fatigue crack growth rate studies of medium sulfur low alloy steels tested in high temperature water [DE93-040437] p 2238 N94-22861
Fracture simulations via massively parallel molecular dynamics [DE93-040159] p 2374 N94-22871
Fundamentals of fatigue analysis [PB93-226264] p 2374 N94-23118
A numerical analysis of crack propagation in microcracking ceramic and ceramic composites [DE94-001192] p 2253 N94-23183
Thermally activated low temperature creep and primary water stress corrosion cracking of NiCrFe alloys [DE94-001756] p 2241 N94-23219
Fatigue life and crack growth prediction methodology [NASA-TM-109044] p 2228 N94-23279
Mechanical behavior of CMCs: Crack growth resistance and creep aspects p 2256 N94-24235
Repair of cracked aluminum aircraft structure with composite patches p 2156 N94-24259
Development of a damage tolerance tool to analyze multiple-site damage in aircraft structure p 2157 N94-24261
Fracture kinetics analysis of empirical and semi-empirical corrosion fatigue relations p 2159 N94-24277
J-integral patch for finite element analysis of dynamic fracture due to impact of pressure vessels p 2381 N94-24429
Microstructural analysis of the 2195 aluminum-lithium alloy welds p 2251 N94-24448
Prediction of thermal cycling induced cracking in polmer matrix composites [NASA-CR-195135] p 2229 N94-24579
The effects of anisotropy on the nonlinear behavior of bridged cracks in long strips [NASA-CR-194453] p 2377 N94-24604
Durability evaluation of ceramic components using CARES/LIFE [NASA-TM-106475] p 2258 N94-24682
Elevated temperature crack propagation [NASA-TM-106490] p 2377 N94-24715
Investigation of the effects of manufacturing variations and materials on fatigue crack detection methods in gear teeth [NASA-CR-195093] p 2373 N94-24769
Environmentally assisted cracking of high strength beta titanium alloys [AD-A273598] p 2245 N94-24823
FRANC2D: A two-dimensional crack propagation simulator. Version 2.7: User's guide [NASA-CR-4572] p 2246 N94-25118
The mechanical property data base from an Air Force/Industry Cooperative Test Program on advanced aluminum alloys (7064 and CW67) [AD-A273741] p 2251 N94-25531

CRACK TIPS
Fracture simulations via massively parallel molecular dynamics [DE93-040159] p 2374 N94-22871
Analysis of Alloy 600 and X-750 stress corrosion cracks [DE94-001578] p 2238 N94-22936
Environmentally assisted cracking of high strength beta titanium alloys [AD-A273598] p 2245 N94-24823

CRACKING (FRACTURING)
Fundamentals of fatigue analysis [PB93-226264] p 2374 N94-23118
Weld cladding of hard surfaces [PB93-201598] p 2353 N94-23448
The mechanical properties of single crystal (alpha)-Si3N4 [DE94-002632] p 2563 N94-24517
Three-dimensional, inelastic response of single-edge notch bend specimens subjected to impact loading [AD-A273302] p 2378 N94-25143
Matrix fatigue cracking mechanisms of alpha(2) TMC for hypersonic applications [NASA-TM-106506] p 2230 N94-25186
Evaluation of multiaxial fracture models for technical ceramics [ISBN-9-03-860192-1] p 2263 N94-25299
Ring nuclei of strain for bonded dissimilar elastic half spaces with particular application to axisymmetric crack problems [OUEL-1966/92] p 2379 N94-25325
Constitutive modelling of fiber-reinforced concrete under uniaxial tensile loading [VTT-JULK-774] p 2379 N94-25385
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues [AD-A273663] p 2251 N94-25450

CRACKS
Analysis of Alloy 600 and X-750 stress corrosion cracks [DE94-001578] p 2238 N94-22936
Thermally activated low temperature creep and primary water stress corrosion cracking of NiCrFe alloys [DE94-001756] p 2241 N94-23219
Analysis of local delaminations caused by angle ply matrix cracks [NASA-TM-109052] p 2228 N94-24083
J-integral patch for finite element analysis of dynamic fracture due to impact of pressure vessels p 2381 N94-24429

CRASHES
Method for simulating a vehicle shock test: Design and realization of the required implementation tools [ECL-92-14] p 2352 N94-22885
Development and experimental validation of computational methods to simulate abnormal thermal and structural environments [DE94-000554] p 2268 N94-23000
Aircraft accident report: In-flight loss of propeller blade and uncontrolled collision with terrain Mitsubishi MU-2B-60, N86SD, Zwingle, Iowa, 19 April 1993 [PB93-910409] p 2174 N94-25175
Aircraft accident/incident summary report: Controlled flight into terrain GP Express Airlines, Inc., N115GP Beechcraft C-99, Shelton, Nebraska, 28 April 1993 [PB94-910401] p 2174 N94-25273

CRASHWORTHINESS
Crashworthiness analysis using advanced material models in DYNA3D [DE94-002988] p 2229 N94-24632

CRAY COMPUTERS
Radar stimulator interface protocol, preliminary interface design and Doppler Beam Sharpening implementation [DE94-002567] p 2453 N94-23701
High-performance computing and communications [DE94-002215] p 2457 N94-24566

CREEP ANALYSIS
Creep deformation characteristics of ductile discontinuous fiber reinforced composites [DE94-000697] p 2227 N94-23005

CREEP PROPERTIES
Relationship of microstructure and mechanical properties for V-Cr-Ti alloys [DE94-001431] p 2238 N94-22718

Creep deformation characteristics of ductile discontinuous fiber reinforced composites
[DE94-000697] p 2227 N94-23005

Thermally activated low temperature creep and primary water stress corrosion cracking of NiCrFe alloys
[DE94-001756] p 2241 N94-23219

Time dependent behavior of a graphite/thermoplastic composite and the effects of stress and physical aging
[NASA-TM-109047] p 2228 N94-23280

Introduction of Ceramics into Aerospace Structural Composites
[AGARD-R-795] p 2255 N94-24228

Mechanical behavior of CMCs: Crack growth resistance and creep aspects p 2256 N94-24235

Numerical modeling of physical vapor transport under microgravity conditions: Effect of thermal creep and stress p 2223 N94-24340

Strength and life of pressure vessels subjected to impacts and thermomechanical GFRP loading
[VTT-JULK-771] p 2379 N94-25418

CREEP STRENGTH

Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556

Strength and life of pressure vessels subjected to impacts and thermomechanical GFRP loading
[VTT-JULK-771] p 2379 N94-25418

CREEP TESTS

On the deformation kinetics constitutive law of plastic deformation: The rate equation p 2161 N94-24289

CREW PROCEDURES (INFLIGHT)

Spacecraft crew procedures from paper to computers
p 2433 N94-24186

CRITERIA

Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189

CRITICAL LOADING

Determination of fiber-matrix interface failure parameters from off-axis tests
[NASA-TM-109043] p 2241 N94-23274

CRITICAL PATH METHOD

Extension of the critical path method
[PB94-118817] p 2488 N94-24527

CRITICAL TEMPERATURE

LOX droplet vaporization in a supercritical forced convective environment p 2211 N94-23034

Phase structure of the two-dimensional phi(4) field theory within thermo-field dynamics
[DE93-616850] p 2570 N94-25337

CRITICAL VELOCITY

Control algorithms for effective operation of variable-speed wind turbines
[DE94-002607] p 2394 N94-23704

CROP GROWTH

Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167

Robotics in a controlled, ecological life support system
p 2444 N94-25371

CROP IDENTIFICATION

Evaluation of the use of remote-sensing data to identify crop types and estimate irrigated acreage, Uvalde and Medina Counties, Texas, 1989
[PB93-193159] p 2388 N94-24809

CROSS CORRELATION

Cross-calibration survey (VISNIR)
p 2383 N94-23599

In-flight cross-calibration of ASTER/TIR and MODIS-N
p 2385 N94-23611

CROSS COUPLING

Synthesis of molecular wires by a novel divergent/convergent approach
[AD-A273332] p 2537 N94-25087

CROSS FLOW

An experimental study of the flow field surrounding a subsonic jet in a cross flow
[NASA-CR-194770] p 2317 N94-23072

An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554

Optimization of orifice geometry for cross-flow mixing in a cylindrical duct
[NASA-TM-106436] p 2481 N94-23593

Study of transient behavior of finned coil heat exchangers p 2321 N94-23642

CFD assessment of orifice aspect ratio and mass flow ratio on jet mixing in rectangular ducts
[NASA-TM-106434] p 2187 N94-24082

Mixing characteristics of directly opposed rows of jets injected normal to a crossflow in a rectangular duct
[NASA-TM-106477] p 2188 N94-24594

CROSS RELAXATION

Excited state dynamics of thulium ions in yttrium aluminum garnets
[NASA-CR-195159] p 2564 N94-25024

CROSSLINKING

Phenylethynl-terminated poly(arylene ethers)
[NASA-CASE-LAR-14797-1] p 2253 N94-23307

Ceramic silicon-boron-carbon fibers from organic silicon-boron-polymers
[NASA-CASE-ARC-11956-1-SB] p 2253 N94-23311

Dipolar relaxation in a second-order nonlinear optical interpenetrating polymer network
[AD-A273626] p 2258 N94-24732

Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789

Polythiophene derivative with a side chain chromophore as photovoltaic and photorefractive materials
[AD-A273245] p 2260 N94-24813

CROSSTALK

Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669

Crosstalk analysis of synchronous and asynchronous optical chip interconnects with direct detection
[AD-A273261] p 2311 N94-24685

CRRES (SATELLITE)

CRRES microelectronics package flight data analysis
[NASA-TP-3423] p 2540 N94-23273

Artificial plasma experiments. Chemical release observations associated with the CRRES program
[NASA-CR-194871] p 2550 N94-23565

The CRRES time history data base: All sensors
[AD-A273737] p 2207 N94-25542

CRUCIBLES

Determination of the compatibility between structural alloys and molten metals at high temperatures
[DE94-000954] p 2241 N94-23434

Transient flows occurring during the accelerated crucible rotation technique
[DE93-617049] p 2567 N94-25422

CRUDE OIL

Measurement of interfacial tension by use of pendant drop video techniques
[DE93-000168] p 2345 N94-24831

CRUISE MISSILES

Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545

CRUSHING

Continuum representations of cellular solids
[DE94-001706] p 2375 N94-23217

CRUSTAL FRACTURES

Electromagnetic field changes as a precursory phenomena of earthquakes and volcanic eruptions
[REPT-157] p 2405 N94-24980

Measurement and Interpretation of Crustal Deformation Rates Associated with Postglacial Rebound
[NASA-CR-195193] p 2405 N94-25203

CRYOGENIC COOLING

Cryogenic, low-noise high electron mobility transistor amplifiers for the Deep Space Network
p 2291 N94-23262

Calibration of a helium-cooled infrared spatial radiometer and grating spectrometer p 2384 N94-23607

CRYOGENIC EQUIPMENT

Foil bearing research at Penn State
p 2215 N94-23058

Brush seals for cryogenic applications
p 2216 N94-23063

Reduction of hydrocarbon impurities in 200 l/h helium liquefier-refrigerator system
[NIFS-259] p 2271 N94-24459

CRYOGENIC FLUID STORAGE

Analysis and test of low profile aluminum aerospace tank dome
[NASA-TP-3442] p 2375 N94-23294

Thermodynamic models for bounding pressurant mass requirements of cryogenic tanks
[NASA-TM-106476] p 2346 N94-25202

CRYOGENIC FLUIDS

Computational fluid dynamic modelling of cavitation
p 2215 N94-23060

Thermohydrodynamic analysis of cryogenic liquid turbulent flow fluid film bearings
[NASA-CR-194869] p 2363 N94-24081

Electro-rheology fluids and liquid fuel flow
[AD-A273640] p 2337 N94-25032

CRYOGENIC TEMPERATURE

Developments in materials for high-field magnets
[DE94-000761] p 2307 N94-22987

Precision Displacement Mechanism (PDM)
p 2360 N94-24026

Development of a Low-Temperature Gear Motor (LOG) p 2361 N94-24032

CRYOGENICS

Contamination control and plume assessment of low-energy thrusters
[NASA-TM-104585] p 2218 N94-23343

Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657

Simulation of cryogenic turbopump annular seals
p 2371 N94-24440

Thermal-fluid analysis of the fill and drain operations of a cryrogenic fuel tank
[NASA-TM-104273] p 2334 N94-24495

CRYOPUMPING

Performance characteristics of the DIII-D advanced divertor cryopump
[DE94-002745] p 2354 N94-23797

CRYOSTATS

Opening mechanism for ISO/CVV cover release
p 2357 N94-24001

CRYPTOGRAPHY

Special signature schemes
[ETN-94-95296] p 2446 N94-25081

CRYSTAL DEFECTS

Report of the Joint Seminar on Solid State Physics, Atomic and Molecular Physics, and Materials Science in the Energy Region of Tandem Accelerators
[DE93-508268] p 2548 N94-22924

Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments
[DE93-040161] p 2231 N94-22933

Magnetic resonance study of zinc-related defects in silicon with optimized EPR spectrometer
[PB93-224640] p 2561 N94-23223

Defects in electro-optically active polymer solids
p 2223 N94-24342

Thermophysical property sensitivity effects in steel solidification p 2246 N94-25122

Improved magnetostrictive transducer drive elements achieved by reduction of crystalline defects and improved crystalline orientation
[AD-A273391] p 2313 N94-25276

CRYSTAL FIELD THEORY

Structure and energetics of high index Fe, Al, Cu and Ni surfaces using equivalent crystal theory
[NASA-TM-106408] p 2249 N94-25171

Crystal field in Nd2CuO4
[DE93-617054] p 2567 N94-25425

Contribution of all excited states to ZFS of a (sup 6) S-state
[DE93-617007] p 2568 N94-25483

CRYSTAL GROWTH

The study of dopant segregation behavior during the growth of GaAs in microgravity
[NASA-CR-193905] p 2267 N94-23549

Three-dimensional solidification and melting using magnetic field control p 2325 N94-23664

Inertial confinement fusion
[DE94-002602] p 2551 N94-23703

Particle size measurement for the control of industrial crystallizers
[PB94-119104] p 2562 N94-23766

Numerical modeling of physical vapor transport under microgravity conditions: Effect of thermal creep and stress p 2223 N94-24340

Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344

Crystal growth of organics for nonlinear optical applications p 2225 N94-24348

Diffusion on Cu surfaces p 2251 N94-24428

The mechanical properties of single crystal (alpha)-Si3N4
[DE94-002632] p 2563 N94-24517

Direct observation of crystal growth from solution using optical investigation of a growing crystal face
[NASA-CR-195141] p 2563 N94-24617

Transient flows occurring during the accelerated crucible rotation technique
[DE93-617049] p 2567 N94-25422

CRYSTAL LATTICES

Modifications to 8x8 dynamical theory: Polarizations redefined according to x ray diffraction convention
[DE94-001290] p 2560 N94-23187

GGA study of the magnetic and cohesive properties of bcc, fcc and hcp Mn
[REPT-A-2662] p 2564 N94-24960

Symposium on diffusion in ordered alloys
[AD-A273643] p 2245 N94-25033

CRYSTAL OPTICS

Proposed additions to the SHADOW ray-tracing code for general-asymmetric perfect-crystal optics
[DE94-001291] p 2560 N94-23188

Investigation of the optical and laser properties of Tm and Ho in YAG anf YLF
[REPT-94-001] p 2563 N94-24404

CRYSTAL STRUCTURE

Bridgman's concern
[DE93-040900] p 2558 N94-22953

Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination
[PB93-224152] p 2559 N94-23109
Perturbation theory in electron diffraction
[PB93-201424] p 2533 N94-23505
Defects in electro-optically active polymer solids
p 2223 N94-24342
The torsion space nucleic acids molecular mechanics program DUPLEX: Surveying conformation space by potential energy minimization
[DE94-002441] p 2563 N94-24567
Thermal phase behavior of metal surfaces: X-ray scattering studies of Pt(001)
[DE94-002991] p 2245 N94-24612
Direct observation of crystal growth from solution using optical investigation of a growing crystal face
[NASA-CR-195141] p 2563 N94-24617
Simulation studies for surfaces and materials strength
[NASA-CR-195185] p 2565 N94-25093
Structure and energetics of high index Fe, Al, Cu and Ni surfaces using equivalent crystal theory
[NASA-TM-106408] p 2249 N94-25171
Preparation and properties of translucent gamma-aluminium oxynitride
[ETN-94-95305] p 2263 N94-25281
Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3
[DE93-613824] p 2566 N94-25332
Structure of cholesteryl-4-vinylbenzoate
[AD-A273686] p 2567 N94-25441

CRYSTAL SURFACES
Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657
Structure and energetics of high index Fe, Al, Cu and Ni surfaces using equivalent crystal theory
[NASA-TM-106408] p 2249 N94-25171

CRYSTALLINITY
Polydiacetylene thin films for nonlinear optical applications p 2225 N94-24347
Two micron stimulated emission of activated insulating crystals
[REPT-94-002] p 2565 N94-25025

CRYSTALLITES
Combustion synthesis and engineering of nanoparticles for electronic, structural and superconductor applications
[DE94-001865] p 2254 N94-23720

CRYSTALLIZATION
Processing of YBCO superconductors for improved levitation force
[DE94-001326] p 2559 N94-22994
Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344

CRYSTALLOGRAPHY
Orientation imaging microscopy: New possibilities for microstructural investigations using automated BKD analysis
[DE94-000777] p 2557 N94-22938
Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination
[PB93-224152] p 2559 N94-23109
Observation of non-centrosymmetry and determination of polarity in III-V semiconductors
[PB93-201416] p 2561 N94-23503
Image analysis technology applied to problems in crystallography
[AD-A273516] p 2566 N94-25288
Dual-purpose RTOF diffractometer facility at the ET-RR-1 reactor
[VTT-TIED-1425] p 2566 N94-25347
Morphology of highly textured polyethylene/polyethylene- propylene semicrystalline diblock copolymers
[AD-A273683] p 2263 N94-25413

CRYSTALS
Anisotropic uniaxial pressure effects in YBa2Cu3O(7-delta)
[DE94-001456] p 2557 N94-22929
Low temperature diffusion of hydrogenic species in oxide crystals: Radiation induced diffusion
[DE94-000374] p 2558 N94-22957
Modifications to 8x8 dynamical theory: Polarizations redefined according to x ray diffraction convention
[DE94-001290] p 2560 N94-23187
Perturbation theory in electron diffraction
[PB93-201424] p 2533 N94-23505
Inertial confinement fusion
[DE94-002602] p 2551 N94-23703
The statistics of sputtering
[DE94-001128] p 2243 N94-23715
Particle size measurement for the control of industrial crystallizers
[PB94-119104] p 2562 N94-23766
Modeling of PCG fluid dynamics: Salient results
p 2224 N94-24345
GGA study of the magnetic and cohesive properties of bcc, fcc and hcp Mn
[REPT-A-2662] p 2564 N94-24960
Excited state dynamics of thulium ions in yttrium aluminum garnets
[NASA-CR-195159] p 2564 N94-25024
Selected bibliography 2: Diamond surface chemistry
[AD-A273518] p 2565 N94-25160
Image analysis technology applied to problems in crystallography
[AD-A273516] p 2566 N94-25288

CUBES (MATHEMATICS)
Median stabilization degree of a median algebra
[PB93-220010] p 2479 N94-23093

CULTURE TECHNIQUES
Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357

CUMULATIVE DAMAGE
Damage under monotonic or cyclic loads of new AlSiFe alloys prepared by the Osprey (tm) process
[ISAL-93-0008] p 2239 N94-22972
Contribution to the interface micromechanical study and to the damage fundamental phenomena in glass fiber epoxy resin model composites
[ISAL-93-0027] p 2227 N94-23133

CUMULUS CLOUDS
On testing two major cumulus parameterization schemes using the CSU regional atmospheric modeling system
[DE94-000703] p 2407 N94-23284
Joint sessions on moisture processes and cumulus parameterization p 2414 N94-24393
Session on cumulus parameterization
p 2414 N94-24394

CURIE TEMPERATURE
Influences of nitrogen absorption on the magnetic properties of YFe2, YFe3 and Y6Fe23
[REPT-A-2654] p 2564 N94-24958

CURING
Phenylethynl-terminated poly(arylene ethers)
[NASA-CASE-LAR-14797-1] p 2253 N94-23307
Fiber optic detection of ultrasound and its application to cure monitoring
[ISBN-0-315-83424-2] p 2544 N94-24466
Curing phthalonitrile resins with acid and amine
[AD-D016021] p 2258 N94-24721
Ultrasonic process for curing adhesives
[AD-A273175] p 2259 N94-24788
Curing phthalonitriles with acid
[AD-D015996] p 2261 N94-25054
A preliminary evaluation of the phosphazene resin PPZ
[AD-A273674] p 2263 N94-25410

CURIUM
A survey of metallurgical research on several actinides
[DE94-002643] p 2245 N94-24747

CURRENT ALGEBRA
Off-critical W(infinity) and Virasoro algebras as dynamical symmetries of the integrable models
[DE93-633215] p 2478 N94-22969
The 2D supergravity and integrable systems
[DE93-616848] p 2570 N94-25336

CURRENT DENSITY
Heavy ion irradiation of Bi-2223 silver-clad tapes for superconducting current density enhancement
[DE93-017416] p 2556 N94-22886
High energy density aluminum-oxygen cell
p 2393 N94-23363
A high performance H2-Cl2 fuel cell for space power applications p 2394 N94-23366
Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361
Mechanisms of anode power deposition in a low pressure free burning arc
[NASA-CR-194442] p 2553 N94-25190

CURRENT DISTRIBUTION
A nonlinear degenerating parabolic problem from the theory of type 2 superconductors
[MEMO-1112] p 2555 N94-22730
Rigorous analysis of thick microstrip antennas and wire antennas embedded in a substrate
[EUT-92-E-263] p 2290 N94-22876
Voyager planetary radio astronomy studies
[NASA-CR-194776] p 2614 N94-24328
Time-domain analysis of conduction and displacement current distributions in inhomogeneous and anisotropic layered media
[PB94-111036] p 2403 N94-24592

CURRENT SHEETS
Evolution of large-scale plasma structures in comets: Kinematics and physics
[NASA-CR-194777] p 2601 N94-23251

CURVATURE
Bent-tip blade for aircraft rotary-wing
[CA-PATENT-1-315-259] p 2176 N94-23254
Large eddy simulation of a boundary layer with concave streamwise curvature p 2328 N94-24146
Studies on the implementation of normals and curvatures. Part 1: The first or mean curvature
[DE94-001546] p 2488 N94-24503

CURVED PANELS
Radially constructed cruciform parachute
[CA-PATENT-1323021] p 2168 N94-24182

CURVES (GEOMETRY)
Number of moduli of families of curves on toric surfaces
[PB93-230381] p 2479 N94-23121

CUSPS (MATHEMATICS)
The cusp horseshoe and its bifurcations in the unfolding of an inclination-flip homoclinic orbit
[W-9307] p 2480 N94-23141

CYANIDES
Photoinduced charge separation in solid state and molecular systems
[DE94-001727] p 2563 N94-24537

CYCLES
Tool sharing: An application of max-algebra, part 1
[MEMO-1108] p 2478 N94-22726
Long cycles in graphs with prescribed toughness and minimum degree
[MEMO-1109] p 2478 N94-22727
The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896

CYCLIC AMP
On the mechanism of action of 3',5'-cyclic adenosine monophosphate: A study of four- and five-coordinated phosphorus compounds, modelling the activated state of cAMP
[ISBN-9-03-860222-7] p 2226 N94-25238

CYCLIC COMPOUNDS
Scanning probe lithography. 2: Selective chemical vapor deposition of copper into scanning tunneling microscope-defined patterns
[AD-A273304] p 2547 N94-25144

CYCLIC LOADS
Damage under monotonic or cyclic loads of new AlSiFe alloys prepared by the Osprey (tm) process
[ISAL-93-0008] p 2239 N94-22972
A review of the Workshop on Fatigue Life Methodologies for Wind Turbines
[DE94-002039] p 2394 N94-23472
Role of interfaces on the cyclic fatigue behaviour of ceramic matrix composites p 2256 N94-24234
Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276
Matrix fatigue cracking mechanisms of alpha(2) TMC for hypersonic applications
[NASA-TM-106506] p 2230 N94-25186

CYCLOTRON FREQUENCY
Voyager planetary radio astronomy studies
[NASA-CR-194776] p 2614 N94-24328

CYCLOTRON RADIATION
Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333

CYCLOTRON RESONANCE
Multi-ion, multi-event test of ion cyclotron resonance heating
[NASA-CR-194859] p 2540 N94-23495
Reactivity of ambident anions in the gas phase
[PB93-232189] p 2533 N94-23713
Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333

CYCLOTRON RESONANCE DEVICES
Massachusetts Institute of Technology Plasma Fusion Center 1992-1993 report to the President
[DE94-001725] p 2548 N94-22721

CYLINDRICAL BODIES
Damage tolerance of pressurized graphite/epoxy tape cylinders under uniaxial and biaxial loading
[NASA-CR-195101] p 2377 N94-24587
Surface barrier of a uniaxial anisotropic type 2 superconducting cylinder
[DE93-617137] p 2566 N94-25392
Transient flows occurring during the accelerated crucible rotation technique
[DE93-617049] p 2567 N94-25422

CYLINDRICAL CHAMBERS
CFD simulation of coaxial injectors
p 2342 N94-24430

CYLINDRICAL SHELLS
Energy estimates and asymptotic analysis in the theory of shells
[PB93-225738] p 2374 N94-23113
Shell buckling research at Delft, 1976 - 1992
[PB93-224442] p 2375 N94-23221

The plastic response of a cylindrical shell subjected to an internal blast wave with a finite width shock front
p 2154 N94-24246

Structural design criteria for filament-wound composite shells
[NASA-CR-195125] p 2229 N94-24402

CORSS: Cylinder Optimization of Rings, Skin, and Stringers
[NASA-TP-3457] p 2490 N94-24727

Buckling of circular cylindrical shells subjected to combined loads (axial compression, normal pressure, bending and transverse shear loading)
[PB93-215358] p 2378 N94-24745

CYSTS

Spontaneous pneumothorax, cysts and bullae
p 2425 N94-23326

CYTOMETRY

Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-195102] p 2420 N94-23633

CZOCHRALSKI METHOD

Two micron stimulated emission of activated insulating crystals
[REPT-94-002] p 2565 N94-25025

D

DAMAGE

Pressure wall patch
[NASA-CASE-MFS-28724-1] p 2203 N94-23824

Engine materials characterization and damage monitoring by using x ray technologies
[NASA-TP-3328] p 2372 N94-24074

DAMAGE ASSESSMENT

Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61
[NASA-TM-109195] p 2199 N94-24059

Final postflight hardware evaluation report RSRM-32 (STS-57)
[NASA-CR-193903] p 2200 N94-24065

Development of a damage tolerance tool to analyze multiple-site damage in aircraft structure
p 2157 N94-24261

Computer based expert system for battle damage repair of composite structures p 2157 N94-24262

Assessment of impact damage of composite rocket motor cases
[NASA-CR-195143] p 2220 N94-24595

Nondestructive evaluations
[DE94-003020] p 2373 N94-24613

Postflight hardware evaluation (RSRM-29, STS-54)
[NASA-CR-193895] p 2201 N94-24802

DAMKOHLER NUMBER

Transient phenomena in laminar spray combustion
p 2160 N94-24282

Multiple flames in counterflow spray combustion
p 2161 N94-24284

DAMPING

Low melting temperature alloy deployment mechanism
p 2356 N94-23997

On the effect of the damping coefficients on the trajectories of symmetric and non-symmetric stores
p 2155 N94-24250

Foil bearings p 2371 N94-24415

DATA ACQUISITION

Federal alternative fuel program light duty vehicle operations
[DE93-040663] p 2264 N94-22878

CAMAC throughput of a new RISC-based data acquisition computer at the DIII-D tokamak
[DE94-001113] p 2550 N94-23182

SeaWiFS technical report series. Volume 11: Analysis of selected orbit propagation models for the SeaWiFS mission
[NASA-TM-104566-VOL-11] p 2417 N94-23338

The national geomagnetic initiative
[LC-93-85739] p 2401 N94-23344

Cross-calibration survey (VISNIR)
p 2383 N94-23599

Evaluating NOAA satellite products for global climate monitoring p 2384 N94-23604

ASTER TIR subsystem and calibration
p 2385 N94-23612

OASIS-CC presentation p 2385 N94-23613

Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991
[PB93-230654] p 2386 N94-23755

Commonality of flight control systems for support of European telecommunications missions
p 2304 N94-23834

Development of the Cassini Ground Data System in a multimission environment p 2500 N94-23845

Distributed science operations for JPL planetary missions p 2500 N94-23850

The Ulysses spacecraft control and monitoring concepts and realities p 2502 N94-23862

A review of mission planning systems
p 2503 N94-23866

Techniques and software for optimum and efficient mission science sequence development
p 2504 N94-23872

A packet-based concept for spacecraft command planning p 2504 N94-23873

Mars Observer screen display design for a multimission environment p 2197 N94-23888

The evolving trend in spacecraft health analysis
p 2202 N94-23946

Using the SPICE system to help plan and interpret space science observations p 2517 N94-23950

Mars Observer data production, transfer, and archival: The data production assembly line p 2518 N94-23953

Space Station Freedom ground data system: Design and operations p 2518 N94-23957

The Olympus PAX, measurement of mechanism induced vibration p 2362 N94-24041

ASPT software source code: ASPT application software package, host component
[CTN-94-60907] p 2455 N94-24116

Use of infrared telemetry as part of a nonintrusive inflight data collection system to collect human factors data
p 2434 N94-24193

The experimental physics and industrial control system architecture: Past, present, and future
[DE94-002639] p 2457 N94-24626

Near-surface seismic imaging
[PB94-119096] p 2404 N94-24647

Investigation of the heat handling capabilities of DIII-D neutral beamline internal components
[DE94-001107] p 2553 N94-24756

Design and simulation of EVA tools for first servicing mission of HST
[NASA-CR-194784] p 2439 N94-24857

VLSI-based video event triggering for image data compression
[NASA-TM-106500] p 2345 N94-25116

The data-acquisition and second level trigger system for ZEUS calorimeter
[ETN-94-95384] p 2541 N94-25256

DATA BASE MANAGEMENT SYSTEMS

Translative interface for data sharing and integrating: A paradigm for distributed data systems
[DE93-018790] p 2588 N94-22863

A general model for dynamic and complex information management: The ELEN prototype object manager for software engineering
[ETN-94-95163] p 2588 N94-22880

Structure and flow of data through an environmental data management system
[DE93-040487] p 2589 N94-22934

ACOS: The performance based approach to build a parallel complex object server
[PB93-223816] p 2465 N94-22986

Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database Shock Physics Index
[DE94-001679] p 2589 N94-23126

Bibliographic Retrieval System (BARS). Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database. Volume 1: UNIX version query guide customized application for INGRES
[DE94-001703] p 2589 N94-23127

Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database, Shock Physics Index (SPHINX) database, Volume 2: UNIX version user's guide
[DE94-001704] p 2589 N94-23128

A system for managing information at ATLAS
[DE94-001337] p 2590 N94-23190

A framework for SFC/DC system data analysis
p 2523 N94-23234

An engineering database management system for spacecraft operations p 2517 N94-23951

The ESIS query environment pilot project
p 2518 N94-23952

Compression for an effective management of telemetry data p 2518 N94-23956

From requirements to acceptance tests
p 2464 N94-23962

Space operations: Archiving space science data needs further management improvements. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-94-25] p 2591 N94-24092

Activities involving aeronautical, space science, and technology support for minority institutions
[NASA-CR-195095] p 2574 N94-24225

Fact-based enterprise information management using NIAM
[DE93-041135] p 2591 N94-24501

Waste minimization/pollution prevention at R/D facilities: A cradle-to-grave tracking and information system that will be implemented at Sandia National Laboratories
[DE93-040330] p 2591 N94-24607

Modeling of database constraints in active databases
[AD-A273484] p 2592 N94-24691

Correct and efficient interface for logical query languages with complex objects
[PB93-211175] p 2593 N94-24743

DATA BASES

Translative interface for data sharing and integrating: A paradigm for distributed data systems
[DE93-018790] p 2588 N94-22863

Catalog of data bases and reports
[DE93-040597] p 2588 N94-22875

Structure and flow of data through an environmental data management system
[DE93-040487] p 2589 N94-22934

ACOS: The performance based approach to build a parallel complex object server
[PB93-223816] p 2465 N94-22986

Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database Shock Physics Index
[DE94-001679] p 2589 N94-23126

Bibliographic Retrieval System (BARS). Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database. Volume 1: UNIX version query guide customized application for INGRES
[DE94-001703] p 2589 N94-23127

Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database, Shock Physics Index (SPHINX) database, Volume 2: UNIX version user's guide
[DE94-001704] p 2589 N94-23128

A system for managing information at ATLAS
[DE94-001337] p 2590 N94-23190

A framework for SFC/DC system data analysis
p 2523 N94-23234

Space Station Freedom (SSF) Data Management System (DMS) performance model data base
[NASA-CR-188270] p 2590 N94-23289

Task 1: Health management demonstration. Task 2: Process management environment and support of enterprise integration. Task 3: New algorithm development in the PME
[NASA-CR-188268] p 2430 N94-23290

An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel
[NASA-TM-106471] p 2166 N94-23299

MITS architecture V1.0
[PB93-201762] p 2452 N94-23451

Development of durable high-temperature catalysts for natural gas combustion
[PB93-226447] p 2232 N94-23477

The Fifth Calibration/Data Product Validation Panel Meeting
[NASA-TM-108270] p 2383 N94-23595

SPDB (science processing database): Quick reference guide p 2383 N94-23597

TOVS Pathfinder product validation and intercomparison p 2384 N94-23603

Validating a large geophysical data set: Experiences with satellite-derived cloud parameters p 2385 N94-23615

An overview of the UARS data validation effort
p 2386 N94-23617

Multi-set extended relational algebra: A formal approach to a practical issue
[PB94-110830] p 2486 N94-23725

Concepts and techniques for an active database approach to office procedure support
[PB94-110749] p 2590 N94-23816

The evolving trend in spacecraft health analysis
p 2202 N94-23946

An engineering database management system for spacecraft operations p 2517 N94-23951

The ESIS query environment pilot project
p 2518 N94-23952

Compression for an effective management of telemetry data p 2518 N94-23956

New mission requirements methodologies for services provided by the Office of Space Communications
p 2519 N94-23961

From requirements to acceptance tests
p 2464 N94-23962

AstroMail: Electronic mail for the astrophysics community
[NASA-CR-194877] p 2591 N94-24099

Tensoral for post-processing users and simulation authors p 2333 N94-24169

Previous experience in manned space flight: A survey of human factors lessons learned p 2435 N94-24196

Joint Acoustic Propagation Experiment (JAPE)
p 2527 N94-24208

Panel to review EOSDIS plans
[NASA-CR-195088] p 2387 N94-24303

Application of concurrent engineering principles to aircraft structural design p 2178 N94-24321
Technology utilization office data base analysis and design p 2577 N94-24417
MERILL: An equational reasoning system in standard ML: A user guide (prerelease version 0.4)
[PB93-204501] p 2456 N94-24534
Systems engineering: A formal approach. Part 2: Frameworks
[PB94-101391] p 2489 N94-24615
Modeling of database constraints in active databases
[AD-A273484] p 2592 N94-24691
Correct and efficient interface for logical query languages with complex objects
[PB93-211175] p 2593 N94-24743
Rice cultivation and methane emission: Documentation of distributed geographic data sets
[NASA-TM-104595] p 2381 N94-24800
A study of cloud motions on Mars. 2: Some examples of observations and analyses since 1969
p 2620 N94-24891
Ground based mission planning systems
p 2522 N94-25014
Mission rehearsal in the SOF-ATS program
p 2522 N94-25016
Establishment of computerized numerical databases on thermophysical and other properties of molten as well as solid materials and data evaluation and validation for generating recommended reliable reference data
p 2246 N94-25123
NASA STI program database: Journal coverage (1990-1992)
[NASA-TM-109720] p 2593 N94-25168
The IRGen infrared data base modeler
p 2440 N94-25496
The CRRES time history data base: All sensors
[AD-A273737] p 2207 N94-25542

DATA COMPRESSION
Integer cosine transform compression for Galileo at Jupiter: A preliminary look p 2292 N94-23266
Neural network research in Finland. Symposium
[PB93-224822] p 2472 N94-23463
Material data representation of hysteresis loops for Hastelloy X using artificial neural networks
[NASA-TM-105990] p 2376 N94-23551
Compression for an effective management of telemetry data p 2518 N94-23956
A constrained joint source/channel coder design and vector quantization of nonstationary sources
[NASA-CR-195145] p 2301 N94-24707
New directions in network flows
[AD-A273467] p 2468 N94-24939
HORACE: Presentation-level protocol standard for digital transmission of monochrome television images
[AD-A273395] p 2197 N94-25064

DATA CORRELATION
Evaluating NOAA satellite products for global climate monitoring p 2384 N94-23604

DATA FLOW ANALYSIS
A dataflow analysis tool for parallel processing of algorithms
[NASA-TM-109054] p 2448 N94-23086
Source spacing in B-ISDN
[PB93-201747] p 2293 N94-23508
Validation activities for LOTOS based on static data flow analysis
[PB94-110863] p 2459 N94-24758
Study on fine grain dynamic dataflow computer
[REPT-946] p 2446 N94-24981

DATA INTEGRATION
Convective organization in the Pacific ITCZ: Merging OLR, TOVS, and SSM/I information
[NASA-CR-194850] p 2408 N94-23619
Space Shuttle Main Engine performance analysis
p 2222 N94-24444
Optimal gains for a single polar orbiting satellite
p 2208 N94-24873
Sensor fusion display evaluation using information integration models in enhanced/synthetic vision applications p 2443 N94-25512

DATA LINKS
Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793
System services and architecture of the TMI satellite mobile data system p 2286 N94-22817
Handover aspects for a Low Earth Orbit (LEO) CDMA Land Mobile Satellite (LMS) system
p 2288 N94-22824
Command/telemetry bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems
[NASA-TM-109407] p 2208 N94-23479
Multi-access laser communications terminal
[NASA-CR-191251] p 2295 N94-23830
Representing operations procedures using temporal dependency networks p 2305 N94-23914
Situation management in the Link Monitor and Control Operator Assistant (LMCOA) p 2305 N94-23915
Experimental verification of an acoustic telemetry link between an Aurora and CFAV quest
[DREA-TC-93-304] p 2202 N94-24121
New Advances in Mission Planning and Rehearsal Systems
[AGARD-LS-192] p 2521 N94-25008
Failure detection and recovery in the assembly/contingency subsystem p 2306 N94-25360
Conceptual communications system design in the 25.25-27.5 and 37.0-40.5 GHz frequency bands
p 2306 N94-25379
Modeling of the ground-to-SSFMB link networking features using SPW p 2306 N94-25381

DATA MANAGEMENT
Structure and flow of data through an environmental data management system
[DE93-040487] p 2589 N94-22934
Quality data validation: Comprehensive approach to environmental data validation
[DE94-000925] p 2589 N94-22944
A framework for SFC/DC system data analysis
p 2523 N94-23234
Space Station Freedom (SSF) Data Management System (DMS) performance model data base
[NASA-CR-188270] p 2590 N94-23289
GEWEX p 2385 N94-23614
SpaceOps 1992: Proceedings of the Second International Symposium on Ground Data Systems for Space Mission Operations
[NASA-CR-194486] p 2497 N94-23832
Distributed science operations for JPL planetary missions p 2500 N94-23850
A MOS for all seasons p 2505 N94-23879
Mission and science activity scheduling language
p 2515 N94-23938
The evolving trend in spacecraft health analysis
p 2202 N94-23946
Mars Observer data production, transfer, and archival: The data production assembly line p 2518 N94-23953
Compression for an effective management of telemetry data p 2518 N94-23956
Space Station Freedom ground data system: Design and operations p 2518 N94-23957
Earth observation archive activities at DRA Farnborough p 2519 N94-23958
From requirements to acceptance tests
p 2464 N94-23962
Scheduling the future NASA Space Network: Experiences with a flexible scheduling prototype
p 2520 N94-23965
Space operations: Archiving space science data needs further management improvements. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-94-25] p 2591 N94-24092
Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264
Session on techniques and resources for storm-scale numerical weather prediction p 2415 N94-24400
Design and specification of a centralized manufacturing data management and scheduling system
p 2577 N94-24416

DATA PROCESSING
VIERS-1, phase 3
[BCRS-92-24] p 2381 N94-23145
Code generation for the attribute evaluator of the protocol engine grammar processor unit
[EUT-93-E-271] p 2450 N94-23173
Implementing the space shuttle data processing system with the space generic open avionics architecture
[NASA-CR-188254] p 2199 N94-23571
Radar stimulator interface protocol, preliminary interface design and Doppler Beam Sharpening implementation
[DE94-002567] p 2453 N94-23701
A reference model for space data system interconnection services p 2305 N94-23847
Preparing the DSN operations concepts
p 2501 N94-23853
Object-oriented technologies in a multi-mission data system p 2506 N94-23885
VMPLOT: A versatile analysis tool for mission operations p 2507 N94-23891
The application of automated operations at the Institutional Processing Center p 2509 N94-23901
The advanced orbiting systems testbed program: Results to date p 2197 N94-23907
Verification of technical elements of the advanced spacecraft based upon the CCSDS recommendation
p 2207 N94-23910
MERCATOR: Methods and Realization for Control of the Attitude and the Orbit of spacecraft
p 2202 N94-23925
Using SFOC to fly the Magellan Venus mapping mission p 2516 N94-23941
The evolving trend in spacecraft health analysis
p 2202 N94-23946
Telemetry ground system development via the component approach p 2203 N94-23949
Using the SPICE system to help plan and interpret space science observations p 2517 N94-23950
Mars Observer data production, transfer, and archival: The data production assembly line p 2518 N94-23953
Activities involving aeronautical, space science, and technology support for minority institutions
[NASA-CR-195095] p 2574 N94-24225
Integrated stress and strength analysis of airplane structures using the data processing tool ISSY
p 2178 N94-24320
Next generation initiation techniques
p 2412 N94-24383
Using neural networks to assist in OPAD data analysis
p 2477 N94-24452
Near-surface seismic imaging
[PB94-119096] p 2404 N94-24647
New Advances in Mission Planning and Rehearsal Systems
[AGARD-LS-192] p 2521 N94-25008
Advanced Information Processing System (AIPS)
p 2165 N94-25115
Downward extrapolation of multi-component seismic data
[ISBN-9-09-005213-5] p 2405 N94-25229
The L3 visualization system and its use in the Z(zero) line shape analysis
[ETN-94-95382] p 2537 N94-25231
Decomposition of multi-component measurements into P and S waves
[ISBN-9-09-005197-X] p 2405 N94-25251

DATA PROCESSING EQUIPMENT
Implementing the space shuttle data processing system with the space generic open avionics architecture
[NASA-CR-188254] p 2199 N94-23571
MERCATOR: Methods and Realization for Control of the Attitude and the Orbit of spacecraft
p 2202 N94-23925

DATA REDUCTION
Uncertainties in climate data sets
[NASA-CR-194848] p 2408 N94-23577
Object-oriented technologies in a multi-mission data system p 2506 N94-23885
VMPLOT: A versatile analysis tool for mission operations p 2507 N94-23891
Long term trending of engineering data for the Hubble Space Telescope p 2516 N94-23942
Tensoral for post-processing users and simulation authors p 2333 N94-24169
Space Shuttle Main Engine performance analysis
p 2222 N94-24444
Using neural networks to assist in OPAD data analysis
p 2477 N94-24452
Measurement of HO2 and other trace gases in the stratosphere using a high resolution far-infrared spectrometer
[NASA-CR-195173] p 2404 N94-24738

DATA RETRIEVAL
SPDB (science processing database): Quick reference guide p 2383 N94-23597
TOVS Pathfinder product validation and intercomparison p 2384 N94-23603
From requirements to acceptance tests
p 2464 N94-23962
A usage profile and evaluation of a wide-area distributed file system
[AD-A273590] p 2593 N94-24946

DATA SAMPLING
Quality data validation: Comprehensive approach to environmental data validation
[DE94-000925] p 2589 N94-22944

DATA SIMULATION
The evolving trend in spacecraft health analysis
p 2202 N94-23946

DATA STORAGE
Structure and flow of data through an environmental data management system
[DE93-040487] p 2589 N94-22934
The Fifth Calibration/Data Product Validation Panel Meeting
[NASA-TM-108270] p 2383 N94-23595
Validating a large geophysical data set: Experiences with satellite-derived cloud parameters p 2385 N94-23615
Mars Observer data production, transfer, and archival: The data production assembly line p 2518 N94-23953
Compression for an effective management of telemetry data p 2518 N94-23956
Earth observation archive activities at DRA Farnborough p 2519 N94-23958

Space operations: Archiving space science data needs further management improvements. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives
[GAO/NSIAD-94-25] p 2591 N94-24092
Performance of the engineering analysis and data system 2 common file system p 2576 N94-24413

DATA STRUCTURES
The explicit computation of integration algorithms and first integrals for ordinary differential equations with polynomials coefficients using trees
[NASA-CR-194787] p 2448 N94-23074
Using genetic algorithms for scheduling data flow graphs
[EUT-92-E-266] p 2449 N94-23169
SeaWiFS technical report series. Volume 9: The simulated SeaWiFS data set, version 1
[NASA-TM-104566-VOL-9] p 2417 N94-23291
An object-oriented approach for parallel self adaptive mesh refinement on block structured grids
p 2469 N94-23697
Multi-set extended relational algebra: A formal approach to a practical issue
[PB94-110830] p 2486 N94-23725
Study of methods and structures for handling of digitized maps for geographical information systems
[PB93-204402] p 2590 N94-23741
Security aspects of space operations data
p 2515 N94-23937
Activities involving aeronautical, space science, and technology support for minority institutions
[NASA-CR-195095] p 2574 N94-24225
RITL: An information system for application reuse-in-the-large
[PB94-119088] p 2592 N94-24646
Runtime support and compilation methods for user-specified data distributions
[NASA-CR-191587] p 2458 N94-24679
A type-theoretic approach to higher-order modules with sharing
[AD-A273566] p 2458 N94-24693
Correct and efficient interface for logical query languages with complex objects
[PB93-211175] p 2593 N94-24743
From circuit to signal: Development of a piecewise linear simulator
[ISBN-9-09-005713-7] p 2462 N94-25263
Data structures and amortized complexity in a functional setting
[ETN-94-95307] p 2476 N94-25290
Expert system rule-base evaluation using real-time parallel processing
[AD-A273701] p 2469 N94-25454

DATA SYSTEMS
Design and implementation considerations of a MSAT packet data network p 2280 N94-22778
System services and architecture of the TMI satellite mobile data system p 2286 N94-22817
Translative interface for data sharing and integrating: A paradigm for distributed data systems
[DE93-018790] p 2588 N94-22863
NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-194678] p 2571 N94-23230
SeaWiFS technical report series. Volume 9: The simulated SeaWiFS data set, version 1
[NASA-TM-104566-VOL-9] p 2417 N94-23291
A complete public archive for the Einstein IPC
[NASA-CR-189316] p 2453 N94-23559
SpaceOps 1992: Proceedings of the Second International Symposium on Ground Data Systems for Space Mission Operations
[NASA-CR-194486] p 2497 N94-23832
Commonality of flight control systems for support of European telecommunications missions
p 2304 N94-23834
Mission operations update for the restructured Earth Observing System (EOS) mission p 2499 N94-23839
Development of the Cassini Ground Data System in a multimission environment p 2500 N94-23845
A reference model for space data system interconnection services p 2305 N94-23847
NASDA satellite mission operation system and operations p 2501 N94-23854
NASA/Goddard Space Flight Center's testbed for CCSDS compatible systems p 2197 N94-23855
Ground data system for Space Flyer Unit (SFU)
p 2207 N94-23860
The Mars mapper science and mission planning tool
p 2503 N94-23867
A MOS for all seasons p 2505 N94-23879
Making adaptable systems work for mission operations: A case study p 2506 N94-23883
An approach to the design of operations systems
p 2506 N94-23884
Mars Observer screen display design for a multimission environment p 2197 N94-23888
Influence of a new generation of operations support systems on current spacecraft operations philosophy: The users feedback p 2507 N94-23894
Making tomorrow's mistakes today: Evolutionary prototyping for risk reduction and shorter development time p 2197 N94-23902
Applications of CCSDS recommendations to Integrated Ground Data Systems (IGDS) p 2510 N94-23906
The advanced orbiting systems testbed program: Results to date p 2197 N94-23907
Verification of technical elements of the advanced spacecraft based upon the CCSDS recommendation
p 2207 N94-23910
Security aspects of space operations data
p 2515 N94-23937
Using SFOC to fly the Magellan Venus mapping mission p 2516 N94-23941
EOS ground data systems: A description and interface overview p 2517 N94-23948
Telemetry ground system development via the component approach p 2203 N94-23949
Space Station Freedom ground data system: Design and operations p 2518 N94-23957
SAO mission support software and data standards, version 1.0
[NASA-CR-193906] p 2454 N94-24050
Panel to review EOSDIS plans
[NASA-CR-195088] p 2387 N94-24303
Performance of the engineering analysis and data system 2 common file system p 2576 N94-24413
Worldwide vessel locating and tracking system, volume 1
[PB93-193217] p 2175 N94-24474
A usage profile and evaluation of a wide-area distributed file system
[AD-A273590] p 2593 N94-24946

DATA TRANSFER (COMPUTERS)
Open EDI
[VTT-TIED-1353] p 2588 N94-22734
Specifications of ETS, the Enhanced Transport Service
[RR-907-I] p 2589 N94-23150
OASIS-CC presentation p 2385 N94-23613
Reliable transfer of data from ground to space
p 2305 N94-23908

DATA TRANSMISSION
Open EDI
[VTT-TIED-1353] p 2588 N94-22734
Proceedings of the Third International Mobile Satellite Conference (IMSC 1993)
[NASA-CR-194516] p 2273 N94-22735
Internetworking satellite and local exchange networks for personal communications applications
p 2276 N94-22755
ROCSAT-1 telecommunication experiments
p 2279 N94-22770
Canadian aeronautical mobile data trials
p 2279 N94-22773
The AGRHYMET data communications project
p 2280 N94-22776
The ORBCOMM data communications system
p 2281 N94-22782
Specifications of ETS, the Enhanced Transport Service
[RR-907-I] p 2589 N94-23150
An optical ASK and FSK phase diversity transmission system
[EUT-92-E-268] p 2542 N94-23171
PROGRIL: A language for the definition of protocol grammars
[EUT-93-E-270] p 2449 N94-23172
Reduced cost alternatives to premise wiring using ATM and microcellular technologies p 2314 N94-23239
High-rate data link general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT satellite systems
[NASA-TM-109384] p 2208 N94-23481
A reference model for space data system interconnection services p 2305 N94-23847
AMFESYS: Modelling and diagnosis functions for operations support p 2506 N94-23887
Verification of technical elements of the advanced spacecraft based upon the CCSDS recommendation
p 2207 N94-23910
The ESIS query environment pilot project
p 2518 N94-23952
Mars Observer data production, transfer, and archival: The data production assembly line p 2518 N94-23953
The European Space Agency standard for space packet utilisation p 2203 N94-23954
Space Station Freedom ground data system: Design and operations p 2518 N94-23957
A small satellite design for deep space network testing and training
[NASA-CR-195526] p 2205 N94-24702
A constrained joint source/channel coder design and vector quantization of nonstationary sources
[NASA-CR-195145] p 2301 N94-24707
Modeling of the ground-to-SSFMB link networking features using SPW p 2306 N94-25381

DEBONDING (MATERIALS)
Creep deformation characteristics of ductile discontinuous fiber reinforced composites
[DE94-000697] p 2227 N94-23005
Interface evaluation in ceramic composites
p 2255 N94-24231

DEBRIS
Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61
[NASA-TM-109195] p 2199 N94-24059
Microbiological analysis of debris from Space Transportation System (STS)-55 Spacelab D-2
[NASA-CR-193883] p 2421 N94-24310

DECAY
Decay of swirl in turbulent pipe flows
[ETN-94-95353] p 2339 N94-25248

DECISION MAKING
Task 1: Health management demonstration. Task 2: Process management environment and support of enterprise integration. Task 3: New algorithm development in the PME
[NASA-CR-188268] p 2430 N94-23290
Decision making with imprecise probabilities
[PB94-111622] p 2494 N94-23772
Human factors of mission planning systems: Theory and concepts p 2521 N94-25010
An implementation of the REpresentation and MAintenance of Process knowledge (REMAP) model in the knowledge-based software assistant concept demonstration system
[AD-A273207] p 2461 N94-25138
Relevant costs or full costs? Explaining why managers use capacity cost allocations for short term decisions
[ISBN-9-06-215364-X] p 2587 N94-25279
Throughput time control and due date reliability in tool and die shops
[ISBN-9-03-860182-4] p 2587 N94-25283
Transputer benchmarks and performance comparisons with other computing machines
[RR-467] p 2446 N94-25312
Integrated risk management p 2588 N94-25361
Quality metrics for sensor images
p 2443 N94-25513
Solving the ranking and selection indifference-zone formulation for normal distributions using computer software
[AD-A273821] p 2496 N94-25518
On finding optimal policies for Markov decision chains: A unifying framework for mean-variance-tradeoffs
[TW-92-13] p 2497 N94-25528

DECISION THEORY
Bayesian decision theory with imprecise prior probabilities applied to replacement problems
[PB93-237634] p 2481 N94-23456
Decision making with imprecise probabilities
[PB94-111622] p 2494 N94-23772
On finding optimal policies for Markov decision chains: A unifying framework for mean-variance-tradeoffs
[TW-92-13] p 2497 N94-25528

DECODING
Separable concatenated codes with iterative map decoding for Rician fading channels
p 2286 N94-22815
Compression for an effective management of telemetry data p 2518 N94-23956
Conveying digital data in noisy, unstable, multipath environments
[AD-D015980] p 2301 N94-25038
Algebraic-geometric codes and their decoding algorithms
[ETN-94-95294] p 2491 N94-25079

DECOMPOSITION
A method for the general simultaneous full decomposition of sequential machines: Algorithms and implementation
[EUT-92-E-267] p 2445 N94-23170
Domain decomposition methods for nonconforming finite element spaces of Lagrange-type
p 2483 N94-23680
Multi-grid domain decomposition approach for solution of Navier-Stokes equations in primitive variable form
p 2341 N94-23693
Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790
Computing techniques in mission planning
p 2522 N94-25012

Decomposition of multi-component measurements into P and S waves
[ISBN-9-09-005197-X] p 2405 N94-25251
Parallel processing methods for space based power systems p 2222 N94-25352

DECOUPLING
Decoupling problems around a trajectory: From linearity to nonlinearity
[MEMO-1115] p 2469 N94-22703

DEEP SPACE
The remote-operated autonomous-robot concept: From deep sea to outer space applications
p 2370 N94-23413

DEEP SPACE NETWORK
The Telecommunications and Data Acquisition Report
[NASA-CR-194766] p 2290 N94-23256
Cryogenic, low-noise high electron mobility transistor amplifiers for the Deep Space Network
p 2291 N94-23262
Analysis of open-loop conical scan pointing error and variance estimators p 2291 N94-23263
Link monitor and control operator assistant: A prototype demonstrating semiautomated monitor and control
p 2292 N94-23267
Optical subnet concepts for the deep space network
p 2292 N94-23269
An improved gravity model for Mars: Goddard Mars Model-1 (GMM-1)
[NASA-TM-104584] p 2401 N94-23282
An OSI architecture for the deep space network
p 2305 N94-23848
Preparing the DSN operations concepts
p 2501 N94-23853
Radioastron flight operations p 2502 N94-23861
Digital test signal generation: An accurate SNR calibration approach for the DSN p 2305 N94-23912
Representing operations procedures using temporal dependency networks p 2305 N94-23914
Situation management in the Link Monitor and Control Operator Assistant (LMCOA) p 2305 N94-23915
Using Mach threads to control DSN operational sequences p 2477 N94-23916
Deep Space Network (DSN), Network Operations Control Center (NOCC) computer-human interfaces
p 2447 N94-23917
Operability engineering in the Deep Space Network
p 2514 N94-23930
Estimating the Deep Space Network modification costs to prepare for future space missions by using major cost drivers p 2520 N94-23968
The Jet Propulsion Laboratory space exploration: Past, present and future p 2153 N94-24242
A small satellite design for deep space network testing and training
[NASA-CR-195526] p 2205 N94-24702

DEEP WATER
The remote-operated autonomous-robot concept: From deep sea to outer space applications
p 2370 N94-23413

DEFECTS
Vacancy formation energy of Li(H, D) and Na(H, D) systems
[DE93-633452] p 2558 N94-22978
Interactions between organized, surface-confined monolayers and vapor-phase probe molecules. 7: Comparison of self-assemblying organomercaptan monolayers deposited on gold from liquid and vapor phases
[AD-A273196] p 2535 N94-24555
Image remapping strategies applied as protheses for the visually impaired p 2444 N94-25363

DEFENSE INDUSTRY
Frameworks for integrated airframe design
p 2178 N94-24318
The Future of Aerospace: Proceedings of a symposium held in honor of Alexander H. Flax
[LC-93-83945] p 2631 N94-25065
Defense aerospace and the new world order
p 2596 N94-25066

DEFENSE PROGRAM
Frameworks for integrated airframe design
p 2178 N94-24318
Information systems strategy in air transport
[AD-A273125] p 2173 N94-24781
Aqueous alkaline cleaners: An alternative to organic solvents
[AD-A273510] p 2260 N94-24848
Research interests and broad agency announcement 94-1 of the Air Force Office of Scientific Research
[AD-A273410] p 2632 N94-25075
B-2 bomber: Assessment of DOD's response to mandated certifications and reports
[AD-A273179] p 2184 N94-25152

DEFINITION
Definitions in use by the visible and near-infrared, and thermal working groups p 2383 N94-23598

DEFLAGRATION
Investigations on detonation shock dynamics and related topics
[DE94-002570] p 2326 N94-23809

DEFORESTATION
Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861

DEFORMATION
Gas-pressure forming of superplastic ceramic sheet
[DE94-001520] p 2252 N94-22930
Design of a surface deformation measuring instrument for the Surface Tension Driven Convection Experiment (STDCE-2)
[NASA-CR-194758] p 2343 N94-23285
Intelligent Material Systems and Structures (IMSS). Part 5: Fiber optic registration of deformation in carbon laminates 91/92
[PB93-204600] p 2544 N94-23723
Real-time holographic endoscopy
[ISL-CO-203/92] p 2343 N94-24054
Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260
Stability analysis of anisotropic conical shells
[PB94-119054] p 2377 N94-24645
Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles
[NASA-CR-195163] p 2201 N94-24919
The measurement of the film thickness and the roughness deformation of lubricated elastomers
[ETN-94-95293] p 2261 N94-25078
The nanometer-scale mechanics of gold films
[AD-A273307] p 2565 N94-25086

DEGRADATION
A prediction model of signal degradation in LMSS for urban areas p 2284 N94-22797
Hot hydrogen testing of metallic turbo pump materials
[NASA-CR-193880] p 2244 N94-24066
Viscoelastic analysis of seals for extended service life
p 2371 N94-24408
Properties and processing characteristics of low density carbon cloth phenolic composites p 2231 N94-24450

DEGREES OF FREEDOM
Control of a serpentine manipulator with collision avoidance p 2368 N94-23232
Rack Insertion End Effector (RIEE) automation
p 2368 N94-23242
Proton spin: The role of quark-gluon and hadron degrees of freedom
[DE93-616867] p 2538 N94-25341

DEIMOS
A mission to Mercury and a mission to the moons of Mars
[NASA-CR-195530] p 2195 N94-24619

DELAMINATING
Analysis of local delaminations caused by angle ply matrix cracks
[NASA-TM-109052] p 2228 N94-24083
The nanometer-scale mechanics of gold films
[AD-A273307] p 2565 N94-25086

DELAY
Investigations into deployment complications of the ERS-1 SAR antenna p 2305 N94-23996
Delay-insensitive communication
[ETN-94-95315] p 2304 N94-25303

DELTA FUNCTION
Ga delta-doping layers in silicon
[PB93-224632] p 2561 N94-23222

DELTA LAUNCH VEHICLE
Liquid rocket propulsion: Retrospective and prospects
p 2154 N94-24243

DELTA WINGS
Lift augmentation on a delta wing via leading edge fences and the Gurney flap
[NASA-CR-194793] p 2168 N94-24103
Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle
[NASA-TM-4533] p 2170 N94-24716
A study of roll attractor and wing rock of delta wings at high angles of attack p 2164 N94-25111

DEMAGNETIZATION
Comparative M-H characteristics of 1-5 and 2-17 type samarium-cobalt permanent magnets to 300 C
[NASA-CR-194440] p 2312 N94-24870

DEMAND (ECONOMICS)
Simplicial variable dimension restart algorithm to find economic equilibria on the unit simplex using n(n+1) rays
[PB94-110541] p 2596 N94-24477
US general aviation: The ingredients for a renaissance. A vision and technology strategy for US industry, NASA, FAA, universities p 2162 N94-25097

DEMODULATION
Low cost coherent demodulation for mobile satellite terminals p 2284 N94-22803
Pseudo-coherent demodulation for mobile satellite systems p 2287 N94-22819
Analysis of time-diversity combining methods for frequency-hopped signals
[CU-DOE-92-09] p 2300 N94-24694
Modulation and synchronization technique for MF-TDMA system
[NASA-CR-194448] p 2304 N94-25266

DEMODULATORS
Performance of the unique-word-reverse-modulation type demodulator for mobile satellite communications
p 2286 N94-22813
Pseudo-coherent demodulation for mobile satellite systems p 2287 N94-22819
Advanced technology for a satellite multichannel demultiplexer/demodulator
[NASA-CR-194435] p 2202 N94-23631

DEMOGRAPHY
Vision impairment and corrective considerations of civil airmen
[DOT/FAA/AM-93/21] p 2426 N94-23623

DEMULTIPLEXING
Advanced technology for a satellite multichannel demultiplexer/demodulator
[NASA-CR-194435] p 2202 N94-23631
Modulation and synchronization technique for MF-TDMA system
[NASA-CR-194448] p 2304 N94-25266
Modeling of the ground-to-SSFMB link networking features using SPW p 2306 N94-25381

DENSITY DISTRIBUTION
Measuring track densities in lunar grains by image analysis p 2623 N94-25355
Near surface analysis p 2407 N94-25364

DENSITY MEASUREMENT
Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361

DEOXYRIBONUCLEIC ACID
Applications of the Aurora parallel PROLOG system to computational molecular biology
[DE93-041166] p 2420 N94-23468
Capillary electrophoresis of biomolecules: Theory, instrumentation and applications
[ETN-94-95297] p 2236 N94-25233

DEPLOYMENT
Deployable video conference table
[NASA-CASE-ARC-11950-1] p 2192 N94-23310
Aircraft accident report: Inadvertent in-flight slat deployment, China Eastern Airlines Flight 583, McDonnell Douglas MD-11, B-2171, 950 nautical miles south of Shemya, Alaska, 6 April 1993
[PB93-910408] p 2172 N94-23579
Primary deployment mechanism for the European Polar Platform p 2207 N94-23995
Investigations into deployment complications of the ERS-1 SAR antenna p 2305 N94-23996
Low melting temperature alloy deployment mechanism
p 2356 N94-23997
Nearly uniform deployment/retrieval strategy for space tether systems p 2156 N94-24256

DEPOLYMERIZATION
Solid rocket combustion simulator technology using the hybrid rocket for simulation
[NASA-CR-195142] p 2265 N94-24578

DEPOSITION
Ultraviolet photosulfidation of III-V compound semiconductors for electronic passivation
[DE94-001417] p 2555 N94-22717
Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296
Pulsed Ion Beam Surface Analysis (PIBSA) as a means of in-situ real-time analysis of thin films during growth
[DE94-001276] p 2562 N94-23805
Mechanisms of anode power deposition in a low pressure free burning arc
[NASA-CR-194442] p 2553 N94-25190

DEPOSITS
Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887

DEPTH
Effect of land use change on the carbon cycle in Amazon soils
[NASA-CR-195168] p 2399 N94-24853
A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure
[AD-A273488] p 2427 N94-24950

DESERTS
The AGRHYMET data communications project
p 2280 N94-22776

DESIGN ANALYSIS
The design and networking of dynamic satellite constellations for global mobile communication systems
p 2288 N94-22826

Design refinement of multilayer optical thin film devices with two optimization techniques
[DE93-634228] p 2542 N94-22979

Design of microchannels for cryostabilization of high temperature superconducting magnets
[DE94-001324] p 2559 N94-22993

Shell buckling research at Delft, 1976 - 1992
[PB93-224442] p 2375 N94-23221

Flame trench analysis of NLS vehicles
p 2199 N94-23249

A reliable algorithm for optimal control synthesis
[NASA-CR-194809] p 2472 N94-23332

Status of the development of rechargeable lithium cells p 2392 N94-23354

Composite material impregnation unit
[NASA-TM-107751] p 2254 N94-23486

Object oriented simulation implementation in support of robust system design
[DE93-011687] p 2452 N94-23488

Simplified, inverse, ejector design tool
[NASA-CR-194438] p 2166 N94-23511

Generic mission planning concepts for space astronomy missions p 2505 N94-23878

Automating a human factors evaluation of graphical user interfaces for NASA applications: An update on CHIMES
p 2443 N94-23936

Specifying design conservatism: Worst case versus probabilistic analysis p 2374 N94-23939

A novel rotary actuator for spacecraft
p 2361 N94-24034

Sensorless, brushless motor to drive a sealed freon-ammonia pump p 2315 N94-24036

The use of analytical models in human-computer interface design p 2434 N94-24190

CMC design consequences p 2256 N94-24238

Integrated Airframe Design Technology
[AGARD-R-794] p 2177 N94-24313

New computing systems, future computing environment, and their implications on structural analysis and design
p 2177 N94-24314

Early manufacturing considerations in design
p 2177 N94-24315

Probabilistic simulation of concurrent engineering of propulsion systems p 2177 N94-24317

The process network in the design and manufacturing of aircraft p 2178 N94-24319

Application of concurrent engineering principles to aircraft structural design p 2178 N94-24321

Viscoelastic analysis of seals for extended service life
p 2371 N94-24408

A review of ISEAS design p 2465 N94-24410

Finite element based electric motor design optimization p 2315 N94-24411

Design and specification of a centralized manufacturing data management and scheduling system
p 2577 N94-24416

Technology utilization office data base analysis and design p 2577 N94-24417

Controller modeling and evaluation for PCV electro-mechanical actuator p 2371 N94-24441

LOLA: Lunar Optical Long-baseline Array. 1992-1993 space design
[NASA-CR-195533] p 2298 N94-24582

An investigation of requirements traceability to support systems development
[AD-A273167] p 2458 N94-24684

The cetaceopteryx: A global range military transport aircraft
[NASA-CR-195519] p 2181 N94-24711

Pre-design study of a general purpose vehicle simulator platform
[PB93-215366] p 2193 N94-24739

Design and application of electromechanical actuators for deep space missions
[NASA-CR-195134] p 2365 N94-24842

Weasel works SA-150: Design study of a 100 to 150 passenger transport aircraft
[NASA-CR-195489] p 2183 N94-24975

The Bunny: A simulated commercial air transportation study
[NASA-CR-195537] p 2183 N94-25001

The Gold Rush: A simulated commercial air transportation study
[NASA-CR-195528] p 2184 N94-25002

Human factors of mission planning systems: Theory and concepts p 2521 N94-25010

Development of high-angle-of-attack nose-down pitch control margin design guidelines for combat aircraft
p 2164 N94-25107

DESIGN TO COST

PERCIVAL mission to Mars
[NASA-CR-195541] p 2195 N94-24995

DESORPTION

Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790

DESTABILIZATION

Effect of LHCD (low hybrid current drive) on tearing mode instability
[DE93-613700] p 2555 N94-25344

DETECTION

Lightning studies using LDAR and LLP data
p 2416 N94-23238

Screening for asymptomatic coronary heart disease
p 2423 N94-23315

Feasibility of detecting aircraft wake vortices using passive microwave radiometers
[NASA-CR-191553] p 2343 N94-23498

Orbital Signature Analyzer (OSA): A spacecraft health/safety monitoring and analysis tool
p 2203 N94-23947

A chemical sensor and biosensor based totally automated water quality monitor for extended space flight: Step 1 p 2443 N94-24447

The measurement of the film thickness and the roughness deformation of lubricated elastomers
[ETN-94-95293] p 2261 N94-25078

A model-based approach for detection of objects in low resolution passive-millimeter wave images
p 2442 N94-25507

DETECTORS

Deviation equations of Synge and Schild in spaces with affine connection and metric, and equations for gravitational waves detectors
[DE93-616852] p 2571 N94-25339

DETONABLE GAS MIXTURES

Stability of hypersonic flow of a detonable gas mixture in the stagnation region of a blunt body and a forward facing step p 2154 N94-24248

DETONATION

The ignition temperature of solid explosives exposed to a fire
[DE94-001047] p 2265 N94-23436

Multiple shock initiation of LX-17
[DE94-001524] p 2265 N94-23807

Investigations on detonation shock dynamics and related topics
[DE94-002570] p 2326 N94-23809

Stability of hypersonic flow of a detonable gas mixture in the stagnation region of a blunt body and a forward facing step p 2154 N94-24248

DETONATION WAVES

Investigations on detonation shock dynamics and related topics
[DE94-002570] p 2326 N94-23809

DEUTERIDES

Vacancy formation energy of Li(H, D) and Na(H, D) systems
[DE93-633452] p 2558 N94-22978

DEUTERIUM

Pellet ablation in the large helical device
[NIFS-260] p 2551 N94-24358

DEUTERIUM COMPOUNDS

High-resolution soft x ray photoionization studies of selected molecules
[DE94-000568] p 2532 N94-23002

DEXTRANS

Capillary electrokinetic separations with optical detection
[DE94-001639] p 2233 N94-23716

DIAMOND FILMS

The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A273698] p 2263 N94-25489

DIAMONDS

Intelligent control of chemical vapor deposition processes
[AD-A273356] p 2261 N94-24937

Selected bibliography 2: Diamond surface chemistry
[AD-A273518] p 2565 N94-25160

Temperature dependent performance of Coplanar Waveguide (CPW) on substrates of various materials
[NASA-TM-106505] p 2313 N94-25170

DIASTOLIC PRESSURE

Autogenic-feedback training: A potential treatment for post-flight orthostatic intolerance in aerospace crews
[NASA-TM-108785] p 2426 N94-24102

DIATOMIC MOLECULES

Energy transfer in solid explosives
[DE94-001523] p 2265 N94-23778

DICARBOXYLIC ACIDS

Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763

DICHOTOMIES

The geophysical signal of the martian global dichotomy p 2623 N94-24997

DICHROISM

Performance of the X-/Ka/KABLE-band dichroic plate in the DSS-13 beam waveguide antenna
p 2291 N94-23261

Mueller matrix analysis of infrared ellipsometry
[PB93-201549] p 2544 N94-23629

DIELECTRIC PROPERTIES

The elastic and electromechanical properties of BaTiO3 single crystal through the ferroelectric transition
[DE94-001437] p 2557 N94-22927

Mueller matrix analysis of infrared ellipsometry
[PB93-201549] p 2544 N94-23629

Multigrid and cyclic reduction applied to the Helmholtz equation p 2304 N94-23676

DIELECTRICS

Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique
[DE94-001608] p 2309 N94-23520

DIELS-ALDER REACTIONS

Study of improved methods for predicting chemical equilibria
[DE94-001647] p 2568 N94-22719

Synthesis of soluble halogenated polyphenylenes: Mechanism for the coupling halogenated lithiobenzenes
[AD-A273547] p 2257 N94-24558

DIESEL ENGINES

Development of high temperature liquid lubricants for low-heat rejection: Heavy duty diesel engines
[NASA-CR-191197] p 2258 N94-24753

DIFFERENTIAL AMPLIFIERS

High speed electronic analog computers using low-gain amplifiers
[AD-D015974] p 2446 N94-25034

Wide bandwidth differential amplifier
[AD-D015985] p 2303 N94-25217

DIFFERENTIAL CALCULUS

Differential algebraic equations
[PB93-237618] p 2481 N94-23455

On the differentiation matrix for Daubechies-based wavelets on an interval
[NASA-CR-191582] p 2487 N94-24291

Discrete sensitivity derivatives of the Navier-Stokes equations with a parallel Krylov solver
[NASA-TM-106481] p 2265 N94-24301

DIFFERENTIAL EQUATIONS

Coherence lost? Not-so-fast escapes from the in-phase attractor of a set of globally coupled nonlinear oscillators
[DE94-000799] p 2557 N94-22940

On the numeric integration of dynamic attitude equations
[NASA-CR-194788] p 2448 N94-23073

The explicit computation of integration algorithms and first integrals for ordinary differential equations with polynomials coefficients using trees
[NASA-CR-194787] p 2448 N94-23074

Differential algebraic equations
[PB93-237618] p 2481 N94-23455

Response-coefficient method for heat-conduction transients with time-dependent inputs
p 2326 N94-23671

Multigrid methods for differential equations with highly oscillatory coefficients p 2484 N94-23685

Error due to the stopping of the Newton iteration in implicit linear multistep methods
[PB94-101425] p 2487 N94-23786

Neural network-based control using Lyapunov functions p 2477 N94-24433

Simulation of cryogenic turbopump annular seals
p 2371 N94-24440

Comparison of time integration methods for the evolution of galaxies
[PB94-111671] p 2602 N94-24522

Stable non-Gaussian diffusive profiles
[PB93-238053] p 2489 N94-24610

Super Beltrami differentials and N equal to 4 superconformal anomalies
[DE93-613047] p 2491 N94-25166

The state space method for integro-differential equations of convolution type with rational matrix symbols
[ETN-94-95379] p 2491 N94-25244

Liapunov stability in chemical engineering
[MATHS-REPT-A-184] p 2236 N94-25427

DIFFERENTIAL GEOMETRY

On the numeric integration of dynamic attitude equations
[NASA-CR-194788] p 2448 N94-23073

Studies on the implementation of normals and curvatures. Part 1: The first or mean curvature
[DE94-001546] p 2488 N94-24503

DIFFERENTIAL INTERFEROMETRY

Interferometry in rarefied gas flows
[ISL-CO-207/92] p 2318 N94-23160

DIFFERENTIAL PRESSURE
Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773
DIFFRACTION
A prediction model of signal degradation in LMSS for urban areas p 2284 N94-22797
Modifications to 8x8 dynamical theory: Polarizations redefined according to x ray diffraction convention
[DE94-001290] p 2560 N94-23187
DIFFRACTION PATTERNS
X ray diffraction analysis of electrodeposited beta-tantalum
[AD-A273254] p 2249 N94-25142
DIFFRACTOMETERS
Dual-purpose RTOF diffractometer facility at the ET-RR-1 reactor
[VTT-TIED-1425] p 2566 N94-25347
DIFFUSE RADIATION
Uncertainty analysis of diffuse-gray radiation enclosure problems: A hypersensitive case study
p 2320 N94-23637
An Earth albedo model: A mathematical model for the radiant energy input to an orbiting spacecraft due to the diffuse reflectance of solar radiation from the Earth below
[NASA-TM-104596] p 2195 N94-24497
DIFFUSERS
Numerical analysis of a vortex controlled diffuser
p 2324 N94-23659
The 3-D numerical study of airflow in the compressor/combustor prediffuser and dump diffuser of an industrial gas turbine p 2324 N94-23660
DIFFUSION
Low temperature diffusion of hydrogenic species in oxide crystals: Radiation induced diffusion
[DE94-000374] p 2558 N94-22957
Diffusion of hydrogen in iron oxides
[DE93-632430] p 2239 N94-22966
A method to simulate viscous diffusion of vorticity by convective transport of vortices at a non-solenoidal velocity
[DE94-001777] p 2318 N94-23220
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique
[DE94-001608] p 2309 N94-23520
Convective instabilities in traveling fronts of addition polymerization p 2226 N94-24352
Effects of thermal-solutal convection on temperature and solutal fields under various gravitational orientations
p 2267 N94-24451
Symposium on diffusion in ordered alloys
[AD-A273643] p 2245 N94-25033
DIFFUSION COEFFICIENT
Eddy mixing coefficient values derived from simulations with the NASA Ames Mars GCM p 2617 N94-24875
Drying deformable media: Kinetics, shrinkage and stresses
[ETN-94-95314] p 2236 N94-25302
Diffusion in electronegative discharges with magnetic fields
[AD-A273826] p 2304 N94-25521
DIFFUSION FLAMES
Evaporation and combustion of LOX under supercritical and subcritical conditions p 2211 N94-23035
Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055
Extinguishment of combustible porous solids by water droplets
[PB93-198893] p 2270 N94-23740
Transient phenomena in laminar spray combustion
p 2160 N94-24282
Multiple flames in counterflow spray combustion
p 2161 N94-24284
DIFFUSION THEORY
Applications of the homogenization method to flow and transport in porous media
[BER-9110] p 2340 N94-25467
DIFFUSION WELDING
Gas-pressure forming of superplastic ceramic sheet
[DE94-001520] p 2252 N94-22930
Strength, acoustic evaluation and metallurgy of diffusion bonds
[DE94-001804] p 2243 N94-23717
DIFFUSIVITY
Stable non-Gaussian diffusive profiles
[PB93-238053] p 2489 N94-24610
Derivation of the macroscopic rate equations for the driven diffusive Ising model at pair level of approximation
[DE93-616839] p 2524 N94-25208
DIGITAL COMPUTERS
Verification of synchronous sequential numerical material systems: Application of the LUSTRE language and of the LESAR verification tool
[ETN-94-95181] p 2447 N94-22899
Development of programmable artificial neural networks p 2477 N94-25370
DIGITAL DATA
ASTER TIR subsystem and calibration
p 2385 N94-23612
The Mars mapper science and mission planning tool
p 2503 N94-23867
Conveying digital data in noisy, unstable, multipath environments
[AD-D015980] p 2301 N94-25038
Some subjects in digital audio, noise shaping, sample rate conversion, dynamic range compression and testing
[ISBN-9-09-005162-7] p 2530 N94-25220
Digital data, composite video multiplexer and demultiplexer boards for an IBM PC/AT compatible computer p 2447 N94-25377
DIGITAL ELECTRONICS
Multidisciplinary specification and design of microelectronics in products
[EUT-93-E-269] p 2308 N94-23136
PLANET: A hierarchical network simulator
[ISBN-9-09-005693-9] p 2313 N94-25083
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
DIGITAL SIMULATION
Mixed analog-digital description and simulation: Proposition for VHDL-analogue
[RR-908-I] p 2450 N94-23180
DIGITAL SYSTEMS
ESA personal communications and digital audio broadcasting systems based on non-geostationary satellites p 2273 N94-22737
Direct broadcast satellite-radio, receiver development
p 2273 N94-22739
Pilot-vehicle interface
[DOT/FAA/CT-92/21] p 2430 N94-23083
Formal methods and digital systems validation for airborne systems
[NASA-CR-4551] p 2466 N94-23293
Micro SIL-1 simulator
[PB94-110889] p 2454 N94-23750
An introduction to digital modulation and OFDM techniques
[BBC-RD-1993/10] p 2295 N94-24086
A homotopy algorithm for digital optimal projection control GASD-HADOC
[NASA-CR-193881] p 2456 N94-24470
Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply
[AD-A273149] p 2299 N94-24670
Pilot-vehicle interface handbook, chapter 19. Volume 2: Digital systems validation
[DOT/FAA/CT-88/10-VOL-2] p 2438 N94-24830
On-line evaluation of multiloop digital controller performance p 2163 N94-25105
Aircraft digital flight control technical review
p 2163 N94-25106
DIGITAL TECHNIQUES
Spur-reduced digital sinusoid synthesis
p 2291 N94-23264
The HDTV digital audio matrix
[BBC-RD-1993/9] p 2295 N94-24085
An introduction to digital modulation and OFDM techniques
[BBC-RD-1993/10] p 2295 N94-24086
Special signature schemes
[ETN-94-95296] p 2446 N94-25081
On chain coding of line drawings
[ISBN-9-06-275778-2] p 2462 N94-25252
DIGITAL TELEVISION
HORACE: Presentation-level protocol standard for digital transmission of monochrome television images
[AD-A273395] p 2197 N94-25064
DIISOCYANATES
Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763
DILUTION
Optimization of orifice geometry for cross-flow mixing in a cylindrical duct
[NASA-TM-106436] p 2481 N94-23593
DIMENSIONAL MEASUREMENT
Particle size measurement for the control of industrial crystallizers
[PB94-119104] p 2562 N94-23766
DIMERS
Synthesis of molecular wires by a novel divergent/convergent approach
[AD-A273332] p 2537 N94-25087
DIRAC EQUATION
Relativistic configuration interaction calculation of the correlation energies of highly-charged ions
[DE94-001055] p 2532 N94-22988
DIRECT BROADCAST SATELLITES
Utilizing a TDRS satellite for direct broadcast satellite-radio propagation experiments and demonstrations p 2274 N94-22740
Adaptive array antenna for satellite cellular and direct broadcast communications p 2275 N94-22745
DIRECT CURRENT
Laser energized high voltage direct current power supply
[AD-D015977] p 2312 N94-25036
A vibrating wire parallel to a type 2 superconducting slab of arbitrary thickness
[DE93-617134] p 2525 N94-25389
Effects of a vibrating wire carrying DC current on a moving type 2 superconducting slab of arbitrary thickness
[DE93-617136] p 2566 N94-25391
DIRECTIONAL ANTENNAS
A study of satellite motion-induced multipath phenomena p 2283 N94-22794
Aeronautical satellite antenna steering using magnetic field sensors p 2289 N94-22836
Experimental verification of an acoustic telemetry link between an Aurora and CFAV quest
[DREA-TC-93-304] p 2202 N94-24121
DIRECTIONAL COUPLERS
Calibration network intended for phase-array antennas at 3 GHz
[PB93-204352] p 2297 N94-24530
DIRECTIONAL SOLIDIFICATION (CRYSTALS)
Microgravity sciences application visiting scientist program
[NASA-CR-194804] p 2267 N94-23287
Effects of thermal-solutal convection on temperature and solutal fields under various gravitational orientations
p 2267 N94-24451
DIRECTIONAL STABILITY
Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle
[NASA-TM-4533] p 2170 N94-24716
DIRECTORIES
NACA collections: A directory of significant collections of the documents of the National Advisory Committee for Aeronautics
[NASA-CR-195686] p 2594 N94-25541
DIRICHLET PROBLEM
Multigrid and cyclic reduction applied to the Helmholtz equation p 2304 N94-23676
DISCONNECT DEVICES
Electromagnetic brake/clutch device
[NASA-CASE-GSC-13502-1] p 2354 N94-23969
DISCRETE FUNCTIONS
Characterizations of shift-invariant distributions based on summation modulo one
[PB93-237824] p 2481 N94-23442
DCT quantization matrices visually optimized for individual images p 2442 N94-25509
DISCRIMINANT ANALYSIS (STATISTICS)
Eye-gaze control of the computer interface: Discrimination of zoom intent
[DE94-000480] p 2429 N94-22997
DISCRIMINATION
Parametric and nonparametric discriminants for regional earthquakes and explosions
[AD-A273807] p 2406 N94-25538
DISCRIMINATORS
A theoretical investigation of electrically tunable birefringent optical filters as the special discriminator in hyperspectral imaging systems
[AD-A273743] p 2547 N94-25533
DISEASES
Sarcoidosis and the aviator p 2425 N94-23325
DISILICIDES
Design of a resistojet for Space Station Freedom
[NASA-CR-195506] p 2221 N94-24979
DISLOCATIONS (MATERIALS)
Ring nuclei of strain for bonded dissimilar elastic half spaces with particular application to axisymmetric crack problems
[OUEL-1966/92] p 2379 N94-25325
The complete stress field due to a dislocation located anywhere in two bonded quarter planes
[OUEL-1990/93] p 2379 N94-25478
DISPERSING
Mechanisms of droplet formation
[ISBN-9-06-275765-0] p 2338 N94-25227
DISPERSION
Recent developments in the mathematical modelling and physical understanding of transport and dispersion in aquatic systems, with special reference to tidal waters
[PB94-111135] p 2418 N94-24600
DISPERSIONS
Effect of initial droplet-size distributions on fuel-vapor profiles in a shear-layer flow p 2160 N94-24283

DISPLACEMENT
Perception and 3D environment modeling for mobile robot autonomous navigation
[LAAS-93117] p 2471 N94-22908

DISPLAY DEVICES
Cockpit weather graphics using mobile satellite communications p 2280 N94-22775
Advanced display technologies in Russia, Ukraine, and Belarus. Viewgraphs p 2630 N94-22893
Pilot-vehicle interface
[DOT/FAA/CT-92/21] p 2430 N94-23083
The Mars mapper science and mission planning tool
p 2503 N94-23867
Mars Observer screen display design for a multimission environment p 2197 N94-23888
Multimission image processing and science data visualization p 2518 N94-23955
Night operations p 2431 N94-23977
Process and representation in graphical displays
p 2433 N94-24187
Evaluation of the UH-1N instrument panel
[AD-A273145] p 2186 N94-24774
Mission planning and mission rehearsal systems: Displays and other interactive techniques
p 2522 N94-25013
Future space transportation system architecture avionics requirements p 2162 N94-25098
Proceedings of the Workshop on Augmented Visual Display (AVID) Research
[NASA-CP-10128] p 2439 N94-25490
Optical information in landing scenes
p 2442 N94-25511
Sensor fusion display evaluation using information integration models in enhanced/synthetic vision applications p 2443 N94-25512
Quality metrics for sensor images
p 2443 N94-25513
Evaluation of image quality p 2443 N94-25514

DISRUPTING
Microinjection of the Yersinia YopE cytotoxin in mammalian cells induces actin microfilament disruption
[FOA-B-40418-4.4] p 2421 N94-24290

DISSIPATION
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
Shock-induced turbulent flow in baffle systems
[DE94-001532] p 2319 N94-23470
A transport equation for the scalar dissipation in reacting flows with variable density: First results
p 2331 N94-24157
Direct measurement of turbulent dissipation rate using dual laser doppler velocimeters
[AD-A273740] p 2340 N94-25530

DISSOCIATION
Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790

DISSOLVING
Use of scanning tunneling microscope in corrosion studies
[VTT-TIED-1416] p 2250 N94-25346

DISTORTION
Vibrations of variable cross section Timoshenko beams p 2160 N94-24279

DISTRIBUTED AMPLIFIERS
Spatial frequency multiplier with active linearly tapered slot antenna array
[NASA-TM-106494] p 2310 N94-24308

DISTRIBUTED FEEDBACK LASERS
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1
[AD-A271081] p 2348 N94-23123

DISTRIBUTED PROCESSING
Translative interface for data sharing and integrating: A paradigm for distributed data systems
[DE93-018790] p 2588 N94-22863
Resolution of Markov models on distributed memory machines
[ETN-94-95182] p 2444 N94-22900
Distributed Operating Systems and Mach. Proceedings of the Spring 1992 Graduate Seminar on Distributed Systems
[PB93-224905] p 2449 N94-23103
Modeling parallelism and synchronization
[ETN-94-95179] p 2465 N94-23134
A parallel PROLOG system for distributed memory multiprocessor
[ETN-94-95173] p 2465 N94-23167
Advanced design concepts for open distributed systems development
[PB94-110897] p 2454 N94-23751
PILOT: An intelligent distributed operations support system p 2508 N94-23895
Customizing graphical user interface technology for spacecraft control centers p 2510 N94-23905
Distributed computing environments for future space control systems p 2464 N94-23911
Mission and science activity scheduling language
p 2515 N94-23938
A programming environment for distributed complex computing. An overview of the Framework for Interdisciplinary Design Optimization (FIDO) project. NASA Langley TOPS exhibit H120b
[NASA-TM-109058] p 2457 N94-24603
Design of central control system for Large Helical Device (LHD)
[NIFS-258] p 2553 N94-24623
The experimental physics and industrial control system architecture: Past, present, and future
[DE94-002639] p 2457 N94-24626
A usage profile and evaluation of a wide-area distributed file system
[AD-A273590] p 2593 N94-24946
The design of the EMPS multiprocessor executive for distributed computing
[ETN-94-95336] p 2468 N94-25062
Design and implementation of a distributed version of the NASA Engine Performance Program
[NASA-CR-194475] p 2462 N94-25179
A design method for parallel programs
[ETN-94-95331] p 2469 N94-25282
Parallel processing methods for space based power systems p 2222 N94-25352

DISTRIBUTION FUNCTIONS
A prediction model of signal degradation in LMSS for urban areas p 2284 N94-22797
Limiting distribution of fractional parts of extreme order statistics
[PB93-237733] p 2494 N94-23440
Development and application of an empirical probability distribution for the prediction error of re-entry body maximum dynamic pressure p 2207 N94-23653
Asymptotic confidence intervals for the length of the shortt under random censoring
[PB93-237816] p 2494 N94-23774
Infinite divisible and stable distributions modulo 1
[PB94-110640] p 2495 N94-23815
Tail processes under heavy random censorship with applications
[PB94-110632] p 2495 N94-24508
Integral equations for the microstructures of supercritical fluids
[DE94-002460] p 2535 N94-24569
Polynomials orthogonal with respect to an inner product involving differences
[PB94-110731] p 2489 N94-24572
Durability evaluation of ceramic components using CARES/LIFE
[NASA-TM-106475] p 2258 N94-24682
Efficiency of subset selection of an epsilon-best uniform population relative to selection of the best one
[PB93-237741] p 2490 N94-24763
Generalized linear mixed models and their application in plant breeding research
[ETN-94-95335] p 2460 N94-25061

DISULFIDES
Status of the development of rechargeable lithium cells p 2392 N94-23354

DIURNAL VARIATIONS
A study of satellite motion-induced multipath phenomena p 2283 N94-22794

DIVERGENCE
Diagnostic budgets of analyzed and modelled tropical plumes
[NASA-CR-194853] p 2409 N94-23621
Multi-grid domain decomposition approach for solution of Navier-Stokes equations in primitive variable form
p 2341 N94-23693

DIVERTERS
Massachusetts Institute of Technology Plasma Fusion Center 1992-1993 report to the President
[DE94-001725] p 2548 N94-22721
Assessment of stellarators as reactors
[DE93-017775] p 2548 N94-22916
Superconducting magnet system for the TPX Tokamak
[DE94-001535] p 2549 N94-23013
Performance characteristics of the DIII-D advanced divertor cryopump
[DE94-002745] p 2354 N94-23797
Proposal of Modular Heliotron: Advanced modular helical system compatible with closed helical divertor
[NIFS-261] p 2552 N94-24458
Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD
[DE94-001565] p 2552 N94-24504

DIVING (UNDERWATER)
A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure
[AD-A273488] p 2427 N94-24950

DOCUMENTATION
Fiscal year 1993 scientific and technical reports, articles, papers, and presentations
[NASA-TM-108423] p 2590 N94-24079

DOCUMENTS
NACA collections: A directory of significant collections of the documents of the National Advisory Committee for Aeronautics
[NASA-CR-195686] p 2594 N94-25541

DOMAIN WALL
Flavor changing strings and domain walls
[DE93-633217] p 2532 N94-22970

DOPED CRYSTALS
Polycrystalline thin film materials and devices
[DE93-018213] p 2389 N94-22862
Physics with chemically and isotopically pure semiconductors
[DE93-040120] p 2557 N94-22926
Ga delta-doping layers in silicon
[PB93-224632] p 2561 N94-23222
Magnetic resonance study of zinc-related defects in silicon with optimized EPR spectrometer
[PB93-224640] p 2561 N94-23223
Transparent conducting thin films for spacecraft applications
[NASA-TM-106466] p 2218 N94-23370
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique
[DE94-001608] p 2309 N94-23520
The study of dopant segregation behavior during the growth of GaAs in microgravity
[NASA-CR-193905] p 2267 N94-23549
Combustion synthesis and engineering of nanoparticles for electronic, structural and superconductor applications
[DE94-001865] p 2254 N94-23720
Large-scale production of Si(0.8)Ge(0.2) thermoelectric alloys by mechanical alloying
[DE94-000695] p 2243 N94-23753
Development of infrared sensors using energy transfer/energy upconversion processes: Study of laser excited fluorescence in rare Earth ion doped crystals
[NASA-TM-108437] p 2233 N94-24073
Investigation of the optical and laser properties of Tm and Ho in YAG anf YLF
[REPT-94-001] p 2563 N94-24404
In situ and ex situ spectroelectrochemical and x ray absorption studies on rechargeable, chemically-modified and other MnO2 materials
[DE94-001387] p 2234 N94-24545
Polythiophene derivative with a side chain chromophore as photovoltaic and photorefractive materials
[AD-A273245] p 2260 N94-24813
The Haldane energy gap of a doped linear-chain Heisenberg antiferromagnet
[DE93-617130] p 2567 N94-25426

DOPPLER EFFECT
Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS
p 2283 N94-22795
A comparison between coherent and noncoherent mobile systems in large Doppler shift, delay spread, and C/I environment p 2287 N94-22818
SFOLDA: A semiconductor LDA for measurements in complex flows p 2316 N94-22856
Radar stimulator interface protocol, preliminary interface design and Doppler Beam Sharpening implementation
[DE94-002567] p 2453 N94-23701

DOPPLER NAVIGATION
Navigation of space VLBI missions: Radioastron and VSOP p 2513 N94-23926

DOPPLER RADAR
Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop
[PB93-220135] p 2407 N94-23129
An improved gravity model for Mars: Goddard Mars Model-1 (GMM-1)
[NASA-TM-104584] p 2401 N94-23282
Implementation and evaluation of the new wind algorithm in NASA's 50 MHz doppler radar wind profiler
[NASA-CR-194880] p 2408 N94-23576
IRIG radar calibration catalog. Version 2: The IRIG error model reference for radar calibrations
[AD-A273344] p 2303 N94-25155
Improvement of system properties of a pulsed laser Doppler anemometer with respect to an optical amplifier
[DLR-FB-93-19] p 2547 N94-25305

DOSIMETERS
Experimental characterization of the AFIT Neutron Facility
[AD-A273822] p 2539 N94-25519

DOUBLE BASE PROPELLANTS
Burning rate of double-base propellant in the presence of plasma p 2155 N94-24252
DOWNLINKING
The provision of spectrum for feeder links of non-geostationary mobile satellites
p 2276 N94-22751
K-band mobile propagation measurements using ACTS p 2283 N94-22792
Analysis of open-loop conical scan pointing error and variance estimators p 2291 N94-23263
DRAG
Embodiment design for a multipropellant resistojet
[NASA-CR-195505] p 2221 N94-24834
A diagnostic model to estimate winds and small-scale drag from Mars Observer PMIRR data
p 2617 N94-24874
DRAG REDUCTION
Optimal feedback control of turbulent channel flow
p 2327 N94-24139
Drag reduction at a plane wall p 2327 N94-24140
Boundary layer receptivity and control
p 2327 N94-24141
Experimental study of a turbulent boundary layer in presence of external manipulators of NACA 0009 profile in the transonic regime
[ISBN-0-315-57633-2] p 2333 N94-24177
The Triton: Design concepts and methods
[NASA-CR-195542] p 2184 N94-25004
Coherent structures over grooved surfaces
[ETN-94-95308] p 2339 N94-25291
DRAINAGE
Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop
[PB93-220135] p 2407 N94-23129
Performance of prefabricated geocomposite subdrainage system in an airport runway
[DOT/FAA/RD-93/23] p 2192 N94-23303
DRAINAGE PATTERNS
Performance of prefabricated geocomposite subdrainage system in an airport runway
[DOT/FAA/RD-93/23] p 2192 N94-23303
DRILLING
Development/drilling test of auger boring machine on board Mars rover for Mars exploration
p 2369 N94-23402
DRONE AIRCRAFT
UAV current technology and future trends
p 2154 N94-24245
Generic drone control system
[AD-D015993] p 2184 N94-25052
DROP SIZE
Development of a droplet breakup model considering aerodynamic and droplet collision effects
p 2213 N94-23045
Shear coaxial injector instability mechanisms
p 2213 N94-23047
Effect of initial droplet-size distributions on fuel-vapor profiles in a shear-layer flow p 2160 N94-24283
Mechanisms of droplet formation
[ISBN-9-06-275765-0] p 2338 N94-25227
Infrared sensors and systems for enhanced vision/autonomous landing applications
p 2439 N94-25491
DROPS (LIQUIDS)
Droplet turbulence interactions under subcritical and supercritical conditions p 2211 N94-23036
Fundamental rocket injector/spray programs at the Phillips Laboratory p 2211 N94-23039
Numerical parametric studies of spray combustion instability p 2212 N94-23041
Development of a droplet breakup model considering aerodynamic and droplet collision effects
p 2213 N94-23045
Development of a computational testbed for numerical simulation of combustion instability
p 2213 N94-23046
Liquid oscillations in a spherical system with sliding edges boundary by two conical solid surfaces in zero-gravity
[LRT-WE-9-FB-5-1992] p 2318 N94-23197
Forced vibrations of a non-viscous drop
[MPIS-24/1992] p 2318 N94-23198
An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel
[NASA-TM-106471] p 2166 N94-23299
Mechanisms of droplet formation
[ISBN-9-06-275765-0] p 2338 N94-25227
DRY FRICTION
Wear characteristics of technical dry rolling/sliding systems with relations to corrugation problems
p 2269 N94-23586
DRYING
Composite fiber structures for catalysts and electrodes
p 2393 N94-23364
Drying deformable media: Kinetics, shrinkage and stresses
[ETN-94-95314] p 2236 N94-25302
DUCTED FAN ENGINES
NASA advanced design program. Design and analysis of a radio-controlled flying wing aircraft
[NASA-CR-195515] p 2180 N94-24589
DUCTED FANS
Summary of lift and lift/cruise fan powered lift concept technology
[NASA-CR-177619] p 2176 N94-23489
DUCTED FLOW
Turbulent separated flows above an obstacle in an open channel p 2316 N94-22859
Zone fire modeling with natural building flows and a zero order shaft model
[PB94-112166] p 2270 N94-23735
Modeling dynamically coupled fluid-duct systems with finite line elements
[NASA-CR-193909] p 2376 N94-24359
DUCTILE-BRITTLE TRANSITION
Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009
DUCTILITY
Relationship of microstructure and mechanical properties for V-Cr-Ti alloys
[DE94-001431] p 2238 N94-22718
Creep deformation characteristics of ductile discontinuous fiber reinforced composites
[DE94-000697] p 2227 N94-23005
Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276
DUCTS
Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models
p 2216 N94-23062
Modeling dynamically coupled fluid-duct systems with finite line elements
[NASA-CR-193909] p 2376 N94-24359
DUFFING DIFFERENTIAL EQUATION
Controlling regular and chaotic dynamics in the Duffing-Ueda oscillator
[RR-477] p 2523 N94-25323
DURABILITY
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 2: Effect of spray parameters on the performance of several hafnia-yttria and zirconia-yttria coatings
[NASA-TP-3296] p 2242 N94-23467
Evaluation of the fracture resistance and durability of adhesive bonded joints p 2160 N94-24278
Foil bearings p 2371 N94-24415
Durability evaluation of ceramic components using CARES/LIFE
[NASA-TM-106475] p 2258 N94-24682
DUST
Flames in dusty mixtures: Their structure and stability
[NASA-CR-191567] p 2317 N94-23089
Mars dust-driven tides and their impact on the thermosphere p 2617 N94-24876
Cloud, dust, and ozone vertical profiles from solar occultation measurements: Implications for dynamics
p 2617 N94-24877
Particle sizes and composition of Mars atmospheric dust based upon Viking and Mariner 9 observations
p 2618 N94-24878
The annual pressure cycle on Mars: Results from the LMD Martian atmospheric general circulation model
p 2619 N94-24884
Northern hemisphere dust storms on Mars
p 2619 N94-24885
Dynamics of the atmosphere of Mars: Review of some outstanding problems p 2620 N94-24888
Mars Operational Environmental Satellite (MOES): A post-Mars Observer discovery mission
p 2620 N94-24890
Evidence for dust transport in Viking IR thermal mapper opacity data p 2620 N94-24892
Dust transport in the Martian atmosphere
p 2621 N94-24894
The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896
Diagnostic calculations of the circulation in the Martian atmosphere p 2622 N94-24898
DUST STORMS
Mars dust-driven tides and their impact on the thermosphere p 2617 N94-24876
Northern hemisphere dust storms on Mars
p 2619 N94-24885
Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887
Mars Operational Environmental Satellite (MOES): A post-Mars Observer discovery mission
p 2620 N94-24890
Evidence for dust transport in Viking IR thermal mapper opacity data p 2620 N94-24892
DWARF GALAXIES
CO-to-H2 conversion factor in dwarf irregular galaxies
[REPT-333] p 2603 N94-24985
DYADICS
Polarizability of gyrotropic sphere
[PB93-225019] p 2524 N94-23131
DYE LASERS
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-194810] p 2397 N94-23277
Sodium-layer laser guide stars
[DE93-019621] p 2349 N94-23490
DYES
Feasibility study: Monodisperse polymer particles containing laser-excitable dyes p 2225 N94-24350
DYNAMIC CHARACTERISTICS
Experimental modification and identification of the DSS-13 antenna control system model
p 2291 N94-23260
Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-195128] p 2388 N94-24827
Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124
DYNAMIC CONTROL
Contribution to geometric and dynamic modeling of parallel robots
[LAAS-93089] p 2470 N94-22904
An architecture for teleprogramming autonomous mobile robots at task level
[LAAS-93107] p 2470 N94-22906
Real-time dynamics and control strategies for space operations of flexible structures
[NASA-CR-194794] p 2203 N94-23618
Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344
Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108
Modeling of a large undamped space structure using time domain techniques
[AD-A273828] p 2206 N94-25523
DYNAMIC LOADS
A technique to measure rotordynamic coefficients in hydrostatic bearings p 2215 N94-23061
Role of interfaces on the cyclic fatigue behaviour of ceramic matrix composites p 2256 N94-24234
Controllability of free-piston Stirling engine/linear alternator driving a dynamic load
[NASA-TM-106497] p 2521 N94-24302
Foil bearings p 2371 N94-24415
DYNAMIC MODELS
Space Station Freedom (SSF) Data Management System (DMS) performance model data base
[NASA-CR-188270] p 2590 N94-23289
Viewing hybrid systems as products of control systems and automata
[NASA-CR-194792] p 2472 N94-23300
Heat pipe vapor dynamics
[NASA-CR-194217] p 2327 N94-24096
Large eddy simulation of a boundary layer with concave streamwise curvature p 2328 N94-24146
Dynamic localization and second-order subgrid-scale models in large eddy simulations of channel flow
p 2329 N94-24149
A large eddy simulation scheme for turbulent reacting flows p 2330 N94-24154
A dynamic melting model for the origin of Apollo 15 olivine-normative and quartz-normative mare basalts
p 2615 N94-24371
An exploratory stochastic model for toxic effects on cells
[AD-A273438] p 2422 N94-25146
Timed coloured Petri nets and their application to logistics
[ETN-94-95310] p 2522 N94-25293
Simulation of a passive millimeter wave sensor
p 2346 N94-25499
DYNAMIC PRESSURE
Development and application of an empirical probability distribution for the prediction error of re-entry body maximum dynamic pressure p 2207 N94-23653
DYNAMIC PROGRAMMING
General optimal stopping theorems for semi-Markov processes
[PB93-214989] p 2496 N94-24744

Approximate optimal guidance for the advanced launch system [NASA-CR-4568] p 2198 N94-24752

Class of strong valid inequalities for the discrete lot-sizing and scheduling problem [PB93-237774] p 2459 N94-24765

DYNAMIC RESPONSE

Proof test of the computer program BUCKY for plasticity problems [NASA-TP-3444] p 2374 N94-22960

Lectures on magnetohydrodynamical drives [PB93-224962] p 2308 N94-23104

Extending substructure based iterative solvers to multiple load and repeated analyses [NASA-CR-194822] p 2466 N94-23504

Issac, Jason Cherian ses in transonic flow [NASA-CR-194837] p 2167 N94-24052

Thermohydrodynamic analysis of cryogenic liquid turbulent flow fluid film bearings [NASA-CR-194869] p 2363 N94-24081

LSS systems planning and performance program [NASA-CR-193882] p 2196 N94-24309

Procedures for determining MATMOD-4V material constants [DE94-002638] p 2245 N94-24520

Responses of a finite baffled plate subject to turbulent and mean flow excitations [NASA-CR-191570] p 2334 N94-24605

Admittance model for the shuttle remote manipulator system in four configurations [NASA-CR-4555] p 2474 N94-24635

Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades [NASA-TM-108758] p 2182 N94-24953

The phase response of nonlinear systems [RR-458] p 2476 N94-25308

Frequency response functions for nonlinear rational models [RR-471] p 2492 N94-25318

Space Station flexible dynamics under plume impingement p 2208 N94-25383

DYNAMIC STABILITY

Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280

Controllability of free-piston Stirling engine/linear alternator driving a dynamic load [NASA-TM-106497] p 2521 N94-24302

DYNAMIC STRUCTURAL ANALYSIS

Development and experimental validation of computational methods to simulate abnormal thermal and structural environments [DE94-000554] p 2268 N94-23000

Extending substructure based iterative solvers to multiple load and repeated analyses [NASA-CR-194822] p 2466 N94-23504

Real-time dynamics and control strategies for space operations of flexible structures [NASA-CR-194794] p 2203 N94-23618

Modal test of the Brazilian satellite launcher (VLS) configuration burn-out of the first stage p 2156 N94-24257

Modeling dynamically coupled fluid-duct systems with finite line elements [NASA-CR-193909] p 2376 N94-24359

Structural dynamics division research and technology accomplishments for FY 1993 and plans for FY 1994 [NASA-TM-109036] p 2169 N94-24576

Influence of backup bearings and support structure dynamics on the behavior of rotors with active supports [NASA-CR-195106] p 2365 N94-24751

Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades [NASA-TM-108758] p 2182 N94-24953

Space Station flexible dynamics under plume impingement p 2208 N94-25383

DYNAMIC TESTS

Modeling of a large undamped space structure using time domain techniques [AD-A273828] p 2206 N94-25523

DYNAMICAL SYSTEMS

On the numeric integration of dynamic attitude equations [NASA-CR-194788] p 2448 N94-23073

Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data [DE94-001575] p 2550 N94-23211

Lacunary series as quadratic differentials in conformal dynamics [PB93-238061] p 2481 N94-23547

When an infinitely-renormalizable endomorphism of the interval can be smoothed [PB93-238087] p 2481 N94-23548

A mixed method Poisson solver for three-dimensional self-gravitating astrophysical fluid dynamical systems p 2484 N94-23684

Dimensional analysis of acoustically propagated signals p 2528 N94-24217

Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280

Systems engineering: A formal approach. Part 2: Frameworks [PB94-101391] p 2489 N94-24615

Change-point detection and adaptive control of time-varying systems [AD-A273509] p 2475 N94-24943

Practical evaluation of robust control for a class of nonlinear mechanical dynamic systems [ISBN-9-03-860092-5] p 2475 N94-25224

On-line control of dynamic systems using feedforward neural networks [RR-457] p 2476 N94-25307

The phase response of nonlinear systems [RR-458] p 2476 N94-25308

Validating identified nonlinear models with chaotic dynamics [RR-469] p 2523 N94-25314

Controlling regular and chaotic dynamics in the Duffing-Ueda oscillator [RR-477] p 2523 N94-25323

DYNAMICS

Mass properties measurement system dynamics p 2368 N94-23235

Mass properties measurement system: Dynamics and statics measurements p 2368 N94-23236

DYNAMOMETERS

NASA project 1: Full-body dynamometer [NASA-CR-195507] p 2438 N94-24331

Specification list and function structure for a full-body dynamometer to be used aboard Space Station Freedom [NASA-CR-195508] p 2439 N94-24835

DYSPROSIUM

Improved magnetostrictive transducer drive elements achieved by reduction of crystalline defects and improved crystalline orientation [AD-A273391] p 2313 N94-25276

E

E REGION

High latitude cusp signature observations for southward IMF B sub Z [AD-A273801] p 2406 N94-25536

EARTH ALBEDO

Nimbus-7 Total Ozone Mapping Spectrometer (TOMS) data products user's guide [NASA-RP-1323] p 2410 N94-24355

An Earth albedo model: A mathematical model for the radiant energy input to an orbiting spacecraft due to the diffuse reflectance of solar radiation from the Earth below [NASA-TM-104596] p 2195 N94-24497

EARTH ATMOSPHERE

On testing two major cumulus parameterization schemes using the CSU regional atmospheric modeling system [DE94-000703] p 2407 N94-23284

Cloud-free aerosol optical depth determination over oceans from satellite radiometry [DE94-001897] p 2386 N94-23779

Results from the VISA project [AD-A273752] p 2406 N94-25540

EARTH CORE

Steady induction effects in geomagnetism. Part 1C: Geomagnetic estimation of steady surficial core motions: Application to the definitive geomagnetic reference field models [NASA-TP-3272-PT-1C] p 2403 N94-24465

EARTH CRUST

Electromagnetic field changes as a precursory phenomena of earthquakes and volcanic eruptions [REPT-157] p 2405 N94-24980

Seafloor characterization/Galapagos propagating rift [AD-A273586] p 2419 N94-25165

EARTH IONOSPHERE

Solar-terrestrial environmental laboratory p 2630 N94-23336

The national geomagnetic initiative [LC-93-85739] p 2401 N94-23344

Artificial plasma experiments. Chemical release observations associated with the CRRES program [NASA-CR-194871] p 2550 N94-23565

Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP) [AD-A273401] p 2301 N94-24926

Magnetic Earth Ionosphere Resonant Frequencies [NASA-CR-195131] p 2303 N94-25191

An active antenna for ELF magnetic fields p 2303 N94-25192

EARTH MAGNETOSPHERE

Solar-terrestrial environmental laboratory p 2630 N94-23336

The national geomagnetic initiative [LC-93-85739] p 2401 N94-23344

Artificial plasma experiments. Chemical release observations associated with the CRRES program [NASA-CR-194871] p 2550 N94-23565

The Far Ultraviolet (FUV) auroral imager for the Inner Magnetospheric Imager (IMI) mission: Options p 2209 N94-24453

Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments [AD-A273639] p 2628 N94-25031

EARTH MANTLE

Measurement and Interpretation of Crustal Deformation Rates Associated with Postglacial Rebound [NASA-CR-195193] p 2405 N94-25203

Constraining proposed combinations of ice history and Earth rheology using VLBI determined baseline length rates in North America p 2405 N94-25205

EARTH MOVEMENTS

GPS survey of the western Tien Shan [NASA-CR-195174] p 2175 N94-24826

EARTH OBSERVATIONS (FROM SPACE)

GEWEX p 2385 N94-23614

NASDA's view of ground control in mission operations p 2305 N94-23835

The space operations at CNES p 2498 N94-23837

Mission planning for an Earth observation low Earth orbiter: ERS-1 p 2503 N94-23868

Earth observation archive activities at DRA Farnborough p 2519 N94-23958

The pre-development of the Aristoteles calibration mechanism p 2209 N94-24006

Precipitation measurement using SIR-C: A feasibility study. Investigation at nadir [NASA-CR-195103] p 2410 N94-24126

EARTH OBSERVING SYSTEM (EOS)

Earth Observing System (EOS) Advanced Microwave Sounding Unit-A (AMSU-A) schedule plan [NASA-CR-194856] p 2585 N94-23563

The Fifth Calibration/Data Product Validation Panel Meeting [NASA-TM-108270] p 2383 N94-23595

The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596

SPDB (science processing database): Quick reference guide p 2383 N94-23597

Definitions in use by the visible and near-infrared, and thermal working groups p 2383 N94-23598

Cross-calibration survey (VISNIR) p 2383 N94-23599

MODIS calibration p 2383 N94-23600

Eos cross-calibration radiometers p 2383 N94-23601

Activities of NIST (National Inst. of Standards and Technology) p 2384 N94-23605

Concept of ASTER calibration requirement p 2384 N94-23609

VNIR and SWIR transfer radiometers developed at NRLM for preflight laboratory cross-calibration p 2385 N94-23610

Mission operations update for the restructured Earth Observing System (EOS) mission p 2499 N94-23839

ASTER, a multinational Earth observing concept p 2389 N94-23840

Applications of CCSDS recommendations to Integrated Ground Data Systems (IGDS) p 2510 N94-23906

EOS ground data systems: A description and interface overview p 2517 N94-23948

Panel to review EOSDIS plans [NASA-CR-195088] p 2387 N94-24303

EARTH ORBITAL ENVIRONMENTS

Use of negotiated rulemaking in developing technical rules for low-Earth orbit mobile satellite systems p 2276 N94-22750

Global coverage Mobile Satellite Systems: System availability versus channel propagation impairments p 2284 N94-22798

Systems implications of L-band fade data statistics for LEO mobile systems p 2284 N94-22799

Analysis of impactor residues in tray clamps from the Long Duration Exposure Facility. Part 2: Clamps from Bay B of the satellite [NASA-TM-104784] p 2386 N94-24095

Orbital debris and near-Earth environmental management: A chronology [NASA-RP-1320] p 2598 N94-24644

Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments [AD-A273639] p 2628 N94-25031

EARTH ORBITS

Low earth orbit satellite/terrestrial mobile service compatibility p 2288 N94-22827

Impedance measurements on a spiral-wound nickel/metal hydride cell cycled in a simulated Leo orbit
p 2392 N94-23355
Torque equilibrium attitudes for the Space Station
p 2208 N94-24449
GRYPHON: Air launched space booster
[NASA-CR-195497] p 2199 N94-25022

EARTH RADIATION BUDGET
A regional analysis of cloudy mean spherical albedo over the marine stratocumulus region and the tropical Atlantic Ocean
[NASA-CR-194771] p 2409 N94-24049

EARTH RADIATION BUDGET EXPERIMENT
Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror
p 2384 N94-23602

EARTH RESOURCES
Mapping Tomorrow's Resources: A symposium on the uses of remote sensing, Geographic Information Systems (GIS), and Global Positioning Systems (GPS) for natural resources management p 2387 N94-24357

EARTH SCIENCES
Image pattern recognition supporting interactive analysis and graphical visualization
[NASA-CR-194878] p 2451 N94-23369
Mission operations update for the restructured Earth Observing System (EOS) mission p 2499 N94-23839
NASA high performance computing and communications program
[NASA-TM-4554] p 2591 N94-24337

EARTH SURFACE
Atmospheric flow in heterogeneous vegetated regions
[W-9303] p 2401 N94-23175
Lightning, atmospheric electricity, and climate change
[DE94-002003] p 2408 N94-23471
Session on coupled land surface/hydrological/atmospheric models
p 2414 N94-24395
An investigation of current and future satellite and in-situ data for the remote sensing of the land surface energy balance
[NASA-CR-195138] p 2387 N94-24596
Image analysis technology applied to problems in crystallography
[AD-A273516] p 2566 N94-25288
Near surface analysis p 2407 N94-25364

EARTH TERMINALS
Low cost coherent demodulation for mobile satellite terminals p 2284 N94-22803
Optical subnet concepts for the deep space network
p 2292 N94-23269

EARTHQUAKE DAMAGE
Active control of buildings during earthquakes
[NASA-TM-109033] p 2271 N94-24473

EARTHQUAKES
Active control of buildings during earthquakes
[NASA-TM-109033] p 2271 N94-24473
Parametric and nonparametric discriminants for regional earthquakes and explosions
[AD-A273807] p 2406 N94-25538

ECCENTRICITY
Validation of a second generation conspicuity meter
[IZF-1993-A-11] p 2542 N94-22895

ECHOCARDIOGRAPHY
Echocardiographic screening of aircrew candidates
p 2424 N94-23319
Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18)
p 2424 N94-23320

ECHOES
Preprocessor and adaptive beamformer for linear-frequency modulation active signals
[AD-D016008] p 2302 N94-25048

ECLIPTIC
Ulysses log 1992 p 2502 N94-23863

ECOLOGY
Analysis of vulnerability to the impacts of sea level rise: A case study for The Netherlands
[PB94-111150] p 2399 N94-24573

ECONOMETRICS
Temporal aggregation in a periodically integrated autoregressive process
[PB93-230480] p 2479 N94-23122
First order conditions for the maximum likelihood estimation of an exact ARMA model
[PB94-110533] p 2495 N94-23814

ECONOMIC ANALYSIS
A practical system for regional mobile satellite services p 2288 N94-22828
Simplicial variable dimension restart algorithm to find economic equilibria on the unit simplex using n(n+1) rays
[PB94-110541] p 2596 N94-24477
The future of rotary-wing aircraft p 2185 N94-25070

ECONOMIC FACTORS
Proceedings of Technology and Governance in the 1990's
[PB93-192904] p 2597 N94-24312
Considerations in implementing integrated biomass energy systems in developing countries
[DE93-018720] p 2395 N94-24499
The airplane: A simulated commercial air transportation study
[NASA-CR-195525] p 2182 N94-24837

ECONOMIC IMPACT
Information technology in the service society: A twenty-first century lever
[ISBN-0-309-04876-1] p 2593 N94-24833

ECOSYSTEMS
Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861

EDDY CURRENTS
Structural analysis of a superconducting central solenoid for the Tokamak Physics Experiment
[DE94-001536] p 2549 N94-23014
Preliminary eddy current modelling for the large angle magnetic suspension test fixture
[NASA-CR-194772] p 2192 N94-23539
Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD
[DE94-001565] p 2552 N94-24504

EDDY VISCOSITY
Turbulence modeling for non-equilibrium flows
p 2328 N94-24144
Large eddy simulation of a boundary layer with concave streamwise curvature p 2328 N94-24146
A vorticity dynamics based model for the turbulent dissipation: Model development and validation
[NASA-TM-106177] p 2336 N94-24713
Turbulence models and Reynolds analogy for two-dimensional supersonic compression ramp flow
[NASA-TM-106474] p 2337 N94-25119

EDGE DETECTION
Object recognition through image understanding for an autonomous mobile robot
[AD-A273206] p 2475 N94-24862
Edge detection using a complex wavelet
[AD-A273699] p 2493 N94-25452

EDGES
Investigation on interval edge-coloring of graphs
[PB94-110913] p 2488 N94-24541
Edge elements, their advantages and disadvantages
[PB94-111069] p 2298 N94-24593
Finite-element modelling of three-dimensional electromagnetic fields using edge and nodal elements
[PB94-111077] p 2298 N94-24597
Tools for visualizing landscape pattern for large geographic areas
[DE94-001121] p 2388 N94-24757

EDITING
World processor: An interface for textual display and manipulation in virtual reality
[PB94-118643] p 2592 N94-24642

EDUCATION
KSC management training system project
p 2574 N94-23246
Operational training for the mission operations at the Brazilian National Institute for Space Research (INPE)
p 2429 N94-23933
Training: Plugging the information gaps
p 2429 N94-23934
Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100
Evaluation of computer-aided instruction techniques for the crew interface coordination position
p 2429 N94-24438
The 7th Annual National Conference of Black Physics Students p 2524 N94-24583
Design of an airborne launch vehicle for an air launched space booster
[NASA-CR-195534] p 2198 N94-24860
Magnetic Earth Ionosphere Resonant Frequencies
[NASA-CR-195131] p 2303 N94-25191
Understanding and facilitating discovery learning in computer-based simulation environment
[ISBN-9-03-860242-1] p 2462 N94-25219

EFFICIENCY
Sensorless, brushless motor to drive a sealed freon-ammonia pump p 2315 N94-24036

EGGS
Evaluation of ovostatin and ovostatin assay
p 2422 N94-24437

EIGENVALUES
Tool sharing: An application of max-algebra, part 2
[MEMO-1122] p 2478 N94-22710
Tool sharing: An application of max-algebra, part 1
[MEMO-1108] p 2478 N94-22726
The Hamiltonian double-zero eigenvalue
[W-9304] p 2479 N94-23138
Classical scattering theory of waves from the view point of an eigenvalue problem and application to target identification
[DE94-000472] p 2525 N94-23206
A matrix analysis of conjugate gradient algorithms
[DE94-002546] p 2454 N94-23796
Infinite divisible and stable distributions modulo 1
[PB94-110640] p 2495 N94-23815
Tool sharing, part 3
[PB94-111697] p 2467 N94-24524

EIGENVECTORS
Multi-grid domain decomposition approach for solution of Navier-Stokes equations in primitive variable form
p 2341 N94-23693
Infinite divisible and stable distributions modulo 1
[PB94-110640] p 2495 N94-23815
Maximum likelihood modal parameter identification and realization of stochastic systems p 2157 N94-24265
Nonlinear analysis using a modal based reduction technique p 2161 N94-24288

EJECTORS
Transient Ejector Analysis (TEA) code user's guide
[NASA-TM-106310] p 2186 N94-23466
Simplified, inverse, ejector design tool
[NASA-CR-194438] p 2166 N94-23511

ELASTIC ANISOTROPY
Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades
[NASA-TM-108758] p 2182 N94-24953

ELASTIC BUCKLING
Nonlinear analysis using a modal based reduction technique p 2161 N94-24288

ELASTIC PROPERTIES
The elastic and electromechanical properties of BaTiO3 single crystal through the ferroelectric transition
[DE94-001437] p 2557 N94-22927
Foil bearing research at Penn State
p 2215 N94-23058
Brush seals for cryogenic applications
p 2216 N94-23063
Control of the internal stresses in plane elasticity
[PB93-225514] p 2374 N94-23112
Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189
Continuum representations of cellular solids
[DE94-001706] p 2375 N94-23217
Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280
Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285
The influence of elastic pitch variations on helicopter flight mechanics p 2161 N94-24286
Center for Analysis of Heterogeneous and Nonlinear Media
[AD-A273515] p 2230 N94-25158
Ring nuclei of strain for bonded dissimilar elastic half spaces with particular application to axisymmetric crack problems
[OUEL-1966/92] p 2379 N94-25325

ELASTIC SCATTERING
Application and development of the Schwinger multichannel scattering theory and the partial differential equation theory of electron-molecule scattering
[NASA-CR-194774] p 2536 N94-24798
Relativistic hadrons in an external field
[ETN-94-95387] p 2538 N94-25259

ELASTIC WAVES
Similarity in wave propagation under a global relaxation law
[PB94-111028] p 2524 N94-23730
Analysis of time-domain acoustic wavefields in horizontally continuously layered configurations based on the modified Cagniard method
[PB94-111044] p 2524 N94-23731

ELASTOMERS
The measurement of the film thickness and the roughness deformation of lubricated elastomers
[ETN-94-95293] p 2261 N94-25078

ELECTRIC ARCS
The internal structure and dynamics of the railgun plasma armature between infinitely wide ablating rails
[DE94-001473] p 2198 N94-23208
Investigation of a subsonic-arc-attachment thruster using segmented anodes
[NASA-TM-106419] p 2219 N94-23531
Measurement of electron temperature and density in the DIII-D neutral beam ion source arc chamber
[DE94-001099] p 2553 N94-24746

ELECTRIC BATTERIES
Electric and hybrid vehicles program
[DE93-040664] p 2352 N94-22881
Pushing technology to satisfy world applications
[DE94-001365] p 2353 N94-23191

Applications of x ray absorption fine structure to the in situ study of the effect of cobalt in nickel hydrous oxide electrodes for fuel cells and rechargeable batteries
p 2391 N94-23347
Ovonic nickel metal hydride batteries for space applications p 2391 N94-23352
Limiting factors for carbon based chemical double layer capacitors p 2394 N94-23365
Hairy carbon electrodes studied by cyclic voltammetry and battery discharge testing p 2394 N94-23367
In situ and ex situ spectroelectrochemical and x ray absorption studies on rechargeable, chemically-modified and other MnO2 materials
[DE94-001387] p 2234 N94-24545

ELECTRIC BRIDGES
Bridge type optoelectronic sample and hold circuit
[AD-D015986] p 2312 N94-25042

ELECTRIC CHARGE
Overcharge and overdischarge protection of ambient temperature secondary lithium cells
[NASA-CASE-NPO-18343-1-CU] p 2310 N94-23823

ELECTRIC CONNECTORS
Connector mechanisms in compliance with extreme space conditions p 2360 N94-24025
Multipurpose clamping device with electrical connector for in orbit attachment of payloads p 2361 N94-24035
Design and testing of ubitron amplifier tubes
[AD-A273297] p 2311 N94-24818

ELECTRIC CONTACTS
Tunnelling in metallic contacts on high-T(c) superconductors: A story of charge carriers in YBa2Cu3O(7-delta) and Bi2CaSr2Cu2O(8+delta)
[ISBN-9-03-860142-5] p 2565 N94-25280
Mesoscopic phenomena in metallic point contacts
[ETN-94-95371] p 2313 N94-25286

ELECTRIC CURRENT
Performance evaluation of the Russian SPT-100 thruster at NASA LeRC
[NASA-TM-106401] p 2219 N94-23630
A multigrid solver for the semiconductor equations
p 2482 N94-23674
Thermistor controlled current source versatile temperature sensor
[AD-D015979] p 2345 N94-25037
The effect of a transport current on the surface barrier of a uniaxial anisotropic superconducting slab
[DE93-617135] p 2566 N94-25390

ELECTRIC DISCHARGES
Diffusion in electronegative discharges with magnetic fields
[AD-A273826] p 2304 N94-25521

ELECTRIC ENERGY STORAGE
High power density proton exchange membrane fuel cells p 2393 N94-23359
Thermal control system for Space Station Freedom photovoltaic power module
[NASA-TM-105650] p 2205 N94-24825

ELECTRIC FIELDS
Static image method for computing the electric potential due to sources in a layered sphere
[PB93-224970] p 2308 N94-23105
The role of the radial electric field in confinement and transport in H-mode and VH-mode discharges in the DIII-D tokamak
[DE94-002746] p 2551 N94-23782
Voyager planetary radio astronomy studies
[NASA-CR-194776] p 2614 N94-24328
Electric field-mediated processing of polymer blend solutions p 2223 N94-24341
A study of non-ideal focus properties of 30 deg parallel plate energy analyzers
[NIFS-263] p 2311 N94-24457
Time-domain analysis of conduction and displacement current distributions in inhomogeneous and anisotropic layered media
[PB94-111036] p 2403 N94-24592
Electro-rheology fluids and liquid fuel flow
[AD-A273640] p 2337 N94-25032
Mechanisms of droplet formation
[ISBN-9-06-275765-0] p 2338 N94-25227
Effect of high frequency field on the transport properties of superlattice
[DE93-617047] p 2568 N94-25447

ELECTRIC FILTERS
A theoretical investigation of electrically tunable birefringent optical filters as the special discriminator in hyperspectral imaging systems
[AD-A273743] p 2547 N94-25533

ELECTRIC HYBRID VEHICLES
Electric and hybrid vehicles program
[DE93-040664] p 2352 N94-22881

ELECTRIC MOTOR VEHICLES
Electric and hybrid vehicles program
[DE93-040664] p 2352 N94-22881
Pushing technology to satisfy world applications
[DE94-001365] p 2353 N94-23191

Crashworthiness analysis using advanced material models in DYNA3D
[DE94-002988] p 2229 N94-24632

ELECTRIC MOTORS
Low noise electric motor p 2315 N94-23989
Sensorless, brushless motor to drive a sealed freon-ammonia pump p 2315 N94-24036
Finite element based electric motor design optimization p 2315 N94-24411

ELECTRIC NETWORKS
Transient analysis of circuits including frequency-dependent components using transgyrator and convolution
[PB93-225001] p 2308 N94-23130

ELECTRIC POTENTIAL
Static image method for computing the electric potential due to sources in a layered sphere
[PB93-224970] p 2308 N94-23105
Thermodynamics of nickel-cadmium and nickel-hydrogen batteries p 2391 N94-23349
Power console development for NASA's electric propulsion outreach program
[NASA-TM-106428] p 2218 N94-23372
Investigation of a subsonic-arc-attachment thruster using segmented anodes
[NASA-TM-106419] p 2219 N94-23531
Performance evaluation of the Russian SPT-100 thruster at NASA LeRC
[NASA-TM-106401] p 2219 N94-23630
Lightning tests and analyses of tunnel bond straps and shielded cables on the Space Shuttle solid rocket booster
[NASA-CR-193921] p 2200 N94-24801
Thermistor controlled current source versatile temperature sensor
[AD-D015979] p 2345 N94-25037
Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124

ELECTRIC POWER
Electrical power technology for robotic planetary rovers p 2314 N94-23401

ELECTRIC PROPULSION
Electric and hybrid vehicles program
[DE93-040664] p 2352 N94-22881
NASA Propulsion Engineering Research Center, volume 2
[NASA-CR-194719-VOL-2] p 2209 N94-23028
Power console development for NASA's electric propulsion outreach program
[NASA-TM-106428] p 2218 N94-23372
Carbon monoxide fuel cells as a source for Mars rover electric power p 2314 N94-23409
Investigation of a subsonic-arc-attachment thruster using segmented anodes
[NASA-TM-106419] p 2219 N94-23531
Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study
[AD-A273824] p 2314 N94-25539

ELECTRIC ROCKET ENGINES
Performance evaluation of the Russian SPT-100 thruster at NASA LeRC
[NASA-TM-106401] p 2219 N94-23630
Numerical simulation of cylindrical, self-field MPD thrusters with multiple propellants
[NASA-CR-194458] p 2220 N94-24714

ELECTRIC WIRE
Magnetic shielding of interplanetary spacecraft against solar flare radiation
[NASA-CR-195539] p 2204 N94-24334

ELECTRICAL ENGINEERING
Engineering for profitability
[PNR-90990] p 2595 N94-23580

ELECTRICAL FAULTS
Probabilistic methods in problems of applied analysis
[PB94-110681] p 2495 N94-24571

ELECTRICAL IMPEDANCE
Evaluation of inorganic zinc-rich primers using Electrochemical Impedance Spectroscopy (EIS)
p 2237 N94-23233
Impedance measurements on a spiral-wound nickel/metal hydride cell cycled in a simulated Leo orbit
p 2392 N94-23355
Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699
Evaluation of bioimpedance for the measurement of physiologic variables as related to hemodynamic studies in space flight p 2427 N94-25378

ELECTRICAL INSULATION
Developments in materials for high-field magnets
[DE94-000761] p 2307 N94-22987
Simple estimate of stored energy and conductor insulation voltage-withstand requirements for advanced solenoid magnet designs
[DE93-041048] p 2307 N94-23019

A review of wiring system safety in space power systems
[NASA-CR-194439] p 2203 N94-23632
Thermal control system for SSF sensor/electronics
[SAND-92-0652C] p 2321 N94-23640
Research for electric energy systems
[DE94-001839] p 2293 N94-23719
Field emitter array
[AD-D016023] p 2303 N94-25150

ELECTRICAL MEASUREMENT
Measuring electrically charged particle fluxes in space using a fiber optic loop sensor
[NASA-CR-191328] p 2544 N94-23829
Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772
Very low frequency and low frequency transmitting antenna parameter monitoring system
[AD-D015989] p 2302 N94-25049

ELECTRICAL PROPERTIES
Atomic-scale structure of grain boundaries: Correlations to grain boundary properties
[DE94-001289] p 2558 N94-22990
Status of the development of rechargeable lithium cells p 2392 N94-23354
Instrument interface description for NOAA 2000 instruments with European morning spacecraft and/or NOAA-OPQ spacecraft
[NASA-TM-109406] p 2208 N94-23478
Time-domain analysis of conduction and displacement current distributions in inhomogeneous and anisotropic layered media
[PB94-111036] p 2403 N94-24592
Center for advanced electrical and structural polymers
[AD-A273415] p 2259 N94-24783
Electrochemical and electronic properties of neural and oxidized soluble orthogonally-fused thiophene oligomers
[AD-A273283] p 2260 N94-24815
Ferroelectric thin films 3
[AD-A273394] p 2565 N94-25027
Tunnelling in metallic contacts on high-T(c) superconductors: A story of charge carriers in YBa2Cu3O(7-delta) and Bi2CaSr2Cu2O(8+delta)
[ISBN-9-03-860142-5] p 2565 N94-25280
Mesoscopic phenomena in metallic point contacts
[ETN-94-95371] p 2313 N94-25286

ELECTRICAL RESISTANCE
Bridgman's concern
[DE93-040900] p 2558 N94-22953
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200
Design of a resistojet for Space Station Freedom
[NASA-CR-195506] p 2221 N94-24979
Mesoscopic phenomena in metallic point contacts
[ETN-94-95371] p 2313 N94-25286

ELECTRICAL RESISTIVITY
High-T(c) superconducting superlattices
[DE93-019200] p 2556 N94-22864
Electrical transport in La(2-x)Sr(x)CuO(4-y)
[DE93-040685] p 2556 N94-22912
Carbon aerogels: An update on structure, properties, and applications
[DE94-001528] p 2252 N94-22931
Developments in materials for high-field magnets
[DE94-000761] p 2307 N94-22987
Simple estimate of stored energy and conductor insulation voltage-withstand requirements for advanced solenoid magnet designs
[DE93-041048] p 2307 N94-23019
Transparent conducting thin films for spacecraft applications
[NASA-TM-106466] p 2218 N94-23370
Non-volatile, solid state bistable electrical switch
[NASA-CASE-NPO-17621-1-CU] p 2309 N94-23820
Comparison of HF groundwave propagation models
[AD-A273146] p 2299 N94-24668
Performance of inverse photoemission spectrometer with a new bandpass photon detector of narrow bandwidth and high sensitivity
[REPT-A-2659] p 2345 N94-24977
Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 6: Electric Power Industry
[AD-A273668] p 2250 N94-25408
Template synthesis of electronically conductive polymers
[AD-A273673] p 2263 N94-25409
Effect of high frequency field on the transport properties of superlattice
[DE93-617047] p 2568 N94-25447

ELECTRO-OPTICAL EFFECT
Photo-induced and electrooptic properties of $(Pb,La)(Zr,Ti)O_3$ films for optical memories
[DE93-019820] p 2542 N94-23202
Ultrastructure processing of macromolecular materials
[AD-A273413] p 2258 N94-24782

ELECTRO-OPTICS
A fully automated stage for optical waveguide measurements
[AD-A273042] p 2542 N94-22915
Defects in electro-optically active polymer solids
p 2223 N94-24342
Nonlinear optical thin films p 2225 N94-24349
Optimization of microscopic and macroscopic second order optical nonlinearities p 2226 N94-24354
Photonic technology for implementation of generalizable neural networks: A synthetic approach
[AD-A273497] p 2474 N94-24622
Crosstalk analysis of synchronous and asynchronous optical chip interconnects with direct detection
[AD-A273261] p 2311 N94-24685
Dipolar relaxation in a second-order nonlinear optical interpenetrating polymer network
[AD-A273626] p 2258 N94-24732
Ferroelectric thin films 3
[AD-A273394] p 2565 N94-25027
Wide bandwidth differential amplifier
[AD-D015985] p 2303 N94-25217

ELECTROCARDIOGRAPHY
Aeromedical disposition of Arrhythmias and electrocardiographic findings in aircrew
p 2423 N94-23318
Echocardiographic screening of aircrew candidates
p 2424 N94-23319
Left ventricular hypertrophy and athlete's heart
p 2424 N94-23321

ELECTROCATALYSTS
PEM regenerative fuel cells p 2392 N94-23358

ELECTROCHEMICAL CELLS
High power density proton exchange membrane fuel cells p 2393 N94-23359

ELECTROCHEMICAL CORROSION
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues
[AD-A273663] p 2251 N94-25450

ELECTROCHEMICAL OXIDATION
Diffusion of hydrogen in iron oxides
[DE93-632430] p 2239 N94-22966
Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346

ELECTROCHEMISTRY
Space Electrochemical Research and Technology
[NASA-CP-3228] p 2390 N94-23345
In situ and ex situ spectroelectrochemical and x ray absorption studies on rechargeable, chemically-modified and other MnO_2 materials
[DE94-001387] p 2234 N94-24545
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers
[DE94-002293] p 2350 N94-24659
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784
Electrochemically mediated polymerization of 2-pentadecylaniline confined to a planar liquid-liquid interface
[AD-A273541] p 2259 N94-24792
Electrochemical and electronic properties of neural and oxidized soluble orthogonally-fused thiophene oligomers
[AD-A273283] p 2260 N94-24815
The electrochemistry of the solvated electron: A study of its properties and of its applications
[ETN-94-95313] p 2236 N94-25296
Use of scanning tunneling microscope in corrosion studies
[VTT-TIED-1416] p 2250 N94-25346
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5B: Corrosion: General issues
[AD-A273667] p 2250 N94-25407
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 6: Electric Power Industry
[AD-A273668] p 2250 N94-25408
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations
[AD-A273662] p 2251 N94-25449

ELECTRODE MATERIALS
Overcharge and overdischarge protection of ambient temperature secondary lithium cells
[NASA-CASE-NPO-18343-1-CU] p 2310 N94-23823
Arc electrode interaction study
[NASA-CR-195096] p 2310 N94-24070

ELECTRODEPOSITION
Applications of x ray absorption fine structure to the in situ study of the effect of cobalt in nickel hydrous oxide electrodes for fuel cells and rechargeable batteries
p 2391 N94-23347
Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346
X ray diffraction analysis of electrodeposited beta-tantalum
[AD-A273254] p 2249 N94-25142
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448

ELECTRODES
High specific energy, high capacity nickel-hydrogen cell design p 2391 N94-23350
High surface area, low weight composite nickel fiber electrodes p 2391 N94-23351
NASA Lewis advanced IPV nickel-hydrogen technology p 2392 N94-23356
PEM regenerative fuel cells p 2392 N94-23358
High power density proton exchange membrane fuel cells p 2393 N94-23359
Composite fiber structures for catalysts and electrodes
p 2393 N94-23364
Hairy carbon electrodes studied by cyclic voltammetry and battery discharge testing p 2394 N94-23367
Field emitter array memory device
[AD-D016015] p 2311 N94-24736

ELECTRODYNAMICS
Data analysis and theoretical studies of the upper mesosphere and lower thermosphere
[NASA-CR-195108] p 2402 N94-24089
Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study
[AD-A273824] p 2314 N94-25539

ELECTROENCEPHALOGRAPHY
Static image method for computing the electric potential due to sources in a layered sphere
[PB93-224970] p 2308 N94-23105
EEG and chaos: Description of underlying dynamics and its relation to dissociative states
[NASA-CR-195171] p 2428 N94-24799

ELECTROFORMING
Investigate zero-stress replicated optics
[NASA-CR-193889] p 2545 N94-24665

ELECTROKINETICS
Capillary electrokinetic separations with optical detection
[DE94-001639] p 2233 N94-23716

ELECTROLUMINESCENCE
Ultrastructure processing of macromolecular materials
[AD-A273413] p 2258 N94-24782

ELECTROLYSIS
Primary and secondary electrical space power based on advanced PEM systems p 2392 N94-23357
PEM regenerative fuel cells p 2392 N94-23358
Recent advances in SPE (tm) water electrolyzer
p 2393 N94-23362

ELECTROLYTE METABOLISM
Fluid-loading solutions and plasma volume: Astro-ade and salt tablets with water
[NASA-TP-3456] p 2426 N94-23544

ELECTROLYTES
NASA Lewis advanced IPV nickel-hydrogen technology p 2392 N94-23356
High energy density aluminum-oxygen cell
p 2393 N94-23363
Fluid-loading solutions and plasma volume: Astro-ade and salt tablets with water
[NASA-TP-3456] p 2426 N94-23544

ELECTROLYTIC CELLS
The electrolyte challenge for a direct methanol-air polymer electrolyte fuel cell operating at temperatures up to 200 C p 2393 N94-23360
Advances in direct oxidation methanol fuel cells
p 2393 N94-23361
A high performance H_2-Cl_2 fuel cell for space power applications p 2394 N94-23366
Carbon supercapacitors
[DE94-002652] p 2311 N94-24748

ELECTROMAGNETIC ABSORPTION
Study of a local absorbing boundary condition for the modeling of an infinite external domain in the time-domain finite-element package FEMAXT
[PB94-111002] p 2294 N94-23728
Magnetic field-induced saddle point in GaAs/AlGaAs short period superlattices
[REPT-A-2656] p 2568 N94-25515

ELECTROMAGNETIC COMPATIBILITY
Compatibility relations and the finite-element formulation of electromagnetic field problems
[PB94-110996] p 2294 N94-23727
FEMAX finite-element package for computing three-dimensional time-domain electromagnetic fields in inhomogeneous media
[PB94-111093] p 2294 N94-23733
A review of ISEAS design p 2465 N94-24410
Finite-element method for computing three-dimensional electromagnetic fields in inhomogeneous media (1993)
[PB94-111101] p 2298 N94-24637

ELECTROMAGNETIC FIELDS
Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS
p 2283 N94-22795
Gauge invariance and the electromagnetic current of composite pions
[DE93-040869] p 2532 N94-22952
Transient analysis of conducting half-plane problem with noncausal scattering image
[PB93-225027] p 2524 N94-23110
Research for electric energy systems
[DE94-001839] p 2293 N94-23719
Compatibility relations and the finite-element formulation of electromagnetic field problems
[PB94-110996] p 2294 N94-23727
Study of a local absorbing boundary condition for the modeling of an infinite external domain in the time-domain finite-element package FEMAXT
[PB94-111002] p 2294 N94-23728
FEMAX finite-element package for computing three-dimensional time-domain electromagnetic fields in inhomogeneous media
[PB94-111093] p 2294 N94-23733
Design and performances of electromagnetic initiators for space mechanisms: An alternative to pyrotechnic system p 2315 N94-24037
Edge elements, their advantages and disadvantages
[PB94-111069] p 2298 N94-24593
Finite-element modelling of three-dimensional electromagnetic fields using edge and nodal elements
[PB94-111077] p 2298 N94-24597
Finite-element method for computing three-dimensional electromagnetic fields in inhomogeneous media (1993)
[PB94-111101] p 2298 N94-24637
ELF communications system ecological monitoring program
[AD-A273456] p 2299 N94-24676
Effect of high frequency field on the transport properties of superlattice
[DE93-617047] p 2568 N94-25447

ELECTROMAGNETIC INTERACTIONS
Photon-photon collisions at the next linear collider: Theory
[DE93-041025] p 2534 N94-23803
A comparison of in-bore projectile motion from an electromagnetic railgun versus that of a conventional cannon barrel
[AD-A273473] p 2198 N94-24690

ELECTROMAGNETIC INTERFERENCE
Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669
Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply
[AD-A273149] p 2299 N94-24670
Integrated reflector antenna design and analysis
[NASA-CR-195164] p 2300 N94-24678
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784
Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP)
[AD-A273401] p 2301 N94-24926
Highly-reliable fly-by-light/power-by-wire technology
p 2162 N94-25099
Contribution to the study of HF converters radiated disturbances
[ECL-92-34] p 2313 N94-25421

ELECTROMAGNETIC MEASUREMENT
Fluid velocity and electromagnetic forces measured by a rotating Langmuir probe in the scrape off layer of JFT-2M
[OUEL-1968/92] p 2554 N94-25327

ELECTROMAGNETIC NOISE
System for cancelling phase noise in an interferometric fiber optic sensor arrangement
[AD-D015994] p 2345 N94-25053
On the origin of 1/f noise in epitaxial GaAs
[ISBN-9-09-006067-7] p 2566 N94-25297
ELECTROMAGNETIC PULSES
Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply
[AD-A273149] p 2299 N94-24670
ELECTROMAGNETIC PUMPS
SP-100 heat transport technology development
[DE94-000769] p 2218 N94-23452
ELECTROMAGNETIC RADIATION
Similarity in wave propagation under a global relaxation law
[PB94-111028] p 2524 N94-23730
Analysis of time-domain acoustic wavefields in horizontally continuously layered configurations based on the modified Cagniard method
[PB94-111044] p 2524 N94-23731
Electromagnetic field changes as a precursory phenomena of earthquakes and volcanic eruptions
[REPT-157] p 2405 N94-24980
Numerical simulation and analysis of experimental results on stimulated Raman scattering in laser-plasma Hohlraum targets
[DE93-613719] p 2554 N94-25330
Contribution to the study of HF converters radiated disturbances
[ECL-92-34] p 2313 N94-25421
ELECTROMAGNETIC SCATTERING
Propagation model for the Land Mobile Satellite channel in urban environments p 2283 N94-22796
Transient analysis of conducting half-plane problem with noncausal scattering image
[PB93-225027] p 2524 N94-23110
Classical scattering theory of waves from the view point of an eigenvalue problem and application to target identification
[DE94-000472] p 2525 N94-23206
Electromagnetic scattering by inhomogeneous objects. Solution methods based upon reciprocity theorems of time-convolution and time-correlation type
[PB94-111010] p 2294 N94-23729
ELECTROMAGNETIC SHIELDING
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784
Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study
[AD-A273824] p 2314 N94-25539
ELECTROMAGNETIC SPECTRA
Magnetic field-induced saddle point in GaAs/AlGaAs short period superlattices
[REPT-A-2656] p 2568 N94-25515
ELECTROMAGNETISM
Proceedings of the 1993 Bi-Isotropics Workshop on Novel Microwave Materials
[PB93-224772] p 2290 N94-23225
Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699
ELECTROMAGNETS
Preliminary eddy current modelling for the large angle magnetic suspension test fixture
[NASA-CR-194772] p 2192 N94-23539
The use of harmonics in 3-D magnetic fields
[DE94-002274] p 2299 N94-24656
Compact free electron lasers for medical applications
[AD-A273609] p 2350 N94-24934
ELECTROMECHANICAL DEVICES
Electromagnetic brake/clutch device
[NASA-CASE-GSC-13502-1] p 2354 N94-23969
Finite element based electric motor design optimization p 2315 N94-24411
Controller modeling and evaluation for PCV electro-mechanical actuator p 2371 N94-24441
Design and application of electromechanical actuators for deep space missions
[NASA-CR-195134] p 2365 N94-24842
ELECTROMECHANICS
The elastic and electromechanical properties of BaTiO3 single crystal through the ferroelectric transition
[DE94-001437] p 2557 N94-22927
A comparison of in-bore projectile motion from an electromagnetic railgun versus that of a conventional cannon barrel
[AD-A273473] p 2198 N94-24690
ELECTROMYOGRAPHY
Loading, electromyograph, and motion during exercise
p 2427 N94-25359
Loading, electromyograph, and motion during exercise
p 2427 N94-25380
ELECTRON AVALANCHE
MOS analog memory with injection capacitors
[AD-D015990] p 2312 N94-25050
ELECTRON BEAMS
Properties of the transfer matrices of deflecting magnet systems for free electron laser
[DE93-508257] p 2347 N94-22922
The CEBAF beam loss sensors
[CEBAF-PR-93-032] p 2540 N94-24662
A research of possibility for negative muon production by a low energy electron beam accompanying ion beam
[NIFS-266] p 2536 N94-24868
High precision x ray lithographic masks
[AD-A273342] p 2346 N94-25154
ELECTRON CYCLOTRON HEATING
Analysis and experiments of a whistler-wave plasma thruster
[DE94-001533] p 2209 N94-23012
Overview of the ATF stellarator program
[DE94-000371] p 2550 N94-23462
ELECTRON DENSITY (CONCENTRATION)
Picosecond High Pressure Gas Switch experiment
[DE93-040853] p 2307 N94-22950
Characterization of heat transport and radiation hydrodynamics in collisional laser plasmas using collective Thomson scattering
[DE94-001502] p 2349 N94-23209
Density functional studies: First principles and semi-emperical calculations of clusters and surfaces
[DE94-002836] p 2561 N94-23214
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
Measurement of electron temperature and density in the DIII-D neutral beam ion source arc chamber
[DE94-001099] p 2553 N94-24746
Mechanisms of anode power deposition in a low pressure free burning arc
[NASA-CR-194442] p 2553 N94-25190
ELECTRON DENSITY PROFILES
Temporal behavior of the electron density profile during limiter biasing in the HYBTOK-2 tokamak
[NIFS-257] p 2552 N94-24456
ELECTRON DIFFRACTION
Inelastic electron scattering from surfaces
[DE94-001368] p 2531 N94-22733
Orientation imaging microscopy: New possibilities for microstructural investigations using automated BKD analysis
[DE94-000777] p 2557 N94-22938
Perturbation theory in electron diffraction
[PB93-201424] p 2533 N94-23505
ELECTRON DISTRIBUTION
Analysis and experiments of a whistler-wave plasma thruster
[DE94-001533] p 2209 N94-23012
ELECTRON EMISSION
Limits on high-order harmonic generation from single-atom calculations
[DE93-019950] p 2531 N94-22869
Electron spectroscopic studies of the neutralization of slow multicharged ions during interactions with a metal surface
[DE93-041046] p 2532 N94-22956
Field emitter array memory device
[AD-D016015] p 2311 N94-24736
ELECTRON ENERGY
Inelastic electron scattering from surfaces
[DE94-001368] p 2531 N94-22733
Electron spectroscopic studies of the neutralization of slow multicharged ions during interactions with a metal surface
[DE93-041046] p 2532 N94-22956
High-order sum and difference-frequency generation in helium
[DE94-001064] p 2348 N94-23181
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361
Measurement of electron temperature and density in the DIII-D neutral beam ion source arc chamber
[DE94-001099] p 2553 N94-24746
Nonequilibria in thermal emission from supernova remnants
[NIFS-264] p 2602 N94-24866
ELECTRON GUNS
Design and testing of ubitron amplifier tubes
[AD-A273297] p 2311 N94-24818
Performance of inverse photoemission spectrometer with a new bandpass photon detector of narrow bandwidth and high sensitivity
[REPT-A-2659] p 2345 N94-24977
ELECTRON IRRADIATION
On the origin of 1/f noise in epitaxial GaAs
[ISBN-9-09-006067-7] p 2566 N94-25297
ELECTRON MICROSCOPES
Scanning probe surface modification
[AD-A273178] p 2346 N94-25151
ELECTRON MICROSCOPY
Phase transformations in Cu-Zr multilayers
[DE94-000393] p 2241 N94-23297
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A273698] p 2263 N94-25489
ELECTRON PARAMAGNETIC RESONANCE
Magnetic resonance study of zinc-related defects in silicon with optimized EPR spectrometer
[PB93-224640] p 2561 N94-23223
Magnetic resonance studies of 3d transition metal impurities in compound semiconductors
[PB93-232197] p 2243 N94-23714
Contribution of all excited states to ZFS of a (sup 6) S-state
[DE93-617007] p 2568 N94-25483
ELECTRON PHONON INTERACTIONS
Localized excitations in competing bond-order-wave, charge-density-wave and spin-density-wave systems. 2: Competing charge-density-wave and spin-density-wave
[DE93-617131] p 2538 N94-25388
ELECTRON SCATTERING
Inelastic electron scattering from surfaces
[DE94-001368] p 2531 N94-22733
Perturbation theory in electron diffraction
[PB93-201424] p 2533 N94-23505
Theoretical atomic physics for fusion
[DE94-000712] p 2533 N94-23543
Application and development of the Schwinger multichannel scattering theory and the partial differential equation theory of electron-molecule scattering
[NASA-CR-194774] p 2536 N94-24798
High precision x ray lithographic masks
[AD-A273342] p 2346 N94-25154
ELECTRON SPECTROSCOPY
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel
[DE94-000466] p 2242 N94-23457
Low mass muon pair production in 450 GeV p-Be collisions
[PB94-110699] p 2533 N94-23746
Activities of Academia Sinica
[DE93-614529] p 2541 N94-25335
ELECTRON SPIN
Spin-polaron theory of high-T(c) superconductivity. 2: Electronic structure of the CuO2 planes
[DE93-019197] p 2556 N94-22919
Spin fluctuations in an ordered Heisenberg ferromagnet with dipolar interactions
[PB93-204493] p 2524 N94-24533
ELECTRON STATES
Anisotropic uniaxial pressure effects in YBa2Cu3O(7-delta)
[DE94-001456] p 2557 N94-22929
ELECTRON TRANSFER
Disorder effects on small-polaron formation and hopping
[DE94-001205] p 2534 N94-23804
Mesoscopic phenomena in metallic point contacts
[ETN-94-95371] p 2313 N94-25286
ELECTRON TRANSITIONS
Intramultiplet mixing for Ne(**)(3p)+He at superthermal energies
[ETN-94-95327] p 2538 N94-25240
ELECTRON TUNNELING
The role of emitter states in magnetotunneling through double-barrier resonant-tunneling diodes at high magnetic fields
[REPT-A-2658] p 2564 N94-24959
Quantum tunneling transport of electrons in double-barrier heterostructures: Theory and modeling
[ETN-94-95332] p 2565 N94-25059
ELECTRON-POSITRON PAIRS
Progress report for the UCSD experimental HEP group
[DE94-001357] p 2533 N94-23699
New evaluation of hadronic contributions to the anomalous magnetic moment of charged leptons
[DE93-634394] p 2536 N94-24844
ELECTRONIC CONTROL
Open EDI
[VTT-TIED-1353] p 2588 N94-22734
Computer control of an electro-mechancial regulator for providing positive pressure breathing and an electronic G-valve for human +Gz research
[DCIEM-93-05] p 2437 N94-24299
ELECTRONIC COUNTERMEASURES
CF-18 AN/ALQ-126B-MG 13 IIP interface to the DREO Electronic Warfare Engagement Simulation Facility
[DREO-TN-93-4] p 2296 N94-24118

ELECTRONIC EQUIPMENT
Electronic payloads for Martian missions: A preliminary assessment of technologies p 2610 N94-23408
The Electronics Quality/Reliability Center: Lessons learned from partnering with industry
[DE94-001501] p 2309 N94-23777
Laser soldering of Sn plated brass integrator assembly housings
[DE94-001149] p 2270 N94-23790
Worst case analysis: Earth sensor assembly for the tropical rainfall measuring mission observatory
[NASA-CR-189320] p 2311 N94-24754
PLANET: A hierarchical network simulator
[ISBN-9-09-005693-9] p 2313 N94-25083
Computerized testing system software conversion and development: Identifying software and hardware portability issues and solutions
[AD-A273489] p 2462 N94-25287

ELECTRONIC EQUIPMENT TESTS
Characterization of CCD-based imaging x ray detectors for diffraction experiments
[DE93-041343] p 2556 N94-22921
Experimental verification of an acoustic telemetry link between an Aurora and CFAV quest
[DREA-TC-93-304] p 2202 N94-24121
On the characterization and optimization of high-speed silicon bipolar transistors
[ETN-94-95367] p 2313 N94-25253
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2
[AD-A273703] p 2463 N94-25456

ELECTRONIC MAIL
AstroMail: Electronic mail for the astrophysics community
[NASA-CR-194877] p 2591 N94-24099
Interoperability through standardization: Electronic mail, and X Window systems p 2575 N94-24406

ELECTRONIC PACKAGING
Transient analysis of circuits including frequency-dependent components using transgyrator and convolution
[PB93-225001] p 2308 N94-23130

ELECTRONIC WARFARE
CF-18 AN/ALQ-126B-MG 13 IIP interface to the DREO Electronic Warfare Engagement Simulation Facility
[DREO-TN-93-4] p 2296 N94-24118

ELECTRONS
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
The electrochemistry of the solvated electron: A study of its properties and of its applications
[ETN-94-95313] p 2236 N94-25296

ELECTROPHORESIS
Capillary electrokinetic separations with optical detection
[DE94-001639] p 2233 N94-23716
Electrophoresis in open capillaries: Some fundamental aspects
[ETN-94-95290] p 2236 N94-25232
Capillary electrophoresis of biomolecules: Theory, instrumentation and applications
[ETN-94-95297] p 2236 N94-25233

ELECTROPHYSIOLOGY
Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454

ELECTROPLATING
Molten salt reactor for potentiostatic electroplating
[AD-D016020] p 2258 N94-24720

ELECTRORHEOLOGICAL FLUIDS
Electro-rheology fluids and liquid fuel flow
[AD-A273640] p 2337 N94-25032
Electro-rheological control valve
[AD-D015997] p 2367 N94-25055

ELECTROSTATIC PROBES
Active probing of plasma edge turbulence and feedback studies on the Texas Experimental Tokamak (TEXT)
[DE94-001017] p 2548 N94-22945
Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361
Scanning probe surface modification
[AD-A273178] p 2346 N94-25151
Fluid velocity and electromagnetic forces measured by a rotating Langmuir probe in the scrape off layer of JFT-2M
[OUEL-1968/92] p 2554 N94-25327

ELECTROSTATICS
Static image method for computing the electric potential due to sources in a layered sphere
[PB93-224970] p 2308 N94-23105
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
A study on electrostatic quadrupole lenses and their application technologies
[REPT-948] p 2546 N94-24982
Electrostatic levitation technology for thermophysical properties of molten materials p 2238 N94-25135

ELEMENTARY PARTICLE INTERACTIONS
A scalar-vector model of quark-antiquark interaction under linear confinement
[DE93-616871] p 2538 N94-25317
Proton spin: The role of quark-gluon and hadron degrees of freedom
[DE93-616867] p 2538 N94-25341
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476

ELEMENTARY PARTICLES
Activities of Academia Sinica
[DE93-614529] p 2541 N94-25335

ELEVATION
Synthesis of passive microwave and radar altimeter data for estimating accumulation rates of polar snow
[NASA-CR-194864] p 2382 N94-23573
The effect of sub-surface volume scattering on the accuracy of ice-sheet altimeter retracking algorithms
[NASA-CR-194825] p 2386 N94-24060

ELLIPSES
A rational elliptic surface related to the question of expressing squares as sum of consecutive squares
[W-9305] p 2479 N94-23139

ELLIPSOIDS
Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface
[PB93-237691] p 2480 N94-23438

ELLIPSOMETERS
Mueller matrix analysis of infrared ellipsometry
[PB93-201549] p 2544 N94-23629

ELLIPSOMETRY
Spectroscopic IR ellipsometry of 100 and 001 oriented YBa2Cu3O(7-delta) films
[PB93-201481] p 2561 N94-23445
Mueller matrix analysis of infrared ellipsometry
[PB93-201549] p 2544 N94-23629
Direct observation of crystal growth from solution using optical investigation of a growing crystal face
[NASA-CR-195141] p 2563 N94-24617
Optical properties and emissivities of liquid metals and alloys p 2248 N94-25129

ELLIPTIC DIFFERENTIAL EQUATIONS
Nonlinear smoothing for random fields
[MEMO-1110] p 2493 N94-22728
Uniform convergence of multigrid V-cycle iterations for indefinite and nonsymmetric problems
p 2482 N94-23677
Domain decomposition methods for nonconforming finite element spaces of Lagrange-type
p 2483 N94-23680
Numerical solution of flame sheet problems with and without multigrid methods p 2237 N94-23683
Relaxation schemes for Chebyshev spectral multigrid methods p 2484 N94-23688
A comparison of locally adaptive multigrid methods: LDC, FAC and FIC p 2485 N94-23692
The least energy critical set
[DE93-616820] p 2493 N94-25434
Applications of the homogenization method to flow and transport in porous media
[BER-9110] p 2340 N94-25467

ELLIPTIC FUNCTIONS
A rational elliptic surface related to the question of expressing squares as sum of consecutive squares
[W-9305] p 2479 N94-23139

ELLIPTICAL GALAXIES
Comparison of time integration methods for the evolution of galaxies
[PB94-111671] p 2602 N94-24522

ELONGATION
Effect of neutron irradiation on tensile properties of V-Cr-Ti alloys
[DE94-001433] p 2240 N94-23194

EMBEDDED COMPUTER SYSTEMS
Expert system rule-base evaluation using real-time parallel processing
[AD-A273701] p 2469 N94-25454

EMBEDDING
Towards the formal specification of the requirements and design of a processor interface unit
[NASA-CR-4521] p 2467 N94-24463

EMBRITTLEMENT
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184
Fracture kinetics analysis of empirical and semi-empirical corrosion fatigue relations p 2159 N94-24277

EMERGENCIES
Aircraft evacuation testing: Research and technology issues
[PB94-107620] p 2173 N94-24750

EMISSION SPECTRA
1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192
Development of an analytical-numerical model to predict radiant emission or absorption
[NASA-CR-194860] p 2453 N94-23624
Using neural networks to assist in OPAD data analysis
p 2477 N94-24452
Infrared and SiO maser observations of OH/IR stars
[PB94-104890] p 2599 N94-24780
Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893
An AVHRR cloud classification database typed by experts
[AD-A273560] p 2416 N94-25162
UV extinction and IR emission in diffuse H2 regions
[NASA-CR-195194] p 2600 N94-25270
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535

EMISSIVITY
Experimental evaluation of camouflage effectiveness in the thermal infrared
[FEL-93-A043] p 2361 N94-22896
Spatial and temporal variability of soil temperature, moisture and surface soil properties
[NASA-CR-194109] p 2401 N94-23337
Containerless measurements on liquids at high temperatures p 2238 N94-25125
Liquidus temperature and optical properties measurement by containerless techniques
p 2247 N94-25126

EMITTERS
Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP)
[AD-A273401] p 2301 N94-24926
The role of emitter states in magnetotunneling through double-barrier resonant-tunneling diodes at high magnetic fields
[REPT-A-2658] p 2564 N94-24959
Field emitter array
[AD-D016023] p 2303 N94-25150

EMPHYSEMA
Chronic obstructive pulmonary disease
p 2425 N94-23324

EMPLOYEE RELATIONS
Perceptions of organizational support and affectivity as predictors of job satisfaction
[DOT/FAA/AM-94/2] p 2429 N94-25442

EMPLOYMENT
Women scientists and engineers employed in industry: Why so few? A report based on a conference
[ISBN-0-309-04991-1] p 2585 N94-24698

EMULSIONS
Feasibility study: Monodisperse polymer particles containing laser-excitable dyes p 2225 N94-24350
Particle nucleation and growth in butadiene emulsion polymerization
[ETN-94-95300] p 2262 N94-25236

ENCAPSULATING
To perform a proof-of-concept study on the use of superheated drop detectors for the measurement of LET spectra in space environments
[BTI-92/3-31] p 2629 N94-24695

ENCLOSURE
Birdstrike resistant crew enclosure program
[AD-A273700] p 2463 N94-25453

END EFFECTORS
Spline screw multiple rotations mechanism
[NASA-CASE-GSC-13452-1] p 2352 N94-23078
NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-194678] p 2571 N94-23230
Control of a serpentine manipulator with collision avoidance p 2368 N94-23232
Rack Insertion End Effector (RIEE) automation
p 2368 N94-23242
Development of a force feedback anthropomorphic teleoperation input device for control of robot hands
[NASA-CR-195109] p 2437 N94-24329
Autonomous Space Processor for Orbital Debris (ASPOD)
[NASA-CR-195521] p 2204 N94-24621
Admittance model for the shuttle remote manipulator system in four configurations
[NASA-CR-4555] p 2474 N94-24635
Modelling the Shuttle Remote Manipulator System: Another flexible model p 2371 N94-25350

END-TO-END DATA SYSTEMS
The advanced orbiting systems testbed program: Results to date p 2197 N94-23907
ENDOSCOPES
Real-time holographic endoscopy
[ISL-CO-203/92] p 2343 N94-24054
ENERGETIC PARTICLES
Measuring track densities in lunar grains by image analysis p 2623 N94-25355
ENERGY ABSORPTION
Radiative forcing calculations for SF6 and CH4 using a correlated k-distribution transmission model
[DE94-001855] p 2397 N94-23700
ENERGY BUDGETS
Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734
An investigation of current and future satellite and in-situ data for the remote sensing of the land surface energy balance
[NASA-CR-195138] p 2387 N94-24596
The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896
ENERGY CONSERVATION
Preliminary study concerning development of petroleum-substitution energy integration technology
[DE94-714902] p 2264 N94-23027
ENERGY CONSUMPTION
Snow modeling, water resources, climate change
[PB93-201770] p 2399 N94-24633
ENERGY CONVERSION
Second law analysis of a conventional steam power plant p 2322 N94-23646
Overview of molten carbonate fuel cell technology development
[DE94-001911] p 2394 N94-23781
Recharge mechanism based on shape memory alloy
p 2362 N94-24039
ENERGY CONVERSION EFFICIENCY
Lectures on magnetohydrodynamical drives
[PB93-224962] p 2308 N94-23104
High-order sum and difference-frequency generation in helium
[DE94-001064] p 2348 N94-23181
Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296
Low power ground-based laser illumination for electric propulsion applications
[NASA-CR-194444] p 2219 N94-23555
A solar photovoltaic power system for use in Antarctica
[NASA-TM-106417] p 2395 N94-24071
Spatial frequency multiplier with active linearly tapered slot antenna array
[NASA-TM-106494] p 2310 N94-24308
ENERGY DISSIPATION
Quantitative analysis in the Al-Mg-Si system with small amounts of Mg and Si
[PB93-201499] p 2241 N94-23446
Data analysis and theoretical studies of the upper mesosphere and lower thermosphere
[NASA-CR-195108] p 2402 N94-24089
Energy transfer and constrained simulations in isotropic turbulence p 2330 N94-24153
Magnetic field dissipation and contraction of molecular clouds
[REPT-337] p 2603 N94-24976
Computer simulation of low energy scattering
[ETN-94-95326] p 2537 N94-25082
ENERGY DISTRIBUTION
Solar neutrinos: Real-time experiments
[ICRR-REPT-293-93-5] p 2627 N94-24962
ENERGY GAPS (SOLID STATE)
A valence-fluctuation theory of cuprate superconductivity
[DE94-000887] p 2558 N94-22942
Localized excitations in competing bond-order-wave, charge-density-wave and spin-density-wave systems. 2: Competing charge-density-wave and spin-density-wave
[DE93-617131] p 2538 N94-25388
The Haldane energy gap of a doped linear-chain Heisenberg antiferromagnet
[DE93-617130] p 2567 N94-25426
ENERGY LEVELS
Semiempirical studies of atomic structure
[DE94-001588] p 2531 N94-22937
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064)
[DE94-002000] p 2347 N94-22974
GGA study of the magnetic and cohesive properties of bcc, fcc and hcp Mn
[REPT-A-2662] p 2564 N94-24960
ENERGY METHODS
Energy estimates and asymptotic analysis in the theory of shells
[PB93-225738] p 2374 N94-23113
ENERGY OF FORMATION
Vacancy formation energy of Li(H, D) and Na(H, D) systems
[DE93-633452] p 2558 N94-22978
Diffusion on Cu surfaces p 2251 N94-24428
ENERGY POLICY
Federal alternative fuel program light duty vehicle operations
[DE93-040663] p 2264 N94-22878
Feasibility study on a CO2 global recycling system using natural energy
[DE94-714889] p 2397 N94-23026
ENERGY SPECTRA
Electron spectroscopic studies of the neutralization of slow multicharged ions during interactions with a metal surface
[DE93-041046] p 2532 N94-22956
Energy transfer and constrained simulations in isotropic turbulence p 2330 N94-24153
Analysis of SOFCAL calibration data
[NASA-CR-193910] p 2345 N94-25000
Radar target discrimination by spectrum analysis
[AD-D015982] p 2301 N94-25040
Examination of the response capacity of a silicon pixel detector for ions and molecules in the energy area 100 to 300 keV
[MPE-241] p 2346 N94-25415
CsI(Tl)-photodiode detectors for spectroscopy at low radiation levels
[MPI-PHE/92-22] p 2314 N94-25457
High energy gamma astronomy above 200 GeV
[MPI-PHE/93-04] p 2600 N94-25458
ENERGY STORAGE
Picosecond High Pressure Gas Switch experiment
[DE93-040853] p 2307 N94-22950
Primary and secondary electrical space power based on advanced PEM systems p 2392 N94-23357
Limiting factors for carbon based chemical double layer capacitors p 2394 N94-23365
Flow and temperature distribution in a naturally stratified thermal storage tank
[AD-A273511] p 2336 N94-24821
Metal hydride storage
[VTT-JULK-769] p 2396 N94-25417
ENERGY TECHNOLOGY
Catalog of data bases and reports
[DE93-040597] p 2588 N94-22875
Preliminary study concerning development of petroleum-substitution energy integration technology
[DE94-714902] p 2264 N94-23027
Electrical power technology for robotic planetary rovers p 2314 N94-23401
Considerations in implementing integrated biomass energy systems in developing countries
[DE93-018720] p 2395 N94-24499
ENERGY TRANSFER
Optimization of energy transfer in microwave electrothermal thrusters p 2216 N94-23065
Energy transfer in solid explosives
[DE94-001523] p 2265 N94-23778
Data analysis and theoretical studies of the upper mesosphere and lower thermosphere
[NASA-CR-195108] p 2402 N94-24089
Energy transfer and constrained simulations in isotropic turbulence p 2330 N94-24153
Investigation of the optical and laser properties of Tm and Ho in YAG anf YLF
[REPT-94-001] p 2563 N94-24404
Thermodynamic models for bounding pressurant mass requirements of cryogenic tanks
[NASA-TM-106476] p 2346 N94-25202
Infrared fluorescence studies of electronic-to-vibrational energy transfer in a Br2:NO system
[AD-A273727] p 2539 N94-25443
ENGINE AIRFRAME INTEGRATION
Vibration isolating engine mount
[CA-PATENT-1-320-710] p 2353 N94-23215
Integrated design and manufacturing for the high speed civil transport
[NASA-CR-195511] p 2182 N94-24968
ENGINE CONTROL
Controllability of free-piston Stirling engine/linear alternator driving a dynamic load
[NASA-TM-106497] p 2521 N94-24302
ENGINE COOLANTS
CFD analyses of coolant channel flowfields
p 2214 N94-23050
ENGINE DESIGN
Rolls-Royce in perspective: Past, present and future
[PNR-90882] p 2187 N94-23519
The RB211: The first 25 years
[PNR-90977] p 2187 N94-23570
Internal combustion engine with a central crankshaft and integral tandem annular pistons
[CA-PATENT-1-320-878] p 2363 N94-24055
Gas turbine and operating method of the same
[CA-PATENT-APPL-SN-2043039] p 2188 N94-24490
Advanced launch system. Advanced development oxidizer turbopump program
[NASA-CR-193920] p 2367 N94-25174
Design and implementation of a distributed version of the NASA Engine Performance Program
[NASA-CR-194475] p 2462 N94-25179
ENGINE FAILURE
System for Anomaly and Failure Detection (SAFD) system development
[NASA-CR-193907] p 2372 N94-24174
ENGINE MONITORING INSTRUMENTS
Nuclear propulsion control and health monitoring
p 2217 N94-23071
Development of an analytical-numerical model to predict radiant emission or absorption
[NASA-CR-194860] p 2453 N94-23624
ENGINE NOISE
Fan noise research at NASA
[NASA-TM-106512] p 2530 N94-25172
ENGINE PARTS
Engine materials characterization and damage monitoring by using x ray technologies
[NASA-TP-3328] p 2372 N94-24074
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072
ENGINE TESTS
Performance evaluation of the Russian SPT-100 thruster at NASA LeRC
[NASA-TM-106401] p 2219 N94-23630
System for Anomaly and Failure Detection (SAFD) system development
[NASA-CR-193907] p 2372 N94-24174
Thrust vectoring theory, laboratory and flight tests
p 2155 N94-24251
The effect of high altitude pressure on the power and efficiency of an airborne two-stroke engine
p 2155 N94-24253
Altitude simulation facility for testing large space motors p 2156 N94-24255
Preliminary far-field plume sputtering characterization of the Stationary Plasma Thruster (SPT-100)
[NASA-TM-106464] p 2221 N94-24766
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194785] p 2389 N94-24856
Temperature measurement using infrared imaging systems during turbine engine altitude testing
[NASA-TM-105871] p 2193 N94-25184
Power electronics development for the SPT-100 thruster
[NASA-TM-106488] p 2221 N94-25189
ENGINEERING MANAGEMENT
Cost benefits of advanced software: A review of methodology used at Kennedy Space Center
p 2464 N94-23240
Mission engineering p 2505 N94-23881
An engineering database management system for spacecraft operations p 2517 N94-23951
The integration of design and manufacturing processes at Alenia DVD p 2179 N94-24325
Advanced Capability Exhaust Systems/Integrated Product Development for advanced nozzles (ACES/IPD)
[AD-A273209] p 2189 N94-24776
Reuse-Driven Software Processes Guidebook, version 02.00.03
[AD-A273644] p 2461 N94-25148
New Technologies for Space Avionics, 1993
[NASA-CR-195157] p 2272 N94-25193
Appendix B: Rapid development approaches for system engineering and design p 2272 N94-25195
Appendix C: Rapid development approaches for system engineering and design p 2272 N94-25196
Software engineering methodologies and tools
p 2465 N94-25382
ENGINEERS
Women scientists and engineers employed in industry: Why so few? A report based on a conference
[ISBN-0-309-04991-1] p 2585 N94-24698
ENTHALPY
Thermochemistry of the actinides
[DE94-000895] p 2231 N94-22943

Calibration of HYPULSE for hypervelocity air flows corresponding to flight Mach numbers 13.5, 15, and 17
[NASA-CR-191578] p 2192 N94-23564
Convection equation modeling: A non-iterative direct matrix solution algorithm for use with SINDA
p 2323 N94-23651
A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667
Improved gas core propulsion model
[DE94-000929] p 2220 N94-24511
Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124
Containerless measurements on liquids at high temperatures p 2238 N94-25125
A thermodynamic approach to obtain materials properties for engineering applications
p 2248 N94-25131

ENTRAINMENT
Simplified, inverse, ejector design tool
[NASA-CR-194438] p 2166 N94-23511

ENTROPY
Thermochemistry of the actinides
[DE94-000895] p 2231 N94-22943
Density estimation by maximum quantum entropy
[DE94-002626] p 2569 N94-24516
Discrete time minimum entropy H(infinity) control problem
[PB93-237808] p 2474 N94-24609

ENVIRONMENT EFFECTS
Exploratory report nickel and nickel compounds
[PB93-223998] p 2242 N94-23496
Exploratory report antimony and antimony compounds
[PB93-224004] p 2397 N94-23497
Artificial plasma experiments. Chemical release observations associated with the CRRES program
[NASA-CR-194871] p 2550 N94-23565
The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596
Analysis of vulnerability to the impacts of sea level rise: A case study for The Netherlands
[PB94-111150] p 2399 N94-24573
Orbital debris and near-Earth environmental management: A chronology
[NASA-RP-1320] p 2598 N94-24644

ENVIRONMENT MANAGEMENT
Structure and flow of data through an environmental data management system
[DE93-040487] p 2589 N94-22934
Orbital debris and near-Earth environmental management: A chronology
[NASA-RP-1320] p 2598 N94-24644

ENVIRONMENT POLLUTION
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5B: Corrosion: General issues
[AD-A273667] p 2250 N94-25407

ENVIRONMENT PROTECTION
A prototype expert/information system for examining environmental risks of KSC activities
p 2400 N94-23237
Ozone depletion, paradigms, and politics
[DE94-001600] p 2398 N94-24506

ENVIRONMENT SIMULATION
SATCOM simulator speeds MSS deployment and lowers costs p 2287 N94-22822
A white paper: NASA virtual environment research, applications, and technology
[NASA-TM-109682] p 2428 N94-24855

ENVIRONMENT SIMULATORS
Safety guidelines for the operation of the DREO 10 m EMP simulator DREMPS
[DREO-TN-93-5] p 2193 N94-24117
TEM cell safety report
[DREO-TN-93-9] p 2193 N94-24123

ENVIRONMENTAL CONTROL
Feasibility study on a CO2 global recycling system using natural energy
[DE94-714889] p 2397 N94-23026
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies
p 2371 N94-24427

ENVIRONMENTAL LABORATORIES
Solar-terrestrial environmental laboratory
p 2630 N94-23336

ENVIRONMENTAL MONITORING
Quality data validation: Comprehensive approach to environmental data validation
[DE94-000925] p 2589 N94-22944
A prototype expert/information system for examining environmental risks of KSC activities
p 2400 N94-23237
Lightning, atmospheric electricity, and climate change
[DE94-002003] p 2408 N94-23471
Low rate data bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems
[NASA-TM-109408] p 2208 N94-23480
Mission operations update for the restructured Earth Observing System (EOS) mission p 2499 N94-23839
The measurement and analysis of leaf spectral reflectance of two stands of loblolly pine populations
p 2389 N94-24442
EPA's survey of in-use driving patterns: Implications for mobile source emission inventories
[PB94-118502] p 2399 N94-24525
Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167

ENVIRONMENTAL RESEARCH SATELLITES
Low rate data bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems
[NASA-TM-109408] p 2208 N94-23480
High-rate data link general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT satellite systems
[NASA-TM-109384] p 2208 N94-23481

ENVIRONMENTAL SURVEYS
Aqueous alkaline cleaners: An alternative to organic solvents
[AD-A273510] p 2260 N94-24848
Soil pollution at former industrial sites, the heritage of 150 years of industrial development in Noord-Brabant, The Netherlands
[ISBN-9-09-005758-7] p 2400 N94-25223

ENVIRONMENTAL TESTS
Impedance measurements on a spiral-wound nickel/metal hydride cell cycled in a simulated Leo orbit
p 2392 N94-23355

ENZYME ACTIVITY
The evolution of energy-transducing systems. Studies with archaebacteria
[NASA-CR-195129] p 2422 N94-24811

ENZYMES
The evolution of energy-transducing systems. Studies with an extremely halophilic archaebacterium
[NASA-CR-193803] p 2422 N94-24807
On the mechanism of action of 3',5'-cyclic adenosine monophosphate: A study of four- and five-coordinated phosphorus compounds, modelling the activated state of cAMP
[ISBN-9-03-860222-7] p 2226 N94-25238

ENZYMOLOGY
The evolution of energy-transducing systems. Studies with archaebacteria
[NASA-CR-195129] p 2422 N94-24811
On the mechanism of action of 3',5'-cyclic adenosine monophosphate: A study of four- and five-coordinated phosphorus compounds, modelling the activated state of cAMP
[ISBN-9-03-860222-7] p 2226 N94-25238

EPIDEMIOLOGY
The computation of R(sub 0) for discrete-time epidemic models with dynamic heterogeneity
[CWI-AM-R9301] p 2420 N94-23521

EPITAXY
Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657
Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A273698] p 2263 N94-25489

EPOXY COMPOUNDS
Ultrasonic process for curing adhesives
[AD-A273175] p 2259 N94-24788

EPOXY MATRIX COMPOSITES
The use of expanding monomers in carbon fibre composites
[ISBN-0-315-83550-8] p 2226 N94-22890
Contribution to the interface micromechanical study and to the damage fundamental phenomena in glass fiber epoxy resin model composites
[ISAL-93-0027] p 2227 N94-23133

EPOXY RESINS
Fiber optic detection of ultrasound and its application to cure monitoring
[ISBN-0-315-83424-2] p 2544 N94-24466
Dipolar relaxation in a second-order nonlinear optical interpenetrating polymer network
[AD-A273626] p 2258 N94-24732
Ultrasonic process for curing adhesives
[AD-A273175] p 2259 N94-24788

EQUATIONS OF MOTION
Coherence lost? Not-so-fast escapes from the in-phase attractor of a set of globally coupled nonlinear oscillators
[DE94-000799] p 2557 N94-22940
On the numeric integration of dynamic attitude equations
[NASA-CR-194788] p 2448 N94-23073
Projectile transverse motion and stability in electromagnetic induction launchers
[DE94-001557] p 2198 N94-23210
Differential algebraic equations
[PB93-237618] p 2481 N94-23455
Comparison of time integration methods for the evolution of galaxies
[PB94-111671] p 2602 N94-24522
Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773
The Casimir energy of the rigid string with massive ends
[DE93-616851] p 2492 N94-25338
Numerical analysis of the motion of a rigid body with an attached spring-mass-damper
[AD-A273825] p 2379 N94-25520
Steady motions of rigid body satellites in a central gravitational field
[AD-A273742] p 2206 N94-25532

EQUATIONS OF STATE
Tool sharing: An application of max-algebra, part 2
[MEMO-1122] p 2478 N94-22710
Tool sharing: An application of max-algebra, part 1
[MEMO-1108] p 2478 N94-22726
Physics of iron
[DE94-002002] p 2402 N94-23721

EQUILIBRIUM EQUATIONS
Product forms as a solution base for queueing systems
[MEMO-COSOR-92-37] p 2477 N94-25526

EQUIPMENT SPECIFICATIONS
Analog communication transmitter and receiver test procedures
[AD-A273423] p 2300 N94-24687

EQUIPOTENTIALS
On the transverse size of a fast moving nucleon
[DE93-616891] p 2539 N94-25481

EQUIVALENT CIRCUITS
Transient analysis of circuits including frequency-dependent components using transgyrator and convolution
[PB93-225001] p 2308 N94-23130
Carbon supercapacitors
[DE94-002652] p 2311 N94-24748

ERGODIC PROCESS
Algorithm on addition chains with restricted memory
[PB94-118692] p 2454 N94-23759
Uniform limit theorems for marked point processes
[PB94-118726] p 2488 N94-24526
Correlation function estimator performance in non-Gaussian spherically invariant random processes
[AD-A273498] p 2496 N94-24951
The anomalous transport caused by particles transverse drift
[DE93-613685] p 2554 N94-25329

ERGOMETERS
Loading, electromyograph, and motion during exercise
p 2427 N94-25380

EROSION
The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596
Postflight hardware evaluation RSRM-29 (STS-54). Appendix D: Nozzle postfire data
[NASA-CR-193898] p 2199 N94-24057
Arc electrode interaction study
[NASA-CR-195096] p 2310 N94-24070
Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887
Plasma sprayed thermal barrier coatings: Production, characterization and testing
[ISBN-9-03-860082-8] p 2555 N94-25439

ERROR ANALYSIS
Analysis of open-loop conical scan pointing error and variance estimators p 2291 N94-23263
Spur-reduced digital sinusoid synthesis
p 2291 N94-23264
Uncertainties in climate data sets
[NASA-CR-194848] p 2408 N94-23577
Development and application of an empirical probability distribution for the prediction error of re-entry body maximum dynamic pressure p 2207 N94-23653
Study of a local absorbing boundary condition for the modeling of an infinite external domain in the time-domain finite-element package FEMAXT
[PB94-111002] p 2294 N94-23728

Error due to the stopping of the Newton iteration in implicit linear multistep methods
[PB94-101425] p 2487 N94-23786
Coding for frequency hopped spread spectrum satellite communications
[ECE-91-1] p 2296 N94-24132
An examination of the operational error database for air route traffic control centers
[DOT/FAA/AM-93/22] p 2175 N94-24472
Parametric uncertainty reduction in robust multivariable control
[AD-A273412] p 2460 N94-24927
Correlation function estimator performance in non-Gaussian spherically invariant random processes
[AD-A273498] p 2496 N94-24951
IRIG radar calibration catalog. Version 2: The IRIG error model reference for radar calibrations
[AD-A273344] p 2303 N94-25155
An adaptive streamline diffusion finite element method for hyperbolic systems in gas dynamics
[PREPRINT-688] p 2340 N94-25466

ERROR CORRECTING CODES
Coding for frequency hopped spread spectrum satellite communications
[ECE-91-1] p 2296 N94-24132
Coding for frequency hopped spread spectrum satellite communications
[ECE-92-1] p 2300 N94-24697
Binary block codes for correcting asymmetric or unidirectional errors
[ETN-94-95337] p 2460 N94-25063

ERROR DETECTION CODES
Contribution to the evaluation of efficiency of a microprocessor functional test
[ETN-94-95176] p 2445 N94-23153
Design and implementation issues of end-to-end protocols in high-speed networks
[PB94-110905] p 2467 N94-23752
Error coding simulations p 2306 N94-24439
Validation activities for LOTOS based on static data flow analysis
[PB94-110863] p 2459 N94-24758
Binary block codes for correcting asymmetric or unidirectional errors
[ETN-94-95337] p 2460 N94-25063

ERROR SIGNALS
Conveying digital data in noisy, unstable, multipath environments
[AD-D015980] p 2301 N94-25038

ERRORS
Magellan spacecraft and memory state tracking: Lessons learned, future thoughts p 2207 N94-23865
Mission operations and command assurance: Instilling quality into flight operations p 2374 N94-23932

ERS-1 (ESA SATELLITE)
VIERS-1, phase 3
[BCRS-92-24] p 2381 N94-23145
Mission planning for an Earth observation low Earth orbiter: ERS-1 p 2503 N94-23868
Investigations into deployment complications of the ERS-1 SAR antenna p 2305 N94-23996

ERYTHROCYTES
Measuring the dynamics of structural changes in biological macromolecules from light scattering data
p 2422 N94-24426

ESCAPE SYSTEMS
Reach performance while wearing the Space Shuttle launch and entry suit during exposure to launch accelerations p 2436 N94-24204
Regulated drag area parachute
[AD-D015992] p 2170 N94-25051

ESTERS
Planar poly(p-phenylene) derivatives: Ladder formation for maximization of extended conjugation
[AD-A273220] p 2260 N94-24922
Structure of cholesteryl-4-vinylbenzoate
[AD-A273686] p 2567 N94-25441

ESTIMATES
Energy estimates and asymptotic analysis in the theory of shells
[PB93-225738] p 2374 N94-23113
Estimates of monthly mean soil moisture for 1979-1989
[NASA-TM-104571] p 2407 N94-23132
Energy and maximum norm estimates for nonlinear conservation laws
[NASA-CR-195091] p 2569 N94-24109

ESTIMATING
Estimates of monthly mean soil moisture for 1979-1989
[NASA-TM-104571] p 2407 N94-23132
Chronic obstructive pulmonary disease
p 2425 N94-23324
Density estimation by maximum quantum entropy
[DE94-002626] p 2569 N94-24516

Two-stage versus sequential sample-size determination in regression analysis of simulation experiments
[PB94-110558] p 2495 N94-24634

ESTUARIES
Recent developments in the mathematical modelling and physical understanding of transport and dispersion in aquatic systems, with special reference to tidal waters
[PB94-111135] p 2418 N94-24600

ETALONS
Nonlinear optical thin films p 2225 N94-24349

ETHERS
Phenylethynl-terminated poly(arylene ethers)
[NASA-CASE-LAR-14797-1] p 2253 N94-23307

ETHYL COMPOUNDS
The evolution of energy-transducing systems. Studies with archaebacteria
[NASA-CR-195129] p 2422 N94-24811
Synthesis of molecular wires by a novel divergent/convergent approach
[AD-A273332] p 2537 N94-25087

ETHYLENE
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090
Ethylene trace-gas techniques for high-speed flows
[NASA-TM-106491] p 2169 N94-24335

ETHYLENE COMPOUNDS
FTIR quantification of industrial hydraulic fluids in perchloroethylene p 2264 N94-23243

ETIOLOGY
Sarcoidosis and the aviator p 2425 N94-23325

EUKARYOTES
Microinjection of the Yersinia YopE cytotoxin in mammalian cells induces actin microfilament disruption
[FOA-B-40418-4.4] p 2421 N94-24290

EULER BUCKLING
Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281

EULER EQUATIONS OF MOTION
Local grid refinement method for the euler equations
[PB93-223329] p 2317 N94-22985
Upwind MacCormack Euler solver with non-equilibrium chemistry p 2326 N94-23672
Energy transfer and constrained simulations in isotropic turbulence p 2330 N94-24153
Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281
Characteristic method for one-dimensional scalar hyperbolic conservation laws with stiff source terms
[PB93-237675] p 2491 N94-24954
A continuing search for a near-perfect numerical flux scheme. Part 1: AUSM+
[NASA-TM-106524] p 2338 N94-25180

EULER-LAGRANGE EQUATION
Solution of mixed convection heat transfer from isothermal in-line fins p 2321 N94-23644

EURECA (ESA)
A user view of the EURECA ground segment
p 2499 N94-23844
The EURECA telecommanding chain: Experience with packet telecommand and telemetry systems
p 2305 N94-23909

EUROPE
JPRS report: Science and technology. Central Eurasia: Space
[JPRS-USP-93-006] p 2194 N94-23015
Satellite communications systems and technology. Executive Summary
[NASA-TM-109388] p 2293 N94-23622
Satellite communications systems and technology. Volume 1: Analytical chapters
[NASA-TM-109398] p 2293 N94-23627

EUROPEAN SPACE AGENCY
Solar physics within ESA's planning
p 2624 N94-22844
Guide to software configuration management
[ESA-PSS-05-09-ISSUE-1] p 2450 N94-23229
Commonality of flight control systems for support of European telecommunications missions
p 2304 N94-23834
SCOS2: ESA's new generation of mission control systems p 2197 N94-23851

EUROPEAN SPACE PROGRAMS
Solar physics within ESA's planning
p 2624 N94-22844
A review of European applications of artificial intelligence to space
[NASA-TM-108789] p 2453 N94-23568

EUROPIUM COMPOUNDS
Spin fluctuations in an ordered Heisenberg ferromagnet with dipolar interactions
[PB93-204493] p 2524 N94-24533
Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3
[DE93-613824] p 2566 N94-25332

EUTECTIC ALLOYS
Metal-mullite reactions
[DE94-002038] p 2244 N94-23811

EUTECTICS
Metal-mullite reactions
[DE94-002038] p 2244 N94-23811
Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657

EUTROPHICATION
Nutrients and light as factors controlling phytoplankton biomass on the Dutch continental shelf (North Sea), 1988-1990
[PB94-111143] p 2418 N94-24601

EVACUATING (TRANSPORTATION)
Aircraft evacuation testing: Research and technology issues
[PB94-107620] p 2173 N94-24750

EVALUATION
The Automated Instrumentation and Monitoring System (AIMS) reference manual
[NASA-TM-108795] p 2452 N94-23510

EVAPORATION
Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657
Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734
Effect of initial droplet-size distributions on fuel-vapor profiles in a shear-layer flow p 2160 N94-24283

EVAPORATION RATE
Evaporation and combustion of LOX under supercritical and subcritical conditions p 2211 N94-23035

EVAPOTRANSPIRATION
Estimates of monthly mean soil moisture for 1979-1989
[NASA-TM-104571] p 2407 N94-23132
Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387
Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861

EVOKED RESPONSE (PSYCHOPHYSIOLOGY)
Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454

EXCIMER LASERS
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique
[DE94-001608] p 2309 N94-23520
Exciplex laser study: Discharge and magnetic switching systems
[PB93-199768] p 2349 N94-24629

EXCITATION
Inelastic electron scattering from surfaces
[DE94-001368] p 2531 N94-22733
Experimental and theoretical features of strong suppression and shifting phenomena in odd-photon resonant excitations and stimulated emissions
[DE94-000341] p 2535 N94-24510
Application and development of the Schwinger multichannel scattering theory and the partial differential equation theory of electron-molecule scattering
[NASA-CR-194774] p 2536 N94-24798
Excited state dynamics of thulium ions in yttrium aluminum garnets
[NASA-CR-195159] p 2564 N94-25024
Localized excitations in competing bond-order-wave, charge-density-wave and spin-density-wave systems. 2: Competing charge-density-wave and spin-density-wave
[DE93-617131] p 2538 N94-25388
Excitation mechanisms for XUV and x ray lasers
[DE93-617006] p 2351 N94-25482

EXCLUSION
Exercises in multiprogramming
[PB94-101458] p 2454 N94-23768

EXERCISE PHYSIOLOGY
Responses to LBNP in men with varying profiles of strength and aerobic capacity: Implications for flight crews
[NASA-TP-3346] p 2426 N94-23530
Exercise, exercise training, and the immune system. A compendium of research (1902-1991)
[NASA-TM-108778] p 2426 N94-23575
Loading, electromyograph, and motion during exercise
p 2427 N94-25380

EXHAUST EMISSION
Estimation of delays and emissions at four-way junctions with different forms of regulation, principally four-way mandatory stop
[PB94-105236] p 2398 N94-23813

Alternative control techniques document: NOx emissions from stationary reciprocating internal combustion engines
[PB94-104494] p 2398 N94-24476
EPA's survey of in-use driving patterns: Implications for mobile source emission inventories
[PB94-118502] p 2399 N94-24525
Embodiment design for a multipropellant resistojet
[NASA-CR-195505] p 2221 N94-24834

EXHAUST GASES
Development of an analytical-numerical model to predict radiant emission or absorption
[NASA-CR-194860] p 2453 N94-23624
Alternative control techniques document: NOx emissions from stationary reciprocating internal combustion engines
[PB94-104494] p 2398 N94-24476
Collection and evaluation of numerical models with the aim to investigate the impact of aircraft emissions
[DLR-MITT-93-06] p 2400 N94-25414

EXHAUST NOZZLES
Advanced Capability Exhaust Systems/Integrated Product Development for advanced nozzles (ACES/IPD)
[AD-A273209] p 2189 N94-24776

EXHAUST SYSTEMS
Analysis of high vacuum systems using SINDA'85
p 2322 N94-23648
Advanced Capability Exhaust Systems/Integrated Product Development for advanced nozzles (ACES/IPD)
[AD-A273209] p 2189 N94-24776

EXISTENCE THEOREMS
Personnel shift assignment: Existence conditions and network models
[MEMO-1116] p 2585 N94-22704

EXOBIOLOGY
SETI: Search for extraterrestrial intelligence. An international interdisciplinary seminar, star days
[PB93-230597] p 2444 N94-23754
Measuring the dynamics of structural changes in biological macromolecules from light scattering data
p 2422 N94-24426

EXOSPHERE
Data analysis and interpretation of lunar dust exosphere p 2623 N94-25349

EXOTHERMIC REACTIONS
Modelling the ignition of boron/titanium particles
p 2159 N94-24273
Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275

EXPELLANTS
Thermodynamic models for bounding pressurant mass requirements of cryogenic tanks
[NASA-TM-106476] p 2346 N94-25202

EXPERIMENT DESIGN
Gas-grain simulation experiment module conceptual design and gas-grain simulation facility breadboard development
[NASA-CR-177632] p 2598 N94-23536
Harmonisation of man-machine interface experiments in the context of the development of PHARE advanced tools
[PB93-204725] p 2430 N94-23744
Integrating payload design, planning, and control in the Dutch Utilisation Centre p 2207 N94-23869
Attachment methods in composite joints - analysis of test results by controlled experiments method
p 2158 N94-24269
Verification and validation of models
[PB94-110566] p 2456 N94-24507
Design and application of electromechanical actuators for deep space missions
[NASA-CR-195134] p 2365 N94-24842
Designs with a small number of runs for factorial experiments
[ISBN-9-03-860162-X] p 2462 N94-25237

EXPERT SYSTEMS
Glossary knowledge engineering
[NLR-TP-91435-U] p 2471 N94-23137
A prototype expert/information system for examining environmental risks of KSC activities
p 2400 N94-23237
Two applications of a generic task model for solving boolean constraint satisfaction problems
[PB94-119047] p 2487 N94-23765
NASDA knowledge-based network planning system
p 2508 N94-23898
A cross-disciplinary response to improve test activities: The corporate memory capitalization in Ariane4 test domain p 2508 N94-23899
Combining real-time monitoring and knowledge-based analysis in MARVEL p 2477 N94-23900
TOPEX/Poseidon precision orbit determination production and expert system p 2196 N94-23920
A real-time navigation monitoring expert system for the Space Shuttle Mission Control Center
p 2202 N94-23921
Expert diagnostics system as a part of analysis software for power mission operations p 2516 N94-23944
GenSAA: A tool for advancing satellite monitoring with graphical expert systems p 2516 N94-23945
An intelligent planning and scheduling system for the HST servicing missions p 2520 N94-23964
Computer based expert system for battle damage repair of composite structures p 2157 N94-24262
Evaluation of computer-aided instruction techniques for the crew interface coordination position
p 2429 N94-24438
Non-brittleness of a DESIRE-model for an office assignment task
[PB94-119021] p 2489 N94-24643
The use of knowledge systems
[ETN-94-95318] p 2477 N94-25431
Expert system rule-base evaluation using real-time parallel processing
[AD-A273701] p 2469 N94-25454

EXPLORER SATELLITES
SAMPEX payload operation control center implementation p 2197 N94-23843
The H(sub infinity) optimal controller design and reduction for the inertial hold mode of the attitude control system of the XTE spacecraft
[NASA-CR-195137] p 2366 N94-24846

EXPLOSIONS
The ignition temperature of solid explosives exposed to a fire
[DE94-001047] p 2265 N94-23436
Multiple shock initiation of LX-17
[DE94-001524] p 2265 N94-23807
The plastic response of a cylindrical shell subjected to an internal blast wave with a finite width shock front
p 2154 N94-24246

EXPLOSIVES
The ignition temperature of solid explosives exposed to a fire
[DE94-001047] p 2265 N94-23436
Energy transfer in solid explosives
[DE94-001523] p 2265 N94-23778

EXPOSURE
Survival suit for submarine personnel: Summary of evaluation studies
[PB93-204634] p 2430 N94-23743

EXTERNAL STORE SEPARATION
On the effect of the damping coefficients on the trajectories of symmetric and non-symmetric stores
p 2155 N94-24250
Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268

EXTERNAL STORES
On the effect of the damping coefficients on the trajectories of symmetric and non-symmetric stores
p 2155 N94-24250

EXTERNAL TANKS
Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657
National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers
[PB94-113487] p 2194 N94-23819
Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61
[NASA-TM-109195] p 2199 N94-24059

EXTRAPOLATION
On the deformation kinetics constitutive law of plastic deformation: The rate equation p 2161 N94-24289

EXTRATERRESTRIAL INTELLIGENCE
SETI: Search for extraterrestrial intelligence. An international interdisciplinary seminar, star days
[PB93-230597] p 2444 N94-23754

EXTRATERRESTRIAL LIFE
SETI: Search for extraterrestrial intelligence. An international interdisciplinary seminar, star days
[PB93-230597] p 2444 N94-23754

EXTRATERRESTRIAL RADIATION
The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596
Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments
[AD-A273639] p 2628 N94-25031

EXTRAVEHICULAR ACTIVITY
Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion
[PB94-111374] p 2194 N94-23770
National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers
[PB94-113487] p 2194 N94-23819
A simulation system for Space Station extravehicular activity p 2434 N94-24192
Space Station Freedom coupling tasks: An evaluation of their telerobotic and EVA compatibility
p 2436 N94-24200
Design and simulation of EVA tools for first servicing mission of HST
[NASA-CR-194784] p 2439 N94-24857
Investigation of hand capabilities under a variety of performance conditions and an attempt to explain performance differences p 2444 N94-25354
An evaluation of three-dimensional sensors for the extravehicular activity helper/retreiver
p 2444 N94-25369

EXTREME ULTRAVIOLET RADIATION
Imaging XUV spectroscopy of a Z-pinch plasma in the former Soviet Union
[DE93-040849] p 2549 N94-22949
High-order sum and difference-frequency generation in helium
[DE94-001064] p 2348 N94-23181
Excitation of XUV radiation in solar flares
[NASA-CR-193703] p 2627 N94-24094
The solar spectral irradiances from x ray to radio wavelengths
[NASA-CR-195203] p 2629 N94-25260
Excitation mechanisms for XUV and x ray lasers
[DE93-617006] p 2351 N94-25482

EXTREMELY HIGH FREQUENCIES
Use of the 30/20 GHz band by multipurpose satellite systems p 2276 N94-22753
ACTS advanced system concepts and experimentation p 2280 N94-22780
DS-SSMA capacity for a mobile satellite system
p 2286 N94-22814
Transmission over EHF mobile satellite channels
p 2287 N94-22820
Adaptive data rate control TDMA systems as a rain attenuation compensation technique
p 2287 N94-22821
Advanced mobile satellite communications using COMETS satellite in MM-wave and Ka-band
p 2288 N94-22829
K- and Ka-band mobile-vehicular satellite-tracking reflector antenna system for the NASA ACTS mobile terminal p 2289 N94-22831
An active K/Ka-band antenna array for the NASA ACTS mobile terminal p 2289 N94-22832
Performance of the X-/Ka/KABLE-band dichroic plate in the DSS-13 beam waveguide antenna
p 2291 N94-23261
Cryogenic, low-noise high electron mobility transistor amplifiers for the Deep Space Network
p 2291 N94-23262
Analysis of open-loop conical scan pointing error and variance estimators p 2291 N94-23263
A small satellite design for deep space network testing and training
[NASA-CR-195526] p 2205 N94-24702
Conceptual communications system design in the 25.25-27.5 and 37.0-40.5 GHz frequency bands
p 2306 N94-25379

EXTREMELY LOW FREQUENCIES
An active antenna for ELF magnetic fields
p 2303 N94-25192

EXTREMELY LOW RADIO FREQUENCIES
ELF communications system ecological monitoring program
[AD-A273456] p 2299 N94-24676

EXTRUDING
Theory of extrusion: Advances and challenges
[PB93-201572] p 2241 N94-23447
Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550

EYE PROTECTION
Micro pulse laser radar
[NASA-CASE-GSC-13493-1] p 2294 N94-23827

F

F REGION
High latitude cusp signature observations for southward IMF B sub Z
[AD-A273801] p 2406 N94-25536

F-106 AIRCRAFT
Leading-edge votex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques
[NASA-TP-3374] p 2166 N94-23512

F-15 AIRCRAFT
Identification of integrated airframe: Propulsion effects on an F-15 aircraft for application to drag minimization
[NASA-TM-4532] p 2188 N94-24106

F-16 AIRCRAFT
Flight controller design using mixed H2/H infinity optimization with a singular H infinity constraint
[AD-A273831] p 2191 N94-25525
F-18 AIRCRAFT
A photogrammetric solution to a particular problem
[NASA-TP-3415] p 2381 N94-22961
Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data
[NASA-CR-194838] p 2190 N94-24804
Development of high-angle-of-attack nose-down pitch control margin design guidelines for combat aircraft
p 2164 N94-25107
Nonlinear aerodynamic modeling using multivariate orthogonal functions p 2164 N94-25110
FABRICATION
Development of silicon nitride composites with continuous fiber reinforcement
[DE94-001996] p 2227 N94-23022
Preparing polymeric matrix composites using an aqueous slurry technique
[NASA-CASE-LAR-14771-1] p 2252 N94-23076
Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296
GPHS-RTG's in support of the Cassini mission
[DE94-001445] p 2218 N94-23459
Tunnelling in metallic contacts on high-T(c) superconductors: A story of charge carriers in YBa2Cu3O(7-delta) and Bi2CaSr2Cu2O(8+delta)
[ISBN-9-03-860142-5] p 2565 N94-25280
Composites and textile reinforcement
[VTT-TIED-1424] p 2231 N94-25420
FABRICS
Composites and textile reinforcement
[VTT-TIED-1424] p 2231 N94-25420
FACE CENTERED CUBIC LATTICES
Multilayer relaxation and surface structure of ordered alloys
[NASA-TM-106433] p 2243 N94-23578
FACSIMILE COMMUNICATION
The Iridium (tm) system: Personal communications anytime, anyplace p 2281 N94-22785
FACTORIAL DESIGN
Designs with a small number of runs for factorial experiments
[ISBN-9-03-860162-X] p 2462 N94-25237
FACTORIALS
Generalized concavity in cooperative game theory: Characterizations in terms of the core
[MEMO-1121] p 2497 N94-22708
FACTORIZATION
Logic synthesis on programmable networks
[ETN-94-95174] p 2449 N94-23151
Squaring-down and the problems of almost-zeros for continuous-time systems
[PB93-237758] p 2489 N94-24608
Wiener-Hopf factorization of rational matrix functions in terms of realizations: An alternative version
[ETN-94-95380] p 2491 N94-25245
FADING
Transmission over EHF mobile satellite channels
p 2287 N94-22820
High specific energy, high capacity nickel-hydrogen cell design p 2391 N94-23350
FAIL-SAFE SYSTEMS
Electro-rheological control valve
[AD-D015997] p 2367 N94-25055
FAILURE
Ceramic matrix composites: Challenges and opportunities p 2255 N94-24230
Failure-proof estimation under conditions of lack of information p 2158 N94-24267
Diagnosing process faults using neural network models
[DE94-002633] p 2473 N94-24518
FAILURE ANALYSIS
Time-frequency domain analysis of vibration signals for machinery diagnostics.(4): Interpretation using image processing techniques
[OUEL-1953/92] p 2353 N94-23178
Review of the probabilistic failure analysis methodology and other probabilistic approaches for application in aerospace structural design
[NASA-TP-3434] p 2376 N94-23342
Materials Science and Engineering
[DE94-003018] p 2228 N94-23493
Galileo spacecraft anomaly and safing recovery
p 2207 N94-23864
Real-time automated failure identification in the Control Center Complex (CCC) p 2272 N94-23892
Micromechanical failure modes in brittle matrix composites p 2255 N94-24232
Role of interfaces on the cyclic fatigue behaviour of ceramic matrix composites p 2256 N94-24234
Failure-proof estimation under conditions of lack of information p 2158 N94-24267
A study of the core module simulator floor capability
p 2380 N94-24418
Micromechanical simulation of damage progression in carbon phenolic composites p 2231 N94-24446
Evaluation of advanced materials through experimental mechanics and modelling p 2374 N94-24454
Diagnosing process faults using neural network models
[DE94-002633] p 2473 N94-24518
Reliability analysis of a repairable dependent parallel system
[ETN-94-95312] p 2373 N94-25295
Failure detection and recovery in the assembly/contingency subsystem p 2306 N94-25360
Modelling early failures in Space Station Freedom
p 2374 N94-25372
FAILURE MODES
Optimization of laminate orientation to enhance failure properties
[ISBN-0-315-83539-7] p 2227 N94-22892
Analysis and test of low profile aluminum aerospace tank dome
[NASA-TP-3442] p 2375 N94-23294
Micromechanical failure modes in brittle matrix composites p 2255 N94-24232
Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260
Pilot-vehicle interface handbook, chapter 19. Volume 2: Digital systems validation
[DOT/FAA/CT-88/10-VOL-2] p 2438 N94-24830
Failure detection and recovery in the assembly/contingency subsystem p 2306 N94-25360
FALLOUT
Towards a new radiation protection organization
[FOA-C-40304-4.3] p 2437 N94-24292
FAN BLADES
Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545
FAR FIELDS
Unsteady jet flow computation towards noise prediction
[NASA-CR-194449] p 2153 N94-23553
Toward modeling wingtip vortices
p 2171 N94-24142
Unstructured adaptive mesh computations of rotorcraft high-speed impulsive noise
[NASA-CR-195090] p 2529 N94-24307
FAR INFRARED RADIATION
Catalog of infrared observations, third edition
[NASA-RP-1294] p 2600 N94-25387
FAR ULTRAVIOLET RADIATION
Method and apparatus for producing a thermal atomic oxygen beam
[NASA-CASE-LEW-15614-1] p 2534 N94-23825
FARM CROPS
Integrated use of hydrological modelling and remote sensing in the province of Drenthe (The Netherlands): Possibilities and restrictions
[REPT-61] p 2382 N94-23148
Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991
[PB93-230654] p 2386 N94-23755
Evaluation of the use of remote-sensing data to identify crop types and estimate irrigated acreage, Uvalde and Medina Counties, Texas, 1989
[PB93-193159] p 2388 N94-24809
FAST FOURIER TRANSFORMATIONS
Estimation of frequency offset in mobile satellite modems p 2285 N94-22807
Transient analysis of circuits including frequency-dependent components using transgyrator and convolution
[PB93-225001] p 2308 N94-23130
The detection performance of a long-term spectral integrator using normalized and quantized data
[DREP-TM-93-11] p 2455 N94-24130
Fast fourier transforms of piecewise constant functions
[AD-A272648] p 2456 N94-24535
An active antenna for ELF magnetic fields
p 2303 N94-25192
FASTENERS
Split spline screw
[NASA-CASE-GSC-13434-1] p 2352 N94-23082
Docking mechanisms: An overview of different systems p 2357 N94-24004
Flush head fastener
[CA-PATENT-1308581] p 2364 N94-24175
FATIGUE (MATERIALS)
Fatigue crack growth rate studies of medium sulfur low alloy steels tested in high temperature water
[DE93-040437] p 2238 N94-22861
Fundamentals of fatigue analysis
[PB93-226264] p 2374 N94-23118
Thermal fatigue: A literature review
[PB93-226306] p 2375 N94-23120
A review of the Workshop on Fatigue Life Methodologies for Wind Turbines
[DE94-002039] p 2394 N94-23472
Control algorithms for effective operation of variable-speed wind turbines
[DE94-002607] p 2394 N94-23704
Introduction of Ceramics into Aerospace Structural Composites
[AGARD-R-795] p 2255 N94-24228
Repair of cracked aluminum aircraft structure with composite patches p 2156 N94-24259
Fracture kinetics analysis of empirical and semi-empirical corrosion fatigue relations p 2159 N94-24277
Variable amplitude fatigue, modelling and testing
[PB93-204469] p 2378 N94-24742
Matrix fatigue cracking mechanisms of alpha(2) TMC for hypersonic applications
[NASA-TM-106506] p 2230 N94-25186
FATIGUE LIFE
Fundamentals of fatigue analysis
[PB93-226264] p 2374 N94-23118
Thermal fatigue: A literature review
[PB93-226306] p 2375 N94-23120
Fatigue life and crack growth prediction methodology
[NASA-TM-109044] p 2228 N94-23279
A review of the Workshop on Fatigue Life Methodologies for Wind Turbines
[DE94-002039] p 2394 N94-23472
Feasibility study of shot-peening modeling
[CTN-94-60926] p 2244 N94-24170
Development of a damage tolerance tool to analyze multiple-site damage in aircraft structure
p 2157 N94-24261
Durability evaluation of ceramic components using CARES/LIFE
[NASA-TM-106475] p 2258 N94-24682
Variable amplitude fatigue, modelling and testing
[PB93-204469] p 2378 N94-24742
Investigation of the effects of manufacturing variations and materials on fatigue crack detection methods in gear teeth
[NASA-CR-195093] p 2373 N94-24769
Matrix fatigue cracking mechanisms of alpha(2) TMC for hypersonic applications
[NASA-TM-106506] p 2230 N94-25186
FATIGUE TESTING MACHINES
Investigation of the effects of manufacturing variations and materials on fatigue crack detection methods in gear teeth
[NASA-CR-195093] p 2373 N94-24769
FATIGUE TESTS
Optimization of laminate orientation to enhance failure properties
[ISBN-0-315-83539-7] p 2227 N94-22892
Development of a damage tolerance tool to analyze multiple-site damage in aircraft structure
p 2157 N94-24261
Application of fault detection techniques to spiral bevel gear fatigue data
[NASA-TM-106467] p 2364 N94-24483
FAULT DETECTION
Real-time automated failure identification in the Control Center Complex (CCC) p 2272 N94-23892
Long term trending of engineering data for the Hubble Space Telescope p 2516 N94-23942
GenSAA: A tool for advancing satellite monitoring with graphical expert systems p 2516 N94-23945
System for Anomaly and Failure Detection (SAFD) system development
[NASA-CR-193907] p 2372 N94-24174
Application of fault detection techniques to spiral bevel gear fatigue data
[NASA-TM-106467] p 2364 N94-24483
The CEBAF beam loss sensors
[CEBAF-PR-93-032] p 2540 N94-24662
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194785] p 2389 N94-24856
Fault detection in HVAC systems using fuzzy models
[OUEL-1977/93] p 2373 N94-25475
FAULT TOLERANCE
Distributed Operating Systems and Mach. Proceedings of the Spring 1992 Graduate Seminar on Distributed Systems
[PB93-224905] p 2449 N94-23103
Towards the formal specification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191465] p 2466 N94-23252
Fault tolerant onboard packet switch architecture for communication satellites: Shared memory per beam approach
[NASA-TM-106397] p 2201 N94-23567

Operations concepts for Mars missions with multiple mobile spacecraft p 2501 N94-23852
Galileo spacecraft anomaly and safing recovery p 2207 N94-23864
Towards the formal verification of the requirements and design of a processor interface unit [NASA-CR-4522] p 2467 N94-24075
Towards the formal specification of the requirements and design of a processor interface unit [NASA-CR-4521] p 2467 N94-24463
Parametric uncertainty reduction in robust multivariable control [AD-A273412] p 2460 N94-24927
Future space transportation system architecture avionics requirements p 2162 N94-25098
Advanced Information Processing System (AIPS) p 2165 N94-25115
Design and implementation of a distributed version of the NASA Engine Performance Program [NASA-CR-194475] p 2462 N94-25179
Appendix A: Proposed statement of work, 1994 p 2272 N94-25194

FAULT TREES
An automated tool to facilitate code translation for software fault tree analysis [AD-A273205] p 2457 N94-24556

FEASIBILITY
Feasibility study of an automatic vehicle for planetary exploration p 2369 N94-23399

FEASIBILITY ANALYSIS
Precipitation measurement using SIR-C: A feasibility study [NASA-CR-195104] p 2409 N94-24048
VLCT-13: A commercial transport for the 21st Century [NASA-CR-195492] p 2181 N94-24803

FEEDBACK
Active probing of plasma edge turbulence and feedback studies on the Texas Experimental Tokamak (TEXT) [DE94-001017] p 2548 N94-22945
Data analysis and theoretical studies of the upper mesosphere and lower thermosphere [NASA-CR-195108] p 2402 N94-24089
A mixed map/variable structure observer for target tracking p 2157 N94-24263
The effects of optical feedback on polarization of vertical cavity surface emitting lasers [AD-A273728] p 2351 N94-25445

FEEDBACK CONTROL
Nonlinear state space H(sub infinity) control theory [MEMO-1119] p 2469 N94-22706
Feedback linearization of parametrized nonlinear time-varying systems [MEMO-1126] p 2470 N94-22714
A CDMA synchronisation scheme p 2285 N94-22810
Microstrip monopulse antenna for land mobile communications p 2289 N94-22833
Link monitor and control operator assistant: A prototype demonstrating semiautomated monitor and control p 2292 N94-23267
Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction [NASA-CR-189645] p 2525 N94-23698
The effects of spatially displaced visual feedback on remote manipulator performance p 2436 N94-24201
Discrete-time H(infinity) control problem with strictly proper measurement feedback [NASA-CR-195089] p 2473 N94-24542
Robust stability of second-order systems [NASA-CR-195175] p 2488 N94-24564
Autonomous Space Processor for Orbital Debris (ASPOD) [NASA-CR-195521] p 2204 N94-24621
Design of central control system for Large Helical Device (LHD) [NIFS-258] p 2553 N94-24623
Controlled invariance of nonlinear systems: Nonexact forms speak louder than exact forms [PB93-237790] p 2475 N94-24755
Genericity of stabilizability for time-delay systems [PB93-237725] p 2475 N94-24762
Preliminary results on time-varying feedback stabilization of a nonholonomic car-like mobile robot [INRIA-RR-1512] p 2475 N94-24963
High speed electronic analog computers using low-gain amplifiers [AD-D015974] p 2446 N94-25034
Active control of oscillatory lift forces on a circular cylinder [AD-A273243] p 2338 N94-25140
Feedback control laws for highly maneuverable aircraft [NASA-CR-195195] p 2190 N94-25176
Stability questions in predictive control [OUEL-1970/93] p 2477 N94-25469

FEEDFORWARD CONTROL
Beam-waveguide antenna servo design issues for tracking low earth-orbiting satellites p 2292 N94-23268
Evolving neural network connectivity [AD-A273134] p 2490 N94-24921
Development of programmable artificial neural networks p 2477 N94-25370

FELDSPARS
Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component p 2615 N94-24370

FEMALES
Women scientists and engineers employed in industry: Why so few? A report based on a conference [ISBN-0-309-04991-1] p 2585 N94-24698

FERMI SURFACES
Spin-polaron theory of high-T(c) superconductivity. 2: Electronic structure of the CuO2 planes [DE93-019197] p 2556 N94-22919
The de Haas-van Alphen measurements in Ba(0.6)K(0.4)BiO3 [DE93-041169] p 2556 N94-22920
A valence-fluctuation theory of cuprate superconductivity [DE94-000887] p 2558 N94-22942

FERMI-DIRAC STATISTICS
Conductors with small Fermi energies and small gap energies [DE93-040887] p 2561 N94-23432

FERMIONS
Interplay of magnetic and superconducting heavy fermion ground states [DE94-000680] p 2240 N94-23003

FERRITES
Integrated hydrometallurgical jarosite treatment [PB93-217990] p 2232 N94-22983

FERROELECTRICITY
Ferroelectric thin films 3 [AD-A273394] p 2565 N94-25027

FERROMAGNETIC MATERIALS
Review of a variational method applied to magnetoelastic buckling problems [PB94-111184] p 2562 N94-23769
Compact free electron lasers for medical applications [AD-A273609] p 2350 N94-24934
Magnetic properties of NdCo3 and its gamma phase hydride NdCo3H(4.1) [REPT-A-2655] p 2567 N94-25412

FERROMAGNETISM
Review of a variational method applied to magnetoelastic buckling problems [PB94-111184] p 2562 N94-23769
Spin fluctuations in an ordered Heisenberg ferromagnet with dipolar interactions [PB93-204493] p 2524 N94-24533

FIBER COMPOSITES
Creep deformation characteristics of ductile discontinuous fiber reinforced composites [DE94-000697] p 2227 N94-23005
Development of silicon nitride composites with continuous fiber reinforcement [DE94-001996] p 2227 N94-23022
High surface area, low weight composite nickel fiber electrodes p 2391 N94-23351
Composite material impregnation unit [NASA-TM-107751] p 2254 N94-23486
Selection of polymer binders and fabrication of SiC fiber-reinforced reaction-bonded silicon nitride matrix composites [NASA-CR-194874] p 2255 N94-24223
Micromechanical characterization of ceramic-matrix composites using the instrumented microindentation technique p 2256 N94-24233
Role of interfaces on the cyclic fatigue behaviour of ceramic matrix composites p 2256 N94-24234
Structural design criteria for filament-wound composite shells [NASA-CR-195125] p 2229 N94-24402
Crashworthiness analysis using advanced material models in DYNA3D [DE94-002988] p 2229 N94-24632
Fire-resistant barriers for composite materials [AD-D016014] p 2230 N94-24735
Test methods for composites: A status report. Volume 2: Compression test methods [AD-A273522] p 2230 N94-24779
Test methods for composites: A status report. Volume 1: Tension test methods [AD-A273501] p 2230 N94-24942
Test methods for composites: A status report. Volume 3: Shear test methods [AD-A273561] p 2230 N94-25163
Alternatives for reinforcement: Fiber composites [VTT-TIED-1412] p 2230 N94-25386

FIBER OPTICS
Thermoelectric cooled, purge-and-trap device for enhancing the utility of fiber optic VOC sensors [DE94-001772] p 2541 N94-22722
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1 [AD-A271081] p 2348 N94-23123
NASA/ASEE Summer Faculty Fellowship Program [NASA-CR-194678] p 2571 N94-23230
Wide band fiber-optic communications p 2304 N94-23231
Switch configuration for migration to optical fiber network p 2447 N94-23250
Laser light scattering instrument advanced technology development [NASA-CR-194803] p 2349 N94-23286
Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor [DE94-000331] p 2543 N94-23461
A lower bound for routing on a completely connected optical communication parallel computer [DE93-040752] p 2466 N94-23491
Intelligent Material Systems and Structures (IMSS). Part 5: Fiber optic registration of deformation in carbon laminates 91/92 [PB93-204600] p 2544 N94-23723
Measuring electrically charged particle fluxes in space using a fiber optic loop sensor [NASA-CR-191328] p 2544 N94-23829
Optimization of microscopic and macroscopic second order optical nonlinearities p 2226 N94-24354
Fiber optical angular sensor: Literature study and experimental results [PB93-204345] p 2545 N94-24529
Total light loss optic spectroscopy: Progress towards a fiber optic Raman organic vapor sensor [DE94-002545] p 2234 N94-24549
Method and apparatus for the non-invasive measurement of pressure inside pipes using a fiber optic interferometer sensor [AD-D016013] p 2344 N94-24734
Layered parallel interface for an active antenna array [AD-D016002] p 2301 N94-25045
System for cancelling phase noise in an interferometric fiber optic sensor arrangement [AD-D015994] p 2345 N94-25053
Highly-reliable fly-by-light/power-by-wire technology p 2162 N94-25099
Wide bandwidth differential amplifier [AD-D015985] p 2303 N94-25217

FIBER STRENGTH
Test methods for composites: A status report. Volume 2: Compression test methods [AD-A273522] p 2230 N94-24779

FIELD COILS
Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD [DE94-001565] p 2552 N94-24504

FIELD EFFECT TRANSISTORS
Microwave analog frequency dividers: Design, modeling and realization [LAAS-93139] p 2307 N94-22909
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers [DE94-002293] p 2350 N94-24659
The 5th Engineering Foundation Conference: Advanced Heterostructure Transistors [AD-A273508] p 2312 N94-24819

FIELD EMISSION
Field emitter array memory device [AD-D016015] p 2311 N94-24736

FIELD OF VIEW
Night vision devices and characteristics p 2432 N94-23982

FIELD STRENGTH
Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS p 2283 N94-22795

FIELD THEORY (ALGEBRA)
Off-critical W(infinity) and Virasoro algebras as dynamical symmetries of the integrable models [DE93-633215] p 2478 N94-22969
Applications of supersymmetric quantum mechanics [ETN-94-95385] p 2570 N94-25257

FIELD THEORY (PHYSICS)
On spontaneous symmetry breaking mechanism in light-front quantized field theory [DE93-633211] p 2568 N94-22968
Coadjoint orbits and conformal field theory [DE94-002285] p 2523 N94-24658
Super Beltrami differentials and N equal to 4 superconformal anomalies [DE93-613047] p 2491 N94-25166
Cosmic wake fields [DE93-616849] p 2604 N94-25215

Phase structure of the two-dimensional phi(4) field theory within thermo-field dynamics
[DE93-616850] p 2570 N94-25337

FIGHTER AIRCRAFT
Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18)
p 2424 N94-23320
Advanced Capability Exhaust Systems/Integrated Product Development for advanced nozzles (ACES/IPD)
[AD-A273209] p 2189 N94-24776
Sabot high speed interceptor AE 4273 aircraft design
[NASA-CR-195495] p 2183 N94-24971
Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108
Birdstrike resistant crew enclosure program
[AD-A273700] p 2463 N94-25453

FILAMENT WINDING
Structural design criteria for filament-wound composite shells
[NASA-CR-195125] p 2229 N94-24402
Impact damage in filament wound composite bottles
p 2231 N94-24421

FILE MAINTENANCE (COMPUTERS)
Using the SPICE system to help plan and interpret space science observations p 2517 N94-23950
From requirements to acceptance tests
p 2464 N94-23962

FILM COOLING
Heat transfer in rocket combustion chambers
p 2214 N94-23051

FILM THICKNESS
The measurement of the film thickness and the roughness deformation of lubricated elastomers
[ETN-94-95293] p 2261 N94-25078

FILTRATION
Investigation of the ultrafiltration technique using military greases
[AD-A273633] p 2261 N94-25029

FINANCE
Engineering for profitability
[PNR-90990] p 2595 N94-23580

FINANCIAL MANAGEMENT
Strategies in transition p 2498 N94-23833

FINE STRUCTURE
Applications of x ray absorption fine structure to the in situ study of the effect of cobalt in nickel hydrous oxide electrodes for fuel cells and rechargeable batteries
p 2391 N94-23347
Center for advanced electrical and structural polymers
[AD-A273415] p 2259 N94-24783
Intramultiplet mixing for Ne(**)(3p)+He at superthermal energies
[ETN-94-95327] p 2538 N94-25240

FINES
Data analysis and interpretation of lunar dust exosphere p 2623 N94-25349

FINGERS
Fingered bola body, bola with same, and methods of use
[NASA-CASE-MSC-21967-1] p 2354 N94-23822

FINITE DIFFERENCE THEORY
Isolated and coupled superquadric loop antennas for mobile communications applications
p 2289 N94-22834
Field models: Their present and future application in fire safety engineering
[PB93-201622] p 2269 N94-23506
A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670
The Sixth Copper Mountain Conference on Multigrid Methods, part 1
[NASA-CP-3224-PT-1] p 2482 N94-23673
Application of multigrid methods to the solution of liquid crystal equations on a SIMD computer
p 2484 N94-23686
Efficient interpolation of velocity and flux components defined on 2- and 3-dimensional non-cartesian grids
[PB94-118619] p 2486 N94-23757
On the dynamics of some grid adaption schemes
[NASA-CR-195092] p 2454 N94-24110
On the dynamics of approximating schemes for dissipative nonlinear equations p 2332 N94-24168
Balanced truncation is Hankel-norm optimal when used to approximate a finite-difference model of a parabolic PDE
[OUEL-1921/92] p 2492 N94-25324

FINITE ELEMENT METHOD
Texture gradient effects in tantalum
[DE94-000689] p 2240 N94-23021
A numerical analysis of crack propagation in microcracking ceramic and ceramic composites
[DE94-001192] p 2253 N94-23183
Continuum representations of cellular solids
[DE94-001706] p 2375 N94-23217
Out of plane gradients in laminated composites
[NASA-CR-194875] p 2228 N94-23566
Comparison of numerical simulation and experimental data for steam-in-place sterilization
p 2326 N94-23669
A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670
The Sixth Copper Mountain Conference on Multigrid Methods, part 1
[NASA-CP-3224-PT-1] p 2482 N94-23673
A multigrid solver for the semiconductor equations
p 2482 N94-23674
Vectorization and parallelization of the finite strip method for dynamic Mindlin plate problems
p 2483 N94-23679
Domain decomposition methods for nonconforming finite element spaces of Lagrange-type
p 2483 N94-23680
A nonconforming multigrid method using conforming subspaces p 2485 N94-23695
Compatibility relations and the finite-element formulation of electromagnetic field problems
[PB94-110996] p 2294 N94-23727
Study of a local absorbing boundary condition for the modeling of an infinite external domain in the time-domain finite-element package FEMAXT
[PB94-111002] p 2294 N94-23728
FEMAX finite-element package for computing three-dimensional time-domain electromagnetic fields in inhomogeneous media
[PB94-111093] p 2294 N94-23733
Analysis of local delaminations caused by angle ply matrix cracks
[NASA-TM-109052] p 2228 N94-24083
On the dynamics of approximating schemes for dissipative nonlinear equations p 2332 N94-24168
Modal test of the Brazilian satellite launcher (VLS) configuration burn-out of the first stage
p 2156 N94-24257
Modeling dynamically coupled fluid-duct systems with finite line elements
[NASA-CR-193909] p 2376 N94-24359
Structural design criteria for filament-wound composite shells
[NASA-CR-195125] p 2229 N94-24402
Finite element based electric motor design optimization p 2315 N94-24411
J-integral patch for finite element analysis of dynamic fracture due to impact of pressure vessels
p 2381 N94-24429
Evaluation of advanced materials through experimental mechanics and modelling p 2374 N94-24454
Hydro-elastic analysis using a selection of commercial analysis programs
[PB94-118734] p 2376 N94-24478
Studies on the implementation of normals and curvatures. Part 1: The first or mean curvature
[DE94-001546] p 2488 N94-24503
Edge elements, their advantages and disadvantages
[PB94-111069] p 2298 N94-24593
Finite-element modelling of three-dimensional electromagnetic fields using edge and nodal elements
[PB94-111077] p 2298 N94-24597
Crashworthiness analysis using advanced material models in DYNA3D
[DE94-002988] p 2229 N94-24632
Finite-element method for computing three-dimensional electromagnetic fields in inhomogeneous media (1993)
[PB94-111101] p 2298 N94-24637
Solution of the discretized incompressible Navier-Stokes equations with iterative methods
[PB94-118635] p 2335 N94-24641
Influence of backup bearings and support structure dynamics on the behavior of rotors with active supports
[NASA-CR-195106] p 2365 N94-24751
Dynamic analysis of pretwisted elastically-coupled rotor blades
[NASA-TM-109070] p 2378 N94-24839
A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 1: Model development and applications
[NASA-CR-193916] p 2366 N94-24998
A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 2: User's guide
[NASA-CR-193917] p 2366 N94-24999
FRANC2D: A two-dimensional crack propagation simulator. Version 2.7: User's guide
[NASA-CR-4572] p 2246 N94-25118
Three-dimensional, inelastic response of single-edge notch bend specimens subjected to impact loading
[AD-A273302] p 2378 N94-25143
NASA/Army rotorcraft transmission research, a review of recent significant accomplishments
[NASA-TM-106508] p 2367 N94-25181
Loading, electromyograph, and motion during exercise
p 2427 N94-25380
An adaptive streamline diffusion finite element method for hyperbolic systems in gas dynamics
[PREPRINT-688] p 2340 N94-25466

FINITE VOLUME METHOD
Local grid refinement method for the euler equations
[PB93-223329] p 2317 N94-22985
Locally modified Bott-scheme for highly convective flows
[MPIM-99] p 2400 N94-23157
An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554
Solution of the discretized incompressible Navier-Stokes equations with iterative methods
[PB94-118635] p 2335 N94-24641

FINNED BODIES
Study of transient behavior of finned coil heat exchangers p 2321 N94-23642

FINS
Solution of mixed convection heat transfer from isothermal in-line fins p 2321 N94-23644
Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle
[NASA-TM-4533] p 2170 N94-24716

FIR FILTERS
Adaptive noise cancellation using recurrent radial basis function networks
[RR-472] p 2313 N94-25319

FIRE DAMAGE
Initial evaluation of burn characteristics of phenolic foam runway brake arrestor material
[DOT/FAA/CT-TN93/7] p 2253 N94-23335

FIRE EXTINGUISHERS
Extinguishment of enclosed gas fires with water sprays
[PB93-201663] p 2268 N94-23430
Extinguishment of combustible porous solids by water droplets
[PB93-198893] p 2270 N94-23740
Dispersion of fire suppression agents discharged from high pressure vessels: Establishing initial/boundary conditions for the flow outside the vessel
[PB94-103660] p 2172 N94-23810

FIRE FIGHTING
Extinguishment of enclosed gas fires with water sprays
[PB93-201663] p 2268 N94-23430

FIRE PREVENTION
Fire safety engineering research in Norway
[PB93-201630] p 2268 N94-23429
Extinguishment of enclosed gas fires with water sprays
[PB93-201663] p 2268 N94-23430
Impacts: NIST Building and Fire Research Laboratory (technical and societal)
[PB94-113420] p 2270 N94-23737
Dispersion of fire suppression agents discharged from high pressure vessels: Establishing initial/boundary conditions for the flow outside the vessel
[PB94-103660] p 2172 N94-23810
Full-scale fire testing of seat component materials
[AD-A273499] p 2174 N94-24941
Collaborating with our customers: NIST building and fire research laboratory
[PB94-110194] p 2272 N94-24955

FIREBALLS
Neutron star mergers and gamma-ray bursts
[NASA-CR-195176] p 2629 N94-25091

FIRES
Development and experimental validation of computational methods to simulate abnormal thermal and structural environments
[DE94-000554] p 2268 N94-23000
Fire safety engineering research in Norway
[PB93-201630] p 2268 N94-23429
Extinguishment of enclosed gas fires with water sprays
[PB93-201663] p 2268 N94-23430
The ignition temperature of solid explosives exposed to a fire
[DE94-001047] p 2265 N94-23436
Field models: Their present and future application in fire safety engineering
[PB93-201622] p 2269 N94-23506
Zone fire modeling with natural building flows and a zero order shaft model
[PB94-112166] p 2270 N94-23735
Impacts: NIST Building and Fire Research Laboratory (technical and societal)
[PB94-113420] p 2270 N94-23737
Full-scale fire testing of seat component materials
[AD-A273499] p 2174 N94-24941

FITTING
A multigrid solver for the semiconductor equations
p 2482 N94-23674

FIXED POINTS (MATHEMATICS)
Fixed points and shift cycles in cellular automata [RR-459] p 2492 N94-25309
FIXED WINGS
Three dimensional study of an airplane wing and its wake in the subsonic regime [ISBN-0-315-58963-9] p 2168 N94-24178
FLAME PROPAGATION
Mechanism and enhancement of flame stabilization [DE94-002181] p 2232 N94-23023
Flame trench analysis of NLS vehicles p 2199 N94-23249
Initial evaluation of burn characteristics of phenolic foam runway brake arrestor material [DOT/FAA/CT-TN93/7] p 2253 N94-23335
Fire safety engineering research in Norway [PB93-201630] p 2268 N94-23429
Calculation of flame spread on lining materials by the field model KAMELEON. Project 5 of the EUREFIC fire research programme [PB93-201614] p 2268 N94-23450
Field models: Their present and future application in fire safety engineering [PB93-201622] p 2269 N94-23506
Extinguishment of combustible porous solids by water droplets [PB93-198893] p 2270 N94-23740
Burning rate of double-base propellant in the presence of plasma p 2155 N94-24252
Transient phenomena in laminar spray combustion p 2160 N94-24282
Study of streamwise vorticity-stirred combustion [NASA-CR-194450] p 2234 N94-24565
FLAME RETARDANTS
Initial evaluation of burn characteristics of phenolic foam runway brake arrestor material [DOT/FAA/CT-TN93/7] p 2253 N94-23335
Extinguishment of combustible porous solids by water droplets [PB93-198893] p 2270 N94-23740
Fire-resistant barriers for composite materials [AD-D016014] p 2230 N94-24735
The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics [AD-A273164] p 2262 N94-25136
FLAME STABILITY
Mechanism and enhancement of flame stabilization [DE94-002181] p 2232 N94-23023
Flames in dusty mixtures: Their structure and stability [NASA-CR-191567] p 2317 N94-23089
Transient phenomena in laminar spray combustion p 2160 N94-24282
Modelling of premixed laminar flames [ETN-94-95317] p 2236 N94-25284
FLAME TEMPERATURE
Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion [PB94-109873] p 2187 N94-23709
FLAMES
Flames in dusty mixtures: Their structure and stability [NASA-CR-191567] p 2317 N94-23089
Numerical solution of flame sheet problems with and without multigrid methods p 2237 N94-23683
A transport equation for the scalar dissipation in reacting flows with variable density: First results p 2331 N94-24157
FLAMMABILITY
Initial evaluation of burn characteristics of phenolic foam runway brake arrestor material [DOT/FAA/CT-TN93/7] p 2253 N94-23335
Calculation of flame spread on lining materials by the field model KAMELEON. Project 5 of the EUREFIC fire research programme [PB93-201614] p 2268 N94-23450
Impacts: NIST Building and Fire Research Laboratory (technical and societal) [PB94-113420] p 2270 N94-23737
Full-scale fire testing of seat component materials [AD-A273499] p 2174 N94-24941
The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics [AD-A273164] p 2262 N94-25136
FLAPPING
Lift augmentation on a delta wing via leading edge fences and the Gurney flap [NASA-CR-194793] p 2168 N94-24103
Reduction of structural loads using maneuver load control on the Advanced Fighter Technology Integration (AFTI)/F-111 mission adaptive wing [NASA-TM-4526] p 2166 N94-24295
FLASHING (VAPORIZING)
An extended laser flash technique for thermal diffusivity measurement of high-temperature materials p 2238 N94-25132
Microwave techniques for physical property measurements p 2238 N94-25134
FLAT PLATES
Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055
Multigrid methods for a semilinear PDE in the theory of pseudoplastic fluids p 2341 N94-23689
Relationship between transition and modes of instability in supersonic boundary layers [NASA-CR-4562] p 2336 N94-24725
FLATTENING
Linear algorithm for flattening list graphs [PB93-220648] p 2448 N94-23097
FLAVOR (PARTICLE PHYSICS)
Flavor changing strings and domain walls [DE93-633217] p 2532 N94-22970
Heavy flavour physics at LEP [NIKHEF-H/92-19] p 2539 N94-25465
FLEXIBILITY
Modelling the Shuttle Remote Manipulator System: Another flexible model p 2371 N94-25350
FLEXIBLE BODIES
Ulysses log 1992 p 2502 N94-23863
The Columbus solar array mechanisms p 2356 N94-23994
FLEXIBLE SPACECRAFT
Operating the Daisy facility to perform control experiments [ISBN-0-315-83554-0] p 2196 N94-22889
Real-time dynamics and control strategies for space operations of flexible structures [NASA-CR-194794] p 2203 N94-23618
Space Station flexible dynamics under plume impingement p 2208 N94-25383
Modeling of a large undamped space structure using time domain techniques [AD-A273828] p 2206 N94-25523
FLEXING
Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281
FLIGHT CHARACTERISTICS
Identification of integrated airframe: Propulsion effects on an F-15 aircraft for application to drag minimization [NASA-TM-4532] p 2188 N94-24106
Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 2: Maneuver descriptions and section guide [AD-A273685] p 2185 N94-25440
FLIGHT CLOTHING
Physiological protection for aircrew at high altitudes: A review of the literature [DCIEM-93-13] p 2432 N94-24114
Operation Friction: Development and introduction of personal cooling for CH124 Sea King aircrew [DCIEM-93-06] p 2433 N94-24119
FLIGHT CONDITIONS
Identification of integrated airframe: Propulsion effects on an F-15 aircraft for application to drag minimization [NASA-TM-4532] p 2188 N94-24106
Aviation Weather Program (AWP) p 2411 N94-24380
FLIGHT CONTROL
Commonality of flight control systems for support of European telecommunications missions p 2304 N94-23834
Magellan spacecraft and memory state tracking: Lessons learned, future thoughts p 2207 N94-23865
A real-time navigation monitoring expert system for the Space Shuttle Mission Control Center p 2202 N94-23921
Cockpit control system conceptual design [NASA-CR-195543] p 2190 N94-24551
Pilot-vehicle interface handbook, chapter 19. Volume 2: Digital systems validation [DOT/FAA/CT-88/10-VOL-2] p 2438 N94-24830
Cockpit control system [NASA-CR-195488] p 2190 N94-24957
Aircraft digital flight control technical review p 2163 N94-25106
Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108
Flight controller design using mixed H2/H infinity optimization with a singular H infinity constraint [AD-A273831] p 2191 N94-25525
FLIGHT CREWS
Echocardiographic screening of aircrew candidates p 2424 N94-23319
Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18) p 2424 N94-23320
Left ventricular hypertrophy and athlete's heart p 2424 N94-23321
Aortic valve disease p 2424 N94-23322
Aeromedical implications of mitral valve prolapse p 2424 N94-23323
Asthma in aircrew p 2425 N94-23327
Arterial hypertension and the aviator p 2425 N94-23328
Perception in flight: Shape and motion perception, space perception, spatial orientation, and visual vestibular interaction p 2429 N94-23979
New Advances in Mission Planning and Rehearsal Systems [AGARD-LS-192] p 2521 N94-25008
Human factors of mission planning systems: Theory and concepts p 2521 N94-25010
Human factors of mission planning systems: Applications and implementation p 2522 N94-25011
Ground based mission planning systems p 2522 N94-25014
Mission rehearsal in the SOF-ATS program p 2522 N94-25016
Birdstrike resistant crew enclosure program [AD-A273700] p 2463 N94-25453
Image processing for flight crew enhanced situation awareness p 2442 N94-25508
FLIGHT ENVELOPES
S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270
Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108
FLIGHT HAZARDS
Close-up analysis of inflight ice accretion [NASA-TM-106457] p 2172 N94-23523
Perception in flight: Shape and motion perception, space perception, spatial orientation, and visual vestibular interaction p 2429 N94-23979
Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993 [PB93-410407] p 2173 N94-24062
Aviation Weather Program (AWP) p 2411 N94-24380
FLIGHT INSTRUMENTS
Pilot-vehicle interface [DOT/FAA/CT-92/21] p 2430 N94-23083
Distributed science operations for JPL planetary missions p 2500 N94-23850
Evaluation of the UH-1N instrument panel [AD-A273145] p 2186 N94-24774
FLIGHT MANAGEMENT SYSTEMS
Mission operations and command assurance: Instilling quality into flight operations p 2374 N94-23932
Appendix A: Proposed statement of work, 1994 p 2272 N94-25194
FLIGHT MECHANICS
The influence of elastic pitch variations on helicopter flight mechanics p 2161 N94-24286
FLIGHT OPERATIONS
OASIS-CC presentation p 2385 N94-23613
Radioastron flight operations p 2502 N94-23861
A MOS for all seasons p 2505 N94-23879
An operations concept methodology to achieve low-cost mission operations p 2505 N94-23880
Object-oriented technologies in a multi-mission data system p 2506 N94-23885
The FOT tool kit concept p 2507 N94-23889
GSMS and space views: Advanced spacecraft monitoring tools p 2507 N94-23890
The application of total quality management principles to spacecraft mission operations p 2374 N94-23931
Mission operations and command assurance: Instilling quality into flight operations p 2374 N94-23932
Operational training for the mission operations at the Brazilian National Institute for Space Research (INPE) p 2429 N94-23933
Security aspects of space operations data p 2515 N94-23937
Using SFOC to fly the Magellan Venus mapping mission p 2516 N94-23941
Expert diagnostics system as a part of analysis software for power mission operations p 2516 N94-23944
The evolving trend in spacecraft health analysis p 2202 N94-23946
An engineering database management system for spacecraft operations p 2517 N94-23951
Multimission image processing and science data visualization p 2518 N94-23955
Engineering workstation: Sensor modeling p 2441 N94-25500
FLIGHT PATHS
Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505
FLIGHT PLANS
Aviation Weather Program (AWP) p 2411 N94-24380
In flight mission planning in the Copilote Electronique p 2522 N94-25015
FLIGHT SAFETY
Canadian aeronautical mobile data trials p 2279 N94-22773

Cockpit weather graphics using mobile satellite communications p 2280 N94-22775

Aircraft accident report: Inadvertent in-flight slat deployment, China Eastern Airlines Flight 583, McDonnell Douglas MD-11, B-2171, 950 nautical miles south of Shemya, Alaska, 6 April 1993
[PB93-910408] p 2172 N94-23579

An analytic study of a two-phase laminar airfoil in simulated heavy rain p 2171 N94-23661

Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993
[PB93-410407] p 2173 N94-24062

Aircraft flight safety: A bibliography
[AGARD-R-805] p 2173 N94-24091

Aviation Weather Program (AWP)
p 2411 N94-24380

A numerical study of airplanes flying in proximity
[AD-A273373] p 2173 N94-24718

Projected effectiveness of airbag supplemental restraint systems in US Army helicopter cockpits
[AD-A273250] p 2174 N94-25141

Aircraft accident/incident summary report: Controlled flight into terrain GP Express Airlines, Inc., N115GP Beechcraft C-99, Shelton, Nebraska, 28 April 1993
[PB94-910401] p 2174 N94-25273

Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505

FLIGHT SIMULATION

Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt?
[NASA-CR-188256] p 2427 N94-24227

Pre-design study of a general purpose vehicle simulator platform
[PB93-215366] p 2193 N94-24739

Mission rehearsal in the SOF-ATS program
p 2522 N94-25016

Future directions in flight simulation: A user perspective p 2162 N94-25101

A simulation study of control and display requirements for zero-experience general aviation pilots
p 2163 N94-25102

FLIGHT SIMULATORS

Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt?
[NASA-CR-188256] p 2427 N94-24227

Pilot evaluation system p 2158 N94-24266

Pre-design study of a general purpose vehicle simulator platform
[PB93-215366] p 2193 N94-24739

Mission rehearsal in the SOF-ATS program
p 2522 N94-25016

Future directions in flight simulation: A user perspective p 2162 N94-25101

A simulation study of control and display requirements for zero-experience general aviation pilots
p 2163 N94-25102

FLIGHT STABILITY TESTS

Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100

FLIGHT SURGEONS

Cardiopulmonary Aspects in Aerospace Medicine
[AGARD-LS-189] p 2423 N94-23313

Cardiovascular and pulmonary disease in NATO aircrew: An overview p 2423 N94-23314

Aeromedical disposition of Arrhythmias and electrocardiographic findings in aircrew
p 2423 N94-23318

FLIGHT TESTS

Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100

Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268

Reduction of structural loads using maneuver load control on the Advanced Fighter Technology Integration (AFTI)/F-111 mission adaptive wing
[NASA-TM-4526] p 2168 N94-24295

Trends of design methodology of airframe
p 2179 N94-24327

Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field
[NASA-CR-191490] p 2344 N94-24360

Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data
[NASA-CR-194838] p 2190 N94-24804

Development of high-angle-of-attack nose-down pitch control margin design guidelines for combat aircraft
p 2164 N94-25107

X-31 aerodynamic characteristics determined from flight data p 2164 N94-25109

Aircraft accident/incident summary report: Controlled flight into terrain GP Express Airlines, Inc., N115GP Beechcraft C-99, Shelton, Nebraska, 28 April 1993
[PB94-910401] p 2174 N94-25273

Aircraft maneuvers for the evaluation of flying qualities and agility. Volume 2: Maneuver descriptions and section guide
[AD-A273685] p 2185 N94-25440

Synthetic vision system flight test results and lessons learned p 2429 N94-25492

FLIGHT TIME

General aviation activity survey
[AD-A273284] p 2162 N94-24923

FLIGHT TRAINING

Pilot evaluation system p 2158 N94-24266

Mission rehearsal in the SOF-ATS program
p 2522 N94-25016

FLIR DETECTORS

Infrared sensors and systems for enhanced vision/autonomous landing applications
p 2439 N94-25491

FLOATING

Survival suit for submarine personnel: Summary of evaluation studies
[PB93-204634] p 2430 N94-23743

FLOODS

Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop
[PB93-220135] p 2407 N94-23129

FLOORS

A study of the core module simulator floor capability
p 2380 N94-24418

FLOW CHARACTERISTICS

CFD analyses of coolant channel flowfields
p 2214 N94-23050

Heat transfer in rocket combustion chambers
p 2214 N94-23051

Polyimide processing additives
[NASA-CASE-LAR-13669-2] p 2252 N94-23079

Analysis of high vacuum systems using SINDA'85
p 2322 N94-23648

Mixing and unmixedness in plasma jets 1: Near-field analysis p 2323 N94-23655

Supersonic minimum length nozzle design for dense gases p 2171 N94-23656

Toward large eddy simulation of turbulent flow over an airfoil p 2172 N94-24150

Aerodynamic characteristics and pressure distributions for an executive-jet baseline airfoil section
[NASA-TM-4529] p 2169 N94-24586

FLOW DISTORTION

Local isotropy in distorted turbulent boundary layers at high Reynolds number p 2332 N94-24166

FLOW DISTRIBUTION

Small rocket flowfield diagnostic chambers
p 2210 N94-23030

Laser diagnostics for small rockets
p 2210 N94-23032

CFD analyses of combustor and nozzle flowfields
p 2210 N94-23033

An experimental study of characteristic combustion-driven flows for CFD validation
p 2212 N94-23040

Numerical investigation of two- and three-dimensional heat transfer in expander cycle engines
p 2213 N94-23048

CFD analyses of coolant channel flowfields
p 2214 N94-23050

Heat transfer in rocket combustion chambers
p 2214 N94-23051

Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055

Computation of propulsion-related flowfields using unstructured adaptive meshes p 2215 N94-23056

Dual-bell altitude compensating nozzles
p 2215 N94-23057

An experimental study of the flow field surrounding a subsonic jet in a cross flow
[NASA-CR-194770] p 2317 N94-23072

Flow quality studies of the NASA Lewis Research Center Icing Research Tunnel diffuser
[NASA-TM-106311] p 2192 N94-23091

A new experimental apparatus for the study of the unsteady flowfield over an airfoil in pitching and heaving motions using laser Doppler anemometry
[ISL-CO-229/92] p 2165 N94-23149

LDA measurements of the unsteady near wake behind an airfoil undergoing transient and periodic pitching motions
[ISL-CO-215/92] p 2165 N94-23161

Atmospheric flow in heterogeneous vegetated regions
[W-9303] p 2401 N94-23175

Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator
[NASA-TM-106468] p 2166 N94-23465

The 3-D CFD modeling of gas turbine combustor-integral bleed flow interaction p 2189 N94-23658

Numerical analysis of a vortex controlled diffuser
p 2324 N94-23659

The 3-D numerical study of airflow in the compressor/combustor prediffuser and dump diffuser of an industrial gas turbine p 2324 N94-23660

A multilevel adaptive projection method for unsteady incompressible flow p 2341 N94-23690

Estimation of delays and emissions at four-way junctions with different forms of regulation, principally four-way mandatory stop
[PB94-105236] p 2398 N94-23813

Toward large eddy simulation of turbulent flow over an airfoil p 2172 N94-24150

A large eddy simulation scheme for turbulent reacting flows p 2330 N94-24154

A transport equation for the scalar dissipation in reacting flows with variable density: First results
p 2331 N94-24157

On streak spacing in wall-bounded turbulent flows
p 2331 N94-24159

Ethylene trace-gas techniques for high-speed flows
[NASA-TM-106491] p 2169 N94-24335

The radiated noise from isotropic turbulence revisited
[NASA-CR-191547] p 2333 N94-24356

Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field
[NASA-CR-191490] p 2344 N94-24360

Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420

HYPULSE combustor analysis
[NASA-CR-191579] p 2336 N94-24771

Flow and temperature distribution in a naturally stratified thermal storage tank
[AD-A273511] p 2336 N94-24821

Thermophysical property sensitivity effects in steel solidification p 2246 N94-25122

Sub-sonic flow about a slender profile in a tunnel having perforated walls
[AD-A273184] p 2170 N94-25137

Hydrodynamics of stirred gas-liquid dispersions
[ETN-94-95368] p 2339 N94-25254

Study of the blade/vortex interaction: Acoustics, aerodynamics and models
[ISL-R-104/92] p 2340 N94-25463

FLOW EQUATIONS

Atmospheric flow in heterogeneous vegetated regions
[W-9303] p 2401 N94-23175

An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554

A dual reciprocal boundary element formulation for viscous flows p 2325 N94-23666

Numerical solution of flame sheet problems with and without multigrid methods p 2237 N94-23683

Energy and maximum norm estimates for nonlinear conservation laws
[NASA-CR-195091] p 2569 N94-24109

New features in Computational Fluid Dynamics (CFD) technology at the TASHAN Engineering Center at IAI
p 2155 N94-24249

Simulation of cryogenic turbopump annular seals
p 2371 N94-24440

Conservation equations for reacting gas flow
[PB94-111168] p 2334 N94-24574

FLOW GEOMETRY

Simplified, inverse, ejector design tool
[NASA-CR-194438] p 2166 N94-23511

Optimization of orifice geometry for cross-flow mixing in a cylindrical duct
[NASA-TM-106436] p 2481 N94-23593

The 3-D numerical study of airflow in the compressor/combustor prediffuser and dump diffuser of an industrial gas turbine p 2324 N94-23660

Multi-grid domain decomposition approach for solution of Navier-Stokes equations in primitive variable form
p 2341 N94-23693

FLOW MEASUREMENT

Measurement of kinematically unstationary separated flows p 2315 N94-22854

An experimental study of characteristic combustion-driven flows for CFD validation
p 2212 N94-23040

Probe shapes that measure time-averaged streamwise momentum and cross-stream turbulence intensity
[NASA-CASE-ARC-11934-1] p 2317 N94-23077

Flow quality studies of the NASA Lewis Research Center Icing Research Tunnel diffuser
[NASA-TM-106311] p 2192 N94-23091

Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator
[NASA-TM-106468] p 2166 N94-23465

On the determination of local instantaneous averages in particulate flow measurements p 2325 N94-23663
Vortical structure in a forced plane mixing layer p 2331 N94-24162
Joint Acoustic Propagation Experiment (JAPE-91) Workshop [NASA-CP-3231] p 2526 N94-24207
Measurement of the volume mass by spontaneous Raman scattering. Study of turbulent fluctuations of mixing in a subsonic free jet. Measurements in supersonic wind tunnels [ISL-R-102/92] p 2339 N94-25462

FLOW STABILITY
Performance assessment of low pressure nuclear thermal propulsion p 2217 N94-23070
An F2D analysis of the Flow Instability Test (FIT) experiment [DE94-001420] p 2217 N94-23193
Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160
Transition to turbulence in an elliptic vortex p 2331 N94-24161
Stability of hypersonic flow of a detonable gas mixture in the stagnation region of a blunt body and a forward facing step p 2154 N94-24248
Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis [NASA-CR-194795] p 2335 N94-24640
Analysis and characteristics of compressor stall precursor signals in forward and AFT swept high speed compressor [AD-A273620] p 2171 N94-25517

FLOW VELOCITY
Computational Fluid Dynamics (CFD) applications in rocket propulsion analysis and design p 2214 N94-23054
Two stage turbine for rockets p 2215 N94-23059
Interpretation of discrepancies in mass spectroscopy data obtained from different experimental configurations p 2237 N94-23245
Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator [NASA-TM-106468] p 2166 N94-23465
Studies of two phase flow [NASA-CR-195099] p 2267 N94-23594
On the determination of local instantaneous averages in particulate flow measurements p 2325 N94-23663

FLOW VISUALIZATION
Image processing for acquisition of fluid rest time in the running of an artificial heart valve p 2316 N94-22858
A photogrammetric solution to a particular problem [NASA-TP-3415] p 2381 N94-22961
Image analysis applications to mixing phenomena and turbulent dispersions [ECL-92-29] p 2317 N94-22971
Flow visualization study in high aspect ratio cooling channels for rocket engines p 2213 N94-23049
Experimental investigation of generic three-dimensional sidewall-compression scramjet inlets at Mach 6 in tetrafluoromethane [NASA-TM-4497] p 2319 N94-23339
Shock-induced turbulent flow in baffle systems [DE94-001532] p 2319 N94-23470
Leading-edge votex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques [NASA-TP-3374] p 2166 N94-23512
Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles [NASA-TM-106450] p 2167 N94-23592
Simulation of unsteady flows through stator and rotor blades of a gas turbine using the Chimera method p 2323 N94-23652
Stretch-induced quenching in flame-vortex interactions p 2237 N94-24156
Study of streamwise vorticity-stirred combustion [NASA-CR-194450] p 2234 N94-24565
Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis [NASA-CR-194795] p 2335 N94-24640
Interactive control in turbulent shear layers [AD-A273544] p 2336 N94-24793
Forces on an oscillating cylinder and related fluid flow phenomena [ISBN-9-09-005589-4] p 2338 N94-25243
High lift aerodynamics [NASA-CR-195183] p 2184 N94-25268

FLUE GASES
Reburning rich-lean kinetics [PB93-220887] p 2232 N94-23100
Flue gas cleaning by pulse corona streamer [EUT-93-E-272] p 2268 N94-23174

FLUENCE
Effect of irradiation on the stress corrosion cracking behavior of Alloy X-750 and Alloy 625 [DE94-001759] p 2244 N94-23792
Experimental characterization of the AFIT Neutron Facility [AD-A273822] p 2539 N94-25519

FLUID DYNAMICS
Activities report to NATO [ETN-94-95047] p 2318 N94-23227
Design of a surface deformation measuring instrument for the Surface Tension Driven Convection Experiment (STDCE-2) [NASA-CR-194758] p 2343 N94-23285
Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface [PB93-237691] p 2480 N94-23438
Modeling of PCG fluid dynamics: Salient results p 2224 N94-24345
Development and validation of RNG methodology for compressible turbulence [AD-A273469] p 2337 N94-24929
Center for Analysis of Heterogeneous and Nonlinear Media [AD-A273515] p 2230 N94-25158
Transient flows occurring during the accelerated crucible rotation technique [DE93-617049] p 2567 N94-25422
Automatic pressure control system for the Wright Laboratory Compressor Research Facility [AD-A273827] p 2194 N94-25522

FLUID FILLED SHELLS
Coupled frequencies of a hydroelastic rectangular system [LRT-WE-9-FB-4-1992] p 2375 N94-23196

FLUID FILMS
Foil bearing research at Penn State p 2215 N94-23058
A technique to measure rotordynamic coefficients in hydrostatic bearings p 2215 N94-23061
Thermohydrodynamic analysis of cryogenic liquid turbulent flow fluid film bearings [NASA-CR-194869] p 2363 N94-24081
Surface-induced static undulations in multilayer films of liquid-crystalline polymers [AD-A273517] p 2262 N94-25159

FLUID FLOW
Probe systems for measuring static pressure and turbulence intensity in fluid streams [NASA-CASE-ARC-11935-1] p 2319 N94-23306
Tracking sharp interface of two fluids by the CIP (Cubic-Interpolated Propagation) scheme [DE93-508322] p 2319 N94-23460
Numerical solution of flame sheet problems with and without multigrid methods p 2237 N94-23683
Numerical flow simulation for complete vehicle configurations [AD-A273588] p 2170 N94-24849
Electro-rheological control valve [AD-D015997] p 2367 N94-25055
The importance of properties in modeling p 2246 N94-25121
Forces on an oscillating cylinder and related fluid flow phenomena [ISBN-9-09-005589-4] p 2338 N94-25243
Transient flows occurring during the accelerated crucible rotation technique [DE93-617049] p 2567 N94-25422
Applications of the homogenization method to flow and transport in porous media [BER-9110] p 2340 N94-25467

FLUID JETS
Measurement of intact-core length of atomizing liquid jets by image deconvolution p 2210 N94-23029
Numerical parametric studies of spray combustion instability p 2212 N94-23041
Spray formation processes of impinging jet injectors p 2212 N94-23042
CFD assessment of orifice aspect ratio and mass flow ratio on jet mixing in rectangular ducts [NASA-TM-106434] p 2187 N94-24082

FLUID MECHANICS
Proceedings of Workshop on Laser Diagnostics in Fluid Mechanics and Combustion [AD-A272808] p 2347 N94-22914
Lewis Research Center R and D Facilities [NASA-TM-109400] p 2630 N94-23135
A method to simulate viscous diffusion of vorticity by convective transport of vortices at a non-solenoidal velocity [DE94-001777] p 2318 N94-23220
Tracking sharp interface of two fluids by the CIP (Cubic-Interpolated Propagation) scheme [DE93-508322] p 2319 N94-23460
The Fifth Annual Thermal and Fluids Analysis Workshop [NASA-CP-10122] p 2320 N94-23634

FLUID PRESSURE
Prediction of pressure drop in fluid tuned mounts using analytical and computational techniques p 2321 N94-23643

FLUORESCENCE
Literature study on: Remote Fraunhofer luminescence detection of algal bloom in marine environments [BCRS-92-25] p 2417 N94-23176
Monoclonal antibodies directed against surface molecules of multicell spheroids [NASA-CR-195102] p 2420 N94-23633
Infrared fluorescence studies of electronic-to-vibrational energy transfer in a Br2:NO system [AD-A273727] p 2539 N94-25443

FLUORIDES
Thermochemistry of the actinides [DE94-000895] p 2231 N94-22943

FLUORINE
A method to remove intercalates from bromine and iodine intercalated carbon fibers [NASA-TM-106443] p 2222 N94-23591
Structures of Cl(-)(H2O)(n) and F(-)(H2O)(n) (n equal to 2,3...15) clusters: Molecular dynamics computer simulations [AD-A273474] p 2537 N94-24940

FLUORO COMPOUNDS
Tribological behaviour of fluorinated resins and polyimide resins sliding over a metallic surface in liquid nitrogen p 2355 N94-23991

FLUOROCARBONS
Reactivity of ambident anions in the gas phase [PB93-232189] p 2533 N94-23713
The chemistry of particulate formation in fluorocarbon plasmas [DE94-001500] p 2552 N94-24546

FLUTTER
Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades [NASA-TM-108758] p 2182 N94-24953

FLUTTER ANALYSIS
Issac, Jason Cherian ses in transonic flow [NASA-CR-194837] p 2167 N94-24052

FLUX (RATE)
Solar neutrinos: Real-time experiments [ICRR-REPT-293-93-5] p 2627 N94-24962

FLUX DENSITY
Spatial and temporal variability of soil temperature, moisture and surface soil properties [NASA-CR-194109] p 2401 N94-23337
High power density proton exchange membrane fuel cells p 2393 N94-23359
High energy density aluminum-oxygen cell p 2393 N94-23363
A high performance H2-Cl2 fuel cell for space power applications p 2394 N94-23366
Research for electric energy systems [DE94-001839] p 2293 N94-23719

FLUX PINNING
Simulation of the vortex motion in the high T(c) superconductors [DE93-617138] p 2567 N94-25403

FLUX VECTOR SPLITTING
Upwind MacCormack Euler solver with non-equilibrium chemistry p 2326 N94-23672

FLY BY LIGHT CONTROL
Highly-reliable fly-by-light/power-by-wire technology p 2162 N94-25099

FOAMS
Initial evaluation of burn characteristics of phenolic foam runway brake arrestor material [DOT/FAA/CT-TN93/7] p 2253 N94-23335

FOCUSING
Reducing video frame rate increases remote optimal focus time [NASA-TM-104018] p 2431 N94-23970
An Earth observation telescope refocusing mechanism p 2359 N94-24014

FOG
Infrared sensors and systems for enhanced vision/autonomous landing applications p 2439 N94-25491

FOIL BEARINGS
Foil bearing research at Penn State p 2215 N94-23058
Foil bearings p 2371 N94-24415

FOKKER-PLANCK EQUATION
Derivation of the macroscopic rate equations for the driven diffusive Ising model at pair level of approximation [DE93-616839] p 2524 N94-25208
The anomalous transport caused by particles transverse drift [DE93-613685] p 2554 N94-25329

FOLDING STRUCTURES
Reliable redundant device for mechanisms p 2361 N94-24030

FOOD

Multigrid and cyclic reduction applied to the Helmholtz equation p 2304 N94-23676

FORCE DISTRIBUTION

Forces on an oscillating cylinder and related fluid flow phenomena [ISBN-9-09-005589-4] p 2338 N94-25243

FORCED VIBRATION

Forced vibrations of a non-viscous drop [MPIS-24/1992] p 2318 N94-23198

Identification of integrated airframe: Propulsion effects on an F-15 aircraft for application to drag minimization [NASA-TM-4532] p 2188 N94-24106

Mechanisms of droplet formation [ISBN-9-06-275765-0] p 2338 N94-25227

FORESTS

Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991 [PB93-230654] p 2386 N94-23755

Effect of land use change on the carbon cycle in Amazon soils [NASA-CR-195168] p 2399 N94-24853

Human impacts on soil carbon dynamics of deep-rooted Amazonian forests [NASA-CR-195127] p 2399 N94-24861

FORM FACTORS

Gauge invariance and the electromagnetic current of composite pions [DE93-040869] p 2532 N94-22952

A comparison of TSS and TRASYS in form factor calculation p 2321 N94-23638

New evaluation of hadronic contributions to the anomalous magnetic moment of charged leptons [DE93-634394] p 2536 N94-24844

FORMALDEHYDE

Design of novel catalysts for the partial oxidation of methane to methanol [PB94-114212] p 2235 N94-24920

FORMALISM

Towards the formal verification of the requirements and design of a processor interface unit [NASA-CR-4522] p 2467 N94-24075

FORTRAN

Dynamic data distributions in Vienna Fortran [NASA-CR-191575] p 2448 N94-23092

Programming in Fortran M [DE94-000541] p 2450 N94-23207

Transient Ejector Analysis (TEA) code user's guide [NASA-TM-106310] p 2186 N94-23466

FORWARD SCATTERING

Particle size measurement for the control of industrial crystallizers [PB94-119104] p 2562 N94-23766

FOSSIL FUELS

New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane [PB94-112786] p 2233 N94-23801

FOUR-WAVE MIXING

Spatiotemporal behavior and nonlinear dynamics in a phase conjugate resonator [NASA-CR-4567] p 2543 N94-23529

FOURIER ANALYSIS

On the asymptotically uniform distribution modulo 1 of extreme order statistics [MEMO-COSOR-91-38-REV] p 2493 N94-23142

FOURIER SERIES

On the Gibbs phenomenon 3: Recovering exponential accuracy in a sub-interval from a spectral partial sum of a piecewise analytic function [NASA-CR-191560] p 2480 N94-23278

Fast fourier transforms of piecewise constant functions [AD-A272648] p 2456 N94-24535

FOURIER TRANSFORMATION

Novel fringe scanning/Fourier transform method of synthetic imaging [DE93-018936] p 2542 N94-22917

Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination [PB93-224152] p 2559 N94-23109

Wavelet multiresolution analyses adapted for the fast solution of boundary value ordinary differential equations p 2485 N94-23691

Reactivity of ambident anions in the gas phase [PB93-232189] p 2533 N94-23713

FOVEA

Evaluation of visual acuity with Gen 3 night vision goggles [NASA-TM-108792] p 2431 N94-23974

Image remapping strategies applied as protheses for the visually impaired p 2444 N94-25363

FRACTALS

Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data [DE94-001575] p 2550 N94-23211

On the estimation of the correlation dimension and its application to radar reflector discrimination [NASA-CR-4564] p 2309 N94-23304

Fractal geometry in physics [AD-A273271] p 2523 N94-24936

Behavior of the intermittency exponents and a quark-gluon plasma formation in the heavy ion collisions [DE93-616869] p 2541 N94-25342

FRACTIONATION

Auto-metasomatism of the western lunar highlands: Result of closed system fractionation and mobilization of a KREEPy trapped liquid p 2615 N94-24367

FRACTOGRAPHY

Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments [DE93-040161] p 2231 N94-22933

FRACTURE MECHANICS

Fracture simulations via massively parallel molecular dynamics [DE93-040159] p 2374 N94-22871

Fundamentals of fatigue analysis [PB93-226264] p 2374 N94-23118

A numerical analysis of crack propagation in microcracking ceramic and ceramic composites [DE94-001192] p 2253 N94-23183

Stress corrosion cracking properties of 15-5PH steel p 2251 N94-23244

Feasibility study of shot-peening modeling [CTN-94-60926] p 2244 N94-24170

Micromechanical failure modes in brittle matrix composites p 2255 N94-24232

Role of interfaces on the cyclic fatigue behaviour of ceramic matrix composites p 2256 N94-24234

Fracture kinetics analysis of empirical and semi-empirical corrosion fatigue relations p 2159 N94-24277

The mechanical properties of single crystal (alpha)-Si3N4 [DE94-002632] p 2563 N94-24517

The effects of anisotropy on the nonlinear behavior of bridged cracks in long strips [NASA-CR-194453] p 2377 N94-24604

Investigation of the effects of manufacturing variations and materials on fatigue crack detection methods in gear teeth [NASA-CR-195093] p 2373 N94-24769

Environmentally assisted cracking of high strength beta titanium alloys [AD-A273598] p 2245 N94-24823

FRANC2D: A two-dimensional crack propagation simulator. Version 2.7: User's guide [NASA-CR-4572] p 2246 N94-25118

Three-dimensional, inelastic response of single-edge notch bend specimens subjected to impact loading [AD-A273302] p 2378 N94-25143

Evaluation of multiaxial fracture models for technical ceramics [ISBN-9-03-860192-1] p 2263 N94-25299

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues [AD-A273663] p 2251 N94-25450

FRACTURE STRENGTH

Mechanical behavior of CMCs: Crack growth resistance and creep aspects p 2256 N94-24235

Ceramic matrix composite parts design p 2256 N94-24237

Evaluation of the fracture resistance and durability of adhesive bonded joints p 2160 N94-24278

Evaluation of multiaxial fracture models for technical ceramics [ISBN-9-03-860192-1] p 2263 N94-25299

The mechanical property data base from an Air Force/Industry Cooperative Test Program on advanced aluminum alloys (7064 and CW67) [AD-A273741] p 2251 N94-25531

FRACTURES (MATERIALS)

Repair of cracked aluminum aircraft structure with composite patches p 2156 N94-24259

FRACTURING

Analysis of local delaminations caused by angle ply matrix cracks [NASA-TM-109052] p 2228 N94-24083

J-integral patch for finite element analysis of dynamic fracture due to impact of pressure vessels p 2381 N94-24429

Damage tolerance of pressurized graphite/epoxy tape cylinders under uniaxial and biaxial loading [NASA-CR-195101] p 2377 N94-24587

Elevated temperature crack propagation [NASA-TM-106490] p 2377 N94-24715

FRAGMENTATION

Optical model analyses of galactic cosmic ray fragmentation in hydrogen targets [NASA-TP-3404] p 2540 N94-23509

FRAMES

Deployable video conference table [NASA-CASE-ARC-11950-1] p 2192 N94-23310

FRAUNHOFER LINES

Literature study on: Remote Fraunhofer luminescence detection of algal bloom in marine environments [BCRS-92-25] p 2417 N94-23176

FREDHOLM EQUATIONS

Multigrid method for integral equations and automatic programs p 2464 N94-23696

FREE ATMOSPHERE

Session on modeling of radiative transfer processes p 2414 N94-24397

FREE BOUNDARIES

The characterization of reaction-convection-diffusion processes by travelling waves [MEMO-1111] p 2273 N94-22729

Bounds and asymptotic expansions for solutions of the free boundary problems related to sequential decision versions of a bioequivalence problem [AD-A273551] p 2495 N94-24560

FREE ELECTRON LASERS

Properties of the transfer matrices of deflecting magnet systems for free electron laser [DE93-508257] p 2347 N94-22922

Inverse free electron laser beat-wave accelerator research [DE94-002597] p 2349 N94-23702

Design and testing of ubitron amplifier tubes [AD-A273297] p 2311 N94-24818

Compact free electron lasers for medical applications [AD-A273609] p 2350 N94-24934

Activities of Academia Sinica [DE93-614529] p 2541 N94-25335

FREE ELECTRONS

Conductors with small Fermi energies and small gap energies [DE93-040887] p 2561 N94-23432

Excitation balances and transport in an inductively coupled plasma [ETN-94-95330] p 2554 N94-25241

FREE ENERGY

Application of multigrid methods to the solution of liquid crystal equations on a SIMD computer p 2484 N94-23686

Free energy profiles for Li(+) and I(-) ions approaching Pt(100) surface: A molecular dynamics study [AD-A273455] p 2536 N94-24675

Thermophysical properties of simple liquid metals: A brief review of theory p 2248 N94-25130

FREE FLOW

Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles [NASA-TM-106450] p 2167 N94-23592

New concepts for Reynolds stress transport equation modeling of inhomogeneous flows p 2171 N94-24143

Measurements of the influence of integral length scale on stagnation region heat transfer [NASA-TM-106503] p 2338 N94-25183

FREE MOLECULAR FLOW

Prediction of three sigma maximum dispersed density for aerospace applications p 2207 N94-23654

FREE RADICALS

Design of a vehicle based system to prevent ozone loss [NASA-CR-195498] p 2180 N94-24479

FREE VIBRATION

Nonlinear analysis using a modal based reduction technique p 2161 N94-24288

FRENCH SPACE PROGRAM

A reference Martian mission for a long range rover p 2606 N94-23382

The space operations at CNES p 2498 N94-23837

FREQUENCIES

Coupled frequencies of a hydroelastic rectangular system [LRT-WE-9-FB-4-1992] p 2375 N94-23196

Solid state Time Base Corrector (TBC) [AD-D015981] p 2312 N94-25039

FREQUENCY CONVERTERS

Some subjects in digital audio, noise shaping, sample rate conversion, dynamic range compression and testing [ISBN-9-09-005162-7] p 2530 N94-25220

FREQUENCY DISCRIMINATORS

A pattern jitter free AFC scheme for mobile satellite systems p 2285 N94-22809

FREQUENCY DISTRIBUTION

Radar target discrimination systems using artificial neural network topology [AD-D015984] p 2301 N94-25041

FREQUENCY DIVIDERS
Microwave analog frequency dividers: Design, modeling and realization
[LAAS-93139] p 2307 N94-22909
FREQUENCY DIVISION MULTIPLE ACCESS
Aeronautical audio broadcasting via satellite
p 2274 N94-22741
FREQUENCY DIVISION MULTIPLEXING
An introduction to digital modulation and OFDM techniques
[BBC-RD-1993/10] p 2295 N94-24086
FREQUENCY HOPPING
Coding for frequency hopped spread spectrum satellite communications
[ECE-91-1] p 2296 N94-24132
Evaluation of EHF multi-beam adaptive arrays
[CTN-94-60898] p 2297 N94-24296
Analysis of time-diversity combining methods for frequency-hopped signals
[CU-DOE-92-09] p 2300 N94-24694
Coding for frequency hopped spread spectrum satellite communications
[ECE-92-1] p 2300 N94-24697
FREQUENCY MODULATION
Power attenuation characteristics as switch-over criterion in personal satellite mobile communications
p 2277 N94-22756
Theoretical and simulated performance for a novel frequency estimation technique p 2285 N94-22808
Modulation characteristics of a high-power semiconductor Master Oscillator Power Amplifier (MOPA)
[NASA-TM-104577] p 2308 N94-23281
Preprocessor and adaptive beamformer for linear-frequency modulation active signals
[AD-D016008] p 2302 N94-25048
System for cancelling phase noise in an interferometric fiber optic sensor arrangement
[AD-D015994] p 2345 N94-25053
FREQUENCY MULTIPLIERS
Planar varactor frequency multiplier devices with blocking barrier
[NASA-CASE-NPO-18428-1-CU] p 2310 N94-23821
Spatial frequency multiplier with active linearly tapered slot antenna array
[NASA-TM-106494] p 2310 N94-24308
FREQUENCY RANGES
A pattern jitter free AFC scheme for mobile satellite systems p 2285 N94-22809
MIMO system identification for H(infinity) robust control: A frequency domain approach with minimum error bounds
[ETN-94-95354] p 2476 N94-25262
On the auditory discrimination of spectral shape
[ETN-94-95306] p 2530 N94-25289
Frequency response functions for nonlinear rational models
[RR-471] p 2492 N94-25318
FREQUENCY RESPONSE
Unwrapping the phase response functions for nonlinear systems
[RR-465] p 2462 N94-25311
FREQUENCY SCANNING
Novel fringe scanning/Fourier transform method of synthetic imaging
[DE93-018936] p 2542 N94-22917
FREQUENCY SHIFT
Estimation of frequency offset in mobile satellite modems p 2285 N94-22807
Theoretical and simulated performance for a novel frequency estimation technique p 2285 N94-22808
Experimental and theoretical features of strong suppression and shifting phenomena in odd-photon resonant excitations and stimulated emissions
[DE94-000341] p 2535 N94-24510
Ultracold atoms in traps and fountains
[ETN-94-95325] p 2537 N94-25239
FREQUENCY SHIFT KEYING
An optical ASK and FSK phase diversity transmission system
[EUT-92-E-268] p 2542 N94-23171
Coding for frequency hopped spread spectrum satellite communications
[ECE-91-1] p 2296 N94-24132
Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669
Analysis of time-diversity combining methods for frequency-hopped signals
[CU-DOE-92-09] p 2300 N94-24694
Coding for frequency hopped spread spectrum satellite communications
[ECE-92-1] p 2300 N94-24697
Very low frequency and low frequency transmitting antenna parameter monitoring system
[AD-D015989] p 2302 N94-25049
FREQUENCY STABILITY
Direct digital RF synthesis and modulation for MSAT mobile applications p 2285 N94-22804
Progress toward ultra-stable lasers for use in space
[NASA-TM-109678] p 2349 N94-24488
FREQUENCY SYNTHESIZERS
Spur-reduced digital sinusoid synthesis
p 2291 N94-23264
FRICTION
New tribocoating combination for vacuum operation
p 2355 N94-23990
Tribological behaviour of fluorinated resins and polyimide resins sliding over a metallic surface in liquid nitrogen
p 2355 N94-23991
Simulation of cryogenic turbopump annular seals
p 2371 N94-24440
FRICTION FACTOR
Development of a theory of the wear of ceramics
[DE94-002773] p 2254 N94-23783
Simulation of cryogenic turbopump annular seals
p 2371 N94-24440
FRICTION MEASUREMENT
New pin-on-disk equipment for vacuum tribometry
p 2360 N94-24023
An analytical ultra-high vacuum tribometer for solid lubricant studies p 2361 N94-24033
Skin friction measurement in complex flows using thin oil film techniques
[NASA-CR-194872] p 2327 N94-24098
FRONTS (METEOROLOGY)
ASR-9 microburst detection algorithm
[AD-A273591] p 2415 N94-24850
FROST DAMAGE
Frost effects on the microstructure of high strength concrete, and methods for their analysis
[VTT-PUBS-126] p 2379 N94-25529
FROSTBITE
Cellular and tissue injury during nonfreezing cold injury and frostbite
[AD-A270883] p 2423 N94-22732
FUEL CELL POWER PLANTS
Mathematical modeling of MCFC cells/stacks and networks
[DE94-001914] p 2390 N94-23212
Overview of molten carbonate fuel cell technology development
[DE94-001911] p 2394 N94-23781
FUEL CELLS
Advanced research and technology development of MCFCs
[DE94-001918] p 2389 N94-22723
A novel method for determination of transport parameters of H2 and O2 in PEMFCs
[DE94-001492] p 2389 N94-22962
Preliminary study concerning development of petroleum-substitution energy integration technology
[DE94-714902] p 2264 N94-23027
Modelling of solid polymer and direct methanol fuel cells: Phenomenological equations and analytical solutions
[PB93-224897] p 2390 N94-23102
Mathematical modeling of MCFC cells/stacks and networks
[DE94-001914] p 2390 N94-23212
Space Electrochemical Research and Technology
[NASA-CP-3228] p 2390 N94-23345
Applications of x ray absorption fine structure to the in situ study of the effect of cobalt in nickel hydrous oxide electrodes for fuel cells and rechargeable batteries
p 2391 N94-23347
High power density proton exchange membrane fuel cells p 2393 N94-23359
The electrolyte challenge for a direct methanol-air polymer electrolyte fuel cell operating at temperatures up to 200 C p 2393 N94-23360
Advances in direct oxidation methanol fuel cells
p 2393 N94-23361
High energy density aluminum-oxygen cell
p 2393 N94-23363
A high performance H2-Cl2 fuel cell for space power applications p 2394 N94-23366
Carbon monoxide fuel cells as a source for Mars rover electric power p 2314 N94-23409
Overview of molten carbonate fuel cell technology development
[DE94-001911] p 2394 N94-23781
Contaminant effects in solid oxide fuel cells
[DE94-002963] p 2395 N94-23785
FUEL COMBUSTION
Development of durable high-temperature catalysts for natural gas combustion
[PB93-226447] p 2232 N94-23477
Shock tunnel studies of scramjet phenomena, supplement 7
[NASA-CR-191572] p 2319 N94-23513
Shock tunnel studies of scramjet phenomena, supplement 8
[NASA-CR-191573] p 2320 N94-23532
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
Multiple flames in counterflow spray combustion
p 2161 N94-24284
Solid rocket combustion simulator technology using the hybrid rocket for simulation
[NASA-CR-195142] p 2265 N94-24578
FUEL CONSUMPTION
Theory and computation of optimal low- and medium-thrust transfers
[NASA-CR-194812] p 2217 N94-23275
S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270
General aviation activity survey
[AD-A273284] p 2162 N94-24923
FUEL CONTAMINATION
Isothiazolone volatility study of a water bottom from fuel treated with Kathon (tm) FP1.5 biocide
[AD-A273165] p 2266 N94-24728
FUEL FLOW
Heat transfer in rocket combustion chambers
p 2214 N94-23051
CFD simulation of coaxial injectors
p 2342 N94-24430
Thermal-fluid analysis of the fill and drain operations of a cryrogenic fuel tank
[NASA-TM-104273] p 2334 N94-24495
STE thrust chamber technology: Main injector technology program and nozzle Advanced Development Program (ADP)
[NASA-CR-193919] p 2221 N94-25019
FUEL INJECTION
SSME fuel preburner injector characterization
p 2211 N94-23037
Axisymmetric single shear element combustion instability experiment p 2213 N94-23044
Heat transfer in rocket combustion chambers
p 2214 N94-23051
Transient phenomena in laminar spray combustion
p 2160 N94-24282
Pellet ablation in the large helical device
[NIFS-260] p 2551 N94-24358
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
HYPULSE combustor analysis
[NASA-CR-191579] p 2336 N94-24771
FUEL SPRAYS
Transient phenomena in laminar spray combustion
p 2160 N94-24282
Effect of initial droplet-size distributions on fuel-vapor profiles in a shear-layer flow p 2160 N94-24283
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
FUEL SYSTEMS
Isothiazolone volatility study of a water bottom from fuel treated with Kathon (tm) FP1.5 biocide
[AD-A273165] p 2266 N94-24728
FUEL TANKS
Thermal-fluid analysis of the fill and drain operations of a cryrogenic fuel tank
[NASA-TM-104273] p 2334 N94-24495
FUEL TESTS
HYPULSE combustor analysis
[NASA-CR-191579] p 2336 N94-24771
FUELS
Multiple flames in counterflow spray combustion
p 2161 N94-24284
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072
FULLERENES
SALI chemical analysis of provided samples
[NASA-CR-194138] p 2232 N94-23524
Capillary electrokinetic separations with optical detection
[DE94-001639] p 2233 N94-23716
Potent solvents for C60 and their utility for the rapid acquisition of 13CNMR data for fullerenes
[AD-A273349] p 2235 N94-24925
FUNCTIONAL ANALYSIS
Logarithm of probability measures and infinite divisibility of sub-stable random vectors
[PB94-118627] p 2486 N94-23758
FUNCTIONAL DESIGN SPECIFICATIONS
Development of the Cassini Ground Data System in a multimission environment p 2500 N94-23845

Operational characterisation of requirements and early validation environment for high demanding space systems p 2519 N94-23959

Design of a recumbent seating system
[NASA-CR-195503] p 2438 N94-24786

Specification list and function structure for a full-body dynamometer to be used aboard Space Station Freedom
[NASA-CR-195508] p 2439 N94-24835

FUNCTIONALS

Density functional studies: First principles and semi-emperical calculations of clusters and surfaces
[DE94-002836] p 2561 N94-23214

Infinitely divisible processes and their nonlinear functionals; a study of their structural, statistical and sample path properties and their prediction problems
[AD-A273468] p 2496 N94-25147

New algorithm for minimizing (chi)(sup 2) functionals with constraints
[DE93-616800] p 2463 N94-25432

The least energy critical set
[DE93-616820] p 2493 N94-25434

FUNCTIONS (MATHEMATICS)

Wiener-Hopf factorization of rational matrix functions in terms of realizations: An alternative version
[ETN-94-95380] p 2491 N94-25245

Adaptive noise cancellation using recurrent radial basis function networks
[RR-472] p 2313 N94-25319

Extension problem for generalized multi-monogenic functions in Clifford analysis
[DE93-616818] p 2493 N94-25433

FURNACES

Determination of the compatibility between structural alloys and molten metals at high temperatures
[DE94-000954] p 2241 N94-23434

FUSELAGES

Aircraft empennage structural detail design
[NASA-CR-195496] p 2179 N94-24332

The Triton: Design concepts and methods
[NASA-CR-195542] p 2184 N94-25004

FUSION REACTORS

Design of central control system for Large Helical Device (LHD)
[NIFS-258] p 2553 N94-24623

FUZZY SETS

An information retrieval logical model applied to the formalism of conceptual graphs: The ELEN prototype and its experimentation on a corpus of software components
[ETN-94-95162] p 2588 N94-22879

FUZZY SYSTEMS

VLSI-based video event triggering for image data compression
[NASA-TM-106500] p 2345 N94-25116

Fault detection in HVAC systems using fuzzy models
[OUEL-1977/93] p 2373 N94-25475

G

G STARS

ROSAT observations of the x ray binary HD 154791
[NASA-CR-195189] p 2600 N94-25198

GADOLINIUM

Synthesis and in-vivo detection of boronated compounds for use in BNCT
[DE94-001899] p 2233 N94-23780

GALACTIC COSMIC RAYS

Optical model analyses of galactic cosmic ray fragmentation in hydrogen targets
[NASA-TP-3404] p 2540 N94-23509

Superconducting cosmic strings near the electroweak scale and cosmic-ray propagation
[MPI-PHE/93-05] p 2629 N94-25459

GALACTIC EVOLUTION

Comparison of time integration methods for the evolution of galaxies
[PB94-111671] p 2602 N94-24522

GALACTIC HALOS

The soft x ray halo of the spiral galaxy NGC4631
[NASA-CR-194820] p 2601 N94-23537

GALERKIN METHOD

Isolated and coupled superquadric loop antennas for mobile communications applications
p 2289 N94-22834

Wavelet multiresolution analyses adapted for the fast solution of boundary value ordinary differential equations
p 2485 N94-23691

FEMAX finite-element package for computing three-dimensional time-domain electromagnetic fields in inhomogeneous media
[PB94-111093] p 2294 N94-23733

On the dynamics of approximating schemes for dissipative nonlinear equations p 2332 N94-24168

Responses of a finite baffled plate subject to turbulent and mean flow excitations
[NASA-CR-191570] p 2334 N94-24605

GALILEO PROJECT

Galileo spacecraft anomaly and safing recovery
p 2207 N94-23864

GALILEO SPACECRAFT

Galileo spacecraft anomaly and safing recovery
p 2207 N94-23864

Techniques and software for optimum and efficient mission science sequence development
p 2504 N94-23872

GALLIUM

Ga delta-doping layers in silicon
[PB93-224632] p 2561 N94-23222

GALLIUM ARSENIDE LASERS

Manufacturing and characterization of GaAs/AlGaAs multiple quantumwell ridge waveguide lasers
[EUT-92-E-265] p 2348 N94-23168

GALLIUM ARSENIDES

InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1
[AD-A271081] p 2348 N94-23123

Observation of non-centrosymmetry and determination of polarity in III-V semiconductors
[PB93-201416] p 2561 N94-23503

The study of dopant segregation behavior during the growth of GaAs in microgravity
[NASA-CR-193905] p 2267 N94-23549

Magnetic resonance studies of 3d transition metal impurities in compound semiconductors
[PB93-232197] p 2243 N94-23714

Photonic technology for implementation of generalizable neural networks: A synthetic approach
[AD-A273497] p 2474 N94-24622

On the origin of 1/f noise in epitaxial GaAs
[ISBN-9-09-006067-7] p 2566 N94-25297

GALLIUM COMPOUNDS

Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers
[DE94-002293] p 2350 N94-24659

GALLIUM ISOTOPES

Recent results from the Soviet-American Gallium Experiment
[DE94-000677] p 2626 N94-23020

GALLIUM PHOSPHIDES

Magnetic resonance studies of 3d transition metal impurities in compound semiconductors
[PB93-232197] p 2243 N94-23714

GAME THEORY

On some approximately balanced combinatorial cooperative games
[MEMO-1113] p 2493 N94-22702

Generalized concavity in cooperative game theory: Characterizations in terms of the core
[MEMO-1121] p 2497 N94-22708

On the reduced game property for and the axiomatization of the tau-value
[MEMO-1128] p 2497 N94-22716

The Third Twente Workshop on Graphs and Combinatorial Optimization
[PB94-110947] p 2486 N94-23722

Egalitarian non-average contribution method for cooperative games
[PB94-111705] p 2497 N94-23800

Reduced game properties of egalitarian division rules for cooperative games
[PB94-111689] p 2521 N94-24523

Irreducible core of a minimum cost spanning tree game
[PB94-110962] p 2489 N94-24653

GAMMA RAY ASTRONOMY

An analysis of gamma ray burst time histories
[NASA-CR-195191] p 2629 N94-25199

High energy gamma astronomy above 200 GeV
[MPI-PHE/93-04] p 2600 N94-25458

GAMMA RAY BURSTS

Two populations and models of gamma ray bursts
[NASA-CR-194762] p 2629 N94-22947

Structure in gamma ray burst time profiles: Correlations with other observables p 2579 N94-24431

Using contour maps to search for red-shifted 511 keV features in BATSE GRB spectra p 2585 N94-24455

Neutron star mergers and gamma-ray bursts
[NASA-CR-195176] p 2629 N94-25091

An analysis of gamma ray burst time histories
[NASA-CR-195191] p 2629 N94-25199

GAMMA RAY OBSERVATORY

Structure in gamma ray burst time profiles: Correlations with other observables p 2579 N94-24431

Flux measurements using the BATSE spectroscopic detectors p 2580 N94-24435

GAMMA RAY SPECTROMETERS

New concepts for HgI2 scintillator gamma ray spectroscopy
[NASA-CR-194819] p 2233 N94-24113

GAMMA RAY TELESCOPES

High energy gamma astronomy above 200 GeV
[MPI-PHE/93-04] p 2600 N94-25458

GANGLIA

Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454

GAPS

An application of small-gap equations in sealing devices p 2325 N94-23668

GARNETS

Two micron stimulated emission of activated insulating crystals
[REPT-94-002] p 2565 N94-25025

GAS ANALYSIS

Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200

Rice cultivation and methane emission: Documentation of distributed geographic data sets
[NASA-TM-104595] p 2381 N94-24800

GAS BEARINGS

Design of gas bearing systems for precision applications
[ISBN-9-03-860112-3] p 2367 N94-25249

GAS CHROMATOGRAPHY

Evaporation and combustion of LOX under supercritical and subcritical conditions p 2211 N94-23035

Reduction of hydrocarbon impurities in 200 l/h helium liquefier-refrigerator system
[NIFS-259] p 2271 N94-24459

Isothiazolone volatility study of a water bottom from fuel treated with Kathon (tm) FP1.5 biocide
[AD-A273165] p 2266 N94-24728

GAS COMPOSITION

Evaporation and combustion of LOX under supercritical and subcritical conditions p 2211 N94-23035

Hot hydrogen testing of metallic turbo pump materials
[NASA-CR-193880] p 2244 N94-24066

GAS COOLING

Ultracold atoms in traps and fountains
[ETN-94-95325] p 2537 N94-25239

GAS DENSITY

Supersonic minimum length nozzle design for dense gases p 2171 N94-23656

Reduction of hydrocarbon impurities in 200 l/h helium liquefier-refrigerator system
[NIFS-259] p 2271 N94-24459

The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics
[AD-A273164] p 2262 N94-25136

GAS DETECTORS

Robust, wide-range hydrogen sensor for use in commercial, space, and government applications
[DE93-040902] p 2342 N94-22954

Interpretation of discrepancies in mass spectroscopy data obtained from different experimental configurations
p 2237 N94-23245

Total light loss optic spectroscopy: Progress towards a fiber optic Raman organic vapor sensor
[DE94-002545] p 2234 N94-24549

GAS DISCHARGES

Flue gas cleaning by pulse corona streamer
[EUT-93-E-272] p 2268 N94-23174

Microwave excitation of pulsed high pressure gas discharge lasers
[DLR-FB-93-12] p 2351 N94-25304

GAS DYNAMICS

Molecular gas dynamics applied to low-thrust propulsion p 2214 N94-23053

Interpretation of discrepancies in mass spectroscopy data obtained from different experimental configurations
p 2237 N94-23245

A multilevel adaptive projection method for unsteady incompressible flow p 2341 N94-23690

Heat pipe vapor dynamics
[NASA-CR-194217] p 2327 N94-24096

Energy and maximum norm estimates for nonlinear conservation laws
[NASA-CR-195091] p 2569 N94-24109

An investigation on a new technique to improve the performance of the shock tube/tunnel testing in the equilibrium interface condition p 2154 N94-24247

Characteristic method for one-dimensional scalar hyperbolic conservation laws with stiff source terms
[PB93-237675] p 2491 N94-24954

Microscopic dynamics in dense helium-neon mixtures: Neutron scattering, kinetic theory and computer simulations
[ISBN-9-07-386105-5] p 2537 N94-25228

An adaptive streamline diffusion finite element method for hyperbolic systems in gas dynamics
[PREPRINT-688] p 2340 N94-25466

GAS FLOW
Picosecond High Pressure Gas Switch experiment
[DE93-040853] p 2307 N94-22950
Local grid refinement method for the euler equations
[PB93-223329] p 2317 N94-22985
Interferometry in rarefied gas flows
[ISL-CO-207/92] p 2318 N94-23160
An F2D analysis of the Flow Instability Test (FIT) experiment
[DE94-001420] p 2217 N94-23193
Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics
[DE93-040094] p 2348 N94-23203
Analysis of high vacuum systems using SINDA'85
p 2322 N94-23648
Supersonic minimum length nozzle design for dense gases p 2171 N94-23656
Conservation equations for reacting gas flow
[PB94-111168] p 2334 N94-24574
Molten salt reactor for potentiostatic electroplating
[AD-D016020] p 2258 N94-24720
Sub-sonic flow about a slender profile in a tunnel having perforated walls
[AD-A273184] p 2170 N94-25137
A continuing search for a near-perfect numerical flux scheme. Part 1: AUSM+
[NASA-TM-106524] p 2338 N94-25180

GAS GENERATORS
Computational Fluid Dynamics (CFD) applications in rocket propulsion analysis and design
p 2214 N94-23054
A minimum cost tolerance allocation method for rocket engines and robust rocket engine design
p 2222 N94-24419

GAS GIANT PLANETS
Voyager planetary radio astronomy studies
[NASA-CR-194776] p 2614 N94-24328

GAS GUNS
Multiple shock initiation of LX-17
[DE94-001524] p 2265 N94-23807

GAS INJECTION
Shear coaxial injector instability mechanisms
p 2213 N94-23047
Mixing characteristics of directly opposed rows of jets injected normal to a crossflow in a rectangular duct
[NASA-TM-106477] p 2188 N94-24594

GAS IONIZATION
Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects
[NASA-CR-195126] p 2534 N94-24487

GAS JETS
Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464
Optimization of orifice geometry for cross-flow mixing in a cylindrical duct
[NASA-TM-106436] p 2481 N94-23593

GAS LASERS
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique
[DE94-001608] p 2309 N94-23520

GAS MIXTURES
Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments
[DE93-040161] p 2231 N94-22933
Transient phenomena in laminar spray combustion
p 2160 N94-24282
The chemistry of particulate formation in fluorocarbon plasmas
[DE94-001500] p 2552 N94-24546
Microscopic dynamics in dense helium-neon mixtures: Neutron scattering, kinetic theory and computer simulations
[ISBN-9-07-386105-5] p 2537 N94-25228

GAS PIPES
Demonstration of polyscann ultrasonic butt-fusion inspection system for polyethylene pipes
[AD-A273279] p 2373 N94-24814

GAS PRESSURE
Gas-pressure forming of superplastic ceramic sheet
[DE94-001520] p 2252 N94-22930
Thermodynamics of nickel-cadmium and nickel-hydrogen batteries p 2391 N94-23349
Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333

GAS STREAMS
A pressurized thermogravimetric analyzer for use in studies of gas/solid systems
[DE94-001224] p 2342 N94-22989

Effect of initial droplet-size distributions on fuel-vapor profiles in a shear-layer flow p 2160 N94-24283

GAS TRANSPORT
Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics
[DE93-040094] p 2348 N94-23203
Chemistry on the mesoscale: Modeling and measurement issues p 2413 N94-24390

GAS TUNGSTEN ARC WELDING
Use of photostress to characterize the mechanical behavior of weldments
[NASA-CR-195201] p 2378 N94-25267

GAS TURBINE ENGINES
Vibration isolating engine mount
[CA-PATENT-1-320-710] p 2353 N94-23215
Turbine engine with induced pre-swirl at the compressor inlet
[CA-PATENT-1-317-467] p 2186 N94-23253
Seal assembly
[CA-PATENT-163126888] p 2364 N94-24128
Probabilistic simulation of concurrent engineering of propulsion systems p 2177 N94-24317
Gas turbine and operating method of the same
[CA-PATENT-APPL-SN-2043039] p 2188 N94-24490
Study of streamwise vorticity-stirred combustion
[NASA-CR-194450] p 2234 N94-24565
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072

GAS TURBINES
Brush seals for cryogenic applications
p 2216 N94-23063
Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades
[PB93-226223] p 2317 N94-23114
Optimization of orifice geometry for cross-flow mixing in a cylindrical duct
[NASA-TM-106436] p 2481 N94-23593
Simulation of unsteady flows through stator and rotor blades of a gas turbine using the Chimera method
p 2323 N94-23652
The 3-D CFD modeling of gas turbine combustor-integral bleed flow interaction p 2189 N94-23658
The 3-D numerical study of airflow in the compressor/combustor prediffuser and dump diffuser of an industrial gas turbine p 2324 N94-23660
Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion
[PB94-109873] p 2187 N94-23709
Gas turbine and operating method of the same
[CA-PATENT-APPL-SN-2043039] p 2188 N94-24490
Analysis of the effects of wake passage on heat transfer in a linear turbine cascade
[AD-A273729] p 2339 N94-25446

GAS VALVES
Pressure wall patch
[NASA-CASE-MFS-28724-1] p 2203 N94-23824

GAS VISCOSITY
Local grid refinement method for the euler equations
[PB93-223329] p 2317 N94-22985

GAS-ION INTERACTIONS
Reactivity of ambident anions in the gas phase
[PB93-232189] p 2533 N94-23713

GAS-LIQUID INTERACTIONS
The 2-D polymerized Langmuir-Blodgett films studied by STM
[AD-A273542] p 2261 N94-24930

GAS-METAL INTERACTIONS
Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556

GAS-SOLID INTERFACES
A method for recognition of frequency cells in a cylinder flow influenced by wall effects p 2316 N94-22860

GASEOUS DIFFUSION
Comparison of numerical simulation and experimental data for steam-in-place sterilization
p 2326 N94-23669
Ethylene trace-gas techniques for high-speed flows
[NASA-TM-106491] p 2169 N94-24335
An adaptive streamline diffusion finite element method for hyperbolic systems in gas dynamics
[PREPRINT-688] p 2340 N94-25466

GATES (CIRCUITS)
Method for fabricating self-aligned gate diffused junction field effect transistor
[AD-D015975] p 2312 N94-25035

GAUGE INVARIANCE
Gauge invariance and the electromagnetic current of composite pions
[DE93-040869] p 2532 N94-22952
Off-critical W(infinity) and Virasoro algebras as dynamical symmetries of the integrable models
[DE93-633215] p 2478 N94-22969

The 2D supergravity and integrable systems
[DE93-616848] p 2570 N94-25336
Proton spin: The role of quark-gluon and hadron degrees of freedom
[DE93-616867] p 2538 N94-25341

GAUGE THEORY
On BRST quantization of constrained systems
[ETN-94-95386] p 2570 N94-25258

GEAR TEETH
Thermal vacuum performance of cycloid and harmonic gearboxes with solid (MoS2) and liquid (Braycote 601) lubrication p 2358 N94-24009
Application of fault detection techniques to spiral bevel gear fatigue data
[NASA-TM-106467] p 2364 N94-24483
Investigation of the effects of manufacturing variations and materials on fatigue crack detection methods in gear teeth
[NASA-CR-195093] p 2373 N94-24769

GEARS
Time-frequency domain analysis of vibration signals for machinery diagnostics.(4): Interpretation using image processing techniques
[OUEL-1953/92] p 2353 N94-23178
Thermal vacuum performance of cycloid and harmonic gearboxes with solid (MoS2) and liquid (Braycote 601) lubrication p 2358 N94-24009
Development of gears for space use
p 2360 N94-24021
Development of a Low-Temperature Gear Motor (LOG) p 2361 N94-24032
Application of fault detection techniques to spiral bevel gear fatigue data
[NASA-TM-106467] p 2364 N94-24483

GELLED ROCKET PROPELLANTS
A theoretical evaluation of aluminum gel propellant two-phase flow losses on vehicle performance
p 2210 N94-23031
Ignition and combustion characteristics of metallized propellants, phase 2
[NASA-CR-195107] p 2266 N94-24700

GENERAL AVIATION AIRCRAFT
Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100
Annual review of aircraft accident data. US general aviation calendar year 1990
[PB94-126869] p 2173 N94-24641
General aviation activity survey
[AD-A273284] p 2162 N94-24923
US general aviation: The ingredients for a renaissance. A vision and technology strategy for US industry, NASA, FAA, universities p 2162 N94-25097
A simulation study of control and display requirements for zero-experience general aviation pilots
p 2163 N94-25102

GENES
Investigation of evolution-related aspects of bacterial rhodopsins
[NASA-CR-194826] p 2420 N94-23501

GENETIC ALGORITHMS
Using genetic algorithms for scheduling data flow graphs
[EUT-92-E-266] p 2449 N94-23169
A methodology for software cost estimation using machine learning techniques
[AD-A273158] p 2459 N94-24775
High-level connectionist models
[AD-A273638] p 2468 N94-25030
Genetic algorithms in control systems engineering
[RR-470] p 2463 N94-25315
Genetic-based motion planning for articulated robotic manipulators
[RR-476] p 2368 N94-25322

GENETIC CODE
Microinjection of the Yersinia YopE cytotoxin in mammalian cells induces actin microfilament disruption
[FOA-B-40418-4.4] p 2421 N94-24290

GENETICS
Applications of the Aurora parallel PROLOG system to computational molecular biology
[DE93-041166] p 2420 N94-23468

GEOCHEMISTRY
Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts
p 2614 N94-24365
The western highland province at the Apollo 14 site
p 2615 N94-24369
Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component
p 2615 N94-24370
Reactive trace metals as indicators of subduction and ventilation processes in the ocean
[AD-A273585] p 2419 N94-25164

A geochemical study of acapulcoite and lodranite meteorites p 2605 N94-25358

GEODESY

An improved gravity model for Mars: Goddard Mars Model-1 (GMM-1)
[NASA-TM-104584] p 2401 N94-23282

GEODETIC SURVEYS

GPS survey of the western Tien Shan
[NASA-CR-195174] p 2175 N94-24826

GEODYNAMICS

GPS survey of the western Tien Shan
[NASA-CR-195174] p 2175 N94-24826

Constraining proposed combinations of ice history and Earth rheology using VLBI determined baseline length rates in North America p 2405 N94-25205

GEOELECTRICITY

Electromagnetic field changes as a precursory phenomena of earthquakes and volcanic eruptions
[REPT-157] p 2405 N94-24980

GEOGRAPHIC INFORMATION SYSTEMS

A prototype expert/information system for examining environmental risks of KSC activities
p 2400 N94-23237

Study of methods and structures for handling of digitized maps for geographical information systems
[PB93-204402] p 2590 N94-23741

Mapping Tomorrow's Resources: A symposium on the uses of remote sensing, Geographic Information Systems (GIS), and Global Positioning Systems (GPS) for natural resources management p 2387 N94-24357

Tools for visualizing landscape pattern for large geographic areas
[DE94-001121] p 2388 N94-24757

GEOLOGICAL FAULTS

Seafloor characterization/Galapagos propagating rift
[AD-A273586] p 2419 N94-25165

GEOLOGICAL SURVEYS

The AGRHYMET data communications project
p 2280 N94-22776

The national geomagnetic initiative
[LC-93-85739] p 2401 N94-23344

ASTER, a multinational Earth observing concept
p 2389 N94-23840

Near-surface seismic imaging
[PB94-119096] p 2404 N94-24647

GPS survey of the western Tien Shan
[NASA-CR-195174] p 2175 N94-24826

GEOMAGNETIC LATITUDE

Satellite autonomous navigation and orbit determination using magnetometers p 2156 N94-24258

GEOMAGNETISM

Aeronautical satellite antenna steering using magnetic field sensors p 2289 N94-22836

Solar-terrestrial environmental laboratory
p 2630 N94-23336

The national geomagnetic initiative
[LC-93-85739] p 2401 N94-23344

Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for February, March, 1993, and late data
[PB93-198323] p 2626 N94-23738

Steady induction effects in geomagnetism. Part 1C: Geomagnetic estimation of steady surficial core motions: Application to the definitive geomagnetic reference field models
[NASA-TP-3272-PT-1C] p 2403 N94-24465

Geomagnetic field models incorporating physical constraints on the secular variation
[NASA-CR-195165] p 2405 N94-24854

Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study
[AD-A273824] p 2314 N94-25539

GEOMETRICAL ACOUSTICS

Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464

GEOMETRICAL OPTICS

Ray and wave optics modeling of laboratory x ray lasers
[DE93-019940] p 2541 N94-22868

High-frequency techniques for RCS prediction of plate geometries and a physical optics/equivalent currents model for the RCS of trihedral corner reflectors, parts 1 and 2
[NASA-CR-195140] p 2298 N94-24616

Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas
[NASA-CR-195167] p 2301 N94-25005

GEOMETRICAL THEORY OF DIFFRACTION

Propagation model for the Land Mobile Satellite channel in urban environments p 2283 N94-22796

High-frequency techniques for RCS prediction of plate geometries and a physical optics/equivalent currents model for the RCS of trihedral corner reflectors, parts 1 and 2
[NASA-CR-195140] p 2298 N94-24616

GEOMETRY

Algebraic-geometric codes and their decoding algorithms
[ETN-94-95294] p 2491 N94-25079

GEOMORPHOLOGY

The morphology of the lunar surface parts in the region of work of the mobile geological laboratory vehicle in Mare Imbrium p 2607 N94-23385

Hydraulics and morphology of mountain rivers: A literature survey. Communications on hydraulic and geotechnical engineering
[PB94-110772] p 2388 N94-24636

GEOPHYSICAL FLUIDS

Steady induction effects in geomagnetism. Part 1C: Geomagnetic estimation of steady surficial core motions: Application to the definitive geomagnetic reference field models
[NASA-TP-3272-PT-1C] p 2403 N94-24465

GEOPHYSICS

Time-domain analysis of conduction and displacement current distributions in inhomogeneous and anisotropic layered media
[PB94-111036] p 2403 N94-24592

Rao-Blackwell theorem in stereology and some counterexamples
[PB94-111713] p 2496 N94-24639

Near-surface seismic imaging
[PB94-119096] p 2404 N94-24647

Solar-geophysical data number 587, July 1993. Part 1: (Prompt reports). Data for June, May 1993, and late data
[PB93-232874] p 2628 N94-24989

Solar-geophysical data number 587, July 1993. Part 2: (Comprehensive reports). Data for January 1993, and miscellaneous
[PB93-232882] p 2628 N94-24990

Solar-geophysical data number 588, August 1993. Part 1: (Prompt reports). Data for July, June 1993, and late data
[PB94-109089] p 2628 N94-24991

Solar-geophysical data number 588, August 1993. Part 2: (Comprehensive reports). Data for February 1993, and miscellaneous
[PB94-109105] p 2628 N94-24992

Solar-geophysical data number 589, September 1993. Part 1: (Prompt reports). Data for August, July 1993, and late data
[PB94-117082] p 2628 N94-24993

Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994

The geophysical signal of the martian global dichotomy p 2623 N94-24997

Measurement and Interpretation of Crustal Deformation Rates Associated with Postglacial Rebound
[NASA-CR-195193] p 2405 N94-25203

Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535

GEOPOTENTIAL

Electromagnetic field changes as a precursory phenomena of earthquakes and volcanic eruptions
[REPT-157] p 2405 N94-24980

GEOSYNCHRONOUS ORBITS

Trends in mobile satellite communication
p 2278 N94-22763

Geostationary payload concepts for personal satellite communications p 2278 N94-22765

Global coverage Mobile Satellite Systems: System availability versus channel propagation impairments
p 2284 N94-22798

New approaches for tracking earth orbiters using modified GPS ground receivers p 2196 N94-23258

CNES organization for station positioning of geostationary satellites p 2501 N94-23857

The geo-control system for station keeping and colocation of geostationary satellites
p 2464 N94-23927

HISPASAT launch and early operations phases: Computation and monitoring of geostationary satellite positioning p 2514 N94-23928

Reactive thrust cruise for a geosynchronous satellite with minimum fuel consumption p 2158 N94-24271

GEOTECHNICAL ENGINEERING

Unmanned lunar rovers: Utilization for exploration
p 2607 N94-23387

GERMANIUM

Physics with chemically and isotopically pure semiconductors
[DE93-040120] p 2557 N94-22928

Germanium x ray phase plates for the production of circularly polarized x rays
[DE94-002908] p 2545 N94-24550

Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657

Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790

GERMANIUM ALLOYS

Magnetic phases in UNiGe
[DE94-000793] p 2239 N94-22939

Large-scale production of Si(0.8)Ge(0.2) thermoelectric alloys by mechanical alloying
[DE94-000695] p 2243 N94-23753

GERMANIUM ISOTOPES

Recent results from the Soviet-American Gallium Experiment
[DE94-000677] p 2626 N94-23020

GIBBS FREE ENERGY

Surface barrier of a uniaxial anisotropic type 2 superconducting cylinder
[DE93-617137] p 2566 N94-25392

GIBBS PHENOMENON

On the Gibbs phenomenon 3: Recovering exponential accuracy in a sub-interval from a spectral partial sum of a piecewise analytic function
[NASA-CR-191560] p 2480 N94-23278

GIMBALS

Results of a laboratory experiment that tests rotating unbalanced-mass devices for scanning gimbaled payloads and free-flying spacecraft
[NASA-TP-3458] p 2269 N94-23574

Inter orbit link antenna pointing mechanisms design using standard actuators p 2359 N94-24016

GLACIOLOGY

Measurement and Interpretation of Crustal Deformation Rates Associated with Postglacial Rebound
[NASA-CR-195193] p 2405 N94-25203

Constraining proposed combinations of ice history and Earth rheology using VLBI determined baseline length rates in North America p 2405 N94-25205

GLASS

The structure and spin dynamics of lanthanide-bearing silicate glasses
[DE94-001320] p 2252 N94-22992

Micromechanical failure modes in brittle matrix composites p 2255 N94-24232

BEM solution for the simulation of axisymmetric viscous sintering
[PB93-237717] p 2336 N94-24761

GLASS FIBER REINFORCED PLASTICS

Contribution to the interface micromechanical study and to the damage fundamental phenomena in glass fiber epoxy resin model composites
[ISAL-93-0027] p 2227 N94-23133

Surface and interfacial properties of polymer blends. A literature survey
[PB93-230191] p 2254 N94-23561

Strength and life of pressure vessels subjected to impacts and thermomechanical GFRP loading
[VTT-JULK-771] p 2379 N94-25418

GLASS FIBERS

Glass-ceramic Li-Al-Si-O composition and process for its production
[CA-PATENT-APPL-SN-2043757] p 2254 N94-24129

Total light loss optic spectroscopy: Progress towards a fiber optic Raman organic vapor sensor
[DE94-002545] p 2234 N94-24549

GLASS LASERS

Inertial confinement fusion
[DE94-002602] p 2551 N94-23703

GLASS TRANSITION TEMPERATURE

Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189

Di(hydroxyphenyl)- benzimidazole monomers
[NASA-CASE-LAR-14643-2] p 2253 N94-23305

Synthesis of soluble halogenated polyphenylenes: Mechanism for the coupling halogenated lithiobenzenes
[AD-A273547] p 2257 N94-24558

GLASSY CARBON

Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789

Metal-catalyzed alkynylation of (Bromophenyl)Oligophenylenes: A rapid route to thermoset precursors of high density monolithic glass-like carbon
[AD-A273219] p 2260 N94-24863

GLIDE PATHS

Optical information in landing scenes
p 2442 N94-25511

GLOBAL POSITIONING SYSTEM
The Telecommunications and Data Acquisition Report
[NASA-CR-194766] p 2290 N94-23256
A review of GPS-based tracking techniques for TDRS orbit determination p 2196 N94-23257
New approaches for tracking earth orbiters using modified GPS ground receivers p 2196 N94-23258
Improved thermal force modeling for GPS satellites
p 2207 N94-23259
An investigation into acceleration determination for airborne gravimetry using the global positioning system
[ISBN-0-315-59470-5] p 2175 N94-24176
Mapping Tomorrow's Resources: A symposium on the uses of remote sensing, Geographic Information Systems (GIS), and Global Positioning Systems (GPS) for natural resources management p 2387 N94-24357
GPS survey of the western Tien Shan
[NASA-CR-195174] p 2175 N94-24826
Differential GPS for air transport: Status
p 2162 N94-25100
Measurement and Interpretation of Crustal Deformation Rates Associated with Postglacial Rebound
[NASA-CR-195193] p 2405 N94-25203
First results from the Fennoscandian GPS networks
p 2405 N94-25204
Application of aircraft navigation sensors to enhanced vision systems p 2176 N94-25495

GLOBAL TRACKING NETWORK
Worldwide vessel locating and tracking system, volume 1
[PB93-193217] p 2175 N94-24474

GLOBAL WARMING
Monte Carlo climate change forecasts with a global coupled ocean-atmosphere model
[MPIM-97] p 2407 N94-23156
Lightning, atmospheric electricity, and climate change
[DE94-002003] p 2408 N94-23471
Radiative forcing calculations for SF6 and CH4 using a correlated k-distribution transmission model
[DE94-001855] p 2397 N94-23700

GLOBULAR CLUSTERS
Voyager observations of globular clusters
[NASA-CR-194806] p 2598 N94-23330
UV-bright stars in globular clusters
[NASA-CR-189324] p 2599 N94-24666

GLOVES
Investigation of hand capabilities under a variety of performance conditions and an attempt to explain performance differences p 2444 N94-25354

GLUCOSE
Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357

GLUONS
The status of glueballs
[DE93-040040] p 2531 N94-22923
The Casimir energy of the rigid string with massive ends
[DE93-616851] p 2492 N94-25338
Proton spin: The role of quark-gluon and hadron degrees of freedom
[DE93-616867] p 2538 N94-25341
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476

GOES SATELLITES
Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992, and miscellaneous
[PB93-198331] p 2627 N94-23739
High resolution encoder-motor used in the orbital spin scan radiometer, GOES VAS satellites
p 2209 N94-24038

GOGGLES
Evaluation of visual acuity with Gen 3 night vision goggles
[NASA-TM-108792] p 2431 N94-23974
Night operations p 2431 N94-23977
Night vision devices and characteristics
p 2432 N94-23982
Cockpit/NVG visual integration issues
p 2432 N94-23983
Night vision goggle illusions and visual training
p 2432 N94-23984

GOLD
The statistics of sputtering
[DE94-001128] p 2243 N94-23715
Interactions between organized, surface-confined monolayers and vapor-phase probe molecules. 7: Comparison of self-assemblying organomercaptan monolayers deposited on gold from liquid and vapor phases
[AD-A273196] p 2535 N94-24555
Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657
Investigate zero-stress replicated optics
[NASA-CR-193889] p 2545 N94-24665
Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772
The nanometer-scale mechanics of gold films
[AD-A273307] p 2565 N94-25086

GOLD ALLOYS
Multilayer relaxation and surface structure of ordered alloys
[NASA-TM-106433] p 2243 N94-23578

GOVERNMENT/INDUSTRY RELATIONS
The Electronics Quality/Reliability Center: Lessons learned from partnering with industry
[DE94-001501] p 2309 N94-23777
NASA technology applications team: Applications of aerospace technology
[NASA-CR-194775] p 2597 N94-24494
SEMATECH, a case study: Analysis of a government-industry partnership
[AD-A273166] p 2586 N94-24683
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 21: US aerospace industry librarians and technical information specialists as information intermediaries: Results of the phase 2 survey
[NASA-TM-109064] p 2593 N94-24709
Defense aerospace and the new world order
p 2596 N94-25066

GOVERNMENTS
Making government work: Electronic delivery of Federal services
[OTA-TCT-578] p 2290 N94-23081

GRADIENTS
Application of multigrid methods to the solution of liquid crystal equations on a SIMD computer
p 2484 N94-23686
Studies on the implementation of normals and curvatures. Part 1: The first or mean curvature
[DE94-001546] p 2488 N94-24503

GRAFTING
Microstructure of styrene methyl methacrylate copolymers grafted onto polybutadiene seeds
[ETN-94-95360] p 2262 N94-25225

GRAIN BOUNDARIES
Polycrystalline thin film materials and devices
[DE93-018213] p 2389 N94-22862
Atomic-scale structure of grain boundaries: Correlations to grain boundary properties
[DE94-001289] p 2558 N94-22990
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel
[DE94-000466] p 2242 N94-23457
Defects in electro-optically active polymer solids
p 2223 N94-24342

GRAIN SIZE
Characterization of 3-D particle distributions and effects on recrystallization studied by computer simulation
[PB93-201408] p 2562 N94-23535
High strain rate superplasticity in metals and composites
[DE94-001521] p 2229 N94-24547

GRAMMARS
PROGRIL: A language for the definition of protocol grammars
[EUT-93-E-270] p 2449 N94-23172
Code generation for the attribute evaluator of the protocol engine grammar processor unit
[EUT-93-E-271] p 2450 N94-23173

GRAND UNIFIED THEORY
Towards a theory of quark and lepton masses
[DE94-001726] p 2533 N94-23218
Stitching the Yukawa quilt
[PB93-204477] p 2569 N94-24532

GRAPH THEORY
Toughness and triangle-free graphs
[MEMO-1127] p 2478 N94-22715
Median stabilization degree of a median algebra
[PB93-220010] p 2479 N94-23093
Linear algorithm for flattening list graphs
[PB93-220648] p 2448 N94-23097
The p-ranks of Latin square graphs
[PB93-230498] p 2479 N94-23107
Structures of tetrahedrization: A mathematical and algorithmical point of view
[ETN-94-95172] p 2480 N94-23166
Experience with parametric binary dissection
[NASA-CR-191552] p 2473 N94-23558
The Third Twente Workshop on Graphs and Combinatorial Optimization
[PB94-110947] p 2486 N94-23722
Toughness in Hamiltonicity in almost claw-free graphs
[MEMO-1114] p 2487 N94-24053
Investigation on interval edge-coloring of graphs
[PB94-110913] p 2488 N94-24541
Criterion for some Hamiltonian graphs to be hamilton-connected
[PB94-110921] p 2489 N94-24651
The Third Twente Workshop on Graphs and Combinatorial Optimization: Abstracts and late extended abstracts
[PB94-110954] p 2489 N94-24652
Irreducible core of a minimum cost spanning tree game
[PB94-110962] p 2489 N94-24653
Fixed points and shift cycles in cellular automata
[RR-459] p 2492 N94-25309

GRAPHICAL USER INTERFACE
The TOPSIM 4 graphic user interface
[ESA-STM-247] p 2450 N94-23228
GLview user's guide
[PB93-201366] p 2452 N94-23444
The Mars mapper science and mission planning tool
p 2503 N94-23867
Customizing graphical user interface technology for spacecraft control centers p 2510 N94-23905
XRTD: An X-Windows based, real-time radiometric display and analysis system p 2305 N94-23922
Intelligent tutoring and aiding in satellite ground control p 2443 N94-23929
Automating a human factors evaluation of graphical user interfaces for NASA applications: An update on CHIMES
p 2443 N94-23936
Automated system function allocation and display format: Task information processing requirements
p 2434 N94-24189
Interoperability through standardization: Electronic mail, and X Window systems p 2575 N94-24406
Integration and evaluation of a simulator designed to be used within a dynamic prototyping environment
p 2198 N94-24436
World processor: An interface for textual display and manipulation in virtual reality
[PB94-118643] p 2592 N94-24642
Analyzing the properties of user interface software
[AD-A273601] p 2460 N94-24933

GRAPHITE-EPOXY COMPOSITES
Fiber optic detection of laser generated ultrasound for materials characterization
[ISBN-0-315-83541-9] p 2541 N94-22891
Analysis of local delaminations caused by angle ply matrix cracks
[NASA-TM-109052] p 2228 N94-24083
A prediction method for the compressive strength of impact damaged composite laminates
[CTN-94-60925] p 2229 N94-24137
Repair of cracked aluminum aircraft structure with composite patches p 2156 N94-24259
Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260
Fiber optic detection of ultrasound and its application to cure monitoring
[ISBN-0-315-83424-2] p 2544 N94-24466
Damage tolerance of pressurized graphite/epoxy tape cylinders under uniaxial and biaxial loading
[NASA-CR-195101] p 2377 N94-24587
Test methods for composites: A status report. Volume 2: Compression test methods
[AD-A273522] p 2230 N94-24779
Test methods for composites: A status report. Volume 3: Shear test methods
[AD-A273561] p 2230 N94-25163

GRAPHS (CHARTS)
Toughness and triangle-free graphs
[MEMO-1127] p 2478 N94-22715
Long cycles in graphs with prescribed toughness and minimum degree
[MEMO-1109] p 2478 N94-22727
Linear algorithm for flattening list graphs
[PB93-220648] p 2448 N94-23097
The p-ranks of Latin square graphs
[PB93-230498] p 2479 N94-23107
Using genetic algorithms for scheduling data flow graphs
[EUT-92-E-266] p 2449 N94-23169
Toughness in Hamiltonicity in almost claw-free graphs
[MEMO-1114] p 2487 N94-24053
Process and representation in graphical displays
p 2433 N94-24187

GRASSLANDS
Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991
[PB93-230654] p 2386 N94-23755

GRATINGS (SPECTRA)
Calibration of a helium-cooled infrared spatial radiometer and grating spectrometer p 2384 N94-23607

GRAVIMETRY
An investigation into acceleration determination for airborne gravimetry using the global positioning system
[ISBN-0-315-59470-5] p 2175 N94-24176

GRAVITATION
Tensor-scalar cosmological models and their relaxation toward general relativity
[PB93-220796] p 2601 N94-23099
GRAVITATIONAL COLLAPSE
The current status of observational constraints on cosmic strings
[DE94-001505] p 2601 N94-23010
GRAVITATIONAL EFFECTS
Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18)
p 2424 N94-23320
Reach performance while wearing the Space Shuttle launch and entry suit during exposure to launch accelerations p 2436 N94-24204
Modeling of PCG fluid dynamics: Salient results
p 2224 N94-24345
The influence of flow type, particle type and gravity on orthokinetic coagulation
[ETN-94-95333] p 2267 N94-25060
The role of visual context in manual target localization
p 2429 N94-25351
Development of a model to assess orthostatic responses p 2427 N94-25376
GRAVITATIONAL FIELDS
An improved gravity model for Mars: Goddard Mars Model-1 (GMM-1)
[NASA-TM-104584] p 2401 N94-23282
A mixed method Poisson solver for three-dimensional self-gravitating astrophysical fluid dynamical systems
p 2484 N94-23684
The pre-development of the Aristoteles calibration mechanism p 2209 N94-24006
Steady motions of rigid body satellites in a central gravitational field
[AD-A273742] p 2206 N94-25532
GRAVITATIONAL PHYSIOLOGY
Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18)
p 2424 N94-23320
Responses to LBNP in men with varying profiles of strength and aerobic capacity: Implications for flight crews
[NASA-TP-3346] p 2426 N94-23530
Artificial gravity in space flight
[AD-A273420] p 2427 N94-24928
The role of visual context in manual target localization
p 2429 N94-25351
Loading, electromyograph, and motion during exercise
p 2427 N94-25359
GRAVITATIONAL WAVES
The current status of observational constraints on cosmic strings
[DE94-001505] p 2601 N94-23010
Choice of filters for the detection of gravitational waves from coalescing binaries. 2: Detection in coloured noise
[DE93-616844] p 2604 N94-25211
A parallel algorithm for filtering gravitational waves from coalescing binaries
[DE93-616845] p 2604 N94-25212
Deviation equations of Synge and Schild in spaces with affine connection and metric, and equations for gravitational waves detectors
[DE93-616852] p 2571 N94-25339
The scattering and collision of gravitational waves in Friedmann-Robertson-Walker open universes
[MATHS-REPT-A-193] p 2406 N94-25430
GRAVITY GRADIOMETERS
The pre-development of the Aristoteles calibration mechanism p 2209 N94-24006
GRAVITY WAVES
Hamiltonian approach to fairly low and long gravity waves
[PB94-111119] p 2404 N94-24598
Observational case studies and diagnostic analyses of long-lived large-amplitude inertia-gravity waves
[AD-A273545] p 2404 N94-24794
A diagnostic model to estimate winds and small-scale drag from Mars Observer PMIRR data
p 2617 N94-24874
Three-dimensional numerical simulation of thermal tides in the Martian atmosphere p 2622 N94-24901
GREASES
Tribological characterization of spatial wet lubricants under vacuum p 2264 N94-24010
BLAST, a new lubricant screening tester for space oils and greases p 2362 N94-24042
Investigation of the ultrafiltration technique using military greases
[AD-A273633] p 2261 N94-25029
GREEN'S FUNCTIONS
Rigorous analysis of thick microstrip antennas and wire antennas embedded in a substrate
[EUT-92-E-263] p 2290 N94-22876
Unsteady three-dimensional thermal field prediction in turbine blades using nonlinear BEM
p 2325 N94-23665
Fast fourier transforms of piecewise constant functions
[AD-A272648] p 2456 N94-24535
Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699
On a new functional integral formalism for Hubbard model
[DE93-614017] p 2492 N94-25334
Weak interactions in a bilocal chiral theory
[DE93-616887] p 2539 N94-25477
GREENHOUSE EFFECT
Catalog of data bases and reports
[DE93-040597] p 2568 N94-22875
Overview of global greenhouse effects
[DE93-041165] p 2396 N94-22887
Radiative forcing calculations for SF6 and CH4 using a correlated k-distribution transmission model
[DE94-001855] p 2397 N94-23700
Cloud-free aerosol optical depth determination over oceans from satellite radiometry
[DE94-001897] p 2386 N94-23779
Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167
GRID GENERATION (MATHEMATICS)
A geometric weighted elliptic grid regeneration method for 3D unstructured ALE hydrodynamics
[DE94-000309] p 2448 N94-22980
Computation of propulsion-related flowfields using unstructured adaptive meshes p 2215 N94-23056
POISs3: A 3D poisson smoother of structured grids
[PB93-226231] p 2318 N94-23115
Tracking sharp interface of two fluids by the CIP (Cubic-Interpolated Propagation) scheme
[DE93-508322] p 2319 N94-23460
Parallel unstructured grid generation for computational aerosciences
[NASA-CR-192244] p 2466 N94-23483
Simulation of unsteady flows through stator and rotor blades of a gas turbine using the Chimera method
p 2323 N94-23652
The Sixth Copper Mountain Conference on Multigrid Methods, part 1
[NASA-CP-3224-PT-1] p 2482 N94-23673
FAS multigrid calculations of three dimensional flow using non-staggered grids p 2341 N94-23675
A comparison of locally adaptive multigrid methods: LDC, FAC and FIC p 2485 N94-23692
An object-oriented approach for parallel self adaptive mesh refinement on block structured grids
p 2469 N94-23697
Unstructured grid large eddy simulation of wall bounded turbulent flows p 2329 N94-24151
Unstructured adaptive mesh computations of rotorcraft high-speed impulsive noise
[NASA-CR-195090] p 2529 N94-24307
Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis
[NASA-CR-194795] p 2335 N94-24640
A two-dimensional dispersion module for the TOUGH2 simulator
[DE94-002262] p 2335 N94-24655
Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699
An integrated runtime and compile-time approach for parallelizing structured and block structured applications
[NASA-CR-191554] p 2458 N94-24740
Numerical flow simulation for complete vehicle configurations
[AD-A273588] p 2170 N94-24849
FRANC2D: A two-dimensional crack propagation simulator. Version 2.7: User's guide
[NASA-CR-4572] p 2246 N94-25118
Development and application of new algorithms for the simulation of viscous compressible flows with moving bodies in three dimensions
[AD-A273514] p 2338 N94-25157
Application of body fitted-coordinates in heat conduction problems
[ETN-94-95338] p 2340 N94-25484
GROUND BASED CONTROL
Graphical programming: A systems approach for telerobotic servicing of space assets
[DE93-019016] p 2472 N94-23201
NASDA's view of ground control in mission operations
p 2305 N94-23835
The space operations at CNES p 2498 N94-23837
Common front end systems for Space Shuttle and Space Station control centers at Johnson Space Center
p 2305 N94-23838
ASTER, a multinational Earth observing concept
p 2389 N94-23840
Ground operation of robotics on Space Station Freedom p 2371 N94-23841
SAMPEX payload operation control center implementation p 2197 N94-23843
A user view of the EURECA ground segment
p 2499 N94-23844
SPOT satellite family: Past, present, and future of the operations in the mission and control center
p 2500 N94-23846
A reference model for space data system interconnection services p 2305 N94-23847
Distributed science operations for JPL planetary missions p 2500 N94-23850
SCOS2: ESA's new generation of mission control systems p 2197 N94-23851
Operations concepts for Mars missions with multiple mobile spacecraft p 2501 N94-23852
Preparing the DSN operations concepts
p 2501 N94-23853
NASDA satellite mission operation system and operations p 2501 N94-23854
NASA/Goddard Space Flight Center's testbed for CCSDS compatible systems p 2197 N94-23855
SPOT4 Operational Control Center (CMP)
p 2197 N94-23856
Ground data system for Space Flyer Unit (SFU)
p 2207 N94-23860
Radioastron flight operations p 2502 N94-23861
Management of information for mission operations using automated keyword referencing p 2506 N94-23886
AMFESYS: Modelling and diagnosis functions for operations support p 2506 N94-23887
Mars Observer screen display design for a multimission environment p 2197 N94-23888
The FOT tool kit concept p 2507 N94-23889
GSMS and space views: Advanced spacecraft monitoring tools p 2507 N94-23890
VMPLOT: A versatile analysis tool for mission operations p 2507 N94-23891
The mission events graphic generator software: A small tool with big results p 2464 N94-23893
Customizing graphical user interface technology for spacecraft control centers p 2510 N94-23905
Reliable transfer of data from ground to space
p 2305 N94-23908
Kalman filtering applied to real-time monitoring of apogee maneuvers p 2196 N94-23923
MERCATOR: Methods and Realization for Control of the Attitude and the Orbit of spacecraft
p 2202 N94-23925
HISPASAT launch and early operations phases: Computation and monitoring of geostationary satellite positioning p 2514 N94-23928
Intelligent tutoring and aiding in satellite ground control p 2443 N94-23929
Operational training for the mission operations at the Brazilian National Institute for Space Research (INPE)
p 2429 N94-23933
GenSAA: A tool for advancing satellite monitoring with graphical expert systems p 2516 N94-23945
EOS ground data systems: A description and interface overview p 2517 N94-23948
Telemetry ground system development via the component approach p 2203 N94-23949
GROUND CREWS
Evaluation of computer-aided instruction techniques for the crew interface coordination position
p 2429 N94-24438
GROUND OPERATIONAL SUPPORT SYSTEM
Making adaptable systems work for mission operations: A case study p 2506 N94-23883
An approach to the design of operations systems
p 2506 N94-23884
GROUND STATE
Ultracold atoms in traps and fountains
[ETN-94-95325] p 2537 N94-25239
GROUND STATIONS
Implementation of a system to provide mobile satellite services in North America p 2281 N94-22784
INMARSAT's personal communicator system
p 2282 N94-22788
A protocol for satellite access via use of spot-beams
p 2286 N94-22811
NASDA satellite mission operation system and operations p 2501 N94-23854
Ground data system for Space Flyer Unit (SFU)
p 2207 N94-23860
Customizing graphical user interface technology for spacecraft control centers p 2510 N94-23905
The Columbus logistics support at the APMC: Requirements and implementation aspects
p 2515 N94-23935

GROUND SUPPORT EQUIPMENT
Implementation of a system to provide mobile satellite services in North America p 2281 N94-22784
GPHS-RTG's in support of the Cassini mission
[DE94-001445] p 2218 N94-23459
GROUND SUPPORT SYSTEMS
INMARSAT's personal communicator system
p 2282 N94-22788
System services and architecture of the TMI satellite mobile data system p 2286 N94-22817
Expanding the KATE toolbox p 2477 N94-23247
SpaceOps 1992: Proceedings of the Second International Symposium on Ground Data Systems for Space Mission Operations
[NASA-CR-194486] p 2497 N94-23832
Commonality of flight control systems for support of European telecommunications missions
p 2304 N94-23834
The space operations at CNES p 2498 N94-23837
Ground operation of robotics on Space Station Freedom p 2371 N94-23841
A user view of the EURECA ground segment
p 2499 N94-23844
Development of the Cassini Ground Data System in a multimission environment p 2500 N94-23845
SPOT satellite family: Past, present, and future of the operations in the mission and control center
p 2500 N94-23846
A reference model for space data system interconnection services p 2305 N94-23847
Distributed science operations for JPL planetary missions p 2500 N94-23850
Operations concepts for Mars missions with multiple mobile spacecraft p 2501 N94-23852
Preparing the DSN operations concepts
p 2501 N94-23853
NASDA satellite mission operation system and operations p 2501 N94-23854
NASA/Goddard Space Flight Center's testbed for CCSDS compatible systems p 2197 N94-23855
SPOT4 Operational Control Center (CMP)
p 2197 N94-23856
Columbus system support for telescience operations
p 2505 N94-23877
Using Mach threads to control DSN operational sequences p 2477 N94-23916
Deep Space Network (DSN), Network Operations Control Center (NOCC) computer-human interfaces
p 2447 N94-23917
A real-time navigation monitoring expert system for the Space Shuttle Mission Control Center
p 2202 N94-23921
XRTD: An X-Windows based, real-time radiometric display and analysis system p 2305 N94-23922
The Columbus logistics support at the APMC: Requirements and implementation aspects
p 2515 N94-23935
Using SFOC to fly the Magellan Venus mapping mission p 2516 N94-23941
High performance, low cost, self-contained, multipurpose PC based ground systems
p 2516 N94-23943
Space Station Freedom ground data system: Design and operations p 2518 N94-23957
New mission requirements methodologies for services provided by the Office of Space Communications
p 2519 N94-23961
Resource allocation planning with international components p 2520 N94-23963
Scheduling the future NASA Space Network: Experiences with a flexible scheduling prototype
p 2520 N94-23965
Iowa satellite project ISAT-1
[NASA-CR-195517] p 2206 N94-24838
GROUND TESTS
Development of the Cassini Ground Data System in a multimission environment p 2500 N94-23845
LSS systems planning and performance program
[NASA-CR-193882] p 2196 N94-24309
GROUND TRUTH
Optical component MAC Europe ground truth report: Flevoland 1991 (Netherlands)
[BCRS-92-27] p 2382 N94-23177
Uncertainties in climate data sets
[NASA-CR-194848] p 2408 N94-23577
Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991
[PB93-230654] p 2386 N94-23755
GROUND WAVE PROPAGATION
Comparison of HF groundwave propagation models
[AD-A273146] p 2299 N94-24668
GROUND-AIR-GROUND COMMUNICATION
Power attenuation characteristics as switch-over criterion in personal satellite mobile communications
p 2277 N94-22756
Integration of mobile satellite and cellular systems
p 2277 N94-22757
New mission requirements methodologies for services provided by the Office of Space Communications
p 2519 N94-23961
GROUP DYNAMICS
Egalitarian non-average contribution method for cooperative games
[PB94-111705] p 2497 N94-23800
GROUP THEORY
Orbit spaces over commutative rings and projectives as semi-isomorphisms
[DE93-616822] p 2493 N94-25473
GUIDANCE (MOTION)
A tracking sonar sensor for vehicle guidance
[OUEL-1956/92] p 2472 N94-23179
NASA LaRC Workshop on Guidance, Navigation, Controls, and Dynamics for Atmospheric Flight, 1993
[NASA-CP-10127] p 2162 N94-25096
GUIDANCE SENSORS
A tracking sonar sensor for vehicle guidance
[OUEL-1956/92] p 2472 N94-23179
GUIDE VANES
Gas turbine and operating method of the same
[CA-PATENT-APPL-SN-2043039] p 2188 N94-24490
GUINEA PIGS
Interaction of tacrine at M(1) and M(2) cholinoceptors in guinea pig brain p 2421 N94-24294
GULF OF MEXICO
An efficient data assimilation algorithm with a gaussian covariance structure
[AD-A273152] p 2418 N94-24671
GULF STREAM
Vertical motion in the SYNOP central array
[AD-A273593] p 2418 N94-24795
GUN LAUNCHERS
Projectile transverse motion and stability in electromagnetic induction launchers
[DE94-001557] p 2198 N94-23210
GUN PROPELLANTS
The internal structure and dynamics of the railgun plasma armature between infinitely wide ablating rails
[DE94-001473] p 2198 N94-23208
Burning rate of double-base propellant in the presence of plasma p 2155 N94-24252
GUNS (ORDNANCE)
A comparison of in-bore projectile motion from an electromagnetic railgun versus that of a conventional cannon barrel
[AD-A273473] p 2198 N94-24690
GUST LOADS
A review of the Workshop on Fatigue Life Methodologies for Wind Turbines
[DE94-002039] p 2394 N94-23472
Continuous gust response and sensitivity derivatives using state-space models p 2161 N94-24287
GUSTS
ASR-9 microburst detection algorithm
[AD-A273591] p 2415 N94-24850
GYROTROPISM
Polarizability of gyrotropic sphere
[PB93-225019] p 2524 N94-23131

H

H ALPHA LINE
Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994
H II REGIONS
UV extinction and IR emission in diffuse H2 regions
[NASA-CR-195194] p 2600 N94-25270
H LINES
UV spectral variability in the Herbig Ae star HR 5999. 11: The accretion interpretation
[NASA-CR-189313] p 2599 N94-23334
The resonance lines of MG2 as diagnostics of the upper solar chromosphere
[NASA-CR-195084] p 2627 N94-24300
H-INFINITY CONTROL
Nonlinear state space H(sub infinity) control theory
[MEMO-1119] p 2469 N94-22706
Nonlinear systems which have finite-dimensional H(sub infinity) suboptimal central controllers
[MEMO-1120] p 2469 N94-22707
Identification for robust control using an H(sub infinity) norm
[EUT-92-E-261] p 2470 N94-22673
Reduced-order modelling and control of a class of systems for which balanced truncation is Hankel-norm optimal
[OUEL-1922/92] p 2472 N94-23163
Squaring-down and the problems of almost-zeros for continuous-time systems
[PB93-237758] p 2489 N94-24608
Discrete time minimum entropy H(infinity) control problem
[PB93-237808] p 2474 N94-24609
Asymptotic correctors: The LTR
[PB93-199701] p 2474 N94-24627
The H(sub infinity) optimal controller design and reduction for the inertial hold mode of the attitude control system of the XTE spacecraft
[NASA-CR-195137] p 2366 N94-24846
Exploiting structure: Introduction and motivation
[NASA-CR-195136] p 2490 N94-24847
Parametric uncertainty reduction in robust multivariable control
[AD-A273412] p 2460 N94-24927
HABITABILITY
Crew interface analysis: Selected articles on space human factors research, 1987 - 1991
[NASA-TM-104756] p 2433 N94-24185
HADRONS
Low p(sub T) photon production in proton-nucleus collisions at 18 GeV/c
[DE94-001380] p 2532 N94-23007
Calculations of Bose-Einstein correlations from Relativistic Quantum Molecular Dynamics
[DE94-000794] p 2569 N94-23453
B-quark production at hadron colliders
[DE94-001459] p 2534 N94-23806
Proton spin: The role of quark-gluon and hadron degrees of freedom
[DE93-616867] p 2538 N94-25341
A quark structure of hadrons and nuclei
[DE93-616872] p 2539 N94-25474
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476
Weak interactions in a bilocal chiral theory
[DE93-616887] p 2539 N94-25477
HALF PLANES
Transient analysis of conducting half-plane problem with noncausal scattering image
[PB93-225027] p 2524 N94-23110
HALF SPACES
Diffraction analysis of transient acoustic waves: Half-plane in a layered medium
[PB94-110988] p 2526 N94-23726
Ring nuclei of strain for bonded dissimilar elastic half spaces with particular application to axisymmetric crack problems
[OUEL-1966/92] p 2379 N94-25325
HALIDES
Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790
HALLEY'S COMET
Evolution of large-scale plasma structures in comets: Kinematics and physics
[NASA-CR-194777] p 2601 N94-23251
HAMILTON-JACOBI EQUATION
Approximate optimal guidance for the advanced launch system
[NASA-CR-4568] p 2198 N94-24752
HAMILTONIAN FUNCTIONS
Long cycles in graphs with prescribed toughness and minimum degree
[MEMO-1109] p 2478 N94-22727
Relativistic configuration interaction calculation of the correlation energies of highly-charged ions
[DE94-001055] p 2532 N94-22988
The Hamiltonian double-zero eigenvalue
[W-9304] p 2479 N94-23138
Toughness in Hamiltonicity in almost claw-free graphs
[MEMO-1114] p 2487 N94-24053
Comparison of time integration methods for the evolution of galaxies
[PB94-111671] p 2602 N94-24522
Hamiltonian approach to fairly low and long gravity waves
[PB94-111119] p 2404 N94-24598
Criterion for some Hamiltonian graphs to be hamilton-connected
[PB94-110921] p 2489 N94-24651
Thermophysical properties of simple liquid metals: A brief review of theory p 2248 N94-25130
Phase structure of the two-dimensional phi(4) field theory within thermo-field dynamics
[DE93-616850] p 2570 N94-25337
The Casimir energy of the rigid string with massive ends
[DE93-616851] p 2492 N94-25338
Contribution of all excited states to ZFS of a (sup 6) S-state
[DE93-617007] p 2568 N94-25483

HAND (ANATOMY)
Conceptual design of an astronaut hand anthropometry device
[NASA-CR-195490] p 2439 N94-24956

HANDBOOKS
NASA printing, duplicating, and copying management handbook
[NASA-NHB-1490.5] p 2590 N94-23971
Pilot-vehicle interface handbook, chapter 19. Volume 2: Digital systems validation
[DOT/FAA/CT-88/10-VOL-2] p 2438 N94-24830

HANDWRITING
On chain coding of line drawings
[ISBN-9-06-275778-2] p 2462 N94-25252

HANKEL FUNCTIONS
Reduced-order modelling and control of a class of systems for which balanced truncation is Hankel-norm optimal
[OUEL-1922/92] p 2472 N94-23163
Balanced truncation is Hankel-norm optimal when used to approximate a finite-difference model of a parabolic PDE
[OUEL-1921/92] p 2492 N94-25324

HARDNESS
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184

HARDWARE
Experiments with a small behaviour controlled planetary rover p 2371 N94-23427
The Fifth European Space Mechanisms and Tribology Symposium
[ESA-SP-334] p 2355 N94-23985
Primary deployment mechanism for the European Polar Platform p 2207 N94-23995
The Olympus PAX, measurement of mechanism induced vibration p 2362 N94-24041
Postflight hardware evaluation 360T021 (RSRM-21, STS-45), revision A
[NASA-CR-193904] p 2201 N94-24965
Postflight hardware evaluation RSRM-29 (STS-54). Case, seals, and joints PFORs, appendix B
[NASA-CR-193899] p 2367 N94-25020
Computerized testing system software conversion and development: Identifying software and hardware portability issues and solutions
[AD-A273489] p 2462 N94-25287
A soft robot interface
[OUEL-1948/92] p 2463 N94-25468

HARDWARE DESCRIPTION LANGUAGES
Formal verification of digital circuits described in VHDL
[ETN-94-95165] p 2306 N94-22883
Micro SIL-1 simulator
[PB94-110889] p 2454 N94-23750

HARMONIC ANALYSIS
Finite-element modelling of three-dimensional electromagnetic fields using edge and nodal elements
[PB94-111077] p 2298 N94-24597

HARMONIC EXCITATION
Response of an anchored annular cylindrical liquid layer to various axial excitations in zero-gravity
[LRT-WE-9-FB-3-1992] p 2266 N94-23195

HARMONIC FUNCTIONS
Vectorization and parallelization of the finite strip method for dynamic Mindlin plate problems
p 2483 N94-23679

HARMONIC GENERATIONS
Limits on high-order harmonic generation from single-atom calculations
[DE93-019950] p 2531 N94-22869
High-order sum and difference-frequency generation in helium
[DE94-001064] p 2348 N94-23181
Inertial confinement fusion
[DE94-002602] p 2551 N94-23703
Prediction of nonlinear optical properties of organic materials. General theoretical considerations
p 2224 N94-24343
Nonlinear dynamical control of lasers
[AD-A273359] p 2350 N94-24938

HARMONICS
High-order sum and difference-frequency generation in helium
[DE94-001064] p 2348 N94-23181
The use of harmonics in 3-D magnetic fields
[DE94-002274] p 2299 N94-24656

HARTREE APPROXIMATION
Excitation mechanisms for XUV and x ray lasers
[DE93-617006] p 2351 N94-25482

HASTELLOY (TRADEMARK)
Material data representation of hysteresis loops for Hastelloy X using artificial neural networks
[NASA-TM-105990] p 2376 N94-23551
Development testing of the two-watt RTG heat source and Hastelloy-S/T-111 alloy compatibility studies
[DE94-002875] p 2243 N94-23784

HATCHES
An opening mechanism for the scientific airlock outer hatch p 2360 N94-24027

HEAD DOWN TILT
Responses to LBNP in men with varying profiles of strength and aerobic capacity: Implications for flight crews
[NASA-TP-3346] p 2426 N94-23530

HEAD MOVEMENT
Predictive head movement tracking using innovations generated by Kalman filters
[ISBN-0-315-83371-8] p 2427 N94-24467

HEAD-UP DISPLAYS
Cockpit/NVG visual integration issues
p 2432 N94-23983

HEALTH
Waste minimization/pollution prevention at R/D facilities: A cradle-to-grave tracking and information system that will be implemented at Sandia National Laboratories
[DE93-040330] p 2591 N94-24607

HEALTH PHYSICS
Experimental characterization of the AFIT Neutron Facility
[AD-A273822] p 2539 N94-25519

HEART
Primary prevention of coronary heart disease
p 2423 N94-23317
Echocardiographic screening of aircrew candidates
p 2424 N94-23319
Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18)
p 2424 N94-23320
Left ventricular hypertrophy and athlete's heart
p 2424 N94-23321
Aortic valve disease p 2424 N94-23322
Aeromedical implications of mitral valve prolapse
p 2424 N94-23323
Sarcoidosis and the aviator p 2425 N94-23325

HEART DISEASES
Cardiopulmonary Aspects in Aerospace Medicine
[AGARD-LS-189] p 2423 N94-23313
Cardiovascular and pulmonary disease in NATO aircrew: An overview p 2423 N94-23314
Screening for asymptomatic coronary heart disease
p 2423 N94-23315
Aeromedical disposition of Arrhythmias and electrocardiographic findings in aircrew
p 2423 N94-23318
Aortic valve disease p 2424 N94-23322

HEART FUNCTION
Cardiopulmonary Aspects in Aerospace Medicine
[AGARD-LS-189] p 2423 N94-23313
Echocardiographic screening of aircrew candidates
p 2424 N94-23319
Aeromedical implications of mitral valve prolapse
p 2424 N94-23323

HEART VALVES
Aortic valve disease p 2424 N94-23322
Aeromedical implications of mitral valve prolapse
p 2424 N94-23323
Nondestructive evaluations
[DE94-003020] p 2373 N94-24613

HEAT AFFECTED ZONE
New welding and finishing procedures
[DE94-602022] p 2352 N94-23025
Flex bearing UUEC, volume 2
[NASA-CR-193901] p 2365 N94-24588

HEAT BUDGET
Physics of iron
[DE94-002002] p 2402 N94-23721

HEAT ENGINES
A study of element interaction in thermoacoustic engines
[AD-A273228] p 2569 N94-24777

HEAT EXCHANGERS
Assessment of an SP-100 bi-modal propulsion and power system
[DE94-000889] p 2218 N94-23433
Study of transient behavior of finned coil heat exchangers p 2321 N94-23642
A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667
A study of element interaction in thermoacoustic engines
[AD-A273228] p 2569 N94-24777

HEAT FLUX
Fully coupled nonlinear thermomechanical analysis including general contact in PALM2D
[DE94-001661] p 2568 N94-23216
Performance characteristics of the DIII-D advanced divertor cryopump
[DE94-002745] p 2354 N94-23797
Miniature convection cooled plug-type heat flux gauges
[NASA-TM-106483] p 2344 N94-24069
Heat pipe vapor dynamics
[NASA-CR-194217] p 2327 N94-24096
Session on modeling of radiative transfer processes
p 2414 N94-24397
Heat transfer and flow structure in end-wall boundary layers
[AD-A273470] p 2335 N94-24689

HEAT MEASUREMENT
Phase transformations in Cu-Zr multilayers
[DE94-000393] p 2241 N94-23297
Microwave techniques for physical property measurements p 2238 N94-25134

HEAT PIPES
Heat pipe cooled heat rejection subsystem modelling for nuclear electric propulsion
[NASA-CR-191132] p 2219 N94-24061
Heat pipe vapor dynamics
[NASA-CR-194217] p 2327 N94-24096
Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe
[AD-A273830] p 2571 N94-25524

HEAT PUMPS
Enhanced absorption cycle computer model
[DE94-001997] p 2271 N94-23793

HEAT RESISTANT ALLOYS
Tensile properties of 21-6-9 stainless steel at elevated temperatures
[DE94-001852] p 2240 N94-23017
Determination of the compatibility between structural alloys and molten metals at high temperatures
[DE94-000954] p 2241 N94-23434
Material data representation of hysteresis loops for Hastelloy X using artificial neural networks
[NASA-TM-105990] p 2376 N94-23551
Hot hydrogen testing of metallic turbo pump materials
[NASA-CR-193880] p 2244 N94-24066
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276
The importance of properties in modeling
p 2246 N94-25121
An overview of the measurements of thermophysical properties and some results on molten superalloys and semiconductors p 2248 N94-25128
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues
[AD-A273663] p 2251 N94-25450
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues
[AD-A273664] p 2251 N94-25451

HEAT SINKS
Thermoelectric cooled, purge-and-trap device for enhancing the utility of fiber optic VOC sensors
[DE94-001772] p 2541 N94-22722

HEAT SOURCES
Development of a theory of the wear of ceramics
[DE94-002773] p 2254 N94-23783
Development testing of the two-watt RTG heat source and Hastelloy-S/T-111 alloy compatibility studies
[DE94-002875] p 2243 N94-23784

HEAT TRANSFER
Small rocket flowfield diagnostic chambers
p 2210 N94-23030
Flow visualization study in high aspect ratio cooling channels for rocket engines p 2213 N94-23049
CFD analyses of coolant channel flowfields
p 2214 N94-23050
Heat transfer in rocket combustion chambers
p 2214 N94-23051
Characterization of heat transport and radiation hydrodynamics in collisional laser plasmas using collective Thomson scattering
[DE94-001502] p 2349 N94-23209
Assessment of an SP-100 bi-modal propulsion and power system
[DE94-000889] p 2218 N94-23433
SP-100 heat transport technology development
[DE94-000769] p 2218 N94-23452
Field models: Their present and future application in fire safety engineering
[PB93-201622] p 2269 N94-23506
The use of transition region characteristics to improve the numerical simulation of heat transfer in bypass transitional flows
[NASA-TM-106445] p 2320 N94-23525
Convection equation modeling: A non-iterative direct matrix solution algorithm for use with SINDA
p 2323 N94-23651

Mixing and unmixedness in plasma jets 1: Near-field analysis p 2323 N94-23655

Heat transfer in rocket engine combustion chambers and regeneratively cooled nozzles
[NASA-CR-195094] p 2220 N94-24471

Thermal-fluid analysis of the fill and drain operations of a cryogenic fuel tank
[NASA-TM-104273] p 2334 N94-24495

Solid rocket combustion simulator technology using the hybrid rocket for simulation
[NASA-CR-195142] p 2265 N94-24578

Heat transfer and flow structure in end-wall boundary layers
[AD-A273470] p 2335 N94-24689

Relationship between transition and modes of instability in supersonic boundary layers
[NASA-CR-4562] p 2336 N94-24725

Investigation of the heat handling capabilities of DIII-D neutral beamline internal components
[DE94-001107] p 2553 N94-24756

The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896

The importance of properties in modeling
p 2246 N94-25121

Analytical skin friction and heat transfer formula for compressible internal flows
[NASA-CR-191185] p 2170 N94-25173

Measurements of the influence of integral length scale on stagnation region heat transfer
[NASA-TM-106503] p 2338 N94-25183

Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe
[AD-A273830] p 2571 N94-25524

HEAT TRANSFER COEFFICIENTS

Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657

Response-coefficient method for heat-conduction transients with time-dependent inputs
p 2326 N94-23671

HEAT TRANSMISSION

An F2D analysis of the Flow Instability Test (FIT) experiment
[DE94-001420] p 2217 N94-23193

Fully coupled nonlinear thermomechanical analysis including general contact in PALM2D
[DE94-001661] p 2568 N94-23216

Fire safety engineering research in Norway
[PB93-201630] p 2268 N94-23429

HEAT TREATMENT

Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments
[DE93-040161] p 2231 N94-22933

Internal friction associated with dislocation relaxations in virgin martensite
[PB93-226280] p 2240 N94-23119

Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550

Properties and processing characteristics of low density carbon cloth phenolic composites p 2231 N94-24450

Investigate zero-stress replicated optics
[NASA-CR-193889] p 2545 N94-24665

Use of photostress to characterize the mechanical behavior of weldments
[NASA-CR-195201] p 2378 N94-25267

HEATERS

Design of a resistojet for Space Station Freedom
[NASA-CR-195506] p 2221 N94-24979

HEATING

Multigrid and cyclic reduction applied to the Helmholtz equation p 2304 N94-23676

HEATING EQUIPMENT

Hydride thermodynamic machines
[VTT-JULK-768] p 2571 N94-25416

HEAVY IONS

Heavy ion irradiation of Bi-2223 silver-clad tapes for superconducting current density enhancement
[DE93-017416] p 2556 N94-22886

Semiempirical studies of atomic structure
[DE94-001588] p 2531 N94-22937

A study of non-ideal focus properties of 30 deg parallel plate energy analyzers
[NIFS-263] p 2311 N94-24457

Behavior of the intermittency exponents and a quark-gluon plasma formation in the heavy ion collisions
[DE93-616869] p 2541 N94-25342

HEAVY NUCLEI

Behavior of the intermittency exponents and a quark-gluon plasma formation in the heavy ion collisions
[DE93-616869] p 2541 N94-25342

HEISENBERG THEORY

Spin fluctuations in an ordered Heisenberg ferromagnet with dipolar interactions
[PB93-204493] p 2524 N94-24533

HELICAL ANTENNAS

Low cost antennas for MSAT vehicular applications
p 2289 N94-22830

L-band mobile terminal antennas for helicopters
p 2289 N94-22835

HELICAL WINDINGS

Overview of the ATF stellarator program
[DE94-000371] p 2550 N94-23462

HELICOPTER DESIGN

Aeroelastic, aeromechanical and vibration problems in helicopters p 2154 N94-24244

The future of rotary-wing aircraft p 2185 N94-25070

HELICOPTER PERFORMANCE

The future of rotary-wing aircraft p 2185 N94-25070

Remote vibration measurements at a sud aviation alouette 3 helicopter with a CW CO2-laser system
[AD-A273818] p 2190 N94-25516

HELICOPTER PROPELLER DRIVE

NASA/Army rotorcraft transmission research, a review of recent significant accomplishments
[NASA-TM-106508] p 2367 N94-25181

HELICOPTERS

L-band mobile terminal antennas for helicopters
p 2289 N94-22835

An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel
[NASA-TM-106471] p 2166 N94-23299

Analysis of passive acoustic ranging of helicopters from the joint acoustic propagation experiment
p 2529 N94-24220

Unstructured adaptive mesh computations of rotorcraft high-speed impulsive noise
[NASA-CR-195090] p 2529 N94-24307

Validation of the ROTAC code for the rotor noise prediction
[PB93-204311] p 2529 N94-24514

Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699

A parametric study of harmonic rotor hub loads
[NASA-CR-4558] p 2181 N94-24726

Projected effectiveness of airbag supplemental restraint systems in US Army helicopter cockpits
[AD-A273250] p 2174 N94-25141

The ISL rotor bench
[ISL-R-108/92] p 2185 N94-25301

Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505

Validation of vision-based range estimation algorithms using helicopter flight data p 2442 N94-25506

HELIOSPHERE

Solar-terrestrial environmental laboratory
p 2630 N94-23336

HELIOTRONS

Pellet ablation in the large helical device
[NIFS-260] p 2551 N94-24358

Proposal of Modular Heliotron: Advanced modular helical system compatible with closed helical divertor
[NIFS-261] p 2552 N94-24458

HELIPORTS

Combined 1991 and 1992 Robinson-22B (R-22) parking test results
[AD-A273550] p 2193 N94-24559

HELIUM

Atomic probes of surface structure and dynamics
[DE94-001651] p 2530 N94-22720

CFD modeling of microwave electrothermal thrusters
p 2216 N94-23066

High-order sum and difference-frequency generation in helium
[DE94-001064] p 2348 N94-23181

Interpretation of discrepancies in mass spectroscopy data obtained from different experimental configurations
p 2237 N94-23245

Reduction of hydrocarbon impurities in 200 l/h helium liquefier-refrigerator system
[NIFS-259] p 2271 N94-24459

Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects
[NASA-CR-195126] p 2534 N94-24487

Normal zone propagation and thermal hydraulic quenchback in a cable-in-conduit superconductor
[DE94-002457] p 2271 N94-24568

Intramultiplet mixing for Ne(**)(3p) + He at superthermal energies
[ETN-94-95327] p 2538 N94-25240

HELIUM IONS

Multi-ion, multi-event test of ion cyclotron resonance heating
[NASA-CR-194859] p 2540 N94-23495

HELIUM ISOTOPES

Acoustic and optical investigations of superfluid He-3
[PB93-224889] p 2523 N94-23101

HELMET MOUNTED DISPLAYS

A simulation system for Space Station extravehicular activity p 2434 N94-24192

HELMHOLTZ EQUATIONS

Multigrid and cyclic reduction applied to the Helmholtz equation p 2304 N94-23676

Hamiltonian approach to fairly low and long gravity waves
[PB94-111119] p 2404 N94-24598

Solutions of the 2-D Helmoholtz equation for optical waveguides
[DE93-616840] p 2547 N94-25209

HEMODYNAMIC RESPONSES

Evaluation of bioimpedance for the measurement of physiologic variables as related to hemodynamic studies in space flight p 2427 N94-25378

HERMES MANNED SPACEPLANE

HERA (Hermes robot arm) overview
p 2357 N94-24005

HERMITIAN POLYNOMIAL

Application and development of the Schwinger multichannel scattering theory and the partial differential equation theory of electron-molecule scattering
[NASA-CR-194774] p 2536 N94-24798

Generalized Gaussian quadrature rules for systems of arbitrary functions
[AD-A273610] p 2491 N94-24947

HETEROCYCLIC COMPOUNDS

Ordered organic thin films self-assembled from the vapor phase p 2223 N94-24339

HETERODYNING

A low noise 665 GHz SIS quasi-particle waveguide receiver
[NASA-CR-194735] p 2296 N94-24105

A comparison of free-space and fiber mixer performances
[AD-A273558] p 2547 N94-25161

HETEROGENEITY

The computation of R(sub 0) for discrete-time epidemic models with dynamic heterogeneity
[CWI-AM-R9301] p 2420 N94-23521

Heterogeneity in small aliquots of Apolllo 15 olivine-normative basalt: Implications for breccia clast studies p 2616 N94-24373

In situ and ex situ spectroelectrochemical and x ray absorption studies on rechargeable, chemically-modified and other MnO2 materials
[DE94-001387] p 2234 N94-24545

Two-point PADE approximants for Stieltjes series
p 2490 N94-24768

Center for Analysis of Heterogeneous and Nonlinear Media
[AD-A273515] p 2230 N94-25158

HETEROJUNCTION DEVICES

Polycrystalline thin film materials and devices
[DE93-018213] p 2389 N94-22862

Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers
[DE94-002293] p 2350 N94-24659

HETEROJUNCTIONS

Planar varactor frequency multiplier devices with blocking barrier
[NASA-CASE-NPO-18428-1-CU] p 2310 N94-23821

HEURISTIC METHODS

Personnel shift assignment: Existence conditions and network models
[MEMO-1116] p 2585 N94-22704

Structured constraint satisfaction
[PB94-119039] p 2497 N94-23764

Sensitivity analysis of list scheduling heuristics
[PB93-237766] p 2468 N94-24764

Computing techniques in mission planning
p 2522 N94-25012

HIERARCHIES

Computing techniques in mission planning
p 2522 N94-25012

HIGH ALTITUDE

New approaches for tracking earth orbiters using modified GPS ground receivers p 2196 N94-23258

Effect of power system technology and mission requirements on high altitude long endurance aircraft
[NASA-CR-194455] p 2189 N94-25200

HIGH ASPECT RATIO

Flow visualization study in high aspect ratio cooling channels for rocket engines p 2213 N94-23049

HIGH DEFINITION TELEVISION

The HDTV digital audio matrix
[BBC-RD-1993/9] p 2295 N94-24085

HIGH ELECTRON MOBILITY TRANSISTORS

Cryogenic, low-noise high electron mobility transistor amplifiers for the Deep Space Network
p 2291 N94-23262

HIGH ENERGY INTERACTIONS
Accelerator-based neutrino oscillation searches
[DE94-000818] p 2626 N94-23515
Progress report for the UCSD experimental HEP group
[DE94-001357] p 2533 N94-23699
Electro-weak, QCD and top physics at the Tevatron
[DE94-002304] p 2535 N94-24611
Activities of Academia Sinica
[DE93-614529] p 2541 N94-25335

HIGH FIELD MAGNETS
Developments in materials for high-field magnets
[DE94-000761] p 2307 N94-22987

HIGH FREQUENCIES
Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464
Radar signature related radome techniques for flush-mounted HF-, VHF- and, UHF communication antennas
[PB93-204618] p 2294 N94-23742
Comparison of HF groundwave propagation models
[AD-A273146] p 2299 N94-24668
Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669
Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP)
[AD-A273401] p 2301 N94-24926
Effect of high frequency field on the transport properties of superlattice
[DE93-617047] p 2568 N94-25447

HIGH LEVEL LANGUAGES
Modeling of database constraints in active databases
[AD-A273484] p 2592 N94-24691

HIGH POLYMERS
Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160

HIGH POWER LASERS
A new automatic design method to develop multilayer thin film devices for high power laser applications
[DE93-632490] p 2347 N94-22967
Power beaming to space using a nuclear reactor-pumped laser
[DE94-001208] p 2348 N94-23185

HIGH PRESSURE
High pressure Hugoniot of sapphire
[DE94-001048] p 2558 N94-22946
Development testing of the two-watt RTG heat source and Hastelloy-S/T-111 alloy compatibility studies
[DE94-002875] p 2243 N94-23784
Miniature convection cooled plug-type heat flux gauges
[NASA-TM-106483] p 2344 N94-24069
Convective instabilities in traveling fronts of addition polymerization p 2226 N94-24352

HIGH RESOLUTION
Prospects for future ground-based solar observations
p 2624 N94-22842
Prospects for very-high-resolution solar physics with the Simuris inteferometric mission p 2625 N94-22848
SeaWiFS technical report series. Volume 11: Analysis of selected orbit propagation models for the SeaWiFS mission
[NASA-TM-104566-VOL-11] p 2417 N94-23338
ASTER, a multinational Earth observing concept
p 2389 N94-23840
Reducing video frame rate increases remote optimal focus time
[NASA-TM-104018] p 2431 N94-23970

HIGH REYNOLDS NUMBER
A multilevel adaptive projection method for unsteady incompressible flow p 2341 N94-23690
Local isotropy in distorted turbulent boundary layers at high Reynolds number p 2332 N94-24166
Computation of large-scale statistics in decaying isotropic turbulence p 2332 N94-24167
Discrete sensitivity derivatives of the Navier-Stokes equations with a parallel Krylov solver
[NASA-TM-106481] p 2265 N94-24301
The radiated noise from isotropic turbulence revisited
[NASA-CR-191547] p 2333 N94-24356
An analysis for high Reynolds number inviscid/viscid interactions in cascades
[NASA-CR-4519] p 2169 N94-24606
High lift aerodynamics
[NASA-CR-195183] p 2184 N94-25268

HIGH SPEED
Integration and test of high-speed transmitter electronics for free-space laser communications
[NASA-TM-106295] p 2295 N94-24101
Hubble Space Telescope high speed photometer science verification test report
[NASA-CR-189322] p 2205 N94-24710

HIGH SPEED PHOTOGRAPHY
Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61
[NASA-TM-109195] p 2199 N94-24059

HIGH STRENGTH
Ceramic silicon-boron-carbon fibers from organic silicon-boron-polymers
[NASA-CASE-ARC-11956-1-SB] p 2253 N94-23311
Test methods for composites: A status report. Volume 2: Compression test methods
[AD-A273522] p 2230 N94-24779
Test methods for composites: A status report. Volume 1: Tension test methods
[AD-A273501] p 2230 N94-24942

HIGH STRENGTH ALLOYS
Environmentally assisted cracking of high strength beta titanium alloys
[AD-A273598] p 2245 N94-24823

HIGH STRENGTH STEELS
Fatigue crack growth rate studies of medium sulfur low alloy steels tested in high temperature water
[DE93-040437] p 2238 N94-22861
Irradiation damage behavior of low alloy steel wrought and weld materials
[DE94-000519] p 2239 N94-22999
New welding and finishing procedures
[DE94-602022] p 2352 N94-23025
Thermal fatigue: A literature review
[PB93-226306] p 2375 N94-23120
Weldability of Accelerated-Cooled (AcC) high strength TMCP steel X80
[VTT-TIED-1413] p 2251 N94-25419

HIGH TEMPERATURE
Ceramic silicon-boron-carbon fibers from organic silicon-boron-polymers
[NASA-CASE-ARC-11956-1-SB] p 2253 N94-23311
Elevated temperature crack propagation
[NASA-TM-106490] p 2377 N94-24715
High temperature adhesive
[AD-D016019] p 2258 N94-24737
Containerless measurements on liquids at high temperatures p 2238 N94-25125
Detection of velocity in high temperature liquid metals
p 2247 N94-25127
Microwave techniques for physical property measurements p 2238 N94-25134

HIGH TEMPERATURE ENVIRONMENTS
Determination of the compatibility between structural alloys and molten metals at high temperatures
[DE94-000954] p 2241 N94-23434
Microstructural analysis of the 2195 aluminum-lithium alloy welds p 2251 N94-24448
Surface compositional variations of Mo-47Re alloy as a function of temperature
[NASA-TP-3402] p 2245 N94-25117
Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124

HIGH TEMPERATURE GASES
Development of durable high-temperature catalysts for natural gas combustion
[PB93-226447] p 2232 N94-23477

HIGH TEMPERATURE LUBRICANTS
Development of high temperature liquid lubricants for low-heat rejection: Heavy duty diesel engines
[NASA-CR-191197] p 2258 N94-24753

HIGH TEMPERATURE PLASMAS
A relativistic theory on wave propagation in inhomogeneous magnetoplasmas
[ETN-94-95322] p 2554 N94-25285

HIGH TEMPERATURE RESEARCH
An extended laser flash technique for thermal diffusivity measurement of high-temperature materials
p 2238 N94-25132

HIGH TEMPERATURE SUPERCONDUCTORS
High-T(c) superconducting superlattices
[DE93-019200] p 2556 N94-22864
Electrical transport in La(2-x)Sr(x)CuO(4-y)
[DE93-040885] p 2556 N94-22912
Spin-polaron theory of high-T(c) superconductivity. 2: Electronic structure of the CuO2 planes
[DE93-019197] p 2556 N94-22919
The de Haas-van Alphen measurements in Ba(0.6)K(0.4)BiO3
[DE93-041169] p 2556 N94-22920
Report of the Joint Seminar on Solid State Physics, Atomic and Molecular Physics, and Materials Science in the Energy Region of Tandem Accelerators
[DE93-508268] p 2548 N94-22924
Anomalous magnetoresistance behavior of superconducting Nd(2-x)Ce(x)CuO(4-y) single crystal
[DE94-000806] p 2558 N94-22941
Atomic-scale structure of grain boundaries: Correlations to grain boundary properties
[DE94-001289] p 2558 N94-22990
Design of microchannels for cryostabilization of high temperature superconducting magnets
[DE94-001324] p 2559 N94-22993
Exact transformation of the anisotropic Ginzburg-Landau model and its consequences
[DE94-002208] p 2562 N94-23795
Magnetic shielding of interplanetary spacecraft against solar flare radiation
[NASA-CR-195539] p 2204 N94-24334
Tunnelling in metallic contacts on high-T(c) superconductors: A story of charge carriers in YBa2Cu3O(7-delta) and Bi2CaSr2Cu2O(8+delta)
[ISBN-9-03-860142-5] p 2565 N94-25280
The effect of a transport current on the surface barrier of a uniaxial anisotropic superconducting slab
[DE93-617135] p 2566 N94-25390
Surface barrier of a uniaxial anisotropic type 2 superconducting cylinder
[DE93-617137] p 2566 N94-25392
Simulation of the vortex motion in the high T(c) superconductors
[DE93-617138] p 2567 N94-25403

HIGH TEMPERATURE TESTS
Phase transformations in Cu-Zr multilayers
[DE94-000393] p 2241 N94-23297
An assessment of solid lubricant films for use in high temperature space applications p 2363 N94-24044
Hot hydrogen testing of metallic turbo pump materials
[NASA-CR-193880] p 2244 N94-24066

HIGH VOLTAGES
Laser energized high voltage direct current power supply
[AD-D015977] p 2312 N94-25036

HIGHLANDS
Highland crust at the Apollo 14 site: A review
p 2614 N94-24364
Auto-metasomatism of the western lunar highlands: Result of closed system fractionation and mobilization of a KREEPy trapped liquid p 2615 N94-24367
The western highland province at the Apollo 14 site
p 2615 N94-24369

HIGHLY MANEUVERABLE AIRCRAFT
Development of high-angle-of-attack nose-down pitch control margin design guidelines for combat aircraft
p 2164 N94-25107
Feedback control laws for highly maneuverable aircraft
[NASA-CR-195195] p 2190 N94-25176

HILBERT SPACE
Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface
[PB93-237691] p 2480 N94-23438
Quasiconformal mappings, operators on Hilbert space, and local formulae for characteristic classes
[PB93-238079] p 2488 N94-24536
Some maximality results for effect-valued measures
[PB94-111176] p 2569 N94-24575
Signatures of selfadjoint pencils
[PB94-111127] p 2457 N94-24599

HILBERT TRANSFORMATION
Direct digital RF synthesis and modulation for MSAT mobile applications p 2285 N94-22804

HINGES
Deployable video conference table
[NASA-CASE-ARC-11950-1] p 2192 N94-23310
Primary deployment mechanism for the European Polar Platform p 2207 N94-23995
Development steps on the basis of test with the LOCSTAR reflector deployment mechanism
p 2356 N94-23998
Preloaded launch locking devices for SILEX
p 2358 N94-24008
An opening mechanism for the scientific airlock outer hatch p 2360 N94-24027

HIPPOCAMPUS
Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454

HISTOGRAMS
Structure in gamma ray burst time profiles: Correlations with other observables p 2579 N94-24431

HISTORIES
The history of development of molybdenum alloys for structural applications
[DE94-000389] p 2239 N94-22958
The birth of NASA: The diary of T. Keith Glennan
[NASA-SP-4105] p 2630 N94-23333
Soviet developments of planet rovers in period of 1964 - 1990 p 2369 N94-23374
Past US studies and developments for planetary rovers p 2369 N94-23375
Rolls-Royce in perspective: Past, present and future
[PNR-90882] p 2187 N94-23519
The RB211: The first 25 years
[PNR-90977] p 2187 N94-23570

Suddenly, tomorrow came... A history of the Johnson Space Center
[NASA-SP-4307] p 2631 N94-24584
The evolution of the laser: A systems perspective on science, technology and society
[ETN-94-95319] p 2351 N94-25218

HOHLRAUMS
Numerical simulation and analysis of experimental results on stimulated Raman scattering in laser-plasma Hohlraum targets
[DE93-613719] p 2554 N94-25330

HOLDERS
Fingered bola body, bola with same, and methods of use
[NASA-CASE-MSC-21967-1] p 2354 N94-23822
Docking mechanisms: An overview of different systems p 2357 N94-24004
Multipurpose clamping device with electrical connector for in orbit attachment of payloads p 2361 N94-24035

HOLES (MECHANICS)
Condensed-phase thermal decomposition of TATB investigated by Atomic Force Microscopy (AFM) and Simultaneous Thermogravimetric Modulated Beam Mass Spectrometry (STMBMS)
[DE94-000396] p 2232 N94-23298
Pressure wall patch
[NASA-CASE-MFS-28724-1] p 2203 N94-23824

HOLLOW CATHODES
Development of a power electronics unit for the Space Station plasma contactor
[NASA-TM-106486] p 2222 N94-25201

HOLMIUM
Investigation of the optical and laser properties of Tm and Ho in YAG anf YLF
[REPT-94-001] p 2563 N94-24404

HOLOGRAPHIC INTERFEROMETRY
Spatiotemporal behavior and nonlinear dynamics in a phase conjugate resonator
[NASA-CR-4567] p 2543 N94-23529
Real-time holographic endoscopy
[ISL-CO-203/92] p 2343 N94-24054

HOLOGRAPHY
Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545

HOMOGENEOUS TURBULENCE
On the large eddy simulation of turbulent flows in complex geometry p 2329 N94-24148

HOMOGENIZING
Multigrid methods for differential equations with highly oscillatory coefficients p 2484 N94-23685

HOMOLOGY
On BRST quantization of constrained systems
[ETN-94-95386] p 2570 N94-25258

HOMOTOPY THEORY
Theory and computation of optimal low- and medium-thrust transfers
[NASA-CR-194812] p 2217 N94-23275
A homotopy algorithm for digital optimal projection control GASD-HADOC
[NASA-CR-193881] p 2456 N94-24470

HONEYCOMB STRUCTURES
Continuum representations of cellular solids
[DE94-001706] p 2375 N94-23217

HOOKS
Fingered bola body, bola with same, and methods of use
[NASA-CASE-MSC-21967-1] p 2354 N94-23822

HORMONE METABOLISMS
Skeletal muscle metabolism in hypokinetic rats
[NASA-CR-195082] p 2420 N94-24124

HORN ANTENNAS
Advanced electromagnetic methods for aerospace vehicles
[NASA-CR-195111] p 2365 N94-24699

HORSEPOWER
The Triton: Design concepts and methods
[NASA-CR-195542] p 2184 N94-25004

HORSESHOE VORTICES
LinAir: A multi-element discrete vortex Weissinger aerodynamic prediction method
[NASA-TM-108786] p 2167 N94-23557

HOT STARS
Voyager observations of globular clusters
[NASA-CR-194806] p 2598 N94-23330
UV-bright stars in globular clusters
[NASA-CR-189324] p 2599 N94-24666

HOT-WIRE ANEMOMETERS
The use of near-wall hot-wire probes for time-resolved skin-friction measurements p 2316 N94-22857
A method for recognition of frequency cells in a cylinder flow influenced by wall effects p 2316 N94-22860

HOUSINGS
Laser soldering of Sn plated brass integrator assembly housings
[DE94-001149] p 2270 N94-23790
Magnetic power piston fluid compressor
[NASA-CASE-GSC-13565-1] p 2354 N94-23831

HTPB PROPELLANTS
Design considerations of hybrid rockets
p 2156 N94-24254

HUBBLE SPACE TELESCOPE
A quick uplink, expandable executable for the NSSC-1 of the Hubble Space Telescope p 2305 N94-23859
The mission events graphic generator software: A small tool with big results p 2464 N94-23893
An intelligent planning and scheduling system for the HST servicing missions p 2520 N94-23964
Design of a new high-performance pointing controller for the Hubble Space Telescope
[NASA-CR-193891] p 2364 N94-24088
Hubble Space Telescope high speed photometer orbital verification
[NASA-CR-189333] p 2204 N94-24226
Hubble Space Telescope high speed photometer science verification test report
[NASA-CR-189322] p 2205 N94-24710

HUBS
A parametric study of harmonic rotor hub loads
[NASA-CR-4558] p 2181 N94-24726

HUGONIOT EQUATION OF STATE
High pressure Hugoniot of sapphire
[DE94-001048] p 2558 N94-22946

HUMAN BEHAVIOR
Activity Catalog Tool (ACT) user manual, version 2.0
[NASA-CR-177634] p 2430 N94-23527

HUMAN BODY
Quantitative assessment of human motion using video motion analysis p 2436 N94-24203
Development of biomechanical models for human factors evaluations p 2437 N94-24205

HUMAN CENTRIFUGES
Artificial gravity in space flight
[AD-A273420] p 2427 N94-24928

HUMAN FACTORS ENGINEERING
Eye-gaze control of the computer interface: Discrimination of zoom intent
[DE94-000480] p 2429 N94-22997
Pilot-vehicle interface
[DOT/FAA/CT-92/21] p 2430 N94-23083
Harmonisation of man-machine interface experiments in the context of the development of PHARE advanced tools
[PB93-204725] p 2430 N94-23744
SpaceOps 1992: Proceedings of the Second International Symposium on Ground Data Systems for Space Mission Operations
[NASA-CR-194486] p 2497 N94-23832
Automating a human factors evaluation of graphical user interfaces for NASA applications: An update on CHIMES
p 2443 N94-23936
Reducing video frame rate increases remote optimal focus time
[NASA-TM-104018] p 2431 N94-23970
Visual Problems in Night Operations
[AGARD-LS-187] p 2431 N94-23976
Crew interface analysis: Selected articles on space human factors research, 1987 - 1991
[NASA-TM-104756] p 2433 N94-24185
Designers' models of the human-computer interface
p 2433 N94-24188
The use of analytical models in human-computer interface design p 2434 N94-24190
Using computer graphics to design Space Station Freedom viewing p 2434 N94-24191
Use of infrared telemetry as part of a nonintrusive inflight data collection system to collect human factors data
p 2434 N94-24193
Performing speech recognition research with hypercard p 2306 N94-24194
Previous experience in manned space flight: A survey of human factors lessons learned p 2435 N94-24196
Hand controller commonality evaluation process
p 2435 N94-24197
Programmable display pushbuttons on the Space Station's telerobot control panel p 2435 N94-24198
Simulation of the human-telerobot interface on the Space Station p 2436 N94-24202
Development of biomechanical models for human factors evaluations p 2437 N94-24205
Establishing a relationship between maximum torque production of isolated joints to simulate EVA ratchet push-pull maneuver: A case study p 2437 N94-24206
NASA project 1: Full-body dynamometer
[NASA-CR-195507] p 2438 N94-24331
An examination of the operational error database for air route traffic control centers
[DOT/FAA/AM-93/22] p 2175 N94-24472
Concepts and embodiment design of a reentry recumbent seating system for the NASA Space Shuttle
[NASA-CR-195504] p 2438 N94-24667
Evaluation of the UH-1N instrument panel
[AD-A273145] p 2186 N94-24774
Design of a recumbent seating system
[NASA-CR-195503] p 2438 N94-24786
Pilot-vehicle interface handbook, chapter 19. Volume 2: Digital systems validation
[DOT/FAA/CT-88/10-VOL-2] p 2438 N94-24830
A white paper: NASA virtual environment research, applications, and technology
[NASA-TM-109682] p 2428 N94-24855
Conceptual design of an astronaut hand anthropometry device
[NASA-CR-195490] p 2439 N94-24956
Cockpit control system
[NASA-CR-195488] p 2190 N94-24957
New Advances in Mission Planning and Rehearsal Systems
[AGARD-LS-192] p 2521 N94-25008
Human factors of mission planning systems: Theory and concepts p 2521 N94-25010
Human factors of mission planning systems: Applications and implementation p 2522 N94-25011
A simulation study of control and display requirements for zero-experience general aviation pilots
p 2163 N94-25102

HUMAN PERFORMANCE
Harmonisation of man-machine interface experiments in the context of the development of PHARE advanced tools
[PB93-204725] p 2430 N94-23744
Crew interface analysis: Selected articles on space human factors research, 1987 - 1991
[NASA-TM-104756] p 2433 N94-24185
Quantitative assessment of human motion using video motion analysis p 2436 N94-24203
Reach performance while wearing the Space Shuttle launch and entry suit during exposure to launch accelerations p 2436 N94-24204
Development of biomechanical models for human factors evaluations p 2437 N94-24205
Establishing a relationship between maximum torque production of isolated joints to simulate EVA ratchet push-pull maneuver: A case study p 2437 N94-24206
Pilot evaluation system p 2158 N94-24266
An examination of the operational error database for air route traffic control centers
[DOT/FAA/AM-93/22] p 2175 N94-24472
Human factors of mission planning systems: Theory and concepts p 2521 N94-25010
Investigation of hand capabilities under a variety of performance conditions and an attempt to explain performance differences p 2444 N94-25354

HUMAN REACTIONS
Automated system function allocation and display format: Task information processing requirements
p 2434 N94-24189

HUMAN-COMPUTER INTERFACE
Eye-gaze control of the computer interface: Discrimination of zoom intent
[DE94-000480] p 2429 N94-22997
The TOPSIM 4 graphic user interface
[ESA-STM-247] p 2450 N94-23228
MITS architecture V1.0
[PB93-201762] p 2452 N94-23451
Activity Catalog Tool (ACT) user manual, version 2.0
[NASA-CR-177634] p 2430 N94-23527
Harmonisation of man-machine interface experiments in the context of the development of PHARE advanced tools
[PB93-204725] p 2430 N94-23744
Deep Space Network (DSN), Network Operations Control Center (NOCC) computer-human interfaces
p 2447 N94-23917
Making intelligent systems team players: Additional case studies
[NASA-TM-104786] p 2473 N94-24068
CF-18 AN/ALQ-126B-MG 13 IIP interface to the DREO Electronic Warfare Engagement Simulation Facility
[DREO-TN-93-4] p 2296 N94-24118
Activities involving aeronautical, space science, and technology support for minority institutions
[NASA-CR-195095] p 2574 N94-24225
A review of ISEAS design p 2465 N94-24410
Integration and evaluation of a simulator designed to be used within a dynamic prototyping environment
p 2198 N94-24436
World processor: An interface for textual display and manipulation in virtual reality
[PB94-118643] p 2592 N94-24642
Analyzing the properties of user interface software
[AD-A273601] p 2460 N94-24933
A comparative evaluation plan for the Maintenance, Inventory, and Logistics Planning (MILP) System Human-Computer Interface (HCI) p 2588 N94-25373

HUMIDITY
Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2
[NASA-CR-193893] p 2229 N94-24224

HURRICANES
Hurricane risk assessment: Rollback or ride out
p 2416 N94-23248
An adaptive multigrid model for hurricane track prediction p 2416 N94-23687
Implementation of a state of the art automated system for the production of cloud/water vapor motion winds from geostationary satellites
[NASA-CR-195087] p 2410 N94-24125

HYBRID PROPELLANT ROCKET ENGINES
Design considerations of hybrid rockets
p 2156 N94-24254
Solid rocket combustion simulator technology using the hybrid rocket for simulation
[NASA-CR-195142] p 2265 N94-24578

HYBRID PROPULSION
Electric and hybrid vehicles program
[DE93-040664] p 2352 N94-22881
NASA Propulsion Engineering Research Center, volume 2
[NASA-CR-194719-VOL-2] p 2209 N94-23028

HYDRAULIC CONTROL
Electro-rheological control valve
[AD-D015997] p 2367 N94-25055

HYDRAULIC FLUIDS
FTIR quantification of industrial hydraulic fluids in perchloroethylene p 2264 N94-23243

HYDRAULICS
Modeling dynamically coupled fluid-duct systems with finite line elements
[NASA-CR-193909] p 2376 N94-24359

HYDRAZIDES
Di(hydroxyphenyl)- 1,2,4-triazole monomers
[NASA-CASE-LAR-14440-2] p 2252 N94-23075

HYDRIDES
Magnetic properties of NdCo3 and its gamma phase hydride NdCo3H(4.1)
[REPT-A-2655] p 2567 N94-25412

HYDROCARBON FUELS
Configuration development study of the OSU 1 hypersonic research vehicle
[NASA-CR-195522] p 2181 N94-24591

HYDROCARBONS
Reduction of hydrocarbon impurities in 200 l/h helium liquefier-refrigerator system
[NIFS-259] p 2271 N94-24459
Design of a vehicle based system to prevent ozone loss
[NASA-CR-195498] p 2180 N94-24479
Near-surface seismic imaging
[PB94-119096] p 2404 N94-24647
Potent solvents for C60 and their utility for the rapid acquisition of 13CNMR data for fullerenes
[AD-A273349] p 2235 N94-24925

HYDROCHLORIDES
Di(hydroxyphenyl)- 1,2,4-triazole monomers
[NASA-CASE-LAR-14440-2] p 2252 N94-23075

HYDRODYNAMICS
A geometric weighted elliptic grid regeneration method for 3D unstructured ALE hydrodynamics
[DE94-000309] p 2448 N94-22980
Characterization of heat transport and radiation hydrodynamics in collisional laser plasmas using collective Thomson scattering
[DE94-001502] p 2349 N94-23209
HERACLITUS, phase 1. Harbour Entrance of Rotterdam Radar based Current Related Information for Traffic Guidance of Ships: Feasibility of deriving current profile data from sea surface observations in the Rotterdam (Netherlands) port entrance
[BCRS-93-04] p 2417 N94-24107
A two-dimensional dispersion module for the TOUGH2 simulator
[DE94-002262] p 2335 N94-24655
The hydrodynamics of a moving fluid-liquid contact line
[ETN-94-95352] p 2339 N94-25247
Hydrodynamics of stirred gas-liquid dispersions
[ETN-94-95368] p 2339 N94-25254
Coherent structures over grooved surfaces
[ETN-94-95308] p 2339 N94-25291

HYDROELASTICITY
Coupled frequencies of a hydroelastic rectangular system
[LRT-WE-9-FB-4-1992] p 2375 N94-23196

HYDROELECTRICITY
Snow modeling, water resources, climate change
[PB93-201770] p 2399 N94-24633

HYDROGEN
Analysis of Alloy 600 and X-750 stress corrosion cracks
[DE94-001578] p 2238 N94-22936
Robust, wide-range hydrogen sensor for use in commercial, space, and government applications
[DE93-040902] p 2342 N94-22954
A novel method for determination of transport parameters of H2 and O2 in PEMFCs
[DE94-001492] p 2389 N94-22962
Diffusion of hydrogen in iron oxides
[DE93-632430] p 2239 N94-22966
Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009
Axisymmetric single shear element combustion instability experiment p 2213 N94-23044
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200
Selective hydrogen separation by palladium-based composite membranes
[PB93-201671] p 2254 N94-23431
Assessment of an SP-100 bi-modal propulsion and power system
[DE94-000889] p 2218 N94-23433
Optical model analyses of galactic cosmic ray fragmentation in hydrogen targets
[NASA-TP-3404] p 2540 N94-23509
Hot hydrogen testing of metallic turbo pump materials
[NASA-CR-193880] p 2244 N94-24066
Pellet ablation in the large helical device
[NIFS-260] p 2551 N94-24358
Environmentally assisted cracking of high strength beta titanium alloys
[AD-A273598] p 2245 N94-24823
Surface compositional variations of Mo-47Re alloy as a function of temperature
[NASA-TP-3402] p 2245 N94-25117
UV extinction and IR emission in diffuse H2 regions
[NASA-CR-195194] p 2600 N94-25270
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 4: Oil/Gas Pipeline
[AD-A273665] p 2250 N94-25405
Metal hydride storage
[VTT-JULK-769] p 2396 N94-25417

HYDROGEN CHLORIDES
Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790

HYDROGEN COMPOUNDS
Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790

HYDROGEN EMBRITTLEMENT
Analysis of Alloy 600 and X-750 stress corrosion cracks
[DE94-001578] p 2238 N94-22936
Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009
Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556
Environmentally assisted cracking of high strength beta titanium alloys
[AD-A273598] p 2245 N94-24823
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 4: Oil/Gas Pipeline
[AD-A273665] p 2250 N94-25405
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations
[AD-A273662] p 2251 N94-25449

HYDROGEN FUELS
Configuration development study of the OSU 1 hypersonic research vehicle
[NASA-CR-195522] p 2181 N94-24591

HYDROGEN ISOTOPES
Carbon and hydrogen isotope composition and C-14 concentration in methane from sources and from the atmosphere: Implications for a global methane budget
[NASA-CR-195166] p 2399 N94-25092

HYDROGEN MASERS
Ultracold atoms in traps and fountains
[ETN-94-95325] p 2537 N94-25239

HYDROGEN OXYGEN ENGINES
Laser diagnostics for small rockets
p 2210 N94-23032
CFD analyses of combustor and nozzle flowfields
p 2210 N94-23033
Two stage turbine for rockets p 2215 N94-23059
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
STE thrust chamber technology: Main injector technology program and nozzle Advanced Development Program (ADP)
[NASA-CR-193919] p 2221 N94-25019

HYDROGEN PRODUCTION
Recent advances in SPE (tm) water electrolyzer
p 2393 N94-23362

HYDROGEN RECOMBINATIONS
Performance assessment of low pressure nuclear thermal propulsion p 2217 N94-23070

HYDROGEN SULFIDE
High-resolution soft x ray photoionization studies of selected molecules
[DE94-000568] p 2532 N94-23002

HYDROGENATION
Organometallic chemistry of bimetallic compounds
[DE94-002313] p 2238 N94-22897

HYDROLOGICAL CYCLE
GEWEX p 2385 N94-23614
GEWEX Water Vapor Project (GVaP)
p 2411 N94-24378
Measurement and modeling of moist processes
p 2413 N94-24385
Snow modeling, water resources, climate change
[PB93-201770] p 2399 N94-24633

HYDROLOGY
Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop
[PB93-220135] p 2407 N94-23129
Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734
Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387
Joint sessions on moisture processes and cumulus parameterization p 2414 N94-24393
Hydraulics and morphology of mountain rivers: A literature survey. Communications on hydraulic and geotechnical engineering
[PB94-110772] p 2388 N94-24636
Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861

HYDROLOGY MODELS
Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop
[PB93-220135] p 2407 N94-23129
Integrated use of hydrological modelling and remote sensing in the province of Drenthe (The Netherlands): Possibilities and restrictions
[REPT-61] p 2382 N94-23148
Report of the proceedings of the Colloquium and Workshop on Multiscale Coupled Modeling
[NASA-CP-3217] p 2410 N94-24374
GEWEX Continental-scale International Project (GCiP)
p 2411 N94-24376
Measurement and modeling of moist processes
p 2413 N94-24385
Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387
Session on coupled land surface/hydrological/atmospheric models
p 2414 N94-24395

HYDROLYSIS
On the mechanism of action of 3',5'-cyclic adenosine monophosphate: A study of four- and five-coordinated phosphorus compounds, modelling the activated state of cAMP
[ISBN-9-03-860222-7] p 2226 N94-25238

HYDROMETALLURGY
Integrated hydrometallurgical jarosite treatment
[PB93-217990] p 2232 N94-22983

HYDROMETEOROLOGY
Water cycle research associated with the CaPE hydrometeorology project (CHymP p 2416 N94-24414

HYDROPHONES
Preprocessor and adaptive beamformer for linear-frequency modulation active signals
[AD-D016008] p 2302 N94-25048

HYDROSTATICS
A technique to measure rotordynamic coefficients in hydrostatic bearings p 2215 N94-23061
The influence of orography on the transport of atmospheric constituents p 2619 N94-24886

HYDROTHERMAL SYSTEMS
Reactive trace metals as indicators of subduction and ventilation processes in the ocean
[AD-A273585] p 2419 N94-25164

HYDROXYL COMPOUNDS
Di(hydroxyphenyl)- 1,2,4-triazole monomers
[NASA-CASE-LAR-14440-2] p 2252 N94-23075
HYDROXYL EMISSION
Infrared and SiO maser observations of OH/IR stars
[PB94-104890] p 2599 N94-24780
HYPERBOLIC DIFFERENTIAL EQUATIONS
Characteristic method for one-dimensional scalar hyperbolic conservation laws with stiff source terms
[PB93-237675] p 2491 N94-24954
HYPERBOLIC FUNCTIONS
An adaptive streamline diffusion finite element method for hyperbolic systems in gas dynamics
[PREPRINT-688] p 2340 N94-25466
Arbitrary-order numerical schemes for linear hyperbolic systems
[CRANFIELD-AERO-9211] p 2523 N94-25480
HYPERCUBE MULTIPROCESSORS
Discrete sensitivity derivatives of the Navier-Stokes equations with a parallel Krylov solver
[NASA-TM-106481] p 2265 N94-24301
HYPERFINE STRUCTURE
The nanostructure of multilayered films: A NMR study
[ETN-94-95347] p 2262 N94-25222
A scalar-vector model of quark-antiquark interaction under linear confinement
[DE93-616871] p 2538 N94-25317
HYPERPLANES
The fundamental group of the complement of complexified real arrangements
[DE93-616847] p 2491 N94-25214
HYPERSONIC AIRCRAFT
NASA/USRA advanced design program
[NASA-CR-195548] p 2180 N94-24492
HYPERSONIC FLIGHT
NASA/USRA advanced design program
[NASA-CR-195548] p 2180 N94-24492
Advanced ballistic range technology
[NASA-CR-195198] p 2165 N94-25169
HYPERSONIC FLOW
Shock tunnel studies of scramjet phenomena, supplement 7
[NASA-CR-191572] p 2319 N94-23513
Shock tunnel studies of scramjet phenomena, supplement 8
[NASA-CR-191573] p 2320 N94-23532
Stability of hypersonic flow of a detonable gas mixture in the stagnation region of a blunt body and a forward facing step p 2154 N94-24248
Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects
[NASA-CR-195126] p 2534 N94-24487
HYPULSE combustor analysis
[NASA-CR-191579] p 2336 N94-24771
HYPERSONIC SHOCK
An investigation on a new technique to improve the performance of the shock tube/tunnel testing in the equilibrium interface condition p 2154 N94-24247
HYPERSONIC VEHICLES
An engineering code to analyze hypersonic thermal management systems p 2320 N94-23636
Configuration development study of the OSU 1 hypersonic research vehicle
[NASA-CR-195522] p 2181 N94-24591
Hypersonic vehicle control law development using H(infinity) and micron-synthesis p 2163 N94-25104
Effect of aeroelastic-propulsive interactions on flight dynamics of a hypersonic vehicle p 2164 N94-25113
HYPERSONICS
NASA/USRA advanced design program
[NASA-CR-195548] p 2180 N94-24492
Design project: LONGBOW supersonic interceptor
[NASA-CR-195510] p 2180 N94-24581
HYPERTENSION
Arterial hypertension and the aviator
p 2425 N94-23328
HYPERVELOCITY FLOW
Calibration of HYPULSE for hypervelocity air flows corresponding to flight Mach numbers 13.5, 15, and 17
[NASA-CR-191578] p 2192 N94-23564
HYPERVELOCITY IMPACT
Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database Shock Physics Index
[DE94-001679] p 2589 N94-23126
Design of orbital debris shields for oblique hypervelocity impact
[NASA-CR-195152] p 2205 N94-24828
HYPERVELOCITY PROJECTILES
The internal structure and dynamics of the railgun plasma armature between infinitely wide ablating rails
[DE94-001473] p 2198 N94-23208
HYPERVELOCITY WIND TUNNELS
An investigation on a new technique to improve the performance of the shock tube/tunnel testing in the equilibrium interface condition p 2154 N94-24247
HYPOTENSION
Evaluation of bioimpedance for the measurement of physiologic variables as related to hemodynamic studies in space flight p 2427 N94-25378
HYPOTHERMIA
Survival suit for submarine personnel: Summary of evaluation studies
[PB93-204634] p 2430 N94-23743
HYPOXIA
Physiological protection for aircrew at high altitudes: A review of the literature
[DCIEM-93-13] p 2432 N94-24114
HYSTERESIS
Photo-induced and electrooptic properties of (Pb,La)(Zr,Ti)O3 films for optical memories
[DE93-019820] p 2542 N94-23202
Material data representation of hysteresis loops for Hastelloy X using artificial neural networks
[NASA-TM-105990] p 2376 N94-23551

I

ICE
Characteristics of surface roughness associated with leading edge ice accretion
[NASA-TM-106459] p 2166 N94-23522
Close-up analysis of inflight ice accretion
[NASA-TM-106457] p 2172 N94-23523
Mars Operational Environmental Satellite (MOES): A post-Mars Observer discovery mission
p 2620 N94-24890
ICE ENVIRONMENTS
A solar photovoltaic power system for use in Antarctica
[NASA-TM-106417] p 2395 N94-24071
ICE FORMATION
Flow quality studies of the NASA Lewis Research Center Icing Research Tunnel diffuser
[NASA-TM-106311] p 2192 N94-23091
An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel
[NASA-TM-106471] p 2166 N94-23299
Characteristics of surface roughness associated with leading edge ice accretion
[NASA-TM-106459] p 2166 N94-23522
Close-up analysis of inflight ice accretion
[NASA-TM-106457] p 2172 N94-23523
Rime-, mixed- and glaze-ice evaluations of three scaling laws
[NASA-TM-106461] p 2173 N94-24047
Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61
[NASA-TM-109195] p 2199 N94-24059
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-58
[NASA-TM-109194] p 2200 N94-24577
Examination of the physical, electrical, and microwave evolution of water into young sea ice
[AD-A273559] p 2418 N94-24918
National Academy of Sciences-Academy of Sciences of the USSR Workshop on the Mechanics of Ice and its Applications
[AD-A273338] p 2419 N94-25088
ICE MAPPING
The effect of sub-surface volume scattering on the accuracy of ice-sheet altimeter retracking algorithms
[NASA-CR-194825] p 2386 N94-24060
IDEAL GAS
Local grid refinement method for the euler equations
[PB93-223329] p 2317 N94-22985
Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164
IGNITION
Multiple shock initiation of LX-17
[DE94-001524] p 2265 N94-23807
Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275
Transient phenomena in laminar spray combustion
p 2160 N94-24282
IGNITION TEMPERATURE
The ignition temperature of solid explosives exposed to a fire
[DE94-001047] p 2265 N94-23436
Calculation of flame spread on lining materials by the field model KAMELEON. Project 5 of the EUREFIC fire research programme
[PB93-201614] p 2268 N94-23450
ILLUMINATING
Evaluation of visual acuity with Gen 3 night vision goggles
[NASA-TM-108792] p 2431 N94-23974
Illumination requirements for operating a space remote manipulator p 2435 N94-24195
ILLUSIONS
Night vision goggle illusions and visual training
p 2432 N94-23984
ILMENITE
Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component
p 2615 N94-24370
IMAGE ANALYSIS
Artificial neural networks: Application to the optical recognition of music partitions
[ETN-94-95166] p 2470 N94-22884
Image analysis applications to mixing phenomena and turbulent dispersions
[ECL-92-29] p 2317 N94-22971
Computer assisted analysis of auroral images obtained from high altitude polar satellites
[NASA-CR-194873] p 2400 N94-23084
Image pattern recognition supporting interactive analysis and graphical visualization
[NASA-CR-194878] p 2451 N94-23369
A complete public archive for the Einstein IPC
[NASA-CR-189316] p 2453 N94-23559
Method for selection of wavelength bands for multispectral classification
[PB93-204378] p 2388 N94-24741
Image analysis technology applied to problems in crystallography
[AD-A273516] p 2566 N94-25288
Measuring track densities in lunar grains by image analysis p 2623 N94-25355
Validation of vision-based range estimation algorithms using helicopter flight data p 2442 N94-25506
A model-based approach for detection of objects in low resolution passive-millimeter wave images
p 2442 N94-25507
Frost effects on the microstructure of high strength concrete, and methods for their analysis
[VTT-PUBS-126] p 2379 N94-25529
IMAGE CLASSIFICATION
Hyperspectral imagery classification using a backpropagation neural network
[AD-A273615] p 2545 N94-24730
Evaluation of the use of remote-sensing data to identify crop types and estimate irrigated acreage, Uvalde and Medina Counties, Texas, 1989
[PB93-193159] p 2388 N94-24809
IMAGE CONTRAST
Validation of a second generation conspicuity meter
[IZF-1993-A-11] p 2542 N94-22895
IMAGE CORRELATORS
Evaluation of advanced materials through experimental mechanics and modelling p 2374 N94-24454
IMAGE ENHANCEMENT
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A273568] p 2419 N94-24944
Engineering workstation: Sensor modeling
p 2441 N94-25500
Image fusion p 2441 N94-25501
Enhanced image capture through fusion
p 2346 N94-25502
Radar E-O image fusion p 2306 N94-25503
IMAGE INTENSIFIERS
Evaluation of visual acuity with Gen 3 night vision goggles
[NASA-TM-108792] p 2431 N94-23974
Night vision devices and characteristics
p 2432 N94-23982
Night vision goggle illusions and visual training
p 2432 N94-23984
IMAGE MOTION COMPENSATION
Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505
IMAGE PROCESSING
Image processing for acquisition of fluid rest time in the running of an artificial heart valve p 2316 N94-22858
Design of integrated architectures for low level image processing
[ETN-94-95183] p 2445 N94-22901
Novel fringe scanning/Fourier transform method of synthetic imaging
[DE93-018936] p 2542 N94-22917
Analysis of a proposed Compton backscatter imaging technique
[DE93-040537] p 2371 N94-22935
Computer assisted analysis of auroral images obtained from high altitude polar satellites
[NASA-CR-194873] p 2400 N94-23084
Time-frequency domain analysis of vibration signals for machinery diagnostics.(4): Interpretation using image processing techniques
[OUEL-1953/92] p 2353 N94-23178
Integer cosine transform compression for Galileo at Jupiter: A preliminary look p 2292 N94-23266
Neural network research in Finland. Symposium
[PB93-224822] p 2472 N94-23463

Imaging System (INEL) T805 prototype
[DE94-002807] p 2382 N94-23492
Remote sensing, imaging, and signal engineering
[DE94-003021] p 2382 N94-23494
Characteristics of surface roughness associated with leading edge ice accretion
[NASA-TM-106459] p 2166 N94-23522
Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545
A complete public archive for the Einstein IPC
[NASA-CR-189316] p 2453 N94-23559
Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software
p 2305 N94-23842
Multimission image processing and science data visualization p 2518 N94-23955
A colour image processing algorithm to identify copper-based particles in filter debris samples
[DREP-TM-93-19] p 2455 N94-24122
Impact damage in filament wound composite bottles
p 2231 N94-24421
Optimization of techniques to reconstruct images disturbed by atmospheric turbulence in the near infra-red
[PB93-199784] p 2298 N94-24630
Investigation of Raman beam cleanup and phase conjugation
[AD-A273157] p 2545 N94-24672
Optical wavelet transform processor
[AD-A273625] p 2546 N94-24731
VLSI-based video event triggering for image data compression
[NASA-TM-106500] p 2345 N94-25116
Horatio: Libraries for vision applications, release 2.0
[OUEL-1967/92] p 2593 N94-25326
Edge detection using a complex wavelet
[AD-A273699] p 2493 N94-25452
Active camera calibration for a head-eye platform using a variable state dimension filter
[OUEL-1975/93] p 2346 N94-25472
Proceedings of the Workshop on Augmented Visual Display (AVID) Research
[NASA-CP-10128] p 2439 N94-25490
The Radar Image Generation (RIG) model
p 2306 N94-25497
Engineering workstation: Sensor modeling
p 2441 N94-25500
Image fusion p 2441 N94-25501
Enhanced image capture through fusion
p 2346 N94-25502
Radar E-O image fusion p 2306 N94-25503
Expansion-based passive ranging
p 2176 N94-25504
Validation of vision-based range estimation algorithms using helicopter flight data p 2442 N94-25506
A model-based approach for detection of objects in low resolution passive-millimeter wave images
p 2442 N94-25507
Image processing for flight crew enhanced situation awareness p 2442 N94-25508
DCT quantization matrices visually optimized for individual images p 2442 N94-25509
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535

IMAGE RECONSTRUCTION
Integer cosine transform compression for Galileo at Jupiter: A preliminary look p 2292 N94-23266
Optimization of techniques to reconstruct images disturbed by atmospheric turbulence in the near infra-red
[PB93-199784] p 2298 N94-24630
Sensor fusion display evaluation using information integration models in enhanced/synthetic vision applications p 2443 N94-25512

IMAGE RESOLUTION
Experience with parametric binary dissection
[NASA-CR-191552] p 2473 N94-23558
Night vision devices and characteristics
p 2432 N94-23982
Hubble Space Telescope high speed photometer orbital verification
[NASA-CR-189333] p 2204 N94-24226
Extracting projective information from single views of 3D point sets
[OUEL-1973/93] p 2464 N94-25471
Evaluation of image quality p 2443 N94-25514

IMAGES
Mental images p 2429 N94-23980
HORACE: Presentation-level protocol standard for digital transmission of monochrome television images
[AD-A273395] p 2197 N94-25064

IMAGING RADAR
The 94 GHz MMW imaging radar system
p 2306 N94-25493

IMAGING SPECTROMETERS
Prospects for very-high-resolution solar physics with the Simuris inteferometric mission p 2625 N94-22848
Optical component MAC Europe ground truth report: Flevoland 1991 (Netherlands)
[BCRS-92-27] p 2382 N94-23177
MODIS calibration p 2383 N94-23600
Concept of ASTER calibration requirement
p 2384 N94-23609

IMAGING TECHNIQUES
Novel fringe scanning/Fourier transform method of synthetic imaging
[DE93-018936] p 2542 N94-22917
Characterization of CCD-based imaging x ray detectors for diffraction experiments
[DE93-041343] p 2556 N94-22921
Analysis of a proposed Compton backscatter imaging technique
[DE93-040537] p 2371 N94-22935
Orientation imaging microscopy: New possibilities for microstructural investigations using automated BKD analysis
[DE94-000777] p 2557 N94-22938
Measurement of intact-core length of atomizing liquid jets by image deconvolution p 2210 N94-23029
Time-frequency domain analysis of vibration signals for machinery diagnostics.(4): Interpretation using image processing techniques
[OUEL-1953/92] p 2353 N94-23178
Imaging System (INEL) T805 prototype
[DE94-002807] p 2382 N94-23492
Remote sensing, imaging, and signal engineering
[DE94-003021] p 2382 N94-23494
Advanced X ray Astrophysics Facility-Imaging (AXAF-I) thermal analyses using Integrated Thermal Analysis System (ITAS) program p 2320 N94-23635
Synthesis and in-vivo detection of boronated compounds for use in BNCT
[DE94-001899] p 2233 N94-23780
ASTER, a multinational Earth observing concept
p 2389 N94-23840
Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software
p 2305 N94-23842
Estimation of the rain signal in the presence of large surface clutter
[NASA-CR-195105] p 2409 N94-24087
Precipitation measurement using SIR-C: A feasibility study. Investigation at nadir
[NASA-CR-195103] p 2410 N94-24126
JOVE NASA-FIT program: Microgravity and aeronomy projects
[NASA-CR-195121] p 2631 N94-24493
Near-surface seismic imaging
[PB94-119096] p 2404 N94-24647
Preliminary design of a satellite observation system for Space Station Freedom
[NASA-CR-195514] p 2209 N94-24840
The Mars Aerial Platform (MAP) mission
p 2622 N94-24903
Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles
[NASA-CR-195163] p 2201 N94-24919
Conceptual design of an astronaut hand anthropometry device
[NASA-CR-195490] p 2439 N94-24956
Nuclear magnetic resonance imaging with short gradient pulses
[AD-D016006] p 2537 N94-25047
Temperature measurement using infrared imaging systems during turbine engine altitude testing
[NASA-TM-105871] p 2193 N94-25184
Synthetic vision system flight test results and lessons learned p 2429 N94-25492
Passive millimeter-wave imaging p 2306 N94-25494
The Radar Image Generation (RIG) model
p 2306 N94-25497
Advanced radiometric and interferometric milimeter-wave scene simulations p 2306 N94-25498

IMIDES
Polyimide processing additives
[NASA-CASE-LAR-13669-2] p 2252 N94-23079
The evolution of energy-transducing systems. Studies with archaebacteria
[NASA-CR-195129] p 2422 N94-24811

IMINES
Planar poly(p-phenylene) derivatives: Ladder formation for maximization of extended conjugation
[AD-A273220] p 2260 N94-24922

IMMUNE SYSTEMS
Cytokines and immune surveillance in humans
[NASA-CR-194801] p 2425 N94-23331
Exercise, exercise training, and the immune system. A compendium of research (1902-1991)
[NASA-TM-108778] p 2426 N94-23575

IMMUNOASSAY
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-195102] p 2420 N94-23633

IMMUNOLOGY
Cytokines and immune surveillance in humans
[NASA-CR-194801] p 2425 N94-23331
Exercise, exercise training, and the immune system. A compendium of research (1902-1991)
[NASA-TM-108778] p 2426 N94-23575
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-195102] p 2420 N94-23633

IMPACT DAMAGE
Analysis of impactor residues in tray clamps from the Long Duration Exposure Facility. Part 2: Clamps from Bay B of the satellite
[NASA-TM-104784] p 2386 N94-24095
A prediction method for the compressive strength of impact damaged composite laminates
[CTN-94-60925] p 2229 N94-24137
Impact damage in filament wound composite bottles
p 2231 N94-24421
J-integral patch for finite element analysis of dynamic fracture due to impact of pressure vessels
p 2381 N94-24429
Assessment of impact damage of composite rocket motor cases
[NASA-CR-195143] p 2220 N94-24595

IMPACT LOADS
Continuum representations of cellular solids
[DE94-001706] p 2375 N94-23217
Development testing of the two-watt RTG heat source and Hastelloy-S/T-111 alloy compatibility studies
[DE94-002875] p 2243 N94-23784
Assessment of impact damage of composite rocket motor cases
[NASA-CR-195143] p 2220 N94-24595
Projected effectiveness of airbag supplemental restraint systems in US Army helicopter cockpits
[AD-A273250] p 2174 N94-25141

IMPACT PREDICTION
Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268

IMPACT STRENGTH
Three-dimensional, inelastic response of single-edge notch bend specimens subjected to impact loading
[AD-A273302] p 2378 N94-25143
Strength and life of pressure vessels subjected to impacts and thermomechanical GFRP loading
[VTT-JULK-771] p 2379 N94-25418

IMPACT TESTS
Method for simulating a vehicle shock test: Design and realization of the required implementation tools
[ECL-92-14] p 2352 N94-22885
High pressure Hugoniot of sapphire
[DE94-001048] p 2558 N94-22946
Assessment of impact damage of composite rocket motor cases
[NASA-CR-195143] p 2220 N94-24595
Three-dimensional, inelastic response of single-edge notch bend specimens subjected to impact loading
[AD-A273302] p 2378 N94-25143

IMPEDANCE
Generalized three-dimensional simulation of ferruled coupled-cavity traveling-wave-tube dispersion and impedance characteristics
[NASA-TP-3389] p 2310 N94-24056

IMPEDANCE MEASUREMENT
Impedance measurements on a spiral-wound nickel/metal hydride cell cycled in a simulated Leo orbit
p 2392 N94-23355

IMPELLERS
Computational Fluid Dynamics (CFD) applications in rocket propulsion analysis and design
p 2214 N94-23054
Hydrodynamics of stirred gas-liquid dispersions
[ETN-94-95368] p 2339 N94-25254

IMPINGEMENT
Optimal Space Station solar array gimbal angle determination via radial basis function neural networks
[NASA-TM-106482] p 2195 N94-24482

IMPREGNATING
Composite material impregnation unit
[NASA-TM-107751] p 2254 N94-23486

IMPROVEMENT
Prospects for improved instrumentation on future solar space missions p 2624 N94-22843

IMPURITIES
Physics with chemically and isotopically pure semiconductors
[DE93-040120] p 2557 N94-22926
Magnetic resonance studies of 3d transition metal impurities in compound semiconductors
[PB93-232197] p 2243 N94-23714

Reduction of hydrocarbon impurities in 200 l/h helium liquefier-refrigerator system
[NIFS-259] p 2271 N94-24459

IN SITU MEASUREMENT
Pulsed Ion Beam Surface Analysis (PIBSA) as a means of in-situ real-time analysis of thin films during growth
[DE94-001276] p 2562 N94-23805
Engine materials characterization and damage monitoring by using x ray technologies
[NASA-TP-3328] p 2372 N94-24074
An investigation of current and future satellite and in-situ data for the remote sensing of the land surface energy balance
[NASA-CR-195138] p 2387 N94-24596
Direct observation of crystal growth from solution using optical investigation of a growing crystal face
[NASA-CR-195141] p 2563 N94-24617

IN-FLIGHT MONITORING
The Olympus PAX, measurement of mechanism induced vibration p 2362 N94-24041

INCIDENCE
Off-design performance of crenulated blades in a linear compressor cascade
[AD-A273744] p 2340 N94-25534

INCINERATORS
Investigating pyrolysis/incineration as a method of resource recovery from solid waste
p 2444 N94-25375

INCLUSIONS
Correlated petrographic, electron microprobe, and ion microprobe studies of selected primitive and processed phase assemblages in meteorites
[NASA-CR-194827] p 2601 N94-23499

INCOHERENT SCATTER RADAR
Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP)
[AD-A273401] p 2301 N94-24926

INCOHERENT SCATTERING
Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP)
[AD-A273401] p 2301 N94-24926

INCOMPRESSIBLE FLOW
Global ocean modeling on the Connection Machine
[DE94-000888] p 2417 N94-23517
Numerical analysis of a vortex controlled diffuser
p 2324 N94-23659
A dual reciprocal boundary element formulation for viscous flows p 2325 N94-23666
FAS multigrid calculations of three dimensional flow using non-staggered grids p 2341 N94-23675
A multilevel adaptive projection method for unsteady incompressible flow p 2341 N94-23690
Multi-grid domain decomposition approach for solution of Navier-Stokes equations in primitive variable form
p 2341 N94-23693
Drag reduction at a plane wall p 2327 N94-24140
Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160
Solution of the discretized incompressible Navier-Stokes equations with iterative methods
[PB94-118635] p 2335 N94-24641
Triangular spectral elements for incompressible fluid flow
[NASA-CR-191588] p 2490 N94-24914
Sub-sonic flow about a slender profile in a tunnel having perforated walls
[AD-A273184] p 2170 N94-25137
Analytical skin friction and heat transfer formula for compressible internal flows
[NASA-CR-191185] p 2170 N94-25173
Unified approach for incompressible flows
p 2342 N94-25356
Detailed description of two calculation programs for incompressible, steady state boundary layer flows, applied to determine the aerodynamic characteristics of NACA12 and OA312 foils at low Reynolds numbers
[ISL-N-604/92] p 2171 N94-25461

INCOMPRESSIBLE FLUIDS
Forced vibrations of a non-viscous drop
[MPIS-24/1992] p 2318 N94-23198
An application of small-gap equations in sealing devices p 2325 N94-23668
Hydro-elastic analysis using a selection of commercial analysis programs
[PB94-118734] p 2376 N94-24478
Triangular spectral elements for incompressible fluid flow
[NASA-CR-191588] p 2490 N94-24914

INCONEL (TRADEMARK)
Effect of irradiation on the stress corrosion cracking behavior of Alloy X-750 and Alloy 625
[DE94-001759] p 2244 N94-23792

Performance characteristics of the DIII-D advanced divertor cryopump
[DE94-002745] p 2354 N94-23797

INDEPENDENT VARIABLES
Subset selection for the best of two populations: Tables of the expected subset size
[PB93-237857] p 2494 N94-23546

INDEXES (DOCUMENTATION)
An information retrieval logical model applied to the formalism of conceptual graphs: The ELEN prototype and its experimentation on a corpus of software components
[ETN-94-95162] p 2588 N94-22879
Aeronautical engineering: A continuing bibliography with indexes (supplement 298)
[NASA-SP-7037(298)] p 2153 N94-23711
Aeronautical engineering: A continuing bibliography with indexes (supplement 299)
[NASA-SP-7037(299)] p 2153 N94-23973

INDIUM ARSENIDES
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1
[AD-A271081] p 2348 N94-23123

INDIUM COMPOUNDS
LPCVD of InN on GaAs(110) using HN3 and TMIn: Comparison with Si(100) results
[AD-A273555] p 2235 N94-24917

INDIUM PHOSPHIDES
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1
[AD-A271081] p 2348 N94-23123
Observation of non-centrosymmetry and determination of polarity in III-V semiconductors
[PB93-201416] p 2561 N94-23503
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers
[DE94-002293] p 2350 N94-24659

INDOOR AIR POLLUTION
Microbiological analysis of debris from Space Transportation System (STS)-55 Spacelab D-2
[NASA-CR-193883] p 2421 N94-24310

INDUCTANCE
An active antenna for ELF magnetic fields
p 2303 N94-25192

INDUCTION MOTORS
Lectures on magnetohydrodynamical drives
[PB93-224962] p 2308 N94-23104
Controllability of free-piston Stirling engine/linear alternator driving a dynamic load
[NASA-TM-106497] p 2521 N94-24302
Design and application of electromechanical actuators for deep space missions
[NASA-CR-195134] p 2365 N94-24842

INDUSTRIAL AREAS
Extinguishment of enclosed gas fires with water sprays
[PB93-201663] p 2268 N94-23430

INDUSTRIAL MANAGEMENT
The increase of the controllability of production organizations
[ISBN-9-03-860161-1] p 2586 N94-25076

INDUSTRIAL WASTES
Aqueous alkaline cleaners: An alternative to organic solvents
[AD-A273510] p 2260 N94-24848
Soil pollution at former industrial sites, the heritage of 150 years of industrial development in Noord-Brabant, The Netherlands
[ISBN-9-09-005758-7] p 2400 N94-25223

INDUSTRIES
Rolls-Royce in perspective: Past, present and future
[PNR-90882] p 2187 N94-23519
Satellite communications systems and technology. Volume 2: Site reports
[NASA-TM-109399] p 2293 N94-23628
Ozone depletion, paradigms, and politics
[DE94-001600] p 2398 N94-24506
What makes industries believe in formal methods
[PB94-110848] p 2272 N94-24648
Information technology in the service society: A twenty-first century lever
[ISBN-0-309-04876-1] p 2593 N94-24833

INELASTIC COLLISIONS
Intramultiplet mixing for Ne(**)(3p) + He at superthermal energies
[ETN-94-95327] p 2538 N94-25240

INELASTIC SCATTERING
Atomic probes of surface structure and dynamics
[DE94-001651] p 2530 N94-22720
Inelastic electron scattering from surfaces
[DE94-001368] p 2531 N94-22733
Spin-hole doping in the Kondo insulator Ce3Bi4Pt3 studied by neutron scattering
[DE93-040107] p 2557 N94-22925

The structure and spin dynamics of lanthanide-bearing silicate glasses
[DE94-001320] p 2252 N94-22992
Perturbation theory in electron diffraction
[PB93-201424] p 2533 N94-23505
Computer simulation of low energy scattering
[ETN-94-95326] p 2537 N94-25082
Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation
[DE93-617053] p 2567 N94-25424
Crystal field in Nd2CuO4
[DE93-617054] p 2567 N94-25425

INEQUALITIES
Class of strong valid inequalities for the discrete lot-sizing and scheduling problem
[PB93-237774] p 2459 N94-24765

INERTIA
Mass properties measurement system dynamics
p 2368 N94-23235
Reactive thrust cruise for a geosynchronous satellite with minimum fuel consumption p 2158 N94-24271

INERTIAL CONFINEMENT FUSION
An antiproton driver for ICF propulsion
p 2217 N94-23069
Inertial confinement fusion
[DE94-002602] p 2551 N94-23703

INERTIAL NAVIGATION
Application of aircraft navigation sensors to enhanced vision systems p 2176 N94-25495
Expansion-based passive ranging
p 2176 N94-25504

INERTIAL PLATFORMS
Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264

INFERENCE
On non-informativeness in a classical Bayesian inference problem
[MEMO-COSOR-92-35] p 2494 N94-23143
Typechecker for bijective pure type systems
[PB94-110814] p 2454 N94-23817

INFILTRATION
Theoretical considerations for Reaction-Formed Silicon Carbide (RFSC) formation by molten silicon infiltration into slurry-derived preforms
[NASA-TM-106414] p 2222 N94-23500

INFORMATION
Mission planning and mission rehearsal systems: Displays and other interactive techniques
p 2522 N94-25013

INFORMATION DISSEMINATION
Performance of the Carbon Dioxide Information Analysis Center (CDIAC)
[DE94-002190] p 2397 N94-23794
The ESIS query environment pilot project
p 2518 N94-23952
Fact-based enterprise information management using NIAM
[DE93-041135] p 2591 N94-24501
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 20: The use of selected information products and services by US aerospace engineers and scientists: Results of two surveys
[NASA-TM-109022] p 2592 N94-24649
NADA/DOD Aerospace Knowledge Diffusion Research Project. Report number 19: The US government technical report and the transfer of federally funded aerospace R/D: An analysis of five studies
[NASA-TM-109061] p 2592 N94-24660
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 21: US aerospace industry librarians and technical information specialists as information intermediaries: Results of the phase 2 survey
[NASA-TM-109064] p 2593 N94-24709
Third Annual Foreign Acquisitions Workshop: Improving Access to Foreign Gray Literature
[NASA-TM-109683] p 2593 N94-24759
NASA tech brief evaluations
[NASA-CR-195150] p 2597 N94-24829
COSMIC monthly progress report
[NASA-CR-195153] p 2460 N94-25023
National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 1
[NASA-CR-188271-VOL-1] p 2632 N94-25348

INFORMATION FLOW
An engineering database management system for spacecraft operations p 2517 N94-23951
Validation activities for LOTOS based on static data flow analysis
[PB94-110863] p 2459 N94-24758
Specification list and function structure for a full-body dynamometer to be used aboard Space Station Freedom
[NASA-CR-195508] p 2439 N94-24835

Human factors of mission planning systems: Applications and implementation p 2522 N94-25011
Mission planning and mission rehearsal systems: Displays and other interactive techniques
p 2522 N94-25013

INFORMATION MANAGEMENT
An information retrieval logical model applied to the formalism of conceptual graphs: The ELEN prototype and its experimentation on a corpus of software components
[ETN-94-95162] p 2588 N94-22879
A general model for dynamic and complex information management: The ELEN prototype object manager for software engineering
[ETN-94-95163] p 2588 N94-22880
Making government work: Electronic delivery of Federal services
[OTA-TCT-578] p 2290 N94-23081
A system for managing information at ATLAS
[DE94-001337] p 2590 N94-23190
Performance of the Carbon Dioxide Information Analysis Center (CDIAC)
[DE94-002190] p 2397 N94-23794
Management of information for mission operations using automated keyword referencing p 2506 N94-23886
EOS ground data systems: A description and interface overview p 2517 N94-23948
Earth observation archive activities at DRA Farnborough p 2519 N94-23958
Fact-based enterprise information management using NIAM
[DE93-041135] p 2591 N94-24501
Waste minimization/pollution prevention at R/D facilities: A cradle-to-grave tracking and information system that will be implemented at Sandia National Laboratories
[DE93-040330] p 2591 N94-24607
COSMIC monthly progress report
[NASA-CR-195153] p 2460 N94-25023
Considerations regarding the deployment of hypermedia at JSC p 2595 N94-25366
NACA collections: A directory of significant collections of the documents of the National Advisory Committee for Aeronautics
[NASA-CR-195686] p 2594 N94-25541

INFORMATION PROCESSING (BIOLOGY)
Investigation of time and intensity effects in operator workload and performance
[CTN-94-60927] p 2433 N94-24171
Process and representation in graphical displays
p 2433 N94-24187
Automated system function allocation and display format: Task information processing requirements
p 2434 N94-24189

INFORMATION RETRIEVAL
An information retrieval logical model applied to the formalism of conceptual graphs: The ELEN prototype and its experimentation on a corpus of software components
[ETN-94-95162] p 2588 N94-22879
Hypermedia support for engineering design system
[PB93-226256] p 2449 N94-23117
Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database Shock Physics Index
[DE94-001679] p 2589 N94-23126
Bibliographic Retrieval System (BARS). Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database. Volume 1: UNIX version query guide customized application for INGRES
[DE94-001703] p 2589 N94-23127
Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database, Shock Physics Index (SPHINX) database, Volume 2: UNIX version user's guide
[DE94-001704] p 2589 N94-23128
SPDB (science processing database): Quick reference guide p 2383 N94-23597
Management of information for mission operations using automated keyword referencing p 2506 N94-23886
The ESIS query environment pilot project
p 2518 N94-23952
Increasing levels of assistance in refinement of knowledge-based retrieval systems
[NASA-CR-195144] p 2591 N94-24552
Correct and efficient interface for logical query languages with complex objects
[PB93-211175] p 2593 N94-24743
Considerations regarding the deployment of hypermedia at JSC p 2595 N94-25366
Factors influencing perceived usability and utility of LIBERTAS at Cranfield: Implications for system modification and user education
[CRANFIELD-AERO-9212] p 2594 N94-25485
A comparison of Boolean-based retrieval to the WAIS system for retrieval of aeronautical information
[NASA-CR-4569] p 2594 N94-25487

INFORMATION SYSTEMS
Structure and flow of data through an environmental data management system
[DE93-040487] p 2589 N94-22934
Making government work: Electronic delivery of Federal services
[OTA-TCT-578] p 2290 N94-23081
Flexible framework for contingent information systems modelling
[PB93-220549] p 2589 N94-23095
Specifications of ETS, the Enhanced Transport Service
[RR-907-I] p 2589 N94-23150
NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-194678] p 2571 N94-23230
MITS architecture V1.0
[PB93-201762] p 2452 N94-23451
Systems engineering: A formal approach. Part 1: System concepts
[PB93-225308] p 2268 N94-23476
Object distribution in orca using compile-time and run-time techniques
[PB94-110574] p 2453 N94-23745
Performance of the Carbon Dioxide Information Analysis Center (CDIAC)
[DE94-002190] p 2397 N94-23794
Mission operations update for the restructured Earth Observing System (EOS) mission p 2499 N94-23839
A reference model for space data system interconnection services p 2305 N94-23847
Management of information for mission operations using automated keyword referencing p 2506 N94-23886
The application of automated operations at the Institutional Processing Center p 2509 N94-23901
Applications of CCSDS recommendations to Integrated Ground Data Systems (IGDS) p 2510 N94-23906
The evolving trend in spacecraft health analysis
p 2202 N94-23946
Using the SPICE system to help plan and interpret space science observations p 2517 N94-23950
The ESIS query environment pilot project
p 2518 N94-23952
Spacecraft crew procedures from paper to computers
p 2433 N94-24186
A simulation system for Space Station extravehicular activity p 2434 N94-24192
Panel to review EOSDIS plans
[NASA-CR-195088] p 2387 N94-24303
The 1993 NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-193862] p 2574 N94-24405
Increasing levels of assistance in refinement of knowledge-based retrieval systems
[NASA-CR-195144] p 2591 N94-24552
Waste minimization/pollution prevention at R/D facilities: A cradle-to-grave tracking and information system that will be implemented at Sandia National Laboratories
[DE93-040330] p 2591 N94-24607
RITL: An information system for application reuse-in-the-large
[PB94-119088] p 2592 N94-24646
A biological survey for the nation
[LC-93-85920] p 2421 N94-24704
Third Annual Foreign Acquisitions Workshop: Improving Access to Foreign Gray Literature
[NASA-TM-109683] p 2593 N94-24759
Information systems strategy in air transport
[AD-A273125] p 2173 N94-24781
Information technology in the service society: A twenty-first century lever
[ISBN-0-309-04876-1] p 2593 N94-24833
Advanced Information Processing System (AIPS)
p 2165 N94-25115
Establishment of computerized numerical databases on thermophysical and other properties of molten as well as solid materials and data evaluation and validation for generating recommended reliable reference data
p 2246 N94-25123
NASA STI program database: Journal coverage (1990-1992)
[NASA-TM-109720] p 2593 N94-25168
Considerations regarding the deployment of hypermedia at JSC p 2595 N94-25366
A comparison of Boolean-based retrieval to the WAIS system for retrieval of aeronautical information
[NASA-CR-4569] p 2594 N94-25487

INFORMATION TRANSFER
Source spacing in B-ISDN
[PB93-201747] p 2293 N94-23508
An engineering database management system for spacecraft operations p 2517 N94-23951
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 20: The use of selected information products and services by US aerospace engineers and scientists: Results of two surveys
[NASA-TM-109022] p 2592 N94-24649
Third Annual Foreign Acquisitions Workshop: Improving Access to Foreign Gray Literature
[NASA-TM-109683] p 2593 N94-24759
National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 2
[NASA-CR-188271-VOL-2] p 2636 N94-25367

INFRARED ASTRONOMY
The three-dimensional structure of the infrared cirrus
[NASA-CR-194870] p 2410 N94-24097
Infrared and SiO maser observations of OH/IR stars
[PB94-104890] p 2599 N94-24780
Catalog of infrared observations, third edition
[NASA-RP-1294] p 2600 N94-25387
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535

INFRARED ASTRONOMY SATELLITE
Catalog of infrared observations, third edition
[NASA-RP-1294] p 2600 N94-25387

INFRARED CIRRUS (ASTRONOMY)
The three-dimensional structure of the infrared cirrus
[NASA-CR-194870] p 2410 N94-24097

INFRARED DETECTORS
Pyroelectric sensors in copolymer integrated on silicon
[LAAS-93044] p 2342 N94-22902
Development of infrared sensors using energy transfer/energy upconversion processes: Study of laser excited fluorescence in rare Earth ion doped crystals
[NASA-TM-108437] p 2233 N94-24073
The IRGen infrared data base modeler
p 2440 N94-25496
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535

INFRARED IMAGERY
ASTER TIR subsystem and calibration
p 2385 N94-23612
Thermal analysis of combinatorial solid geometry models using SINDA p 2323 N94-23650
Hyperspectral imagery classification using a backpropagation neural network
[AD-A273615] p 2545 N94-24730
Temperature measurement using infrared imaging systems during turbine engine altitude testing
[NASA-TM-105871] p 2193 N94-25184
The IRGen infrared data base modeler
p 2440 N94-25496

INFRARED INSTRUMENTS
Mueller matrix analysis of infrared ellipsometry
[PB93-201549] p 2544 N94-23629
Temperature measurement using infrared imaging systems during turbine engine altitude testing
[NASA-TM-105871] p 2193 N94-25184

INFRARED INTERFEROMETERS
Interferometer scan unit mechanism definition
p 2358 N94-24012
High precision double four bar linkage mechanism for interferometric linear scanning p 2359 N94-24013
Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893

INFRARED LASERS
Development of infrared sensors using energy transfer/energy upconversion processes: Study of laser excited fluorescence in rare Earth ion doped crystals
[NASA-TM-108437] p 2233 N94-24073
Infrared and SiO maser observations of OH/IR stars
[PB94-104890] p 2599 N94-24780

INFRARED PHOTOMETRY
Infrared and SiO maser observations of OH/IR stars
[PB94-104890] p 2599 N94-24780

INFRARED RADIATION
Infrared analysis of vapor phase deposited tricresylphosphate (TCP)
[NASA-TM-106423] p 2253 N94-23371
Mueller matrix analysis of infrared ellipsometry
[PB93-201549] p 2544 N94-23629
ASTER, a multinational Earth observing concept
p 2389 N94-23840
The three-dimensional structure of the infrared cirrus
[NASA-CR-194870] p 2410 N94-24097
Use of infrared telemetry as part of a nonintrusive inflight data collection system to collect human factors data
p 2434 N94-24193
Infrared fluorescence studies of electronic-to-vibrational energy transfer in a Br2:NO system
[AD-A273727] p 2539 N94-25443
Infrared sensors and systems for enhanced vision/autonomous landing applications
p 2439 N94-25491
The IRGen infrared data base modeler
p 2440 N94-25496
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535

INFRARED RADIOMETERS
A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research
[DE94-000565] p 2381 N94-23001
Activities of NIST (National Inst. of Standards and Technology) p 2384 N94-23605
Calibration of a helium-cooled infrared spatial radiometer and grating spectrometer p 2384 N94-23607
Concept of ASTER calibration requirement
p 2384 N94-23609
ASTER TIR subsystem and calibration
p 2385 N94-23612
Modeling and data assimilation for Mars Observer
p 2620 N94-24889
INFRARED SCANNERS
A combined Earth scanner and momentum wheel for attitude determination and control of small spacecraft
p 2208 N94-24022
A fifteen years lifetime mechanism for an infrared Earth sensor p 2362 N94-24040
Device for the selective detection of objects
[CA-PATENT-1-308-179] p 2544 N94-24489
INFRARED SIGNATURES
Experimental evaluation of camouflage effectiveness in the thermal infrared
[FEL-93-A043] p 2381 N94-22896
Calibration of a helium-cooled infrared spatial radiometer and grating spectrometer p 2384 N94-23607
Advanced Capability Exhaust Systems/Integrated Product Development for advanced nozzles (ACES/IPD)
[AD-A273209] p 2189 N94-24776
INFRARED SOURCES (ASTRONOMY)
The three-dimensional structure of the infrared cirrus
[NASA-CR-194870] p 2410 N94-24097
INFRARED SPACE OBSERVATORY (ISO)
Opening mechanism for ISO/CVV cover release
p 2357 N94-24001
Design and performances of electromagnetic initiators for space mechanisms: An alternative to pyrotechnic system p 2315 N94-24037
INFRARED SPECTRA
FTIR quantification of industrial hydraulic fluids in perchloroethylene p 2264 N94-23243
Particle sizes and composition of Mars atmospheric dust based upon Viking and Mariner 9 observations
p 2618 N94-24878
Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893
Catalog of infrared observations, third edition
[NASA-RP-1294] p 2600 N94-25387
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535
INFRARED SPECTROMETERS
Optical component MAC Europe ground truth report: Flevoland 1991 (Netherlands)
[BCRS-92-27] p 2382 N94-23177
Calibration of a helium-cooled infrared spatial radiometer and grating spectrometer p 2384 N94-23607
High precision double four bar linkage mechanism for interferometric linear scanning p 2359 N94-24013
Hyperspectral imagery classification using a backpropagation neural network
[AD-A273615] p 2545 N94-24730
Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535
INFRARED SPECTROSCOPY
FTIR quantification of industrial hydraulic fluids in perchloroethylene p 2264 N94-23243
Spectroscopic IR ellipsometry of 100 and 001 oriented YBa2Cu3O(7-delta) films
[PB93-201481] p 2561 N94-23445
Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535
INFRARED STARS
Infrared and SiO maser observations of OH/IR stars
[PB94-104890] p 2599 N94-24780
INFRARED TELESCOPES
Precision Displacement Mechanism (PDM)
p 2360 N94-24026
Report on operations of the Air Force Geophysics Laboratory infrared array spectrometer
[AD-A273800] p 2406 N94-25535
INFRARED WINDOWS
Surface modification of sapphire for enhanced infrared window performance
[DE94-000333] p 2543 N94-23458
INGOTS
Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550
INHIBITORS
Evaluation of ovostatin and ovostatin assay
p 2422 N94-24437
The evolution of energy-transducing systems. Studies with archaebacteria
[NASA-CR-195129] p 2422 N94-24811
INHOMOGENEITY
Electromagnetic scattering by inhomogeneous objects. Solution methods based upon reciprocity theorems of time-convolution and time-correlation type
[PB94-111010] p 2294 N94-23729
Finite-element method for computing three-dimensional electromagnetic fields in inhomogeneous media (1993)
[PB94-111101] p 2298 N94-24637
Two-point PADE approximants for Stieltjes series
p 2490 N94-24768
A relativistic theory on wave propagation in inhomogeneous magnetoplasmas
[ETN-94-95322] p 2554 N94-25285
INJECTION
Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion
[PB94-109873] p 2187 N94-23709
Microinjection of the Yersinia YopE cytotoxin in mammalian cells induces actin microfilament disruption
[FOA-B-40418-4.4] p 2421 N94-24290
Design of a vehicle based system to prevent ozone loss
[NASA-CR-195498] p 2180 N94-24479
INJECTORS
SSME fuel preburner injector characterization
p 2211 N94-23037
Small rocket research and technology
p 2211 N94-23038
Fundamental rocket injector/spray programs at the Phillips Laboratory p 2211 N94-23039
Inherent stability of central element coaxial liquid-liquid injectors p 2212 N94-23043
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
CFD simulation of coaxial injectors
p 2342 N94-24430
HYPULSE combustor analysis
[NASA-CR-191579] p 2336 N94-24771
STE thrust chamber technology: Main injector technology program and nozzle Advanced Development Program (ADP)
[NASA-CR-193919] p 2221 N94-25019
INJURIES
Cellular and tissue injury during nonfreezing cold injury and frostbite
[AD-A270883] p 2423 N94-22732
INLET FLOW
Flow quality studies of the NASA Lewis Research Center Icing Research Tunnel diffuser
[NASA-TM-106311] p 2192 N94-23091
Turbine engine with induced pre-swirl at the compressor inlet
[CA-PATENT-1-317-467] p 2186 N94-23253
Experimental investigation of generic three-dimensional sidewall-compression scramjet inlets at Mach 6 in tetrafluoromethane
[NASA-TM-4497] p 2319 N94-23339
Improving diffusing S-duct performance by secondary flow control
[NASA-TM-106492] p 2170 N94-25182
Two-dimensional CFD modeling of wave rotor flow dynamics
[NASA-TM-106261] p 2189 N94-25185
INLET NOZZLES
Optimization of energy transfer in microwave electrothermal thrusters p 2216 N94-23065
Seal assembly
[CA-PATENT-163126888] p 2364 N94-24128
INORGANIC MATERIALS
Crystal growth of organics for nonlinear optical applications p 2225 N94-24348
INPUT
On dynamic input-output linearization of discrete-time nonlinear systems
[MEMO-1123] p 2447 N94-22711
A mixed map/variable structure observer for target tracking p 2157 N94-24263
INPUT/OUTPUT ROUTINES
Designing parallel programs of parameterized granularity
[ETN-94-95302] p 2468 N94-25278
INSERTS
Rack Insertion End Effector (RIEE) automation
p 2368 N94-23242
INSTRUCTION SETS (COMPUTERS)
CAMAC throughput of a new RISC-based data acquisition computer at the DIII-D tokamak
[DE94-001113] p 2550 N94-23182
INSTRUCTORS
Strategies for recruiting additional African Americans into the NASA JSC summer faculty fellows program
p 2585 N94-25362
INSTRUMENT COMPENSATION
MODIS calibration p 2383 N94-23600
Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror
p 2384 N94-23602
Calibration of a helium-cooled infrared spatial radiometer and grating spectrometer p 2384 N94-23607
Infrared calibration p 2384 N94-23608
In-flight cross-calibration of ASTER/TIR and MODIS-N
p 2385 N94-23611
INSTRUMENT ERRORS
Strain gage measurement errors in the transient heating of structural components
[NASA-TM-104274] p 2376 N94-23487
INSULATION
Postflight hardware evaluation RSRM-29 (STS-54). Appendix E: Insulation postfire data
[NASA-CR-193897] p 2200 N94-24067
INSULATORS
Spin-hole doping in the Kondo insulator Ce3Bi4Pt3 studied by neutron scattering
[DE93-040107] p 2557 N94-22925
INTAKE SYSTEMS
Thrust vectoring theory, laboratory and flight tests
p 2155 N94-24251
INTEGERS
Subset selection with a generalized selection goal based on a loss function
[PB94-111192] p 2494 N94-23798
INTEGRAL EQUATIONS
A dual reciprocal boundary element formulation for viscous flows p 2325 N94-23666
Multigrid method for integral equations and automatic programs p 2464 N94-23696
Integral equations for the microstructures of supercritical fluids
[DE94-002460] p 2535 N94-24569
On a new functional integral formalism for Hubbard model
[DE93-614017] p 2492 N94-25334
INTEGRALS
The explicit computation of integration algorithms and first integrals for ordinary differential equations with polynomials coefficients using trees
[NASA-CR-194787] p 2448 N94-23074
Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination
[PB93-224152] p 2559 N94-23109
INTEGRATED CIRCUITS
Design of integrated architectures for low level image processing
[ETN-94-95183] p 2445 N94-22901
Floating well based design methodology aimed to improve latch-up immunity in a CMOS/DMOS smart power technology
[LAAS-93093] p 2556 N94-22905
Transient analysis of circuits including frequency-dependent components using transgyrator and convolution
[PB93-225001] p 2308 N94-23130
Generation of modules for control communication circuits: A design study used in the framework of the safe vehicle PROMETHEUS
[ETN-94-95171] p 2308 N94-23165
Mixed analog-digital description and simulation: Proposition for VHDL-analogue
[RR-908-I] p 2450 N94-23180
Sensors for process control Focus Team report
[DE93-040897] p 2560 N94-23204
Electronic payloads for Martian missions: A preliminary assessment of technologies p 2610 N94-23408
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique
[DE94-001608] p 2309 N94-23520
Integration and test of high-speed transmitter electronics for free-space laser communications
[NASA-TM-106295] p 2295 N94-24101
Nonlinear optical thin films p 2225 N94-24349
Crosstalk analysis of synchronous and asynchronous optical chip interconnects with direct detection
[AD-A273261] p 2311 N94-24685
MOS analog memory with injection capacitors
[AD-D015990] p 2312 N94-25050

INTEGRATED ENERGY SYSTEMS
Considerations in implementing integrated biomass energy systems in developing countries
[DE93-018720] p 2395 N94-24499
INTEGRATED LIBRARY SYSTEMS
Factors influencing perceived usability and utility of LIBERTAS at Cranfield: Implications for system modification and user education
[CRANFIELD-AERO-9212] p 2594 N94-25485
INTEGRATED MISSION CONTROL CENTER
Common front end systems for Space Shuttle and Space Station control centers at Johnson Space Center
p 2305 N94-23838
ASTER, a multinational Earth observing concept
p 2389 N94-23840
Manned Space-laboratories Control Center (MSCC) operations concept p 2505 N94-23882
Orbital Signature Analyzer (OSA): A spacecraft health/safety monitoring and analysis tool
p 2203 N94-23947
INTEGRATED OPTICS
Optimization of microscopic and macroscopic second order optical nonlinearities p 2226 N94-24354
INTEGRATORS
A comparison of two multi-variable integrator windup protection schemes
[NASA-CR-194436] p 2190 N94-23590
The detection performance of a long-term spectral integrator using normalized and quantized data
[DREP-TM-93-11] p 2455 N94-24130
INTERACTIONAL AERODYNAMICS
Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268
INTERACTIVE CONTROL
Extension of the critical path method
[PB94-118817] p 2488 N94-24527
INTERATOMIC FORCES
Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation
[DE93-617053] p 2567 N94-25424
INTERCALATION
A method to remove intercalates from bromine and iodine intercalated carbon fibers
[NASA-TM-106443] p 2222 N94-23591
INTERFACIAL ENERGY
Atomic-scale structure of grain boundaries: Correlations to grain boundary properties
[DE94-001289] p 2558 N94-22990
INTERFACIAL TENSION
Response of an anchored annular cylindrical liquid layer to various axial excitations in zero-gravity
[LRT-WE-9-FB-3-1992] p 2266 N94-23195
Determination of fiber-matrix interface failure parameters from off-axis tests
[NASA-TM-109043] p 2241 N94-23274
Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface
[PB93-237691] p 2480 N94-23438
Surface and interfacial properties of polymer blends. A literature survey
[PB93-230191] p 2254 N94-23561
Measurement of interfacial tension by use of pendant drop video techniques
[DE93-000168] p 2345 N94-24831
Containerless measurements on liquids at high temperatures p 2238 N94-25125
Surface chemistry of liquid metals
p 2249 N94-25133
INTERFEROMETERS
Mueller matrix analysis of infrared ellipsometry
[PB93-201549] p 2544 N94-23629
LOLA: Lunar Optical Long-baseline Array. 1992-1993 space design
[NASA-CR-195533] p 2298 N94-24582
Matter-wave interferometry with laser cooled atoms
[AD-A273249] p 2536 N94-24717
LOITA: Lunar Optical/Infrared Telescope Array
[NASA-CR-195532] p 2546 N94-24816
System for cancelling phase noise in an interferometric fiber optic sensor arrangement
[AD-D015994] p 2345 N94-25053
INTERFEROMETRY
Interferometric astronomy on the Moon
p 2601 N94-23378
Intelligent Material Systems and Structures (IMSS). Part 5: Fiber optic registration of deformation in carbon laminates 91/92
[PB93-204600] p 2544 N94-23723
Direct observation of crystal growth from solution using optical investigation of a growing crystal face
[NASA-CR-195141] p 2563 N94-24617
Optimization of techniques to reconstruct images disturbed by atmospheric turbulence in the near infra-red
[PB93-199784] p 2298 N94-24630
White-light, pressure, and temperature interferopolarimetric sensor featuring optical fibers
[PB93-199792] p 2545 N94-24631
Matter-wave interferometry with laser cooled atoms
[AD-A273249] p 2536 N94-24717
Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893
System for cancelling phase noise in an interferometric fiber optic sensor arrangement
[AD-D015994] p 2345 N94-25053
Advanced radiometric and interferometric milimeter-wave scene simulations p 2306 N94-25498
INTERFERON
Cytokines and immune surveillance in humans
[NASA-CR-194801] p 2425 N94-23331
INTERGRANULAR CORROSION
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel
[DE94-000466] p 2242 N94-23457
INTERLAMINAR STRESS
Out of plane gradients in laminated composites
[NASA-CR-194875] p 2228 N94-23566
INTERLAYERS
Photo-induced antiferromagnetic interlayer coupling in Fe superlattices with iron silicide spacers
[DE94-001345] p 2559 N94-22995
INTERMETALLICS
Evaluation of A5Si3Z(x) intermetallics for use as high temperature structural materials
[DE93-041127] p 2227 N94-22977
Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189
Multilayer relaxation and surface structure of ordered alloys
[NASA-TM-106433] p 2243 N94-23578
Symposium on diffusion in ordered alloys
[AD-A273643] p 2245 N94-25033
Improved magnetostrictive transducer drive elements achieved by reduction of crystalline defects and improved crystalline orientation
[AD-A273391] p 2313 N94-25276
INTERMITTENCY
Behavior of the intermittency exponents and a quark-gluon plasma formation in the heavy ion collisions
[DE93-616869] p 2541 N94-25342
INTERMOLECULAR FORCES
Theoretical studies of a molecular beam generator
[NASA-CR-194779] p 2540 N94-23485
INTERNAL COMBUSTION ENGINES
Economics of electron beam and electrical discharge processing for post-combustion NO(x) control in internal combustion engines
[DE93-019574] p 2351 N94-22865
Fundamental limitations of non-thermal plasma processing for internal combustion engine NO(x) control
[DE93-019622] p 2351 N94-22866
Internal combustion engine with a central crankshaft and integral tandem annular pistons
[CA-PATENT-1-320-878] p 2363 N94-24055
Alternative control techniques document: NOx emissions from stationary reciprocating internal combustion engines
[PB94-104494] p 2398 N94-24476
INTERNAL FRICTION
Internal friction associated with dislocation relaxations in virgin martensite
[PB93-226280] p 2240 N94-23119
INTERNAL PRESSURE
Analysis and test of low profile aluminum aerospace tank dome
[NASA-TP-3442] p 2375 N94-23294
Development testing of the two-watt RTG heat source and Hastelloy-S/T-111 alloy compatibility studies
[DE94-002875] p 2243 N94-23784
INTERNATIONAL COOPERATION
International organizations to enable world-wide mobile satellite services p 2275 N94-22749
Advanced display technologies in Russia, Ukraine, and Belarus. Viewgraphs p 2630 N94-22893
Satellite communications systems and technology. Executive Summary
[NASA-TM-109388] p 2293 N94-23622
Resource allocation planning with international components p 2520 N94-23963
The Ninth National Space Symposium
[ISBN-0-9616962-7-3] p 2598 N94-25006
INTERNATIONAL LAW
US domestic and international regulatory issues
p 2275 N94-22748
Proceedings of Technology and Governance in the 1990's
[PB93-192904] p 2597 N94-24312
INTERNETS
AstroMail: Electronic mail for the astrophysics community
[NASA-CR-194877] p 2591 N94-24099
INTERPLANETARY COMMUNICATION
Conceptual communications system design in the 25.25-27.5 and 37.0-40.5 GHz frequency bands
p 2306 N94-25379
INTERPLANETARY MAGNETIC FIELDS
High latitude cusp signature observations for southward IMF B sub Z
[AD-A273801] p 2406 N94-25536
INTERPLANETARY SPACE
An antiproton driver for ICF propulsion
p 2217 N94-23069
INTERPLANETARY SPACECRAFT
A packet-based concept for spacecraft command planning p 2504 N94-23873
Expert diagnostics system as a part of analysis software for power mission operations p 2516 N94-23944
Magnetic shielding of interplanetary spacecraft against solar flare radiation
[NASA-CR-195539] p 2204 N94-24334
Preliminary design of a universal Martian lander
[NASA-CR-195529] p 2206 N94-25007
INTERPOLATION
Impiementing abstract multigrid or multilevel methods
p 2483 N94-23682
Efficient interpolation of velocity and flux components defined on 2- and 3-dimensional non-cartesian grids
[PB94-118619] p 2486 N94-23757
On the deformation kinetics constitutive law of plastic deformation: The rate equation p 2161 N94-24289
Solving the ranking and selection indifference-zone formulation for normal distributions using computer software
[AD-A273821] p 2496 N94-25518
INTERPROCESSOR COMMUNICATION
Programming in Fortran M
[DE94-000541] p 2450 N94-23207
Linear time algorithm to schedule trees with communication delays optimally on two machines
[PB93-237782] p 2451 N94-23441
Three, four, five, six or the complexity of scheduling with communication delays
[PB94-111630] p 2467 N94-23767
An OSI architecture for the deep space network
p 2305 N94-23848
Interoperability through standardization: Electronic mail, and X Window systems p 2575 N94-24406
The design of a standard message passing interface for distributed memory concurrent computers
[DE94-002536] p 2446 N94-24538
Runtime support and compilation methods for user-specified data distributions
[NASA-CR-191587] p 2458 N94-24679
Performance measurements of the multimedia testbed on Mach 3.0: Experience writing real-time device drivers, servers, and applications
[AD-A273600] p 2460 N94-24932
Digital data, composite video multiplexer and demultiplexer boards for an IBM PC/AT compatible computer p 2447 N94-25377
INTERSECTIONS
Estimation of delays and emissions at four-way junctions with different forms of regulation, principally four-way mandatory stop
[PB94-105236] p 2398 N94-23813
INTERSTELLAR CHEMISTRY
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
INTERSTELLAR COMMUNICATION
SETI: Search for extraterrestrial intelligence. An international interdisciplinary seminar, star days
[PB93-230597] p 2444 N94-23754
INTERSTELLAR MAGNETIC FIELDS
Magnetic field dissipation and contraction of molecular clouds
[REPT-337] p 2603 N94-24976
INTERSTELLAR MATTER
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
The three-dimensional structure of the infrared cirrus
[NASA-CR-194870] p 2410 N94-24097
Magnetic field dissipation and contraction of molecular clouds
[REPT-337] p 2603 N94-24976
Protoplanetary disks: Theory and observation by millimeter and sub-millimeter arrays
[REPT-331] p 2603 N94-24983
The Nobeyama millimeter array survey for protoplanetary disks around protostar candidates and T Tauri stars in Taurus
[REPT-336] p 2604 N94-24987

INTERSTELLAR SPACECRAFT
Voyager uplink planning in the interstellar mission era
p 2305 N94-23870
INTERSTELLAR TRAVEL
Voyager uplink planning in the interstellar mission era
p 2305 N94-23870
INTERSTITIALS
Evaluation of A5Si3Z(x) intermetallics for use as high temperature structural materials
[DE93-041127] p 2227 N94-22977
Magnetic resonance studies of 3d transition metal impurities in compound semiconductors
[PB93-232197] p 2243 N94-23714
INTERTROPICAL CONVERGENT ZONES
Observational and modeling studies of heat, moisture, precipitation and global-scale circulation patterns
[NASA-CR-195148] p 2415 N94-24485
INTRAMOLECULAR STRUCTURES
Microstructure of styrene methyl methacrylate copolymers grafted onto polybutadiene seeds
[ETN-94-95360] p 2262 N94-25225
INVARIANCE
Characterizations of shift-invariant distributions based on summation modulo one
[PB93-237824] p 2481 N94-23442
Correlation function estimator performance in non-Gaussian spherically invariant random processes
[AD-A273498] p 2496 N94-24951
INVERSE KINEMATICS
Control of a serpentine manipulator with collision avoidance p 2368 N94-23232
Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281
Robust stability of second-order systems
[NASA-CR-195175] p 2488 N94-24564
INVERSIONS
Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108
On the inversion of the n-dimensional Laplace transform
[RR-461] p 2492 N94-25310
INVISCID FLOW
Local grid refinement method for the euler equations
[PB93-223329] p 2317 N94-22985
Forced vibrations of a non-viscous drop
[MPIS-24/1992] p 2318 N94-23198
An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554
Upwind MacCormack Euler solver with non-equilibrium chemistry p 2326 N94-23672
Compressible turbulent flow simulation with a multigrid multiblock method p 2342 N94-23694
An analysis for high Reynolds number inviscid/viscid interactions in cascades
[NASA-CR-4519] p 2169 N94-24606
IODINE COMPOUNDS
New concepts for HgI2 scintillator gamma ray spectroscopy
[NASA-CR-194819] p 2233 N94-24113
ION ACOUSTIC WAVES
Characterization of heat transport and radiation hydrodynamics in collisional laser plasmas using collective Thomson scattering
[DE94-001502] p 2349 N94-23209
ION BEAMS
Semiempirical studies of atomic structure
[DE94-001588] p 2531 N94-22937
Electron spectroscopic studies of the neutralization of slow multicharged ions during interactions with a metal surface
[DE93-041046] p 2532 N94-22956
Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189
Pulsed Ion Beam Surface Analysis (PIBSA) as a means of in-situ real-time analysis of thin films during growth
[DE94-001276] p 2562 N94-23805
A study of non-ideal focus properties of 30 deg parallel plate energy analyzers
[NIFS-263] p 2311 N94-24457
Measurement of electron temperature and density in the DIII-D neutral beam ion source arc chamber
[DE94-001099] p 2553 N94-24746
A research of possibility for negative muon production by a low energy electron beam accompanying ion beam
[NIFS-266] p 2536 N94-24868
ION CURRENTS
Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361
ION CYCLOTRON RADIATION
Overview of the ATF stellarator program
[DE94-000371] p 2550 N94-23462
Multi-ion, multi-event test of ion cyclotron resonance heating
[NASA-CR-194859] p 2540 N94-23495
ION DENSITY (CONCENTRATION)
Fluid velocity and electromagnetic forces measured by a rotating Langmuir probe in the scrape off layer of JFT-2M
[OUEL-1968/92] p 2554 N94-25327
ION DISTRIBUTION
Multi-ion, multi-event test of ion cyclotron resonance heating
[NASA-CR-194859] p 2540 N94-23495
ION ENGINES
Preliminary far-field plume sputtering characterization of the Stationary Plasma Thruster (SPT-100)
[NASA-TM-106464] p 2221 N94-24766
Performance of the NASA cm ion thruster
[NASA-TM-106426] p 2221 N94-24770
ION EXCHANGING
A novel method for determination of transport parameters of H2 and O2 in PEMFCs
[DE94-001492] p 2389 N94-22962
Effects of ionizing radiation on modern ion exchange materials
[DE94-001569] p 2535 N94-24505
ION IMPLANTATION
Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189
Surface modification of sapphire for enhanced infrared window performance
[DE94-000333] p 2543 N94-23458
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique
[DE94-001608] p 2309 N94-23520
ION IRRADIATION
Heavy ion irradiation of Bi-2223 silver-clad tapes for superconducting current density enhancement
[DE93-017416] p 2556 N94-22886
ION MICROSCOPES
Diffusion on Cu surfaces p 2251 N94-24428
ION PLATING
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784
ION PROPULSION
Power console development for NASA's electric propulsion outreach program
[NASA-TM-106428] p 2218 N94-23372
Preliminary far-field plume sputtering characterization of the Stationary Plasma Thruster (SPT-100)
[NASA-TM-106464] p 2221 N94-24766
Performance of the NASA cm ion thruster
[NASA-TM-106426] p 2221 N94-24770
ION SCATTERING
Ga delta-doping layers in silicon
[PB93-224632] p 2561 N94-23222
Computer simulation of low energy scattering
[ETN-94-95326] p 2537 N94-25082
ION SELECTIVE ELECTRODES
Bioregenerative life support systems for microgravity
[NASA-CR-195516] p 2422 N94-24810
ION SOURCES
Measurement of electron temperature and density in the DIII-D neutral beam ion source arc chamber
[DE94-001099] p 2553 N94-24746
Investigation of the heat handling capabilities of DIII-D neutral beamline internal components
[DE94-001107] p 2553 N94-24756
Diffusion in electronegative discharges with magnetic fields
[AD-A273826] p 2304 N94-25521
ION TEMPERATURE
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
IONIC COLLISIONS
Theoretical atomic physics for fusion
[DE94-000712] p 2533 N94-23543
The statistics of sputtering
[DE94-001128] p 2243 N94-23715
Behavior of the intermittency exponents and a quark-gluon plasma formation in the heavy ion collisions
[DE93-616869] p 2541 N94-25342
IONIZATION
Theoretical atomic physics for fusion
[DE94-000712] p 2533 N94-23543
Analysis of SOFCAL calibration data
[NASA-CR-193910] p 2345 N94-25000
IONIZATION POTENTIALS
High-order sum and difference-frequency generation in helium
[DE94-001064] p 2348 N94-23181
IONIZED GASES
Reactivity of ambident anions in the gas phase
[PB93-232189] p 2533 N94-23713
IONIZING RADIATION
Low temperature diffusion of hydrogenic species in oxide crystals: Radiation induced diffusion
[DE94-000374] p 2558 N94-22957
Effects of ionizing radiation on modern ion exchange materials
[DE94-001569] p 2535 N94-24505
IONOGRAMS
High latitude cusp signature observations for southward IMF B sub Z
[AD-A273801] p 2406 N94-25536
IONOSPHERIC NOISE
Electromagnetic field changes as a precursory phenomena of earthquakes and volcanic eruptions
[REPT-157] p 2405 N94-24980
IONOSPHERIC PROPAGATION
Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP)
[AD-A273401] p 2301 N94-24926
Northern Exposure 1992: An investigation of transauroral HF radio skywave propagation
[AD-A273363] p 2303 N94-25089
IONS
Relativistic configuration interaction calculation of the correlation energies of highly-charged ions
[DE94-001055] p 2532 N94-22988
The statistics of sputtering
[DE94-001128] p 2243 N94-23715
Computer modeling of nonlinearities
p 2458 N94-24661
Free energy profiles for Li(+) and I(-) ions approaching Pt(100) surface: A molecular dynamics study
[AD-A273455] p 2536 N94-24675
Bioregenerative life support systems for microgravity
[NASA-CR-195516] p 2422 N94-24810
Two micron stimulated emission of activated insulating crystals
[REPT-94-002] p 2565 N94-25025
IRIDIUM
Advanced materials for radiation-cooled rockets
p 2214 N94-23052
IRIDIUM COMPOUNDS
PEM regenerative fuel cells p 2392 N94-23358
IRON
Photo-induced antiferromagnetic interlayer coupling in Fe superlattices with iron silicide spacers
[DE94-001345] p 2559 N94-22995
Physics of iron
[DE94-002002] p 2402 N94-23721
IRON ALLOYS
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184
Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons
[PB93-201531] p 2561 N94-23428
Robotic weld overlay coatings for erosion control
[DE94-002665] p 2258 N94-24749
Improved magnetostrictive transducer drive elements achieved by reduction of crystalline defects and improved crystalline orientation
[AD-A273391] p 2313 N94-25276
Solid state synthesis of Fe-B-Si alloys
[VTT-PUBS-118] p 2250 N94-25316
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues
[AD-A273663] p 2251 N94-25450
IRON COMPOUNDS
Photoinduced charge separation in solid state and molecular systems
[DE94-001727] p 2563 N94-24537
Influences of nitrogen absorption on the magnetic properties of YFe2, YFe3 and Y6Fe23
[REPT-A-2654] p 2564 N94-24958
IRON METEORITES
Correlated petrographic, electron microprobe, and ion microprobe studies of selected primitive and processed phase assemblages in meteorites
[NASA-CR-194827] p 2601 N94-23499
IRON OXIDES
Advanced research and technology development of MCFCs
[DE94-001918] p 2389 N94-22723
Diffusion of hydrogen in iron oxides
[DE93-632430] p 2239 N94-22966
IRRADIANCE
The solar spectral irradiances from x ray to radio wavelengths
[NASA-CR-195203] p 2629 N94-25260

IRRADIATION
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel
[DE94-000466] p 2242 N94-23457
IRREGULAR VARIABLE STARS
UV spectral variability in the Herbig Ae star HR 5999. 11: The accretion interpretation
[NASA-CR-189313] p 2599 N94-23334
IRRIGATION
Evaluation of the use of remote-sensing data to identify crop types and estimate irrigated acreage, Uvalde and Medina Counties, Texas, 1989
[PB93-193159] p 2388 N94-24809
ISING MODEL
Off-critical W(infinity) and Virasoro algebras as dynamical symmetries of the integrable models
[DE93-633215] p 2478 N94-22969
Derivation of the macroscopic rate equations for the driven diffusive Ising model at pair level of approximation
[DE93-616839] p 2524 N94-25208
ISOCYANATES
Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763
ISOMERS
Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3
[DE93-613824] p 2566 N94-25332
ISOMORPHISM
Domain decomposition methods for nonconforming finite element spaces of Lagrange-type
p 2483 N94-23680
ISOTOPE EFFECT
Physics with chemically and isotopically pure semiconductors
[DE93-040120] p 2557 N94-22926
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064)
[DE94-002000] p 2347 N94-22974
ISOTOPES
Prospects for future solar-wind missions
p 2624 N94-22841
Physics with chemically and isotopically pure semiconductors
[DE93-040120] p 2557 N94-22926
ISOTROPIC MEDIA
Investigation of the asymptotic state of rotating turbulence using large-eddy simulation
p 2330 N94-24152
ISOTROPIC TURBULENCE
A representation for the turbulent mass flux contribution to Reynolds-stress and two-equation closures for compressible turbulence
[NASA-CR-191569] p 2319 N94-23302
Energy transfer and constrained simulations in isotropic turbulence p 2330 N94-24153
Effects of shock strength on shock turbulence interaction p 2332 N94-24165
Local isotropy in distorted turbulent boundary layers at high Reynolds number p 2332 N94-24166
Computation of large-scale statistics in decaying isotropic turbulence p 2332 N94-24167
The radiated noise from isotropic turbulence revisited
[NASA-CR-191547] p 2333 N94-24356
ITERATION
Incomplete corrections in nonlinear problems
[PB93-225746] p 2479 N94-23106
Uniform convergence of multigrid V-cycle iterations for indefinite and nonsymmetric problems
p 2482 N94-23677
Nested Krylov methods and preserving the orthogonality p 2483 N94-23681
Error due to the stopping of the Newton iteration in implicit linear multistep methods
[PB94-101425] p 2487 N94-23786
Generic mission planning concepts for space astronomy missions p 2505 N94-23878
ITERATIVE SOLUTION
Extending substructure based iterative solvers to multiple load and repeated analyses
[NASA-CR-194822] p 2466 N94-23504
Perturbation theory in electron diffraction
[PB93-201424] p 2533 N94-23505
Application of multigrid methods to the solution of liquid crystal equations on a SIMD computer
p 2484 N94-23686
A matrix analysis of conjugate gradient algorithms
[DE94-002546] p 2454 N94-23796
Solution of the discretized incompressible Navier-Stokes equations with iterative methods
[PB94-118635] p 2335 N94-24641
Projection techniques for iterative solution of A(bar x) equals (bar b) with successive right-hand sides
[NASA-CR-191571] p 2490 N94-24836
IUE
SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-195162] p 2599 N94-24988
Observational studies of the clearing phase in proto-planetary disk systems
[NASA-CR-195182] p 2604 N94-25265

J

J INTEGRAL
J-integral patch for finite element analysis of dynamic fracture due to impact of pressure vessels
p 2381 N94-24429
JACKETS
Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor
[DE94-000331] p 2543 N94-23461
JAMMERS
CF-18 AN/ALQ-126B-MG 13 IIP interface to the DREO Electronic Warfare Engagement Simulation Facility
[DREO-TN-93-4] p 2296 N94-24118
JAMMING
Coding for frequency hopped spread spectrum satellite communications
[ECE-91-1] p 2296 N94-24132
Evaluation of EHF multi-beam adaptive arrays
[CTN-94-60898] p 2297 N94-24296
Coding for frequency hopped spread spectrum satellite communications
[ECE-92-1] p 2300 N94-24697
JAPAN
Satellite communications systems and technology. Executive Summary
[NASA-TM-109388] p 2293 N94-23622
Satellite communications systems and technology. Volume 1: Analytical chapters
[NASA-TM-109398] p 2293 N94-23627
JAPANESE SPACE PROGRAM
The next Japanese solar satellite
p 2625 N94-22846
The study of the mobile lunar explorer
p 2607 N94-23389
NASDA's view of ground control in mission operations
p 2305 N94-23835
NASDA's Advanced On-Line System (ADOLIS)
p 2509 N94-23903
Japanese aerospace science and technology 1992. A bibliography with indexes
[NASA-SP-7104] p 2631 N94-24585
JAPANESE SPACECRAFT
Advanced mobile satellite communications using COMETS satellite in MM-wave and Ka-band
p 2288 N94-22829
The next Japanese solar satellite
p 2625 N94-22846
NASDA satellite mission operation system and operations p 2501 N94-23854
Japanese aerospace science and technology 1992. A bibliography with indexes
[NASA-SP-7104] p 2631 N94-24585
JET AIRCRAFT
Sabot high speed interceptor AE 4273 aircraft design
[NASA-CR-195495] p 2183 N94-24971
A global range military transport: The ostrich
[NASA-CR-195494] p 2183 N94-24972
C-17 lot 3 production contract
[AD-A273180] p 2174 N94-25153
Birdstrike resistant crew enclosure program
[AD-A273700] p 2463 N94-25453
JET AIRCRAFT NOISE
A modelling of the noise from simple co-axial jets. Part 2: In a simulated flightstream
[ISVR-TR-226] p 2525 N94-22959
Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464
Variability of measured sonic boom signatures. Volume 1: Technical report
[NASA-CR-191483-VOL-1] p 2526 N94-24172
Variability of measured sonic boom signatures. Volume 2: Data report
[NASA-CR-191483-VOL-2] p 2526 N94-24173
Fan noise research at NASA
[NASA-TM-106512] p 2530 N94-25172
The effects of profiles on supersonic jet noise
[NASA-CR-195184] p 2530 N94-25177
JET ENGINE FUELS
Initial evaluation of burn characteristics of phenolic foam runway brake arrestor material
[DOT/FAA/CT-TN93/7] p 2253 N94-23335
JET FLOW
A modelling of the noise from simple co-axial jets. Part 2: In a simulated flightstream
[ISVR-TR-226] p 2525 N94-22959
Spray formation processes of impinging jet injectors
p 2212 N94-23042
An experimental study of the flow field surrounding a subsonic jet in a cross flow
[NASA-CR-194770] p 2317 N94-23072
Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464
Unsteady jet flow computation towards noise prediction
[NASA-CR-194449] p 2153 N94-23553
Mixing characteristics of directly opposed rows of jets injected normal to a crossflow in a rectangular duct
[NASA-TM-106477] p 2188 N94-24594
JET IMPINGEMENT
Spray formation processes of impinging jet injectors
p 2212 N94-23042
JET MIXING FLOW
Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles
[NASA-TM-106450] p 2167 N94-23592
Optimization of orifice geometry for cross-flow mixing in a cylindrical duct
[NASA-TM-106436] p 2481 N94-23593
CFD assessment of orifice aspect ratio and mass flow ratio on jet mixing in rectangular ducts
[NASA-TM-106434] p 2187 N94-24082
Mixing characteristics of directly opposed rows of jets injected normal to a crossflow in a rectangular duct
[NASA-TM-106477] p 2188 N94-24594
JET NOZZLES
Thrust vectoring theory, laboratory and flight tests
p 2155 N94-24251
JET STREAMS (METEOROLOGY)
Diagnostic budgets of analyzed and modelled tropical plumes
[NASA-CR-194853] p 2409 N94-23621
JFET
Method for fabricating self-aligned gate diffused junction field effect transistor
[AD-D015975] p 2312 N94-25035
JOINED WINGS
NASA/USRA University Advanced Design Program, 1992-1993. The Diamondback: A simulated commercial air transportation study
[NASA-CR-195523] p 2180 N94-24462
JOINTS (JUNCTIONS)
Attachment methods in composite joints - analysis of test results by controlled experiments method
p 2158 N94-24269
Ultrasonic process for curing adhesives
[AD-A273175] p 2259 N94-24788
JOSEPHSON JUNCTIONS
Coherence lost? Not-so-fast escapes from the in-phase attractor of a set of globally coupled nonlinear oscillators
[DE94-000799] p 2557 N94-22940
A low noise 665 GHz SIS quasi-particle waveguide receiver
[NASA-CR-194735] p 2296 N94-24105
JOURNAL BEARINGS
Foil bearing research at Penn State
p 2215 N94-23058
A technique to measure rotordynamic coefficients in hydrostatic bearings p 2215 N94-23061
Thermohydrodynamic analysis of cryogenic liquid turbulent flow fluid film bearings
[NASA-CR-194869] p 2363 N94-24081
JUPITER (PLANET)
The Jet Propulsion Laboratory space exploration: Past, present and future p 2153 N94-24242

K

K LINES
UV spectral variability in the Herbig Ae star HR 5999. 11: The accretion interpretation
[NASA-CR-189313] p 2599 N94-23334
The resonance lines of MG2 as diagnostics of the upper solar chromosphere
[NASA-CR-195084] p 2627 N94-24300
K-EPSILON TURBULENCE MODEL
Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models
p 2216 N94-23062
A representation for the turbulent mass flux contribution to Reynolds-stress and two-equation closures for compressible turbulence
[NASA-CR-191569] p 2319 N94-23302
Field models: Their present and future application in fire safety engineering
[PB93-201622] p 2269 N94-23506
The use of transition region characteristics to improve the numerical simulation of heat transfer in bypass transitional flows
[NASA-TM-106445] p 2320 N94-23525

Numerical analysis of a vortex controlled diffuser p 2324 N94-23659

A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670

Evaluation of turbulence models in the PARC code for transonic diffuser flows [NASA-TM-106391] p 2168 N94-24084

Carrying the mass flux terms exactly in the first and second moment equations of compressible turbulence [NASA-CR-191568] p 2335 N94-24712

Turbulence models and Reynolds analogy for two-dimensional supersonic compression ramp flow [NASA-TM-106474] p 2337 N94-25119

KALMAN FILTERS

Kalman filtering applied to real-time monitoring of apogee maneuvers p 2196 N94-23923

An overview of a generic multi-sensor integrated navigation system design [CTN-94-60916] p 2174 N94-24120

Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264

Failure-proof estimation under conditions of lack of information p 2158 N94-24267

Predictive head movement tracking using innovations generated by Kalman filters [ISBN-0-315-83371-8] p 2427 N94-24467

X-31 aerodynamic characteristics determined from flight data p 2164 N94-25109

Active camera calibration for a head-eye platform using a variable state dimension filter [OUEL-1975/93] p 2346 N94-25472

Expansion-based passive ranging p 2176 N94-25504

Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505

Validation of vision-based range estimation algorithms using helicopter flight data p 2442 N94-25506

KAONS

Calculations of Bose-Einstein correlations from Relativistic Quantum Molecular Dynamics [DE94-000794] p 2569 N94-23453

New evaluation of hadronic contributions to the anomalous magnetic moment of charged leptons [DE93-634394] p 2536 N94-24844

KERNEL FUNCTIONS

Specifications of ETS, the Enhanced Transport Service [RR-907-I] p 2589 N94-23150

KINEMATICS

Normal forms of kinematic singularities of 3R robot manipulators [MEMO-1124] p 2469 N94-22712

Mass properties measurement system dynamics p 2368 N94-23235

Walking machines for space p 2369 N94-23406

KINETIC ENERGY

Mass properties measurement system dynamics p 2368 N94-23235

Shock-induced turbulent flow in baffle systems [DE94-001532] p 2319 N94-23470

Effects of shock strength on shock turbulence interaction p 2332 N94-24165

Computation of large-scale statistics in decaying isotropic turbulence p 2332 N94-24167

KINETIC THEORY

Microscopic dynamics in dense helium-neon mixtures: Neutron scattering, kinetic theory and computer simulations [ISBN-9-07-386105-5] p 2537 N94-25228

KINETICS

Walking machines for space p 2369 N94-23406

On the connection of classical mechanics, physical kinetics and quantum theory [DE93-616823] p 2570 N94-25207

Modification in the kinetic solution for magnetized plasmas [DE93-613687] p 2555 N94-25343

Effect of LHCD (low hybrid current drive) on tearing mode instability [DE93-613700] p 2555 N94-25344

KLYSTRONS

Design and testing of ubitron amplifier tubes [AD-A273297] p 2311 N94-24818

KNOWLEDGE BASED SYSTEMS

Representation and specification of architectures for heterogeneous internetworking: Using a knowledge based approach [LAAS-93088] p 2445 N94-22903

Expanding the KATE toolbox p 2477 N94-23247

Link monitor and control operator assistant: A prototype demonstrating semiautomated monitor and control p 2292 N94-23267

A knowledge based system for scientific data visualization [NASA-CR-194879] p 2452 N94-23507

ATOS-1: Designing the infrastructure for an advanced spacecraft operations system p 2197 N94-23849

The Advanced Technology Operations System: ATOS p 2508 N94-23897

NASDA knowledge-based network planning system p 2508 N94-23898

A cross-disciplinary response to improve test activities: The corporate memory capitalization in Ariane4 test domain p 2508 N94-23899

Combining real-time monitoring and knowledge-based analysis in MARVEL p 2477 N94-23900

Representing operations procedures using temporal dependency networks p 2305 N94-23914

Situation management in the Link Monitor and Control Operator Assistant (LMCOA) p 2305 N94-23915

Automating a human factors evaluation of graphical user interfaces for NASA applications: An update on CHIMES p 2443 N94-23936

On the analysis of clear air radar echoes severely contaminated by clutter p 2306 N94-24423

Increasing levels of assistance in refinement of knowledge-based retrieval systems [NASA-CR-195144] p 2591 N94-24552

Intelligent systems and advanced user interfaces for design, operation, and maintenance of command management systems [NASA-CR-195172] p 2459 N94-24797

Declarative Object Manipulation Environment (DOME): Alpha version [AD-A273233] p 2460 N94-24935

An implementation of the REpresentation and MAintenance of Process knowledge (REMAP) model in the knowledge-based software assistant concept demonstration system [AD-A273207] p 2461 N94-25138

ROSAT mission planning using artificial intelligence methods [DLR-FB-93-14] p 2476 N94-25345

The use of knowledge systems [ETN-94-95318] p 2477 N94-25431

Expert system rule-base evaluation using real-time parallel processing [AD-A273701] p 2469 N94-25454

KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)

In flight mission planning in the Copilote Electronique p 2522 N94-25015

Considerations regarding the deployment of hypermedia at JSC p 2595 N94-25366

The use of knowledge systems [ETN-94-95318] p 2477 N94-25431

KNOWLEDGE REPRESENTATION

Representation and specification of architectures for heterogeneous internetworking: Using a knowledge based approach [LAAS-93088] p 2445 N94-22903

Understanding and facilitating discovery learning in computer-based simulation environment [ISBN-9-03-860242-1] p 2462 N94-25219

KOLMOGOROV THEORY

On the large eddy simulation of turbulent flows in complex geometry p 2329 N94-24148

Local isotropy in distorted turbulent boundary layers at high Reynolds number p 2332 N94-24166

KORTEWEG-DEVRIES EQUATION

Cauchy problem for periodic KDV-type equations [PB93-238020] p 2487 N94-23776

KREEP

Basaltic Volcanism and Ancient Planetary Crusts [NASA-CR-193151] p 2614 N94-24363

Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts p 2614 N94-24365

Major element chemistry of Apollo 14 mare basalt clasts and highland plutonic clasts from lunar breccia 14321: Comparison with neutron activation results p 2614 N94-24366

Auto-metasomatism of the western lunar highlands: Result of closed system fractionation and mobilization of a KREEPy trapped liquid p 2615 N94-24367

Melt rock components in KREEPy breccia 15205: Petrography and mineral chemistry of KREEP basalts and quartz-normative mare basalts p 2616 N94-24372

L

LABORATORIES

Contributions of DOE weapons labs and NIST to semicondutor technology [OTA-ITE-585] p 2630 N94-23572

Satellite communications systems and technology. Volume 2: Site reports [NASA-TM-109399] p 2293 N94-23628

Waste minimization/pollution prevention at R/D facilities: A cradle-to-grave tracking and information system that will be implemented at Sandia National Laboratories [DE93-040330] p 2591 N94-24607

Collaborating with our customers: NIST building and fire research laboratory [PB94-110194] p 2272 N94-24955

LABORATORY EQUIPMENT

Determination of the compatibility between structural alloys and molten metals at high temperatures [DE94-000954] p 2241 N94-23434

Stiffening of deployable space booms: Automated Protein Crystal Growth Facility [NASA-CR-195547] p 2196 N94-24820

LAGRANGE MULTIPLIERS

Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination [PB93-224152] p 2559 N94-23109

Stability behavior of systems obtained by index-reduction [PB93-237709] p 2481 N94-23439

LAGRANGIAN FUNCTION

Mass properties measurement system dynamics p 2368 N94-23235

The renormalization group for flag manifolds [DE93-616846] p 2491 N94-25213

Cosmic wake fields [DE93-616849] p 2604 N94-25215

Weak interactions in a bilocal chiral theory [DE93-616887] p 2539 N94-25477

LAMINAR FLOW

Transient phenomena in laminar spray combustion p 2160 N94-24282

Stability of premixed laminar flames in a stagnation point flow to general disturbances [AD-A273429] p 2234 N94-24673

The influence of flow type, particle type and gravity on orthokinetic coagulation [ETN-94-95333] p 2267 N94-25060

LAMINATES

Theoretical studies of wave propagation in multilayered piezoelectric media [DE93-040273] p 2371 N94-22872

Optimization of laminate orientation to enhance failure properties [ISBN-0-315-83539-7] p 2227 N94-22892

Preparing polymeric matrix composites using an aqueous slurry technique [NASA-CASE-LAR-14771-1] p 2252 N94-23076

Method of determining shear stress employing a monomer-polymer laminate structure [NASA-CASE-LAR-14654-2] p 2375 N94-23308

Materials Science and Engineering [DE94-003018] p 2228 N94-23493

Out of plane gradients in laminated composites [NASA-CR-194875] p 2228 N94-23566

Intelligent Material Systems and Structures (IMSS). Part 5: Fiber optic registration of deformation in carbon laminates 91/92 [PB93-204600] p 2544 N94-23723

Analysis of local delaminations caused by angle ply matrix cracks [NASA-TM-109052] p 2228 N94-24083

A prediction method for the compressive strength of impact damaged composite laminates [CTN-94-60925] p 2229 N94-24137

Prediction of thermal cycling induced cracking in polmer matrix composites [NASA-CR-195135] p 2229 N94-24579

Composites and textile reinforcement [VTT-TIED-1424] p 2231 N94-25420

Collocated tunable wavenumber sensor/actuators for smart structures [AD-A273697] p 2314 N94-25488

LAND MOBILE SATELLITE SERVICE

The MSAT spacecraft of Telesat Mobile Inc. p 2207 N94-22742

Evolution of INMARSAT systems and applications: The land mobile experience p 2280 N94-22779

EUTELTRACS: The European experience on mobile satellite services p 2281 N94-22781

The ORBCOMM data communications system p 2281 N94-22782

Mobilesat (tm): A world first p 2281 N94-22783

Implementation of a system to provide mobile satellite services in North America p 2281 N94-22784

Land mobile satellite propagation measurements in Japan using ETS-V satellite p 2282 N94-22790

Measurements on the satellite-mobile channel at L and S bands p 2282 N94-22791

K-band mobile propagation measurements using ACTS p 2283 N94-22792

Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793

Propagation model for the Land Mobile Satellite channel in urban environments p 2283 N94-22796
A prediction model of signal degradation in LMSS for urban areas p 2284 N94-22797
Global coverage Mobile Satellite Systems: System availability versus channel propagation impairments p 2284 N94-22798

LAND USE
Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991 [PB93-230654] p 2386 N94-23755
Effect of land use change on the carbon cycle in Amazon soils [NASA-CR-195168] p 2399 N94-24853

LANDAU DAMPING
Characterization of heat transport and radiation hydrodynamics in collisional laser plasmas using collective Thomson scattering [DE94-001502] p 2349 N94-23209

LANDAU-GINZBURG EQUATIONS
Exact transformation of the anisotropic Ginzburg-Landau model and its consequences [DE94-002208] p 2562 N94-23795

LANDING AIDS
The evaluation of ASOS for the Kennedy Space Center's Shuttle Landing Facility [NASA-CR-195685] p 2416 N94-25271
Application of aircraft navigation sensors to enhanced vision systems p 2176 N94-25495
Radar E-O image fusion p 2306 N94-25503
A model-based approach for detection of objects in low resolution passive-millimeter wave images p 2442 N94-25507
Image processing for flight crew enhanced situation awareness p 2442 N94-25508

LANDING GEAR
Landing gear with swivelling beam [CA-PATENT-1323020] p 2176 N94-24181
Studies of Shuttle orbiter arrestment system [NASA-TP-3370] p 2177 N94-24304
VLCT-13: A commercial transport for the 21st Century [NASA-CR-195492] p 2181 N94-24803

LANDING LOADS
Projected effectiveness of airbag supplemental restraint systems in US Army helicopter cockpits [AD-A273250] p 2174 N94-25141

LANDING RADAR
The 94 GHz MMW imaging radar system p 2306 N94-25493

LANDING SIMULATION
Descent and landing phase: Vision based robust spacecraft motion estimation and elevation modeling p 2608 N94-23394

LANGEVIN FORMULA
The anomalous transport caused by particles transverse drift [DE93-613685] p 2554 N94-25329

LANGMUIR-BLODGETT FILMS
The 2-D polymerized Langmuir-Blodgett films studied by STM [AD-A273542] p 2261 N94-24930

LANGUAGES
Logic of capabilities [PB94-110715] p 2473 N94-23747

LANTHANUM COMPOUNDS
Electronic structure and high pressure phase transition in LaSb and CeSb [DE93-617051] p 2567 N94-25423

LAPLACE TRANSFORMATION
Analysis of time-domain acoustic wavefields in horizontally continuously layered configurations based on the modified Cagniard method [PB94-111044] p 2524 N94-23731
On the inversion of the n-dimensional Laplace transform [RR-461] p 2492 N94-25310

LARGE SPACE STRUCTURES
Operating the Daisy facility to perform control experiments [ISBN-0-315-83554-0] p 2196 N94-22889
Real-time dynamics and control strategies for space operations of flexible structures [NASA-CR-194794] p 2203 N94-23618
LSS systems planning and performance program [NASA-CR-193882] p 2196 N94-24309
Modeling of a large undamped space structure using time domain techniques [AD-A273828] p 2206 N94-25523

LASER ABLATION
Laser ablation and deposition of metals [ETN-94-95311] p 2351 N94-25294

LASER ANEMOMETERS
Turbulence sensors for separated flows: Current capabilities, future requirements p 2315 N94-22853
SFOLDA: A semiconductor LDA for measurements in complex flows p 2316 N94-22856

LASER APPLICATIONS
Proceedings of Workshop on Laser Diagnostics in Fluid Mechanics and Combustion [AD-A272808] p 2347 N94-22914
A new automatic design method to develop multilayer thin film devices for high power laser applications [DE93-632490] p 2347 N94-22967
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064) [DE94-002000] p 2347 N94-22974
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis [PB93-217982] p 2347 N94-22982
Laser diagnostics for small rockets p 2210 N94-23032
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1 [AD-A271081] p 2348 N94-23123
Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics [DE93-040094] p 2348 N94-23203
Sodium-layer laser guide stars [DE93-019621] p 2349 N94-23490
Particle size measurement for the control of industrial crystallizers [PB94-119104] p 2562 N94-23766
Laser soldering of Sn plated brass integrator assembly housings [DE94-001149] p 2270 N94-23790
Integration and test of high-speed transmitter electronics for free-space laser communications [NASA-TM-106295] p 2295 N94-24101
Conceptual design of a device to measure hand swelling in a micro-gravity environment [NASA-CR-195509] p 2437 N94-24330
Progress toward ultra-stable lasers for use in space [NASA-TM-109678] p 2349 N94-24488
Nondestructive evaluations [DE94-003020] p 2373 N94-24613
Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles [NASA-CR-195163] p 2201 N94-24919
Excited state dynamics of thulium ions in yttrium aluminum garnets [NASA-CR-195159] p 2564 N94-25024
An extended laser flash technique for thermal diffusivity measurement of high-temperature materials p 2238 N94-25132
The evolution of the laser: A systems perspective on science, technology and society [ETN-94-95319] p 2351 N94-25218
Ultracold atoms in traps and fountains [ETN-94-95325] p 2537 N94-25239
Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357
Excitation mechanisms for XUV and x ray lasers [DE93-617006] p 2351 N94-25482

LASER ARRAYS
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1 [AD-A271081] p 2348 N94-23123
Manufacturing and characterization of GaAs/AlGaAs multiple quantumwell ridge waveguide lasers [EUT-92-E-265] p 2348 N94-23168

LASER BEAMS
Limits on high-order harmonic generation from single-atom calculations [DE93-019950] p 2531 N94-22869
Laser light scattering instrument advanced technology development [NASA-CR-194803] p 2349 N94-23286
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique [DE94-001608] p 2309 N94-23520
Particle size measurement for the control of industrial crystallizers [PB94-119104] p 2562 N94-23766
Temporal behavior of the electron density profile during limiter biasing in the HYBTOK-2 tokamak [NIFS-257] p 2552 N94-24456
Matter-wave interferometry with laser cooled atoms [AD-A273249] p 2536 N94-24717

LASER CAVITIES
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1 [AD-A271081] p 2348 N94-23123
Computer modeling of nonlinearities p 2458 N94-24661
Internally folded scalable laser [AD-D015978] p 2350 N94-25216
The effects of optical feedback on polarization of vertical cavity surface emitting lasers [AD-A273728] p 2351 N94-25445

LASER DOPPLER VELOCIMETERS
An experimental study of characteristic combustion-driven flows for CFD validation p 2212 N94-23040
An experimental study of the flow field surrounding a subsonic jet in a cross flow [NASA-CR-194770] p 2317 N94-23072
A new experimental apparatus for the study of the unsteady flowfield over an airfoil in pitching and heaving motions using laser Doppler anemometry [ISL-CO-229/92] p 2165 N94-23149
LDA measurements of the unsteady near wake behind an airfoil undergoing transient and periodic pitching motions [ISL-CO-215/92] p 2165 N94-23161
Output optics for laser velocimeters [NASA-CASE-ARC-11889-1-SB] p 2543 N94-23309
Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field [NASA-CR-191490] p 2344 N94-24360
Direct measurement of turbulent dissipation rate using dual laser doppler velocimeters [AD-A273740] p 2340 N94-25530

LASER FUSION
Inertial confinement fusion [DE94-002602] p 2551 N94-23703

LASER HEATING
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis [PB93-217982] p 2347 N94-22982

LASER INDUCED FLUORESCENCE
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064) [DE94-002000] p 2347 N94-22974
Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics [DE93-040094] p 2348 N94-23203
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures [NASA-CR-194810] p 2397 N94-23277

LASER INTERFEROMETRY
Japanese aerospace science and technology 1992. A bibliography with indexes [NASA-SP-7104] p 2631 N94-24585
Quantum optical aspects of topological phases, such as Berry's phase [AD-A273632] p 2570 N94-25028

LASER MATERIALS
Development of infrared sensors using energy transfer/energy upconversion processes: Study of laser excited fluorescence in rare Earth ion doped crystals [NASA-TM-108437] p 2233 N94-24073
Two micron stimulated emission of activated insulating crystals [REPT-94-002] p 2565 N94-25025
Excitation mechanisms for XUV and x ray lasers [DE93-617006] p 2351 N94-25482

LASER OUTPUTS
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique [DE94-001608] p 2309 N94-23520
Feasibility study: Monodisperse polymer particles containing laser-excitable dyes p 2225 N94-24350
Exciplex laser study: Discharge and magnetic switching systems [PB93-199768] p 2349 N94-24629
Temporal model of an optically pumped co-doped solid state laser [NASA-TM-109680] p 2350 N94-24851
A comparison of free-space and fiber mixer performances [AD-A273558] p 2547 N94-25161

LASER PLASMAS
Characterization of germanium stripe x ray lasers [DE93-019629] p 2347 N94-22867
Characterization of heat transport and radiation hydrodynamics in collisional laser plasmas using collective Thomson scattering [DE94-001502] p 2349 N94-23209

LASER POWER BEAMING
Power beaming to space using a nuclear reactor-pumped laser [DE94-001208] p 2348 N94-23185
Low power ground-based laser illumination for electric propulsion applications [NASA-CR-194444] p 2219 N94-23555
WISPER: Wirless Space Power Experiment [NASA-CR-195538] p 2396 N94-24701

LASER PROPULSION

Advanced space propulsion concepts p 2216 N94-23067

Low power ground-based laser illumination for electric propulsion applications [NASA-CR-194444] p 2219 N94-23555

LASER PUMPING

Power beaming to space using a nuclear reactor-pumped laser [DE94-001208] p 2348 N94-23185

Investigation of the optical and laser properties of Tm and Ho in YAG anf YLF [REPT-94-001] p 2563 N94-24404

Nonlinear dynamical control of lasers [AD-A273359] p 2350 N94-24938

Two micron stimulated emission of activated insulating crystals [REPT-94-002] p 2565 N94-25025

Tunable lasers pumped by visible laser diodes [AD-D016000] p 2350 N94-25044

Internally folded scalable laser [AD-D015978] p 2350 N94-25216

LASER SPECTROSCOPY

Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064) [DE94-002000] p 2347 N94-22974

Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field [NASA-CR-191490] p 2344 N94-24360

LASER STABILITY

Inverse free electron laser beat-wave accelerator research [DE94-002597] p 2349 N94-23702

Inertial confinement fusion [DE94-002602] p 2551 N94-23703

Progress toward ultra-stable lasers for use in space [NASA-TM-109678] p 2349 N94-24488

LASER TARGETS

Numerical simulation and analysis of experimental results on stimulated Raman scattering in laser-plasma Hohlraum targets [DE93-613719] p 2554 N94-25330

LASERS

Crosstalk analysis of synchronous and asynchronous optical chip interconnects with direct detection [AD-A273261] p 2311 N94-24685

Internally folded scalable laser [AD-D015978] p 2350 N94-25216

The evolution of the laser: A systems perspective on science, technology and society [ETN-94-95319] p 2351 N94-25218

LASING

Characterization of germanium stripe x ray lasers [DE93-019629] p 2347 N94-22867

Power beaming to space using a nuclear reactor-pumped laser [DE94-001208] p 2348 N94-23185

Excitation mechanisms for XUV and x ray lasers [DE93-617006] p 2351 N94-25482

LATCH-UP

Floating well based design methodology aimed to improve latch-up immunity in a CMOS/DMOS smart power technology [LAAS-93093] p 2556 N94-22905

LATCHES

Low melting temperature alloy deployment mechanism p 2356 N94-23997

Docking mechanisms: An overview of different systems p 2357 N94-24004

Microwelding due to random vibration p 2359 N94-24019

LATE STARS

Infrared and SiO maser observations of OH/IR stars [PB94-104890] p 2599 N94-24780

LATERAL CONTROL

Feedback control laws for highly maneuverable aircraft [NASA-CR-195195] p 2190 N94-25176

LATERAL STABILITY

Lateral high frequency oscillations and stability of a wheel rolling on a flexible track p 2269 N94-23585

Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data [NASA-CR-194838] p 2190 N94-24804

X-31 aerodynamic characteristics determined from flight data p 2164 N94-25109

LATITUDE

Effect of power system technology and mission requirements on high altitude long endurance aircraft [NASA-CR-194455] p 2189 N94-25200

LATTICE VIBRATIONS

Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation [DE93-617053] p 2567 N94-25424

LATTICES (MATHEMATICS)

A rational elliptic surface related to the question of expressing squares as sum of consecutive squares [W-9305] p 2479 N94-23139

LAUNCH VEHICLES

Expanding the KATE toolbox p 2477 N94-23247

Analysis and test of low profile aluminum aerospace tank dome [NASA-TP-3442] p 2375 N94-23294

Life cycle cost modeling of conceptual space vehicles [NASA-CR-194813] p 2203 N94-23329

National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers [PB94-113487] p 2194 N94-23819

Modal test of the Brazilian satellite launcher (VLS) configuration burn-out of the first stage p 2156 N94-24257

Access to space studies p 2199 N94-24434

Design of an airborne launch vehicle for an air launched space booster [NASA-CR-195534] p 2198 N94-24860

Space transfer vehicle concepts and requirements. Volume 4: Summary of special studies [NASA-CR-193918] p 2201 N94-24970

Optimal RTLS abort trajectories for an HL-20 personnel launch vehicle p 2165 N94-25114

LAW (JURISPRUDENCE)

Using satellite communications for a mobile computer network p 2280 N94-22777

NASA printing, duplicating, and copying management handbook [NASA-NHB-1490.5] p 2590 N94-23971

LAWS

NASA printing, duplicating, and copying management handbook [NASA-NHB-1490.5] p 2590 N94-23971

LAYOUTS

Pilot-vehicle interface [DOT/FAA/CT-92/21] p 2430 N94-23083

Pilot-vehicle interface handbook, chapter 19. Volume 2: Digital systems validation [DOT/FAA/CT-88/10-VOL-2] p 2438 N94-24830

LEACHING

Chemical characterization of some aerobic liquids in CELSS p 2422 N94-23241

LEAD ZIRCONATE TITANATES

Photo-induced and electrooptic properties of (Pb,La)(Zr,Ti)O3 films for optical memories [DE93-019820] p 2542 N94-23202

LEADING EDGE SLATS

Aircraft accident report: Inadvertent in-flight slat deployment, China Eastern Airlines Flight 583, McDonnell Douglas MD-11, B-2171, 950 nautical miles south of Shemya, Alaska, 6 April 1993 [PB93-910408] p 2172 N94-23579

LEADING EDGE SWEEP

Experimental investigation of generic three-dimensional sidewall-compression scramjet inlets at Mach 6 in tetrafluoromethane [NASA-TM-4497] p 2319 N94-23339

LEADING EDGES

Leading-edge votex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques [NASA-TP-3374] p 2166 N94-23512

Characteristics of surface roughness associated with leading edge ice accretion [NASA-TM-106459] p 2166 N94-23522

Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion [NASA-TM-109681] p 2167 N94-23975

Lift augmentation on a delta wing via leading edge fences and the Gurney flap [NASA-CR-194793] p 2168 N94-24103

Stagnation region heat transfer: The influence of turbulence parameters, Reynolds number and body shape [NASA-TM-106504] p 2334 N94-24481

Measurements of the influence of integral length scale on stagnation region heat transfer [NASA-TM-106503] p 2338 N94-25183

Effect of an extendable slat on the stall behavior of a VR-12 airfoil [NASA-TP-3407] p 2171 N94-25187

Analysis and characteristics of compressor stall precursor signals in forward and AFT swept high speed compressor [AD-A273820] p 2171 N94-25517

LEAF AREA INDEX

Session on coupled land surface/hydrological/atmospheric models p 2414 N94-24395

LEAKAGE

Robust, wide-range hydrogen sensor for use in commercial, space, and government applications [DE93-040902] p 2342 N94-22954

Brush seals for cryogenic applications p 2216 N94-23063

Interpretation of discrepancies in mass spectroscopy data obtained from different experimental configurations p 2237 N94-23245

Viscous rotary damper p 2361 N94-24031

Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers [DE94-002293] p 2350 N94-24659

LEARNING THEORY

Understanding and facilitating discovery learning in computer-based simulation environment [ISBN-9-03-860242-1] p 2462 N94-25219

LEAST SQUARES METHOD

Two-stage versus sequential sample-size determination in regression analysis of simulation experiments [PB94-110558] p 2495 N94-24634

Adaptive predictive control of the benchmark plant [OUEL-1972/93] p 2477 N94-25470

Modeling of a large undamped space structure using time domain techniques [AD-A273828] p 2206 N94-25523

LEAVES

The measurement and analysis of leaf spectral reflectance of two stands of loblolly pine populations p 2389 N94-24442

LECTURES

Cardiopulmonary Aspects in Aerospace Medicine [AGARD-LS-189] p 2423 N94-23313

Visual Problems in Night Operations [AGARD-LS-187] p 2431 N94-23976

LEGENDRE FUNCTIONS

Implementation and parallelization of fast matrix multiplication for a fast Legendre transform [DE94-002184] p 2478 N94-22975

On the Gibbs phenomenon 3: Recovering exponential accuracy in a sub-interval from a spectral partial sum of a piecewise analytic function [NASA-CR-191560] p 2480 N94-23278

LENS DESIGN

A study on electrostatic quadrupole lenses and their application technologies [REPT-948] p 2546 N94-24982

LENSES

Output optics for laser velocimeters [NASA-CASE-ARC-11889-1-SB] p 2543 N94-23309

Vision impairment and corrective considerations of civil airmen [DOT/FAA/AM-93/21] p 2426 N94-23623

LENTICULAR BODIES

Internal friction associated with dislocation relaxations in virgin martensite [PB93-226280] p 2240 N94-23119

LEPTONS

Towards a theory of quark and lepton masses [DE94-001726] p 2533 N94-23218

Low mass muon pair production in 450 GeV p-Be collisions [PB94-110699] p 2533 N94-23746

Stitching the Yukawa quilt [PB93-204477] p 2569 N94-24532

LEVITATION

Processing of YBCO superconductors for improved levitation force [DE94-001326] p 2559 N94-22994

Performance analysis of the combined EDS maglev propulsion, levitation, and guidance system [DE94-001346] p 2352 N94-22996

Electrostatic levitation technology for thermophysical properties of molten materials p 2238 N94-25135

LIAPUNOV FUNCTIONS

Control of a serpentine manipulator with collision avoidance p 2368 N94-23232

Continuous gust response and sensitivity derivatives using state-space models p 2161 N94-24287

Neural network-based control using Lyapunov functions p 2477 N94-24433

Liapunov stability in chemical engineering [MATHS-REPT-A-184] p 2236 N94-25427

LIBRARIES

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 21: US aerospace industry librarians and technical information specialists as information intermediaries: Results of the phase 2 survey [NASA-TM-109064] p 2593 N94-24709

Factors influencing perceived usability and utility of LIBERTAS at Cranfield: Implications for system modification and user education [CRANFIELD-AERO-9212] p 2594 N94-25485

NACA collections: A directory of significant collections of the documents of the National Advisory Committee for Aeronautics
[NASA-CR-195686] p 2594 N94-25541

LIE GROUPS
A working algorithm to isolate integrable surfaces in E cubed
[SSCL-PREPRINT-761] p 2452 N94-23518
Coadjoint orbits and conformal field theory
[DE94-002285] p 2523 N94-24658
On BRST quantization of constrained systems
[ETN-94-95386] p 2570 N94-25258

LIFE (DURABILITY)
Small rocket research and technology
p 2211 N94-23038
Strength and life of pressure vessels subjected to impacts and thermomechanical GFRP loading
[VTT-JULK-771] p 2379 N94-25418

LIFE CYCLE COSTS
US Department of Energy phaseout of CFC-refrigerants
[DE94-001668] p 2397 N94-23016
Task 1: Health management demonstration. Task 2: Process management environment and support of enterprise integration. Task 3: New algorithm development in the PME
[NASA-CR-188268] p 2430 N94-23290
Life cycle cost modeling of conceptual space vehicles
[NASA-CR-194813] p 2203 N94-23329
National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers
[PB94-113487] p 2194 N94-23819
New Technologies for Space Avionics, 1993
[NASA-CR-195157] p 2272 N94-25193

LIFE RAFTS
Survival suit for submarine personnel: Summary of evaluation studies
[PB93-204634] p 2430 N94-23743

LIFE SUPPORT SYSTEMS
Chemical characterization of some aerobic liquids in CELSS p 2422 N94-23241
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies
p 2371 N94-24427

LIFT
A numerical study of airplanes flying in proximity
[AD-A273373] p 2173 N94-24718
Active control of oscillatory lift forces on a circular cylinder
[AD-A273243] p 2338 N94-25140
High lift aerodynamics
[NASA-CR-195183] p 2184 N94-25268

LIFT AUGMENTATION
Lift augmentation on a delta wing via leading edge fences and the Gurney flap
[NASA-CR-194793] p 2168 N94-24103

LIFT DRAG RATIO
The Triton: Design concepts and methods
[NASA-CR-195542] p 2184 N94-25004

LIFT FANS
Summary of lift and lift/cruise fan powered lift concept technology
[NASA-CR-177619] p 2176 N94-23489

LIFTING ROTORS
The ISL rotor bench
[ISL-R-108/92] p 2185 N94-25301

LIGHT ADAPTATION
DCT quantization matrices visually optimized for individual images p 2442 N94-25509

LIGHT AIRCRAFT
Design project: Viper
[NASA-CR-195484] p 2184 N94-25021

LIGHT AMPLIFIERS
Investigation of Raman beam cleanup and phase conjugation
[AD-A273157] p 2545 N94-24672
Design and testing of ubitron amplifier tubes
[AD-A273297] p 2311 N94-24818
Improvement of system properties of a pulsed laser Doppler anemometer with respect to an optical amplifier
[DLR-FB-93-19] p 2547 N94-25305

LIGHT BEAMS
Output optics for laser velocimeters
[NASA-CASE-ARC-11889-1-SB] p 2543 N94-23309
Method and apparatus for the non-invasive measurement of pressure inside pipes using a fiber optic interferometer sensor
[AD-D016013] p 2344 N94-24734

LIGHT CURVE
SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-195162] p 2599 N94-24988

LIGHT MODULATION
A fully automated stage for optical waveguide measurements
[AD-A273042] p 2542 N94-22915

LIGHT SCATTERING
Laser diagnostics for small rockets
p 2210 N94-23032
Laser light scattering instrument advanced technology development
[NASA-CR-194803] p 2349 N94-23286
Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror
p 2384 N94-23602
Particle size measurement for the control of industrial crystallizers
[PB94-119104] p 2562 N94-23766
Measuring the dynamics of structural changes in biological macromolecules from light scattering data
p 2422 N94-24426
LRAT: Lightning Radiative Transfer
p 2416 N94-24443
The chemistry of particulate formation in fluorocarbon plasmas
[DE94-001500] p 2552 N94-24546
Investigation of Raman beam cleanup and phase conjugation
[AD-A273157] p 2545 N94-24672
Ultrastructure processing of macromolecular materials
[AD-A273413] p 2258 N94-24782
Numerical simulation and analysis of experimental results on stimulated Raman scattering in laser-plasma Hohlraum targets
[DE93-613719] p 2554 N94-25330

LIGHT SCATTERING METERS
Laser light scattering instrument advanced technology development
[NASA-CR-194803] p 2349 N94-23286

LIGHT SOURCES
Laser energized high voltage direct current power supply
[AD-D015977] p 2312 N94-25036

LIGHT TRANSMISSION
Dual frequency optical carrier technique for transmission of reference frequencies in dispersive media
[NASA-CASE-NPO-18007-2-CU] p 2543 N94-23270
Design and implementation issues of end-to-end protocols in high-speed networks
[PB94-110905] p 2467 N94-23752

LIGHT-CONE EXPANSION
On spontaneous symmetry breaking mechanism in light-front quantized field theory
[DE93-633211] p 2568 N94-22968

LIGHTHILL GAS MODEL
Sound radiation due to boundary layer transition
p 2332 N94-24163

LIGHTING EQUIPMENT
Cockpit/NVG visual integration issues
p 2432 N94-23983

LIGHTNING
Lightning studies using LDAR and LLP data
p 2416 N94-23238
Lightning, atmospheric electricity, and climate change
[DE94-002003] p 2408 N94-23471
CAPE for CaPE p 2416 N94-24409
LRAT: Lightning Radiative Transfer
p 2416 N94-24443
Lightning tests and analyses of tunnel bond straps and shielded cables on the Space Shuttle solid rocket booster
[NASA-CR-193921] p 2200 N94-24801

LIMITERS (FUSION REACTORS)
Temporal behavior of the electron density profile during limiter biasing in the HYBTOK-2 tokamak
[NIFS-257] p 2552 N94-24456

LIMITS (MATHEMATICS)
Setting test limits under prescribed consumer loss
[MEMO-1107] p 2478 N94-22725
Infinite divisible and stable distributions modulo 1
[PB94-110640] p 2495 N94-23815
Uniform limit theorems for marked point processes
[PB94-118726] p 2488 N94-24526

LINE CURRENT
Transient analysis of conducting half-plane problem with noncausal scattering image
[PB93-225027] p 2524 N94-23110

LINE SPECTRA
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812

LINEAR ACCELERATORS
A system for managing information at ATLAS
[DE94-001337] p 2590 N94-23190
The CEBAF beam loss sensors
[CEBAF-PR-93-032] p 2540 N94-24662
Activities of Academia Sinica
[DE93-614529] p 2541 N94-25335

LINEAR CIRCUITS
APLAC: An object-oriented analog circuit simulator and design tool. 6.1 system simulations manual
[PB93-224871] p 2450 N94-23226

LINEAR ENERGY TRANSFER (LET)
To perform a proof-of-concept study on the use of superheated drop detectors for the measurement of LET spectra in space environments
[BTI-92/3-31] p 2629 N94-24695

LINEAR EQUATIONS
Multigrid method for integral equations and automatic programs p 2464 N94-23696

LINEAR PREDICTION
Algorithms for speech coding systems based on linear prediction
[EUT-92-E-260] p 2447 N94-22731
Psychophysical and signal-processing aspects of speech representation
[ETN-94-95292] p 2302 N94-25077

LINEAR PROGRAMMING
The Third Twente Workshop on Graphs and Combinatorial Optimization
[PB94-110947] p 2486 N94-23722

LINEAR QUADRATIC GAUSSIAN CONTROL
Balancing for unstable nonlinear systems
[MEMO-1118] p 2469 N94-22705
A homotopy algorithm for digital optimal projection control GASD-HADOC
[NASA-CR-193881] p 2456 N94-24470
Flight controller design using mixed H2/H infinity optimization with a singular H infinity constraint
[AD-A273831] p 2191 N94-25525

LINEAR QUADRATIC REGULATOR
Operating the Daisy facility to perform control experiments
[ISBN-0-315-83554-0] p 2196 N94-22889

LINEAR SYSTEMS
Reduced-order modelling and control of a class of systems for which balanced truncation is Hankel-norm optimal
[OUEL-1922/92] p 2472 N94-23163
Nested Krylov methods and preserving the orthogonality p 2483 N94-23681
Coordinate-free interpretations of the optimal costs for Lq problems subject to implicit systems
[PB94-118700] p 2473 N94-23760
Neural network-based control using Lyapunov functions p 2477 N94-24433
The state space method for integro-differential equations of convolution type with rational matrix symbols
[ETN-94-95379] p 2491 N94-25244
From circuit to signal: Development of a piecewise linear simulator
[ISBN-9-09-005713-7] p 2462 N94-25263
Arbitrary-order numerical schemes for linear hyperbolic systems
[CRANFIELD-AERO-9211] p 2523 N94-25480

LINEAR TRANSFORMATIONS
Orbit spaces over commutative rings and projectives as semi-isomorphisms
[DE93-616822] p 2493 N94-25473

LINEARIZATION
Decoupling problems around a trajectory: From linearity to nonlinearity
[MEMO-1115] p 2469 N94-22703
On dynamic input-output linearization of discrete-time nonlinear systems
[MEMO-1123] p 2447 N94-22711
Feedback linearization of parametrized nonlinear time-varying systems
[MEMO-1126] p 2470 N94-22714
Broadband linearisation of high-efficiency power amplifiers p 2275 N94-22747

LINKAGES
Docking mechanisms: An overview of different systems p 2357 N94-24004
High precision double four bar linkage mechanism for interferometric linear scanning p 2359 N94-24013

LIPIDS
Primary prevention of coronary heart disease
p 2423 N94-23317
Synthesis and in-vivo detection of boronated compounds for use in BNCT
[DE94-001899] p 2233 N94-23780

LIQUID ALLOYS
Optical properties and emissivities of liquid metals and alloys p 2248 N94-25129

LIQUID ATOMIZATION
Measurement of intact-core length of atomizing liquid jets by image deconvolution p 2210 N94-23029
A theoretical evaluation of aluminum gel propellant two-phase flow losses on vehicle performance
p 2210 N94-23031
Spray formation processes of impinging jet injectors
p 2212 N94-23042

LIQUID CHROMATOGRAPHY
Capillary electrokinetic separations with optical detection [DE94-001639] p 2233 N94-23716
LIQUID CRYSTALS
Method of determining shear stress employing a monomer-polymer laminate structure [NASA-CASE-LAR-14654-2] p 2375 N94-23308
Application of multigrid methods to the solution of liquid crystal equations on a SIMD computer p 2484 N94-23686
Ultrastructure processing of macromolecular materials [AD-A273413] p 2258 N94-24782
Center for advanced electrical and structural polymers [AD-A273415] p 2259 N94-24783
Surface-induced static undulations in multilayer films of liquid-crystalline polymers [AD-A273517] p 2262 N94-25159
Structure of cholesteryl-4-vinylbenzoate [AD-A273686] p 2567 N94-25441
LIQUID FUELS
Electro-rheology fluids and liquid fuel flow [AD-A273640] p 2337 N94-25032
LIQUID INJECTION
Inherent stability of central element coaxial liquid-liquid injectors p 2212 N94-23043
LIQUID LEVELS
Thermodynamic models for bounding pressurant mass requirements of cryogenic tanks [NASA-TM-106476] p 2346 N94-25202
LIQUID METALS
SP-100 heat transport technology development [DE94-000769] p 2218 N94-23452
Workshop on the Thermophysical Properties of Molten Materials [NASA-CP-10121] p 2246 N94-25120
Detection of velocity in high temperature liquid metals p 2247 N94-25127
Optical properties and emissivities of liquid metals and alloys p 2248 N94-25129
Thermophysical properties of simple liquid metals: A brief review of theory p 2248 N94-25130
Surface chemistry of liquid metals p 2249 N94-25133
LIQUID NITROGEN
Design of microchannels for cryostabilization of high temperature superconducting magnets [DE94-001324] p 2559 N94-22993
Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657
Tribological behaviour of fluorinated resins and polyimide resins sliding over a metallic surface in liquid nitrogen p 2355 N94-23991
LIQUID OXYGEN
LOX droplet vaporization in a supercritical forced convective environment p 2211 N94-23034
Evaporation and combustion of LOX under supercritical and subcritical conditions p 2211 N94-23035
Axisymmetric single shear element combustion instability experiment p 2213 N94-23044
Shear coaxial injector instability mechanisms p 2213 N94-23047
Computational Fluid Dynamics (CFD) applications in rocket propulsion analysis and design p 2214 N94-23054
Features of a SINDA/FLUINT model of a liquid oxygen supply line p 2322 N94-23649
Design considerations of hybrid rockets p 2156 N94-24254
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
Advanced launch system. Advanced development oxidizer turbopump program [NASA-CR-193920] p 2367 N94-25174
LIQUID PHASES
High strain rate superplasticity in metals and composites [DE94-001521] p 2229 N94-24547
LIQUID PROPELLANT ROCKET ENGINES
Measurement of intact-core length of atomizing liquid jets by image deconvolution p 2210 N94-23029
LOX droplet vaporization in a supercritical forced convective environment p 2211 N94-23034
Droplet turbulence interactions under subcritical and supercritical conditions p 2211 N94-23036
Fundamental rocket injector/spray programs at the Phillips Laboratory p 2211 N94-23039
Numerical parametric studies of spray combustion instability p 2212 N94-23041
Spray formation processes of impinging jet injectors p 2212 N94-23042
Inherent stability of central element coaxial liquid-liquid injectors p 2212 N94-23043
Flow visualization study in high aspect ratio cooling channels for rocket engines p 2213 N94-23049
Heat transfer in rocket combustion chambers p 2214 N94-23051
Computational Fluid Dynamics (CFD) applications in rocket propulsion analysis and design p 2214 N94-23054
Liquid rocket propulsion: Retrospective and prospects p 2154 N94-24243
Heat transfer in rocket engine combustion chambers and regeneratively cooled nozzles [NASA-CR-195094] p 2220 N94-24471
Ignition and combustion characteristics of metallized propellants, phase 2 [NASA-CR-195107] p 2266 N94-24700
LIQUID ROCKET PROPELLANTS
Development of a computational testbed for numerical simulation of combustion instability p 2213 N94-23046
Recent advances in SPE (tm) water electrolyzer p 2393 N94-23362
Assessment of an SP-100 bi-modal propulsion and power system [DE94-000889] p 2218 N94-23433
LIQUID SURFACES
Measurement of intact-core length of atomizing liquid jets by image deconvolution p 2210 N94-23029
Response of an anchored annular cylindrical liquid layer to various axial excitations in zero-gravity [LRT-WE-9-FB-3-1992] p 2266 N94-23195
Design of a surface deformation measuring instrument for the Surface Tension Driven Convection Experiment (STDCE-2) [NASA-CR-194758] p 2343 N94-23285
LIQUID-GAS MIXTURES
Hydrodynamics of stirred gas-liquid dispersions [ETN-94-95368] p 2339 N94-25254
LIQUID-LIQUID INTERFACES
Electrochemically mediated polymerization of 2-pentadecylaniline confined to a planar liquid-liquid interface [AD-A273541] p 2259 N94-24792
The hydrodynamics of a moving fluid-liquid contact line [ETN-94-95352] p 2339 N94-25247
LIQUID-SOLID INTERFACES
Liquid oscillations in a spherical system with sliding edges boundary by two conical solid surfaces in zero-gravity [LRT-WE-9-FB-5-1992] p 2318 N94-23197
Effects of thermal-solutal convection on temperature and solutal fields under various gravitational orientations p 2267 N94-24451
Surface-induced static undulations in multilayer films of liquid-crystalline polymers [AD-A273517] p 2262 N94-25159
The hydrodynamics of a moving fluid-liquid contact line [ETN-94-95352] p 2339 N94-25247
LIQUID-VAPOR EQUILIBRIUM
Effect of initial droplet-size distributions on fuel-vapor profiles in a shear-layer flow p 2160 N94-24283
LIQUID-VAPOR INTERFACES
The 2-D polymerized Langmuir-Blodgett films studied by STM [AD-A273542] p 2261 N94-24930
LIQUIDS
Containerless measurements on liquids at high temperatures p 2238 N94-25125
LIQUIDUS
Containerless measurements on liquids at high temperatures p 2238 N94-25125
Liquidus temperature and optical properties measurement by containerless techniques p 2247 N94-25126
LITERATURE
Third Annual Foreign Acquisitions Workshop: Improving Access to Foreign Gray Literature [NASA-TM-109683] p 2593 N94-24759
LITHIUM
SP-100 heat transport technology development [DE94-000769] p 2218 N94-23452
LITHIUM ALLOYS
Segregation and oxidation studies of Al-Li and Al-Mg alloys [ISBN-0-315-83993-7] p 2244 N94-24469
LITHIUM HYDRIDES
Vacancy formation energy of Li(H, D) and Na(H, D) systems [DE93-633452] p 2558 N94-22978
LITHIUM OXIDES
Overcharge and overdischarge protection of ambient temperature secondary lithium cells [NASA-CASE-NPO-18343-1-CU] p 2310 N94-23823
Glass-ceramic Li-Al-Si-O composition and process for its production [CA-PATENT-APPL-SN-2043757] p 2254 N94-24129
LITHIUM SULFUR BATTERIES
Status of the development of rechargeable lithium cells p 2392 N94-23354
LITHOGRAPHY
Proposed additions to the SHADOW ray-tracing code for general-asymmetric perfect-crystal optics [DE94-001291] p 2560 N94-23188
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique [DE94-001608] p 2309 N94-23520
Characteristics of products generated by selective sintering and stereolithography rapid prototyping processes p 2264 N94-24412
Scanning probe lithography. 2: Selective chemical vapor deposition of copper into scanning tunneling microscope-defined patterns [AD-A273304] p 2547 N94-25144
High precision x ray lithographic masks [AD-A273342] p 2346 N94-25154
LITHOLOGY
Highland crust at the Apollo 14 site: A review p 2614 N94-24364
The western highland province at the Apollo 14 site p 2615 N94-24369
Seafloor characterization/Galapagos propagating rift [AD-A273586] p 2419 N94-25165
LITHOSPHERE
The national geomagnetic initiative [LC-93-85739] p 2401 N94-23344
LIVER
In vitro system for studying metabolism of environmental chemicals in human cells [AD-A273427] p 2421 N94-24688
LOAD DISTRIBUTION (FORCES)
Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280
Reduction of structural loads using maneuver load control on the Advanced Fighter Technology Integration (AFTI)/F-111 mission adaptive wing [NASA-TM-4526] p 2168 N94-24295
LOADING RATE
Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2 [NASA-CR-193893] p 2229 N94-24224
LOADS (FORCES)
Split spline screw [NASA-CASE-GSC-13434-1] p 2352 N94-23082
A study of the core module simulator floor capability p 2380 N94-24418
Buckling of circular cylindrical shells subjected to combined loads (axial compression, normal pressure, bending and transverse shear loading) [PB93-215358] p 2378 N94-24745
Loading, electromyograph, and motion during exercise p 2427 N94-25359
Loading, electromyograph, and motion during exercise p 2427 N94-25380
LOCAL AREA NETWORKS
Supercomputer networking for space science applications [NASA-CR-194876] p 2465 N94-23085
Switch configuration for migration to optical fiber network p 2447 N94-23250
SPOT4 Operational Control Center (CMP) p 2197 N94-23856
The evolving trend in spacecraft health analysis p 2202 N94-23946
The experimental physics and industrial control system architecture: Past, present, and future [DE94-002639] p 2457 N94-24626
Ground based mission planning systems p 2522 N94-25014
LOCAL SCIENTIFIC SURVEY MODULE
Using the SPICE system to help plan and interpret space science observations p 2517 N94-23950
LOCAL THERMODYNAMIC EQUILIBRIUM
Model atmosphere analysis of selected luminous B stars [NASA-CR-195098] p 2599 N94-24051
The solar spectral irradiances from x ray to radio wavelengths [NASA-CR-195203] p 2629 N94-25260
LOCKS (FASTENERS)
Preloaded launch locking devices for SILEX p 2358 N94-24008
LOCOMOTION
Mechanical design of a planetary rover p 2369 N94-23403
Planetary rover locomotion mechanisms p 2369 N94-23404

Walking, jumping, and tumbling: More than one way to get around Mars p 2370 N94-23419
Physical modeling and dynamic simulation of planet vehicles: Application to the motion prediction p 2371 N94-23426

LOGARITHMS
Logarithm of probability measures and infinite divisibility of sub-stable random vectors [PB94-118627] p 2486 N94-23758

LOGIC CIRCUITS
Formal verification of digital circuits described in VHDL [ETN-94-95165] p 2306 N94-22883
Logic synthesis on programmable networks [ETN-94-95174] p 2449 N94-23151
CADBIT 2: Computer-aided design for built-in test, volume 1 [AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2 [AD-A273703] p 2463 N94-25456

LOGIC DESIGN
A method for the general simultaneous full decomposition of sequential machines: Algorithms and implementation [EUT-92-E-267] p 2445 N94-23170
Towards the formal specification of the requirements and design of a processor interface unit: HOL listings [NASA-CR-191465] p 2466 N94-23252

LOGIC PROGRAMMING
An information retrieval logical model applied to the formalism of conceptual graphs: The ELEN prototype and its experimentation on a corpus of software components [ETN-94-95162] p 2588 N94-22879
Interpretation of evolutive environment by a multisensory perception machine [LAAS-93111] p 2471 N94-22907
Asynchronous rendezvous in distributed logic programming [PB93-220614] p 2448 N94-23096
Logic synthesis on programmable networks [ETN-94-95174] p 2449 N94-23151
Applications of the Aurora parallel PROLOG system to computational molecular biology [DE93-041166] p 2420 N94-23468
Transition system specifications in stalk format with bisimulation as a congruence [PB94-110608] p 2453 N94-23707
Combinatory reduction systems: Introduction and survey [PB94-110582] p 2457 N94-24570
Area-power-delay trade-off in logic synthesis [ISBN-9-09-005332-8] p 2461 N94-25080

LOGISTICS
The Columbus logistics support at the APMC: Requirements and implementation aspects p 2515 N94-23935
Timed coloured Petri nets and their application to logistics [ETN-94-95310] p 2522 N94-25293
A comparative evaluation plan for the Maintenance, Inventory, and Logistics Planning (MILP) System Human-Computer Interface (HCI) p 2588 N94-25373

LOGISTICS MANAGEMENT
A framework for SFC/DC system data analysis p 2523 N94-23234

LONG DURATION EXPOSURE FACILITY
Analysis of impactor residues in tray clamps from the Long Duration Exposure Facility. Part 2: Clamps from Bay B of the satellite [NASA-TM-104784] p 2386 N94-24095

LONG DURATION SPACE FLIGHT
Concepts and embodiment design of a reentry recumbent seating system for the NASA Space Shuttle [NASA-CR-195504] p 2438 N94-24667

LONG TERM EFFECTS
A fifteen years lifetime mechanism for an infrared Earth sensor p 2362 N94-24040
Static adhesion in preloaded contacts subjected to long-term vacuum exposure p 2363 N94-24043
Design and testing of a unique randomized gravity, continuous flow bioreactor p 2423 N94-25368

LONGITUDINAL CONTROL
A combined Earth scanner and momentum wheel for attitude determination and control of small spacecraft p 2208 N94-24022
Feedback control laws for highly maneuverable aircraft [NASA-CR-195195] p 2190 N94-25176

LONGITUDINAL STABILITY
Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data [NASA-CR-194838] p 2190 N94-24804
Effect of aeroelastic-propulsive interactions on flight dynamics of a hypersonic vehicle p 2164 N94-25113

LOOP ANTENNAS
Isolated and coupled superquadric loop antennas for mobile communications applications p 2289 N94-22834

LOOP TRANSFER RECOVERY
Asymptotic correctors: The LTR [PB93-199701] p 2474 N94-24627

LOOPS
Material data representation of hysteresis loops for Hastelloy X using artificial neural networks [NASA-TM-105990] p 2376 N94-23551

LORENTZ TRANSFORMATIONS
On the transverse size of a fast moving nucleon [DE93-616891] p 2539 N94-25481

LOSSES
Momentum loss in proton-nucleus and nucleus-nucleus collisions [NASA-TP-3405] p 2540 N94-24305

LOUDNESS
Variability of measured sonic boom signatures. Volume 1: Technical report [NASA-CR-191483-VOL-1] p 2526 N94-24172
Variability of measured sonic boom signatures. Volume 2: Data report [NASA-CR-191483-VOL-2] p 2526 N94-24173

LOUDSPEAKERS
Comparison of measured and predicted pure tone propagation levels from JAPE-1: An evaluation of the performance of ASOPRAT p 2527 N94-24212

LOUVERS
Solution of mixed convection heat transfer from isothermal in-line fins p 2321 N94-23644

LOW ALTITUDE
Regulated drag area parachute [AD-D015992] p 2170 N94-25051

LOW ASPECT RATIO
Off-design performance of crenulated blades in a linear compressor cascade [AD-A273744] p 2340 N94-25534

LOW CARBON STEELS
Crashworthiness analysis using advanced material models in DYNA3D [DE94-002988] p 2229 N94-24632

LOW COST
The Westinghouse Series 1000 Mobile Phone: Technology and applications p 2284 N94-22800
Low cost coherent demodulation for mobile satellite terminals p 2284 N94-22803
Low cost antennas for MSAT vehicular applications p 2289 N94-22830
Microstrip monopulse antenna for land mobile communications p 2289 N94-22833
L-band mobile terminal antennas for helicopters p 2289 N94-22835
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure [AD-A273403] p 2261 N94-25072
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations [AD-A273662] p 2251 N94-25449

LOW CURRENTS
LHCD (low hybrid current drive) experiment on the HT-6B tokamak [DE93-613720] p 2555 N94-25331
Effect of LHCD (low hybrid current drive) on tearing mode instability [DE93-613700] p 2555 N94-25344

LOW FREQUENCIES
Modal structure of variations in the tropical climate system. Part 2: Origins of the low-frequency mode [MPIM-96] p 2407 N94-23199
Multi-ion, multi-event test of ion cyclotron resonance heating [NASA-CR-194859] p 2540 N94-23495
Nonlinear dynamics applied to atmospheric prediction [AD-A273437] p 2404 N94-24674
Very low frequency and low frequency transmitting antenna parameter monitoring system [AD-D015989] p 2302 N94-25049
Measurements and modeling of multitone, low-frequency acoustic data from the Arraial do Cabo range [AD-A273406] p 2530 N94-25073
Improved magnetostrictive transducer drive elements achieved by reduction of crystalline defects and improved crystalline orientation [AD-A273391] p 2313 N94-25276

LOW MOLECULAR WEIGHTS
Polyimide processing additives [NASA-CASE-LAR-13669-2] p 2252 N94-23079
Center for advanced electrical and structural polymers [AD-A273415] p 2259 N94-24783

LOW NOISE
Cryogenic, low-noise high electron mobility transistor amplifiers for the Deep Space Network p 2291 N94-23262

LOW PRESSURE
Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments [DE93-040161] p 2231 N94-22933
Performance assessment of low pressure nuclear thermal propulsion p 2217 N94-23070
LPCVD of InN on GaAs(110) using HN3 and TMIn: Comparison with Si(100) results [AD-A273555] p 2235 N94-24917
Mechanisms of anode power deposition in a low pressure free burning arc [NASA-CR-194442] p 2553 N94-25190

LOW REYNOLDS NUMBER
The use of transition region characteristics to improve the numerical simulation of heat transfer in bypass transitional flows [NASA-TM-106445] p 2320 N94-23525
Evaluation of turbulence models in the PARC code for transonic diffuser flows [NASA-TM-106391] p 2168 N94-24084
On streak spacing in wall-bounded turbulent flows p 2331 N94-24159
Detailed description of two calculation programs for incompressible, steady state boundary layer flows, applied to determine the aerodynamic characteristics of NACA12 and OA312 foils at low Reynolds numbers [ISL-N-604/92] p 2171 N94-25461

LOW TEMPERATURE
Low temperature diffusion of hydrogenic species in oxide crystals: Radiation induced diffusion [DE94-000374] p 2558 N94-22957
Thermally activated low temperature creep and primary water stress corrosion cracking of NiCrFe alloys [DE94-001756] p 2241 N94-23219

LOW THRUST
Theory and computation of optimal low- and medium-thrust transfers [NASA-CR-194812] p 2217 N94-23275
Design of a resistojet for Space Station Freedom [NASA-CR-195506] p 2221 N94-24979

LOW THRUST PROPULSION
Molecular gas dynamics applied to low-thrust propulsion p 2214 N94-23053

LOW VISIBILITY
Airport surface operations requirements analysis [NASA-CR-191508] p 2172 N94-23288

LOW VOLTAGE
Limiting factors for carbon based chemical double layer capacitors p 2394 N94-23365

LOWER BODY NEGATIVE PRESSURE
Responses to LBNP in men with varying profiles of strength and aerobic capacity: Implications for flight crews [NASA-TP-3346] p 2426 N94-23530

LUBRICANT TESTS
An analytical ultra-high vacuum tribometer for solid lubricant studies p 2361 N94-24033
BLAST, a new lubricant screening tester for space oils and greases p 2362 N94-24042
An assessment of solid lubricant films for use in high temperature space applications p 2363 N94-24044
The development of dry-lubricated ceramic cages p 2363 N94-24045
Development of high temperature liquid lubricants for low-heat rejection: Heavy duty diesel engines [NASA-CR-191197] p 2258 N94-24753

LUBRICANTS
New method for increasing machine service-life, phase 2 [PB93-200707] p 2354 N94-23533
New pin-on-disk equipment for vacuum tribometry p 2360 N94-24023

LUBRICATING OILS
Tribological characterization of spatial wet lubricants under vacuum p 2264 N94-24010
In-vacuum performance of Fomblin Z25-lubricated, 52100 steel bearings with TiC-coated balls p 2358 N94-24011
BLAST, a new lubricant screening tester for space oils and greases p 2362 N94-24042
A colour image processing algorithm to identify copper-based particles in filter debris samples [DREP-TM-93-19] p 2455 N94-24122

LUBRICATION
Lewis Research Center R and D Facilities [NASA-TM-109400] p 2630 N94-23135
New method for increasing machine service-life, phase 2 [PB93-200707] p 2354 N94-23533
An application of small-gap equations in sealing devices p 2325 N94-23668

Development of a theory of the wear of ceramics [DE94-002773] p 2254 N94-23783

Tribological characteristics of ball bearings lubricated with a sputtered molybdenum disulphide film in a vacuum under a high thrust load p 2355 N94-23992

The tribology of some MoS2-lubricated engineering ceramics p 2356 N94-23993

Thermal vacuum performance of cycloid and harmonic gearboxes with solid (MoS2) and liquid (Braycote 601) lubrication p 2358 N94-24009

Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas [NASA-CR-189214] p 2364 N94-24090

Investigation of the ultrafiltration technique using military greases [AD-A273633] p 2261 N94-25029

LUMINANCE

Validation of a second generation conspicuity meter [IZF-1993-A-11] p 2542 N94-22895

Evaluation of visual acuity with Gen 3 night vision goggles [NASA-TM-108792] p 2431 N94-23974

Night vision devices and characteristics p 2432 N94-23982

Luminance-brightness mapping: The missing decades [ETN-94-95351] p 2428 N94-25298

LUMINESCENCE

Symbiosis in marine luminous bacteria [AD-A273540] p 2422 N94-24791

Data analysis and interpretation of lunar dust exosphere p 2623 N94-25349

LUMINOSITY

Search for the top quark and other new particles at D0 [DE94-001220] p 2535 N94-24515

LUNAR BASED EQUIPMENT

Interferometric astronomy on the Moon p 2601 N94-23378

Conceptual design and architecture of hexapod robotic vehicles for the (L)OVLA project p 2369 N94-23405

LOITA: Lunar Optical/Infrared Telescope Array [NASA-CR-195532] p 2546 N94-24816

LUNAR BASES

Power beaming to space using a nuclear reactor-pumped laser [DE94-001208] p 2348 N94-23185

Design of a lunar propellant processing facility. NASA/USRA advanced program [NASA-CR-195502] p 2266 N94-24618

Space transfer vehicle concepts and requirements. Volume 4: Summary of special studies [NASA-CR-193918] p 2201 N94-24970

LUNAR COMMUNICATION

Conceptual communications system design in the 25.25-27.5 and 37.0-40.5 GHz frequency bands p 2306 N94-25379

LUNAR COMPOSITION

Basaltic Volcanism and Ancient Planetary Crusts [NASA-CR-193151] p 2614 N94-24363

LUNAR CRATERS

The morphology of the lunar surface parts in the region of work of the mobile geological laboratory vehicle in Mare Imbrium p 2607 N94-23385

LUNAR CRUST

Basaltic Volcanism and Ancient Planetary Crusts [NASA-CR-193151] p 2614 N94-24363

Highland crust at the Apollo 14 site: A review p 2614 N94-24364

Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts p 2614 N94-24365

Major element chemistry of Apollo 14 mare basalt clasts and highland plutonic clasts from lunar breccia 14321: Comparison with neutron activation results p 2614 N94-24366

The western highland province at the Apollo 14 site p 2615 N94-24369

Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component p 2615 N94-24370

Heterogeneity in small aliquots of Apolllo 15 olivine-normative basalt: Implications for breccia clast studies p 2616 N94-24373

LUNAR DUST

Data analysis and interpretation of lunar dust exosphere p 2623 N94-25349

LUNAR EXPLORATION

The birth of NASA: The diary of T. Keith Glennan [NASA-SP-4105] p 2630 N94-23333

Lunar science strategy: Exploring the Moon with humans and machines p 2605 N94-23376

Robotic exploration of Moon and Mars p 2606 N94-23379

The morphology of the lunar surface parts in the region of work of the mobile geological laboratory vehicle in Mare Imbrium p 2607 N94-23385

Unmanned lunar rovers: Utilization for exploration p 2607 N94-23387

Early lunar rover mission studies p 2607 N94-23388

Lunar exploration rover program developments [DE93-040759] p 2613 N94-23469

LUNAR GEOLOGY

Lunar science strategy: Exploring the Moon with humans and machines p 2605 N94-23376

The morphology of the lunar surface parts in the region of work of the mobile geological laboratory vehicle in Mare Imbrium p 2607 N94-23385

Catalog of Apollo 17 rocks. Volume 1: Stations 2 and 3 (South Massif) [NASA-CR-194854] p 2613 N94-24058

Highland crust at the Apollo 14 site: A review p 2614 N94-24364

Major element chemistry of Apollo 14 mare basalt clasts and highland plutonic clasts from lunar breccia 14321: Comparison with neutron activation results p 2614 N94-24366

Auto-metasomatism of the western lunar highlands: Result of closed system fractionation and mobilization of a KREEPy trapped liquid p 2615 N94-24367

Polytopic vector analysis in igneous petrology: Application to lunar petrogenesis p 2615 N94-24368

The western highland province at the Apollo 14 site p 2615 N94-24369

LUNAR LANDING MODULES

Lunar transportation system [NASA-CR-195540] p 2365 N94-24805

Extended duration lunar lander [NASA-CR-195527] p 2206 N94-24916

LUNAR LANDING SITES

Auto-metasomatism of the western lunar highlands: Result of closed system fractionation and mobilization of a KREEPy trapped liquid p 2615 N94-24367

LUNAR MANTLE

Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component p 2615 N94-24370

LUNAR MARIA

Basaltic Volcanism and Ancient Planetary Crusts [NASA-CR-193151] p 2614 N94-24363

Major element chemistry of Apollo 14 mare basalt clasts and highland plutonic clasts from lunar breccia 14321: Comparison with neutron activation results p 2614 N94-24366

Auto-metasomatism of the western lunar highlands: Result of closed system fractionation and mobilization of a KREEPy trapped liquid p 2615 N94-24367

Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component p 2615 N94-24370

LUNAR MINING

Design of a lunar propellant processing facility. NASA/USRA advanced program [NASA-CR-195502] p 2266 N94-24618

LUNAR OBSERVATORIES

Interferometric astronomy on the Moon p 2601 N94-23378

LOLA: Lunar Optical Long-baseline Array. 1992-1993 space design [NASA-CR-195533] p 2298 N94-24582

LOITA: Lunar Optical/Infrared Telescope Array [NASA-CR-195532] p 2546 N94-24816

LUNAR RESOURCES

Design of a lunar propellant processing facility. NASA/USRA advanced program [NASA-CR-195502] p 2266 N94-24618

LUNAR ROCKS

Catalog of Apollo 17 rocks. Volume 1: Stations 2 and 3 (South Massif) [NASA-CR-194854] p 2613 N94-24058

Highland crust at the Apollo 14 site: A review p 2614 N94-24364

Polytopic vector analysis in igneous petrology: Application to lunar petrogenesis p 2615 N94-24368

The western highland province at the Apollo 14 site p 2615 N94-24369

Heterogeneity in small aliquots of Apolllo 15 olivine-normative basalt: Implications for breccia clast studies p 2616 N94-24373

LUNAR ROVING VEHICLES

Catalog of Apollo experiment operations [NASA-RP-1317] p 2194 N94-23292

Missions, Technologies, and Design of Planetary Mobile Vehicles [ISBN-2-85428-331-7] p 2605 N94-23373

Past US studies and developments for planetary rovers p 2369 N94-23375

Lunar science strategy: Exploring the Moon with humans and machines p 2605 N94-23376

Rover requirements for the planet surface segment of the space exploration initiative p 2369 N94-23377

Lunar rover navigation concepts p 2607 N94-23386

Unmanned lunar rovers: Utilization for exploration p 2607 N94-23387

Early lunar rover mission studies p 2607 N94-23388

The study of the mobile lunar explorer p 2607 N94-23389

Lunar exploration rover program developments [DE93-040759] p 2613 N94-23469

Some useful innovations with TRASYS and SINDA-85 p 2322 N94-23647

LUNAR SOIL

Highland crust at the Apollo 14 site: A review p 2614 N94-24364

Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts p 2614 N94-24365

Major element chemistry of Apollo 14 mare basalt clasts and highland plutonic clasts from lunar breccia 14321: Comparison with neutron activation results p 2614 N94-24366

Polytopic vector analysis in igneous petrology: Application to lunar petrogenesis p 2615 N94-24368

Measuring track densities in lunar grains by image analysis p 2623 N94-25355

LUNAR SURFACE

Catalog of Apollo experiment operations [NASA-RP-1317] p 2194 N94-23292

Rover requirements for the planet surface segment of the space exploration initiative p 2369 N94-23377

The morphology of the lunar surface parts in the region of work of the mobile geological laboratory vehicle in Mare Imbrium p 2607 N94-23385

Design of a walking robot [NASA-CR-195200] p 2367 N94-25274

LUNAR TOPOGRAPHY

The morphology of the lunar surface parts in the region of work of the mobile geological laboratory vehicle in Mare Imbrium p 2607 N94-23385

LUNAR TRAJECTORIES

Lunar transportation system [NASA-CR-195540] p 2365 N94-24805

LUNGS

Spontaneous pneumothorax, cysts and bullae p 2425 N94-23326

LUNOKHOD LUNAR ROVING VEHICLES

Soviet developments of planet rovers in period of 1964 - 1990 p 2369 N94-23374

LYMAN ALPHA RADIATION

Model development for Ulysses and SOHO [NASA-CR-193884] p 2627 N94-24484

LYSOZYME

Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344

M

MACH NUMBER

Calibration of HYPULSE for hypervelocity air flows corresponding to flight Mach numbers 13.5, 15, and 17 [NASA-CR-191578] p 2192 N94-23564

Evaluation of turbulence models in the PARC code for transonic diffuser flows [NASA-TM-106391] p 2168 N94-24084

Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164

Effects of shock strength on shock turbulence interaction p 2332 N94-24165

An experimental investigation of a Mach 3.0 high-speed civil transport at supersonic speeds [NASA-TP-3365] p 2169 N94-24311

The radiated noise from isotropic turbulence revisited [NASA-CR-191547] p 2333 N94-24356

Experimental cavity pressure measurements at subsonic and transonic speeds. Static-pressure results [NASA-TP-3358] p 2169 N94-24464

Validation of the ROTAC code for the rotor noise prediction [PB93-204311] p 2529 N94-24514

Relationship between transition and modes of instability in supersonic boundary layers [NASA-CR-4562] p 2336 N94-24725

MACHINE LEARNING

Artificial neural networks: Application to the optical recognition of music partitions [ETN-94-95166] p 2470 N94-22884

Increasing levels of assistance in refinement of knowledge-based retrieval systems [NASA-CR-195144] p 2591 N94-24552

A methodology for software cost estimation using machine learning techniques [AD-A273158] p 2459 N94-24775

High-level connectionist models [AD-A273638] p 2468 N94-25030

MACHINE TOOLS

Machines for moving in soil p 2369 N94-23411

JBK-75 stainless steel machinability study [DE94-002268] p 2242 N94-23475

Composite material impregnation unit [NASA-TM-107751] p 2254 N94-23486

Tool sharing, part 3 [PB94-111697] p 2467 N94-24524

Research experience for undergraduates in robotics and materials [AD-A273659] p 2368 N94-25436

MACHINE-INDEPENDENT PROGRAMS

Dynamic data distributions in Vienna Fortran [NASA-CR-191575] p 2448 N94-23092

MACHINERY

Vibrational power transmission analysis of machinery installations in ships with the objective of noise reduction [ISVR-TR-216] p 2363 N94-24076

MACHINING

JBK-75 stainless steel machinability study [DE94-002268] p 2242 N94-23475

MACINTOSH PERSONAL COMPUTERS

Activity Catalog Tool (ACT) user manual, version 2.0 [NASA-CR-177634] p 2430 N94-23527

Performing speech recognition research with hypercard p 2306 N94-24194

MACROMOLECULES

Polymer morphologh p 2226 N94-24353

Ultrastructure processing of macromolecular materials [AD-A273413] p 2258 N94-24782

Center for advanced electrical and structural polymers [AD-A273415] p 2259 N94-24783

MACROSCOPIC EQUATIONS

Derivation of the macroscopic rate equations for the driven diffusive Ising model at pair level of approximation [DE93-616839] p 2524 N94-25208

MAGELLAN SPACECRAFT (NASA)

Magellan spacecraft and memory state tracking: Lessons learned, future thoughts p 2207 N94-23865

VMPLOT: A versatile analysis tool for mission operations p 2507 N94-23891

Using SFOC to fly the Magellan Venus mapping mission p 2516 N94-23941

MAGMA

Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component p 2615 N94-24370

The transition from diapirism to dike intrusion: Implications for planetary volcanism [NASA-CR-195133] p 2403 N94-24580

MAGNESIUM

The resonance lines of MG2 as diagnostics of the upper solar chromosphere [NASA-CR-195084] p 2627 N94-24300

MAGNESIUM ALLOYS

New extensions in the development of deformation processed metal-metal matrix composites [DE94-000692] p 2227 N94-23004

Quantitative analysis in the Al-Mg-Si system with small amounts of Mg and Si [PB93-201499] p 2241 N94-23446

Segregation and oxidation studies of Al-Li and Al-Mg alloys [ISBN-0-315-83993-7] p 2244 N94-24469

MAGNESIUM FLUORIDES

SALI chemical analysis of provided samples [NASA-CR-194138] p 2232 N94-23524

MAGNET COILS

Developments in materials for high-field magnets [DE94-000761] p 2307 N94-22987

Study of a system for producing a pulsed magnetic field (B 2T) with a frequency of 50 Hz [ISL-N-601/92] p 2314 N94-25460

MAGNETIC ANOMALIES

A scalar-vector model of quark-antiquark interaction under linear confinement [DE93-616871] p 2538 N94-25317

MAGNETIC BEARINGS

The low noise momentum wheel MW-X: EM design and predicted properties p 2360 N94-24024

Superconducting energy storage [DE94-002248] p 2395 N94-24654

MAGNETIC COILS

Assessment of stellarators as reactors [DE93-017775] p 2548 N94-22916

Performance analysis of the combined EDS maglev propulsion, levitation, and guidance system [DE94-001346] p 2352 N94-22996

Proposal of Modular Heliotron: Advanced modular helical system compatible with closed helical divertor [NIFS-261] p 2552 N94-24458

The use of harmonics in 3-D magnetic fields [DE94-002274] p 2299 N94-24656

MAGNETIC CONTROL

A scalar-vector model of quark-antiquark interaction under linear confinement [DE93-616871] p 2538 N94-25317

MAGNETIC DISPERSION

Magnetic field dissipation and contraction of molecular clouds [REPT-337] p 2603 N94-24976

MAGNETIC EFFECTS

The structure and spin dynamics of lanthanide-bearing silicate glasses [DE94-001320] p 2252 N94-22992

Steady induction effects in geomagnetism. Part 1C: Geomagnetic estimation of steady surficial core motions: Application to the definitive geomagnetic reference field models [NASA-TP-3272-PT-1C] p 2403 N94-24465

MAGNETIC ENERGY STORAGE

Superconducting energy storage [DE94-002248] p 2395 N94-24654

MAGNETIC FIELD CONFIGURATIONS

Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD [DE94-001565] p 2552 N94-24504

MAGNETIC FIELD RECONNECTION

Two populations and models of gamma ray bursts [NASA-CR-194762] p 2629 N94-22947

Reduction of the anode fall in a coaxial plasma thruster with an applied magnetic nozzle [DE94-000670] p 2218 N94-23283

MAGNETIC FIELDS

The de Haas-van Alphen measurements in Ba(0.6)K(0.4)BiO3 [DE93-041169] p 2556 N94-22920

Simple estimate of stored energy and conductor insulation voltage-withstand requirements for advanced solenoid magnet designs [DE93-041048] p 2307 N94-23019

Reduction of the anode fall in a coaxial plasma thruster with an applied magnetic nozzle [DE94-000670] p 2218 N94-23283

Three-dimensional solidification and melting using magnetic field control p 2325 N94-23664

Application of multigrid methods to the solution of liquid crystal equations on a SIMD computer p 2484 N94-23686

Research for electric energy systems [DE94-001839] p 2293 N94-23719

Review of a variational method applied to magnetoelastic buckling problems [PB94-111184] p 2562 N94-23769

Exact transformation of the anisotropic Ginzburg-Landau model and its consequences [DE94-002208] p 2562 N94-23795

Magnetic power piston fluid compressor [NASA-CASE-GSC-13565-1] p 2354 N94-23831

Magnetic shielding of interplanetary spacecraft against solar flare radiation [NASA-CR-195539] p 2204 N94-24334

The use of harmonics in 3-D magnetic fields [DE94-002274] p 2299 N94-24656

Compact free electron lasers for medical applications [AD-A273609] p 2350 N94-24934

The role of emitter states in magnetotunneling through double-barrier resonant-tunneling diodes at high magnetic fields [REPT-A-2658] p 2564 N94-24959

On superconductivity of alpha-(BEDT-TTF)2KHg(SCN)4 [REPT-A-2660] p 2564 N94-24978

An active antenna for ELF magnetic fields p 2303 N94-25192

The nanostructure of multilayered films: A NMR study [ETN-94-95347] p 2262 N94-25222

A relativistic theory on wave propagation in inhomogeneous magnetoplasmas [ETN-94-95322] p 2554 N94-25285

The anomalous transport caused by particles transverse drift [DE93-613685] p 2554 N94-25329

Study of a system for producing a pulsed magnetic field (B 2T) with a frequency of 50 Hz [ISL-N-601/92] p 2314 N94-25460

Magnetic field-induced saddle point in GaAs/AlGaAs short period superlattices [REPT-A-2656] p 2568 N94-25515

Diffusion in electronegative discharges with magnetic fields [AD-A273826] p 2304 N94-25521

Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study [AD-A273824] p 2314 N94-25539

MAGNETIC FLUX

Research for electric energy systems [DE94-001839] p 2293 N94-23719

Exact transformation of the anisotropic Ginzburg-Landau model and its consequences [DE94-002208] p 2562 N94-23795

Magnetic field dissipation and contraction of molecular clouds [REPT-337] p 2603 N94-24976

Mechanisms of anode power deposition in a low pressure free burning arc [NASA-CR-194442] p 2553 N94-25190

Solar magnetic cycle [NASA-CR-195202] p 2628 N94-25275

The Casimir energy of the rigid string with massive ends [DE93-616851] p 2492 N94-25338

Diffusion in electronegative discharges with magnetic fields [AD-A273826] p 2304 N94-25521

MAGNETIC INDUCTION

Projectile transverse motion and stability in electromagnetic induction launchers [DE94-001557] p 2198 N94-23210

Excitation balances and transport in an inductively coupled plasma [ETN-94-95330] p 2554 N94-25241

MAGNETIC LENSES

The use of harmonics in 3-D magnetic fields [DE94-002274] p 2299 N94-24656

A study on electrostatic quadrupole lenses and their application technologies [REPT-948] p 2546 N94-24982

MAGNETIC LEVITATION VEHICLES

Vehicle/guideway interaction and ride comfort in maglev systems [DE94-001319] p 2352 N94-22991

Performance analysis of the combined EDS maglev propulsion, levitation, and guidance system [DE94-001346] p 2352 N94-22996

MAGNETIC MATERIALS

Influences of nitrogen absorption on the magnetic properties of YFe2, YFe3 and Y6Fe23 [REPT-A-2654] p 2564 N94-24958

Metallic multilayers: Experimental investigation of magnetic anisotropy and magnetic interlayer coupling [ETN-94-95364] p 2250 N94-25242

MAGNETIC MEASUREMENT

Aeronautical satellite antenna steering using magnetic field sensors p 2289 N94-22836

Heavy ion irradiation of Bi-2223 silver-clad tapes for superconducting current density enhancement [DE93-017416] p 2556 N94-22886

Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons [PB93-201531] p 2561 N94-23428

Research for electric energy systems [DE94-001839] p 2293 N94-23719

Some theoretical problems of magnetic diagnostics in tokamaks and stellarators [NIFS-262] p 2551 N94-24306

MAGNETIC MOMENTS

A scalar-vector model of quark-antiquark interaction under linear confinement [DE93-616871] p 2538 N94-25317

MAGNETIC PERMEABILITY

Magnetic phases in UNiGe [DE94-000793] p 2239 N94-22939

Crystal field in Nd2CuO4 [DE93-617054] p 2567 N94-25425

MAGNETIC PROPERTIES

The de Haas-van Alphen measurements in Ba(0.6)K(0.4)BiO3 [DE93-041169] p 2556 N94-22920

The structure and spin dynamics of lanthanide-bearing silicate glasses [DE94-001320] p 2252 N94-22992

Muon spin relaxation studies of the interplay between magnetism and superconductivity in heavy fermion systems [DE94-000700] p 2559 N94-23006

Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons [PB93-201531] p 2561 N94-23428

Instrument interface description for NOAA 2000 instruments with European morning spacecraft and/or NOAA-OPQ spacecraft [NASA-TM-109406] p 2208 N94-23478

Influences of nitrogen absorption on the magnetic properties of YFe2, YFe3 and Y6Fe23 [REPT-A-2654] p 2564 N94-24958

Magnetic properties of NdCo3 and its gamma phase hydride NdCo3H(4.1) [REPT-A-2655] p 2567 N94-25412

MAGNETIC RELAXATION
Muon spin relaxation studies of the interplay between magnetism and superconductivity in heavy fermion systems
[DE94-000700] p 2559 N94-23006
Dipolar relaxation in a second-order nonlinear optical interpenetrating polymer network
[AD-A273626] p 2258 N94-24732
MAGNETIC RESONANCE
Magnetic resonance studies of 3d transition metal impurities in compound semiconductors
[PB93-232197] p 2243 N94-23714
MAGNETIC SHIELDING
Magnetic shielding of interplanetary spacecraft against solar flare radiation
[NASA-CR-195539] p 2204 N94-24334
MAGNETIC SIGNATURES
Polarization analysis of a balloon-borne solar magnetograph
[NASA-CR-193908] p 2345 N94-24852
MAGNETIC STORMS
Data analysis and theoretical studies of the upper mesosphere and lower thermosphere
[NASA-CR-195108] p 2402 N94-24089
MAGNETIC SUSPENSION
Vehicle/guideway interaction and ride comfort in maglev systems
[DE94-001319] p 2352 N94-22991
Performance analysis of the combined EDS maglev propulsion, levitation, and guidance system
[DE94-001346] p 2352 N94-22996
Preliminary eddy current modelling for the large angle magnetic suspension test fixture
[NASA-CR-194772] p 2192 N94-23539
MAGNETIC SWITCHING
Exciplex laser study: Discharge and magnetic switching systems
[PB93-199768] p 2349 N94-24629
MAGNETIC VARIATIONS
Chromospheric activity in agol binaries
[AD-A273546] p 2602 N94-24557
High latitude cusp signature observations for southward IMF B sub Z
[AD-A273801] p 2406 N94-25536
MAGNETICALLY TRAPPED PARTICLES
Ultracold atoms in traps and fountains
[ETN-94-95325] p 2537 N94-25239
MAGNETIZATION
Magnetic phases in UNiGe
[DE94-000793] p 2239 N94-22939
Spin fluctuations in an ordered Heisenberg ferromagnet with dipolar interactions
[PB93-204493] p 2524 N94-24533
Influences of nitrogen absorption on the magnetic properties of YFe2, YFe3 and Y6Fe23
[REPT-A-2654] p 2564 N94-24958
Metallic multilayers: Experimental investigation of magnetic anisotropy and magnetic interlayer coupling
[ETN-94-95364] p 2250 N94-25242
Modification in the kinetic solution for magnetized plasmas
[DE93-613687] p 2555 N94-25343
Critical currents in YBaCuO-ceramics
[DE93-617140] p 2263 N94-25404
Magnetic properties of NdCo3 and its gamma phase hydride NdCo3H(4.1)
[REPT-A-2655] p 2567 N94-25412
MAGNETOHYDRODYNAMIC FLOW
Three-dimensional solidification and melting using magnetic field control p 2325 N94-23664
Scientific study in solar and plasma physics relative to rocket and balloon projects
[NASA-CR-193885] p 2627 N94-24461
MAGNETOHYDRODYNAMIC STABILITY
Fluctuations and confinement in ATF
[DE94-000485] p 2549 N94-22998
Optimization of energy transfer in microwave electrothermal thrusters p 2216 N94-23065
Investigation of a subsonic-arc-attachment thruster using segmented anodes
[NASA-TM-106419] p 2219 N94-23531
Stabilization of the external kink and other MHD issues
[DE94-001541] p 2552 N94-24502
Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD
[DE94-001565] p 2552 N94-24504
Effect of LHCD (low hybrid current drive) on tearing mode instability
[DE93-613700] p 2555 N94-25344
MAGNETOHYDRODYNAMIC TURBULENCE
On the physics of waves in the solar atmosphere: Wave heating and wind acceleration
[NASA-CR-195197] p 2628 N94-25264
MAGNETOHYDRODYNAMIC WAVES
On the physics of waves in the solar atmosphere: Wave heating and wind acceleration
[NASA-CR-195197] p 2628 N94-25264
MAGNETOHYDRODYNAMICS
Plasma research in the Madison Symmetric Torus (MST)
[DE94-002318] p 2549 N94-22976
Lectures on magnetohydrodynamical drives
[PB93-224962] p 2308 N94-23104
The internal structure and dynamics of the railgun plasma armature between infinitely wide ablating rails
[DE94-001473] p 2198 N94-23208
Evolution of large-scale plasma structures in comets: Kinematics and physics
[NASA-CR-194777] p 2601 N94-23251
Scientific study in solar and plasma physics relative to rocket and balloon projects
[NASA-CR-193885] p 2627 N94-24461
Model development for Ulysses and SOHO
[NASA-CR-193884] p 2627 N94-24484
Stabilization of the external kink and other MHD issues
[DE94-001541] p 2552 N94-24502
Modelling of thermal argon plasmas
[ETN-94-95363] p 2554 N94-25300
LHCD (low hybrid current drive) experiment on the HT-6B tokamak
[DE93-613720] p 2555 N94-25331
Effect of LHCD (low hybrid current drive) on tearing mode instability
[DE93-613700] p 2555 N94-25344
MAGNETOMETERS
Polarization analysis of a balloon-borne solar magnetograph
[NASA-CR-193908] p 2345 N94-24852
MAGNETOPLASMADYNAMICS
Reduction of the anode fall in a coaxial plasma thruster with an applied magnetic nozzle
[DE94-000670] p 2218 N94-23283
Numerical simulation of cylindrical, self-field MPD thrusters with multiple propellants
[NASA-CR-194458] p 2220 N94-24714
MAGNETORESISTIVITY
Magnetic phases in UNiGe
[DE94-000793] p 2239 N94-22939
Anomalous magnetoresistance behavior of superconducting Nd(2-x)Ce(x)CuO(4-y) single crystal
[DE94-000806] p 2558 N94-22941
MAGNETOSTATICS
Some challenging problems of the structured and dynamical solar atmosphere p 2624 N94-22838
MAGNETOSTRICTION
Review of a variational method applied to magnetoelastic buckling problems
[PB94-111184] p 2562 N94-23769
Improved magnetostrictive transducer drive elements achieved by reduction of crystalline defects and improved crystalline orientation
[AD-A273391] p 2313 N94-25276
MAGNETRONS
Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296
Inverse free electron laser beat-wave accelerator research
[DE94-002597] p 2349 N94-23702
MAGNONS
Spin fluctuations in an ordered Heisenberg ferromagnet with dipolar interactions
[PB93-204493] p 2524 N94-24533
Localized excitations in competing bond-order-wave, charge-density-wave and spin-density-wave systems. 2: Competing charge-density-wave and spin-density-wave
[DE93-617131] p 2538 N94-25388
MAIN SEQUENCE STARS
ROSAT observations of the x ray binary HD 154791
[NASA-CR-195189] p 2600 N94-25198
MAINTENANCE
Constraint-based scheduling p 2510 N94-23904
Reliability analysis of a repairable dependent parallel system
[ETN-94-95312] p 2373 N94-25295
MALES
Aeromedical disposition for coronary artery disease
p 2423 N94-23316
Aeromedical implications of mitral valve prolapse
p 2424 N94-23323
Spontaneous pneumothorax, cysts and bullae
p 2425 N94-23326
MAN MACHINE SYSTEMS
Link monitor and control operator assistant: A prototype demonstrating semiautomated monitor and control
p 2292 N94-23267
Lunar exploration rover program developments
[DE93-040759] p 2613 N94-23469
Activity Catalog Tool (ACT) user manual, version 2.0
[NASA-CR-177634] p 2430 N94-23527
Intelligent tutoring and aiding in satellite ground control p 2443 N94-23929
Programmable display pushbuttons on the Space Station's telerobot control panel p 2435 N94-24198
Simulation of the human-telerobot interface on the Space Station p 2436 N94-24202
Intelligent systems and advanced user interfaces for design, operation, and maintenance of command management systems
[NASA-CR-195172] p 2459 N94-24797
Human factors of mission planning systems: Theory and concepts p 2521 N94-25010
Mission planning and mission rehearsal systems: Displays and other interactive techniques
p 2522 N94-25013
Sensor fusion display evaluation using information integration models in enhanced/synthetic vision applications p 2443 N94-25512
Quality metrics for sensor images
p 2443 N94-25513
MAN TENDED FREE FLYERS
Mission activities planning for a Hermes mission by means of AI-technology p 2502 N94-23858
MAN-COMPUTER INTERFACE
AGENDA: A task organizer and scheduler
p 2504 N94-23876
NASDA's Advanced On-Line System (ADOLIS)
p 2509 N94-23903
Customizing graphical user interface technology for spacecraft control centers p 2510 N94-23905
Operability engineering in the Deep Space Network
p 2514 N94-23930
Crew interface analysis: Selected articles on space human factors research, 1987 - 1991
[NASA-TM-104756] p 2433 N94-24185
Process and representation in graphical displays
p 2433 N94-24187
Designers' models of the human-computer interface
p 2433 N94-24188
Automated system function allocation and display format: Task information processing requirements
p 2434 N94-24189
The use of analytical models in human-computer interface design p 2434 N94-24190
Performing speech recognition research with hypercard p 2306 N94-24194
MANAGEMENT
Management. A bibliography for NASA managers
[NASA-SP-7500(27)] p 2586 N94-24708
Defense aerospace and the new world order
p 2596 N94-25086
MANAGEMENT ANALYSIS
Relevant costs or full costs? Explaining why managers use capacity cost allocations for short term decisions
[ISBN-9-06-215364-X] p 2587 N94-25279
MANAGEMENT INFORMATION SYSTEMS
A system for managing information at ATLAS
[DE94-001337] p 2590 N94-23190
Management. A bibliography for NASA managers
[NASA-SP-7500(27)] p 2586 N94-24708
Aviation system safety risk management tool analysis. Volume 2: Appendices
[AD-A273502] p 2173 N94-24864
COSMIC monthly progress report
[NASA-CR-195153] p 2460 N94-25023
MANAGEMENT METHODS
New mission requirements methodologies for services provided by the Office of Space Communications
p 2519 N94-23961
Early manufacturing considerations in design
p 2177 N94-24315
Extension of the critical path method
[PB94-118817] p 2488 N94-24527
Management. A bibliography for NASA managers
[NASA-SP-7500(27)] p 2586 N94-24708
Reuse-Driven Software Processes Guidebook, version 02.00.03
[AD-A273644] p 2461 N94-25148
Appendix B: Rapid development approaches for system engineering and design p 2272 N94-25195
Appendix C: Rapid development approaches for system engineering and design p 2272 N94-25196
Relevant costs or full costs? Explaining why managers use capacity cost allocations for short term decisions
[ISBN-9-06-215364-X] p 2587 N94-25279
Throughput time control and due date reliability in tool and die shops
[ISBN-9-03-860182-4] p 2587 N94-25283
Integrated risk management p 2588 N94-25361
Strategies for recruiting additional African Americans into the NASA JSC summer faculty fellows program
p 2585 N94-25362

MANAGEMENT PLANNING

Cost benefits of advanced software: A review of methodology used at Kennedy Space Center p 2464 N94-23240

New mission requirements methodologies for services provided by the Office of Space Communications p 2519 N94-23961

Software reuse in spacecraft planning and scheduling systems p 2520 N94-23966

Risk identification and reduction in integrated product teams p 2497 N94-24407

Management. A bibliography for NASA managers [NASA-SP-7500(27)] p 2586 N94-24708

Design and application of electromechanical actuators for deep space missions [NASA-CR-195134] p 2365 N94-24842

The future of manned spaceflight p 2195 N94-25067

Integrated risk management p 2588 N94-25361

MANAGEMENT SYSTEMS

Structure and flow of data through an environmental data management system [DE93-040487] p 2589 N94-22934

A system for managing information at ATLAS [DE94-001337] p 2590 N94-23190

KSC management training system project p 2574 N94-23246

Space Station Freedom (SSF) Data Management System (DMS) performance model data base [NASA-CR-188270] p 2590 N94-23289

GEWEX p 2385 N94-23614

An engineering code to analyze hypersonic thermal management systems p 2320 N94-23636

Columbus system support for telescience operations p 2505 N94-23877

Real-time automated failure identification in the Control Center Complex (CCC) p 2272 N94-23892

Performance of the engineering analysis and data system 2 common file system p 2576 N94-24413

Design and specification of a centralized manufacturing data management and scheduling system p 2577 N94-24416

Modular approach to project management [PB94-118833] p 2586 N94-24528

Intelligent systems and advanced user interfaces for design, operation, and maintenance of command management systems [NASA-CR-195172] p 2459 N94-24797

The use of design automation software by government-contracted architect/engineer firms: A status report [AD-A273181] p 2459 N94-24812

A comparative evaluation plan for the Maintenance, Inventory, and Logistics Planning (MILP) System Human-Computer Interface (HCI) p 2588 N94-25373

MANEUVERABILITY

Thrust vectoring theory, laboratory and flight tests p 2155 N94-24251

MANGANESE

GGA study of the magnetic and cohesive properties of bcc, fcc and hcp Mn [REPT-A-2662] p 2564 N94-24960

MANGANESE COMPOUNDS

Magnetic resonance studies of 3d transition metal impurities in compound semiconductors [PB93-232197] p 2243 N94-23714

MANGANESE IONS

Contribution of all excited states to ZFS of a (sup 6) S-state [DE93-617007] p 2568 N94-25483

MANGANIN (TRADEMARK)

Multiple shock initiation of LX-17 [DE94-001524] p 2265 N94-23807

MANIFOLDS (MATHEMATICS)

On the numerical computation of invariant manifolds [W-9306] p 2480 N94-23140

When an infinitely-renormalizable endomorphism of the interval can be smoothed [PB93-238087] p 2481 N94-23548

Non-trivial examples of real isolated singularity at the origin [PB94-110939] p 2487 N94-23787

Quasiconformal mappings, operators on Hilbert space, and local formulae for characteristic classes [PB93-238079] p 2488 N94-24536

The renormalization group for flag manifolds [DE93-616846] p 2491 N94-25213

MANIPULATORS

Normal forms of kinematic singularities of 3R robot manipulators [MEMO-1124] p 2469 N94-22712

Graphical programming: A systems approach for telerobotic servicing of space assets [DE93-019016] p 2472 N94-23201

NASA/ASEE Summer Faculty Fellowship Program [NASA-CR-194678] p 2571 N94-23230

Control of a serpentine manipulator with collision avoidance p 2368 N94-23232

Micro-gravity compatible drive (MGCD) p 2355 N94-23988

Illumination requirements for operating a space remote manipulator p 2435 N94-24195

Robust stability of second-order systems [NASA-CR-195175] p 2488 N94-24564

Genetic-based motion planning for articulated robotic manipulators [RR-476] p 2368 N94-25322

Modelling the Shuttle Remote Manipulator System: Another flexible model p 2371 N94-25350

Robotics in a controlled, ecological life support system p 2444 N94-25371

MANNED MARS MISSIONS

Manned Mars mission on-orbit operations FTS capabilities assessment [NASA-CR-189328] p 2430 N94-23080

Power generation technology options for a Mars mission [NASA-TM-106451] p 2220 N94-24681

Preliminary design of a universal Martian lander [NASA-CR-195529] p 2206 N94-25007

MANNED ORBITAL LABORATORIES

Docking mechanisms: An overview of different systems p 2357 N94-24004

MANNED REENTRY

Concepts and embodiment design of a reentry recumbent seating system for the NASA Space Shuttle [NASA-CR-195504] p 2438 N94-24667

MANNED SPACE FLIGHT

An antiproton driver for ICF propulsion p 2217 N94-23069

The birth of NASA: The diary of T. Keith Glennan [NASA-SP-4105] p 2630 N94-23333

Space tourism: A flight of fantasy or the next major space product? Paper session 3: Products [NASA-TM-109385] p 2194 N94-23710

Crew interface analysis: Selected articles on space human factors research, 1987 - 1991 [NASA-TM-104756] p 2433 N94-24185

Previous experience in manned space flight: A survey of human factors lessons learned p 2435 N94-24196

Suddenly, tomorrow came... A history of the Johnson Space Center [NASA-SP-4307] p 2631 N94-24584

The future of manned spaceflight p 2195 N94-25067

MANNED SPACECRAFT

Suddenly, tomorrow came... A history of the Johnson Space Center [NASA-SP-4307] p 2631 N94-24584

MANPOWER

Personnel shift assignment: Existence conditions and network models [MEMO-1116] p 2585 N94-22704

MANUAL CONTROL

Reducing video frame rate increases remote optimal focus time [NASA-TM-104018] p 2431 N94-23970

Speech versus manual control of camera functions during a telerobotic task p 2436 N94-24199

MANUALS

Tools reference manual for a Requirements Specification Language (RSL), version 2.0 [NASA-CR-191461] p 2445 N94-23125

Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database, Shock Physics Index (SPHINX) database, Volume 2: UNIX version user's guide [DE94-001704] p 2589 N94-23128

Manual on measurement of methane and nitrous oxide emissions from agriculture [DE93-616429] p 2399 N94-25167

MANUFACTURING

Progress in phases 2 and 3 of the Photovoltaic Manufacturing Technology Project (PVMaT) [DE94-000206] p 2389 N94-22888

A novel process monitoring and control system based on a neural manufacturing concept [DE94-001516] p 2471 N94-23011

Sensors for process control Focus Team report [DE93-040897] p 2560 N94-23204

Amorphous silicon PVMaT, phase 2A [DE93-018221] p 2390 N94-23295

SP-100 heat transport technology development [DE94-000769] p 2218 N94-23452

Engineering for profitability [PNR-90990] p 2595 N94-23580

The Electronics Quality/Reliability Center: Lessons learned from partnering with industry [DE94-001501] p 2309 N94-23777

Integrated Airframe Design Technology [AGARD-R-794] p 2177 N94-24313

Early manufacturing considerations in design p 2177 N94-24315

Applications of CFD codes and supercomputers to aircraft design activities p 2177 N94-24316

Frameworks for integrated airframe design p 2178 N94-24318

Design and specification of a centralized manufacturing data management and scheduling system p 2577 N94-24416

SEMATECH, a case study: Analysis of a government-industry partnership [AD-A273166] p 2586 N94-24683

The Blue Emu [NASA-CR-195535] p 2182 N94-24817

Production control and demand management in capacitated flow process industries [ISBN-9-03-860211-1] p 2586 N94-25235

MANY BODY PROBLEM

Method for simulating a vehicle shock test: Design and realization of the required implementation tools [ECL-92-14] p 2352 N94-22885

Pions and neutrinos as probes of the nucleon and nuclear few-body system [DE93-040127] p 2531 N94-22928

Calculations of Bose-Einstein correlations from Relativistic Quantum Molecular Dynamics [DE94-000794] p 2569 N94-23453

MANY ELECTRON EFFECTS

Semiempirical studies of atomic structure [DE94-001588] p 2531 N94-22937

MAPPING

Relational algebra and equational proofs [PB94-110822] p 2486 N94-23724

MAPS

Study of methods and structures for handling of digitized maps for geographical information systems [PB93-204402] p 2590 N94-23741

The Mars mapper science and mission planning tool p 2503 N94-23867

Antarctic Meteorite Location and Mapping Project (AMLAMP): Antarctic meteorite location map series explanatory text and user's guide to AMLAMP data [NASA-CR-194841] p 2603 N94-24964

MARINE BIOLOGY

Nutrients and light as factors controlling phytoplankton biomass on the Dutch continental shelf (North Sea), 1988-1990 [PB94-111143] p 2418 N94-24601

MARINE ENVIRONMENTS

Diffraction analysis of transient acoustic waves: Half-plane in a layered medium [PB94-110988] p 2526 N94-23726

Recent developments in the mathematical modelling and physical understanding of transport and dispersion in aquatic systems, with special reference to tidal waters [PB94-111135] p 2418 N94-24600

Environmentally assisted cracking of high strength beta titanium alloys [AD-A273598] p 2245 N94-24823

MARINE METEOROLOGY

A regional analysis of cloudy mean spherical albedo over the marine stratocumulus region and the tropical Atlantic Ocean [NASA-CR-194771] p 2409 N94-24049

MARINE TECHNOLOGY

Fire safety engineering research in Norway [PB93-201630] p 2268 N94-23429

MARINER SPACECRAFT

Mars Operational Environmental Satellite (MOES): A post-Mars Observer discovery mission p 2620 N94-24890

MARITIME SATELLITES

Evolution of INMARSAT systems and applications: The land mobile experience p 2280 N94-22779

INMARSAT's personal communicator system p 2282 N94-22788

Low cost coherent demodulation for mobile satellite terminals p 2284 N94-22803

Improved frame synchronization schemes for INMARSAT-B/M SCPC and TDM channels p 2285 N94-22806

MARKOV CHAINS

Resolution of Markov models on distributed memory machines [ETN-94-95182] p 2444 N94-22900

Modeling parallelism and synchronization [ETN-94-95179] p 2465 N94-23134

Control algorithms for effective operation of variable-speed wind turbines [DE94-002607] p 2394 N94-23704

General optimal stopping theorems for semi-Markov processes [PB93-214989] p 2496 N94-24744

On finding optimal policies for Markov decision chains: A unifying framework for mean-variance-tradeoffs [TW-92-13] p 2497 N94-25528

MARKOV PROCESSES
Product forms as a solution base for queueing systems [MEMO-COSOR-92-37] p 2477 N94-25526
MARS (PLANET)
An improved gravity model for Mars: Goddard Mars Model-1 (GMM-1) [NASA-TM-104584] p 2401 N94-23282
Robotic exploration of Moon and Mars p 2606 N94-23379
Science strategy for Mars exploration p 2606 N94-23380
Mars 96 small rover: Mission strategy p 2606 N94-23381
A reference Martian mission for a long range rover p 2606 N94-23382
Science objectives for short-range rovers on Mars p 2606 N94-23383
Prospects for using mobile vehicles in missions to Mars and other planets p 2607 N94-23384
The robotic Mars rover p 2608 N94-23390
Mission and system concepts for Mars robotic precursor missions p 2608 N94-23391
Mission and system design of a long range rover mission p 2608 N94-23392
Mars subsurface sounding with a ground penetrating radar p 2608 N94-23393
Balloon experiments at Mars 96 project p 2608 N94-23396
Rover: Autonomous concepts for Mars exploration p 2369 N94-23400
Mechanical design of a planetary rover p 2369 N94-23403
Dual rover concept for Mars exploration p 2370 N94-23415
Mars 96 rover: Technical vision and navigation p 2370 N94-23417
Marsohkod movement control p 2370 N94-23418
The influence of orography on the transport of atmospheric constituents p 2619 N94-24886
Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893
Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap p 2621 N94-24895
MARS ATMOSPHERE
Workshop on Atmospheric Transport on Mars [NASA-CR-194855] p 2616 N94-24871
The NASA/GISS Mars general circulation model: Preliminary experiments p 2616 N94-24872
Optimal gains for a single polar orbiting satellite p 2208 N94-24873
A diagnostic model to estimate winds and small-scale drag from Mars Observer PMIRR data p 2617 N94-24874
Eddy mixing coefficient values derived from simulations with the NASA Ames Mars GCM p 2617 N94-24875
Mars dust-driven tides and their impact on the thermosphere p 2617 N94-24876
Cloud, dust, and ozone vertical profiles from solar occultation measurements: Implications for dynamics p 2617 N94-24877
Particle sizes and composition of Mars atmospheric dust based upon Viking and Mariner 9 observations p 2618 N94-24878
Aspects of the Martian global circulation p 2618 N94-24879
Impact of the CO2 and H2O clouds of the Martian polar hood on the polar energy balance p 2618 N94-24880
Multiannual simulations with the Mars climate model p 2618 N94-24881
Regarding tracer transport in Mars' winter atmosphere in the presence of nearly stationary, forced planetary waves p 2618 N94-24882
Analyzing Martian winds and tracer concentrations using Mars Observer data p 2619 N94-24883
The annual pressure cycle on Mars: Results from the LMD Martian atmospheric general circulation model p 2619 N94-24884
Northern hemisphere dust storms on Mars p 2619 N94-24885

Mars 1994/1996: The French navigation tasks p 2195 N94-23924
MARS SAMPLE RETURN MISSIONS
Science strategy for Mars exploration p 2606 N94-23380
Operations concepts for Mars missions with multiple mobile spacecraft p 2501 N94-23852
MARS SURFACE
Missions, Technologies, and Design of Planetary Mobile Vehicles [ISBN-2-85428-331-7] p 2605 N94-23373
Rover requirements for the planet surface segment of the space exploration initiative p 2369 N94-23377
The robotic Mars rover p 2608 N94-23390
Mars subsurface sounding with a ground penetrating radar p 2608 N94-23393
Descent and landing phase: Vision based robust spacecraft motion estimation and elevation modeling p 2608 N94-23394
Mars 96 rover: Science, instrumentation, and control p 2369 N94-23395
Rover in the Mars 96 mission p 2609 N94-23397
Development/drilling test of auger boring machine on board Mars rover for Mars exploration p 2369 N94-23402
Planetary rover locomotion mechanisms p 2369 N94-23404
Machines for moving in soil p 2369 N94-23411
The Mars 96 balloon guiderope: An autonomous system in extreme environment conditions p 2369 N94-23412
Walking, jumping, and tumbling: More than one way to get around Mars p 2370 N94-23419
Perspective of creation of means for collecting information concerning transport situation p 2370 N94-23420
The Mars mapper science and mission planning tool p 2503 N94-23867
Impact of the CO2 and H2O clouds of the Martian polar hood on the polar energy balance p 2618 N94-24880
Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887
Mars Operational Environmental Satellite (MOES): A post-Mars Observer discovery mission p 2620 N94-24890
Dust transport in the Martian atmosphere p 2621 N94-24894
Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap p 2621 N94-24895
Martian mesoscale circulations induced by variations in surface optical and thermal characteristics: A numerical study p 2622 N94-24899
Three-dimensional numerical simulation of thermal tides in the Martian atmosphere p 2622 N94-24901
Vertical transport of water in the Martian boundary layer p 2622 N94-24902
The Mars Aerial Platform (MAP) mission p 2622 N94-24903
Tectonic Evolution of Mars [NASA-CR-194714] p 2623 N94-24996
The geophysical signal of the martian global dichotomy p 2623 N94-24997
MARTENSITE
Internal friction associated with dislocation relaxations in virgin martensite [PB93-226280] p 2240 N94-23119
MASERS
Infrared and SiO maser observations of OH/IR stars [PB94-104890] p 2599 N94-24780
MASKING
Joint Acoustic Propagation Experiment (JAPE) p 2527 N94-24208
JAPE 91: Influence of terrain masking of the acoustic propagation of helicopter noise p 2528 N94-24214
Auditory spectro-temporal pattern analysis [AD-A273554] p 2427 N94-24865
MASS
Mass properties measurement system dynamics p 2368 N94-23235
Mass properties measurement system: Dynamics and statics measurements p 2368 N94-23236
MASS DISTRIBUTION
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
Near surface analysis p 2407 N94-25364
MASS FLOW
A representation for the turbulent mass flux contribution to Reynolds-stress and two-equation closures for compressible turbulence [NASA-CR-191569] p 2319 N94-23302
CFD assessment of orifice aspect ratio and mass flow ratio on jet mixing in rectangular ducts [NASA-TM-106434] p 2187 N94-24082
Ethylene trace-gas techniques for high-speed flows [NASA-TM-106491] p 2169 N94-24335
MASS FLOW RATE
Two stage turbine for rockets p 2215 N94-23059
Simplified, inverse, ejector design tool [NASA-CR-194438] p 2166 N94-23511
Ethylene trace-gas techniques for high-speed flows [NASA-TM-106491] p 2169 N94-24335
Carrying the mass flux terms exactly in the first and second moment equations of compressible turbulence [NASA-CR-191568] p 2335 N94-24712
Measurement of the volume mass by spontaneous Raman scattering. Study of turbulent fluctuations of mixing in a subsonic free jet. Measurements in supersonic wind tunnels [ISL-R-102/92] p 2339 N94-25462
MASS SPECTROMETERS
Prospects for future solar-wind missions p 2624 N94-22841
Interpretation of discrepancies in mass spectroscopy data obtained from different experimental configurations p 2237 N94-23245
Multi-ion, multi-event test of ion cyclotron resonance heating [NASA-CR-194859] p 2540 N94-23495
Reactivity of ambident anions in the gas phase [PB93-232189] p 2533 N94-23713
MASS SPECTROSCOPY
Interpretation of discrepancies in mass spectroscopy data obtained from different experimental configurations p 2237 N94-23245
Condensed-phase thermal decomposition of TATB investigated by Atomic Force Microscopy (AFM) and Simultaneous Thermogravimetric Modulated Beam Mass Spectrometry (STMBMS) [DE94-000396] p 2232 N94-23298
Fifty years of continuous improvement: What has DOE done for analytical chemistry? [DE94-002539] p 2234 N94-24548

Isothiazolone volatility study of a water bottom from fuel treated with Kathon (tm) FP1.5 biocide
[AD-A273165] p 2266 N94-24728

MASS TRANSFER

A novel method for determination of transport parameters of H2 and O2 in PEMFCs
[DE94-001492] p 2389 N94-22962

MATCHED FILTERS

Choice of filters for the detection of gravitational waves from coalescing binaries. 2: Detection in coloured noise
[DE93-616844] p 2604 N94-25211

A parallel algorithm for filtering gravitational waves from coalescing binaries
[DE93-616845] p 2604 N94-25212

MATERIALS HANDLING

Robotics in a controlled, ecological life support system
p 2444 N94-25371

MATERIALS TESTS

Ceramic matrix composite parts design
p 2256 N94-24237

On the deformation kinetics constitutive law of plastic deformation: The rate equation p 2161 N94-24289

MATHEMATICAL LOGIC

Making some issues of implicit knowledge explicit
[PB93-220606] p 2478 N94-22984

Logic of capabilities
[PB94-110715] p 2473 N94-23747

Epistemic logic for defeasible reasoning using a meta-level architecture metaphor
[PB94-110723] p 2473 N94-23748

Typechecker for bijective pure type systems
[PB94-110814] p 2454 N94-23817

Real-time process logic
[PB94-101441] p 2446 N94-24540

PLANET: A hierarchical network simulator
[ISBN-9-09-005693-9] p 2313 N94-25083

MATHEMATICAL MODELS

On some approximately balanced combinatorial cooperative games
[MEMO-1113] p 2493 N94-22702

Personnel shift assignment: Existence conditions and network models
[MEMO-1116] p 2585 N94-22704

Nonlinear state space H(sub infinity) control theory
[MEMO-1119] p 2469 N94-22706

Nonlinear systems which have finite-dimensional H(sub infinity) suboptimal central controllers
[MEMO-1120] p 2469 N94-22707

Normal forms of kinematic singularities of 3R robot manipulators
[MEMO-1124] p 2469 N94-22712

Feedback linearization of parametrized nonlinear time-varying systems
[MEMO-1126] p 2470 N94-22714

Nonlocal models in continuum mechanics
[DE93-040146] p 2316 N94-22870

Identification for robust control using an H(sub infinity) norm
[EUT-92-E-261] p 2470 N94-22873

Method for simulating a vehicle shock test: Design and realization of the required implementation tools
[ECL-92-14] p 2352 N94-22885

Causal labeled transition systems: A new approach for describing the behavior of concurrent systems
[LAAS-93179] p 2447 N94-22911

Small rocket flowfield diagnostic chambers
p 2210 N94-23030

A theoretical evaluation of aluminum gel propellant two-phase flow losses on vehicle performance
p 2210 N94-23031

LOX droplet vaporization in a supercritical forced convective environment p 2211 N94-23034

Evaporation and combustion of LOX under supercritical and subcritical conditions p 2211 N94-23035

CFD modeling of microwave electrothermal thrusters
p 2216 N94-23066

Nuclear propulsion control and health monitoring
p 2217 N94-23071

Flames in dusty mixtures: Their structure and stability
[NASA-CR-191567] p 2317 N94-23089

Modelling of solid polymer and direct methanol fuel cells: Phenomenological equations and analytical solutions
[PB93-224897] p 2390 N94-23102

Atmospheric numerical modeling resource enhancement and model convective parameterization/scale interaction studies
[NASA-CR-194769] p 2400 N94-23124

Atmospheric flow in heterogeneous vegetated regions
[W-9303] p 2401 N94-23175

Mathematical modeling of MCFC cells/stacks and networks
[DE94-001914] p 2390 N94-23212

Experimental modification and identification of the DSS-13 antenna control system model
p 2291 N94-23260

Viewing hybrid systems as products of control systems and automata
[NASA-CR-194792] p 2472 N94-23300

The ignition temperature of solid explosives exposed to a fire
[DE94-001047] p 2265 N94-23436

Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface
[PB93-237691] p 2480 N94-23438

Differential algebraic equations
[PB93-237618] p 2481 N94-23455

Bayesian decision theory with imprecise prior probabilities applied to replacement problems
[PB93-237634] p 2481 N94-23456

Mechanical and thermal buckling analysis of sandwich panels under different edge conditions
[NASA-TM-4535] p 2228 N94-23514

The computation of R(sub 0) for discrete-time epidemic models with dynamic heterogeneity
[CWI-AM-R9301] p 2420 N94-23521

Preliminary eddy current modelling for the large angle magnetic suspension test fixture
[NASA-CR-194772] p 2192 N94-23539

Material data representation of hysteresis loops for Hastelloy X using artificial neural networks
[NASA-TM-105990] p 2376 N94-23551

A linear model for corrugation and its limit of validity
p 2269 N94-23584

Development of an analytical-numerical model to predict radiant emission or absorption
[NASA-CR-194860] p 2453 N94-23624

Thermal control system for SSF sensor/electronics
[SAND-92-0652C] p 2321 N94-23640

Study of transient behavior of finned coil heat exchangers p 2321 N94-23642

A direct approach to finding unknown boundary conditions in steady heat conduction
p 2322 N94-23645

Some useful innovations with TRASYS and SINDA-85
p 2322 N94-23647

Features of a SINDA/FLUINT model of a liquid oxygen supply line p 2322 N94-23649

Convection equation modeling: A non-iterative direct matrix solution algorithm for use with SINDA
p 2323 N94-23651

An analytic study of a two-phase laminar airfoil in simulated heavy rain p 2171 N94-23661

An adaptive multigrid model for hurricane track prediction p 2416 N94-23687

Similarity in wave propagation under a global relaxation law
[PB94-111028] p 2524 N94-23730

Structured constraint satisfaction
[PB94-119039] p 2497 N94-23764

Two applications of a generic task model for solving boolean constraint satisfaction problems
[PB94-119047] p 2487 N94-23765

Investigations on detonation shock dynamics and related topics
[DE94-002570] p 2326 N94-23809

Dispersion of fire suppression agents discharged from high pressure vessels: Establishing initial/boundary conditions for the flow outside the vessel
[PB94-103660] p 2172 N94-23810

Boundary layer receptivity and control
p 2327 N94-24141

The use of analytical models in human-computer interface design p 2434 N94-24190

Integrated approach in modelling, testing, and design of gradient-CVI derived CMC components
p 2256 N94-24239

New features in Computational Fluid Dynamics (CFD) technology at the TASHAN Engineering Center at IAI
p 2155 N94-24249

Development of a damage tolerance tool to analyze multiple-site damage in aircraft structure
p 2157 N94-24261

Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285

Integrated stress and strength analysis of airplane structures using the data processing tool ISSY
p 2178 N94-24320

Trends of design methodology of airframe
p 2179 N94-24327

Numerical modeling of physical vapor transport under microgravity conditions: Effect of thermal creep and stress p 2223 N94-24340

GEWEX Cloud Systems Study (GCSS)
p 2411 N94-24377

Parameterization of sub-grid scale convection
p 2413 N94-24386

Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387

Session on validation of coupled models
p 2414 N94-24399

A study of the core module simulator floor capability
p 2380 N94-24418

A minimum cost tolerance allocation method for rocket engines and robust rocket engine design
p 2222 N94-24419

Using neural networks to assist in OPAD data analysis
p 2477 N94-24452

Evaluation of advanced materials through experimental mechanics and modelling p 2374 N94-24454

An Earth albedo model: A mathematical model for the radiant energy input to an orbiting spacecraft due to the diffuse reflectance of solar radiation from the Earth below
[NASA-TM-104596] p 2195 N94-24497

Improved gas core propulsion model
[DE94-000929] p 2220 N94-24511

Diagnosing process faults using neural network models
[DE94-002633] p 2473 N94-24518

The transition from diapirism to dike intrusion: Implications for planetary volcanism
[NASA-CR-195133] p 2403 N94-24580

Edge elements, their advantages and disadvantages
[PB94-111069] p 2298 N94-24593

Finite-element modelling of three-dimensional electromagnetic fields using edge and nodal elements
[PB94-111077] p 2298 N94-24597

Recent developments in the mathematical modelling and physical understanding of transport and dispersion in aquatic systems, with special reference to tidal waters
[PB94-111135] p 2418 N94-24600

Crashworthiness analysis using advanced material models in DYNA3D
[DE94-002988] p 2229 N94-24632

Non-brittleness of a DESIRE-model for an office assignment task
[PB94-119021] p 2489 N94-24643

A two-dimensional dispersion module for the TOUGH2 simulator
[DE94-002262] p 2335 N94-24655

An efficient data assimilation algorithm with a gaussian covariance structure
[AD-A273152] p 2418 N94-24671

Temporal model of an optically pumped co-doped solid state laser
[NASA-TM-109680] p 2350 N94-24851

Vertical transport of water in the Martian boundary layer p 2622 N94-24902

Exercise keevil: Noise levels of six military helicopters
[PB93-210722] p 2529 N94-25026

Parametric uncertainty modeling for application to robust control p 2163 N94-25103

A study of roll attractor and wing rock of delta wings at high angles of attack p 2164 N94-25111

The importance of properties in modeling
p 2246 N94-25121

Thermophysical property sensitivity effects in steel solidification p 2246 N94-25122

A thermodynamic approach to obtain materials properties for engineering applications
p 2248 N94-25131

An exploratory stochastic model for toxic effects on cells
[AD-A273438] p 2422 N94-25146

First results from the Fennoscandian GPS networks
p 2405 N94-25204

Designs with a small number of runs for factorial experiments
[ISBN-9-03-860162-X] p 2462 N94-25237

Introduction to a behavioral approach for continuous time systems
[ETN-94-95301] p 2492 N94-25277

Modelling of premixed laminar flames
[ETN-94-95317] p 2236 N94-25284

Validating identified nonlinear models with chaotic dynamics
[RR-469] p 2523 N94-25314

Ring nuclei of strain for bonded dissimilar elastic half spaces with particular application to axisymmetric crack problems
[OUEL-1966/92] p 2379 N94-25325

On a new functional integral formalism for Hubbard model
[DE93-614017] p 2492 N94-25334

The Casimir energy of the rigid string with massive ends
[DE93-616851] p 2492 N94-25338

Deviation equations of Synge and Schild in spaces with affine connection and metric, and equations for gravitational waves detectors
[DE93-616852] p 2571 N94-25339

Loading, electromyograph, and motion during exercise
p 2427 N94-25359

Influence of test configuration on the combustion characteristics of polymers as ignition sources
p 2238 N94-25365

Modelling early failures in Space Station Freedom
p 2374 N94-25372
Edge detection using a complex wavelet
[AD-A273699] p 2493 N94-25452
Fault detection in HVAC systems using fuzzy models
[OUEL-1977/93] p 2373 N94-25475
Quality metrics for sensor images
p 2443 N94-25513
Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study
[AD-A273824] p 2314 N94-25539

MATHEMATICAL PROGRAMMING
Simplicial variable dimension restart algorithm to find economic equilibria on the unit simplex using n(n+1) rays
[PB94-110541] p 2596 N94-24477
CORSS: Cylinder Optimization of Rings, Skin, and Stringers
[NASA-TP-3457] p 2490 N94-24727
Evolving recurrent perceptrons
[AD-A273241] p 2496 N94-24778
Determining neural network hidden layer size using evolutionary programming
[AD-A273242] p 2475 N94-25139
Data structures and amortized complexity in a functional setting
[ETN-94-95307] p 2476 N94-25290

MATRICES (MATHEMATICS)
Properties of the transfer matrices of deflecting magnet systems for free electron laser
[DE93-508257] p 2347 N94-22922
Implementation and parallelization of fast matrix multiplication for a fast Legendre transform
[DE94-002184] p 2478 N94-22975
On the Daubechies-based wavelet differentiation matrix
[NASA-CR-191583] p 2479 N94-23090
Characterization of measures with a convex matrix-k-range
[PB93-220655] p 2479 N94-23098
The p-ranks of Latin square graphs
[PB93-230498] p 2479 N94-23107
Implementing abstract multigrid or multilevel methods
p 2483 N94-23682
The Third Twente Workshop on Graphs and Combinatorial Optimization
[PB94-110947] p 2486 N94-23722
Coordinate-free interpretations of the optimal costs for Lq problems subject to implicit systems
[PB94-118700] p 2473 N94-23760
A matrix analysis of conjugate gradient algorithms
[DE94-002546] p 2454 N94-23796
The HDTV digital audio matrix
[BBC-RD-1993/9] p 2295 N94-24085
On the differentiation matrix for Daubechies-based wavelets on an interval
[NASA-CR-191582] p 2487 N94-24291
Stitching the Yukawa quilt
[PB93-204477] p 2569 N94-24532
Conveying digital data in noisy, unstable, multipath environments
[AD-D015980] p 2301 N94-25038
Designs with a small number of runs for factorial experiments
[ISBN-9-03-860162-X] p 2462 N94-25237
A reachability test for systems over polynomial rings using Groebner bases
[MEMO-COSOR-92-38] p 2493 N94-25527

MATRIX MATERIALS
Determination of fiber-matrix interface failure parameters from off-axis tests
[NASA-TM-109043] p 2241 N94-23274
Time dependent behavior of a graphite/thermoplastic composite and the effects of stress and physical aging
[NASA-TM-109047] p 2228 N94-23280
Test methods for composites: A status report. Volume 2: Compression test methods
[AD-A273522] p 2230 N94-24779
Test methods for composites: A status report. Volume 1: Tension test methods
[AD-A273501] p 2230 N94-24942
Test methods for composites: A status report. Volume 3: Shear test methods
[AD-A273561] p 2230 N94-25163

MATRIX METHODS
Maximum likelihood modal parameter identification and realization of stochastic systems p 2157 N94-24265

MATRIX THEORY
Modifications to 8x8 dynamical theory: Polarizations redefined according to x ray diffraction convention
[DE94-001290] p 2560 N94-23187

MATTER-ANTIMATTER PROPULSION
An antiproton driver for ICF propulsion
p 2217 N94-23069

MAXIMUM ENTROPY METHOD
Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination
[PB93-224152] p 2559 N94-23109
Density estimation by maximum quantum entropy
[DE94-002626] p 2569 N94-24516

MAXIMUM LIKELIHOOD ESTIMATES
Nonlinear smoothing for random fields
[MEMO-1110] p 2493 N94-22728
Pseudo-coherent demodulation for mobile satellite systems p 2287 N94-22819
First order conditions for the maximum likelihood estimation of an exact ARMA model
[PB94-110533] p 2495 N94-23814
Maximum likelihood modal parameter identification and realization of stochastic systems p 2157 N94-24265
Density estimation by maximum quantum entropy
[DE94-002626] p 2569 N94-24516
Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data
[NASA-CR-194838] p 2190 N94-24804
A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure
[AD-A273488] p 2427 N94-24950
X-31 aerodynamic characteristics determined from flight data p 2164 N94-25109

MAXIMUM USABLE FREQUENCY
Northern Exposure 1992: An investigation of transauroral HF radio skywave propagation
[AD-A273363] p 2303 N94-25089

MAXWELL EQUATION
Proposed additions to the SHADOW ray-tracing code for general-asymmetric perfect-crystal optics
[DE94-001291] p 2560 N94-23188
Compatibility relations and the finite-element formulation of electromagnetic field problems
[PB94-110996] p 2294 N94-23727
Study of a local absorbing boundary condition for the modeling of an infinite external domain in the time-domain finite-element package FEMAXT
[PB94-111002] p 2294 N94-23728
Analysis for the computational modeling of finite cladding and lossy coating effects in fibers
[PB94-111085] p 2544 N94-23732
Finite-element method for computing three-dimensional electromagnetic fields in inhomogeneous media (1993)
[PB94-111101] p 2298 N94-24637

MCDONNELL AIRCRAFT
Numerical flow simulation for complete vehicle configurations
[AD-A273588] p 2170 N94-24849

MCDONNELL DOUGLAS AIRCRAFT
Aircraft accident report: Inadvertent in-flight slat deployment, China Eastern Airlines Flight 583, McDonnell Douglas MD-11, B-2171, 950 nautical miles south of Shemya, Alaska, 6 April 1993
[PB93-910408] p 2172 N94-23579

MEAN
Estimates of monthly mean soil moisture for 1979-1989
[NASA-TM-104571] p 2407 N94-23132

MEAN SQUARE VALUES
Development and validation of RNG methodology for compressible turbulence
[AD-A273469] p 2337 N94-24929

MEASURE AND INTEGRATION
The explicit computation of integration algorithms and first integrals for ordinary differential equations with polynomials coefficients using trees
[NASA-CR-194787] p 2448 N94-23074
Characterization of measures with a convex range: A generalization of Lyapounov's theorem
[PB93-220523] p 2523 N94-23094
Characterization of measures with a convex matrix-k-range
[PB93-220655] p 2479 N94-23098
Response-coefficient method for heat-conduction transients with time-dependent inputs
p 2326 N94-23671
On the continuity of limit capacity of central Cantor sets
[DE93-613022] p 2523 N94-25328

MEASUREMENT
Mass properties measurement system: Dynamics and statics measurements p 2368 N94-23236

MEASURING INSTRUMENTS
Thermoelectric cooled, purge-and-trap device for enhancing the utility of fiber optic VOC sensors
[DE94-001772] p 2541 N94-22722
Unmanned lunar rovers: Utilization for exploration
p 2607 N94-23387
Measuring electrically charged particle fluxes in space using a fiber optic loop sensor
[NASA-CR-191328] p 2544 N94-23829
New pin-on-disk equipment for vacuum tribometry
p 2360 N94-24023
An analytical ultra-high vacuum tribometer for solid lubricant studies p 2361 N94-24033
Miniature convection cooled plug-type heat flux gauges
[NASA-TM-106483] p 2344 N94-24069
The CEBAF beam loss sensors
[CEBAF-PR-93-032] p 2540 N94-24662
Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772
Bioregenerative life support systems for microgravity
[NASA-CR-195516] p 2422 N94-24810
Measurement of interfacial tension by use of pendant drop video techniques
[DE93-000168] p 2345 N94-24831
Conceptual design of an astronaut hand anthropometry device
[NASA-CR-195490] p 2439 N94-24956
Very low frequency and low frequency transmitting antenna parameter monitoring system
[AD-D015989] p 2302 N94-25049

MECHANICAL DEVICES
Metal band drives in spacecraft mechanisms
p 2355 N94-23987
Low melting temperature alloy deployment mechanism
p 2356 N94-23997

MECHANICAL DRIVES
Lectures on magnetohydrodynamical drives
[PB93-224962] p 2308 N94-23104
The Fifth European Space Mechanisms and Tribology Symposium
[ESA-SP-334] p 2355 N94-23985
Micro-gravity compatible drive (MGCD)
p 2355 N94-23988
Development steps on the basis of test with the LOCSTAR reflector deployment mechanism
p 2356 N94-23998
Ultra-clean high-precision mechanisms for the SUMER EUV spectrometer on SOHO p 2356 N94-23999
Periscope mechanism for SWAN instrument
p 2357 N94-24000
Thermal vacuum performance of cycloid and harmonic gearboxes with solid (MoS2) and liquid (Braycote 601) lubrication p 2358 N94-24009
Reliable redundant device for mechanisms
p 2361 N94-24030
Viscous rotary damper p 2361 N94-24031
Recharge mechanism based on shape memory alloy
p 2362 N94-24039

MECHANICAL ENGINEERING
Stiffening of deployable space booms: Automated Protein Crystal Growth Facility
[NASA-CR-195547] p 2196 N94-24820
Design of gas bearing systems for precision applications
[ISBN-9-03-860112-3] p 2367 N94-25249

MECHANICAL IMPEDANCE
Low melting temperature alloy deployment mechanism
p 2356 N94-23997
Development steps on the basis of test with the LOCSTAR reflector deployment mechanism
p 2356 N94-23998

MECHANICAL PROPERTIES
The history of development of molybdenum alloys for structural applications
[DE94-000389] p 2239 N94-22958
Evaluation of A5Si3Z(x) intermetallics for use as high temperature structural materials
[DE93-041127] p 2227 N94-22977
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184
Instrument interface description for NOAA 2000 instruments with European morning spacecraft and/or NOAA-OPQ spacecraft
[NASA-TM-109406] p 2208 N94-23478
Materials Science and Engineering
[DE94-003018] p 2228 N94-23493
The effects of texture and strain on the r-va lue of heavy gauge tantalum plate
[DE94-000690] p 2242 N94-23541
The mechanical properties of single crystal (alpha)-Si3N4
[DE94-002632] p 2563 N94-24517
A survey of metallurgical research on several actinides
[DE94-002643] p 2245 N94-24747
Environmentally assisted cracking of high strength beta titanium alloys
[AD-A273598] p 2245 N94-24823

An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072
The nanometer-scale mechanics of gold films
[AD-A273307] p 2565 N94-25086
Simulation studies for surfaces and materials strength
[NASA-CR-195185] p 2565 N94-25093
Surface compositional variations of Mo-47Re alloy as a function of temperature
[NASA-TP-3402] p 2245 N94-25117
Preparation and properties of translucent gamma-aluminium oxynitride
[ETN-94-95305] p 2263 N94-25281
Alternatives for reinforcement: Fiber composites
[VTT-TIED-1412] p 2230 N94-25386

MECHANICAL SHOCK
US tag for ISO/TC 108 mechanical vibration and shock: Minutes of the accredited Standards Committee on Mechanical Vibration and Shock, S2
[AD-A273015] p 2376 N94-23789

MEDICAL ELECTRONICS
The adaptive resonance theory network: (Clustering-) behaviour in relation with brainstem auditory evoked potential patterns
[EUT-92-E-264] p 2470 N94-22877

MEDICAL EQUIPMENT
Compact free electron lasers for medical applications
[AD-A273609] p 2350 N94-24934

MEDICAL SERVICES
Annual research progress report, fiscal year 1992. Volume 2: Department of Clinical Investigation
[AD-A273584] p 2427 N94-24945

MELT SPINNING
Ceramic silicon-boron-carbon fibers from organic silicon-boron-polymers
[NASA-CASE-ARC-11956-1-SB] p 2253 N94-23311

MELTING
Processing of YBCO superconductors for improved levitation force
[DE94-001326] p 2559 N94-22994
Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189
Three-dimensional solidification and melting using magnetic field control p 2325 N94-23664
A dynamic melting model for the origin of Apollo 15 olivine-normative and quartz-normative mare basalts
p 2615 N94-24371
Detection of velocity in high temperature liquid metals
p 2247 N94-25127

MELTING POINTS
Low melting temperature alloy deployment mechanism
p 2356 N94-23997
High strain rate superplasticity in metals and composites
[DE94-001521] p 2229 N94-24547
Synthesis of soluble halogenated polyphenylenes: Mechanism for the coupling halogenated lithiobenzenes
[AD-A273547] p 2257 N94-24558
Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789

MELTS (CRYSTAL GROWTH)
Theoretical considerations for Reaction-Formed Silicon Carbide (RFSC) formation by molten silicon infiltration into slurry-derived preforms
[NASA-TM-106414] p 2222 N94-23500
Three-dimensional solidification and melting using magnetic field control p 2325 N94-23664

MEMBRANE STRUCTURES
High power density proton exchange membrane fuel cells p 2393 N94-23359
Advances in direct oxidation methanol fuel cells
p 2393 N94-23361

MEMBRANES
Cellular and tissue injury during nonfreezing cold injury and frostbite
[AD-A270883] p 2423 N94-22732
A novel method for determination of transport parameters of H2 and O2 in PEMFCs
[DE94-001492] p 2389 N94-22962
Primary and secondary electrical space power based on advanced PEM systems p 2392 N94-23357
PEM regenerative fuel cells p 2392 N94-23358
A high performance H2-Cl2 fuel cell for space power applications p 2394 N94-23366
Selective hydrogen separation by palladium-based composite membranes
[PB93-201671] p 2254 N94-23431

MEMORY (COMPUTERS)
Dynamic data distributions in Vienna Fortran
[NASA-CR-191575] p 2448 N94-23092
Distributed Operating Systems and Mach. Proceedings of the Spring 1992 Graduate Seminar on Distributed Systems
[PB93-224905] p 2449 N94-23103
Fault tolerant onboard packet switch architecture for communication satellites: Shared memory per beam approach
[NASA-TM-106397] p 2201 N94-23567
Vectorization and parallelization of the finite strip method for dynamic Mindlin plate problems
p 2483 N94-23679
Design and implementation issues of end-to-end protocols in high-speed networks
[PB94-110905] p 2467 N94-23752
Algorithm on addition chains with restricted memory
[PB94-118692] p 2454 N94-23759
Non-volatile, solid state bistable electrical switch
[NASA-CASE-NPO-17621-1-CU] p 2309 N94-23820
A quick uplink, expandable executable for the NSSC-1 of the Hubble Space Telescope p 2305 N94-23859
Magellan spacecraft and memory state tracking: Lessons learned, future thoughts p 2207 N94-23865
The design of a standard message passing interface for distributed memory concurrent computers
[DE94-002536] p 2446 N94-24538
Crosstie random access memory element having associated read/write circuitry
[AD-D016027] p 2446 N94-24724
MOS analog memory with injection capacitors
[AD-D015990] p 2312 N94-25050

MENTAL PERFORMANCE
Mental images p 2429 N94-23980
Investigation of time and intensity effects in operator workload and performance
[CTN-94-60927] p 2433 N94-24171
Automated system function allocation and display format: Task information processing requirements
p 2434 N94-24189
EEG and chaos: Description of underlying dynamics and its relation to dissociative states
[NASA-CR-195171] p 2428 N94-24799
Human factors of mission planning systems: Theory and concepts p 2521 N94-25010

MERCURY (PLANET)
A mission to Mercury and a mission to the moons of Mars
[NASA-CR-195530] p 2195 N94-24619

MERCURY CADMIUM TELLURIDES
Effects of thermal-solutal convection on temperature and solutal fields under various gravitational orientations
p 2267 N94-24451

MERCURY COMPOUNDS
New concepts for HgI2 scintillator gamma ray spectroscopy
[NASA-CR-194819] p 2233 N94-24113

MERIDIONAL FLOW
Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992
[AD-A273400] p 2416 N94-25071

MEROMORPHIC FUNCTIONS
Controlled invariance of nonlinear systems: Nonexact forms speak louder than exact forms
[PB93-237790] p 2475 N94-24755

MESOMETEOROLOGY
United States Weather Research Program (USWRP)
p 2411 N94-24375
Validation of mesoscale models p 2413 N94-24391
Session on validation of coupled models
p 2414 N94-24399

MESON RESONANCE
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476

MESON-NUCLEON INTERACTIONS
Pions and neutrinos as probes of the nucleon and nuclear few-body system
[DE93-040127] p 2531 N94-22928
Momentum and coordinate space three-nucleon potentials
[DE93-040868] p 2531 N94-22951

MESONS
Low mass muon pair production in 450 GeV p-Be collisions
[PB94-110699] p 2533 N94-23746
Strong interactions studies with medium energy probes
[DE94-001446] p 2540 N94-23791
Relativistic hadrons in an external field
[ETN-94-95387] p 2538 N94-25259
A quark structure of hadrons and nuclei
[DE93-616872] p 2539 N94-25474
Weak interactions in a bilocal chiral theory
[DE93-616887] p 2539 N94-25477
On the transverse size of a fast moving nucleon
[DE93-616891] p 2539 N94-25481

MESOSCALE PHENOMENA
Scientific investigations of atmospheric processes
[NASA-CR-194805] p 2401 N94-23271
Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734
Report of the proceedings of the Colloquium and Workshop on Multiscale Coupled Modeling
[NASA-CP-3217] p 2410 N94-24374
United States Weather Research Program (USWRP)
p 2411 N94-24375
Scientific goals of the Cooperative Multiscale Experiment (CME) p 2411 N94-24381
Grand challenge scientific questions in coupled modeling p 2412 N94-24382
Examples of data assimilation in mesoscale models
p 2412 N94-24384
Measurement and modeling of moist processes
p 2413 N94-24385
Parameterization of sub-grid scale convection
p 2413 N94-24386
Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387
Incorporation of the planetary boundary layer in atmospheric models p 2413 N94-24388
The role of radiation in mesoscale flows: Physics, parameterizations, codes p 2413 N94-24389
Chemistry on the mesoscale: Modeling and measurement issues p 2413 N94-24390
Validation of mesoscale models p 2413 N94-24391
Techniques and resources for storm-scale numerical weather prediction p 2414 N94-24392
Session on cumulus parameterization
p 2414 N94-24394
Joint sessions on modeling of boundary layer and radiative transfer processes p 2414 N94-24396
Session on modeling of radiative transfer processes
p 2414 N94-24397
Session on validation of coupled models
p 2414 N94-24399
Session on techniques and resources for storm-scale numerical weather prediction p 2415 N94-24400
Vertical motion in the SYNOP central array
[AD-A273593] p 2418 N94-24795
Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap
p 2621 N94-24895
Martian mesoscale circulations induced by variations in surface optical and thermal characteristics: A numerical study p 2622 N94-24899

MESOSPHERE
An analysis of solar mesospheric temperatures for the upper stratosphere and mesosphere
[NASA-CR-194861] p 2626 N94-23626
Data analysis and theoretical studies of the upper mesosphere and lower thermosphere
[NASA-CR-195108] p 2402 N94-24089
Mesospheric and lower thermospheric winds, temperatures densities, and volume emission rates
[NASA-CR-195147] p 2403 N94-24486

MESSAGE PROCESSING
EUTELTRACS: The European experience on mobile satellite services p 2281 N94-22781
Users manual for the Chameleon parallel programming tools
[DE94-001934] p 2465 N94-22973
Arc consistency problem: An exercise in parallel programming with shared objects
[PB94-110590] p 2466 N94-23706
The design of a standard message passing interface for distributed memory concurrent computers
[DE94-002536] p 2446 N94-24538
Special signature schemes
[ETN-94-95296] p 2446 N94-25081

MESSAGES
A packet-based concept for spacecraft command planning p 2504 N94-23873
The design of a standard message passing interface for distributed memory concurrent computers
[DE94-002536] p 2446 N94-24538

METABOLISM
In vitro system for studying metabolism of environmental chemicals in human cells
[AD-A273427] p 2421 N94-24688

METAL AIR BATTERIES
High energy density aluminum-oxygen cell
p 2393 N94-23363

METAL BONDING
Gas-pressure forming of superplastic ceramic sheet
[DE94-001520] p 2252 N94-22930
Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657

METAL CLUSTERS
Simulation studies for surfaces and materials strength
[NASA-CR-195185] p 2565 N94-25093
METAL COATINGS
Structural characterization and thermal cycling behaviour of EB-PVD thermal barrier coating systems
[ISBN-0-315-83365-3] p 2257 N94-24468
Robotic weld overlay coatings for erosion control
[DE94-002665] p 2258 N94-24749
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784
Laser ablation and deposition of metals
[ETN-94-95311] p 2351 N94-25294
Plasma sprayed thermal barrier coatings: Production, characterization and testing
[ISBN-9-03-860082-8] p 2555 N94-25439
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues
[AD-A273664] p 2251 N94-25451
METAL COMBUSTION
Influence of test configuration on the combustion characteristics of polymers as ignition sources
p 2238 N94-25365
METAL CUTTING
JBK-75 stainless steel machinability study
[DE94-002268] p 2242 N94-23475
METAL FATIGUE
Fatigue life and crack growth prediction methodology
[NASA-TM-109044] p 2228 N94-23279
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276
Elevated temperature crack propagation
[NASA-TM-106490] p 2377 N94-24715
Variable amplitude fatigue, modelling and testing
[PB93-204469] p 2378 N94-24742
The mechanical property data base from an Air Force/Industry Cooperative Test Program on advanced aluminum alloys (7064 and CW67)
[AD-A273741] p 2251 N94-25531
METAL FIBERS
Composite fiber structures for catalysts and electrodes
p 2393 N94-23364
Surface and interfacial properties of polymer blends. A literature survey
[PB93-230191] p 2254 N94-23561
METAL FILMS
Selective hydrogen separation by palladium-based composite membranes
[PB93-201671] p 2254 N94-23431
Soft x ray optics by pulsed laser deposition
[NASA-CR-195139] p 2546 N94-24967
The nanometer-scale mechanics of gold films
[AD-A273307] p 2565 N94-25086
Laser ablation and deposition of metals
[ETN-94-95311] p 2351 N94-25294
METAL FOILS
Foil bearing research at Penn State
p 2215 N94-23058
Phase transformations in Cu-Zr multilayers
[DE94-000393] p 2241 N94-23297
METAL GRINDING
JBK-75 stainless steel machinability study
[DE94-002268] p 2242 N94-23475
METAL HYDRIDES
Ovonic nickel metal hydride batteries for space applications p 2391 N94-23352
Alloys for hydrogen storage in nickel/hydrogen and nickel/metal hydride batteries p 2391 N94-23353
Impedance measurements on a spiral-wound nickel/metal hydride cell cycled in a simulated Leo orbit
p 2392 N94-23355
Hydride thermodynamic machines
[VTT-JULK-768] p 2571 N94-25416
Metal hydride storage
[VTT-JULK-769] p 2396 N94-25417
METAL IONS
Excited state dynamics of thulium ions in yttrium aluminum garnets
[NASA-CR-195159] p 2564 N94-25024
Excitation mechanisms for XUV and x ray lasers
[DE93-617006] p 2351 N94-25482
METAL MATRIX COMPOSITES
New extensions in the development of deformation processed metal-metal matrix composites
[DE94-000692] p 2227 N94-23004
Materials Science and Engineering
[DE94-003018] p 2228 N94-23493
Engine materials characterization and damage monitoring by using x ray technologies
[NASA-TP-3328] p 2372 N94-24074
High strain rate superplasticity in metals and composites
[DE94-001521] p 2229 N94-24547
Crashworthiness analysis using advanced material models in DYNA3D
[DE94-002988] p 2229 N94-24632
Matrix fatigue cracking mechanisms of alpha(2) TMC for hypersonic applications
[NASA-TM-106506] p 2230 N94-25186
METAL OXIDE SEMICONDUCTORS
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique
[DE94-001608] p 2309 N94-23520
METAL OXIDES
Development of durable high-temperature catalysts for natural gas combustion
[PB93-226447] p 2232 N94-23477
Pulsed Ion Beam Surface Analysis (PIBSA) as a means of in-situ real-time analysis of thin films during growth
[DE94-001276] p 2562 N94-23805
Surface compositional variations of Mo-47Re alloy as a function of temperature
[NASA-TP-3402] p 2245 N94-25117
Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3
[DE93-613824] p 2566 N94-25332
METAL PLATES
Performance of the X-/Ka/KABLE-band dichroic plate in the DSS-13 beam waveguide antenna
p 2291 N94-23261
The effects of texture and strain on the r-va lue of heavy gauge tantalum plate
[DE94-000690] p 2242 N94-23541
METAL PROPELLANTS
Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275
Ignition and combustion characteristics of metallized propellants, phase 2
[NASA-CR-195107] p 2266 N94-24700
METAL SHEETS
Weld cladding of hard surfaces
[PB93-201598] p 2353 N94-23448
METAL SHELLS
Foil bearing research at Penn State
p 2215 N94-23058
METAL SURFACES
Inelastic electron scattering from surfaces
[DE94-001368] p 2531 N94-22733
Chromate-free talc chemical conversion coatings for aluminum alloys
[DE94-001567] p 2238 N94-22932
Density functional studies: First principles and semi-emperical calculations of clusters and surfaces
[DE94-002836] p 2561 N94-23214
Thermal phase behavior of metal surfaces: X-ray scattering studies of Pt(001)
[DE94-002991] p 2245 N94-24612
Free energy profiles for Li(+) and I(-) ions approaching Pt(100) surface: A molecular dynamics study
[AD-A273455] p 2536 N94-24675
Use of scanning tunneling microscope in corrosion studies
[VTT-TIED-1416] p 2250 N94-25346
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5A: Corrosion: General issues
[AD-A273666] p 2250 N94-25406
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448
METAL VAPORS
Artificial plasma experiments. Chemical release observations associated with the CRRES program
[NASA-CR-194871] p 2550 N94-23565
The reaction mechanism of W-CVD in Si
[ETN-94-95329] p 2261 N94-25084
METAL-GAS SYSTEMS
Diffusion of hydrogen in iron oxides
[DE93-632430] p 2239 N94-22966
METAL-METAL BONDING
Organometallic chemistry of bimetallic compounds
[DE94-002313] p 2238 N94-22897
Strength, acoustic evaluation and metallurgy of diffusion bonds
[DE94-001804] p 2243 N94-23717
METAL-WATER REACTIONS
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5B: Corrosion: General issues
[AD-A273667] p 2250 N94-25407
METALLIZING
Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346
Robotic weld overlay coatings for erosion control
[DE94-002665] p 2258 N94-24749
METALLOGRAPHY
Influence of sintering atmospheres on the aluminum sintering characteristics
[DE93-632412] p 2239 N94-22965
Determination of the compatibility between structural alloys and molten metals at high temperatures
[DE94-000954] p 2241 N94-23434
Large-scale production of Si(0.8)Ge(0.2) thermoelectric alloys by mechanical alloying
[DE94-000695] p 2243 N94-23753
Robotic weld overlay coatings for erosion control
[DE94-002665] p 2258 N94-24749
METALLURGY
Irradiation damage behavior of low alloy steel wrought and weld materials
[DE94-000519] p 2239 N94-22999
New extensions in the development of deformation processed metal-metal matrix composites
[DE94-000692] p 2227 N94-23004
METALS
Development of an analytical-numerical model to predict radiant emission or absorption
[NASA-CR-194860] p 2453 N94-23624
Variable amplitude fatigue, modelling and testing
[PB93-204469] p 2378 N94-24742
A thermodynamic approach to obtain materials properties for engineering applications
p 2248 N94-25131
Three-dimensional, inelastic response of single-edge notch bend specimens subjected to impact loading
[AD-A273302] p 2378 N94-25143
METAMORPHISM (GEOLOGY)
A geochemical study of acapulcoite and lodranite meteorites p 2605 N94-25358
METASTABLE STATE
Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784
Excitation mechanisms for XUV and x ray lasers
[DE93-617006] p 2351 N94-25482
METEORITES
Antarctic Meteorite Location and Mapping Project (AMLAMP): Antarctic meteorite location map series explanatory text and user's guide to AMLAMP data
[NASA-CR-194841] p 2603 N94-24964
METEORITIC COMPOSITION
Correlated petrographic, electron microprobe, and ion microprobe studies of selected primitive and processed phase assemblages in meteorites
[NASA-CR-194827] p 2601 N94-23499
A geochemical study of acapulcoite and lodranite meteorites p 2605 N94-25358
METEOROLOGICAL CHARTS
Analyzing Martian winds and tracer concentrations using Mars Observer data p 2619 N94-24883
METEOROLOGICAL PARAMETERS
Atmospheric numerical modeling resource enhancement and model convective parameterization/scale interaction studies
[NASA-CR-194769] p 2400 N94-23124
An adaptive multigrid model for hurricane track prediction p 2416 N94-23687
Joint Acoustic Propagation Experiment (JAPE)
p 2527 N94-24208
Some results gained from JAPE: An overview
p 2527 N94-24209
Intercomparison of remote and balloon-borne sensors operated at JAPE-91 p 2527 N94-24210
Comparison of measured and predicted pure tone propagation levels from JAPE-1: An evaluation of the performance of ASOPRAT p 2527 N94-24212
GEWEX Cloud Systems Study (GCSS)
p 2411 N94-24377
Grand challenge scientific questions in coupled modeling p 2412 N94-24382
Session on cumulus parameterization
p 2414 N94-24394
Modeling and data assimilation for Mars Observer
p 2620 N94-24889
The evaluation of ASOS for the Kennedy Space Center's Shuttle Landing Facility
[NASA-CR-195685] p 2416 N94-25271
METEOROLOGICAL RADAR
Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop
[PB93-220135] p 2407 N94-23129

Implementation and evaluation of the new wind algorithm in NASA's 50 MHz doppler radar wind profiler
[NASA-CR-194880] p 2408 N94-23576
Estimation of the rain signal in the presence of large surface clutter
[NASA-CR-195105] p 2409 N94-24087
Further studies to extend and test the area-time-integral technique applied to satellite data
[NASA-CR-195132] p 2415 N94-24705
ASR-9 microburst detection algorithm
[AD-A273591] p 2415 N94-24850

METEOROLOGICAL SATELLITES
The AGRHYMET data communications project
p 2280 N94-22776
An AVHRR cloud classification database typed by experts
[AD-A273560] p 2416 N94-25162

METEOROLOGY
Locally modified Bott-scheme for highly convective flows
[MPIM-99] p 2400 N94-23157
Visualization of results from meteorological simulations on CRAY
[PB93-201358] p 2451 N94-23443
Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean
[NASA-CR-194852] p 2408 N94-23542
Implementation and evaluation of the new wind algorithm in NASA's 50 MHz doppler radar wind profiler
[NASA-CR-194880] p 2408 N94-23576
Uncertainties in climate data sets
[NASA-CR-194848] p 2408 N94-23577
Convective organization in the Pacific ITCZ: Merging OLR, TOVS, and SSM/I information
[NASA-CR-194850] p 2408 N94-23619
Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734
MAMS data for the Convection and Moisture Experiment (CAMEX)
[NASA-TM-108435] p 2409 N94-24080
Report of the proceedings of the Colloquium and Workshop on Multiscale Coupled Modeling
[NASA-CP-3217] p 2410 N94-24374
GEWEX Water Vapor Project (GVaP)
p 2411 N94-24378

METEOSAT SATELLITE
Instrument interface description for NOAA 2000 instruments with European morning spacecraft and/or NOAA-OPQ spacecraft
[NASA-TM-109406] p 2208 N94-23478
Command/telemetry bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems
[NASA-TM-109407] p 2208 N94-23479

METHANATION
New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane
[PB94-112786] p 2233 N94-23801

METHANE
Radiative forcing calculations for SF6 and CH4 using a correlated k-distribution transmission model
[DE94-001855] p 2397 N94-23700
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane
[PB94-112786] p 2233 N94-23801
Fundamental study of NO(x) control in catalytic combustion
[PB94-112323] p 2398 N94-23818
Rice cultivation and methane emission: Documentation of distributed geographic data sets
[NASA-TM-104595] p 2381 N94-24800
Design of novel catalysts for the partial oxidation of methane to methanol
[PB94-114212] p 2235 N94-24920
Carbon and hydrogen isotope composition and C-14 concentration in methane from sources and from the atmosphere: Implications for a global methane budget
[NASA-CR-195166] p 2399 N94-25092
Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167

METHOD OF CHARACTERISTICS
Supersonic minimum length nozzle design for dense gases p 2171 N94-23656

METHOD OF MOMENTS
Isolated and coupled superquadric loop antennas for mobile communications applications
p 2289 N94-22834
Rigorous analysis of thick microstrip antennas and wire antennas embedded in a substrate
[EUT-92-E-263] p 2290 N94-22876

METHYL ALCOHOL
Modelling of solid polymer and direct methanol fuel cells: Phenomenological equations and analytical solutions
[PB93-224897] p 2390 N94-23102
The electrolyte challenge for a direct methanol-air polymer electrolyte fuel cell operating at temperatures up to 200 C p 2393 N94-23360
Advances in direct oxidation methanol fuel cells
p 2393 N94-23361
New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane
[PB94-112786] p 2233 N94-23801
Design of novel catalysts for the partial oxidation of methane to methanol
[PB94-114212] p 2235 N94-24920

METHYL COMPOUNDS
Feasibility study: Monodisperse polymer particles containing laser-excitable dyes p 2225 N94-24350
Potent solvents for C60 and their utility for the rapid acquisition of 13CNMR data for fullerenes
[AD-A273349] p 2235 N94-24925
The electrochemistry of the solvated electron: A study of its properties and of its applications
[ETN-94-95313] p 2236 N94-25296

METRIC SPACE
Median stabilization degree of a median algebra
[PB93-220010] p 2479 N94-23093
Medians and steiner trees
[PB94-110616] p 2486 N94-23708
On the continuity of limit capacity of central Cantor sets
[DE93-613022] p 2523 N94-25328

MICHELSON INTERFEROMETERS
Fiber optic detection of laser generated ultrasound for materials characterization
[ISBN-0-315-83541-9] p 2541 N94-22891
Fiber optic detection of ultrasound and its application to cure monitoring
[ISBN-0-315-83424-2] p 2544 N94-24466

MICROBALLOONS
Properties and processing characteristics of low density carbon cloth phenolic composites p 2231 N94-24450

MICROBIOLOGY
Microbiological analysis of debris from Space Transportation System (STS)-55 Spacelab D-2
[NASA-CR-193883] p 2421 N94-24310
Microbial biofilm formation and its consequences for the CELSS program
[NASA-CR-195146] p 2438 N94-24706
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5B: Corrosion: General issues
[AD-A273667] p 2250 N94-25407
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 6: Electric Power Industry
[AD-A273668] p 2250 N94-25408

MICROCHANNELS
Design of microchannels for cryostabilization of high temperature superconducting magnets
[DE94-001324] p 2559 N94-22993

MICROCRACKS
A numerical analysis of crack propagation in microcracking ceramic and ceramic composites
[DE94-001192] p 2253 N94-23183
Micromechanical failure modes in brittle matrix composites p 2255 N94-24232

MICROELECTRONICS
Multidisciplinary specification and design of microelectronics in products
[EUT-93-E-269] p 2308 N94-23136
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200
CRRES microelectronics package flight data analysis
[NASA-TP-3423] p 2540 N94-23273

MICROFIBERS
Microinjection of the Yersinia YopE cytotoxin in mammalian cells induces actin microfilament disruption
[FOA-B-40418-4.4] p 2421 N94-24290

MICROGRAVITY
Lewis Research Center R and D Facilities
[NASA-TM-109400] p 2630 N94-23135
Microgravity sciences application visiting scientist program
[NASA-CR-194804] p 2267 N94-23287
High power density proton exchange membrane fuel cells p 2393 N94-23359
Responses to LBNP in men with varying profiles of strength and aerobic capacity: Implications for flight crews
[NASA-TP-3346] p 2426 N94-23530
The study of dopant segregation behavior during the growth of GaAs in microgravity
[NASA-CR-193905] p 2267 N94-23549
Studies of two phase flow
[NASA-CR-195099] p 2267 N94-23594
Micro-gravity compatible drive (MGCD)
p 2355 N94-23988
The development of the HERA Test Facility (HTF)
p 2197 N94-24020
Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100
Autogenic-feedback training: A potential treatment for post-flight orthostatic intolerance in aerospace crews
[NASA-TM-108785] p 2426 N94-24102
Conceptual design of a device to measure hand swelling in a micro-gravity environment
[NASA-CR-195509] p 2437 N94-24330
NASA project 1: Full-body dynamometer
[NASA-CR-195507] p 2438 N94-24331
Microgravity Studies of Organic and Polymeric Materials
[NASA-CP-3250] p 2223 N94-24338
Numerical modeling of physical vapor transport under microgravity conditions: Effect of thermal creep and stress p 2223 N94-24340
Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346
Processing of semicrystalline polymers
p 2226 N94-24351
Polymer morphologh p 2226 N94-24353
Measuring the dynamics of structural changes in biological macromolecules from light scattering data
p 2422 N94-24426
Torque equilibrium attitudes for the Space Station
p 2208 N94-24449
Effects of thermal-solutal convection on temperature and solutal fields under various gravitational orientations
p 2267 N94-24451
JOVE NASA-FIT program: Microgravity and aeronomy projects
[NASA-CR-195121] p 2631 N94-24493
Japanese aerospace science and technology 1992. A bibliography with indexes
[NASA-SP-7104] p 2631 N94-24585
Concepts and embodiment design of a reentry recumbent seating system for the NASA Space Shuttle
[NASA-CR-195504] p 2438 N94-24667
Artificial gravity in space flight
[AD-A273420] p 2427 N94-24928
The role of visual context in manual target localization
p 2429 N94-25351
Loading, electromyograph, and motion during exercise
p 2427 N94-25359
Development of a model to assess orthostatic responses p 2427 N94-25376

MICROHARDNESS
Contribution to the interface micromechanical study and to the damage fundamental phenomena in glass fiber epoxy resin model composites
[ISAL-93-0027] p 2227 N94-23133
Robotic weld overlay coatings for erosion control
[DE94-002665] p 2258 N94-24749

MICROMECHANICS
Determination of fiber-matrix interface failure parameters from off-axis tests
[NASA-TM-109043] p 2241 N94-23274
Micromechanical failure modes in brittle matrix composites p 2255 N94-24232
Micromechanical characterization of ceramic-matrix composites using the instrumented microindentation technique p 2256 N94-24233
Role of interfaces on the cyclic fatigue behaviour of ceramic matrix composites p 2256 N94-24234
Microstructure and micromechanical behaviour of CMCs p 2256 N94-24236
Micromechanical simulation of damage progression in carbon phenolic composites p 2231 N94-24446
Environmentally assisted cracking of high strength beta titanium alloys
[AD-A273598] p 2245 N94-24823

MICROORGANISMS
Microbial biofilm formation and its consequences for the CELSS program
[NASA-CR-195146] p 2438 N94-24706
Symbiosis in marine luminous bacteria
[AD-A273540] p 2422 N94-24791

MICROPHONES
Head related transfer function pseudo-stereophony
[NASA-CASE-ARC-11919-1-NP] p 2525 N94-23312

Comparison of measured and predicted pure tone propagation levels from JAPE-1: An evaluation of the performance of ASOPRAT p 2527 N94-24212

MICROPOROSITY

Template synthesis of electronically conductive polymers
[AD-A273673] p 2263 N94-25409

MICROPROCESSORS

Installation of an artificial neural network on distributed memory microprocessors
[ETN-94-95175] p 2471 N94-23152

Contribution to the evaluation of efficiency of a microprocessor functional test
[ETN-94-95176] p 2445 N94-23153

Towards the formal specification of the requirements and design of a processor interface unit: HOL listings
[NASA-CR-191465] p 2466 N94-23252

Design and implementation issues of end-to-end protocols in high-speed networks
[PB94-110905] p 2467 N94-23752

Towards the formal verification of the requirements and design of a processor interface unit
[NASA-CR-4522] p 2467 N94-24075

Towards the formal specification of the requirements and design of a processor interface unit
[NASA-CR-4521] p 2467 N94-24463

Crosstie random access memory element having associated read/write circuitry
[AD-D016027] p 2446 N94-24724

The transputer
[AD-A273688] p 2446 N94-25438

MICROSCOPY

Orientation imaging microscopy: New possibilities for microstructural investigations using automated BKD analysis
[DE94-000777] p 2557 N94-22938

Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772

The nanometer-scale mechanics of gold films
[AD-A273307] p 2565 N94-25086

MICROSTRIP ANTENNAS

An active K/Ka-band antenna array for the NASA ACTS mobile terminal p 2289 N94-22832

Microstrip monopulse antenna for land mobile communications p 2289 N94-22833

Rigorous analysis of thick microstrip antennas and wire antennas embedded in a substrate
[EUT-92-E-263] p 2290 N94-22876

A constrained optimization technique for arbitrary antenna arrays and various performance indices
[ISBN-0-315-59455-1] p 2297 N94-24179

MICROSTRUCTURE

Relationship of microstructure and mechanical properties for V-Cr-Ti alloys
[DE94-001431] p 2238 N94-22718

Carbon aerogels: An update on structure, properties, and applications
[DE94-001528] p 2252 N94-22931

Orientation imaging microscopy: New possibilities for microstructural investigations using automated BKD analysis
[DE94-000777] p 2557 N94-22938

The history of development of molybdenum alloys for structural applications
[DE94-000389] p 2239 N94-22958

Damage under monotonic or cyclic loads of new AlSiFe alloys prepared by the Osprey (tm) process
[ISAL-93-0008] p 2239 N94-22972

Atomic-scale structure of grain boundaries: Correlations to grain boundary properties
[DE94-001289] p 2558 N94-22990

Texture gradient effects in tantalum
[DE94-000689] p 2240 N94-23021

Internal friction associated with dislocation relaxations in virgin martensite
[PB93-226280] p 2240 N94-23119

Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons
[PB93-201531] p 2561 N94-23428

Theory of extrusion: Advances and challenges
[PB93-201572] p 2241 N94-23447

Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550

Strength, acoustic evaluation and metallurgy of diffusion bonds
[DE94-001804] p 2243 N94-23717

Combustion synthesis and engineering of nanoparticles for electronic, structural and superconductor applications
[DE94-001865] p 2254 N94-23720

Large-scale production of Si(0.8)Ge(0.2) thermoelectric alloys by mechanical alloying
[DE94-000695] p 2243 N94-23753

Metal-mullite reactions
[DE94-002038] p 2244 N94-23811

Catalog of Apollo 17 rocks. Volume 1: Stations 2 and 3 (South Massif)
[NASA-CR-194854] p 2613 N94-24058

Microstructure and micromechanical behaviour of CMCs p 2256 N94-24236

Ordered organic thin films self-assembled from the vapor phase p 2223 N94-24339

Defects in electro-optically active polymer solids
p 2223 N94-24342

Microstructural analysis of the 2195 aluminum-lithium alloy welds p 2251 N94-24448

Integral equations for the microstructures of supercritical fluids
[DE94-002460] p 2535 N94-24569

Ultrastructure processing of macromolecular materials
[AD-A273413] p 2258 N94-24782

Thermophysical property sensitivity effects in steel solidification p 2246 N94-25122

Microstructure of styrene methyl methacrylate copolymers grafted onto polybutadiene seeds
[ETN-94-95360] p 2262 N94-25225

Evaluation of multiaxial fracture models for technical ceramics
[ISBN-9-03-860192-1] p 2263 N94-25299

Frost effects on the microstructure of high strength concrete, and methods for their analysis
[VTT-PUBS-126] p 2379 N94-25529

MICROWAVE AMPLIFIERS

Cryogenic, low-noise high electron mobility transistor amplifiers for the Deep Space Network
p 2291 N94-23262

MICROWAVE ANTENNAS

K- and Ka-band mobile-vehicular satellite-tracking reflector antenna system for the NASA ACTS mobile terminal p 2289 N94-22831

An active K/Ka-band antenna array for the NASA ACTS mobile terminal p 2289 N94-22832

MICROWAVE CIRCUITS

Microwave analog frequency dividers: Design, modeling and realization
[LAAS-93139] p 2307 N94-22909

Spatial frequency multiplier with active linearly tapered slot antenna array
[NASA-TM-106494] p 2310 N94-24308

MICROWAVE COUPLING

Microwave excitation of pulsed high pressure gas discharge lasers
[DLR-FB-93-12] p 2351 N94-25304

MICROWAVE IMAGERY

Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-194858] p 2404 N94-24843

Passive millimeter-wave imaging p 2306 N94-25494

Advanced radiometric and interferometric milimeter-wave scene simulations p 2306 N94-25498

A model-based approach for detection of objects in low resolution passive-millimeter wave images
p 2442 N94-25507

MICROWAVE POWER BEAMING

WISPER: Wirless Space Power Experiment
[NASA-CR-195538] p 2396 N94-24701

MICROWAVE RADIOMETERS

A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research
[DE94-000565] p 2381 N94-23001

Application of ERS-1 active microwave instrumentation data to remote sensing of snow
[PB93-224756] p 2382 N94-23224

Feasibility of detecting aircraft wake vortices using passive microwave radiometers
[NASA-CR-191553] p 2343 N94-23498

Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-194858] p 2404 N94-24843

MICROWAVE RESONANCE

Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333

MICROWAVE SCATTERING

Overview of the ATF stellarator program
[DE94-000371] p 2550 N94-23462

Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A273568] p 2419 N94-24944

MICROWAVE SENSORS

Mission planning for an Earth observation low Earth orbiter: ERS-1 p 2503 N94-23868

MICROWAVE SOUNDING

Earth Observing System (EOS) Advanced Microwave Sounding Unit-A (AMSU-A) schedule plan
[NASA-CR-194856] p 2585 N94-23563

MICROWAVE SPECTRA

Laboratory detection of C5S by pulsed-discharge-nozzle Fourier-transform microwave spectroscopy
[JTN-94-80519] p 2235 N94-24984

MICROWAVES

Optimization of energy transfer in microwave electrothermal thrusters p 2216 N94-23065

CFD modeling of microwave electrothermal thrusters
p 2216 N94-23066

Proceedings of the 1993 Bi-Isotropics Workshop on Novel Microwave Materials
[PB93-224772] p 2290 N94-23225

Synthesis of passive microwave and radar altimeter data for estimating accumulation rates of polar snow
[NASA-CR-194864] p 2382 N94-23573

Multigrid and cyclic reduction applied to the Helmholtz equation p 2304 N94-23676

Microwave techniques for physical property measurements p 2238 N94-25134

Microwave excitation of pulsed high pressure gas discharge lasers
[DLR-FB-93-12] p 2351 N94-25304

MIDDLE ATMOSPHERE

Two-dimensional modeling of thermal inversion layers in the middle atmosphere of Mars p 2622 N94-24900

MIE SCATTERING

Particle sizes and composition of Mars atmospheric dust based upon Viking and Mariner 9 observations
p 2618 N94-24878

MILITARY HELICOPTERS

Night operations p 2431 N94-23977

Evaluation of the UH-1N instrument panel
[AD-A273145] p 2186 N94-24774

Exercise keevil: Noise levels of six military helicopters
[PB93-210722] p 2529 N94-25026

MILITARY OPERATIONS

Night operations p 2431 N94-23977

Safety guidelines for the operation of the DREO 10 m EMP simulator DREMPS
[DREO-TN-93-5] p 2193 N94-24117

Operation Friction: Development and introduction of personal cooling for CH124 Sea King aircrew
[DCIEM-93-06] p 2433 N94-24119

Overall system concepts in mission planning
p 2521 N94-25009

Human factors of mission planning systems: Applications and implementation p 2522 N94-25011

Ground based mission planning systems
p 2522 N94-25014

In flight mission planning in the Copilote Electronique
p 2522 N94-25015

Mission rehearsal in the SOF-ATS program
p 2522 N94-25016

MILITARY TECHNOLOGY

Operation Friction: Development and introduction of personal cooling for CH124 Sea King aircrew
[DCIEM-93-06] p 2433 N94-24119

UAV current technology and future trends
p 2154 N94-24245

Design project: LONGBOW supersonic interceptor
[NASA-CR-195510] p 2180 N94-24581

Advanced avionics architecture and technology review. Executive summary and volume 1: Avionics tech nology. Volume 2: Avionics systems engineering
[AD-A273630] p 2186 N94-24733

Information systems strategy in air transport
[AD-A273125] p 2173 N94-24781

Overall system concepts in mission planning
p 2521 N94-25009

Research interests and broad agency announcement 94-1 of the Air Force Office of Scientific Research
[AD-A273410] p 2632 N94-25075

MILLIMETER WAVES

Adaptive data rate control TDMA systems as a rain attenuation compensation technique
p 2287 N94-22821

Advanced mobile satellite communications using COMETS satellite in MM-wave and Ka-band
p 2288 N94-22829

Planar varactor frequency multiplier devices with blocking barrier
[NASA-CASE-NPO-18428-1-CU] p 2310 N94-23821

Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-194858] p 2404 N94-24843

Passive millimeter-wave imaging p 2306 N94-25494

Advanced radiometric and interferometric milimeter-wave scene simulations p 2306 N94-25498

Simulation of a passive millimeter wave sensor
p 2346 N94-25499

A model-based approach for detection of objects in low resolution passive-millimeter wave images p 2442 N94-25507

MIMD (COMPUTERS)

The design of a standard message passing interface for distributed memory concurrent computers [DE94-002536] p 2446 N94-24538

MIMO (CONTROL SYSTEMS)

A homotopy algorithm for digital optimal projection control GASD-HADOC [NASA-CR-193881] p 2456 N94-24470

MIMO system identification for H(infinity) robust control: A frequency domain approach with minimum error bounds [ETN-94-95354] p 2476 N94-25262

Flight controller design using mixed H2/H infinity optimization with a singular H infinity constraint [AD-A273831] p 2191 N94-25525

MINERALOGY

Highland crust at the Apollo 14 site: A review p 2614 N94-24364

Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts p 2614 N94-24365

Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component p 2615 N94-24370

A geochemical study of acapulcoite and lodranite meteorites p 2605 N94-25358

MINERALS

Integrated hydrometallurgical jarosite treatment [PB93-217990] p 2232 N94-22983

Demonstration of the feasibility of an integrated x ray laboratory for planetary exploration [NASA-CR-177631] p 2598 N94-24832

MINIATURIZATION

Laser light scattering instrument advanced technology development [NASA-CR-194803] p 2349 N94-23286

MINICOMPUTERS

Fifty years of continuous improvement: What has DOE done for analytical chemistry? [DE94-002539] p 2234 N94-24548

MINIMAX TECHNIQUE

Tool sharing: An application of max-algebra, part 2 [MEMO-1122] p 2478 N94-22710

Tool sharing: An application of max-algebra, part 1 [MEMO-1108] p 2478 N94-22726

The least energy critical set [DE93-616820] p 2493 N94-25434

MINIMUM DRAG

Identification of integrated airframe: Propulsion effects on an F-15 aircraft for application to drag minimization [NASA-TM-4532] p 2188 N94-24106

MINORITIES

Strategies for recruiting additional African Americans into the NASA JSC summer faculty fellows program p 2585 N94-25362

MINORITY CARRIERS

Polycrystalline thin film materials and devices [DE93-018213] p 2389 N94-22862

MIR SPACE STATION

Orbital docking system centerline color television camera system test [NASA-TM-104783] p 2205 N94-24625

Concepts and embodiment design of a reentry recumbent seating system for the NASA Space Shuttle [NASA-CR-195504] p 2438 N94-24667

MIRA VARIABLES

Infrared and SiO maser observations of OH/IR stars [PB94-104890] p 2599 N94-24780

MIRRORS

Theoretical investigation of variable periodicity (graded) multilayers for hard x ray applications [NASA-CR-194824] p 2543 N94-23502

SALI chemical analysis of provided samples [NASA-CR-194138] p 2232 N94-23524

Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror p 2384 N94-23602

Investigate zero-stress replicated optics [NASA-CR-193889] p 2545 N94-24665

MISS DISTANCE

Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268

MISSILE CONFIGURATIONS

Holographic testing of composite propfans for a cruise missile wind tunnel model [NASA-TM-105271] p 2187 N94-23545

State-of-the-art engineering aeroprediction methods with emphasis on new semiempirical techniques for predicting nonlinear aerodynamics on complete missile configurations [AD-A273680] p 2171 N94-25411

MISSILE CONTROL

A mixed map/variable structure observer for target tracking p 2157 N94-24263

MISSILE RANGES

Joint Acoustic Propagation Experiment (JAPE-91) Workshop [NASA-CP-3231] p 2526 N94-24207

MISSILE TESTS

Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268

MISSILE TRAJECTORIES

Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268

MISSILES

An overview on the main available ceramic composites and their processing routes p 2255 N94-24229

MISSION ADAPTIVE WINGS

Reduction of structural loads using maneuver load control on the Advanced Fighter Technology Integration (AFTI)/F-111 mission adaptive wing [NASA-TM-4526] p 2168 N94-24295

MISSION PLANNING

Solar physics within ESA's planning p 2624 N94-22844

Lunar science strategy: Exploring the Moon with humans and machines p 2605 N94-23376

Mars 96 small rover: Mission strategy p 2606 N94-23381

A reference Martian mission for a long range rover p 2606 N94-23382

Early lunar rover mission studies p 2607 N94-23388

The robotic Mars rover p 2608 N94-23390

Mission and system concepts for Mars robotic precursor missions p 2608 N94-23391

Mission and system design of a long range rover mission p 2608 N94-23392

Balloon experiments at Mars 96 project p 2608 N94-23396

Evolving directions in NASA's planetary rover requirements and technology p 2370 N94-23414

Walking, jumping, and tumbling: More than one way to get around Mars p 2370 N94-23419

Strategies in transition p 2498 N94-23833

Mission operations update for the restructured Earth Observing System (EOS) mission p 2499 N94-23839

Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software p 2305 N94-23842

ATOS-1: Designing the infrastructure for an advanced spacecraft operations system p 2197 N94-23849

Operations concepts for Mars missions with multiple mobile spacecraft p 2501 N94-23852

NASDA satellite mission operation system and operations p 2501 N94-23854

Mission activities planning for a Hermes mission by means of AI-technology p 2502 N94-23858

A review of mission planning systems p 2503 N94-23866

The Mars mapper science and mission planning tool p 2503 N94-23867

Mission planning for an Earth observation low Earth orbiter: ERS-1 p 2503 N94-23868

Integrating payload design, planning, and control in the Dutch Utilisation Centre p 2207 N94-23869

Voyager uplink planning in the interstellar mission era p 2305 N94-23870

Science planning and sequencing for Cassini p 2504 N94-23871

Techniques and software for optimum and efficient mission science sequence development p 2504 N94-23872

A packet-based concept for spacecraft command planning p 2504 N94-23873

Connecting science and operations: The operations coordinator p 2504 N94-23874

The instant sequencing task: Toward constraint-checking a complex spacecraft command sequence interactively p 2504 N94-23875

AGENDA: A task organizer and scheduler p 2504 N94-23876

Generic mission planning concepts for space astronomy missions p 2505 N94-23878

A MOS for all seasons p 2505 N94-23879

An operations concept methodology to achieve low-cost mission operations p 2505 N94-23880

Mission engineering p 2505 N94-23881

Manned Space-laboratories Control Center (MSCC) operations concept p 2505 N94-23882

Making adaptable systems work for mission operations: A case study p 2506 N94-23883

An approach to the design of operations systems p 2506 N94-23884

Management of information for mission operations using automated keyword referencing p 2506 N94-23886

The FOT tool kit concept p 2507 N94-23889

GSMS and space views: Advanced spacecraft monitoring tools p 2507 N94-23890

Influence of a new generation of operations support systems on current spacecraft operations philosophy: The users feedback p 2507 N94-23894

The Advanced Technology Operations System: ATOS p 2508 N94-23897

Mission and science activity scheduling language p 2515 N94-23938

Toward lowering the cost of mission operations p 2519 N94-23960

New mission requirements methodologies for services provided by the Office of Space Communications p 2519 N94-23961

An intelligent planning and scheduling system for the HST servicing missions p 2520 N94-23964

Software reuse in spacecraft planning and scheduling systems p 2520 N94-23966

Planning: Management of predictability and uncertainty and keeping abreast of developments p 2520 N94-23967

Estimating the Deep Space Network modification costs to prepare for future space missions by using major cost drivers p 2520 N94-23968

The Far Ultraviolet (FUV) auroral imager for the Inner Magnetospheric Imager (IMI) mission: Options p 2209 N94-24453

A mission to Mercury and a mission to the moons of Mars [NASA-CR-195530] p 2195 N94-24619

Power generation technology options for a Mars mission [NASA-TM-106451] p 2220 N94-24681

WISPER: Wirless Space Power Experiment [NASA-CR-195538] p 2396 N94-24701

Near Earth asteroid rendezvous [NASA-CR-195518] p 2195 N94-24808

Ultraviolet, visible, and gravity astrophysics: A plan for the 1990's [NASA-NP-152] p 2603 N94-24973

PERCIVAL mission to Mars [NASA-CR-195541] p 2195 N94-24995

New Advances in Mission Planning and Rehearsal Systems [AGARD-LS-192] p 2521 N94-25008

Overall system concepts in mission planning p 2521 N94-25009

Human factors of mission planning systems: Theory and concepts p 2521 N94-25010

Human factors of mission planning systems: Applications and implementation p 2522 N94-25011

Computing techniques in mission planning p 2522 N94-25012

Mission planning and mission rehearsal systems: Displays and other interactive techniques p 2522 N94-25013

Ground based mission planning systems p 2522 N94-25014

In flight mission planning in the Copilote Electronique p 2522 N94-25015

Effect of power system technology and mission requirements on high altitude long endurance aircraft [NASA-CR-194455] p 2189 N94-25200

ROSAT mission planning using artificial intelligence methods [DLR-FB-93-14] p 2476 N94-25345

A comparative evaluation plan for the Maintenance, Inventory, and Logistics Planning (MILP) System Human-Computer Interface (HCI) p 2588 N94-25373

MIXERS

A comparison of free-space and fiber mixer performances [AD-A273558] p 2547 N94-25161

MIXING

Ethylene trace-gas techniques for high-speed flows [NASA-TM-106491] p 2169 N94-24335

MIXING LAYERS (FLUIDS)

Image analysis applications to mixing phenomena and turbulent dispersions [ECL-92-29] p 2317 N94-22971

Small rocket flowfield diagnostic chambers p 2210 N94-23030

A random distribution reacting mixing layer model [NASA-CR-194445] p 2187 N94-23552

Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160

Vortical structure in a forced plane mixing layer p 2331 N94-24162

Measurement of the volume mass by spontaneous Raman scattering. Study of turbulent fluctuations of mixing in a subsonic free jet. Measurements in supersonic wind tunnels [ISL-R-102/92] p 2339 N94-25462

MIXING LENGTH FLOW THEORY

Turbulence modeling for non-equilibrium flows p 2328 N94-24144

MIXING RATIOS
Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897
MIXTURES
Ultrastructure processing of macromolecular materials [AD-A273413] p 2258 N94-24782
MOBILE COMMUNICATION SYSTEMS
Proceedings of the Third International Mobile Satellite Conference (IMSC 1993) [NASA-CR-194516] p 2273 N94-22735
Worldwide survey of direct-to-listener digital audio delivery systems development since WARC-1992 p 2273 N94-22736
ESA personal communications and digital audio broadcasting systems based on non-geostationary satellites p 2273 N94-22737
Utilizing a TDRS satellite for direct broadcast satellite-radio propagation experiments and demonstrations p 2274 N94-22740
Aeronautical audio broadcasting via satellite p 2274 N94-22741
The MSAT spacecraft of Telesat Mobile Inc. p 2207 N94-22742
Adaptive digital beamforming for a CDMA mobile communications payload p 2274 N94-22743
Electrical performance of wire mesh for spacecraft deployable reflector antennas p 2275 N94-22744
Adaptive array antenna for satellite cellular and direct broadcast communications p 2275 N94-22745
SAW based systems for mobile communications satellites p 2275 N94-22746
US domestic and international regulatory issues p 2275 N94-22748
International organizations to enable world-wide mobile satellite services p 2275 N94-22749
Use of negotiated rulemaking in developing technical rules for low-Earth orbit mobile satellite systems p 2276 N94-22750
The provision of spectrum for feeder links of non-geostationary mobile satellites p 2276 N94-22751
The possibilities for mobile and fixed services in the 20/30 GHz frequency bands p 2276 N94-22752
Use of the 30/20 GHz band by multipurpose satellite systems p 2276 N94-22753
Power attenuation characteristics as switch-over criterion in personal satellite mobile communications p 2277 N94-22756
Integration of mobile satellite and cellular systems p 2277 N94-22757
Interworking evolution of mobile satellite and terrestrial networks p 2277 N94-22758
Interworking and integration of the Inmarsat Standard-M with Pan-European GSM system p 2277 N94-22759
Architectures and protocols for an integrated satellite-terrestrial mobile system p 2277 N94-22760
Handover procedures in integrated satellite and terrestrial mobile systems p 2277 N94-22761
MSAT and cellular hybrid networking p 2278 N94-22762

Systems implications of L-band fade data statistics for LEO mobile systems p 2284 N94-22799
The Westinghouse Series 1000 Mobile Phone: Technology and applications p 2284 N94-22800
First satellite mobile communication trials using BLQS-CDMA p 2284 N94-22801
Channel and terminal description of the ACTS mobile terminal p 2284 N94-22802
Low cost coherent demodulation for mobile satellite terminals p 2284 N94-22803
Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805
Estimation of frequency offset in mobile satellite modems p 2285 N94-22807
A pattern jitter free AFC scheme for mobile satellite systems p 2285 N94-22809
A CDMA synchronisation scheme p 2285 N94-22810
A high quality voice coder with integrated echo canceller and voice activity detector for mobile satellite applications p 2286 N94-22812
Performance of the unique-word-reverse-modulation type demodulator for mobile satellite communications p 2286 N94-22813
Diversity reception for advanced multi-satellite networks: A CDMA approach p 2286 N94-22816
System services and architecture of the TMI satellite mobile data system p 2286 N94-22817
A comparison between coherent and noncoherent mobile systems in large Doppler shift, delay spread, and C/I environment p 2287 N94-22818
Pseudo-coherent demodulation for mobile satellite systems p 2287 N94-22819
Transmission over EHF mobile satellite channels p 2287 N94-22820
Adaptive data rate control TDMA systems as a rain attenuation compensation technique p 2287 N94-22821
SATCOM simulator speeds MSS deployment and lowers costs p 2287 N94-22822
Development of a multilayer interference simulation program for MSS systems p 2287 N94-22823
Handover aspects for a Low Earth Orbit (LEO) CDMA Land Mobile Satellite (LMS) system p 2288 N94-22824
Study on networking issues of medium earth orbit satellite communications systems p 2288 N94-22825
The design and networking of dynamic satellite constellations for global mobile communication systems p 2288 N94-22826
Low earth orbit satellite/terrestrial mobile service compatibility p 2288 N94-22827
A practical system for regional mobile satellite services p 2288 N94-22828
Advanced mobile satellite communications using COMETS satellite in MM-wave and Ka-band p 2288 N94-22829
Low cost antennas for MSAT vehicular applications p 2289 N94-22830
K- and Ka-band mobile-vehicular satellite-tracking reflector antenna system for the NASA ACTS mobile terminal p 2289 N94-22831
An active K/Ka-band antenna array for the NASA ACTS mobile terminal p 2289 N94-22832
Microstrip monopulse antenna for land mobile communications p 2289 N94-22833
Isolated and coupled superquadric loop antennas for mobile communications applications p 2289 N94-22834
L-band mobile terminal antennas for helicopters p 2289 N94-22835
Satellite communications systems and technology. Volume 1: Analytical chapters [NASA-TM-109398] p 2293 N94-23627
MOBILITY
Conceptual design and architecture of hexapod robotic vehicles for the (L)OVLA project p 2369 N94-23405
Mobility analysis, simulation, and scale model testing for the design of wheeled planetary rovers p 2370 N94-23425
Preliminary results on time-varying feedback stabilization of a nonholonomic car-like mobile robot [INRIA-RR-1512] p 2475 N94-24963
MODAL RESPONSE
Modal test of the Brazilian satellite launcher (VLS) configuration burn-out of the first stage p 2156 N94-24257
Maximum likelihood modal parameter identification and realization of stochastic systems p 2157 N94-24265
MODELS
An experimental investigation of the effect of upper surface blowing on dynamic stall [NASA-CR-194863] p 2165 N94-22894
Flexible framework for contingent information systems modelling [PB93-220549] p 2589 N94-23095
Designers' models of the human-computer interface p 2433 N94-24188
Systems engineering: A formal approach. Part 3: Modeling methods [PB94-101409] p 2456 N94-24513
MODEMS
Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805
Estimation of frequency offset in mobile satellite modems p 2285 N94-22807
A comparison between coherent and noncoherent mobile systems in large Doppler shift, delay spread, and C/I environment p 2287 N94-22818
MODULARITY
Laser light scattering instrument advanced technology development [NASA-CR-194803] p 2349 N94-23286
Modular approach to project management [PB94-118833] p 2586 N94-24528
A type-theoretic approach to higher-order modules with sharing [AD-A273566] p 2458 N94-24693
MODULATION
Direct digital RF synthesis and modulation for MSAT mobile applications p 2285 N94-22804
An introduction to digital modulation and OFDM techniques [BBC-RD-1993/10] p 2295 N94-24086
Automatic modulation recognition based on spatial pattern classification using artificial neural networks [CTN-94-60897] p 2296 N94-24115
Modulation and synchronization technique for MF-TDMA system [NASA-CR-194448] p 2304 N94-25266
MOISTURE
Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2 [NASA-CR-193893] p 2229 N94-24224
MOISTURE CONTENT
An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel [NASA-TM-106471] p 2166 N94-23299
Spatial and temporal variability of soil temperature, moisture and surface soil properties [NASA-CR-194109] p 2401 N94-23337
Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4 [PB94-111721] p 2386 N94-23734
Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991 [PB93-230654] p 2386 N94-23755
Water cycle research associated with the CaPE hydrometeorology project (CHymP p 2416 N94-24414
Drying deformable media: Kinetics, shrinkage and stresses [ETN-94-95314] p 2236 N94-25302
MOLECULAR BEAM EPITAXY
Ga delta-doping layers in silicon [PB93-224632] p 2561 N94-23222
Method of forming silicon structures with selectable optical characteristics [NASA-CASE-NPO-18625-1-CU] p 2563 N94-23972
On the origin of 1/f noise in epitaxial GaAs [ISBN-9-09-006067-7] p 2566 N94-25297
MOLECULAR BEAMS
Theoretical studies of a molecular beam generator [NASA-CR-194779] p 2540 N94-23485
MOLECULAR BIOLOGY
Applications of the Aurora parallel PROLOG system to computational molecular biology [DE93-041166] p 2420 N94-23468
MOLECULAR CLOUDS
Magnetic field dissipation and contraction of molecular clouds [REPT-337] p 2603 N94-24976
CO-to-H2 conversion factor in dwarf irregular galaxies [REPT-333] p 2603 N94-24985
High spatial resolution observations of CO in CRL 618 [REPT-334] p 2604 N94-24986
The Nobeyama millimeter array survey for protoplanetary disks around protostar candidates and T Tauri stars in Taurus [REPT-336] p 2604 N94-24987

MOLECULAR DIFFUSION
A two-dimensional dispersion module for the TOUGH2 simulator
[DE94-002262] p 2335 N94-24655
MOLECULAR DYNAMICS
Fracture simulations via massively parallel molecular dynamics
[DE93-040159] p 2374 N94-22871
Calculations of Bose-Einstein correlations from Relativistic Quantum Molecular Dynamics
[DE94-000794] p 2569 N94-23453
Momentum loss in proton-nucleus and nucleus-nucleus collisions
[NASA-TP-3405] p 2540 N94-24305
The torsion space nucleic acids molecular mechanics program DUPLEX: Surveying conformation space by potential energy minimization
[DE94-002441] p 2563 N94-24567
Integral equations for the microstructures of supercritical fluids
[DE94-002460] p 2535 N94-24569
Free energy profiles for Li(+) and I(-) ions approaching Pt(100) surface: A molecular dynamics study
[AD-A273455] p 2536 N94-24675
Structures of Cl(-)(H2O)(n) and F(-)(H2O)(n) (n equal to 2,3...15) clusters: Molecular dynamics computer simulations
[AD-A273474] p 2537 N94-24940
MOLECULAR EXCITATION
Contribution of all excited states to ZFS of a (sup 6) S-state
[DE93-617007] p 2568 N94-25483
MOLECULAR FLOW
Molecular gas dynamics applied to low-thrust propulsion p 2214 N94-23053
MOLECULAR GASES
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
MOLECULAR INTERACTIONS
Integral equations for the microstructures of supercritical fluids
[DE94-002460] p 2535 N94-24569
MOLECULAR IONS
Examination of the response capacity of a silicon pixel detector for ions and molecules in the energy area 100 to 300 keV
[MPE-241] p 2346 N94-25415
MOLECULAR SPECTROSCOPY
Laboratory detection of C5S by pulsed-discharge-nozzle Fourier-transform microwave spectroscopy
[JTN-94-80519] p 2235 N94-24984
CO-to-H2 conversion factor in dwarf irregular galaxies
[REPT-333] p 2603 N94-24985
High spatial resolution observations of CO in CRL 618
[REPT-334] p 2604 N94-24986
The Nobeyama millimeter array survey for protoplanetary disks around protostar candidates and T Tauri stars in Taurus
[REPT-336] p 2604 N94-24987
MOLECULAR STRUCTURE
Measuring the dynamics of structural changes in biological macromolecules from light scattering data
p 2422 N94-24426
Interactions between organized, surface-confined monolayers and vapor-phase probe molecules. 7: Comparison of self-assemblying organomercaptan monolayers deposited on gold from liquid and vapor phases
[AD-A273196] p 2535 N94-24555
Center for advanced electrical and structural polymers
[AD-A273415] p 2259 N94-24783
Synthesis of molecular wires by a novel divergent/convergent approach
[AD-A273332] p 2537 N94-25087
On the mechanism of action of 3',5'-cyclic adenosine monophosphate: A study of four- and five-coordinated phosphorus compounds, modelling the activated state of cAMP
[ISBN-9-03-860222-7] p 2226 N94-25238
Contribution of all excited states to ZFS of a (sup 6) S-state
[DE93-617007] p 2568 N94-25483
MOLECULAR WEIGHT
Phenylethynl-terminated poly(arylene ethers)
[NASA-CASE-LAR-14797-1] p 2253 N94-23307
Measuring the dynamics of structural changes in biological macromolecules from light scattering data
p 2422 N94-24426
MOLECULES
Measuring the dynamics of structural changes in biological macromolecules from light scattering data
p 2422 N94-24426
Interactions between organized, surface-confined monolayers and vapor-phase probe molecules. 7: Comparison of self-assemblying organomercaptan monolayers deposited on gold from liquid and vapor phases
[AD-A273196] p 2535 N94-24555
Synthesis and characterization of two-dimensional molecular recognition interfaces
[AD-A273177] p 2536 N94-24729
MOLTEN SALTS
Molten salt reactor for potentiostatic electroplating
[AD-D016020] p 2258 N94-24720
X ray diffraction analysis of electrodeposited beta-tantalum
[AD-A273254] p 2249 N94-25142
MOLYBDENUM
Soft x ray optics by pulsed laser deposition
[NASA-CR-195139] p 2546 N94-24967
Surface compositional variations of Mo-47Re alloy as a function of temperature
[NASA-TP-3402] p 2245 N94-25117
MOLYBDENUM ALLOYS
The history of development of molybdenum alloys for structural applications
[DE94-000389] p 2239 N94-22958
Evaluation of A5Si3Z(x) intermetallics for use as high temperature structural materials
[DE93-041127] p 2227 N94-22977
MOLYBDENUM COMPOUNDS
Design of a resistojet for Space Station Freedom
[NASA-CR-195506] p 2221 N94-24979
MOLYBDENUM SULFIDES
Tribological characteristics of ball bearings lubricated with a sputtered molybdenum disulphide film in a vacuum under a high thrust load p 2355 N94-23992
The tribology of some MoS2-lubricated engineering ceramics p 2356 N94-23993
MOMENTS OF INERTIA
Torque equilibrium attitudes for the Space Station
p 2208 N94-24449
Numerical analysis of the motion of a rigid body with an attached spring-mass-damper
[AD-A273825] p 2379 N94-25520
MOMENTUM
Momentum and coordinate space three-nucleon potentials
[DE93-040868] p 2531 N94-22951
Momentum loss in proton-nucleus and nucleus-nucleus collisions
[NASA-TP-3405] p 2540 N94-24305
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476
MOMENTUM THEORY
Momentum loss in proton-nucleus and nucleus-nucleus collisions
[NASA-TP-3405] p 2540 N94-24305
Unified approach for incompressible flows
p 2342 N94-25356
MOMENTUM TRANSFER
Momentum loss in proton-nucleus and nucleus-nucleus collisions
[NASA-TP-3405] p 2540 N94-24305
Proton spin: The role of quark-gluon and hadron degrees of freedom
[DE93-616867] p 2538 N94-25341
MONAURAL SIGNALS
Head related transfer function pseudo-stereophony
[NASA-CASE-ARC-11919-1-NP] p 2525 N94-23312
MONITORS
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200
Particle size measurement for the control of industrial crystallizers
[PB94-119104] p 2562 N94-23766
Mars Observer screen display design for a multimission environment p 2197 N94-23888
MONOCHROMATORS
Modifications to 8x8 dynamical theory: Polarizations redefined according to x ray diffraction convention
[DE94-001290] p 2560 N94-23187
Proposed additions to the SHADOW ray-tracing code for general-asymmetric perfect-crystal optics
[DE94-001291] p 2560 N94-23188
MONOMERS
The use of expanding monomers in carbon fibre composites
[ISBN-0-315-83550-8] p 2226 N94-22890
Di(hydroxyphenyl)- 1,2,4-triazole monomers
[NASA-CASE-LAR-14440-2] p 2252 N94-23075
Di(hydroxyphenyl)- benzimidazole monomers
[NASA-CASE-LAR-14643-2] p 2253 N94-23305
Phenylethynl-terminated poly(arylene ethers)
[NASA-CASE-LAR-14797-1] p 2253 N94-23307
Method of determining shear stress employing a monomer-polymer laminate structure
[NASA-CASE-LAR-14654-2] p 2375 N94-23308
Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763
STM studies of LB deposited alkyl substituted polyaniline and its corresponding monomer
[AD-A273553] p 2257 N94-24562
High temperature adhesive
[AD-D016019] p 2258 N94-24737
Synthesis of polyphenylenes via Bergman cyclization of enediyne monomers
[AD-A273298] p 2260 N94-24924
Curing phthalonitriles with acid
[AD-D015996] p 2261 N94-25054
Synthesis of molecular wires by a novel divergent/convergent approach
[AD-A273332] p 2537 N94-25087
MONOMOLECULAR FILMS
Chemically sensitive interfaces on SAW devices
[DE94-001832] p 2526 N94-23718
Synthesis and characterization of two-dimensional molecular recognition interfaces
[AD-A273177] p 2536 N94-24729
MONOPROPELLANTS
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies
p 2371 N94-24427
MONOPULSE ANTENNAS
Microstrip monopulse antenna for land mobile communications p 2289 N94-22833
Beam-waveguide antenna servo design issues for tracking low earth-orbiting satellites
p 2292 N94-23268
MONOPULSE RADAR
Method and apparatus of generating sum or difference signals corresponding to an apparent beam in a monopulse radar system
[AD-D015998] p 2302 N94-25056
Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors
[AD-D016005] p 2302 N94-25058
MONSOONS
Climate variability in a coupled GCM. Part 2: The Indian Ocean and monsoon
[MPIM-104] p 2401 N94-23159
MONTE CARLO METHOD
Analysis of a proposed Compton backscatter imaging technique
[DE93-040537] p 2371 N94-22935
Coherence lost? Not-so-fast escapes from the in-phase attractor of a set of globally coupled nonlinear oscillators
[DE94-000799] p 2557 N94-22940
Molecular gas dynamics applied to low-thrust propulsion p 2214 N94-23053
Monte Carlo climate change forecasts with a global coupled ocean-atmosphere model
[MPIM-97] p 2407 N94-23156
Accuracy control in Monte Carlo radiative calculations
p 2321 N94-23639
Thermal analysis of combinatorial solid geometry models using SINDA p 2323 N94-23650
Integral equations for the microstructures of supercritical fluids
[DE94-002460] p 2535 N94-24569
Bounds and simulation results of 32-ary and 64-ary quadrature amplitude modulation for broadband-ISDN via satellite
[NASA-TM-106484] p 2202 N94-25095
Effect of high frequency field on the transport properties of superlattice
[DE93-617047] p 2568 N94-25447
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476
MOORING
Vertical motion in the SYNOP central array
[AD-A273593] p 2418 N94-24795
MORPHOLOGY
Electric field-mediated processing of polymer blend solutions p 2223 N94-24341
Polymer morphologh p 2226 N94-24353
Hydraulics and morphology of mountain rivers: A literature survey. Communications on hydraulic and geotechnical engineering
[PB94-110772] p 2388 N94-24636
Morphology of highly textured polyethylene/polyethylene- propylene semicrystalline diblock copolymers
[AD-A273683] p 2263 N94-25413
MOSAICS
Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror
p 2384 N94-23602

MOSSBAUER EFFECT
Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3
[DE93-613824] p 2566 N94-25332

MOTION PERCEPTION
Perception in flight: Shape and motion perception, space perception, spatial orientation, and visual vestibular interaction p 2429 N94-23979
Extracting heading and temporal range from optic flow: Human performance issues p 2442 N94-25510

MOTION SICKNESS
Increasing accuracy in the assessment of motion sickness: A construct methodology
[NASA-TM-108797] p 2420 N94-23088
Perception in flight: Shape and motion perception, space perception, spatial orientation, and visual vestibular interaction p 2429 N94-23979
Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt?
[NASA-CR-188256] p 2427 N94-24227

MOTION SIMULATION
Reach performance while wearing the Space Shuttle launch and entry suit during exposure to launch accelerations p 2436 N94-24204

MOTION SIMULATORS
Future directions in flight simulation: A user perspective p 2162 N94-25101

MOTION STABILITY
Projectile transverse motion and stability in electromagnetic induction launchers
[DE94-001557] p 2198 N94-23210

MOUNTAINS
Hydraulics and morphology of mountain rivers: A literature survey. Communications on hydraulic and geotechnical engineering
[PB94-110772] p 2388 N94-24636
GPS survey of the western Tien Shan
[NASA-CR-195174] p 2175 N94-24826

MSAT
The MSAT spacecraft of Telesat Mobile Inc. p 2207 N94-22742
MSAT and cellular hybrid networking p 2278 N94-22762
Design and implementation considerations of a MSAT packet data network p 2280 N94-22778
The Westinghouse Series 1000 Mobile Phone: Technology and applications p 2284 N94-22800
Direct digital RF synthesis and modulation for MSAT mobile applications p 2285 N94-22804
A practical system for regional mobile satellite services p 2288 N94-22828
Low cost antennas for MSAT vehicular applications p 2289 N94-22830

MULLITES
Metal-mullite reactions
[DE94-002038] p 2244 N94-23811

MULTICHANNEL COMMUNICATION
Electrical performance of wire mesh for spacecraft deployable reflector antennas p 2275 N94-22744
Fault tolerant onboard packet switch architecture for communication satellites: Shared memory per beam approach
[NASA-TM-106397] p 2201 N94-23567
Advanced technology for a satellite multichannel demultiplexer/demodulator
[NASA-CR-194435] p 2202 N94-23631

MULTIGRID METHODS
A multigrid multiblock solver for compressible turbulent flow
[MEMO-1125] p 2315 N94-22713
Local grid refinement method for the euler equations
[PB93-223329] p 2317 N94-22985
The Sixth Copper Mountain Conference on Multigrid Methods, part 1
[NASA-CP-3224-PT-1] p 2482 N94-23673
A multigrid solver for the semiconductor equations p 2482 N94-23674
FAS multigrid calculations of three dimensional flow using non-staggered grids p 2341 N94-23675
Multigrid and cyclic reduction applied to the Helmholtz equation p 2304 N94-23676
Uniform convergence of multigrid V-cycle iterations for indefinite and nonsymmetric problems p 2482 N94-23677
A multilevel cost-space approach to solving the balanced long transportation problem p 2483 N94-23678
Domain decomposition methods for nonconforming finite element spaces of Lagrange-type p 2483 N94-23680
Implementing abstract multigrid or multilevel methods p 2483 N94-23682
Numerical solution of flame sheet problems with and without multigrid methods p 2237 N94-23683
A mixed method Poisson solver for three-dimensional self-gravitating astrophysical fluid dynamical systems p 2484 N94-23684
Multigrid methods for differential equations with highly oscillatory coefficients p 2484 N94-23685
Application of multigrid methods to the solution of liquid crystal equations on a SIMD computer p 2484 N94-23686
An adaptive multigrid model for hurricane track prediction p 2416 N94-23687
Relaxation schemes for Chebyshev spectral multigrid methods p 2484 N94-23688
Multigrid methods for a semilinear PDE in the theory of pseudoplastic fluids p 2341 N94-23689
A comparison of locally adaptive multigrid methods: LDC, FAC and FIC p 2485 N94-23692
Compressible turbulent flow simulation with a multigrid multiblock method p 2342 N94-23694
A nonconforming multigrid method using conforming subspaces p 2485 N94-23695
Multigrid method for integral equations and automatic programs p 2464 N94-23696
Toward large eddy simulation of turbulent flow over an airfoil p 2172 N94-24150
An integrated runtime and compile-time approach for parallelizing structured and block structured applications
[NASA-CR-191554] p 2458 N94-24740
Lubrication in cold rolling: Numerical simulation using multigrid techniques
[ISBN-9-09-005313-1] p 2262 N94-25230

MULTIMEDIA
Transparent data service with multiple wireless access p 2276 N94-22754
Internetworking satellite and local exchange networks for personal communications applications p 2276 N94-22755
NASDA's Advanced On-Line System (ADOLIS) p 2509 N94-23903
Service description of communication systems supporting multi-media multi-user applications
[PB94-110855] p 2299 N94-24650
Performance measurements of the multimedia testbed on Mach 3.0: Experience writing real-time device drivers, servers, and applications
[AD-A273600] p 2460 N94-24932
Considerations regarding the deployment of hypermedia at JSC p 2595 N94-25366
A multimedia adult literacy program: Combining NASA technology, instructional design theory, and authentic literacy concepts p 2585 N94-25384

MULTIPATH TRANSMISSION
Adaptive digital beamforming for a CDMA mobile communications payload p 2274 N94-22743
ROCSAT-1 telecommunication experiments p 2279 N94-22770
Land mobile satellite propagation measurements in Japan using ETS-V satellite p 2282 N94-22790
K-band mobile propagation measurements using ACTS p 2283 N94-22792
Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793
A study of satellite motion-induced multipath phenomena p 2283 N94-22794
Diversity reception for advanced multi-satellite networks: A CDMA approach p 2286 N94-22816
Transmission over EHF mobile satellite channels p 2287 N94-22820
Global acoustic mapping of ocean temperatures (GAMOT)
[AD-A273387] p 2418 N94-24719
Conveying digital data in noisy, unstable, multipath environments
[AD-D015980] p 2301 N94-25038
Measurements and modeling of multitone, low-frequency acoustic data from the Arraial do Cabo range
[AD-A273406] p 2530 N94-25073
Northern Exposure 1992: An investigation of transauroral HF radio skywave propagation
[AD-A273363] p 2303 N94-25089

MULTIPLE ACCESS
Transparent data service with multiple wireless access p 2276 N94-22754
A protocol for satellite access via use of spot-beams p 2286 N94-22811
DS-SSMA capacity for a mobile satellite system p 2286 N94-22814
Multi-access laser communications terminal
[NASA-CR-191251] p 2295 N94-23830

MULTIPLE DOCKING ADAPTERS
Docking mechanisms: An overview of different systems p 2357 N94-24004

MULTIPLEXING
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1
[AD-A271081] p 2348 N94-23123
Design and implementation issues of end-to-end protocols in high-speed networks
[PB94-110905] p 2467 N94-23752
Digital data, composite video multiplexer and demultiplexer boards for an IBM PC/AT compatible computer p 2447 N94-25377
Modeling of the ground-to-SSFMB link networking features using SPW p 2306 N94-25381

MULTIPLICATION
Implementation and parallelization of fast matrix multiplication for a fast Legendre transform
[DE94-002184] p 2478 N94-22975

MULTIPLIERS
Radar target discrimination systems using artificial neural network topology
[AD-D015984] p 2301 N94-25041

MULTIPROCESSING (COMPUTERS)
A dataflow analysis tool for parallel processing of algorithms
[NASA-TM-109054] p 2448 N94-23086
Distributed Operating Systems and Mach. Proceedings of the Spring 1992 Graduate Seminar on Distributed Systems
[PB93-224905] p 2449 N94-23103
Installation of an artificial neural network on distributed memory microprocessors
[ETN-94-95175] p 2471 N94-23152
A parallel PROLOG system for distributed memory multiprocessor
[ETN-94-95173] p 2465 N94-23167
Towards real-time stereovision systems for planetary missions p 2370 N94-23422
Linear time algorithm to schedule trees with communication delays optimally on two machines
[PB93-237782] p 2451 N94-23441
Preemptive scheduling in a two-stage multiprocessor flow shop is Np-hard
[PB94-111648] p 2467 N94-23756
Three, four, five, six or the complexity of scheduling with communication delays
[PB94-111630] p 2467 N94-23767
Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software p 2305 N94-23842
The design of the EMPS multiprocessor executive for distributed computing
[ETN-94-95336] p 2468 N94-25062
Multiprocessor scheduling with communication delays
[ETN-94-95346] p 2468 N94-25221

MULTIPROGRAMMING
Exercises in multiprogramming
[PB94-101458] p 2454 N94-23768

MULTISENSOR APPLICATIONS
Multi-sensoral approach to night flight: Perceptive and Cognitive limitations p 2432 N94-23981
Radar E-O image fusion p 2306 N94-25503

MULTISPECTRAL BAND SCANNERS
Method for selection of wavelength bands for multispectral classification
[PB93-204378] p 2388 N94-24741

MULTISPECTRAL PHOTOGRAPHY
MAMS data for the Convection and Moisture Experiment (CAMEX)
[NASA-TM-108435] p 2409 N94-24080

MULTISTAGE ROCKET VEHICLES
Modal test of the Brazilian satellite launcher (VLS) configuration burn-out of the first stage p 2156 N94-24257

MULTISTATIC RADAR
Calibration network intended for phase-array antennas at 3 GHz
[PB93-204352] p 2297 N94-24530

MULTIVARIABLE CONTROL
Reduced-order modelling and control of a class of systems for which balanced truncation is Hankel-norm optimal
[OUEL-1922/92] p 2472 N94-23163
A reliable algorithm for optimal control synthesis
[NASA-CR-194809] p 2472 N94-23332
Parametric uncertainty reduction in robust multivariable control
[AD-A273412] p 2460 N94-24927
On-line evaluation of multiloop digital controller performance p 2163 N94-25105
Kernels of anti-causal operators and the multivariable generalized predictive control problem
[MATHS-REPT-A-191] p 2476 N94-25428

MULTIVARIATE STATISTICAL ANALYSIS
Parametric uncertainty reduction in robust multivariable control
[AD-A273412] p 2460 N94-24927
Topics in probability and dynamics
[AD-A273543] p 2496 N94-24931

MUON SPIN ROTATION
Interplay of magnetic and superconducting heavy fermion ground states
[DE94-000680] p 2240 N94-23003
Muon spin relaxation studies of the interplay between magnetism and superconductivity in heavy fermion systems
[DE94-000700] p 2559 N94-23006

MUONS
A measurement of the forward-backward asymmetry and sin(sup 2)(theta)(sub W) from the process Z(sup 0) (yields) (mu)(sup +)(mu)(sup (minus)) at (radical)s = 1.8 TeV
[DE94-001908] p 2532 N94-23018
Low mass muon pair production in 450 GeV p-Be collisions
[PB94-110699] p 2533 N94-23746
New evaluation of hadronic contributions to the anomalous magnetic moment of charged leptons
[DE93-634394] p 2536 N94-24844
A research of possibility for negative muon production by a low energy electron beam accompanying ion beam
[NIFS-266] p 2536 N94-24868
The L3 visualization system and its use in the Z(zero) line shape analysis
[ETN-94-95382] p 2537 N94-25231

MUSCLES
Cellular and tissue injury during nonfreezing cold injury and frostbite
[AD-A270883] p 2423 N94-22732
Left ventricular hypertrophy and athlete's heart
p 2424 N94-23321
Skeletal muscle metabolism in hypokinetic rats
[NASA-CR-195082] p 2420 N94-24124
Microinjection of the Yersinia YopE cytotoxin in mammalian cells induces actin microfilament disruption
[FOA-B-40418-4.4] p 2421 N94-24290
Loading, electromyograph, and motion during exercise
p 2427 N94-25359
Loading, electromyograph, and motion during exercise
p 2427 N94-25380

MUSCULAR STRENGTH
Responses to LBNP in men with varying profiles of strength and aerobic capacity: Implications for flight crews
[NASA-TP-3346] p 2426 N94-23530
NASA project 1: Full-body dynamometer
[NASA-CR-195507] p 2438 N94-24331

MUSCULOSKELETAL SYSTEM
Skeletal muscle metabolism in hypokinetic rats
[NASA-CR-195082] p 2420 N94-24124

N

NAP-OF-THE-EARTH NAVIGATION
Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505

NARROWBAND
Conductors with small Fermi energies and small gap energies
[DE93-040887] p 2561 N94-23432
Investigation of Raman beam cleanup and phase conjugation
[AD-A273157] p 2545 N94-24672

NASA PROGRAMS
NASA patent abstracts bibliography: A continuing bibliography. Section 2: Indexes (supplement 44)
[NASA-SP-7039(44)-SECT-2] p 2590 N94-23712
NASA printing, duplicating, and copying management handbook
[NASA-NHB-1490.5] p 2590 N94-23971
NASA high performance computing and communications program
[NASA-TM-4554] p 2591 N94-24337
A compilation of technology spinoffs from the US Space Shuttle Program p 2578 N94-24424
Access to space studies p 2199 N94-24434
Suddenly, tomorrow came... A history of the Johnson Space Center
[NASA-SP-4307] p 2631 N94-24584
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 20: The use of selected information products and services by US aerospace engineers and scientists: Results of two surveys
[NASA-TM-109022] p 2592 N94-24649
Management. A bibliography for NASA managers
[NASA-SP-7500(27)] p 2586 N94-24708
NASA tech brief evaluations
[NASA-CR-195150] p 2597 N94-24829
NASA STI program database: Journal coverage (1990-1992)
[NASA-TM-109720] p 2593 N94-25168
National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 1
[NASA-CR-188271-VOL-1] p 2632 N94-25348
Strategies for recruiting additional African Americans into the NASA JSC summer faculty fellows program
p 2585 N94-25362

NASA SPACE PROGRAMS
Solar physics within NASA's planning
p 2625 N94-22845
The birth of NASA: The diary of T. Keith Glennan
[NASA-SP-4105] p 2630 N94-23333
Past US studies and developments for planetary rovers p 2369 N94-23375
Strategies in transition p 2498 N94-23833
Future trends in NASA space operations
p 2498 N94-23836
Ultraviolet, visible, and gravity astrophysics: A plan for the 1990's
[NASA-NP-152] p 2603 N94-24973
The future of manned spaceflight
p 2195 N94-25067
New Ways Of Doing Business (NWODB) cost quantification analysis
[NASA-CR-195186] p 2586 N94-25197

NATIONAL AEROSPACE PLANE PROGRAM
A conceptual design of an unmanned test vehicle using an airbreathing propulsion system
[NASA-CR-195550] p 2189 N94-25085

NATIONAL AIRSPACE SYSTEM
Conflict-free trajectory planning for air traffic control automation
[NASA-TM-108790] p 2174 N94-25272

NATIONAL LAUNCH VEHICLE PROGRAM
Flame trench analysis of NLS vehicles
p 2199 N94-23249

NATURAL GAS
Development of durable high-temperature catalysts for natural gas combustion
[PB93-226447] p 2232 N94-23477
Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion
[PB94-109873] p 2187 N94-23709
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
Fundamental study of NO(x) control in catalytic combustion
[PB94-112323] p 2398 N94-23818
Near-surface seismic imaging
[PB94-119096] p 2404 N94-24647
Modelling of premixed laminar flames
[ETN-94-95317] p 2236 N94-25284

NAVIER-STOKES EQUATION
A multigrid multiblock solver for compressible turbulent flow
[MEMO-1125] p 2315 N94-22713
CFD analyses of combustor and nozzle flowfields
p 2210 N94-23033
Heat transfer in rocket combustion chambers
p 2214 N94-23051
Computational fluid dynamic modelling of cavitation
p 2215 N94-23060
Reliability enhancement of Navier-Stokes codes through convergence enhancement p 2216 N94-23064
CFD modeling of microwave electrothermal thrusters
p 2216 N94-23066
Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades
[PB93-226223] p 2317 N94-23114
POISs3: A 3D poisson smoother of structured grids
[PB93-226231] p 2318 N94-23115
Computational study of GA(W)-1: Airfoil near stall
[PB93-226249] p 2165 N94-23116
Tracking sharp interface of two fluids by the CIP (Cubic-Interpolated Propagation) scheme
[DE93-508322] p 2319 N94-23460
Unsteady jet flow computation towards noise prediction
[NASA-CR-194449] p 2153 N94-23553
An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554
Numerical analysis of a vortex controlled diffuser
p 2324 N94-23659
An application of small-gap equations in sealing devices p 2325 N94-23668
A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670
Multi-grid domain decomposition approach for solution of Navier-Stokes equations in primitive variable form
p 2341 N94-23693
Efficient interpolation of velocity and flux components defined on 2- and 3-dimensional non-cartesian grids
[PB94-118619] p 2486 N94-23757
Drag reduction at a plane wall p 2327 N94-24140
On the large eddy simulation of turbulent flows in complex geometry p 2329 N94-24148
Transition to turbulence in an elliptic vortex
p 2331 N94-24161
On the dynamics of approximating schemes for dissipative nonlinear equations p 2332 N94-24168
Discrete sensitivity derivatives of the Navier-Stokes equations with a parallel Krylov solver
[NASA-TM-106481] p 2265 N94-24301
Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis
[NASA-CR-194795] p 2335 N94-24640
Solution of the discretized incompressible Navier-Stokes equations with iterative methods
[PB94-118635] p 2335 N94-24641
Carrying the mass flux terms exactly in the first and second moment equations of compressible turbulence
[NASA-CR-191568] p 2335 N94-24712
Numerical solutions of the complete Navier-Stokes equations
[NASA-CR-194780] p 2337 N94-24858
Computational fluid mechanics
[NASA-CR-194765] p 2337 N94-24859
Triangular spectral elements for incompressible fluid flow
[NASA-CR-191588] p 2490 N94-24914
Turbulence models and Reynolds analogy for two-dimensional supersonic compression ramp flow
[NASA-TM-106474] p 2337 N94-25119
Development and application of new algorithms for the simulation of viscous compressible flows with moving bodies in three dimensions
[AD-A273514] p 2338 N94-25157
A continuing search for a near-perfect numerical flux scheme. Part 1: AUSM+
[NASA-TM-106524] p 2338 N94-25180
Two-dimensional CFD modeling of wave rotor flow dynamics
[NASA-TM-106261] p 2189 N94-25185
A numerical investigation of the artificial compressibility method for the solution of the Navier-Stokes equations
[CRANFIELD-AERO-9213] p 2340 N94-25486

NAVIGATION
HERACLITUS, phase 1. Harbour Entrance of Rotterdam Radar based Current Related Information for Traffic Guidance of Ships: Feasibility of deriving current profile data from sea surface observations in the Rotterdam (Netherlands) port entrance
[BCRS-93-04] p 2417 N94-24107
NASA LaRC Workshop on Guidance, Navigation, Controls, and Dynamics for Atmospheric Flight, 1993
[NASA-CP-10127] p 2162 N94-25096

NAVIGATION AIDS
Lunar rover navigation concepts p 2607 N94-23386
Expansion-based passive ranging
p 2176 N94-25504

NAVIGATION INSTRUMENTS
An overview of a generic multi-sensor integrated navigation system design
[CTN-94-60916] p 2174 N94-24120
Application of aircraft navigation sensors to enhanced vision systems p 2176 N94-25495

NAVY
Design project: LONGBOW supersonic interceptor
[NASA-CR-195510] p 2180 N94-24581
ELF communications system ecological monitoring program
[AD-A273456] p 2299 N94-24676
Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992
[AD-A273400] p 2416 N94-25071

NEAR FIELDS
Mixing and unmixedness in plasma jets 1: Near-field analysis p 2323 N94-23655
Toward modeling wingtip vortices
p 2171 N94-24142
Unstructured adaptive mesh computations of rotorcraft high-speed impulsive noise
[NASA-CR-195090] p 2529 N94-24307

NEAR INFRARED RADIATION
Optimization of techniques to reconstruct images disturbed by atmospheric turbulence in the near infra-red
[PB93-199784] p 2298 N94-24630

NEBULAE
X ray enhancement of SN 1987A due to interaction with its ring-like nebula
[NIFS-265] p 2602 N94-24867

NEGATIVE FEEDBACK
High speed electronic analog computers using low-gain amplifiers
[AD-D015974] p 2446 N94-25034

NEGATIVE IONS
Semiempirical studies of atomic structure
[DE94-001588] p 2531 N94-22937

Diffusion in electronegative discharges with magnetic fields
[AD-A273826] p 2304 N94-25521
NEODYMIUM ALLOYS
Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons
[PB93-201531] p 2561 N94-23428
NEODYMIUM COMPOUNDS
Anomalous magnetoresistance behavior of superconducting Nd(2-x)Ce(x)CuO(4-y) single crystal
[DE94-000806] p 2558 N94-22941
Magnetic properties of NdCo3 and its gamma phase hydride NdCo3H(4.1)
[REPT-A-2655] p 2567 N94-25412
NEODYMIUM LASERS
Progress toward ultra-stable lasers for use in space
[NASA-TM-109678] p 2349 N94-24488
Numerical simulation and analysis of experimental results on stimulated Raman scattering in laser-plasma Hohlraum targets
[DE93-613719] p 2554 N94-25330
NEON
Intramultiplet mixing for Ne(**)(3p)+He at superthermal energies
[ETN-94-95327] p 2538 N94-25240
NEPTUNE (PLANET)
The Jet Propulsion Laboratory space exploration: Past, present and future p 2153 N94-24242
NEPTUNIUM
A survey of metallurgical research on several actinides
[DE94-002643] p 2245 N94-24747
NERVOUS SYSTEM
Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454
Photonic technology for implementation of generalizable neural networks: A synthetic approach
[AD-A273497] p 2474 N94-24622
NETHERLANDS
Exploratory report nickel and nickel compounds
[PB93-223998] p 2242 N94-23496
Exploratory report antimony and antimony compounds
[PB93-224004] p 2397 N94-23497
Analysis of vulnerability to the impacts of sea level rise: A case study for The Netherlands
[PB94-111150] p 2399 N94-24573
Soil pollution at former industrial sites, the heritage of 150 years of industrial development in Noord-Brabant, The Netherlands
[ISBN-9-09-005758-7] p 2400 N94-25223
NETS
Studies of Shuttle orbiter arrestment system
[NASA-TP-3370] p 2177 N94-24304
NETWORK ANALYSIS
Handover procedures in integrated satellite and terrestrial mobile systems p 2277 N94-22761
MSAT and cellular hybrid networking
p 2278 N94-22762
Trends in mobile satellite communication
p 2278 N94-22763
A system architecture for an advanced Canadian wideband mobile satellite system p 2278 N94-22766
Transient analysis of circuits including frequency-dependent components using transgyrator and convolution
[PB93-225001] p 2308 N94-23130
Mathematical modeling of MCFC cells/stacks and networks
[DE94-001914] p 2390 N94-23212
Extension of the critical path method
[PB94-118817] p 2488 N94-24527
Modular approach to project management
[PB94-118833] p 2586 N94-24528
Irreducible core of a minimum cost spanning tree game
[PB94-110962] p 2489 N94-24653
New directions in network flows
[AD-A273467] p 2468 N94-24939
NETWORK CONTROL
Interworking evolution of mobile satellite and terrestrial networks p 2277 N94-22758
Interworking and integration of the Inmarsat Standard-M with Pan-European GSM system p 2277 N94-22759
Architectures and protocols for an integrated satellite-terrestrial mobile system p 2277 N94-22760
Handover procedures in integrated satellite and terrestrial mobile systems p 2277 N94-22761
Optimizing space constellations for mobile satellite systems p 2278 N94-22764
ACTS mobile SATCOM experiments
p 2280 N94-22774
The ORBCOMM data communications system
p 2281 N94-22782
System services and architecture of the TMI satellite mobile data system p 2286 N94-22817
Study on networking issues of medium earth orbit satellite communications systems p 2288 N94-22825
Specifications of ETS, the Enhanced Transport Service
[RR-907-I] p 2589 N94-23150
Source spacing in B-ISDN
[PB93-201747] p 2293 N94-23508
NASDA satellite mission operation system and operations p 2501 N94-23854
NASDA knowledge-based network planning system
p 2508 N94-23898
Deep Space Network (DSN), Network Operations Control Center (NOCC) computer-human interfaces
p 2447 N94-23917
EOS ground data systems: A description and interface overview p 2517 N94-23948
NEURAL NETS
The adaptive resonance theory network: (Clustering-) behaviour in relation with brainstem auditory evoked potential patterns
[EUT-92-E-264] p 2470 N94-22877
Artificial neural networks: Application to the optical recognition of music partitions
[ETN-94-95166] p 2470 N94-22884
Customizable VLSI artificial neural network chips based on a novel technology
[DE94-001418] p 2307 N94-23008
A novel process monitoring and control system based on a neural manufacturing concept
[DE94-001516] p 2471 N94-23011
Installation of an artificial neural network on distributed memory microprocessors
[ETN-94-95175] p 2471 N94-23152
Neural network research in Finland. Symposium
[PB93-224822] p 2472 N94-23463
Material data representation of hysteresis loops for Hastelloy X using artificial neural networks
[NASA-TM-105990] p 2376 N94-23551
Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction
[NASA-CR-189645] p 2525 N94-23698
Automatic modulation recognition based on spatial pattern classification using artificial neural networks
[CTN-94-60897] p 2296 N94-24115
Acoustic target detection and classification using neural networks p 2529 N94-24221
Preliminary analysis of the JAPE ground vehicle test data with an artificial neural network classifier
p 2529 N94-24222
Neural network-based control using Lyapunov functions p 2477 N94-24433
Using neural networks to assist in OPAD data analysis
p 2477 N94-24452
Optimal Space Station solar array gimbal angle determination via radial basis function neural networks
[NASA-TM-106482] p 2195 N94-24482
Diagnosing process faults using neural network models
[DE94-002633] p 2473 N94-24518
Systematic construction of trigonometric neural networks
[PB93-200228] p 2474 N94-24544
Photonic technology for implementation of generalizable neural networks: A synthetic approach
[AD-A273497] p 2474 N94-24622
Hyperspectral imagery classification using a backpropagation neural network
[AD-A273615] p 2545 N94-24730
A methodology for software cost estimation using machine learning techniques
[AD-A273158] p 2459 N94-24775
Evolving recurrent perceptrons
[AD-A273241] p 2496 N94-24778
Evolving neural network connectivity
[AD-A273134] p 2490 N94-24921
High-level connectionist models
[AD-A273638] p 2468 N94-25030
Radar target discrimination systems using artificial neural network topology
[AD-D015984] p 2301 N94-25041
Determining neural network hidden layer size using evolutionary programming
[AD-A273242] p 2475 N94-25139
The determination of the branching ratios of the Z(zero) boson into heavy quarks using neural networks
[ETN-94-95381] p 2538 N94-25246
On-line control of dynamic systems using feedforward neural networks
[RR-457] p 2476 N94-25307
Development of programmable artificial neural networks p 2477 N94-25370
NEURONS
Customizable VLSI artificial neural network chips based on a novel technology
[DE94-001418] p 2307 N94-23008
NEUROPHYSIOLOGY
Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454
NEUROTRANSMITTERS
Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454
NEUTRAL BEAMS
IPP Prague Contributions to the IAEA Technical Committee Meeting on Research Using Small Tokamaks
[IPPCZ-329] p 2551 N94-24293
Investigation of the heat handling capabilities of DIII-D neutral beamline internal components
[DE94-001107] p 2553 N94-24756
NEUTRINO BEAMS
Accelerator-based neutrino oscillation searches
[DE94-000818] p 2626 N94-23515
NEUTRINOS
Pions and neutrinos as probes of the nucleon and nuclear few-body system
[DE93-040127] p 2531 N94-22928
Accelerator-based neutrino oscillation searches
[DE94-000818] p 2626 N94-23515
Kamiokande results on solar neutrinos and a supernova search
[ICRR-REPT-294-93-6] p 2627 N94-24961
NEUTRON COUNTERS
Experimental characterization of the AFIT Neutron Facility
[AD-A273822] p 2539 N94-25519
NEUTRON DIFFRACTION
The structure and spin dynamics of lanthanide-bearing silicate glasses
[DE94-001320] p 2252 N94-22992
Dual-purpose RTOF diffractometer facility at the ET-RR-1 reactor
[VTT-TIED-1425] p 2566 N94-25347
NEUTRON IRRADIATION
Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184
Effect of neutron irradiation on tensile properties of V-Cr-Ti alloys
[DE94-001433] p 2240 N94-23194
NEUTRON SCATTERING
Spin-hole doping in the Kondo insulator Ce3Bi4Pt3 studied by neutron scattering
[DE93-040107] p 2557 N94-22925
The structure and spin dynamics of lanthanide-bearing silicate glasses
[DE94-001320] p 2252 N94-22992
Microscopic dynamics in dense helium-neon mixtures: Neutron scattering, kinetic theory and computer simulations
[ISBN-9-07-386105-5] p 2537 N94-25228
Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation
[DE93-617053] p 2567 N94-25424
Crystal field in Nd2CuO4
[DE93-617054] p 2567 N94-25425
The Haldane energy gap of a doped linear-chain Heisenberg antiferromagnet
[DE93-617130] p 2567 N94-25426
NEUTRON SPECTRA
Crystal field in Nd2CuO4
[DE93-617054] p 2567 N94-25425
Experimental characterization of the AFIT Neutron Facility
[AD-A273822] p 2539 N94-25519
NEUTRON STARS
Neutron star mergers and gamma-ray bursts
[NASA-CR-195176] p 2629 N94-25091
NEUTRONS
Polarized structure functions of the nucleon in the resonance region
[CEBAF-PR-94-001] p 2540 N94-24663
Experimental characterization of the AFIT Neutron Facility
[AD-A273822] p 2539 N94-25519
NEWTON METHODS
Error due to the stopping of the Newton iteration in implicit linear multistep methods
[PB94-101425] p 2487 N94-23786
Generalized Gaussian quadrature rules for systems of arbitrary functions
[AD-A273610] p 2491 N94-24947
NEWTONIAN FLUIDS
An application of small-gap equations in sealing devices p 2325 N94-23668

NICHROME (TRADEMARK)
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090
NICKEL
High surface area, low weight composite nickel fiber electrodes p 2391 N94-23351
Exploratory report nickel and nickel compounds
[PB93-223998] p 2242 N94-23496
Strength, acoustic evaluation and metallurgy of diffusion bonds
[DE94-001804] p 2243 N94-23717
NICKEL ALLOYS
Magnetic phases in UNiGe
[DE94-000793] p 2239 N94-22939
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200
Material data representation of hysteresis loops for Hastelloy X using artificial neural networks
[NASA-TM-105990] p 2376 N94-23551
Multilayer relaxation and surface structure of ordered alloys
[NASA-TM-106433] p 2243 N94-23578
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276
Structural characterization and thermal cycling behaviour of EB-PVD thermal barrier coating systems
[ISBN-0-315-83365-3] p 2257 N94-24468
Investigate zero-stress replicated optics
[NASA-CR-193889] p 2545 N94-24665
Robotic weld overlay coatings for erosion control
[DE94-002665] p 2258 N94-24749
NICKEL CADMIUM BATTERIES
Aerospace applications of batteries
p 2390 N94-23346
Review of super Ni/Cd cell designs and performance
p 2391 N94-23348
Thermodynamics of nickel-cadmium and nickel-hydrogen batteries p 2391 N94-23349
NICKEL COMPOUNDS
Ovonic nickel metal hydride batteries for space applications p 2391 N94-23352
Alloys for hydrogen storage in nickel/hydrogen and nickel/metal hydride batteries p 2391 N94-23353
Exploratory report nickel and nickel compounds
[PB93-223998] p 2242 N94-23496
NICKEL HYDROGEN BATTERIES
Thermodynamics of nickel-cadmium and nickel-hydrogen batteries p 2391 N94-23349
High specific energy, high capacity nickel-hydrogen cell design p 2391 N94-23350
High surface area, low weight composite nickel fiber electrodes p 2391 N94-23351
Alloys for hydrogen storage in nickel/hydrogen and nickel/metal hydride batteries p 2391 N94-23353
Impedance measurements on a spiral-wound nickel/metal hydride cell cycled in a simulated Leo orbit
p 2392 N94-23355
NASA Lewis advanced IPV nickel-hydrogen technology p 2392 N94-23356
NICKEL OXIDES
Applications of x ray absorption fine structure to the in situ study of the effect of cobalt in nickel hydrous oxide electrodes for fuel cells and rechargeable batteries
p 2391 N94-23347
NICKEL STEELS
Irradiation damage behavior of low alloy steel wrought and weld materials
[DE94-000519] p 2239 N94-22999
NIGHT
A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements
[AD-A273803] p 2406 N94-25537
NIGHT FLIGHTS (AIRCRAFT)
Visual Problems in Night Operations
[AGARD-LS-187] p 2431 N94-23976
NIGHT VISION
Evaluation of visual acuity with Gen 3 night vision goggles
[NASA-TM-108792] p 2431 N94-23974
Visual Problems in Night Operations
[AGARD-LS-187] p 2431 N94-23976
Night operations p 2431 N94-23977
Physical aspects of the visual stimulus
p 2431 N94-23978
Perception in flight: Shape and motion perception, space perception, spatial orientation, and visual vestibular interaction p 2429 N94-23979
Mental images p 2429 N94-23980
Multi-sensoral approach to night flight: Perceptive and Cognitive limitations p 2432 N94-23981
Night vision devices and characteristics
p 2432 N94-23982
Cockpit/NVG visual integration issues
p 2432 N94-23983
Night vision goggle illusions and visual training
p 2432 N94-23984
NIOBIUM
Welding of niobium to stainless
[DE94-003365] p 2365 N94-24614
NIOBIUM ALLOYS
New extensions in the development of deformation processed metal-metal matrix composites
[DE94-000692] p 2227 N94-23004
Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550
Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556
NITRIDES
LPCVD of InN on GaAs(110) using HN3 and TMIn: Comparison with Si(100) results
[AD-A273555] p 2235 N94-24917
Influences of nitrogen absorption on the magnetic properties of YFe2, YFe3 and Y6Fe23
[REPT-A-2654] p 2564 N94-24958
NITRIDING
Selection of polymer binders and fabrication of SiC fiber-reinforced reaction-bonded silicon nitride matrix composites
[NASA-CR-194874] p 2255 N94-24223
NITRILES
Curing phthalonitrile resins with acid and amine
[AD-D016021] p 2258 N94-24721
Curing phthalonitriles with acid
[AD-D015996] p 2261 N94-25054
NITROGEN
Reburning rich-lean kinetics
[PB93-220887] p 2232 N94-23100
NITROGEN IONS
Electron spectroscopic studies of the neutralization of slow multicharged ions during interactions with a metal surface
[DE93-041046] p 2532 N94-22956
Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects
[NASA-CR-195126] p 2534 N94-24487
NITROGEN OXIDES
Economics of electron beam and electrical discharge processing for post-combustion NO(x) control in internal combustion engines
[DE93-019574] p 2351 N94-22865
Fundamental limitations of non-thermal plasma processing for internal combustion engine NO(x) control
[DE93-019622] p 2351 N94-22866
Reburning rich-lean kinetics
[PB93-220887] p 2232 N94-23100
Flue gas cleaning by pulse corona streamer
[EUT-93-E-272] p 2268 N94-23174
Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion
[PB94-109873] p 2187 N94-23709
Fundamental study of NO(x) control in catalytic combustion
[PB94-112323] p 2398 N94-23818
Alternative control techniques document: NOx emissions from stationary reciprocating internal combustion engines
[PB94-104494] p 2398 N94-24476
NITROGEN 15
Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167
NITROUS OXIDES
Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167
NOAA SATELLITES
Instrument interface description for NOAA 2000 instruments with European morning spacecraft and/or NOAA-OPQ spacecraft
[NASA-TM-109406] p 2208 N94-23478
Command/telemetry bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems
[NASA-TM-109407] p 2208 N94-23479
Evaluating NOAA satellite products for global climate monitoring p 2384 N94-23604
NODULES
Sarcoidosis and the aviator p 2425 N94-23325
NOISE INTENSITY
Spatial frequency multiplier with active linearly tapered slot antenna array
[NASA-TM-106494] p 2310 N94-24308
Exercise keevil: Noise levels of six military helicopters
[PB93-210722] p 2529 N94-25026
NOISE MEASUREMENT
Validation of the ROTAC code for the rotor noise prediction
[PB93-204311] p 2529 N94-24514
Fan noise research at NASA
[NASA-TM-106512] p 2530 N94-25172
On the origin of 1/f noise in epitaxial GaAs
[ISBN-9-09-006067-7] p 2566 N94-25297
The ISL rotor bench
[ISL-R-108/92] p 2185 N94-25301
NOISE PREDICTION
A modelling of the noise from simple co-axial jets. Part 2: In a simulated flightstream
[ISVR-TR-226] p 2525 N94-22959
Unsteady jet flow computation towards noise prediction
[NASA-CR-194449] p 2153 N94-23553
NOISE PREDICTION (AIRCRAFT)
Validation of the ROTAC code for the rotor noise prediction
[PB93-204311] p 2529 N94-24514
NOISE PROPAGATION
JAPE 91: Influence of terrain masking of the acoustic propagation of helicopter noise p 2528 N94-24214
NOISE REDUCTION
Estimation of frequency offset in mobile satellite modems p 2285 N94-22807
Low noise electric motor p 2315 N94-23989
Vibrational power transmission analysis of machinery installations in ships with the objective of noise reduction
[ISVR-TR-216] p 2363 N94-24076
Fan noise research at NASA
[NASA-TM-106512] p 2530 N94-25172
Adaptive noise cancellation using recurrent radial basis function networks
[RR-472] p 2313 N94-25319
NOISE SPECTRA
Laser linewidth measurement in the presence of RIN and using the recirculating self heterodyne method
[EUT-92-E-262] p 2347 N94-22874
A modelling of the noise from simple co-axial jets. Part 2: In a simulated flightstream
[ISVR-TR-226] p 2525 N94-22959
Ground characterization for JAPE
p 2527 N94-24213
Some subjects in digital audio, noise shaping, sample rate conversion, dynamic range compression and testing
[ISBN-9-09-005162-7] p 2530 N94-25220
Study of the blade/vortex interaction: Acoustics, aerodynamics and models
[ISL-R-104/92] p 2340 N94-25463
NOISE TEMPERATURE
Cryogenic, low-noise high electron mobility transistor amplifiers for the Deep Space Network
p 2291 N94-23262
NONADIABATIC CONDITIONS
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
NONCONDENSABLE GASES
Thermodynamic models for bounding pressurant mass requirements of cryogenic tanks
[NASA-TM-106476] p 2346 N94-25202
NONDESTRUCTIVE TESTS
Theoretical studies of wave propagation in multilayered piezoelectric media
[DE93-040273] p 2371 N94-22872
Strength, acoustic evaluation and metallurgy of diffusion bonds
[DE94-001804] p 2243 N94-23717
An evaluation of Compton scatter imaging using COMSCAN
[DREP-TM-93-38] p 2372 N94-24136
Ultrasonic nondestructive evaluation as a tool for the development of aerospace structural ceramic composites p 2257 N94-24240
Nondestructive evaluations
[DE94-003020] p 2373 N94-24613
Investigation of the effects of manufacturing variations and materials on fatigue crack detection methods in gear teeth
[NASA-CR-195093] p 2373 N94-24769
Demonstration of polyscann ultrasonic butt-fusion inspection system for polyethylene pipes
[AD-A273279] p 2373 N94-24814
Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles
[NASA-CR-195163] p 2201 N94-24919
Nuclear magnetic resonance imaging with short gradient pulses
[AD-D016006] p 2537 N94-25047
NONEQUILIBRIUM FLOW
Upwind MacCormack Euler solver with non-equilibrium chemistry p 2326 N94-23672

Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects
[NASA-CR-195126] p 2534 N94-24487

NONEQUILIBRIUM IONIZATION

Nonequilibria in thermal emission from supernova remnants
[NIFS-264] p 2602 N94-24866

NONEQUILIBRIUM PLASMAS

Modelling of thermal argon plasmas
[ETN-94-95363] p 2554 N94-25300

NONFLAMMABLE MATERIALS

Fire-resistant barriers for composite materials
[AD-D016014] p 2230 N94-24735

NONINTRUSIVE MEASUREMENT

An experimental study of characteristic combustion-driven flows for CFD validation
p 2212 N94-23040

Design of a surface deformation measuring instrument for the Surface Tension Driven Convection Experiment (STDCE-2)
[NASA-CR-194758] p 2343 N94-23285

Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field
[NASA-CR-191490] p 2344 N94-24360

Temperature measurement using infrared imaging systems during turbine engine altitude testing
[NASA-TM-105871] p 2193 N94-25184

Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357

NONLINEAR EQUATIONS

Nonlinear smoothing for random fields
[MEMO-1110] p 2493 N94-22728

The characterization of reaction-convection-diffusion processes by travelling waves
[MEMO-1111] p 2273 N94-22729

Incomplete corrections in nonlinear problems
[PB93-225746] p 2479 N94-23106

On the estimation of the correlation dimension and its application to radar reflector discrimination
[NASA-CR-4564] p 2309 N94-23304

Periodic nonlinear Schroedinger equation and invariant measures
[PB93-238012] p 2487 N94-23775

Error due to the stopping of the Newton iteration in implicit linear multistep methods
[PB94-101425] p 2487 N94-23786

On the dynamics of some grid adaption schemes
[NASA-CR-195092] p 2454 N94-24110

On the dynamics of approximating schemes for dissipative nonlinear equations p 2332 N94-24168

Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280

Stable non-Gaussian diffusive profiles
[PB93-238053] p 2489 N94-24610

Stability analysis of anisotropic conical shells
[PB94-119054] p 2377 N94-24645

Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773

Approximation to nonlinear equations using nonlinear rational models
[RR-448] p 2492 N94-25306

NONLINEAR EVOLUTION EQUATIONS

Cauchy problem for periodic KDV-type equations
[PB93-238020] p 2487 N94-23776

NONLINEAR FEEDBACK

Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction
[NASA-CR-189645] p 2525 N94-23698

NONLINEAR FILTERS

Evolving recurrent perceptrons
[AD-A273241] p 2496 N94-24778

NONLINEAR OPTICS

A fully automated stage for optical waveguide measurements
[AD-A273042] p 2542 N94-22915

Microgravity sciences application visiting scientist program
[NASA-CR-194804] p 2267 N94-23287

Spatiotemporal behavior and nonlinear dynamics in a phase conjugate resonator
[NASA-CR-4567] p 2543 N94-23529

Inertial confinement fusion
[DE94-002602] p 2551 N94-23703

Prediction of nonlinear optical properties of organic materials. General theoretical considerations
p 2224 N94-24343

Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346

Polydiacetylene thin films for nonlinear optical applications p 2225 N94-24347

Crystal growth of organics for nonlinear optical applications p 2225 N94-24348

Nonlinear optical thin films p 2225 N94-24349

Optimization of microscopic and macroscopic second order optical nonlinearities p 2226 N94-24354

Dipolar relaxation in a second-order nonlinear optical interpenetrating polymer network
[AD-A273626] p 2258 N94-24732

Ultrastructure processing of macromolecular materials
[AD-A273413] p 2258 N94-24782

Center for advanced electrical and structural polymers
[AD-A273415] p 2259 N94-24783

NONLINEAR PROGRAMMING

A structural design decomposition method utilizing substructuring
[NASA-TM-107750] p 2376 N94-23368

PLANET: A hierarchical network simulator
[ISBN-9-09-005693-9] p 2313 N94-25083

NONLINEAR SYSTEMS

Decoupling problems around a trajectory: From linearity to nonlinearity
[MEMO-1115] p 2469 N94-22703

Balancing for unstable nonlinear systems
[MEMO-1118] p 2469 N94-22705

Nonlinear state space H(sub infinity) control theory
[MEMO-1119] p 2469 N94-22706

Nonlinear systems which have finite-dimensional H(sub infinity) suboptimal central controllers
[MEMO-1120] p 2469 N94-22707

On dynamic input-output linearization of discrete-time nonlinear systems
[MEMO-1123] p 2447 N94-22711

Feedback linearization of parametrized nonlinear time-varying systems
[MEMO-1126] p 2470 N94-22714

Probabilistic analysis of mechanical systems
[DE93-041145] p 2371 N94-22918

Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data
[DE94-001575] p 2550 N94-23211

Viewing hybrid systems as products of control systems and automata
[NASA-CR-194792] p 2472 N94-23300

On the estimation of the correlation dimension and its application to radar reflector discrimination
[NASA-CR-4564] p 2309 N94-23304

Nonlinear analysis using a modal based reduction technique p 2161 N94-24288

Neural network-based control using Lyapunov functions p 2477 N94-24433

Discrete applied mathematics
[AD-A273552] p 2488 N94-24561

Robust stability of second-order systems
[NASA-CR-195175] p 2488 N94-24564

Hamiltonian approach to fairly low and long gravity waves
[PB94-111119] p 2404 N94-24598

Control of nonlinear systems represented in quasilinear form
[NASA-CR-194840] p 2475 N94-24760

Nonlinear dynamical control of lasers
[AD-A273359] p 2350 N94-24938

System for producing synchronized signals
[AD-D016003] p 2302 N94-25057

Modeling transonic aerodynamic response using nonlinear systems theory for use with modern control theory p 2164 N94-25112

Center for Analysis of Heterogeneous and Nonlinear Media
[AD-A273515] p 2230 N94-25158

Practical evaluation of robust control for a class of nonlinear mechanical dynamic systems
[ISBN-9-03-860092-5] p 2475 N94-25224

Approximation to nonlinear equations using nonlinear rational models
[RR-448] p 2492 N94-25306

The phase response of nonlinear systems
[RR-458] p 2476 N94-25308

On the inversion of the n-dimensional Laplace transform
[RR-461] p 2492 N94-25310

Unwrapping the phase response functions for nonlinear systems
[RR-465] p 2462 N94-25311

Validating identified nonlinear models with chaotic dynamics
[RR-469] p 2523 N94-25314

Frequency response functions for nonlinear rational models
[RR-471] p 2492 N94-25318

Relationship between the structure and performance of identified nonlinear polynomial models
[RR-474] p 2492 N94-25320

NONLINEARITY

Theoretical and simulated performance for a novel frequency estimation technique p 2285 N94-22808

Chaos in plasma simulation and experiment
[DE94-001574] p 2549 N94-22963

Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models
p 2216 N94-23062

Fully coupled nonlinear thermomechanical analysis including general contact in PALM2D
[DE94-001661] p 2568 N94-23216

Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435

Tracking sharp interface of two fluids by the CIP (Cubic-Interpolated Propagation) scheme
[DE93-508322] p 2319 N94-23460

Implementing abstract multigrid or multilevel methods
p 2483 N94-23682

Energy and maximum norm estimates for nonlinear conservation laws
[NASA-CR-195091] p 2569 N94-24109

Prediction of nonlinear optical properties of organic materials. General theoretical considerations
p 2224 N94-24343

Optimization of microscopic and macroscopic second order optical nonlinearities p 2226 N94-24354

Diagnosing process faults using neural network models
[DE94-002633] p 2473 N94-24518

Computer modeling of nonlinearities
p 2458 N94-24661

Nonlinear dynamics applied to atmospheric prediction
[AD-A273437] p 2404 N94-24674

Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108

Nonlinear aerodynamic modeling using multivariate orthogonal functions p 2164 N94-25110

Infinitely divisible processes and their nonlinear functionals; a study of their structural, statistical and sample path properties and their prediction problems
[AD-A273468] p 2496 N94-25147

NONNEWTONIAN FLUIDS

Multigrid methods for a semilinear PDE in the theory of pseudoplastic fluids p 2341 N94-23689

NONTHERMAL RADIATION

Voyager planetary radio astronomy studies
[NASA-CR-194776] p 2614 N94-24328

NORMAL DENSITY FUNCTIONS

Setting test limits under prescribed consumer loss
[MEMO-1107] p 2478 N94-22725

Subset selection for the best of two populations: Tables of the expected subset size
[PB93-237857] p 2494 N94-23546

A random distribution reacting mixing layer model
[NASA-CR-194445] p 2187 N94-23552

Solving the ranking and selection indifference-zone formulation for normal distributions using computer software
[AD-A273821] p 2496 N94-25518

NORMAL SHOCK WAVES

Stability of hypersonic flow of a detonable gas mixture in the stagnation region of a blunt body and a forward facing step p 2154 N94-24248

NORMALIZING (STATISTICS)

The detection performance of a long-term spectral integrator using normalized and quantized data
[DREP-TM-93-11] p 2455 N94-24130

NORMS

Identification for robust control using an H(sub infinity) norm
[EUT-92-E-261] p 2470 N94-22873

NORTH AMERICA

Implementation of a system to provide mobile satellite services in North America p 2281 N94-22784

NORTH ATLANTIC TREATY ORGANIZATION (NATO)

Activities report to NATO
[ETN-94-95047] p 2318 N94-23227

Cardiovascular and pulmonary disease in NATO aircrew: An overview p 2423 N94-23314

NORTH SEA

Nutrients and light as factors controlling phytoplankton biomass on the Dutch continental shelf (North Sea), 1988-1990
[PB94-111143] p 2418 N94-24601

NORTHERN HEMISPHERE

Northern hemisphere tropospheric mid-latitude circulation after violent volcanic eruptions
[MPIM-107] p 2403 N94-24491

Northern hemisphere dust storms on Mars
p 2619 N94-24885

An AVHRR cloud classification database typed by experts
[AD-A273560] p 2416 N94-25162

NORWAY

Fire safety engineering research in Norway
[PB93-201630] p 2268 N94-23429

NOSE FINS
Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle [NASA-TM-4533] p 2170 N94-24716

NOTCH STRENGTH
Three-dimensional, inelastic response of single-edge notch bend specimens subjected to impact loading [AD-A273302] p 2378 N94-25143

NOTCH TESTS
Micromechanical characterization of ceramic-matrix composites using the instrumented microindentation technique p 2256 N94-24233

NOTCHES
Off-design performance of crenulated blades in a linear compressor cascade [AD-A273744] p 2340 N94-25534

NOWCASTING
An efficient data assimilation algorithm with a gaussian covariance structure [AD-A273152] p 2418 N94-24671

NOZZLE DESIGN
Dual-bell altitude compensating nozzles p 2215 N94-23057
Development of a code for wall contour design in the transonic region of axisymmetric and square nozzles [NASA-CR-194857] p 2167 N94-23625
Supersonic minimum length nozzle design for dense gases p 2171 N94-23656
Final postflight hardware evaluation report RSRM-28 (STS-53) [NASA-CR-193902] p 2200 N94-24112

NOZZLE EFFICIENCY
Postflight hardware evaluation RSRM-29 (STS-54). Appendix C: Nozzle PFORs [NASA-CR-193894] p 2219 N94-24064

NOZZLE FLOW
Molecular gas dynamics applied to low-thrust propulsion p 2214 N94-23053
Dual-bell altitude compensating nozzles p 2215 N94-23057
Two stage turbine for rockets p 2215 N94-23059
Theoretical studies of a molecular beam generator [NASA-CR-194779] p 2540 N94-23485
Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles [NASA-TM-106450] p 2167 N94-23592
Ignition and combustion characteristics of metallized propellants, phase 2 [NASA-CR-195107] p 2266 N94-24700

NOZZLE GEOMETRY
Dual-bell altitude compensating nozzles p 2215 N94-23057
Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles [NASA-TM-106450] p 2167 N94-23592

NOZZLE WALLS
Development of a code for wall contour design in the transonic region of axisymmetric and square nozzles [NASA-CR-194857] p 2167 N94-23625

NOZZLES
Postflight hardware evaluation RSRM-29 (STS-54). Case, seals, and joints PFORs, appendix B [NASA-CR-193899] p 2367 N94-25020

NUCLEAR CHEMISTRY
Fifty years of continuous improvement: What has DOE done for analytical chemistry? [DE94-002539] p 2234 N94-24548

NUCLEAR ELECTRIC PROPULSION
Advanced nuclear thermal propulsion concepts p 2217 N94-23068
Utilization of recently developed codes for high power Brayton and Rankine cycle power systems p 2222 N94-23641
Heat pipe cooled heat rejection subsystem modelling for nuclear electric propulsion [NASA-CR-191132] p 2219 N94-24061

NUCLEAR EXPLOSIONS
Parametric and nonparametric discriminants for regional earthquakes and explosions [AD-A273807] p 2406 N94-25538

NUCLEAR FUEL ELEMENTS
An F2D analysis of the Flow Instability Test (FIT) experiment [DE94-001420] p 2217 N94-23193

NUCLEAR FUELS
Pellet ablation in the large helical device [NIFS-260] p 2551 N94-24358

NUCLEAR INTERACTIONS
Momentum loss in proton-nucleus and nucleus-nucleus collisions [NASA-TP-3405] p 2540 N94-24305
Behavior of the intermittency exponents and a quark-gluon plasma formation in the heavy ion collisions [DE93-616869] p 2541 N94-25342

NUCLEAR MAGNETIC RESONANCE
Magnetic resonance studies of 3d transition metal impurities in compound semiconductors [PB93-232197] p 2243 N94-23714
Synthesis and in-vivo detection of boronated compounds for use in BNCT [DE94-001699] p 2233 N94-23780
Nuclear magnetic resonance imaging with short gradient pulses [AD-D016006] p 2537 N94-25047
The nanostructure of multilayered films: A NMR study [ETN-94-95347] p 2262 N94-25222
Microstructure of styrene methyl methacrylate copolymers grafted onto polybutadiene seeds [ETN-94-95360] p 2262 N94-25225
On the mechanism of action of 3',5'-cyclic adenosine monophosphate: A study of four- and five-coordinated phosphorus compounds, modelling the activated state of cAMP [ISBN-9-03-860222-7] p 2226 N94-25238

NUCLEAR MODELS
Momentum loss in proton-nucleus and nucleus-nucleus collisions [NASA-TP-3405] p 2540 N94-24305

NUCLEAR PHYSICS
Accelerator-based neutrino oscillation searches [DE94-000818] p 2626 N94-23515
Polarized structure functions of the nucleon in the resonance region [CEBAF-PR-94-001] p 2540 N94-24663

NUCLEAR POWER REACTORS
Power generation technology options for a Mars mission [NASA-TM-106451] p 2220 N94-24681

NUCLEAR PROPULSION
NASA Propulsion Engineering Research Center, volume 2 [NASA-CR-194719-VOL-2] p 2209 N94-23028
Advanced nuclear thermal propulsion concepts p 2217 N94-23068
Performance assessment of low pressure nuclear thermal propulsion p 2217 N94-23070
Nuclear propulsion control and health monitoring p 2217 N94-23071
Improved gas core propulsion model [DE94-000929] p 2220 N94-24511

NUCLEAR REACTIONS
Ferroelectric thin films 3 [AD-A273394] p 2565 N94-25027

NUCLEAR ROCKET ENGINES
Nuclear propulsion control and health monitoring p 2217 N94-23071

NUCLEAR WEAPONS
A qualified radiation hardened nonvolatile memory for space and tactical weapons applications [DE94-001211] p 2559 N94-23186
Nondestructive evaluations [DE94-003020] p 2373 N94-24613

NUCLEATION
Microgravity sciences application visiting scientist program [NASA-CR-194804] p 2267 N94-23287
Characterization of 3-D particle distributions and effects on recrystallization studied by computer simulation [PB93-201408] p 2562 N94-23535
Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344
Polymer morphologh p 2226 N94-24353
The chemistry of particulate formation in fluorocarbon plasmas [DE94-001500] p 2552 N94-24546
Containerless measurements on liquids at high temperatures p 2238 N94-25125
Particle nucleation and growth in butadiene emulsion polymerization [ETN-94-95300] p 2262 N94-25236
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy [AD-A273698] p 2263 N94-25489

NUCLEI
A quark structure of hadrons and nuclei [DE93-616872] p 2539 N94-25474
On the hadron formation time in pion-nucleus interaction [DE93-616879] p 2539 N94-25476

NUCLEI (NUCLEAR PHYSICS)
Momentum loss in proton-nucleus and nucleus-nucleus collisions [NASA-TP-3405] p 2540 N94-24305

NUCLEIC ACIDS
The torsion space nucleic acids molecular mechanics program DUPLEX: Surveying conformation space by potential energy minimization [DE94-002441] p 2563 N94-24567

NUCLEON-NUCLEON INTERACTIONS
Momentum and coordinate space three-nucleon potentials [DE93-040868] p 2531 N94-22951
On the transverse size of a fast moving nucleon [DE93-616891] p 2539 N94-25481

NUCLEONS
Pions and neutrinos as probes of the nucleon and nuclear few-body system [DE93-040127] p 2531 N94-22928
Momentum and coordinate space three-nucleon potentials [DE93-040868] p 2531 N94-22951
Polarized structure functions of the nucleon in the resonance region [CEBAF-PR-94-001] p 2540 N94-24663
On the transverse size of a fast moving nucleon [DE93-616891] p 2539 N94-25481

NUMBER THEORY
A rational elliptic surface related to the question of expressing squares as sum of consecutive squares [W-9305] p 2479 N94-23139

NUMERICAL ANALYSIS
A numerical analysis of crack propagation in microcracking ceramic and ceramic composites [DE94-001192] p 2253 N94-23183
Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data [DE94-001575] p 2550 N94-23211
Study of transient behavior of finned coil heat exchangers p 2321 N94-23642
Solution of mixed convection heat transfer from isothermal in-line fins p 2321 N94-23644
Unsteady three-dimensional thermal field prediction in turbine blades using nonlinear BEM p 2325 N94-23665
Temporal model of an optically pumped co-doped solid state laser [NASA-TM-109680] p 2350 N94-24851
Research in progress and other activities of the Institute for Computer Applications in Science and Engineering [NASA-CR-191576] p 2444 N94-25090
Space Station flexible dynamics under plume impingement p 2208 N94-25383
Numerical analysis of the motion of a rigid body with an attached spring-mass-damper [AD-A273825] p 2379 N94-25520

NUMERICAL CONTROL
K- and Ka-band mobile-vehicular satellite-tracking reflector antenna system for the NASA ACTS mobile terminal p 2289 N94-22831
Link monitor and control operator assistant: A prototype demonstrating semiautomated monitor and control p 2292 N94-23267
A reliable algorithm for optimal control synthesis [NASA-CR-194809] p 2472 N94-23332
Imaging System (INEL) T805 prototype [DE94-002807] p 2382 N94-23492
Calibration block for digital beam forming antenna [PB93-204550] p 2294 N94-23773
Characteristics of products generated by selective sintering and stereolithography rapid prototyping processes p 2264 N94-24412
Octave: A MARSYAS post-processor for computer-aideed control system design p 2465 N94-24422
The experimental physics and industrial control system architecture: Past, present, and future [DE94-002639] p 2457 N94-24626
Bioregenerative life support systems for microgravity [NASA-CR-195516] p 2422 N94-24810
NASA/Army rotorcraft transmission research, a review of recent significant accomplishments [NASA-TM-106508] p 2367 N94-25181
Research experience for undergraduates in robotics and materials [AD-A273659] p 2368 N94-25436

NUMERICAL INTEGRATION
On the numeric integration of dynamic attitude equations [NASA-CR-194788] p 2448 N94-23073
Comparison of time integration methods for the evolution of galaxies [PB94-111671] p 2602 N94-24522

NUMERICAL STABILITY
Stability behavior of systems obtained by index-reduction [PB93-237709] p 2481 N94-23439
Infinite divisible and stable distributions modulo 1 [PB94-110640] p 2495 N94-23815
Dynamic localization and second-order subgrid-scale models in large eddy simulations of channel flow p 2329 N94-24149

Octave: A MARSYAS post-processor for computer-aideed control system design
p 2465 N94-24422
Exploiting structure: Introduction and motivation
[NASA-CR-195136] p 2490 N94-24847

NUMERICAL WEATHER FORECASTING
Monte Carlo climate change forecasts with a global coupled ocean-atmosphere model
[MPIM-97] p 2407 N94-23156
Hurricane risk assessment: Rollback or ride out
p 2416 N94-23248
Visualization of results from meteorological simulations on CRAY
[PB93-201358] p 2451 N94-23443
Modelling TOVS radiances of synoptic systems
[NASA-CR-194847] p 2408 N94-23620
Implementation of a state of the art automated system for the production of cloud/water vapor motion winds from geostationary satellites
[NASA-CR-195087] p 2410 N94-24125
GEWEX Cloud Systems Study (GCSS)
p 2411 N94-24377
Validation of mesoscale models p 2413 N94-24391
Techniques and resources for storm-scale numerical weather prediction p 2414 N94-24392
Session on cumulus parameterization
p 2414 N94-24394
Session on techniques and resources for storm-scale numerical weather prediction p 2415 N94-24400

NUTATION
Ulysses log 1992 p 2502 N94-23863
Numerical simulation of Ulysses nutation
p 2207 N94-24017

NUTATION DAMPERS
Reactive thrust cruise for a geosynchronous satellite with minimum fuel consumption p 2158 N94-24271
Numerical analysis of the motion of a rigid body with an attached spring-mass-damper
[AD-A273825] p 2379 N94-25520

NUTRIENTS
Microbial biofilm formation and its consequences for the CELSS program
[NASA-CR-195146] p 2438 N94-24706

O

O RING SEALS
Viscoelastic analysis of seals for extended service life
p 2371 N94-24408
Postflight hardware evaluation RSRM-29 (STS-54). Case, seals, and joints PFORs, appendix B
[NASA-CR-193899] p 2367 N94-25020

OBJECT-ORIENTED PROGRAMMING
A general model for dynamic and complex information management: The ELEN prototype object manager for software engineering
[ETN-94-95163] p 2588 N94-22880
Asynchronous rendezvous in distributed logic programming
[PB93-220614] p 2448 N94-23096
APLAC: An object-oriented analog circuit simulator and design tool. 6.1 system simulations manual
[PB93-224871] p 2450 N94-23226
An object-oriented approach for parallel self adaptive mesh refinement on block structured grids
p 2469 N94-23697
Object-oriented technologies in a multi-mission data system p 2506 N94-23885
Using Mach threads to control DSN operational sequences p 2477 N94-23916
SIMSAT: An object oriented architecture for real-time satellite simulation p 2197 N94-23940
Telemetry ground system development via the component approach p 2203 N94-23949
A simulation and evaluation of NATO Standardization Agreement (STANAG) 4214
[AD-A273195] p 2297 N94-24554
Declarative Object Manipulation Environment (DOME): Alpha version
[AD-A273233] p 2460 N94-24935

OBSTACLE AVOIDANCE
Object recognition through image understanding for an autonomous mobile robot
[AD-A273206] p 2475 N94-24862

OCEAN BOTTOM
Reactive trace metals as indicators of subduction and ventilation processes in the ocean
[AD-A273585] p 2419 N94-25164
Seafloor characterization/Galapagos propagating rift
[AD-A273586] p 2419 N94-25165
Analysis of modal evolution caused by a weakly range-dependent seabed in shallow water and its application to inversion for geoacoustic properties
[AD-A273656] p 2419 N94-25435

OCEAN CURRENTS
HERACLITUS, phase 1. Harbour Entrance of Rotterdam Radar based Current Related Information for Traffic Guidance of Ships: Feasibility of deriving current profile data from sea surface observations in the Rotterdam (Netherlands) port entrance
[BCRS-93-04] p 2417 N94-24107
An efficient data assimilation algorithm with a gaussian covariance structure
[AD-A273152] p 2418 N94-24671
Vertical motion in the SYNOP central array
[AD-A273593] p 2418 N94-24795

OCEAN DATA ACQUISITIONS SYSTEMS
SeaWiFS technical report series. Volume 9: The simulated SeaWiFS data set, version 1
[NASA-TM-104566-VOL-9] p 2417 N94-23291

OCEAN DYNAMICS
GEWEX Continental-scale International Project (GCIP)
p 2411 N94-24376
Statistical methods in physical oceanography
[AD-A273612] p 2419 N94-24948

OCEAN MODELS
VIERS-1, phase 3
[BCRS-92-24] p 2381 N94-23145
Monte Carlo climate change forecasts with a global coupled ocean-atmosphere model
[MPIM-97] p 2407 N94-23156
Climate variability in a coupled GCM. Part 2: The Indian Ocean and monsoon
[MPIM-104] p 2401 N94-23159
Modal structure of variations in the tropical climate system. Part 2: Origins of the low-frequency mode
[MPIM-96] p 2407 N94-23199
Global ocean modeling on the Connection Machine
[DE94-000888] p 2417 N94-23517
HERACLITUS, phase 1. Harbour Entrance of Rotterdam Radar based Current Related Information for Traffic Guidance of Ships: Feasibility of deriving current profile data from sea surface observations in the Rotterdam (Netherlands) port entrance
[BCRS-93-04] p 2417 N94-24107
Techniques and resources for storm-scale numerical weather prediction p 2414 N94-24392
An efficient data assimilation algorithm with a gaussian covariance structure
[AD-A273152] p 2418 N94-24671
Global acoustic mapping of ocean temperatures (GAMOT)
[AD-A273387] p 2418 N94-24719
Vertical motion in the SYNOP central array
[AD-A273593] p 2418 N94-24795
Statistical methods in physical oceanography
[AD-A273612] p 2419 N94-24948
Seafloor characterization/Galapagos propagating rift
[AD-A273586] p 2419 N94-25165

OCEAN SURFACE
Modes of ocean variability in the tropical Pacific as derived from Geosat altimetry
[MPIM-103] p 2382 N94-23158
Global ocean modeling on the Connection Machine
[DE94-000888] p 2417 N94-23517
The effect of sub-surface volume scattering on the accuracy of ice-sheet altimeter retracking algorithms
[NASA-CR-194825] p 2386 N94-24060
Factors affecting the identification of phytoplankton groups by means of remote sensing
[NASA-TM-108799] p 2387 N94-24403
Free-surface/vorticity interaction
[AD-A273263] p 2335 N94-24686
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A273568] p 2419 N94-24944

OCEAN TEMPERATURE
Global acoustic mapping of ocean temperatures (GAMOT)
[AD-A273387] p 2418 N94-24719

OCEANOGRAPHY
Global acoustic mapping of ocean temperatures (GAMOT)
[AD-A273387] p 2418 N94-24719
Vertical motion in the SYNOP central array
[AD-A273593] p 2418 N94-24795
Statistical methods in physical oceanography
[AD-A273612] p 2419 N94-24948
Active control of oscillatory lift forces on a circular cylinder
[AD-A273243] p 2338 N94-25140

OCTAVES
Artificial neural networks: Application to the optical recognition of music partitions
[ETN-94-95166] p 2470 N94-22884

OFFICE AUTOMATION
Concepts and techniques for an active database approach to office procedure support
[PB94-110749] p 2590 N94-23816

OFFSHORE PLATFORMS
Fire safety engineering research in Norway
[PB93-201630] p 2268 N94-23429

OIL EXPLORATION
Near-surface seismic imaging
[PB94-119096] p 2404 N94-24647

OIL RECOVERY
Measurement of interfacial tension by use of pendant drop video techniques
[DE93-000168] p 2345 N94-24831

OILS
New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane
[PB94-112786] p 2233 N94-23801
Skin friction measurement in complex flows using thin oil film techniques
[NASA-CR-194872] p 2327 N94-24098

OLIGOMERS
Electrochemical and electronic properties of neural and oxidized soluble orthogonally-fused thiophene oligomers
[AD-A273283] p 2260 N94-24815
Metal-catalyzed alkynylation of (Bromophenyl)Oligophenylenes: A rapid route to thermoset precursors of high density monolithic glass-like carbon
[AD-A273219] p 2260 N94-24863
Synthesis of molecular wires by a novel divergent/convergent approach
[AD-A273332] p 2537 N94-25087

OLIVINE
A dynamic melting model for the origin of Apollo 15 olivine-normative and quartz-normative mare basalts
p 2615 N94-24371

OMNIDIRECTIONAL ANTENNAS
L-band mobile terminal antennas for helicopters
p 2289 N94-22835

ON-LINE SYSTEMS
Translative interface for data sharing and integrating: A paradigm for distributed data systems
[DE93-018790] p 2588 N94-22863
A novel process monitoring and control system based on a neural manufacturing concept
[DE94-001516] p 2471 N94-23011
SPDB (science processing database): Quick reference guide p 2383 N94-23597
Particle size measurement for the control of industrial crystallizers
[PB94-119104] p 2562 N94-23766
Columbus system support for telescience operations
p 2505 N94-23877
NASDA's Advanced On-Line System (ADOLIS)
p 2509 N94-23903
Intelligent tutoring and aiding in satellite ground control p 2443 N94-23929
On-line evaluation of multiloop digital controller performance p 2163 N94-25105
On-line control of dynamic systems using feedforward neural networks
[RR-457] p 2476 N94-25307
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 6: Electric Power Industry
[AD-A273668] p 2250 N94-25408
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2
[AD-A273703] p 2463 N94-25456
Factors influencing perceived usability and utility of LIBERTAS at Cranfield: Implications for system modification and user education
[CRANFIELD-AERO-9212] p 2594 N94-25485

ONBOARD DATA PROCESSING
SAW based systems for mobile communications satellites p 2275 N94-22746
Applicability of different onboard routing and processing techniques to mobile satellite systems
p 2278 N94-22767
A European mobile satellite system concept exploiting CDMA and OBP p 2279 N94-22768
Cockpit weather graphics using mobile satellite communications p 2280 N94-22775
Towards real-time stereovision systems for planetary missions p 2370 N94-23422
Fault tolerant onboard packet switch architecture for communication satellites: Shared memory per beam approach
[NASA-TM-106397] p 2201 N94-23567
Advanced technology for a satellite multichannel demultiplexer/demodulator
[NASA-CR-194435] p 2202 N94-23631
UAV current technology and future trends
p 2154 N94-24245

Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264
Modulation and synchronization technique for MF-TDMA system
[NASA-CR-194448] p 2304 N94-25266

OPERATING COSTS
Future trends in NASA space operations
p 2498 N94-23836
Design of an airborne launch vehicle for an air launched space booster
[NASA-CR-195534] p 2198 N94-24860
The Bunny: A simulated commercial air transportation study
[NASA-CR-195537] p 2183 N94-25001

OPERATING SYSTEMS (COMPUTERS)
ACOS: The performance based approach to build a parallel complex object server
[PB93-223816] p 2465 N94-22986
Distributed Operating Systems and Mach. Proceedings of the Spring 1992 Graduate Seminar on Distributed Systems
[PB93-224905] p 2449 N94-23103
Performance measurements of the multimedia testbed on Mach 3.0: Experience writing real-time device drivers, servers, and applications
[AD-A273600] p 2460 N94-24932
Analyzing the properties of user interface software
[AD-A273601] p 2460 N94-24933
The design of the EMPS multiprocessor executive for distributed computing
[ETN-94-95336] p 2468 N94-25062

OPERATIONAL AMPLIFIERS
Fifty years of continuous improvement: What has DOE done for analytical chemistry?
[DE94-002539] p 2234 N94-24548
High speed electronic analog computers using low-gain amplifiers
[AD-D015974] p 2446 N94-25034

OPERATIONAL HAZARDS
Safety guidelines for the operation of the DREO 10 m EMP simulator DREMPS
[DREO-TN-93-5] p 2193 N94-24117

OPERATIONAL PROBLEMS
Operability engineering in the Deep Space Network
p 2514 N94-23930
An examination of the operational error database for air route traffic control centers
[DOT/FAA/AM-93/22] p 2175 N94-24472

OPERATIONS RESEARCH
Tool sharing: An application of max-algebra, part 2
[MEMO-1122] p 2478 N94-22710
A multilevel cost-space approach to solving the balanced long transportation problem p 2483 N94-23678
Design and specification of a generic task model for solving boolean constraint satisfaction problems
[PB94-116841] p 2486 N94-23762
Verification and validation of models
[PB94-110566] p 2456 N94-24507
Tool sharing, part 3
[PB94-111697] p 2467 N94-24524
Throughput time control and due date reliability in tool and die shops
[ISBN-9-03-860182-4] p 2587 N94-25283

OPERATOR PERFORMANCE
Pushing technology to satisfy world applications
[DE94-001365] p 2353 N94-23191
Operability engineering in the Deep Space Network
p 2514 N94-23930
Investigation of time and intensity effects in operator workload and performance
[CTN-94-60927] p 2433 N94-24171

OPERATORS (MATHEMATICS)
Note on the use of spherical vectorfields in Clifford analysis
[PB93-237667] p 2480 N94-23437
A comparison of locally adaptive multigrid methods: LDC, FAC and FIC p 2485 N94-23692
Tensoral for post-processing users and simulation authors p 2333 N94-24169
Some maximality results for effect-valued measures
[PB94-111176] p 2569 N94-24575
Signatures of selfadjoint pencils
[PB94-111127] p 2457 N94-24599
Downward extrapolation of multi-component seismic data
[ISBN-9-09-005213-5] p 2405 N94-25229
Introduction to a behavioral approach for continuous time systems
[ETN-94-95301] p 2492 N94-25277

OPERATORS (PERSONNEL)
Operational training for the mission operations at the Brazilian National Institute for Space Research (INPE)
p 2429 N94-23933

OPHTHALMOLOGY
Vision impairment and corrective considerations of civil airmen
[DOT/FAA/AM-93/21] p 2426 N94-23623

OPTICAL COMMUNICATION
Laser linewidth measurement in the presence of RIN and using the recirculating self heterodyne method
[EUT-92-E-262] p 2347 N94-22874
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1
[AD-A271081] p 2348 N94-23123
Wide band fiber-optic communications
p 2304 N94-23231
Optical subnet concepts for the deep space network
p 2292 N94-23269
A lower bound for routing on a completely connected optical communication parallel computer
[DE93-040752] p 2466 N94-23491
Analysis for the computational modeling of finite cladding and lossy coating effects in fibers
[PB94-111085] p 2544 N94-23732
Measuring electrically charged particle fluxes in space using a fiber optic loop sensor
[NASA-CR-191328] p 2544 N94-23829
Multi-access laser communications terminal
[NASA-CR-191251] p 2295 N94-23830
Preloaded launch locking devices for SILEX
p 2358 N94-24008
Integration and test of high-speed transmitter electronics for free-space laser communications
[NASA-TM-106295] p 2295 N94-24101
Optimization of microscopic and macroscopic second order optical nonlinearities p 2226 N94-24354
Japanese aerospace science and technology 1992. A bibliography with indexes
[NASA-SP-7104] p 2631 N94-24585
Crosstalk analysis of synchronous and asynchronous optical chip interconnects with direct detection
[AD-A273261] p 2311 N94-24685

OPTICAL COMPUTERS
Optical wavelet transform processor
[AD-A273625] p 2546 N94-24731

OPTICAL CORRECTION PROCEDURE
A study on electrostatic quadrupole lenses and their application technologies
[REPT-948] p 2546 N94-24982

OPTICAL COUPLING
An optical ASK and FSK phase diversity transmission system
[EUT-92-E-268] p 2542 N94-23171

OPTICAL DATA PROCESSING
Encoders for space applications p 2363 N94-24046

OPTICAL DISKS
Earth observation archive activities at DRA Farnborough p 2519 N94-23958

OPTICAL EMISSION SPECTROSCOPY
Fifty years of continuous improvement: What has DOE done for analytical chemistry?
[DE94-002539] p 2234 N94-24548
Total light loss optic spectroscopy: Progress towards a fiber optic Raman organic vapor sensor
[DE94-002545] p 2234 N94-24549

OPTICAL EQUIPMENT
Measuring electrically charged particle fluxes in space using a fiber optic loop sensor
[NASA-CR-191328] p 2544 N94-23829
Mesospheric and lower thermospheric winds, temperatures densities, and volume emission rates
[NASA-CR-195147] p 2403 N94-24486
Germanium x ray phase plates for the production of circularly polarized x rays
[DE94-002908] p 2545 N94-24550
Heterodyne array for measurement of target velocity
[AD-D016025] p 2545 N94-24722
A study on electrostatic quadrupole lenses and their application technologies
[REPT-948] p 2546 N94-24982
Solutions of the 2-D Helmoholtz equation for optical waveguides
[DE93-616840] p 2547 N94-25209

OPTICAL FIBERS
SFOLDA: A semiconductor LDA for measurements in complex flows p 2316 N94-22856
Fiber optic detection of laser generated ultrasound for materials characterization
[ISBN-0-315-83541-9] p 2541 N94-22891
NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-194678] p 2571 N94-23230
Output optics for laser velocimeters
[NASA-CASE-ARC-11889-1-SB] p 2543 N94-23309
Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor
[DE94-000331] p 2543 N94-23461
Analysis for the computational modeling of finite cladding and lossy coating effects in fibers
[PB94-111085] p 2544 N94-23732
Measuring electrically charged particle fluxes in space using a fiber optic loop sensor
[NASA-CR-191328] p 2544 N94-23829
Fiber optic detection of ultrasound and its application to cure monitoring
[ISBN-0-315-83424-2] p 2544 N94-24466
Fiber optical angular sensor: Literature study and experimental results
[PB93-204345] p 2545 N94-24529
Total light loss optic spectroscopy: Progress towards a fiber optic Raman organic vapor sensor
[DE94-002545] p 2234 N94-24549
White-light, pressure, and temperature interferopolarimetric sensor featuring optical fibers
[PB93-199792] p 2545 N94-24631
Layered parallel interface for an active antenna array
[AD-D016002] p 2301 N94-25045

OPTICAL FILTERS
Design refinement of multilayer optical thin film devices with two optimization techniques
[DE93-634228] p 2542 N94-22979
Germanium x ray phase plates for the production of circularly polarized x rays
[DE94-002908] p 2545 N94-24550
Investigation of Raman beam cleanup and phase conjugation
[AD-A273157] p 2545 N94-24672

OPTICAL FLOW (IMAGE ANALYSIS)
Extracting heading and temporal range from optic flow: Human performance issues p 2442 N94-25510
Optical information in landing scenes
p 2442 N94-25511

OPTICAL HETERODYNING
Laser linewidth measurement in the presence of RIN and using the recirculating self heterodyne method
[EUT-92-E-262] p 2347 N94-22874

OPTICAL MATERIALS
A fully automated stage for optical waveguide measurements
[AD-A273042] p 2542 N94-22915
Crystal growth of organics for nonlinear optical applications p 2225 N94-24348
Nonlinear optical thin films p 2225 N94-24349
Optimization of microscopic and macroscopic second order optical nonlinearities p 2226 N94-24354
Dipolar relaxation in a second-order nonlinear optical interpenetrating polymer network
[AD-A273626] p 2258 N94-24732
Ultrastructure processing of macromolecular materials
[AD-A273413] p 2258 N94-24782

OPTICAL MEASUREMENT
A fully automated stage for optical waveguide measurements
[AD-A273042] p 2542 N94-22915
Acoustic and optical investigations of superfluid He-3
[PB93-224889] p 2523 N94-23101
Capillary electrokinetic separations with optical detection
[DE94-001639] p 2233 N94-23716
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
Mesospheric and lower thermospheric winds, temperatures densities, and volume emission rates
[NASA-CR-195147] p 2403 N94-24486
Method and apparatus for the non-invasive measurement of pressure inside pipes using a fiber optic interferometer sensor
[AD-D016013] p 2344 N94-24734
A comparison of free-space and fiber mixer performances
[AD-A273558] p 2547 N94-25161
Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357

OPTICAL MEASURING INSTRUMENTS
Design of a surface deformation measuring instrument for the Surface Tension Driven Convection Experiment (STDCE-2)
[NASA-CR-194758] p 2343 N94-23285
Fiber optical angular sensor: Literature study and experimental results
[PB93-204345] p 2545 N94-24529
LOLA: Lunar Optical Long-baseline Array. 1992-1993 space design
[NASA-CR-195533] p 2298 N94-24582
Method and apparatus for the non-invasive measurement of pressure inside pipes using a fiber optic interferometer sensor
[AD-D016013] p 2344 N94-24734
System for cancelling phase noise in an interferometric fiber optic sensor arrangement
[AD-D015994] p 2345 N94-25053

Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357

OPTICAL MEMORY (DATA STORAGE)
A novel process monitoring and control system based on a neural manufacturing concept [DE94-001516] p 2471 N94-23011
Photo-induced and electrooptic properties of (Pb,La)(Zr,Ti)O3 films for optical memories [DE93-019820] p 2542 N94-23202
Earth observation archive activities at DRA Farnborough p 2519 N94-23958

OPTICAL POLARIZATION
Optical spin polarization and state-sensitive detection of a cesium atomic beam [ATR-92(8436)-1] p 2534 N94-24077
The effects of optical feedback on polarization of vertical cavity surface emitting lasers [AD-A273728] p 2351 N94-25445

OPTICAL PROPERTIES
A new automatic design method to develop multilayer thin film devices for high power laser applications [DE93-632490] p 2347 N94-22967
Interferometry in rarefied gas flows [ISL-CO-207/92] p 2318 N94-23160
Transparent conducting thin films for spacecraft applications [NASA-TM-106466] p 2218 N94-23370
Spectroscopic IR ellipsometry of 100 and 001 oriented YBa2Cu3O(7-delta) films [PB93-201481] p 2561 N94-23445
The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596
Method of forming silicon structures with selectable optical characteristics [NASA-CASE-NPO-18625-1-CU] p 2563 N94-23972
Night vision devices and characteristics p 2432 N94-23982
Cockpit/NVG visual integration issues p 2432 N94-23983
Prediction of nonlinear optical properties of organic materials. General theoretical considerations p 2224 N94-24343
Center for advanced electrical and structural polymers [AD-A273415] p 2259 N94-24783
Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893
A study on electrostatic quadrupole lenses and their application technologies [REPT-948] p 2546 N94-24982
Liquidus temperature and optical properties measurement by containerless techniques p 2247 N94-25126
Optical properties and emissivities of liquid metals and alloys p 2248 N94-25129
Preparation and properties of translucent gamma-aluminium oxynitride [ETN-94-95305] p 2263 N94-25281
Results from the VISA project [AD-A273752] p 2406 N94-25540

OPTICAL PUMPING
Optical spin polarization and state-sensitive detection of a cesium atomic beam [ATR-92(8436)-1] p 2534 N94-24077
Experimental and theoretical features of strong suppression and shifting phenomena in odd-photon resonant excitations and stimulated emissions [DE94-000341] p 2535 N94-24510
Computer modeling of nonlinearities p 2458 N94-24661
Temporal model of an optically pumped co-doped solid state laser [NASA-TM-109680] p 2350 N94-24851

OPTICAL PYROMETERS
Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor [DE94-000331] p 2543 N94-23461

OPTICAL RADAR
Micro pulse laser radar [NASA-CASE-GSC-13493-1] p 2294 N94-23827
Tropospheric Ozone Lidar Intercomparison Experiment, TROLIX 1991 [MPIM-102] p 2402 N94-24108
Nonlinear dynamical control of lasers [AD-A273359] p 2350 N94-24938
A comparison of free-space and fiber mixer performances [AD-A273558] p 2547 N94-25161
Improvement of system properties of a pulsed laser Doppler anemometer with respect to an optical amplifier [DLR-FB-93-19] p 2547 N94-25305
Results from the VISA project [AD-A273752] p 2406 N94-25540

OPTICAL RESONANCE
The resonance lines of MG2 as diagnostics of the upper solar chromosphere [NASA-CR-195084] p 2627 N94-24300

OPTICAL SCANNERS
Microstructural analysis of the 2195 aluminum-lithium alloy welds p 2251 N94-24448

OPTICAL SWITCHING
The effects of optical feedback on polarization of vertical cavity surface emitting lasers [AD-A273728] p 2351 N94-25445

OPTICAL THICKNESS
Cloud-free aerosol optical depth determination over oceans from satellite radiometry [DE94-001897] p 2386 N94-23779
Participation in TOMS missions [NASA-CR-195110] p 2398 N94-24078
Mars dust-driven tides and their impact on the thermosphere p 2617 N94-24876

OPTICAL WAVEGUIDES
A fully automated stage for optical waveguide measurements [AD-A273042] p 2542 N94-22915
Conformal method of fabricating and optical waveguide on a semiconductor substrate [AD-D015988] p 2546 N94-25043
Solutions of the 2-D Helmoholtz equation for optical waveguides [DE93-616840] p 2547 N94-25209

OPTIMAL CONTROL
A mixed H2/H(infinity) function for a discrete time system [MEMO-COSOR-92-36] p 2480 N94-23144
A reliable algorithm for optimal control synthesis [NASA-CR-194809] p 2472 N94-23332
Coordinate-free interpretations of the optimal costs for Lq problems subject to implicit systems [PB94-118700] p 2473 N94-23760
Identification of integrated airframe: Propulsion effects on an F-15 aircraft for application to drag minimization [NASA-TM-4532] p 2188 N94-24106
Optimal feedback control of turbulent channel flow p 2327 N94-24139
Approximate optimal guidance for the advanced launch system [NASA-CR-4568] p 2198 N94-24752
Control of nonlinear systems represented in quasilinear form [NASA-CR-194840] p 2475 N94-24760
Optimal RTLS abort trajectories for an HL-20 personnel launch vehicle p 2165 N94-25114
Genetic algorithms in control systems engineering [RR-470] p 2463 N94-25315
Flight controller design using mixed H2/H infinity optimization with a singular H infinity constraint [AD-A273831] p 2191 N94-25525

OPTIMIZATION
The Westinghouse Series 1000 Mobile Phone: Technology and applications p 2284 N94-22800
A mixed H2/H(infinity) function for a discrete time system [MEMO-COSOR-92-36] p 2480 N94-23144
A structural design decomposition method utilizing substructuring [NASA-TM-107750] p 2376 N94-23368
Object oriented simulation implementation in support of robust system design [DE93-011687] p 2452 N94-23488
An engineering code to analyze hypersonic thermal management systems p 2320 N94-23636
Low noise electric motor p 2315 N94-23989
A constrained optimization technique for arbitrary antenna arrays and various performance indices [ISBN-0-315-59455-1] p 2297 N94-24179
Application of concurrent engineering principles to aircraft structural design p 2178 N94-24321
Current and future design methods for large transport aircraft p 2179 N94-24324
Trends of design methodology of airframe p 2179 N94-24327
Next generation initiation techniques p 2412 N94-24383
Discrete applied mathematics [AD-A273552] p 2488 N94-24561
A programming environment for distributed complex computing. An overview of the Framework for Interdisciplinary Design Optimization (FIDO) project. NASA Langley TOPS exhibit H120b [NASA-TM-109058] p 2457 N94-24603
Tokamak Physics Experiment (TPX) cost and performance trade studies using supercode [DE94-002720] p 2553 N94-24628
The Third Twente Workshop on Graphs and Combinatorial Optimization: Abstracts and late extended abstracts [PB94-110954] p 2489 N94-24652
Runtime support and compilation methods for user-specified data distributions [NASA-CR-191587] p 2458 N94-24679
Sensitivity analysis of list scheduling heuristics [PB93-237766] p 2468 N94-24764
Merits and limitations of optimality criteria method for structural optimization [NASA-TP-3373] p 2378 N94-24845
RIACS/USRA [NASA-CR-195117] p 2631 N94-25003
Computing techniques in mission planning p 2522 N94-25012
On the characterization and optimization of high-speed silicon bipolar transistors [ETN-94-95367] p 2313 N94-25253
MIMO system identification for H(infinity) robust control: A frequency domain approach with minimum error bounds [ETN-94-95354] p 2476 N94-25262
New algorithm for minimizing (chi)(sup 2) functionals with constraints [DE93-616800] p 2463 N94-25432

OPTOELECTRONIC DEVICES
Visual Problems in Night Operations [AGARD-LS-187] p 2431 N94-23976
Ferroelectric thin films 3 [AD-A273394] p 2565 N94-25027
Bridge type optoelectronic sample and hold circuit [AD-D015986] p 2312 N94-25042
Radar E-O image fusion p 2306 N94-25503

OPTOMETRY
Image remapping strategies applied as protheses for the visually impaired p 2444 N94-25363

ORBIT CALCULATION
A review of GPS-based tracking techniques for TDRS orbit determination p 2196 N94-23257
New approaches for tracking earth orbiters using modified GPS ground receivers p 2196 N94-23258
Improved thermal force modeling for GPS satellites p 2207 N94-23259
Real-time on-board orbit determination with DORIS p 2196 N94-23919
TOPEX/Poseidon precision orbit determination production and expert system p 2196 N94-23920
Kalman filtering applied to real-time monitoring of apogee maneuvers p 2196 N94-23923
Navigation of space VLBI missions: Radioastron and VSOP p 2513 N94-23926
The geo-control system for station keeping and colocation of geostationary satellites p 2464 N94-23927
Comparison of time integration methods for the evolution of galaxies [PB94-111671] p 2602 N94-24522

ORBIT INSERTION
MERCATOR: Methods and Realization for Control of the Attitude and the Orbit of spacecraft p 2202 N94-23925
HISPASAT launch and early operations phases: Computation and monitoring of geostationary satellite positioning p 2514 N94-23928

ORBIT PERTURBATION
Improved thermal force modeling for GPS satellites p 2207 N94-23259

ORBIT TRANSFER VEHICLES
Power beaming to space using a nuclear reactor-pumped laser [DE94-001208] p 2348 N94-23185
Lunar transportation system [NASA-CR-195540] p 2365 N94-24805
Space transfer vehicle concepts and requirements. Volume 4: Summary of special studies [NASA-CR-193918] p 2201 N94-24970

ORBITAL ASSEMBLY
Manned Mars mission on-orbit operations FTS capabilities assessment [NASA-CR-189328] p 2430 N94-23080

ORBITAL ELEMENTS
SeaWiFS technical report series. Volume 11: Analysis of selected orbit propagation models for the SeaWiFS mission [NASA-TM-104566-VOL-11] p 2417 N94-23338

ORBITAL MANEUVERS
MERCATOR: Methods and Realization for Control of the Attitude and the Orbit of spacecraft p 2202 N94-23925
The geo-control system for station keeping and colocation of geostationary satellites p 2464 N94-23927
HISPASAT launch and early operations phases: Computation and monitoring of geostationary satellite positioning p 2514 N94-23928

ORBITAL MECHANICS
Improved thermal force modeling for GPS satellites p 2207 N94-23259

CNES organization for station positioning of geostationary satellites p 2501 N94-23857
Steady motions of rigid body satellites in a central gravitational field
[AD-A273742] p 2206 N94-25532

ORBITAL POSITION ESTIMATION
A review of GPS-based tracking techniques for TDRS orbit determination p 2196 N94-23257
New approaches for tracking earth orbiters using modified GPS ground receivers p 2196 N94-23258
Real-time on-board orbit determination with DORIS p 2196 N94-23919
TOPEX/Poseidon precision orbit determination production and expert system p 2196 N94-23920
Satellite autonomous navigation and orbit determination using magnetometers p 2156 N94-24258

ORBITAL RENDEZVOUS
Telerobotic rendezvous and docking vision system architecture
[NASA-CR-191329] p 2204 N94-23828

ORBITAL RESONANCES (CELESTIAL MECHANICS)
The design and networking of dynamic satellite constellations for global mobile communication systems p 2288 N94-22826

ORBITAL SERVICING
Graphical programming: A systems approach for telerobotic servicing of space assets
[DE93-019016] p 2472 N94-23201
Ground operation of robotics on Space Station Freedom p 2371 N94-23841
An intelligent planning and scheduling system for the HST servicing missions p 2520 N94-23964
Illumination requirements for operating a space remote manipulator p 2435 N94-24195

ORBITAL WORKERS
A simulation system for Space Station extravehicular activity p 2434 N94-24192

ORBITS
Correlations in the actions of periodic orbits derived from quantum chaos
[DE93-616866] p 2571 N94-25340
Orbit spaces over commutative rings and projectives as semi-isomorphisms
[DE93-616822] p 2493 N94-25473

ORDER-DISORDER TRANSFORMATIONS
Disorder effects on small-polaron formation and hopping
[DE94-001205] p 2534 N94-23804
Two micron stimulated emission of activated insulating crystals
[REPT-94-002] p 2565 N94-25025

ORGANIC COMPOUNDS
Ordered organic thin films self-assembled from the vapor phase p 2223 N94-24339
On superconductivity of alpha-(BEDT-TTF)2KHg(SCN)4
[REPT-A-2660] p 2564 N94-24978

ORGANIC LIQUIDS
Electrochemically mediated polymerization of 2-pentadecylaniline confined to a planar liquid-liquid interface
[AD-A273541] p 2259 N94-24792

ORGANIC MATERIALS
Algorithm-development activities
[NASA-CR-193225] p 2420 N94-23538
Microgravity Studies of Organic and Polymeric Materials
[NASA-CP-3250] p 2223 N94-24338
Prediction of nonlinear optical properties of organic materials. General theoretical considerations p 2224 N94-24343
Crystal growth of organics for nonlinear optical applications p 2225 N94-24348
Test methods for composites: A status report. Volume 1: Tension test methods
[AD-A273501] p 2230 N94-24942
Test methods for composites: A status report. Volume 3: Shear test methods
[AD-A273561] p 2230 N94-25163

ORGANIZATIONS
International organizations to enable world-wide mobile satellite services p 2275 N94-22749
Towards a new radiation protection organization
[FOA-C-40304-4.3] p 2437 N94-24292
SEMATECH, a case study: Analysis of a government-industry partnership
[AD-A273166] p 2586 N94-24683

ORGANOMETALLIC COMPOUNDS
Organometallic chemistry of bimetallic compounds
[DE94-002313] p 2238 N94-22897
Synthesis and in-vivo detection of boronated compounds for use in BNCT
[DE94-001899] p 2233 N94-23780

Scanning probe lithography. 2: Selective chemical vapor deposition of copper into scanning tunneling microscope-defined patterns
[AD-A273304] p 2547 N94-25144

ORIFICE FLOW
Dispersion of fire suppression agents discharged from high pressure vessels: Establishing initial/boundary conditions for the flow outside the vessel
[PB94-103660] p 2172 N94-23810

ORIFICES
Shock-induced turbulent flow in baffle systems
[DE94-001532] p 2319 N94-23470
Optimization of orifice geometry for cross-flow mixing in a cylindrical duct
[NASA-TM-106436] p 2481 N94-23593
CFD assessment of orifice aspect ratio and mass flow ratio on jet mixing in rectangular ducts
[NASA-TM-106434] p 2187 N94-24082

OROGRAPHY
GPS survey of the western Tien Shan
[NASA-CR-195174] p 2175 N94-24826
The influence of orography on the transport of atmospheric constituents p 2619 N94-24886

ORTHOGONAL FUNCTIONS
Polynomials orthogonal with respect to an inner product involving differences
[PB94-110731] p 2489 N94-24572
Responses of a finite baffled plate subject to turbulent and mean flow excitations
[NASA-CR-191570] p 2334 N94-24605
Nonlinear aerodynamic modeling using multivariate orthogonal functions p 2164 N94-25110
Two-dimensional pattern analysis and classification using a complex orthogonal estimation algorithm
[RR-475] p 2463 N94-25321

ORTHOGONAL MULTIPLEXING THEORY
An introduction to digital modulation and OFDM techniques
[BBC-RD-1993/10] p 2295 N94-24086

ORTHOGONALITY
Nested Krylov methods and preserving the orthogonality p 2483 N94-23681

ORTHONORMAL FUNCTIONS
Deviation equations of Synge and Schild in spaces with affine connection and metric, and equations for gravitational waves detectors
[DE93-616852] p 2571 N94-25339

ORTHOSTATIC TOLERANCE
Autogenic-feedback training: A potential treatment for post-flight orthostatic intolerance in aerospace crews
[NASA-TM-108785] p 2426 N94-24102
Development of a model to assess orthostatic responses p 2427 N94-25376
Evaluation of bioimpedance for the measurement of physiologic variables as related to hemodynamic studies in space flight p 2427 N94-25378

ORTHOTROPIC PLATES
Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773

OSCILLATING CYLINDERS
Forces on an oscillating cylinder and related fluid flow phenomena
[ISBN-9-09-005589-4] p 2338 N94-25243

OSCILLATIONS
The current status of observational constraints on cosmic strings
[DE94-001505] p 2601 N94-23010
Accelerator-based neutrino oscillation searches
[DE94-000818] p 2626 N94-23515
Lateral high frequency oscillations and stability of a wheel rolling on a flexible track p 2269 N94-23585
Surface observations of stick-slip oscillations in tightly conformal wheel/rail contacts p 2270 N94-23588
Multigrid methods for differential equations with highly oscillatory coefficients p 2484 N94-23685
Nonlinear dynamics applied to atmospheric prediction
[AD-A273437] p 2404 N94-24674

OSCILLATORS
Coherence lost? Not-so-fast escapes from the in-phase attractor of a set of globally coupled nonlinear oscillators
[DE94-000799] p 2557 N94-22940
Modulation characteristics of a high-power semiconductor Master Oscillator Power Amplifier (MOPA)
[NASA-TM-104577] p 2308 N94-23281
Controlling regular and chaotic dynamics in the Duffing-Ueda oscillator
[RR-477] p 2523 N94-25323
Deviation equations of Synge and Schild in spaces with affine connection and metric, and equations for gravitational waves detectors
[DE93-616852] p 2571 N94-25339

OUTPUT
On dynamic input-output linearization of discrete-time nonlinear systems
[MEMO-1123] p 2447 N94-22711

OVERPRESSURE
Variability of measured sonic boom signatures. Volume 1: Technical report
[NASA-CR-191483-VOL-1] p 2526 N94-24172
Variability of measured sonic boom signatures. Volume 2: Data report
[NASA-CR-191483-VOL-2] p 2526 N94-24173

OXIDATION
Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments
[DE93-040161] p 2231 N94-22933
Influence of sintering atmospheres on the aluminum sintering characteristics
[DE93-632412] p 2239 N94-22965
Modelling of solid polymer and direct methanol fuel cells: Phenomenological equations and analytical solutions
[PB93-224897] p 2390 N94-23102
Advances in direct oxidation methanol fuel cells p 2393 N94-23361
The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
On the stability of the process of formation of combustion generated particles by coagulation and simultaneous shrinkage due to particle oxidation p 2159 N94-24274
Segregation and oxidation studies of Al-Li and Al-Mg alloys
[ISBN-0-315-83993-7] p 2244 N94-24469
Design of novel catalysts for the partial oxidation of methane to methanol
[PB94-114212] p 2235 N94-24920

OXIDATION RESISTANCE
Evaluation of A5Si3Z(x) intermetallics for use as high temperature structural materials
[DE93-041127] p 2227 N94-22977
Advanced materials for radiation-cooled rockets p 2214 N94-23052
New method for increasing machine service-life, phase 2
[PB93-200707] p 2354 N94-23533
High temperature, oxidation resistant noble metal-Al alloy thermocouple
[NASA-CASE-LEW-15515-1] p 2343 N94-23826

OXIDATION-REDUCTION REACTIONS
Electrochemically mediated polymerization of 2-pentadecylaniline confined to a planar liquid-liquid interface
[AD-A273541] p 2259 N94-24792

OXIDES
Low temperature diffusion of hydrogenic species in oxide crystals: Radiation induced diffusion
[DE94-000374] p 2558 N94-22957
The structure and spin dynamics of lanthanide-bearing silicate glasses
[DE94-001320] p 2252 N94-22992
PEM regenerative fuel cells p 2392 N94-23358
Contaminant effects in solid oxide fuel cells
[DE94-002963] p 2395 N94-23785

OXIDIZERS
Multiple flames in counterflow spray combustion p 2161 N94-24284
Advanced launch system. Advanced development oxidizer turbopump program
[NASA-CR-193920] p 2367 N94-25174

OXYGEN
A novel method for determination of transport parameters of H2 and O2 in PEMFCs
[DE94-001492] p 2389 N94-22962
Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897
Design of novel catalysts for the partial oxidation of methane to methanol
[PB94-114212] p 2235 N94-24920
A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure
[AD-A273488] p 2427 N94-24950
The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics
[AD-A273164] p 2262 N94-25136

OXYGEN ATOMS
Method and apparatus for producing a thermal atomic oxygen beam
[NASA-CASE-LEW-15614-1] p 2534 N94-23825

OXYGEN FLUORIDES
Research for electric energy systems
[DE94-001839] p 2293 N94-23719

OXYGEN IONS
Multi-ion, multi-event test of ion cyclotron resonance heating
[NASA-CR-194859] p 2540 N94-23495
OXYGEN PRODUCTION
Recent advances in SPE (tm) water electrolyzer
p 2393 N94-23362
Nutrients and light as factors controlling phytoplankton biomass on the Dutch continental shelf (North Sea), 1988-1990
[PB94-111143] p 2418 N94-24601
OXYGEN SPECTRA
JOVE NASA-FIT program: Microgravity and aeronomy projects
[NASA-CR-195121] p 2631 N94-24493
OXYGENATION
Fatigue crack growth rate studies of medium sulfur low alloy steels tested in high temperature water
[DE93-040437] p 2238 N94-22861
OZONE
Overview of global greenhouse effects
[DE93-041165] p 2396 N94-22887
High precision double four bar linkage mechanism for interferometric linear scanning p 2359 N94-24013
Participation in TOMS missions
[NASA-CR-195110] p 2398 N94-24078
Tropospheric Ozone Lidar Intercomparison Experiment, TROLIX 1991
[MPIM-102] p 2402 N94-24108
Nimbus-7 Total Ozone Mapping Spectrometer (TOMS) data products user's guide
[NASA-RP-1323] p 2410 N94-24355
Design of a vehicle based system to prevent ozone loss
[NASA-CR-195498] p 2180 N94-24479
Ozone depletion, paradigms, and politics
[DE94-001600] p 2398 N94-24506
Cloud, dust, and ozone vertical profiles from solar occultation measurements: Implications for dynamics
p 2617 N94-24877
OZONE DEPLETION
US Department of Energy phaseout of CFC-refrigerants
[DE94-001668] p 2397 N94-23016
Ozone depletion, paradigms, and politics
[DE94-001600] p 2398 N94-24506
OZONOSPHERE
Ozone depletion, paradigms, and politics
[DE94-001600] p 2398 N94-24506

P

P WAVES
Downward extrapolation of multi-component seismic data
[ISBN-9-09-005213-5] p 2405 N94-25229
Decomposition of multi-component measurements into P and S waves
[ISBN-9-09-005197-X] p 2405 N94-25251
P-N JUNCTIONS
Method for fabricating self-aligned gate diffused junction field effect transistor
[AD-D015975] p 2312 N94-25035
PACIFIC OCEAN
Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992
[AD-A273400] p 2416 N94-25071
PACKET SWITCHING
Design and implementation considerations of a MSAT packet data network p 2280 N94-22778
Fault tolerant onboard packet switch architecture for communication satellites: Shared memory per beam approach
[NASA-TM-106397] p 2201 N94-23567
Fast simulation of packet loss rates in a shared buffer communications switch
[NASA-CR-191556] p 2457 N94-24638
PACKET TRANSMISSION
Design and implementation considerations of a MSAT packet data network p 2280 N94-22778
The EURECA telecommanding chain: Experience with packet telecommand and telemetry systems
p 2305 N94-23909
Modeling of the ground-to-SSFMB link networking features using SPW p 2306 N94-25381
PACKETS (COMMUNICATION)
Design and implementation considerations of a MSAT packet data network p 2280 N94-22778
A packet-based concept for spacecraft command planning p 2504 N94-23873
AMFESYS: Modelling and diagnosis functions for operations support p 2506 N94-23887
The European Space Agency standard for space packet utilisation p 2203 N94-23954
Fast simulation of packet loss rates in a shared buffer communications switch
[NASA-CR-191556] p 2457 N94-24638
PACKING DENSITY
The 2-D polymerized Langmuir-Blodgett films studied by STM
[AD-A273542] p 2261 N94-24930
PADE APPROXIMATION
Unsteady jet flow computation towards noise prediction
[NASA-CR-194449] p 2153 N94-23553
Two-point PADE approximants for Stieltjes series
p 2490 N94-24768
PAIR PRODUCTION
Low mass muon pair production in 450 GeV p-Be collisions
[PB94-110699] p 2533 N94-23746
Photon-photon collisions at the next linear collider: Theory
[DE93-041025] p 2534 N94-23803
PALLADIUM
Selective hydrogen separation by palladium-based composite membranes
[PB93-201671] p 2254 N94-23431
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789
PALLADIUM ALLOYS
Interplay of magnetic and superconducting heavy fermion ground states
[DE94-000680] p 2240 N94-23003
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200
PANEL METHOD (FLUID DYNAMICS)
A numerical study of airplanes flying in proximity
[AD-A273373] p 2173 N94-24718
PANELS
Out of plane gradients in laminated composites
[NASA-CR-194875] p 2228 N94-23566
Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction
[NASA-CR-189645] p 2525 N94-23698
The Columbus solar array mechanisms
p 2356 N94-23994
Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260
Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773
Evaluation of the UH-1N instrument panel
[AD-A273145] p 2186 N94-24774
PARABOLIC DIFFERENTIAL EQUATIONS
The characterization of reaction-convection-diffusion processes by travelling waves
[MEMO-1111] p 2273 N94-22729
A nonlinear degenerating parabolic problem from the theory of type 2 superconductors
[MEMO-1112] p 2555 N94-22730
Balanced truncation is Hankel-norm optimal when used to approximate a finite-difference model of a parabolic PDE
[OUEL-1921/92] p 2492 N94-25324
Applications of the homogenization method to flow and transport in porous media
[BER-9110] p 2340 N94-25467
PARABOLIC REFLECTORS
Development steps on the basis of test with the LOCSTAR reflector deployment mechanism
p 2356 N94-23998
PARACHUTES
Radially constructed cruciform parachute
[CA-PATENT-1323021] p 2168 N94-24182
PARADOXES
On non-informativeness in a classical Bayesian inference problem
[MEMO-COSOR-92-35] p 2494 N94-23143
PARALLEL COMPUTERS
Users manual for the Chameleon parallel programming tools
[DE94-001934] p 2465 N94-22973
Modeling parallelism and synchronization
[ETN-94-95179] p 2465 N94-23134
Linear time algorithm to schedule trees with communication delays optimally on two machines
[PB93-237782] p 2451 N94-23441
Applications of the Aurora parallel PROLOG system to computational molecular biology
[DE93-041166] p 2420 N94-23468
The instant sequencing task: Toward constraint-checking a complex spacecraft command sequence interactively p 2504 N94-23875
Discrete sensitivity derivatives of the Navier-Stokes equations with a parallel Krylov solver
[NASA-TM-106481] p 2265 N94-24301
High-performance computing and communications
[DE94-002215] p 2457 N94-24566
Transputer benchmarks and performance comparisons with other computing machines
[RR-467] p 2446 N94-25312
PARALLEL FLOW
Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464
PARALLEL PLATES
A study of non-ideal focus properties of 30 deg parallel plate energy analyzers
[NIFS-263] p 2311 N94-24457
PARALLEL PROCESSING (COMPUTERS)
Contribution to geometric and dynamic modeling of parallel robots
[LAAS-93089] p 2470 N94-22904
Users manual for the Chameleon parallel programming tools
[DE94-001934] p 2465 N94-22973
Implementation and parallelization of fast matrix multiplication for a fast Legendre transform
[DE94-002184] p 2478 N94-22975
ACOS: The performance based approach to build a parallel complex object server
[PB93-223816] p 2465 N94-22986
Asynchronous rendezvous in distributed logic programming
[PB93-220614] p 2448 N94-23096
Incomplete corrections in nonlinear problems
[PB93-225746] p 2479 N94-23106
Programming in Fortran M
[DE94-000541] p 2450 N94-23207
Automated parallelization of timed Petri-net simulations
[NASA-CR-191574] p 2451 N94-23341
Linear time algorithm to schedule trees with communication delays optimally on two machines
[PB93-237782] p 2451 N94-23441
A lower bound for routing on a completely connected optical communication parallel computer
[DE93-040752] p 2466 N94-23491
Extending substructure based iterative solvers to multiple load and repeated analyses
[NASA-CR-194822] p 2466 N94-23504
Experience with parametric binary dissection
[NASA-CR-191552] p 2473 N94-23558
Real-time dynamics and control strategies for space operations of flexible structures
[NASA-CR-194794] p 2203 N94-23618
Vectorization and parallelization of the finite strip method for dynamic Mindlin plate problems
p 2483 N94-23679
An object-oriented approach for parallel self adaptive mesh refinement on block structured grids
p 2469 N94-23697
Multi-set extended relational algebra: A formal approach to a practical issue
[PB94-110830] p 2486 N94-23725
Advanced design concepts for open distributed systems development
[PB94-110897] p 2454 N94-23751
Preemptive scheduling in a two-stage multiprocessor flow shop is Np-hard
[PB94-111648] p 2467 N94-23756
Three, four, five, six or the complexity of scheduling with communication delays
[PB94-111630] p 2467 N94-23767
High performance, low cost, self-contained, multipurpose PC based ground systems
p 2516 N94-23943
Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264
The design of a standard message passing interface for distributed memory concurrent computers
[DE94-002536] p 2446 N94-24538
High-performance computing and communications
[DE94-002215] p 2457 N94-24566
A programming environment for distributed complex computing. An overview of the Framework for Interdisciplinary Design Optimization (FIDO) project. NASA Langley TOPS exhibit H120b
[NASA-TM-109058] p 2457 N94-24603
Runtime support and compilation methods for user-specified data distributions
[NASA-CR-191587] p 2458 N94-24679
Optimizing parallelization
[AD-A273565] p 2467 N94-24692
Sensitivity analysis of list scheduling heuristics
[PB93-237766] p 2468 N94-24764

RIACS/USRA
[NASA-CR-195117] p 2631 N94-25003
A parallel algorithm for filtering gravitational waves from coalescing binaries
[DE93-616845] p 2604 N94-25212
Multiprocessor scheduling with communication delays
[ETN-94-95346] p 2468 N94-25221
Designing parallel programs of parameterized granularity
[ETN-94-95302] p 2468 N94-25278
A design method for parallel programs
[ETN-94-95331] p 2469 N94-25282
Parallel processing methods for space based power systems p 2222 N94-25352
The transputer
[AD-A273688] p 2446 N94-25438
Expert system rule-base evaluation using real-time parallel processing
[AD-A273701] p 2469 N94-25454

PARALLEL PROGRAMMING
Users manual for the Chameleon parallel programming tools
[DE94-001934] p 2465 N94-22973
Installation of an artificial neural network on distributed memory microprocessors
[ETN-94-95175] p 2471 N94-23152
Applications of the Aurora parallel PROLOG system to computational molecular biology
[DE93-041166] p 2420 N94-23468
The Automated Instrumentation and Monitoring System (AIMS) reference manual
[NASA-TM-108795] p 2452 N94-23510
Arc consistency problem: An exercise in parallel programming with shared objects
[PB94-110590] p 2466 N94-23706
Object distribution in orca using compile-time and run-time techniques
[PB94-110574] p 2453 N94-23745
NASA high performance computing and communications program
[NASA-TM-4554] p 2591 N94-24337
The Adam language: Ada extended with support for multiway activities
[NASA-CR-4565] p 2456 N94-24480
An integrated runtime and compile-time approach for parallelizing structured and block structured applications
[NASA-CR-191554] p 2458 N94-24740
Design and implementation of a distributed version of the NASA Engine Performance Program
[NASA-CR-194475] p 2462 N94-25179
Designing parallel programs of parameterized granularity
[ETN-94-95302] p 2468 N94-25278
A design method for parallel programs
[ETN-94-95331] p 2469 N94-25282
Parallel processing methods for space based power systems p 2222 N94-25352

PARAMETER IDENTIFICATION
Identification for robust control using an H(sub infinity) norm
[EUT-92-E-261] p 2470 N94-22873
Failure-proof estimation under conditions of lack of information p 2158 N94-24267
A comparison of approximate interval estimators for the Bernoulli parameter
[NASA-CR-191585] p 2458 N94-24680
Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data
[NASA-CR-194838] p 2190 N94-24804
Advanced ballistic range technology
[NASA-CR-195198] p 2165 N94-25169
Frequency response functions for nonlinear rational models
[RR-471] p 2492 N94-25318

PARAMETERIZATION
Atmospheric numerical modeling resource enhancement and model convective parameterization/scale interaction studies
[NASA-CR-194769] p 2400 N94-23124
On testing two major cumulus parameterization schemes using the CSU regional atmospheric modeling system
[DE94-000703] p 2407 N94-23284
Parameterization of sub-grid scale convection
p 2413 N94-24386
Session on cumulus parameterization
p 2414 N94-24394
Joint sessions on modeling of boundary layer and radiative transfer processes p 2414 N94-24396
Super Beltrami differentials and N equal to 4 superconformal anomalies
[DE93-613047] p 2491 N94-25166
MIMO system identification for H(infinity) robust control: A frequency domain approach with minimum error bounds
[ETN-94-95354] p 2476 N94-25262
Designing parallel programs of parameterized granularity
[ETN-94-95302] p 2468 N94-25278

PARKING ORBITS
Prediction of three sigma maximum dispersed density for aerospace applications p 2207 N94-23654

PARTIAL DIFFERENTIAL EQUATIONS
A working algorithm to isolate integrable surfaces in E cubed
[SSCL-PREPRINT-761] p 2452 N94-23518
A dual reciprocal boundary element formulation for viscous flows p 2325 N94-23666
A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667
Implementing abstract multigrid or multilevel methods
p 2483 N94-23682
Multigrid methods for a semilinear PDE in the theory of pseudoplastic fluids p 2341 N94-23689
Wavelet multiresolution analyses adapted for the fast solution of boundary value ordinary differential equations
p 2485 N94-23691
An object-oriented approach for parallel self adaptive mesh refinement on block structured grids
p 2469 N94-23697
On the dynamics of approximating schemes for dissipative nonlinear equations p 2332 N94-24168
Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280
Modelling the Shuttle Remote Manipulator System: Another flexible model p 2371 N94-25350
Development of programmable artificial neural networks p 2477 N94-25370

PARTIAL PRESSURE
Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments
[DE93-040161] p 2231 N94-22933

PARTICLE ACCELERATOR TARGETS
An antiproton driver for ICF propulsion
p 2217 N94-23069

PARTICLE ACCELERATORS
Report of the Joint Seminar on Solid State Physics, Atomic and Molecular Physics, and Materials Science in the Energy Region of Tandem Accelerators
[DE93-508268] p 2548 N94-22924
Search for the top quark and other new particles at D0
[DE94-001220] p 2535 N94-24515
Electro-weak, QCD and top physics at the Tevatron
[DE94-002304] p 2535 N94-24611
Welding of niobium to stainless
[DE94-003365] p 2365 N94-24614
The L3 visualization system and its use in the Z(zero) line shape analysis
[ETN-94-95382] p 2537 N94-25231

PARTICLE COLLISIONS
Low p(sub T) photon production in proton-nucleus collisions at 18 GeV/c
[DE94-001380] p 2532 N94-23007
A measurement of the forward-backward asymmetry and sin(sup 2)(theta)(sub W) from the process Z(sup 0) (yields) (mu)(sup +)(mu)(sup (minus)) at (radical)s = 1.8 TeV
[DE94-001908] p 2532 N94-23018
Calculations of Bose-Einstein correlations from Relativistic Quantum Molecular Dynamics
[DE94-000794] p 2569 N94-23453
Low mass muon pair production in 450 GeV p-Be collisions
[PB94-110699] p 2533 N94-23746
Photon-photon collisions at the next linear collider: Theory
[DE93-041025] p 2534 N94-23803
Search for the top quark and other new particles at D0
[DE94-001220] p 2535 N94-24515
Electro-weak, QCD and top physics at the Tevatron
[DE94-002304] p 2535 N94-24611
Analysis of SOFCAL calibration data
[NASA-CR-193910] p 2345 N94-25000

PARTICLE DENSITY (CONCENTRATION)
The influence of flow type, particle type and gravity on orthokinetic coagulation
[ETN-94-95333] p 2267 N94-25060

PARTICLE DIFFUSION
Recent developments in the mathematical modelling and physical understanding of transport and dispersion in aquatic systems, with special reference to tidal waters
[PB94-111135] p 2418 N94-24600

PARTICLE EMISSION
Superconducting cosmic strings near the electroweak scale and cosmic-ray propagation
[MPI-PHE/93-05] p 2629 N94-25459

PARTICLE ENERGY
Examination of the response capacity of a silicon pixel detector for ions and molecules in the energy area 100 to 300 keV
[MPE-241] p 2346 N94-25415

PARTICLE FLUX DENSITY
Measuring electrically charged particle fluxes in space using a fiber optic loop sensor
[NASA-CR-191328] p 2544 N94-23829

PARTICLE IMAGE VELOCIMETRY
Droplet turbulence interactions under subcritical and supercritical conditions p 2211 N94-23036

PARTICLE INTERACTIONS
Electron spectroscopic studies of the neutralization of slow multicharged ions during interactions with a metal surface
[DE93-041046] p 2532 N94-22956
Computer modeling of nonlinearities
p 2458 N94-24661
Thermophysical properties of simple liquid metals: A brief review of theory p 2248 N94-25130
On the connection of classical mechanics, physical kinetics and quantum theory
[DE93-616823] p 2570 N94-25207

PARTICLE MASS
Low mass muon pair production in 450 GeV p-Be collisions
[PB94-110699] p 2533 N94-23746
Stitching the Yukawa quilt
[PB93-204477] p 2569 N94-24532

PARTICLE PRODUCTION
B-quark production at hadron colliders
[DE94-001459] p 2534 N94-23806
A research of possibility for negative muon production by a low energy electron beam accompanying ion beam
[NIFS-266] p 2536 N94-24868
Bottom quark production at the Z resonance
[ISBN-9-09-006217-3] p 2538 N94-25255
Behavior of the intermittency exponents and a quark-gluon plasma formation in the heavy ion collisions
[DE93-616869] p 2541 N94-25342
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476

PARTICLE SIZE DISTRIBUTION
Development of a droplet breakup model considering aerodynamic and droplet collision effects
p 2213 N94-23045
Characterization of 3-D particle distributions and effects on recrystallization studied by computer simulation
[PB93-201408] p 2562 N94-23535
Gas-grain simulation experiment module conceptual design and gas-grain simulation facility breadboard development
[NASA-CR-177632] p 2598 N94-23536
Particle size measurement for the control of industrial crystallizers
[PB94-119104] p 2562 N94-23766
On the stability of the process of formation of combustion generated particles by coagulation and simultaneous shrinkage due to particle oxidation p 2159 N94-24274
Effect of initial droplet-size distributions on fuel-vapor profiles in a shear-layer flow p 2160 N94-24283
Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346
LRAT: Lightning Radiative Transfer
p 2416 N94-24443
The influence of flow type, particle type and gravity on orthokinetic coagulation
[ETN-94-95333] p 2267 N94-25060
Mechanisms of droplet formation
[ISBN-9-06-275765-0] p 2338 N94-25227

PARTICLE SPIN
Polarized structure functions of the nucleon in the resonance region
[CEBAF-PR-94-001] p 2540 N94-24663
Proton spin: The role of quark-gluon and hadron degrees of freedom
[DE93-616867] p 2538 N94-25341
A quark structure of hadrons and nuclei
[DE93-616872] p 2539 N94-25474

PARTICLE THEORY
Towards a theory of quark and lepton masses
[DE94-001726] p 2533 N94-23218
Applications of supersymmetric quantum mechanics
[ETN-94-95385] p 2570 N94-25257
Correlations in the actions of periodic orbits derived from quantum chaos
[DE93-616866] p 2571 N94-25340
Heavy flavour physics at LEP
[NIKHEF-H/92-19] p 2539 N94-25465

PARTICULATE SAMPLING
Bioregenerative life support systems for microgravity
[NASA-CR-195516] p 2422 N94-24810

PARTICULATES
Composite fiber structures for catalysts and electrodes p 2393 N94-23364
On the determination of local instantaneous averages in particulate flow measurements p 2325 N94-23663
Particle size measurement for the control of industrial crystallizers [PB94-119104] p 2562 N94-23766
On the stability of the process of formation of combustion generated particles by coagulation and simultaneous shrinkage due to particle oxidation p 2159 N94-24274
The chemistry of particulate formation in fluorocarbon plasmas [DE94-001500] p 2552 N94-24546

PARTITIONS (MATHEMATICS)
Characterization of measures with a convex matrix-k-range [PB93-220655] p 2479 N94-23098
A knowledge based system for scientific data visualization [NASA-CR-194879] p 2452 N94-23507
Experience with parametric binary dissection [NASA-CR-191552] p 2473 N94-23558

PARTITIONS (STRUCTURES)
Continuum representations of cellular solids [DE94-001706] p 2375 N94-23217

PARTONS
Proton spin: The role of quark-gluon and hadron degrees of freedom [DE93-616867] p 2538 N94-25341

PASCAL (PROGRAMMING LANGUAGE)
Algorithms for speech coding systems based on linear prediction [EUT-92-E-260] p 2447 N94-22731

PASSENGER AIRCRAFT
JB-300: An advanced medium size transport for 2005 [NASA-CR-195499] p 2179 N94-24401
NASA/USRA University Advanced Design Program, 1992-1993. The Diamondback: A simulated commercial air transportation study [NASA-CR-195523] p 2180 N94-24462
The airplane: A simulated commercial air transportation study [NASA-CR-195525] p 2182 N94-24837
The AC-120: The advanced commercial transport [NASA-CR-195491] p 2182 N94-24966
Weasel works SA-150: Design study of a 100 to 150 passenger transport aircraft [NASA-CR-195489] p 2183 N94-24975
The Bunny: A simulated commercial air transportation study [NASA-CR-195537] p 2183 N94-25001
The Gold Rush: A simulated commercial air transportation study [NASA-CR-195528] p 2184 N94-25002
The RTL-46: A simulated commercial air transportation study [NASA-CR-195524] p 2184 N94-25017
High-order technology: Applying technical excellence to new airplane development p 2185 N94-25069

PASSENGERS
Aircraft evacuation testing: Research and technology issues [PB94-107620] p 2173 N94-24750

PASSIVITY
Ultraviolet photosulfidation of III-V compound semiconductors for electronic passivation [DE94-001417] p 2555 N94-22717
Chromate-free talc chemical conversion coatings for aluminum alloys [DE94-001567] p 2238 N94-22932
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers [DE94-002293] p 2350 N94-24659

PATENT POLICY
NASA patent abstracts bibliography: A continuing bibliography. Section 2: Indexes (supplement 44) [NASA-SP-7039(44)-SECT-2] p 2590 N94-23712

PATHOGENESIS
Asthma in aircrew p 2425 N94-23327

PATROLS
Using satellite communications for a mobile computer network p 2280 N94-22777

PATTERN RECOGNITION
The adaptive resonance theory network: (Clustering-) behaviour in relation with brainstem auditory evoked potential patterns [EUT-92-E-264] p 2470 N94-22877
Artificial neural networks: Application to the optical recognition of music partitions [ETN-94-95166] p 2470 N94-22884
Image pattern recognition supporting interactive analysis and graphical visualization [NASA-CR-194878] p 2451 N94-23369
Sensing and modelling concepts for autonomous and remote mobile robot control p 2370 N94-23421
Neural network research in Finland. Symposium [PB93-224822] p 2472 N94-23463
Imaging System (INEL) T805 prototype [DE94-002807] p 2382 N94-23492
Joint Acoustic Propagation Experiment (JAPE) p 2527 N94-24208
Heterodyne array for measurement of target velocity [AD-D016025] p 2545 N94-24722
Method for selection of wavelength bands for multispectral classification [PB93-204378] p 2388 N94-24741
Object recognition through image understanding for an autonomous mobile robot [AD-A273206] p 2475 N94-24862
Image remapping strategies applied as protheses for the visually impaired p 2444 N94-25363
An evaluation of three-dimensional sensors for the extravehicular activity helper/retreiver p 2444 N94-25369
Extracting projective information from single views of 3D point sets [OUEL-1973/93] p 2464 N94-25471
Parametric and nonparametric discriminants for regional earthquakes and explosions [AD-A273807] p 2406 N94-25538

PAVEMENTS
Performance of prefabricated geocomposite subdrainage system in an airport runway [DOT/FAA/RD-93/23] p 2192 N94-23303
Airport pavement test machine design and cost study [DOT/FAA/CT-93/51] p 2192 N94-24072

PAYLOAD CONTROL
SAMPEX payload operation control center implementation p 2197 N94-23843
Integrating payload design, planning, and control in the Dutch Utilisation Centre p 2207 N94-23869
Customizing graphical user interface technology for spacecraft control centers p 2510 N94-23905
Spatial interpretation of NASA's Marshall Space Flight Center Payload Operations Control Center using virtual reality technology p 2198 N94-24432

PAYLOADS
Geostationary payload concepts for personal satellite communications p 2278 N94-22765
Results of a laboratory experiment that tests rotating unbalanced-mass devices for scanning gimbaled payloads and free-flying spacecraft [NASA-TP-3458] p 2269 N94-23574
A review of mission planning systems p 2503 N94-23866
Recharge mechanism based on shape memory alloy p 2362 N94-24039
Satellite situation report, volume 33, number 4 [NASA-TM-109677] p 2205 N94-24824
Effect of power system technology and mission requirements on high altitude long endurance aircraft [NASA-CR-194455] p 2189 N94-25200

PELLETS
Pellet ablation in the large helical device [NIFS-260] p 2551 N94-24358

PENCIL BEAMS
Analysis of a proposed Compton backscatter imaging technique [DE93-040537] p 2371 N94-22935

PENDULUMS
Integrated accelerometer assembly [CA-PATENT-1322107] p 2344 N94-24184

PENNING EFFECT
Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects [NASA-CR-195126] p 2534 N94-24487

PEPTIDES
The evolution of energy-transducing systems. Studies with archaebacteria [NASA-CR-195129] p 2422 N94-24811
Capillary electrophoresis of biomolecules: Theory, instrumentation and applications [ETN-94-95297] p 2236 N94-25233

PERCEPTION
Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt? [NASA-CR-188256] p 2427 N94-24227
Perceptions of organizational support and affectivity as predictors of job satisfaction [DOT/FAA/AM-94/2] p 2429 N94-25442

PERCEPTUAL ERRORS
Perception in flight: Shape and motion perception, space perception, spatial orientation, and visual vestibular interaction p 2429 N94-23979
Night vision goggle illusions and visual training p 2432 N94-23984
Mechanisms of eye-hand coordination [AD-A273687] p 2428 N94-25437
DCT quantization matrices visually optimized for individual images p 2442 N94-25509

PERFORATED PLATES
Performance of the X-/Ka/KABLE-band dichroic plate in the DSS-13 beam waveguide antenna p 2291 N94-23261

PERFORMANCE PREDICTION
Proof test of the computer program BUCKY for plasticity problems [NASA-TP-3444] p 2374 N94-22960
Foil bearing research at Penn State p 2215 N94-23058
Computational fluid dynamic modelling of cavitation p 2215 N94-23060
Mathematical modeling of MCFC cells/stacks and networks [DE94-001914] p 2390 N94-23212
Optical subnet concepts for the deep space network p 2292 N94-23269
Investigation of time and intensity effects in operator workload and performance [CTN-94-60927] p 2433 N94-24171
Pilot evaluation system p 2158 N94-24266
Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285
CFD simulation of coaxial injectors p 2342 N94-24430
Space Shuttle Main Engine performance analysis p 2222 N94-24444
Tokamak Physics Experiment (TPX) cost and performance trade studies using supercode [DE94-002720] p 2553 N94-24628
Design and implementation of a distributed version of the NASA Engine Performance Program [NASA-CR-194475] p 2462 N94-25179
Transputer benchmarks and performance comparisons with other computing machines [RR-467] p 2446 N94-25312
Relationship between the structure and performance of identified nonlinear polynomial models [RR-474] p 2492 N94-25320
State-of-the-art engineering aeroprediction methods with emphasis on new semiempirical techniques for predicting nonlinear aerodynamics on complete missile configurations [AD-A273680] p 2171 N94-25411

PERFORMANCE TESTS
Electric and hybrid vehicles program [DE93-040664] p 2352 N94-22881
A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research [DE94-000565] p 2381 N94-23001
Contribution to the evaluation of efficiency of a microprocessor functional test [ETN-94-95176] p 2445 N94-23153
Results of the Mojave tests of the Mars 96 rover p 2370 N94-23416
Performance evaluation of the Russian SPT-100 thruster at NASA LeRC [NASA-TM-106401] p 2219 N94-23630
In-vacuum performance of Fomblin Z25-lubricated, 52100 steel bearings with TiC-coated balls p 2358 N94-24011
Data relay system satellite: The development of an antenna pointing mechanism for the inter-orbit link antenna p 2359 N94-24015
Development of gears for space use p 2360 N94-24021
Design and performances of electromagnetic initiators for space mechanisms: An alternative to pyrotechnic system p 2315 N94-24037
BLAST, a new lubricant screening tester for space oils and greases p 2362 N94-24042
Roles, uses, and benefits of general aviation aircraft in aerospace engineering education [NASA-TM-106463] p 2153 N94-24100
Experimental verification of an acoustic telemetry link between an Aurora and CFAV quest [DREA-TC-93-304] p 2202 N94-24121
The effects of spatially displaced visual feedback on remote manipulator performance p 2436 N94-24201
Analog communication transmitter and receiver test procedures [AD-A273423] p 2300 N94-24687
Hubble Space Telescope high speed photometer science verification test report [NASA-CR-189322] p 2205 N94-24710
Lightning tests and analyses of tunnel bond straps and shielded cables on the Space Shuttle solid rocket booster [NASA-CR-193921] p 2200 N94-24801
Design and simulation of EVA tools for first servicing mission of HST [NASA-CR-194784] p 2439 N94-24857

Performance measurements of the multimedia testbed on Mach 3.0: Experience writing real-time device drivers, servers, and applications
[AD-A273600] p 2460 N94-24932

Power electronics development for the SPT-100 thruster
[NASA-TM-106488] p 2221 N94-25189

The evaluation of ASOS for the Kennedy Space Center's Shuttle Landing Facility
[NASA-CR-195685] p 2416 N94-25271

Investigation of hand capabilities under a variety of performance conditions and an attempt to explain performance differences p 2444 N94-25354

Hydride thermodynamic machines
[VTT-JULK-768] p 2571 N94-25416

Evaluation of image quality p 2443 N94-25514

PERICLASE

Correlated petrographic, electron microprobe, and ion microprobe studies of selected primitive and processed phase assemblages in meteorites
[NASA-CR-194827] p 2601 N94-23499

PERIODIC FUNCTIONS

On the Daubechies-based wavelet differentiation matrix
[NASA-CR-191583] p 2479 N94-23090

Temporal aggregation in a periodically integrated autoregressive process
[PB93-230480] p 2479 N94-23122

Periodic nonlinear Schroedinger equation and invariant measures
[PB93-238012] p 2487 N94-23775

Cauchy problem for periodic KDV-type equations
[PB93-238020] p 2487 N94-23776

PERIODIC VARIATIONS

Forced vibrations of a non-viscous drop
[MPIS-24/1992] p 2318 N94-23198

Theoretical investigation of variable periodicity (graded) multilayers for hard x ray applications
[NASA-CR-194824] p 2543 N94-23502

Correlations in the actions of periodic orbits derived from quantum chaos
[DE93-616866] p 2571 N94-25340

PERIODICALS

NASA STI program database: Journal coverage (1990-1992)
[NASA-TM-109720] p 2593 N94-25168

PERISCOPES

Periscope mechanism for SWAN instrument
p 2357 N94-24000

PERMANENT MAGNETS

Finite element based electric motor design optimization p 2315 N94-24411

Design and application of electromechanical actuators for deep space missions
[NASA-CR-195134] p 2365 N94-24842

Comparative M-H characteristics of 1-5 and 2-17 type samarium-cobalt permanent magnets to 300 C
[NASA-CR-194440] p 2312 N94-24870

PERMITTIVITY

Polarizability of gyrotropic sphere
[PB93-225019] p 2524 N94-23131

Spectroscopic IR ellipsometry of 100 and 001 oriented YBa2Cu3O(7-delta) films
[PB93-201481] p 2561 N94-23445

Mueller matrix analysis of infrared ellipsometry
[PB93-201549] p 2544 N94-23629

Temperature dependent performance of Coplanar Waveguide (CPW) on substrates of various materials
[NASA-TM-106505] p 2313 N94-25170

PEROVSKITES

Fundamental study of NO(x) control in catalytic combustion
[PB94-112323] p 2398 N94-23818

PEROXIDES

In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-194810] p 2397 N94-23277

Measurement of HO2 and other trace gases in the stratosphere using a high resolution far-infrared spectrometer
[NASA-CR-195173] p 2404 N94-24738

PERSONAL COMPUTERS

Some background information on perceptual color matching pertinent to computer applications
[PB93-200327] p 2445 N94-23788

High performance, low cost, self-contained, multipurpose PC based ground systems
p 2516 N94-23943

PERSONNEL

Survival suit for submarine personnel: Summary of evaluation studies
[PB93-204634] p 2430 N94-23743

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 21: US aerospace industry librarians and technical information specialists as information intermediaries: Results of the phase 2 survey
[NASA-TM-109064] p 2593 N94-24709

Aircraft digital flight control technical review
p 2163 N94-25106

PERSONNEL DEVELOPMENT

Women scientists and engineers employed in industry: Why so few? A report based on a conference
[ISBN-0-309-04991-1] p 2585 N94-24698

PERSONNEL MANAGEMENT

Women scientists and engineers employed in industry: Why so few? A report based on a conference
[ISBN-0-309-04991-1] p 2585 N94-24698

PERSONNEL SELECTION

Strategies for recruiting additional African Americans into the NASA JSC summer faculty fellows program
p 2585 N94-25362

PERTURBATION

Decoupling problems around a trajectory: From linearity to nonlinearity
[MEMO-1115] p 2469 N94-22703

Contribution to the study of HF converters radiated disturbances
[ECL-92-34] p 2313 N94-25421

PERTURBATION THEORY

Projectile transverse motion and stability in electromagnetic induction launchers
[DE94-001557] p 2198 N94-23210

Perturbation theory in electron diffraction
[PB93-201424] p 2533 N94-23505

Reactivity of ambident anions in the gas phase
[PB93-232189] p 2533 N94-23713

Approximate optimal guidance for the advanced launch system
[NASA-CR-4568] p 2198 N94-24752

A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 1: Model development and applications
[NASA-CR-193916] p 2366 N94-24998

A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 2: User's guide
[NASA-CR-193917] p 2366 N94-24999

On a new functional integral formalism for Hubbard model
[DE93-614017] p 2492 N94-25334

PESTICIDES

Isothiazolone volatility study of a water bottom from fuel treated with Kathon (tm) FP1.5 biocide
[AD-A273165] p 2266 N94-24728

PETRI NETS

Automated parallelization of timed Petri-net simulations
[NASA-CR-191574] p 2451 N94-23341

Mean-value of product-form stochastic Petri net models of slotted-ring systems
[PB94-110871] p 2494 N94-23749

Operational characterisation of requirements and early validation environment for high demanding space systems p 2519 N94-23959

Systems engineering: A formal approach. Part 4: Analysis methods
[PB94-101417] p 2271 N94-24475

Systems engineering: A formal approach. Part 2: Frameworks
[PB94-101391] p 2489 N94-24615

Timed coloured Petri nets and their application to logistics
[ETN-94-95310] p 2522 N94-25293

PETROGRAPHY

Catalog of Apollo 17 rocks. Volume 1: Stations 2 and 3 (South Massif)
[NASA-CR-194854] p 2613 N94-24058

A dynamic melting model for the origin of Apollo 15 olivine-normative and quartz-normative mare basalts
p 2615 N94-24371

Melt rock components in KREEPy breccia 15205: Petrography and mineral chemistry of KREEP basalts and quartz-normative mare basalts p 2616 N94-24372

A geochemical study of acapulcoite and lodranite meteorites p 2605 N94-25358

PETROLOGY

Correlated petrographic, electron microprobe, and ion microprobe studies of selected primitive and processed phase assemblages in meteorites
[NASA-CR-194827] p 2601 N94-23499

Highland crust at the Apollo 14 site: A review
p 2614 N94-24364

Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts
p 2614 N94-24365

Polytopic vector analysis in igneous petrology: Application to lunar petrogenesis p 2615 N94-24368

The western highland province at the Apollo 14 site
p 2615 N94-24369

A dynamic melting model for the origin of Apollo 15 olivine-normative and quartz-normative mare basalts
p 2615 N94-24371

Melt rock components in KREEPy breccia 15205: Petrography and mineral chemistry of KREEP basalts and quartz-normative mare basalts p 2616 N94-24372

Heterogeneity in small aliquots of Apollo 15 olivine-normative basalt: Implications for breccia clast studies p 2616 N94-24373

PHARMACOLOGY

Electrophoresis in open capillaries: Some fundamental aspects
[ETN-94-95290] p 2236 N94-25232

PHASE CONJUGATION

Spatiotemporal behavior and nonlinear dynamics in a phase conjugate resonator
[NASA-CR-4567] p 2543 N94-23529

Investigation of Raman beam cleanup and phase conjugation
[AD-A273157] p 2545 N94-24672

Quantum optical aspects of topological phases, such as Berry's phase
[AD-A273632] p 2570 N94-25028

PHASE DEVIATION

Phase linearity of the 914H coupled-cavity traveling wave tube
[NASA-CR-191056] p 2290 N94-23087

PHASE DIAGRAMS

Physics of iron
[DE94-002002] p 2402 N94-23721

Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation
[DE93-617053] p 2567 N94-25424

PHASE LOCKED SYSTEMS

An optical ASK and FSK phase diversity transmission system
[EUT-92-E-268] p 2542 N94-23171

PHASE MATCHING

High-order sum and difference-frequency generation in helium
[DE94-001064] p 2348 N94-23181

PHASE MODULATION

Preliminary analysis of amplitude and phase fluctuations in the JAPE multiple tone data to distances of 500 meters p 2528 N94-24216

PHASE SHIFT

Modulation characteristics of a high-power semiconductor Master Oscillator Power Amplifier (MOPA)
[NASA-TM-104577] p 2308 N94-23281

Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194785] p 2389 N94-24856

The phase response of nonlinear systems
[RR-458] p 2476 N94-25308

Unwrapping the phase response functions for nonlinear systems
[RR-465] p 2462 N94-25311

PHASE SHIFT KEYING

Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805

Theoretical and simulated performance for a novel frequency estimation technique p 2285 N94-22808

Pseudo-coherent demodulation for mobile satellite systems p 2287 N94-22819

Coding for frequency hopped spread spectrum satellite communications
[ECE-91-1] p 2296 N94-24132

Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669

Coding for frequency hopped spread spectrum satellite communications
[ECE-92-1] p 2300 N94-24697

PHASE TRANSFORMATIONS

The elastic and electromechanical properties of BaTiO3 single crystal through the ferroelectric transition
[DE94-001437] p 2557 N94-22927

Bridgman's concern
[DE93-040900] p 2558 N94-22953

Phase transformations in Cu-Zr multilayers
[DE94-000393] p 2241 N94-23297

Processing of semicrystalline polymers
p 2226 N94-24351

Thermal phase behavior of metal surfaces: X-ray scattering studies of Pt(001)
[DE94-002991] p 2245 N94-24612

Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124

Center for Analysis of Heterogeneous and Nonlinear Media
[AD-A273515] p 2230 N94-25158
Phase structure of the two-dimensional phi(4) field theory within thermo-field dynamics
[DE93-616850] p 2570 N94-25337
Electronic structure and high pressure phase transition in LaSb and CeSb
[DE93-617051] p 2567 N94-25423

PHASED ARRAYS
Adaptive digital beamforming for a CDMA mobile communications payload p 2274 N94-22743
Calibration block for digital beam forming antenna
[PB93-204550] p 2294 N94-23773
Calibration network intended for phase-array antennas at 3 GHz
[PB93-204352] p 2297 N94-24530

PHENOLIC RESINS
Initial evaluation of burn characteristics of phenolic foam runway brake arrestor material
[DOT/FAA/CT-TN93/7] p 2253 N94-23335

PHENOMENOLOGY
Thermally activated low temperature creep and primary water stress corrosion cracking of NiCrFe alloys
[DE94-001756] p 2241 N94-23219

PHENYLS
Di(hydroxyphenyl)- 1,2,4-triazole monomers
[NASA-CASE-LAR-14440-2] p 2252 N94-23075
Metal-catalyzed alkynylation of (Bromophenyl)Oligophenylenes: A rapid route to thermoset precursors of high density monolithic glass-like carbon
[AD-A273219] p 2260 N94-24863
Planar poly(p-phenylene) derivatives: Ladder formation for maximization of extended conjugation
[AD-A273220] p 2260 N94-24922

PHOBOS
A mission to Mercury and a mission to the moons of Mars
[NASA-CR-195530] p 2195 N94-24619

PHONEMES
On the quality of synthetic speech evaluation and improvements
[ETN-94-95298] p 2304 N94-25234

PHONONS
Energy transfer in solid explosives
[DE94-001523] p 2265 N94-23776
Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation
[DE93-617053] p 2567 N94-25424

PHOSPHATES
Infrared analysis of vapor phase deposited tricresylphosphate (TCP)
[NASA-TM-106423] p 2253 N94-23371
Auto-metasomatism of the western lunar highlands: Result of closed system fractionation and mobilization of a KREEPy trapped liquid p 2615 N94-24367

PHOSPHAZENE
A preliminary evaluation of the phosphazene resin PPZ
[AD-A273674] p 2263 N94-25410

PHOSPHORS
Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor
[DE94-000331] p 2543 N94-23461

PHOSPHORUS COMPOUNDS
The electrochemistry of the solvated electron: A study of its properties and of its applications
[ETN-94-95313] p 2236 N94-25296

PHOTOCHEMICAL REACTIONS
Chemistry on the mesoscale: Modeling and measurement issues p 2413 N94-24390
Photoinduced charge separation in solid state and molecular systems
[DE94-001727] p 2563 N94-24537
Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897

PHOTODIODES
Micro pulse laser radar
[NASA-CASE-GSC-13493-1] p 2294 N94-23827
CsI(Tl)-photodiode detectors for spectroscopy at low radiation levels
[MPI-PHE/92-22] p 2314 N94-25457

PHOTOELECTRIC EMISSION
Limits on high-order harmonic generation from single-atom calculations
[DE93-019950] p 2531 N94-22869
Performance of inverse photoemission spectrometer with a new bandpass photon detector of narrow bandwidth and high sensitivity
[REPT-A-2659] p 2345 N94-24977
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A273698] p 2263 N94-25489

PHOTOELECTROCHEMICAL DEVICES
Photoinduced charge separation in solid state and molecular systems
[DE94-001727] p 2563 N94-24537

PHOTOELECTRON SPECTROSCOPY
An analytical ultra-high vacuum tribometer for solid lubricant studies p 2361 N94-24033
LPCVD of InN on GaAs(110) using HN3 and TMIn: Comparison with Si(100) results
[AD-A273555] p 2235 N94-24917

PHOTOGRAMMETRY
A photogrammetric solution to a particular problem
[NASA-TP-3415] p 2381 N94-22961
Quantitative assessment of human motion using video motion analysis p 2436 N94-24203
Reach performance while wearing the Space Shuttle launch and entry suit during exposure to launch accelerations p 2436 N94-24204
Image analysis technology applied to problems in crystallography
[AD-A273516] p 2566 N94-25288

PHOTOGRAPHIC EMULSIONS
Analysis of SOFCAL calibration data
[NASA-CR-193910] p 2345 N94-25000

PHOTOGRAPHIC MEASUREMENT
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-58
[NASA-TM-109194] p 2200 N94-24577

PHOTOGRAPHIC RECORDING
Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61
[NASA-TM-109195] p 2199 N94-24059

PHOTOGRAPHY
Close-up analysis of inflight ice accretion
[NASA-TM-106457] p 2172 N94-23523

PHOTOINTERPRETATION
Integrated use of hydrological modelling and remote sensing in the province of Drenthe (The Netherlands): Possibilities and restrictions
[REPT-61] p 2382 N94-23148

PHOTOIONIZATION
Limits on high-order harmonic generation from single-atom calculations
[DE93-019950] p 2531 N94-22869
High-resolution soft x ray photoionization studies of selected molecules
[DE94-000568] p 2532 N94-23002
SALI chemical analysis of provided samples
[NASA-CR-194138] p 2232 N94-23524

PHOTOLUMINESCENCE
Ultraviolet photosulfidation of III-V compound semiconductors for electronic passivation
[DE94-001417] p 2555 N94-22717

PHOTOLYSIS
Ultraviolet photosulfidation of III-V compound semiconductors for electronic passivation
[DE94-001417] p 2555 N94-22717
Infrared fluorescence studies of electronic-to-vibrational energy transfer in a Br2:NO system
[AD-A273727] p 2539 N94-25443

PHOTOMAPPING
Enhanced image capture through fusion
p 2346 N94-25502

PHOTOMETERS
New concepts for HgI2 scintillator gamma ray spectroscopy
[NASA-CR-194819] p 2233 N94-24113
Hubble Space Telescope high speed photometer orbital verification
[NASA-CR-189333] p 2204 N94-24226
Hubble Space Telescope high speed photometer science verification test report
[NASA-CR-189322] p 2205 N94-24710

PHOTOMULTIPLIER TUBES
The CEBAF beam loss sensors
[CEBAF-PR-93-032] p 2540 N94-24662
Performance of inverse photoemission spectrometer with a new bandpass photon detector of narrow bandwidth and high sensitivity
[REPT-A-2659] p 2345 N94-24977

PHOTON BEAMS
Proceedings of the Fifth Users Meeting for the Advanced Photon Source
[DE93-040692] p 2531 N94-22948

PHOTONICS
Photonic technology for implementation of generalizable neural networks: A synthetic approach
[AD-A273497] p 2474 N94-24622

PHOTONS
Low p(sub T) photon production in proton-nucleus collisions at 18 GeV/c
[DE94-001380] p 2532 N94-23007
Photon-photon collisions at the next linear collider: Theory
[DE93-041025] p 2534 N94-23803
Flux measurements using the BATSE spectroscopic detectors p 2580 N94-24435
Electro-weak, QCD and top physics at the Tevatron
[DE94-002304] p 2535 N94-24611
Quantum optical aspects of topological phases, such as Berry's phase
[AD-A273632] p 2570 N94-25028

PHOTOPRODUCTION
Low p(sub T) photon production in proton-nucleus collisions at 18 GeV/c
[DE94-001380] p 2532 N94-23007
Electro-weak, QCD and top physics at the Tevatron
[DE94-002304] p 2535 N94-24611

PHOTOSPHERE
The solar spectral irradiances from x ray to radio wavelengths
[NASA-CR-195203] p 2629 N94-25260

PHOTOSTRESSES
Use of photostress to characterize the mechanical behavior of weldments
[NASA-CR-195201] p 2378 N94-25267

PHOTOVOLTAIC CELLS
Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296
A solar photovoltaic power system for use in Antarctica
[NASA-TM-106417] p 2395 N94-24071
Overview of the status and progress in photovoltaics research in the United States
[DE94-000981] p 2395 N94-24512
Laser energized high voltage direct current power supply
[AD-D015977] p 2312 N94-25036
Effect of power system technology and mission requirements on high altitude long endurance aircraft
[NASA-CR-194455] p 2189 N94-25200

PHOTOVOLTAIC CONVERSION
Polycrystalline thin film materials and devices
[DE93-018213] p 2389 N94-22862
Progress in phases 2 and 3 of the Photovoltaic Manufacturing Technology Project (PVMaT)
[DE94-000206] p 2389 N94-22888
Preliminary study concerning development of petroleum-substitution energy integration technology
[DE94-714902] p 2264 N94-23027
Amorphous silicon PVMaT, phase 2A
[DE93-018221] p 2390 N94-23295
Low power ground-based laser illumination for electric propulsion applications
[NASA-CR-194444] p 2219 N94-23555
A solar photovoltaic power system for use in Antarctica
[NASA-TM-106417] p 2395 N94-24071
Overview of the status and progress in photovoltaics research in the United States
[DE94-000981] p 2395 N94-24512

PHOTOVOLTAIC EFFECT
Polythiophene derivative with a side chain chromophore as photovoltaic and photorefractive materials
[AD-A273245] p 2260 N94-24813

PHYSICAL EXAMINATIONS
Echocardiographic screening of aircrew candidates
p 2424 N94-23319

PHYSICAL EXERCISE
Exercise, exercise training, and the immune system. A compendium of research (1902-1991)
[NASA-TM-108778] p 2426 N94-23575
NASA project 1: Full-body dynamometer
[NASA-CR-195507] p 2438 N94-24331
Loading, electromyograph, and motion during exercise
p 2427 N94-25359

PHYSICAL OPTICS
High-frequency techniques for RCS prediction of plate geometries and a physical optics/equivalent currents model for the RCS of trihedral corner reflectors, parts 1 and 2
[NASA-CR-195140] p 2298 N94-24616
Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas
[NASA-CR-195167] p 2301 N94-25005
The Radar Image Generation (RIG) model
p 2306 N94-25497

PHYSICAL PROPERTIES
Mass properties measurement system dynamics
p 2368 N94-23235
Mass properties measurement system: Dynamics and statics measurements p 2368 N94-23236

PHYSICAL SCIENCES
The 7th Annual National Conference of Black Physics Students p 2524 N94-24583

PHYSICS
Fractal geometry in physics
[AD-A273271] p 2523 N94-24936

PHYSIOCHEMISTRY
Stability of premixed laminar flames in a stagnation point flow to general disturbances
[AD-A273429] p 2234 N94-24673

PHYSIOLOGICAL EFFECTS
Aeromedical disposition for coronary artery disease p 2423 N94-23316
Exercise, exercise training, and the immune system. A compendium of research (1902-1991)
[NASA-TM-108778] p 2426 N94-23575
Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt?
[NASA-CR-188256] p 2427 N94-24227

PHYSIOLOGICAL RESPONSES
Increasing accuracy in the assessment of motion sickness: A construct methodology
[NASA-TM-108797] p 2420 N94-23088
Cytokines and immune surveillance in humans
[NASA-CR-194801] p 2425 N94-23331
Physiological protection for aircrew at high altitudes: A review of the literature
[DCIEM-93-13] p 2432 N94-24114
ELF communications system ecological monitoring program
[AD-A273456] p 2299 N94-24676
The role of visual context in manual target localization p 2429 N94-25351

PHYSIOLOGICAL TESTS
Cardiopulmonary Aspects in Aerospace Medicine
[AGARD-LS-189] p 2423 N94-23313
Aortic valve disease p 2424 N94-23322
Aeromedical implications of mitral valve prolapse p 2424 N94-23323
Evaluation of bioimpedance for the measurement of physiologic variables as related to hemodynamic studies in space flight p 2427 N94-25378
Mechanisms of eye-hand coordination
[AD-A273687] p 2428 N94-25437

PHYSIOLOGY
Visual Problems in Night Operations
[AGARD-LS-187] p 2431 N94-23976
Use of infrared telemetry as part of a nonintrusive inflight data collection system to collect human factors data p 2434 N94-24193
ELF communications system ecological monitoring program
[AD-A273456] p 2299 N94-24676

PHYTOPLANKTON
Factors affecting the identification of phytoplankton groups by means of remote sensing
[NASA-TM-108799] p 2387 N94-24403
Nutrients and light as factors controlling phytoplankton biomass on the Dutch continental shelf (North Sea), 1988-1990
[PB94-111143] p 2418 N94-24601

PI-ELECTRONS
Planar poly(p-phenylene) derivatives: Ladder formation for maximization of extended conjugation
[AD-A273220] p 2260 N94-24922

PIEZOELECTRICITY
Theoretical studies of wave propagation in multilayered piezoelectric media
[DE93-040273] p 2371 N94-22872
Ferroelectric thin films 3
[AD-A273394] p 2565 N94-25027

PILOT INDUCED OSCILLATION
Aircraft digital flight control technical review p 2163 N94-25106

PILOT PERFORMANCE
Pilot-vehicle interface
[DOT/FAA/CT-92/21] p 2430 N94-23083
Pilot evaluation system p 2158 N94-24266
Combined 1991 and 1992 Robinson-22B (R-22) parking test results
[AD-A273550] p 2193 N94-24559
Extracting heading and temporal range from optic flow: Human performance issues p 2442 N94-25510
Sensor fusion display evaluation using information integration models in enhanced/synthetic vision applications p 2443 N94-25512
Quality metrics for sensor images p 2443 N94-25513

PILOT PLANTS
Statistical procedures for corrosion studies
[PB93-199412] p 2244 N94-23802

PILOT SELECTION
Cardiopulmonary Aspects in Aerospace Medicine
[AGARD-LS-189] p 2423 N94-23313
Screening for asymptomatic coronary heart disease p 2423 N94-23315
Aeromedical disposition for coronary artery disease p 2423 N94-23316
Echocardiographic screening of aircrew candidates p 2424 N94-23319
Aortic valve disease p 2424 N94-23322
Asthma in aircrew p 2425 N94-23327

PILOT TRAINING
Pilot evaluation system p 2158 N94-24266
A simulation study of control and display requirements for zero-experience general aviation pilots p 2163 N94-25102

PILOTLESS AIRCRAFT
A conceptual design of an unmanned test vehicle using an airbreathing propulsion system
[NASA-CR-195550] p 2189 N94-25085

PINTLES
Inherent stability of central element coaxial liquid-liquid injectors p 2212 N94-23043

PIONEER VENUS SPACECRAFT
SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-195162] p 2599 N94-24988

PIONS
Pions and neutrinos as probes of the nucleon and nuclear few-body system
[DE93-040127] p 2531 N94-22926
Gauge invariance and the electromagnetic current of composite pions
[DE93-040869] p 2532 N94-22952
Low p(sub T) photon production in proton-nucleus collisions at 18 GeV/c
[DE94-001380] p 2532 N94-23007
Calculations of Bose-Einstein correlations from Relativistic Quantum Molecular Dynamics
[DE94-000794] p 2569 N94-23453
New evaluation of hadronic contributions to the anomalous magnetic moment of charged leptons
[DE93-634394] p 2536 N94-24844
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476

PIPE FLOW
Features of a SINDA/FLUINT model of a liquid oxygen supply line p 2322 N94-23649
Comparison of numerical simulation and experimental data for steam-in-place sterilization p 2326 N94-23669
Heat pipe vapor dynamics
[NASA-CR-194217] p 2327 N94-24096
Modeling dynamically coupled fluid-duct systems with finite line elements
[NASA-CR-193909] p 2376 N94-24359
Interactive control in turbulent shear layers
[AD-A273544] p 2336 N94-24793
Decay of swirl in turbulent pipe flows
[ETN-94-95353] p 2339 N94-25248

PIPELINES
Demonstration of polyscann ultrasonic butt-fusion inspection system for polyethylene pipes
[AD-A273279] p 2373 N94-24814
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 4: Oil/Gas Pipeline
[AD-A273665] p 2250 N94-25405

PIPES (TUBES)
Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550
Statistical procedures for corrosion studies
[PB93-199412] p 2244 N94-23802
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies p 2371 N94-24427
Method and apparatus for the non-invasive measurement of pressure inside pipes using a fiber optic interferometer sensor
[AD-D016013] p 2344 N94-24734
Strength and life of pressure vessels subjected to impacts and thermomechanical GFRP loading
[VTT-JULK-771] p 2379 N94-25418

PISTON ENGINES
Internal combustion engine with a central crankshaft and integral tandem annular pistons
[CA-PATENT-1-320-878] p 2363 N94-24055
The effect of high altitude pressure on the power and efficiency of an airborne two-stroke engine p 2155 N94-24253
Controllability of free-piston Stirling engine/linear alternator driving a dynamic load
[NASA-TM-106497] p 2521 N94-24302

PISTON THEORY
Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773

PITCH (INCLINATION)
LDA measurements of the unsteady near wake behind an airfoil undergoing transient and periodic pitching motions
[ISL-CO-215/92] p 2165 N94-23161
The influence of elastic pitch variations on helicopter flight mechanics p 2161 N94-24286

PITCHING MOMENTS
Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion
[NASA-TM-109681] p 2167 N94-23975
A numerical study of airplanes flying in proximity
[AD-A273373] p 2173 N94-24718

PITTING
Use of scanning tunneling microscope in corrosion studies
[VTT-TIED-1416] p 2250 N94-25346

PIXELS
Progress on the design of a data push architecture for an array of optimized time tagging pixels
[DE93-041011] p 2307 N94-22955

PLANAR STRUCTURES
Modifications to 8x8 dynamical theory: Polarizations redefined according to x ray diffraction convention
[DE94-001290] p 2560 N94-23187
Planar poly(p-phenylene) derivatives: Ladder formation for maximization of extended conjugation
[AD-A273220] p 2260 N94-24922

PLANE STRAIN
Morphology of highly textured polyethylene/polyethylene- propylene semicrystalline diblock copolymers
[AD-A273683] p 2263 N94-25413

PLANE WAVES
Proceedings of the 1993 Bi-Isotropics Workshop on Novel Microwave Materials
[PB93-224772] p 2290 N94-23225
LRAT: Lightning Radiative Transfer p 2416 N94-24443

PLANETARY BASES
Preliminary design of a universal Martian lander
[NASA-CR-195529] p 2206 N94-25007

PLANETARY BOUNDARY LAYER
Incorporation of the planetary boundary layer in atmospheric models p 2413 N94-24388
Joint sessions on moisture processes and cumulus parameterization p 2414 N94-24393
Joint sessions on modeling of boundary layer and radiative transfer processes p 2414 N94-24396
Session on coupled atmospheric/chemistry coupled models p 2414 N94-24398
Vertical transport of water in the Martian boundary layer p 2622 N94-24902

PLANETARY CRUSTS
Basaltic Volcanism and Ancient Planetary Crusts
[NASA-CR-193151] p 2614 N94-24363
The geophysical signal of the martian global dichotomy p 2623 N94-24997

PLANETARY ENVIRONMENTS
Electronic payloads for Martian missions: A preliminary assessment of technologies p 2610 N94-23408

PLANETARY EVOLUTION
Basaltic Volcanism and Ancient Planetary Crusts
[NASA-CR-193151] p 2614 N94-24363
Protoplanetary disks: Theory and observation by millimeter and sub-millimeter arrays
[REPT-331] p 2603 N94-24983
The Nobeyama millimeter array survey for protoplanetary disks around protostar candidates and T Tauri stars in Taurus
[REPT-336] p 2604 N94-24987
Tectonic Evolution of Mars
[NASA-CR-194714] p 2623 N94-24996

PLANETARY GEOLOGY
An improved gravity model for Mars: Goddard Mars Model-1 (GMM-1)
[NASA-TM-104584] p 2401 N94-23282
Robotic exploration of Moon and Mars p 2606 N94-23379
The geophysical signal of the martian global dichotomy p 2623 N94-24997

PLANETARY LANDING
Past US studies and developments for planetary rovers p 2369 N94-23375
Planetary and asteroid missions. Getting there: Anchoring spacecraft to asteroids
[NASA-CR-195493] p 2614 N94-24333

PLANETARY MAPPING
Science strategy for Mars exploration p 2606 N94-23380
Evidence for dust transport in Viking IR thermal mapper opacity data p 2620 N94-24892
The Mars Aerial Platform (MAP) mission p 2622 N94-24903

PLANETARY METEOROLOGY
Workshop on Atmospheric Transport on Mars
[NASA-CR-194855] p 2616 N94-24871
The NASA/GISS Mars general circulation model: Preliminary experiments p 2616 N94-24872
Optimal gains for a single polar orbiting satellite p 2208 N94-24873

A diagnostic model to estimate winds and small-scale drag from Mars Observer PMIRR data
p 2617 N94-24874

Eddy mixing coefficient values derived from simulations with the NASA Ames Mars GCM p 2617 N94-24875

Mars dust-driven tides and their impact on the thermosphere p 2617 N94-24876

PLANETARY NEBULAE

High spatial resolution observations of CO in CRL 618
[REPT-334] p 2604 N94-24986

PLANETARY SURFACES

The new family of JPL planetary surface vehicles
p 2369 N94-23398

Automation technology for remote sample acquisition
p 2369 N94-23407

Evolving directions in NASA's planetary rover requirements and technology p 2370 N94-23414

Towards real-time stereovision systems for planetary missions p 2370 N94-23422

A DTM-based path planning method for planetary rovers p 2370 N94-23423

Mobility analysis, simulation, and scale model testing for the design of wheeled planetary rovers
p 2370 N94-23425

The transition from diapirism to dike intrusion: Implications for planetary volcanism
[NASA-CR-195133] p 2403 N94-24580

PLANETARY TEMPERATURE

Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap
p 2621 N94-24895

PLANETARY WAVES

Global acoustic mapping of ocean temperatures (GAMOT)
[AD-A273387] p 2418 N94-24719

Regarding tracer transport in Mars' winter atmosphere in the presence of nearly stationary, forced planetary waves p 2618 N94-24882

Two-dimensional modeling of thermal inversion layers in the middle atmosphere of Mars p 2622 N94-24900

PLANTS (BOTANY)

ELF communications system ecological monitoring program
[AD-A273456] p 2299 N94-24676

Generalized linear mixed models and their application in plant breeding research
[ETN-94-95335] p 2460 N94-25061

PLASMA ARC WELDING

Plasma ARC keyhole welding of aluminum
[PB93-201606] p 2353 N94-23449

Robotic weld overlay coatings for erosion control
[DE94-002665] p 2258 N94-24749

PLASMA CHEMISTRY

Excitation balances and transport in an inductively coupled plasma
[ETN-94-95330] p 2554 N94-25241

PLASMA CLOUDS

Artificial plasma experiments. Chemical release observations associated with the CRRES program
[NASA-CR-194871] p 2550 N94-23565

PLASMA COMPOSITION

Fusion plasma theory project summaries
[DE94-001712] p 2551 N94-23808

PLASMA CONTROL

Massachusetts Institute of Technology Plasma Fusion Center 1992-1993 report to the President
[DE94-001725] p 2548 N94-22721

Active probing of plasma edge turbulence and feedback studies on the Texas Experimental Tokamak (TEXT)
[DE94-001017] p 2548 N94-22945

Plasma research in the Madison Symmetric Torus (MST)
[DE94-002318] p 2549 N94-22976

Fluctuations and confinement in ATF
[DE94-000485] p 2549 N94-22998

Structural analysis of a superconducting central solenoid for the Tokamak Physics Experiment
[DE94-001536] p 2549 N94-23014

Overview of the ATF stellarator program
[DE94-000371] p 2550 N94-23462

The role of the radial electric field in confinement and transport in H-mode and VH-mode discharges in the DIII-D tokamak
[DE94-002746] p 2551 N94-23782

Fusion plasma theory project summaries
[DE94-001712] p 2551 N94-23808

IPP Prague Contributions to the IAEA Technical Committee Meeting on Research Using Small Tokamaks
[IPPCZ-329] p 2551 N94-24293

Temporal behavior of the electron density profile during limiter biasing in the HYBTOK-2 tokamak
[NIFS-257] p 2552 N94-24456

Proposal of Modular Heliotron: Advanced modular helical system compatible with closed helical divertor
[NIFS-261] p 2552 N94-24458

Computer modeling of plasma flow switches-high current switching on Procyon
[DE93-040189] p 2311 N94-24500

Stabilization of the external kink and other MHD issues
[DE94-001541] p 2552 N94-24502

Start-up simulations of the PULSAR pulsed tokamak reactor
[DE94-002634] p 2552 N94-24519

Design of central control system for Large Helical Device (LHD)
[NIFS-258] p 2553 N94-24623

PLASMA CURRENTS

Active probing of plasma edge turbulence and feedback studies on the Texas Experimental Tokamak (TEXT)
[DE94-001017] p 2548 N94-22945

1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192

Computer modeling of plasma flow switches-high current switching on Procyon
[DE93-040189] p 2311 N94-24500

Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD
[DE94-001565] p 2552 N94-24504

Start-up simulations of the PULSAR pulsed tokamak reactor
[DE94-002634] p 2552 N94-24519

LHCD (low hybrid current drive) experiment on the HT-6B tokamak
[DE93-613720] p 2555 N94-25331

PLASMA DENSITY

Fluctuations and confinement in ATF
[DE94-000485] p 2549 N94-22998

Analysis and experiments of a whistler-wave plasma thruster
[DE94-001533] p 2209 N94-23012

PLASMA DIAGNOSTICS

Massachusetts Institute of Technology Plasma Fusion Center 1992-1993 report to the President
[DE94-001725] p 2548 N94-22721

Prospects for very-high-resolution solar physics with the Simuris inteferometric mission p 2625 N94-22848

Characterization of heat transport and radiation hydrodynamics in collisional laser plasmas using collective Thomson scattering
[DE94-001502] p 2349 N94-23209

Some theoretical problems of magnetic diagnostics in tokamaks and stellarators
[NIFS-262] p 2551 N94-24306

Pellet ablation in the large helical device
[NIFS-260] p 2551 N94-24358

A study of non-ideal focus properties of 30 deg parallel plate energy analyzers
[NIFS-263] p 2311 N94-24457

Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD
[DE94-001565] p 2552 N94-24504

The chemistry of particulate formation in fluorocarbon plasmas
[DE94-001500] p 2552 N94-24546

Measurement of electron temperature and density in the DIII-D neutral beam ion source arc chamber
[DE94-001099] p 2553 N94-24746

PLASMA DIFFUSION

The anomalous transport caused by particles transverse drift
[DE93-613685] p 2554 N94-25329

PLASMA DIODES

X ray simulator theory support
[AD-A273613] p 2553 N94-24949

PLASMA DRIFT

Excitation balances and transport in an inductively coupled plasma
[ETN-94-95330] p 2554 N94-25241

The anomalous transport caused by particles transverse drift
[DE93-613685] p 2554 N94-25329

Modification in the kinetic solution for magnetized plasmas
[DE93-613687] p 2555 N94-25343

PLASMA DYNAMICS

Chaos in plasma simulation and experiment
[DE94-001574] p 2549 N94-22963

Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data
[DE94-001575] p 2550 N94-23211

Start-up simulations of the PULSAR pulsed tokamak reactor
[DE94-002634] p 2552 N94-24519

PLASMA ELECTRODES

Reduction of the anode fall in a coaxial plasma thruster with an applied magnetic nozzle
[DE94-000670] p 2218 N94-23283

PLASMA ENGINES

Optimization of energy transfer in microwave electrothermal thrusters p 2216 N94-23065

CFD modeling of microwave electrothermal thrusters
p 2216 N94-23066

Advanced space propulsion concepts
p 2216 N94-23067

Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361

Power electronics development for the SPT-100 thruster
[NASA-TM-106488] p 2221 N94-25189

PLASMA EQUILIBRIUM

Some theoretical problems of magnetic diagnostics in tokamaks and stellarators
[NIFS-262] p 2551 N94-24306

PLASMA GENERATORS

Burning rate of double-base propellant in the presence of plasma p 2155 N94-24252

PLASMA GUNS

Computational model of surface ablation from tokamak disruptions
[DE94-002204] p 2550 N94-23474

PLASMA HEATING

Massachusetts Institute of Technology Plasma Fusion Center 1992-1993 report to the President
[DE94-001725] p 2548 N94-22721

Plasma research in the Madison Symmetric Torus (MST)
[DE94-002318] p 2549 N94-22976

Analysis and experiments of a whistler-wave plasma thruster
[DE94-001533] p 2209 N94-23012

Structural analysis of a superconducting central solenoid for the Tokamak Physics Experiment
[DE94-001536] p 2549 N94-23014

Overview of the ATF stellarator program
[DE94-000371] p 2550 N94-23462

Multi-ion, multi-event test of ion cyclotron resonance heating
[NASA-CR-194859] p 2540 N94-23495

PLASMA JETS

Massachusetts Institute of Technology Plasma Fusion Center 1992-1993 report to the President
[DE94-001725] p 2548 N94-22721

CAMAC throughput of a new RISC-based data acquisition computer at the DIII-D tokamak
[DE94-001113] p 2550 N94-23182

Mixing and unmixedness in plasma jets 1: Near-field analysis p 2323 N94-23655

PLASMA OSCILLATIONS

Temporal behavior of the electron density profile during limiter biasing in the HYBTOK-2 tokamak
[NIFS-257] p 2552 N94-24456

LHCD (low hybrid current drive) experiment on the HT-6B tokamak
[DE93-613720] p 2555 N94-25331

Effect of LHCD (low hybrid current drive) on tearing mode instability
[DE93-613700] p 2555 N94-25344

PLASMA PHYSICS

1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192

Fusion plasma theory project summaries
[DE94-001712] p 2551 N94-23808

IPP Prague Contributions to the IAEA Technical Committee Meeting on Research Using Small Tokamaks
[IPPCZ-329] p 2551 N94-24293

Modification in the kinetic solution for magnetized plasmas
[DE93-613687] p 2555 N94-25343

PLASMA POTENTIALS

1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192

Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361

PLASMA PRESSURE

Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333

PLASMA PROBES

Temporal behavior of the electron density profile during limiter biasing in the HYBTOK-2 tokamak
[NIFS-257] p 2552 N94-24456

A study of non-ideal focus properties of 30 deg parallel plate energy analyzers
[NIFS-263] p 2311 N94-24457

PLASMA PROPULSION

Performance evaluation of the Russian SPT-100 thruster at NASA LeRC
[NASA-TM-106401] p 2219 N94-23630

Numerical simulation of cylindrical, self-field MPD thrusters with multiple propellants
[NASA-CR-194458] p 2220 N94-24714

Power electronics development for the SPT-100 thruster
[NASA-TM-106488] p 2221 N94-25189

PLASMA RADIATION
Method and apparatus for producing a thermal atomic oxygen beam
[NASA-CASE-LEW-15614-1] p 2534 N94-23825
X ray simulator theory support
[AD-A273613] p 2553 N94-24949

PLASMA SHEATHS
Chaotic phenomena in plasma, 2
[DE93-508286] p 2549 N94-22964
Computational model of surface ablation from tokamak disruptions
[DE94-002204] p 2550 N94-23474

PLASMA SPRAYING
Selective hydrogen separation by palladium-based composite membranes
[PB93-201671] p 2254 N94-23431
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 2: Effect of spray parameters on the performance of several hafnia-yttria and zirconia-yttria coatings
[NASA-TP-3296] p 2242 N94-23467
Plasma sprayed thermal barrier coatings: Production, characterization and testing
[ISBN-9-03-860082-8] p 2555 N94-25439

PLASMA TEMPERATURE
Imaging XUV spectroscopy of a Z-pinch plasma in the former Soviet Union
[DE93-040849] p 2549 N94-22949

PLASMA TURBULENCE
Active probing of plasma edge turbulence and feedback studies on the Texas Experimental Tokamak (TEXT)
[DE94-001017] p 2548 N94-22945
Chaos in plasma simulation and experiment
[DE94-001574] p 2549 N94-22963
Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data
[DE94-001575] p 2550 N94-23211
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
Multi-ion, multi-event test of ion cyclotron resonance heating
[NASA-CR-194859] p 2540 N94-23495
The role of the radial electric field in confinement and transport in H-mode and VH-mode discharges in the DIII-D tokamak
[DE94-002746] p 2551 N94-23782

PLASMA WAVES
Active probing of plasma edge turbulence and feedback studies on the Texas Experimental Tokamak (TEXT)
[DE94-001017] p 2548 N94-22945
Chaotic phenomena in plasma, 2
[DE93-508286] p 2549 N94-22964
Multi-ion, multi-event test of ion cyclotron resonance heating
[NASA-CR-194859] p 2540 N94-23495
A relativistic theory on wave propagation in inhomogeneous magnetoplasmas
[ETN-94-95322] p 2554 N94-25285
Numerical simulation and analysis of experimental results on stimulated Raman scattering in laser-plasma Hohlraum targets
[DE93-613719] p 2554 N94-25330
LHCD (low hybrid current drive) experiment on the HT-6B tokamak
[DE93-613720] p 2555 N94-25331

PLASMAS (PHYSICS)
Massachusetts Institute of Technology Plasma Fusion Center 1992-1993 report to the President
[DE94-001725] p 2548 N94-22721
Semiempirical studies of atomic structure
[DE94-001588] p 2531 N94-22937
The internal structure and dynamics of the railgun plasma armature between infinitely wide ablating rails
[DE94-001473] p 2198 N94-23208
Overview of the ATF stellarator program
[DE94-000371] p 2550 N94-23462
Artificial plasma experiments. Chemical release observations associated with the CRRES program
[NASA-CR-194871] p 2550 N94-23565
Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361
The chemistry of particulate formation in fluorocarbon plasmas
[DE94-001500] p 2552 N94-24546
X ray simulator theory support
[AD-A273613] p 2553 N94-24949
Excitation balances and transport in an inductively coupled plasma
[ETN-94-95330] p 2554 N94-25241
The anomalous transport caused by particles transverse drift
[DE93-613685] p 2554 N94-25329
Behavior of the intermittency exponents and a quark-gluon plasma formation in the heavy ion collisions
[DE93-616869] p 2541 N94-25342
Effect of LHCD (low hybrid current drive) on tearing mode instability
[DE93-613700] p 2555 N94-25344
Excitation mechanisms for XUV and x ray lasers
[DE93-617006] p 2351 N94-25482
Diffusion in electronegative discharges with magnetic fields
[AD-A273826] p 2304 N94-25521

PLASMASPHERE
The Far Ultraviolet (FUV) auroral imager for the Inner Magnetospheric Imager (IMI) mission: Options
p 2209 N94-24453

PLASTIC DEFORMATION
Analysis of Alloy 600 and X-750 stress corrosion cracks
[DE94-001578] p 2238 N94-22936
Proof test of the computer program BUCKY for plasticity problems
[NASA-TP-3444] p 2374 N94-22960
Damage under monotonic or cyclic loads of new AlSiFe alloys prepared by the Osprey (tm) process
[ISAL-93-0008] p 2239 N94-22972
The plastic response of a cylindrical shell subjected to an internal blast wave with a finite width shock front
p 2154 N94-24246
On the deformation kinetics constitutive law of plastic deformation: The rate equation p 2161 N94-24289
Procedures for determining MATMOD-4V material constants
[DE94-002638] p 2245 N94-24520

PLASTIC PROPERTIES
Gas-pressure forming of superplastic ceramic sheet
[DE94-001520] p 2252 N94-22930
Texture gradient effects in tantalum
[DE94-000689] p 2240 N94-23021
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276
The nanometer-scale mechanics of gold films
[AD-A273307] p 2565 N94-25086

PLATE THEORY
Vectorization and parallelization of the finite strip method for dynamic Mindlin plate problems
p 2483 N94-23679
Nonlinear analysis using a modal based reduction technique p 2161 N94-24288
Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773

PLATES (STRUCTURAL MEMBERS)
Hydro-elastic analysis using a selection of commercial analysis programs
[PB94-118734] p 2376 N94-24478
Responses of a finite baffled plate subject to turbulent and mean flow excitations
[NASA-CR-191570] p 2334 N94-24605

PLATING
Investigate zero-stress replicated optics
[NASA-CR-193889] p 2545 N94-24665

PLATINUM
High power density proton exchange membrane fuel cells p 2393 N94-23359
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
Thermal phase behavior of metal surfaces: X-ray scattering studies of Pt(001)
[DE94-002991] p 2245 N94-24612
The structure and catalytic properties of supported platinum catalysts
[ETN-94-95357] p 2236 N94-25250

PLATINUM ALLOYS
Reduction of nitric oxide over platinum, rhodium and platinum-rhodium single crystal surfaces
[PB93-230092] p 2232 N94-23482

PLATINUM OXIDES
PEM regenerative fuel cells p 2392 N94-23358

PLOTTING
VTGRAPH:Computer graphics program using ReGIS mode
[DE94-600342] p 2448 N94-23024

PLUMES
Molecular gas dynamics applied to low-thrust propulsion p 2214 N94-23053
Contamination control and plume assessment of low-energy thrusters
[NASA-TM-104585] p 2218 N94-23343
Diagnostic budgets of analyzed and modelled tropical plumes
[NASA-CR-194853] p 2409 N94-23621
Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361
Optimal Space Station solar array gimbal angle determination via radial basis function neural networks
[NASA-TM-106482] p 2195 N94-24482
Analysis and effects of the advanced solid rocket motor on the Space Shuttle elements
[NASA-CR-193879] p 2200 N94-24664

PLUTONIUM
A survey of metallurgical research on several actinides
[DE94-002643] p 2245 N94-24747

PLY ORIENTATION
Optimization of laminate orientation to enhance failure properties
[ISBN-0-315-83539-7] p 2227 N94-22892
Analysis of local delaminations caused by angle ply matrix cracks
[NASA-TM-109052] p 2228 N94-24083

PNEUMOTHORAX
Spontaneous pneumothorax, cysts and bullae
p 2425 N94-23326

POINT SOURCES
Static image method for computing the electric potential due to sources in a layered sphere
[PB93-224970] p 2308 N94-23105
Electromagnetic scattering by inhomogeneous objects. Solution methods based upon reciprocity theorems of time-convolution and time-correlation type
[PB94-111010] p 2294 N94-23729

POINT TO POINT COMMUNICATION
MITS architecture V1.0
[PB93-201762] p 2452 N94-23451
The design of a standard message passing interface for distributed memory concurrent computers
[DE94-002536] p 2446 N94-24538

POINTING CONTROL SYSTEMS
Ultra-clean high-precision mechanisms for the SUMER EUV spectrometer on SOHO p 2356 N94-23999
Data relay system satellite: The development of an antenna pointing mechanism for the inter-orbit link antenna p 2359 N94-24015
Inter orbit link antenna pointing mechanisms design using standard actuators p 2359 N94-24016
Design of a new high-performance pointing controller for the Hubble Space Telescope
[NASA-CR-193891] p 2364 N94-24088
Optimal Space Station solar array gimbal angle determination via radial basis function neural networks
[NASA-TM-106482] p 2195 N94-24482

POISSON DENSITY FUNCTIONS
Loss probabilities in batch-arrival bulk-service queues with finite capacity
[MEMO-1106] p 2493 N94-22724
Probabilistic methods in problems of applied analysis
[PB94-110681] p 2495 N94-24571

POISSON EQUATION
A mixed method Poisson solver for three-dimensional self-gravitating astrophysical fluid dynamical systems
p 2484 N94-23684
Comparison of time integration methods for the evolution of galaxies
[PB94-111671] p 2602 N94-24522
Triangular spectral elements for incompressible fluid flow
[NASA-CR-191588] p 2490 N94-24914

POISSON RATIO
Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2
[NASA-CR-193893] p 2229 N94-24224

POLAR CAPS
Impact of the CO2 and H2O clouds of the Martian polar hood on the polar energy balance p 2618 N94-24880
High latitude cusp signature observations for southward IMF B sub Z
[AD-A273801] p 2406 N94-25536

POLAR ORBITS
Mission planning for an Earth observation low Earth orbiter: ERS-1 p 2503 N94-23868

POLAR REGIONS
Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap
p 2621 N94-24895
The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896

POLARIMETRY
White-light, pressure, and temperature interferopolarimetric sensor featuring optical fibers
[PB93-199792] p 2545 N94-24631
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A273568] p 2419 N94-24944
Liquidus temperature and optical properties measurement by containerless techniques
p 2247 N94-25126

Optical properties and emissivities of liquid metals and alloys p 2248 N94-25129

POLARITY

Observation of non-centrosymmetry and determination of polarity in III-V semiconductors
[PB93-201416] p 2561 N94-23503

POLARIZATION (CHARGE SEPARATION)

Photoinduced charge separation in solid state and molecular systems
[DE94-001727] p 2563 N94-24537

POLARIZATION (SPIN ALIGNMENT)

Polarized structure functions of the nucleon in the resonance region
[CEBAF-PR-94-001] p 2540 N94-24663

POLARIZATION CHARACTERISTICS

Optical properties and emissivities of liquid metals and alloys p 2248 N94-25129

POLARIZERS

Mueller matrix analysis of infrared ellipsometry
[PB93-201549] p 2544 N94-23629

GOLF mechanisms p 2357 N94-24003

POLARONS

Spin-polaron theory of high-T(c) superconductivity. 2: Electronic structure of the CuO2 planes
[DE93-019197] p 2556 N94-22919

Disorder effects on small-polaron formation and hopping
[DE94-001205] p 2534 N94-23804

POLICE

Using satellite communications for a mobile computer network p 2280 N94-22777

POLICIES

Proceedings of the Third International Mobile Satellite Conference (IMSC 1993)
[NASA-CR-194516] p 2273 N94-22735

US domestic and international regulatory issues
p 2275 N94-22748

Use of negotiated rulemaking in developing technical rules for low-Earth orbit mobile satellite systems
p 2276 N94-22750

NASA printing, duplicating, and copying management handbook
[NASA-NHB-1490.5] p 2590 N94-23971

Proceedings of Technology and Governance in the 1990's
[PB93-192904] p 2597 N94-24312

Orbital debris and near-Earth environmental management: A chronology
[NASA-RP-1320] p 2598 N94-24644

POLISHING

Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657

POLLUTION

Soil pollution at former industrial sites, the heritage of 150 years of industrial development in Noord-Brabant, The Netherlands
[ISBN-9-09-005758-7] p 2400 N94-25223

POLLUTION CONTROL

Economics of electron beam and electrical discharge processing for post-combustion NO(x) control in internal combustion engines
[DE93-019574] p 2351 N94-22865

Fundamental limitations of non-thermal plasma processing for internal combustion engine NO(x) control
[DE93-019622] p 2351 N94-22866

Reduction of nitric oxide over platinum, rhodium and platinum-rhodium single crystal surfaces
[PB93-230092] p 2232 N94-23482

POLLUTION MONITORING

Estimation of delays and emissions at four-way junctions with different forms of regulation, principally four-way mandatory stop
[PB94-105236] p 2398 N94-23813

EPA's survey of in-use driving patterns: Implications for mobile source emission inventories
[PB94-118502] p 2399 N94-24525

Manual on measurement of methane and nitrous oxide emissions from agriculture
[DE93-616429] p 2399 N94-25167

POLLUTION TRANSPORT

Carbon and hydrogen isotope composition and C-14 concentration in methane from sources and from the atmosphere: Implications for a global methane budget
[NASA-CR-195166] p 2399 N94-25092

Collection and evaluation of numerical models with the aim to investigate the impact of aircraft emissions
[DLR-MITT-93-06] p 2400 N94-25414

POLYAMIDE RESINS

Polyimide processing additives
[NASA-CASE-LAR-13669-2] p 2252 N94-23079

Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763

POLYBENZIMIDAZOLE

Di(hydroxyphenyl)- benzimidazole monomers
[NASA-CASE-LAR-14643-2] p 2253 N94-23305

POLYBUTADIENE

Microstructure of styrene methyl methacrylate copolymers grafted onto polybutadiene seeds
[ETN-94-95360] p 2262 N94-25225

POLYCARBONATES

A preliminary evaluation of the phosphazene resin PPZ
[AD-A273674] p 2263 N94-25410

Birdstrike resistant crew enclosure program
[AD-A273700] p 2463 N94-25453

POLYCRYSTALS

Polycrystalline thin film materials and devices
[DE93-018213] p 2389 N94-22862

Chromate-free talc chemical conversion coatings for aluminum alloys
[DE94-001567] p 2238 N94-22932

Orientation imaging microscopy: New possibilities for microstructural investigations using automated BKD analysis
[DE94-000777] p 2557 N94-22938

Research on polycrystalline thin-film CuInGaSe2 solar cells
[DE94-000203] p 2560 N94-23205

Defects in electro-optically active polymer solids
p 2223 N94-24342

POLYETHYLENE TEREPHTHALATE

Processing of semicrystalline polymers
p 2226 N94-24351

A preliminary evaluation of the phosphazene resin PPZ
[AD-A273674] p 2263 N94-25410

POLYETHYLENES

Demonstration of polyscann ultrasonic butt-fusion inspection system for polyethylene pipes
[AD-A273279] p 2373 N94-24814

POLYGONS

Number of moduli of families of curves on toric surfaces
[PB93-230381] p 2479 N94-23121

Tools for visualizing landscape pattern for large geographic areas
[DE94-001121] p 2388 N94-24757

POLYHEDRONS

Extracting projective information from single views of 3D point sets
[OUEL-1973/93] p 2464 N94-25471

POLYIMIDE RESINS

Tribological behaviour of fluorinated resins and polyimide resins sliding over a metallic surface in liquid nitrogen
p 2355 N94-23991

POLYIMIDES

Polyimide processing additives
[NASA-CASE-LAR-13669-2] p 2252 N94-23079

POLYMER BLENDS

Surface and interfacial properties of polymer blends. A literature survey
[PB93-230191] p 2254 N94-23561

Electric field-mediated processing of polymer blend solutions p 2223 N94-24341

Processing of semicrystalline polymers
p 2226 N94-24351

Ultrastructure processing of macromolecular materials
[AD-A273413] p 2258 N94-24782

Center for advanced electrical and structural polymers
[AD-A273415] p 2259 N94-24783

Simulation studies for surfaces and materials strength
[NASA-CR-195185] p 2565 N94-25093

POLYMER CHEMISTRY

Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763

Synthesis of molecular wires by a novel divergent/convergent approach
[AD-A273332] p 2537 N94-25087

Influence of test configuration on the combustion characteristics of polymers as ignition sources
p 2238 N94-25365

POLYMER MATRIX COMPOSITES

Materials Science and Engineering
[DE94-003018] p 2228 N94-23493

Prediction of thermal cycling induced cracking in polmer matrix composites
[NASA-CR-195135] p 2229 N94-24579

POLYMERIC FILMS

Chemically sensitive interfaces on SAW devices
[DE94-001832] p 2526 N94-23718

Ordered organic thin films self-assembled from the vapor phase p 2223 N94-24339

Electric field-mediated processing of polymer blend solutions p 2223 N94-24341

Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346

Nonlinear optical thin films p 2225 N94-24349

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448

POLYMERIZATION

Surface and interfacial properties of polymer blends. A literature survey
[PB93-230191] p 2254 N94-23561

Reaction of isocyanates with carboxylic acids and its application to polymer synthesis
[PB94-118858] p 2254 N94-23763

Prediction of nonlinear optical properties of organic materials. General theoretical considerations
p 2224 N94-24343

Polydiacetylene thin films for nonlinear optical applications p 2225 N94-24347

Feasibility study: Monodisperse polymer particles containing laser-excitable dyes p 2225 N94-24350

Convective instabilities in traveling fronts of addition polymerization p 2226 N94-24352

Synthesis of soluble halogenated polyphenylenes: Mechanism for the coupling halogenated lithiobenzenes
[AD-A273547] p 2257 N94-24558

STM studies of LB deposited alkyl substituted polyaniline and its corresponding monomer
[AD-A273553] p 2257 N94-24562

Curing phthalonitrile resins with acid and amine
[AD-D016021] p 2258 N94-24721

Electrochemically mediated polymerization of 2-pentadecylaniline confined to a planar liquid-liquid interface
[AD-A273541] p 2259 N94-24792

The 2-D polymerized Langmuir-Blodgett films studied by STM
[AD-A273542] p 2261 N94-24930

Synthesis of molecular wires by a novel divergent/convergent approach
[AD-A273332] p 2537 N94-25087

Particle nucleation and growth in butadiene emulsion polymerization
[ETN-94-95300] p 2262 N94-25236

POLYMERS

Method of determining shear stress employing a monomer-polymer laminate structure
[NASA-CASE-LAR-14654-2] p 2375 N94-23308

Selection of polymer binders and fabrication of SiC fiber-reinforced reaction-bonded silicon nitride matrix composites
[NASA-CR-194874] p 2255 N94-24223

Microgravity Studies of Organic and Polymeric Materials
[NASA-CP-3250] p 2223 N94-24338

Planar poly(p-phenylene) derivatives: Ladder formation for maximization of extended conjugation
[AD-A273220] p 2260 N94-24922

POLYMETHYL METHACRYLATE

Extinguishment of combustible porous solids by water droplets
[PB93-198893] p 2270 N94-23740

POLYMORPHISM

A type declarative system for PROLOG
[ETN-94-95178] p 2449 N94-23155

POLYNOMIALS

On the Daubechies-based wavelet differentiation matrix
[NASA-CR-191583] p 2479 N94-23090

Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface
[PB93-237691] p 2480 N94-23438

Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction
[NASA-CR-189645] p 2525 N94-23698

Systematic construction of trigonometric neural networks
[PB93-200228] p 2474 N94-24544

Polynomials orthogonal with respect to an inner product involving differences
[PB94-110731] p 2489 N94-24572

On BRST quantization of constrained systems
[ETN-94-95386] p 2570 N94-25258

Relationship between the structure and performance of identified nonlinear polynomial models
[RR-474] p 2492 N94-25320

A reachability test for systems over polynomial rings using Groebner bases
[MEMO-COSOR-92-38] p 2493 N94-25527

POLYPHENYLS

Synthesis of soluble halogenated polyphenylenes: Mechanism for the coupling halogenated lithiobenzenes
[AD-A273547] p 2257 N94-24558

Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789

Synthesis of polyphenylenes via Bergman cyclization of enediyne monomers [AD-A273298] p 2260 N94-24924

POLYSTYRENE

Feasibility study: Monodisperse polymer particles containing laser-excitable dyes p 2225 N94-24350

POLYTOPES

Number of moduli of families of curves on toric surfaces [PB93-230381] p 2479 N94-23121

Polytopic vector analysis in igneous petrology: Application to lunar petrogenesis p 2615 N94-24368

POLYURETHANE RESINS

Reaction of isocyanates with carboxylic acids and its application to polymer synthesis [PB94-118858] p 2254 N94-23763

POPULATIONS

Aeromedical disposition for coronary artery disease p 2423 N94-23316

Primary prevention of coronary heart disease p 2423 N94-23317

Aeromedical implications of mitral valve prolapse p 2424 N94-23323

Sarcoidosis and the aviator p 2425 N94-23325

Subset selection for the best of two populations: Tables of the expected subset size [PB93-237857] p 2494 N94-23546

Subset selection with a generalized selection goal based on a loss function [PB94-111192] p 2494 N94-23798

Some generalized subset selection procedures [PB94-111655] p 2487 N94-23799

Factors affecting the identification of phytoplankton groups by means of remote sensing [NASA-TM-108799] p 2387 N94-24403

Efficiency of subset selection of an epsilon-best uniform population relative to selection of the best one [PB93-237741] p 2490 N94-24763

An exploratory stochastic model for toxic effects on cells [AD-A273438] p 2422 N94-25146

Solving the ranking and selection indifference-zone formulation for normal distributions using computer software [AD-A273821] p 2496 N94-25518

POROSITY

Influence of sintering atmospheres on the aluminum sintering characteristics [DE93-632412] p 2239 N94-22965

Modelling the ignition of boron/titanium particles p 2159 N94-24273

Method of fabricating a receptor-based sensor [AD-D016026] p 2344 N94-24723

Laser-deposited biocompatible films and methods and apparatuses for producing same [AD-D016017] p 2350 N94-24952

POROUS MATERIALS

Carbon aerogels: An update on structure, properties, and applications [DE94-001528] p 2252 N94-22931

Extinguishment of combustible porous solids by water droplets [PB93-198893] p 2270 N94-23740

Investigations on detonation shock dynamics and related topics [DE94-002570] p 2326 N94-23809

Applications of the homogenization method to flow and transport in porous media [BER-9110] p 2340 N94-25467

PORTABLE EQUIPMENT

Compact free electron lasers for medical applications [AD-A273609] p 2350 N94-24934

POSEIDON SATELLITE

TOPEX/Poseidon precision orbit determination production and expert system p 2196 N94-23920

POSITION (LOCATION)

Joint Acoustic Propagation Experiment (JAPE) p 2527 N94-24208

Worldwide vessel locating and tracking system, volume 1 [PB93-193217] p 2175 N94-24474

The role of visual context in manual target localization p 2429 N94-25351

Mechanisms of eye-hand coordination [AD-A273687] p 2428 N94-25437

POSITION ERRORS

A review of GPS-based tracking techniques for TDRS orbit determination p 2196 N94-23257

POSITION INDICATORS

EUTELTRACS: The European experience on mobile satellite services p 2281 N94-22781

Lightning studies using LDAR and LLP data p 2416 N94-23238

POSITION SENSING

Sensing and modelling concepts for autonomous and remote mobile robot control p 2370 N94-23421

Autonomous Space Processor for Orbital Debris (ASPOD) [NASA-CR-195521] p 2204 N94-24621

POSITIONING

CNES organization for station positioning of geostationary satellites p 2501 N94-23857

MERCATOR: Methods and Realization for Control of the Attitude and the Orbit of spacecraft p 2202 N94-23925

HISPASAT launch and early operations phases: Computation and monitoring of geostationary satellite positioning p 2514 N94-23928

Differential GPS for air transport: Status p 2162 N94-25100

POSITIONING DEVICES (MACHINERY)

Precision Displacement Mechanism (PDM) p 2360 N94-24026

System for automatic transportation of aircraft on the ground [CA-PATENT-1-322-361] p 2193 N94-24785

POSTFLIGHT ANALYSIS

Postflight hardware evaluation RSRM-29 (STS-54). Appendix D: Nozzle postfire data [NASA-CR-193898] p 2199 N94-24057

Postflight hardware evaluation RSRM-29 (STS-54). Appendix C: Nozzle PFORs [NASA-CR-193894] p 2219 N94-24064

Final postflight hardware evaluation report RSRM-32 (STS-57) [NASA-CR-193903] p 2200 N94-24065

Postflight hardware evaluation RSRM-29 (STS-54). Appendix E: Insulation postfire data [NASA-CR-193897] p 2200 N94-24067

Final postflight hardware evaluation report RSRM-28 (STS-53) [NASA-CR-193902] p 2200 N94-24112

Postflight hardware evaluation (RSRM-29, STS-54) [NASA-CR-193895] p 2201 N94-24802

Postflight hardware evaluation 360T021 (RSRM-21, STS-45), revision A [NASA-CR-193904] p 2201 N94-24965

Postflight hardware evaluation RSRM-29 (STS-54). Case, seals, and joints PFORs, appendix B [NASA-CR-193899] p 2367 N94-25020

POSTLAUNCH REPORTS

Final postflight hardware evaluation report RSRM-32 (STS-57) [NASA-CR-193903] p 2200 N94-24065

POSTMISSION ANALYSIS (SPACECRAFT)

Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61 [NASA-TM-109195] p 2199 N94-24059

Postflight hardware evaluation (RSRM-29, STS-54) [NASA-CR-193895] p 2201 N94-24802

POTABLE WATER

Statistical procedures for corrosion studies [PB93-199412] p 2244 N94-23802

POTASSIUM HYDROXIDES

NASA Lewis advanced IPV nickel-hydrogen technology p 2392 N94-23356

POTASSIUM OXIDES

The de Haas-van Alphen measurements in Ba(0.6)K(0.4)BiO3 [DE93-041169] p 2556 N94-22920

POTENTIAL ENERGY

Mechanical and thermal buckling analysis of sandwich panels under different edge conditions [NASA-TM-4535] p 2228 N94-23514

CAPE for CaPE p 2416 N94-24409

The torsion space nucleic acids molecular mechanics program DUPLEX: Surveying conformation space by potential energy minimization [DE94-002441] p 2563 N94-24567

Free energy profiles for Li(+) and I(-) ions approaching Pt(100) surface: A molecular dynamics study [AD-A273455] p 2536 N94-24675

POTENTIAL FIELDS

Comparison of time integration methods for the evolution of galaxies [PB94-111671] p 2602 N94-24522

POTENTIAL FLOW

Computational fluid dynamic modelling of cavitation p 2215 N94-23060

A dual reciprocal boundary element formulation for viscous flows p 2325 N94-23666

Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field [NASA-CR-191490] p 2344 N94-24360

POWDER (PARTICLES)

Development of silicon nitride composites with continuous fiber reinforcement [DE94-001996] p 2227 N94-23022

Theoretical considerations for Reaction-Formed Silicon Carbide (RFSC) formation by molten silicon infiltration into slurry-derived preforms [NASA-TM-106414] p 2222 N94-23500

Magnetic power piston fluid compressor [NASA-CASE-GSC-13565-1] p 2354 N94-23831

Modelling the ignition of boron/titanium particles p 2159 N94-24273

Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275

Thermomechanical processing of Ag-clad Bi2Sr2CaCu2O(x) superconductors [DE94-002347] p 2563 N94-24624

POWDER METALLURGY

Solid state synthesis of Fe-B-Si alloys [VTT-PUBS-118] p 2250 N94-25316

The mechanical property data base from an Air Force/Industry Cooperative Test Program on advanced aluminum alloys (7064 and CW67) [AD-A273741] p 2251 N94-25531

POWDERED ALUMINUM

Influence of sintering atmospheres on the aluminum sintering characteristics [DE93-632412] p 2239 N94-22965

POWER AMPLIFIERS

Broadband linearisation of high-efficiency power amplifiers p 2275 N94-22747

Modulation characteristics of a high-power semiconductor Master Oscillator Power Amplifier (MOPA) [NASA-TM-104577] p 2308 N94-23281

Design and testing of ubitron amplifier tubes [AD-A273297] p 2311 N94-24818

Bounds and simulation results of 32-ary and 64-ary quadrature amplitude modulation for broadband-ISDN via satellite [NASA-TM-106484] p 2202 N94-25095

POWER BEAMING

Power beaming to space using a nuclear reactor-pumped laser [DE94-001208] p 2348 N94-23185

POWER CONDITIONING

Development of a power electronics unit for the Space Station plasma contactor [NASA-TM-106486] p 2222 N94-25201

Parallel processing methods for space based power systems p 2222 N94-25352

POWER EFFICIENCY

Second law analysis of a conventional steam power plant p 2322 N94-23646

The effect of high altitude pressure on the power and efficiency of an airborne two-stroke engine p 2155 N94-24253

POWER GAIN

Design and testing of ubitron amplifier tubes [AD-A273297] p 2311 N94-24818

POWER LINES

Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply [AD-A273149] p 2299 N94-24670

POWER LOSS

Effects of a vibrating wire carrying DC current on a moving type 2 superconducting slab of arbitrary thickness [DE93-617136] p 2566 N94-25391

POWER PLANTS

Second law analysis of a conventional steam power plant p 2322 N94-23646

POWER SPECTRA

Propagation model for the Land Mobile Satellite channel in urban environments p 2283 N94-22796

Laser linewidth measurement in the presence of RIN and using the recirculating self heterodyne method [EUT-92-E-262] p 2347 N94-22874

Continuous gust response and sensitivity derivatives using state-space models p 2161 N94-24287

PROPWR: A versatile tool for 1/3 octave processing and narrowband line tracking [DREA-TC-93-303] p 2297 N94-24298

Composite sequences for rapid acquisition of direct-sequence spread spectrum signals [CTN-94-60901] p 2300 N94-24696

Choice of filters for the detection of gravitational waves from coalescing binaries. 2: Detection in coloured noise [DE93-616844] p 2604 N94-25211

POWER SUPPLIES

Power generation technology options for a Mars mission [NASA-TM-106451] p 2220 N94-24681

POWER SUPPLY CIRCUITS

Power electronics development for the SPT-100 thruster [NASA-TM-106488] p 2221 N94-25189

POWER TRANSMISSION
Vibrational power transmission analysis of machinery installations in ships with the objective of noise reduction
[ISVR-TR-216] p 2363 N94-24076
POWERED LIFT AIRCRAFT
Summary of lift and lift/cruise fan powered lift concept technology
[NASA-CR-177619] p 2176 N94-23489
PRANDTL NUMBER
Computational fluid mechanics
[NASA-CR-194765] p 2337 N94-24859
PREBURNERS
SSME fuel preburner injector characterization
p 2211 N94-23037
CFD simulation of coaxial injectors
p 2342 N94-24430
PRECIPITATES
Relationship of microstructure and mechanical properties for V-Cr-Ti alloys
[DE94-001431] p 2238 N94-22718
Potent solvents for C60 and their utility for the rapid acquisition of 13CNMR data for fullerenes
[AD-A273349] p 2235 N94-24925
PRECIPITATION (METEOROLOGY)
NOAA Federal/State Cooperative Program in Atmospheric Modification Research. Collected publication titles and abstracts
[PB93-198125] p 2396 N94-22913
Scientific investigations of atmospheric processes
[NASA-CR-194805] p 2401 N94-23271
Precipitation measurement using SIR-C: A feasibility study
[NASA-CR-195104] p 2409 N94-24048
Water cycle research associated with the CaPE hydrometeorology project (CHymP p 2416 N94-24414
Observational and modeling studies of heat, moisture, precipitation and global-scale circulation patterns
[NASA-CR-195148] p 2415 N94-24485
Observational case studies and diagnostic analyses of long-lived large-amplitude inertia-gravity waves
[AD-A273545] p 2404 N94-24794
PRECIPITATION HARDENING
Effect of irradiation on the stress corrosion cracking behavior of Alloy X-750 and Alloy 625
[DE94-001759] p 2244 N94-23792
PRECISION
Precision drive and speed reduction device
[AD-D016004] p 2367 N94-25046
Design of gas bearing systems for precision applications
[ISBN-9-03-860112-3] p 2367 N94-25249
PRECONDITIONING
An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554
PREDICATE LOGIC
Design and specification of a generic task model for solving boolean constraint satisfaction problems
[PB94-118841] p 2486 N94-23762
PREDICTION ANALYSIS TECHNIQUES
Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS
p 2283 N94-22795
Fatigue life and crack growth prediction methodology
[NASA-TM-109044] p 2228 N94-23279
Physical modeling and dynamic simulation of planet vehicles: Application to the motion prediction
p 2371 N94-23426
Transient Ejector Analysis (TEA) code user's guide
[NASA-TM-106310] p 2186 N94-23466
Development of an analytical-numerical model to predict radiant emission or absorption
[NASA-CR-194860] p 2453 N94-23624
Examples of data assimilation in mesoscale models
p 2412 N94-24384
Predictive head movement tracking using innovations generated by Kalman filters
[ISBN-0-315-83371-8] p 2427 N94-24467
Further studies to extend and test the area-time-integral technique applied to satellite data
[NASA-CR-195132] p 2415 N94-24705
The hydrodynamics of a moving fluid-liquid contact line
[ETN-94-95352] p 2339 N94-25247
Kernels of anti-causal operators and the multivariable generalized predictive control problem
[MATHS-REPT-A-191] p 2476 N94-25428
Advances in generalized and constrained generalized predictive control with application to a dynamometer model
[MATHS-REPT-A-192] p 2476 N94-25429
Fault detection in HVAC systems using fuzzy models
[OUEL-1977/93] p 2373 N94-25475
PREDICTIONS
Screening for asymptomatic coronary heart disease
p 2423 N94-23315
The ignition temperature of solid explosives exposed to a fire
[DE94-001047] p 2265 N94-23436
Stability questions in predictive control
[OUEL-1970/93] p 2477 N94-25469
Adaptive predictive control of the benchmark plant
[OUEL-1972/93] p 2477 N94-25470
PREDICTOR-CORRECTOR METHODS
An adaptive streamline diffusion finite element method for hyperbolic systems in gas dynamics
[PREPRINT-688] p 2340 N94-25466
PREFLIGHT OPERATIONS
Constraint-based scheduling p 2510 N94-23904
PREFORMS
Composite fiber structures for catalysts and electrodes
p 2393 N94-23364
Theoretical considerations for Reaction-Formed Silicon Carbide (RFSC) formation by molten silicon infiltration into slurry-derived preforms
[NASA-TM-106414] p 2222 N94-23500
PRELAUNCH TESTS
Constraint-based scheduling p 2510 N94-23904
PREMIXED FLAMES
Mechanism and enhancement of flame stabilization
[DE94-002181] p 2232 N94-23023
Stretch-induced quenching in flame-vortex interactions
p 2237 N94-24156
The production of premixed flame surface area in turbulent shear flow p 2237 N94-24158
Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275
Stability of premixed laminar flames in a stagnation point flow to general disturbances
[AD-A273429] p 2234 N94-24673
Modelling of premixed laminar flames
[ETN-94-95317] p 2236 N94-25284
PREPARATION
Preparation and properties of translucent gamma-aluminium oxynitride
[ETN-94-95305] p 2263 N94-25281
PREPOLYMERS
High temperature adhesive
[AD-D016019] p 2258 N94-24737
Curing phthalonitriles with acid
[AD-D015996] p 2261 N94-25054
PREPREGS
Preparing polymeric matrix composites using an aqueous slurry technique
[NASA-CASE-LAR-14771-1] p 2252 N94-23076
Composite material impregnation unit
[NASA-TM-107751] p 2254 N94-23486
PRESBYOPIA
Vision impairment and corrective considerations of civil airmen
[DOT/FAA/AM-93/21] p 2426 N94-23623
PRESIDENTIAL REPORTS
Advanced nuclear thermal propulsion concepts
p 2217 N94-23068
PRESSURE DEPENDENCE
Anisotropic uniaxial pressure effects in YBa2Cu3O(7-delta)
[DE94-001456] p 2557 N94-22929
Bridgman's concern
[DE93-040900] p 2558 N94-22953
Physics of iron
[DE94-002002] p 2402 N94-23721
The effect of high altitude pressure on the power and efficiency of an airborne two-stroke engine
p 2155 N94-24253
PRESSURE DISTRIBUTION
Computational fluid dynamic modelling of cavitation
p 2215 N94-23060
An experimental study of the flow field surrounding a subsonic jet in a cross flow
[NASA-CR-194770] p 2317 N94-23072
Probe systems for measuring static pressure and turbulence intensity in fluid streams
[NASA-CASE-ARC-11935-1] p 2319 N94-23306
Experimental investigation of generic three-dimensional sidewall-compression scramjet inlets at Mach 6 in tetrafluoromethane
[NASA-TM-4497] p 2319 N94-23339
The 3-D CFD modeling of gas turbine combustor-integral bleed flow interaction p 2189 N94-23658
FAS multigrid calculations of three dimensional flow using non-staggered grids p 2341 N94-23675
Evaluation of turbulence models in the PARC code for transonic diffuser flows
[NASA-TM-106391] p 2168 N94-24084
CFD simulation of coaxial injectors
p 2342 N94-24430
Aerodynamic characteristics and pressure distributions for an executive-jet baseline airfoil section
[NASA-TM-4529] p 2169 N94-24586
Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897
Three-dimensional numerical simulation of thermal tides in the Martian atmosphere p 2622 N94-24901
PRESSURE DROP
Prediction of pressure drop in fluid tuned mounts using analytical and computational techniques
p 2321 N94-23643
Solution of mixed convection heat transfer from isothermal in-line fins p 2321 N94-23644
PRESSURE EFFECTS
Anisotropic uniaxial pressure effects in YBa2Cu3O(7-delta)
[DE94-001456] p 2557 N94-22929
Performance evaluation of the Russian SPT-100 thruster at NASA LeRC
[NASA-TM-106401] p 2219 N94-23630
PRESSURE GRADIENTS
Heat transfer and flow structure in end-wall boundary layers
[AD-A273470] p 2335 N94-24689
Fluid velocity and electromagnetic forces measured by a rotating Langmuir probe in the scrape off layer of JFT-2M
[OUEL-1968/92] p 2554 N94-25327
PRESSURE MEASUREMENT
Experimental Methods in Separated Flows
[ILR-MITT-260(1991)] p 2315 N94-22852
Pressure oscillation measurements in turbulent flows
p 2316 N94-22855
The use of near-wall hot-wire probes for time-resolved skin-friction measurements p 2316 N94-22857
Probe shapes that measure time-averaged streamwise momentum and cross-stream turbulence intensity
[NASA-CASE-ARC-11934-1] p 2317 N94-23077
Probe systems for measuring static pressure and turbulence intensity in fluid streams
[NASA-CASE-ARC-11935-1] p 2319 N94-23306
Calibration of HYPULSE for hypervelocity air flows corresponding to flight Mach numbers 13.5, 15, and 17
[NASA-CR-191578] p 2192 N94-23564
Improved pressure measurement system for calibration of the NASA LeRC 10x10 supersonic wind tunnel
[NASA-TM-106470] p 2344 N94-24362
Experimental cavity pressure measurements at subsonic and transonic speeds. Static-pressure results
[NASA-TP-3358] p 2169 N94-24464
White-light, pressure, and temperature interferopolarimetric sensor featuring optical fibers
[PB93-199792] p 2545 N94-24631
Method and apparatus for the non-invasive measurement of pressure inside pipes using a fiber optic interferometer sensor
[AD-D016013] p 2344 N94-24734
Analysis of the effects of wake passage on heat transfer in a linear turbine cascade
[AD-A273729] p 2339 N94-25446
PRESSURE MODULATOR RADIOMETERS
Modeling and data assimilation for Mars Observer
p 2620 N94-24889
PRESSURE OSCILLATIONS
Pressure oscillation measurements in turbulent flows
p 2316 N94-22855
Three-dimensional numerical simulation of thermal tides in the Martian atmosphere p 2622 N94-24901
PRESSURE PULSES
Magnetic power piston fluid compressor
[NASA-CASE-GSC-13565-1] p 2354 N94-23831
PRESSURE RECOVERY
Improving diffusing S-duct performance by secondary flow control
[NASA-TM-106492] p 2170 N94-25182
PRESSURE REDUCTION
Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657
PRESSURE REGULATORS
Computer control of an electro-mechancial regulator for providing positive pressure breathing and an electronic G-valve for human +Gz research
[DCIEM-93-05] p 2437 N94-24299
The pressure loaded volumetric ceramic receiver 500 kW version design and construction
[DLR-MITT-93-02] p 2396 N94-25479
PRESSURE SENSORS
Probe shapes that measure time-averaged streamwise momentum and cross-stream turbulence intensity
[NASA-CASE-ARC-11934-1] p 2317 N94-23077
Probe systems for measuring static pressure and turbulence intensity in fluid streams
[NASA-CASE-ARC-11935-1] p 2319 N94-23306
White-light, pressure, and temperature interferopolarimetric sensor featuring optical fibers
[PB93-199792] p 2545 N94-24631

PRESSURE VESSELS
A pressurized thermogravimetric analyzer for use in studies of gas/solid systems
[DE94-001224] p 2342 N94-22989
Dispersion of fire suppression agents discharged from high pressure vessels: Establishing initial/boundary conditions for the flow outside the vessel
[PB94-103660] p 2172 N94-23810
J-integral patch for finite element analysis of dynamic fracture due to impact of pressure vessels
p 2381 N94-24429
Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD
[DE94-001565] p 2552 N94-24504
Metal hydride storage
[VTT-JULK-769] p 2396 N94-25417
Strength and life of pressure vessels subjected to impacts and thermomechanical GFRP loading
[VTT-JULK-771] p 2379 N94-25418
PRESSURIZED CABINS
Pressure wall patch
[NASA-CASE-MFS-28724-1] p 2203 N94-23824
PRESSURIZING
Thermodynamic models for bounding pressurant mass requirements of cryogenic tanks
[NASA-TM-106476] p 2346 N94-25202
PREVENTION
Primary prevention of coronary heart disease
p 2423 N94-23317
Waste minimization/pollution prevention at R/D facilities: A cradle-to-grave tracking and information system that will be implemented at Sandia National Laboratories
[DE93-040330] p 2591 N94-24607
PRIMERS (COATINGS)
Evaluation of inorganic zinc-rich primers using Electrochemical Impedance Spectroscopy (EIS)
p 2237 N94-23233
PRIMITIVE EQUATIONS
An efficient data assimilation algorithm with a gaussian covariance structure
[AD-A273152] p 2418 N94-24671
A diagnostic model to estimate winds and small-scale drag from Mars Observer PMIRR data
p 2617 N94-24874
The influence of orography on the transport of atmospheric constituents p 2619 N94-24886
PRINTED CIRCUITS
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2
[AD-A273703] p 2463 N94-25456
PRINTING
NASA printing, duplicating, and copying management handbook
[NASA-NHB-1490.5] p 2590 N94-23971
PROBABILITY DENSITY FUNCTIONS
Numerical solutions of the complete Navier-Stokes equations
[NASA-CR-194780] p 2337 N94-24858
Probabilistic assessment of smart composite structures
[NASA-TM-106358] p 2378 N94-25188
PROBABILITY DISTRIBUTION FUNCTIONS
Characterizations of shift-invariant distributions based on summation modulo one
[PB93-237824] p 2481 N94-23442
PROBABILITY THEORY
On some approximately balanced combinatorial cooperative games
[MEMO-1113] p 2493 N94-22702
Probabilistic analysis of mechanical systems
[DE93-041145] p 2371 N94-22918
Simple calculus of finite probabilistic processes
[PB93-223782] p 2493 N94-23108
Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination
[PB93-224152] p 2559 N94-23109
On non-informativeness in a classical Bayesian inference problem
[MEMO-COSOR-92-35] p 2494 N94-23143
Review of the probabilistic failure analysis methodology and other probabilistic approaches for application in aerospace structural design
[NASA-TP-3434] p 2376 N94-23342
Bayesian decision theory with imprecise prior probabilities applied to replacement problems
[PB93-237634] p 2481 N94-23456
Development and application of an empirical probability distribution for the prediction error of re-entry body maximum dynamic pressure p 2207 N94-23653
Mean-value of product-form stochastic Petri net models of slotted-ring systems
[PB94-110871] p 2494 N94-23749
Logarithm of probability measures and infinite divisibility of sub-stable random vectors
[PB94-118627] p 2486 N94-23758
Decision making with imprecise probabilities
[PB94-111622] p 2494 N94-23772
Asymptotic confidence intervals for the length of the shortt under random censoring
[PB93-237816] p 2494 N94-23774
Subset selection with a generalized selection goal based on a loss function
[PB94-111192] p 2494 N94-23798
Some generalized subset selection procedures
[PB94-111655] p 2487 N94-23799
Specifying design conservatism: Worst case versus probabilistic analysis p 2374 N94-23939
Probabilistic simulation of concurrent engineering of propulsion systems p 2177 N94-24317
Uniform limit theorems for marked point processes
[PB94-118726] p 2488 N94-24526
Integral equations for the microstructures of supercritical fluids
[DE94-002460] p 2535 N94-24569
Probabilistic methods in problems of applied analysis
[PB94-110681] p 2495 N94-24571
Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply
[AD-A273149] p 2299 N94-24670
Topics in probability and dynamics
[AD-A273543] p 2496 N94-24931
Infinitely divisible processes and their nonlinear functionals; a study of their structural, statistical and sample path properties and their prediction problems
[AD-A273468] p 2496 N94-25147
Solving the ranking and selection indifference-zone formulation for normal distributions using computer software
[AD-A273821] p 2496 N94-25518
PROBLEM SOLVING
Framework for interactive solving of meta-constraint satisfaction problems
[PB94-118825] p 2585 N94-23761
Design and specification of a generic task model for solving boolean constraint satisfaction problems
[PB94-118841] p 2486 N94-23762
Two applications of a generic task model for solving boolean constraint satisfaction problems
[PB94-119047] p 2487 N94-23765
Egalitarian non-average contribution method for cooperative games
[PB94-111705] p 2497 N94-23800
Non-brittleness of a DESIRE-model for an office assignment task
[PB94-119021] p 2489 N94-24643
Introduction to a behavioral approach for continuous time systems
[ETN-94-95301] p 2492 N94-25277
PROCEDURES
An analysis of traditional operational testing to project how testing will be conducted in the future
[AD-A273189] p 2372 N94-24553
Aircraft digital flight control technical review
p 2163 N94-25106
PROCESS CONTROL (INDUSTRY)
Tool sharing: An application of max-algebra, part 2
[MEMO-1122] p 2478 N94-22710
Sensors for process control Focus Team report
[DE93-040697] p 2560 N94-23204
Intelligent control of chemical vapor deposition processes
[AD-A273356] p 2261 N94-24937
Production control and demand management in capacitated flow process industries
[ISBN-9-03-860211-1] p 2586 N94-25235
MIMO system identification for H(infinity) robust control: A frequency domain approach with minimum error bounds
[ETN-94-95354] p 2476 N94-25262
PRODUCT DEVELOPMENT
Multidisciplinary specification and design of microelectronics in products
[EUT-93-E-269] p 2308 N94-23136
Rolls-Royce in perspective: Past, present and future
[PNR-90882] p 2187 N94-23519
The RB211: The first 25 years
[PNR-90977] p 2187 N94-23570
Overview of molten carbonate fuel cell technology development
[DE94-001911] p 2394 N94-23781
Training: Plugging the information gaps
p 2429 N94-23934
Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100
Early manufacturing considerations in design
p 2177 N94-24315
Frameworks for integrated airframe design
p 2178 N94-24318
Characteristics of products generated by selective sintering and stereolithography rapid prototyping processes p 2264 N94-24412
High-order technology: Applying technical excellence to new airplane development p 2185 N94-25069
Reuse-Driven Software Processes Guidebook, version 02.00.03
[AD-A273644] p 2461 N94-25148
New Technologies for Space Avionics, 1993
[NASA-CR-195157] p 2272 N94-25193
Appendix B: Rapid development approaches for system engineering and design p 2272 N94-25195
Appendix C: Rapid development approaches for system engineering and design p 2272 N94-25196
A multimedia adult literacy program: Combining NASA technology, instructional design theory, and authentic literacy concepts p 2585 N94-25384
PRODUCTION COSTS
Amorphous silicon PVMaT, phase 2A
[DE93-018221] p 2390 N94-23295
New Ways Of Doing Business (NWODB) cost quantification analysis
[NASA-CR-195186] p 2586 N94-25197
PRODUCTION ENGINEERING
Making tomorrow's mistakes today: Evolutionary prototyping for risk reduction and shorter development time p 2197 N94-23902
Tool sharing, part 3
[PB94-111697] p 2467 N94-24524
What makes industries believe in formal methods
[PB94-110848] p 2272 N94-24648
The increase of the controllability of production organizations
[ISBN-9-03-860161-1] p 2586 N94-25076
Throughput time control and due date reliability in tool and die shops
[ISBN-9-03-860182-4] p 2587 N94-25283
PRODUCTION MANAGEMENT
The application of automated operations at the Institutional Processing Center p 2509 N94-23901
The integration of design and manufacturing processes at Alenia DVD p 2179 N94-24325
The increase of the controllability of production organizations
[ISBN-9-03-860161-1] p 2586 N94-25076
New Ways Of Doing Business (NWODB) cost quantification analysis
[NASA-CR-195186] p 2586 N94-25197
Production control and demand management in capacitated flow process industries
[ISBN-9-03-860211-1] p 2586 N94-25235
PRODUCTION PLANNING
Class of strong valid inequalities for the discrete lot-sizing and scheduling problem
[PB93-237774] p 2459 N94-24765
Production control and demand management in capacitated flow process industries
[ISBN-9-03-860211-1] p 2586 N94-25235
PROGRAM VERIFICATION (COMPUTERS)
Definition and realization of a formal verification tool of LUSTRE programs: The LESAR system
[ETN-94-95164] p 2447 N94-22882
Proof test of the computer program BUCKY for plasticity problems
[NASA-TP-3444] p 2374 N94-22960
Formal methods and digital systems validation for airborne systems
[NASA-CR-4551] p 2466 N94-23293
Micro SIL-1 simulator
[PB94-110889] p 2454 N94-23750
Towards the formal verification of the requirements and design of a processor interface unit
[NASA-CR-4522] p 2467 N94-24075
Verification and validation of models
[PB94-110566] p 2456 N94-24507
Validation activities for LOTOS based on static data flow analysis
[PB94-110863] p 2459 N94-24750
Analyzing the properties of user interface software
[AD-A273601] p 2460 N94-24933
DARPA DICE manufacturing optimization
[AD-A273345] p 2461 N94-25156
Computerized testing system software conversion and development: Identifying software and hardware portability issues and solutions
[AD-A273489] p 2462 N94-25287
PROGRAMMABLE LOGIC DEVICES
Logic synthesis on programmable networks
[ETN-94-95174] p 2449 N94-23151
PROGRAMMERS
Designers' models of the human-computer interface
p 2433 N94-24188

PROGRAMMING (SCHEDULING)
Modular approach to project management
[PB94-118833] p 2586 N94-24528
PROGRAMMING ENVIRONMENTS
MITS architecture V1.0
[PB93-201762] p 2452 N94-23451
A programming environment for distributed complex computing. An overview of the Framework for Interdisciplinary Design Optimization (FIDO) project. NASA Langley TOPS exhibit H120b
[NASA-TM-109058] p 2457 N94-24603
PROGRAMMING LANGUAGES
Definition and realization of a formal verification tool of LUSTRE programs: The LESAR system
[ETN-94-95164] p 2447 N94-22882
Asynchronous rendezvous in distributed logic programming
[PB93-220614] p 2448 N94-23096
Tools reference manual for a Requirements Specification Language (RSL), version 2.0
[NASA-CR-191461] p 2445 N94-23125
PROGRIL: A language for the definition of protocol grammars
[EUT-93-E-270] p 2449 N94-23172
Arc consistency problem: An exercise in parallel programming with shared objects
[PB94-110590] p 2466 N94-23706
Transition system specifications in stalk format with bisimulation as a congruence
[PB94-110608] p 2453 N94-23707
Object distribution in orca using compile-time and run-time techniques
[PB94-110574] p 2453 N94-23745
Mission and science activity scheduling language
p 2515 N94-23938
Tensoral for post-processing users and simulation authors p 2333 N94-24169
Sequential composition, action prefixes and process prefix
[PB94-101433] p 2488 N94-24539
Correct and efficient interface for logical query languages with complex objects
[PB93-211175] p 2593 N94-24743
PROJECT MANAGEMENT
Progress in phases 2 and 3 of the Photovoltaic Manufacturing Technology Project (PVMaT)
[DE94-000206] p 2389 N94-22888
Flexible framework for contingent information systems modelling
[PB93-220549] p 2589 N94-23095
A framework for SFC/DC system data analysis
p 2523 N94-23234
Earth Observing System (EOS) Advanced Microwave Sounding Unit-A (AMSU-A) schedule plan
[NASA-CR-194856] p 2585 N94-23563
Framework for interactive solving of meta-constraint satisfaction problems
[PB94-118825] p 2585 N94-23761
Mission engineering p 2505 N94-23881
Manned Space-laboratories Control Center (MSCC) operations concept p 2505 N94-23882
An approach to the design of operations systems
p 2506 N94-23884
Mission operations and command assurance: Instilling quality into flight operations p 2374 N94-23932
Frameworks for integrated airframe design
p 2178 N94-24318
Risk identification and reduction in integrated product teams p 2497 N94-24407
Spatial interpretation of NASA's Marshall Space Flight Center Payload Operations Control Center using virtual reality technology p 2198 N94-24432
Extension of the critical path method
[PB94-118817] p 2488 N94-24527
Modular approach to project management
[PB94-118833] p 2586 N94-24528
A methodology for software cost estimation using machine learning techniques
[AD-A273158] p 2459 N94-24775
New Ways Of Doing Business (NWODB) cost quantification analysis
[NASA-CR-195186] p 2586 N94-25197
PROJECT PLANNING
Manned Space-laboratories Control Center (MSCC) operations concept p 2505 N94-23882
PROJECT SETI
SETI: Search for extraterrestrial intelligence. An international interdisciplinary seminar, star days
[PB93-230597] p 2444 N94-23754
PROJECTILES
Projectile transverse motion and stability in electromagnetic induction launchers
[DE94-001557] p 2198 N94-23210
A comparison of in-bore projectile motion from an electromagnetic railgun versus that of a conventional cannon barrel
[AD-A273473] p 2198 N94-24690
PROJECTION
Projection techniques for iterative solution of A(bar x) equals (bar b) with successive right-hand sides
[NASA-CR-191571] p 2490 N94-24836
PROJECTIVE GEOMETRY
Orbit spaces over commutative rings and projectives as semi-isomorphisms
[DE93-616822] p 2493 N94-25473
PROLOG (PROGRAMMING LANGUAGE)
A type declarative system for PROLOG
[ETN-94-95178] p 2449 N94-23155
A parallel PROLOG system for distributed memory multiprocessor
[ETN-94-95173] p 2465 N94-23167
Applications of the Aurora parallel PROLOG system to computational molecular biology
[DE93-041166] p 2420 N94-23468
Declarative Object Manipulation Environment (DOME): Alpha version
[AD-A273233] p 2460 N94-24935
PROP-FAN TECHNOLOGY
Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545
Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285
Dumbo heavy lifter aircraft
[NASA-CR-195500] p 2182 N94-24915
PROPAGATION VELOCITY
Normal zone propagation and thermal hydraulic quenchback in a cable-in-conduit superconductor
[DE94-002457] p 2271 N94-24568
Arbitrary-order numerical schemes for linear hyperbolic systems
[CRANFIELD-AERO-9211] p 2523 N94-25480
PROPELLANT COMBUSTION
A theoretical evaluation of aluminum gel propellant two-phase flow losses on vehicle performance
p 2210 N94-23031
Laser diagnostics for small rockets
p 2210 N94-23032
CFD analyses of combustor and nozzle flowfields
p 2210 N94-23033
LOX droplet vaporization in a supercritical forced convective environment p 2211 N94-23034
Development of a computational testbed for numerical simulation of combustion instability
p 2213 N94-23046
Numerical investigation of two- and three-dimensional heat transfer in expander cycle engines
p 2213 N94-23048
Two stage turbine for rockets p 2215 N94-23059
The Jet Propulsion Laboratory space exploration: Past, present and future p 2153 N94-24242
Burning rate of double-base propellant in the presence of plasma p 2155 N94-24252
Ignition and combustion characteristics of metallized propellants, phase 2
[NASA-CR-195107] p 2266 N94-24700
PROPELLANT GRAINS
Design considerations of hybrid rockets
p 2156 N94-24254
PROPELLANT STORAGE
New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane
[PB94-112786] p 2233 N94-23801
Design of a lunar propellant processing facility. NASA/USRA advanced program
[NASA-CR-195502] p 2266 N94-24618
PROPELLANTS
Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657
Numerical simulation of cylindrical, self-field MPD thrusters with multiple propellants
[NASA-CR-194458] p 2220 N94-24714
PROPELLER BLADES
Counterrotating aircraft propulsor blades
[CA-PATENT-1-319-357] p 2186 N94-23255
Wing mounted unducted fan engine
[CA-PATENT-1323353] p 2188 N94-24180
Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285
Aircraft accident report: In-flight loss of propeller blade and uncontrolled collision with terrain Mitsubishi MU-2B-60, N86SD, Zwingle, Iowa, 19 April 1993
[PB93-910409] p 2174 N94-25175
PROPELLER EFFICIENCY
Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285
PROPELLER FANS
Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545
PROPELLERS
Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285
Hydro-elastic analysis using a selection of commercial analysis programs
[PB94-118734] p 2376 N94-24478
PROPOSALS
Research interests and broad agency announcement 94-1 of the Air Force Office of Scientific Research
[AD-A273410] p 2632 N94-25075
PROPULSION
The 1993 NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-193862] p 2574 N94-24405
PROPULSION SYSTEM CONFIGURATIONS
Analysis and experiments of a whistler-wave plasma thruster
[DE94-001533] p 2209 N94-23012
Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055
Performance assessment of low pressure nuclear thermal propulsion p 2217 N94-23070
Lewis Research Center R and D Facilities
[NASA-TM-109400] p 2630 N94-23135
Assessment of an SP-100 bi-modal propulsion and power system
[DE94-000889] p 2218 N94-23433
Heat pipe cooled heat rejection subsystem modelling for nuclear electric propulsion
[NASA-CR-191132] p 2219 N94-24061
Probabilistic simulation of concurrent engineering of propulsion systems p 2177 N94-24317
Multi-disciplinary coupling for integrated design of propulsion systems p 2179 N94-24326
Center for modeling of turbulence and transition: Research briefs, 1993
[NASA-TM-106383] p 2333 N94-24336
VLCT-13: A commercial transport for the 21st Century
[NASA-CR-195492] p 2181 N94-24803
The Blue Emu
[NASA-CR-195535] p 2182 N94-24817
Extended duration lunar lander
[NASA-CR-195527] p 2206 N94-24916
Space transfer vehicle concepts and requirements. Volume 4: Summary of special studies
[NASA-CR-193918] p 2201 N94-24970
Effect of aeroelastic-propulsive interactions on flight dynamics of a hypersonic vehicle p 2164 N94-25113
Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study
[AD-A273824] p 2314 N94-25539
PROPULSION SYSTEM PERFORMANCE
Analysis and experiments of a whistler-wave plasma thruster
[DE94-001533] p 2209 N94-23012
Small rocket research and technology
p 2211 N94-23038
Performance assessment of low pressure nuclear thermal propulsion p 2217 N94-23070
Assessment of an SP-100 bi-modal propulsion and power system
[DE94-000889] p 2218 N94-23433
Performance evaluation of the Russian SPT-100 thruster at NASA LeRC
[NASA-TM-106401] p 2219 N94-23630
Center for modeling of turbulence and transition: Research briefs, 1993
[NASA-TM-106383] p 2333 N94-24336
A minimum cost tolerance allocation method for rocket engines and robust rocket engine design
p 2222 N94-24419
Space Shuttle Main Engine performance analysis
p 2222 N94-24444
Ignition and combustion characteristics of metallized propellants, phase 2
[NASA-CR-195107] p 2266 N94-24700
Performance of the NASA cm ion thruster
[NASA-TM-106426] p 2221 N94-24770
A conceptual design of an unmanned test vehicle using an airbreathing propulsion system
[NASA-CR-195550] p 2189 N94-25085
Effect of aeroelastic-propulsive interactions on flight dynamics of a hypersonic vehicle p 2164 N94-25113
Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study
[AD-A273824] p 2314 N94-25539
PROPYLENE
Morphology of highly textured polyethylene/polyethylene- propylene semicrystalline diblock copolymers
[AD-A273683] p 2263 N94-25413

PROSTHETIC DEVICES

Image remapping strategies applied as protheses for the visually impaired p 2444 N94-25363

PROTEASE

Evaluation of ovostatin and ovostatin assay p 2422 N94-24437

PROTECTION

Lightning studies using LDAR and LLP data p 2416 N94-23238

PROTECTIVE CLOTHING

Survival suit for submarine personnel: Summary of evaluation studies [PB93-204634] p 2430 N94-23743

Operation Friction: Development and introduction of personal cooling for CH124 Sea King aircrew [DCIEM-93-06] p 2433 N94-24119

PROTECTIVE COATINGS

Advanced research and technology development of MCFCs [DE94-001918] p 2389 N94-22723

Chromate-free talc chemical conversion coatings for aluminum alloys [DE94-001567] p 2238 N94-22932

Advanced materials for radiation-cooled rockets p 2214 N94-23052

Counterrotating aircraft propulsor blades [CA-PATENT-1-319-357] p 2186 N94-23255

Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor [DE94-000331] p 2543 N94-23461

Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 2: Effect of spray parameters on the performance of several hafnia-yttria and zirconia-yttria coatings [NASA-TP-3296] p 2242 N94-23467

Diffuse panel studies: Conclusions p 2384 N94-23606

New tribocoating combination for vacuum operation p 2355 N94-23990

Tribological characteristics of ball bearings lubricated with a sputtered molybdenum disulphide film in a vacuum under a high thrust load p 2355 N94-23992

In-vacuum performance of Fomblin Z25-lubricated, 52100 steel bearings with TiC-coated balls p 2358 N94-24011

Structural characterization and thermal cycling behaviour of EB-PVD thermal barrier coating systems [ISBN-0-315-83365-3] p 2257 N94-24468

Robotic weld overlay coatings for erosion control [DE94-002665] p 2258 N94-24749

The reaction mechanism of W-CVD in Si [ETN-94-95329] p 2261 N94-25084

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 4: Oil/Gas Pipeline [AD-A273665] p 2250 N94-25405

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5A: Corrosion: General issues [AD-A273666] p 2250 N94-25406

A preliminary evaluation of the phosphazene resin PPZ [AD-A273674] p 2263 N94-25410

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings [AD-A273661] p 2251 N94-25448

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations [AD-A273662] p 2251 N94-25449

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues [AD-A273664] p 2251 N94-25451

PROTEIN CRYSTAL GROWTH

Microgravity sciences application visiting scientist program [NASA-CR-194804] p 2267 N94-23287

Modeling of PCG fluid dynamics: Salient results p 2224 N94-24345

Stiffening of deployable space booms: Automated Protein Crystal Growth Facility [NASA-CR-195547] p 2196 N94-24820

PROTEIN METABOLISM

Skeletal muscle metabolism in hypokinetic rats [NASA-CR-195082] p 2420 N94-24124

PROTEINS

Microgravity sciences application visiting scientist program [NASA-CR-194804] p 2267 N94-23287

Microinjection of the Yersinia YopE cytotoxin in mammalian cells induces actin microfilament disruption [FOA-B-40418-4.4] p 2421 N94-24290

Evaluation of ovostatin and ovostatin assay p 2422 N94-24437

In vitro system for studying metabolism of environmental chemicals in human cells [AD-A273427] p 2421 N94-24688

PROTOCOL (COMPUTERS)

Land mobile satellite propagation measurements in Japan using ETS-V satellite p 2282 N94-22790

A protocol for satellite access via use of spot-beams p 2286 N94-22811

System services and architecture of the TMI satellite mobile data system p 2286 N94-22817

Representation and specification of architectures for heterogeneous internetworking: Using a knowledge based approach [LAAS-93088] p 2445 N94-22903

Generation of modules for control communication circuits: A design study used in the framework of the safe vehicle PROMETHEUS [ETN-94-95171] p 2308 N94-23165

PROGRIL: A language for the definition of protocol grammars [EUT-93-E-270] p 2449 N94-23172

Code generation for the attribute evaluator of the protocol engine grammar processor unit [EUT-93-E-271] p 2450 N94-23173

MITS architecture V1.0 [PB93-201762] p 2452 N94-23451

Command/telemetry bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems [NASA-TM-109407] p 2208 N94-23479

Low rate data bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems [NASA-TM-109408] p 2208 N94-23480

High-rate data link general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT satellite systems [NASA-TM-109384] p 2208 N94-23481

Source spacing in B-ISDN [PB93-201747] p 2293 N94-23508

Radar stimulator interface protocol, preliminary interface design and Doppler Beam Sharpening implementation [DE94-002567] p 2453 N94-23701

Design and implementation issues of end-to-end protocols in high-speed networks [PB94-110905] p 2467 N94-23752

A reference model for space data system interconnection services p 2305 N94-23847

Reliable transfer of data from ground to space p 2305 N94-23908

The EURECA telecommanding chain: Experience with packet telecommand and telemetry systems p 2305 N94-23909

Verification of technical elements of the advanced spacecraft based upon the CCSDS recommendation p 2207 N94-23910

Real-time process logic [PB94-101441] p 2446 N94-24540

Optimizing parallelization [AD-A273565] p 2467 N94-24692

Validation activities for LOTOS based on static data flow analysis [PB94-110863] p 2459 N94-24758

HORACE: Presentation-level protocol standard for digital transmission of monochrome television images [AD-A273395] p 2197 N94-25064

Models of trace theory systems [ETN-94-95361] p 2468 N94-25226

Failure detection and recovery in the assembly/contingency subsystem p 2306 N94-25360

PROTON IRRADIATION

On the origin of 1/f noise in epitaxial GaAs [ISBN-9-09-006067-7] p 2566 N94-25297

PROTONS

A novel method for determination of transport parameters of H2 and O2 in PEMFCs [DE94-001492] p 2389 N94-22962

Low p(sub T) photon production in proton-nucleus collisions at 18 GeV/c [DE94-001380] p 2532 N94-23007

Primary and secondary electrical space power based on advanced PEM systems p 2392 N94-23357

PEM regenerative fuel cells p 2392 N94-23358

High power density proton exchange membrane fuel cells p 2393 N94-23359

A high performance H2-Cl2 fuel cell for space power applications p 2394 N94-23366

Investigation of evolution-related aspects of bacterial rhodopsins [NASA-CR-194826] p 2420 N94-23501

Low mass muon pair production in 450 GeV p-Be collisions [PB94-110699] p 2533 N94-23746

Momentum loss in proton-nucleus and nucleus-nucleus collisions [NASA-TP-3405] p 2540 N94-24305

Polarized structure functions of the nucleon in the resonance region [CEBAF-PR-94-001] p 2540 N94-24663

Activities of Academia Sinica [DE93-614529] p 2541 N94-25335

Proton spin: The role of quark-gluon and hadron degrees of freedom [DE93-616867] p 2538 N94-25341

PROTOPLANETS

Protoplanetary disks: Theory and observation by millimeter and sub-millimeter arrays [REPT-331] p 2603 N94-24983

The Nobeyama millimeter array survey for protoplanetary disks around protostar candidates and T Tauri stars in Taurus [REPT-336] p 2604 N94-24987

Observational studies of the clearing phase in proto-planetary disk systems [NASA-CR-195182] p 2604 N94-25265

PROTOTYPES

Direct broadcast satellite-radio, receiver development p 2273 N94-22739

The Automated Instrumentation and Monitoring System (AIMS) reference manual [NASA-TM-108795] p 2452 N94-23510

Harmonisation of man-machine interface experiments in the context of the development of PHARE advanced tools [PB93-204725] p 2430 N94-23744

Making tomorrow's mistakes today: Evolutionary prototyping for risk reduction and shorter development time p 2197 N94-23902

Performing speech recognition research with hypercard p 2306 N94-24194

Characteristics of products generated by selective sintering and stereolithography rapid prototyping processes p 2264 N94-24412

Integration and evaluation of a simulator designed to be used within a dynamic prototyping environment p 2198 N94-24436

A prototype to automate the video subsystem routing for the video distribution subsystem of Space Station Freedom p 2306 N94-25353

PROVING

Validating identified nonlinear models with chaotic dynamics [RR-469] p 2523 N94-25314

PSYCHOACOUSTICS

On the auditory discrimination of spectral shape [ETN-94-95306] p 2530 N94-25289

PSYCHOLOGICAL EFFECTS

Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt? [NASA-CR-188256] p 2427 N94-24227

PSYCHOMETRICS

EEG and chaos: Description of underlying dynamics and its relation to dissociative states [NASA-CR-195171] p 2428 N94-24799

PSYCHOPHYSICS

Physical aspects of the visual stimulus p 2431 N94-23978

Luminance-brightness mapping: The missing decades [ETN-94-95351] p 2428 N94-25298

Extracting heading and temporal range from optic flow: Human performance issues p 2442 N94-25510

PSYCHOPHYSIOLOGY

EEG and chaos: Description of underlying dynamics and its relation to dissociative states [NASA-CR-195171] p 2428 N94-24799

PUBLIC RELATIONS

Space technology: A study of the significance of recognition for innovators of spinoff technologies. 1993 activities/1994, 1995 plans [NASA-CR-194836] p 2596 N94-23526

PULSE COMMUNICATION

Worldwide survey of direct-to-listener digital audio delivery systems development since WARC-1992 p 2273 N94-22736

Direct broadcast satellite-radio, receiver development p 2273 N94-22739

Utilizing a TDRS satellite for direct broadcast satellite-radio propagation experiments and demonstrations p 2274 N94-22740

Adaptive digital beamforming for a CDMA mobile communications payload p 2274 N94-22743

Transparent data service with multiple wireless access p 2276 N94-22754

APLAC: An object-oriented analog circuit simulator and design tool. 6.1 system simulations manual [PB93-224871] p 2450 N94-23226

Source spacing in B-ISDN [PB93-201747] p 2293 N94-23508

PULSE COMPRESSION
Microwave excitation of pulsed high pressure gas discharge lasers
[DLR-FB-93-12] p 2351 N94-25304
PULSE GENERATORS
Safety guidelines for the operation of the DREO 10 m EMP simulator DREMPS
[DREO-TN-93-5] p 2193 N94-24117
TEM cell safety report
[DREO-TN-93-9] p 2193 N94-24123
Computer modeling of plasma flow switches-high current switching on Procyon
[DE93-040189] p 2311 N94-24500
Study of a system for producing a pulsed magnetic field (B 2T) with a frequency of 50 Hz
[ISL-N-601/92] p 2314 N94-25460
PULSE HEATING
Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124
PULSE POSITION MODULATION
Integration and test of high-speed transmitter electronics for free-space laser communications
[NASA-TM-106295] p 2295 N94-24101
PULSED LASER DEPOSITION
Laser-deposited biocompatible films and methods and apparatuses for producing same
[AD-D016017] p 2350 N94-24952
Soft x ray optics by pulsed laser deposition
[NASA-CR-195139] p 2546 N94-24967
Laser ablation and deposition of metals
[ETN-94-95311] p 2351 N94-25294
PULSED LASERS
Micro pulse laser radar
[NASA-CASE-GSC-13493-1] p 2294 N94-23827
Exciplex laser study: Discharge and magnetic switching systems
[PB93-199768] p 2349 N94-24629
Laser-deposited biocompatible films and methods and apparatuses for producing same
[AD-D016017] p 2350 N94-24952
Microwave excitation of pulsed high pressure gas discharge lasers
[DLR-FB-93-12] p 2351 N94-25304
PULSES
Flue gas cleaning by pulse corona streamer
[EUT-93-E-272] p 2268 N94-23174
PULTRUSION
Composites and textile reinforcement
[VTT-TIED-1424] p 2231 N94-25420
PUMP IMPELLERS
Computational Fluid Dynamics (CFD) applications in rocket propulsion analysis and design
p 2214 N94-23054
A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 1: Model development and applications
[NASA-CR-193916] p 2366 N94-24998
A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 2: User's guide
[NASA-CR-193917] p 2366 N94-24999
PUMPS
Sensorless, brushless motor to drive a sealed freon-ammonia pump p 2315 N94-24036
PURIFICATION
Physics with chemically and isotopically pure semiconductors
[DE93-040120] p 2557 N94-22926
New method for increasing machine service-life, phase 2
[PB93-200707] p 2354 N94-23533
PYLONS
Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993
[PB93-410407] p 2173 N94-24062
PYROELECTRICITY
Pyroelectric sensors in copolymer integrated on silicon
[LAAS-93044] p 2342 N94-22902
PYROLYSIS
Atomic probes of surface structure and dynamics
[DE94-001651] p 2530 N94-22720
Ceramic silicon-boron-carbon fibers from organic silicon-boron-polymers
[NASA-CASE-ARC-11956-1-SB] p 2253 N94-23311
CMC design consequences p 2256 N94-24238
Investigating pyrolysis/incineration as a method of resource recovery from solid waste
p 2444 N94-25375
PYROLYTIC GRAPHITE
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090

Q

QUADRATURE AMPLITUDE MODULATION
Bounds and simulation results of 32-ary and 64-ary quadrature amplitude modulation for broadband-ISDN via satellite
[NASA-TM-106484] p 2202 N94-25095
QUADRATURE PHASE SHIFT KEYING
A comparison between coherent and noncoherent mobile systems in large Doppler shift, delay spread, and C/I environment p 2287 N94-22818
Detection and analysis of unbalanced QPSK in Gaussian noise, version 1.0
[DREO-12-020.1] p 2296 N94-24131
QUADRATURES
Generalized Gaussian quadrature rules for systems of arbitrary functions
[AD-A273610] p 2491 N94-24947
Correlation function estimator performance in non-Gaussian spherically invariant random processes
[AD-A273498] p 2496 N94-24951
QUALITY CONTROL
Quality data validation: Comprehensive approach to environmental data validation
[DE94-000925] p 2589 N94-22944
Sensors for process control Focus Team report
[DE93-040897] p 2560 N94-23204
The use of design automation software by government-contracted architect/engineer firms: A status report
[AD-A273181] p 2459 N94-24812
Demonstration of polyscann ultrasonic butt-fusion inspection system for polyethylene pipes
[AD-A273279] p 2373 N94-24814
New Ways Of Doing Business (NWODB) cost quantification analysis
[NASA-CR-195186] p 2586 N94-25197
Software engineering methodologies and tools
p 2465 N94-25382
QUANTITATIVE ANALYSIS
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200
FTIR quantification of industrial hydraulic fluids in perchloroethylene p 2264 N94-23243
Interpretation of discrepancies in mass spectroscopy data obtained from different experimental configurations
p 2237 N94-23245
Quantitative analysis in the Al-Mg-Si system with small amounts of Mg and Si
[PB93-201499] p 2241 N94-23446
Real-time holographic endoscopy
[ISL-CO-203/92] p 2343 N94-24054
QUANTUM CHROMODYNAMICS
The status of glueballs
[DE93-040040] p 2531 N94-22923
Momentum and coordinate space three-nucleon potentials
[DE93-040868] p 2531 N94-22951
Strong interactions studies with medium energy probes
[DE94-001446] p 2540 N94-23791
Photon-photon collisions at the next linear collider: Theory
[DE93-041025] p 2534 N94-23803
Electro-weak, QCD and top physics at the Tevatron
[DE94-002304] p 2535 N94-24611
New evaluation of hadronic contributions to the anomalous magnetic moment of charged leptons
[DE93-634394] p 2536 N94-24844
Relativistic hadrons in an external field
[ETN-94-95387] p 2538 N94-25259
A quark structure of hadrons and nuclei
[DE93-616872] p 2539 N94-25474
On the transverse size of a fast moving nucleon
[DE93-616891] p 2539 N94-25481
QUANTUM ELECTRONICS
Quantum tunneling transport of electrons in double-barrier heterostructures: Theory and modeling
[ETN-94-95332] p 2565 N94-25059
QUANTUM MECHANICS
Quantum mechanics, locality and realism
[MEMO-1117] p 2568 N94-22709
Limits on high-order harmonic generation from single-atom calculations
[DE93-019950] p 2531 N94-22869
The torsion space nucleic acids molecular mechanics program DUPLEX: Surveying conformation space by potential energy minimization
[DE94-002441] p 2563 N94-24567
An attempt at a macrorealistic quantum worldview
[DE93-616821] p 2570 N94-25206
Intramultiplet mixing for Ne(**)(3p)+He at superthermal energies
[ETN-94-95327] p 2538 N94-25240
Applications of supersymmetric quantum mechanics
[ETN-94-95385] p 2570 N94-25257
Correlations in the actions of periodic orbits derived from quantum chaos
[DE93-616866] p 2571 N94-25340
QUANTUM NUMBERS
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064)
[DE94-002000] p 2347 N94-22974
QUANTUM OPTICS
Quantum optical aspects of topological phases, such as Berry's phase
[AD-A273632] p 2570 N94-25028
QUANTUM STATISTICS
Calculations of Bose-Einstein correlations from Relativistic Quantum Molecular Dynamics
[DE94-000794] p 2569 N94-23453
Ultracold atoms in traps and fountains
[ETN-94-95325] p 2537 N94-25239
QUANTUM THEORY
Quantum mechanics, locality and realism
[MEMO-1117] p 2568 N94-22709
On spontaneous symmetry breaking mechanism in light-front quantized field theory
[DE93-633211] p 2568 N94-22968
Flavor changing strings and domain walls
[DE93-633217] p 2532 N94-22970
Coadjoint orbits and conformal field theory
[DE94-002285] p 2523 N94-24658
Quantum optical aspects of topological phases, such as Berry's phase
[AD-A273632] p 2570 N94-25028
On the connection of classical mechanics, physical kinetics and quantum theory
[DE93-616823] p 2570 N94-25207
Applications of supersymmetric quantum mechanics
[ETN-94-95385] p 2570 N94-25257
QUANTUM WELLS
Manufacturing and characterization of GaAs/AlGaAs multiple quantumwell ridge waveguide lasers
[EUT-92-E-265] p 2348 N94-23168
QUARK MODELS
Gauge invariance and the electromagnetic current of composite pions
[DE93-040869] p 2532 N94-22952
A measurement of the forward-backward asymmetry and sin(sup 2)(theta)(sub W) from the process Z(sup 0) (yields) (mu)(sup +)(mu)(sup (minus)) at (radical)s = 1.8 TeV
[DE94-001908] p 2532 N94-23018
A quark structure of hadrons and nuclei
[DE93-616872] p 2539 N94-25474
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476
QUARKS
The status of glueballs
[DE93-040040] p 2531 N94-22923
Towards a theory of quark and lepton masses
[DE94-001726] p 2533 N94-23218
Progress report for the UCSD experimental HEP group
[DE94-001357] p 2533 N94-23699
Strong interactions studies with medium energy probes
[DE94-001446] p 2540 N94-23791
B-quark production at hadron colliders
[DE94-001459] p 2534 N94-23806
Search for the top quark and other new particles at D0
[DE94-001220] p 2535 N94-24515
Stitching the Yukawa quilt
[PB93-204477] p 2569 N94-24532
Electro-weak, QCD and top physics at the Tevatron
[DE94-002304] p 2535 N94-24611
The determination of the branching ratios of the Z(zero) boson into heavy quarks using neural networks
[ETN-94-95381] p 2538 N94-25246
Bottom quark production at the Z resonance
[ISBN-9-09-006217-3] p 2538 N94-25255
A scalar-vector model of quark-antiquark interaction under linear confinement
[DE93-616871] p 2538 N94-25317
The Casimir energy of the rigid string with massive ends
[DE93-616851] p 2492 N94-25338
Proton spin: The role of quark-gluon and hadron degrees of freedom
[DE93-616867] p 2538 N94-25341
Heavy flavour physics at LEP
[NIKHEF-H/92-19] p 2539 N94-25465
A quark structure of hadrons and nuclei
[DE93-616872] p 2539 N94-25474
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476

QUARTZ
A dynamic melting model for the origin of Apollo 15 olivine-normative and quartz-normative mare basalts
p 2615 N94-24371

QUASARS
100 GHz map of 3C 446
[PB94-104882] p 2599 N94-23705

QUENCHING (COOLING)
Stretch-induced quenching in flame-vortex interactions
p 2237 N94-24156

QUERY LANGUAGES
Multi-set extended relational algebra: A formal approach to a practical issue
[PB94-110830] p 2486 N94-23725
The ESIS query environment pilot project
p 2518 N94-23952
Correct and efficient interface for logical query languages with complex objects
[PB93-211175] p 2593 N94-24743
A comparison of Boolean-based retrieval to the WAIS system for retrieval of aeronautical information
[NASA-CR-4569] p 2594 N94-25487

QUEUEING THEORY
Loss probabilities in batch-arrival bulk-service queues with finite capacity
[MEMO-1106] p 2493 N94-22724
Uniform limit theorems for marked point processes
[PB94-118726] p 2488 N94-24526
Fast simulation of packet loss rates in a shared buffer communications switch
[NASA-CR-191556] p 2457 N94-24638
Data structures and amortized complexity in a functional setting
[ETN-94-95307] p 2476 N94-25290
Product forms as a solution base for queueing systems
[MEMO-COSOR-92-37] p 2477 N94-25526

R

RACKS (GEARS)
Metal band drives in spacecraft mechanisms
p 2355 N94-23987

RADAR
Image processing for flight crew enhanced situation awareness p 2442 N94-25508

RADAR ANTENNAS
Calibration block for digital beam forming antenna
[PB93-204550] p 2294 N94-23773
The down, release, and deployment of the RADARSAT SAR antenna p 2305 N94-23986
Calibration network intended for phase-array antennas at 3 GHz
[PB93-204352] p 2297 N94-24530

RADAR BEAMS
Method and apparatus of generating sum or difference signals corresponding to an apparent beam in a monopulse radar system
[AD-D015998] p 2302 N94-25056

RADAR CORNER REFLECTORS
High-frequency techniques for RCS prediction of plate geometries and a physical optics/equivalent currents model for the RCS of trihedral corner reflectors, parts 1 and 2
[NASA-CR-195140] p 2298 N94-24616

RADAR CROSS SECTIONS
High-frequency techniques for RCS prediction of plate geometries and a physical optics/equivalent currents model for the RCS of trihedral corner reflectors, parts 1 and 2
[NASA-CR-195140] p 2298 N94-24616

RADAR DATA
Further studies to extend and test the area-time-integral technique applied to satellite data
[NASA-CR-195132] p 2415 N94-24705

RADAR DETECTION
Mars subsurface sounding with a ground penetrating radar p 2608 N94-23393
ASR-9 microburst detection algorithm
[AD-A273591] p 2415 N94-24850
Radar E-O image fusion p 2306 N94-25503

RADAR ECHOES
On the analysis of clear air radar echoes severely contaminated by clutter p 2306 N94-24423

RADAR IMAGERY
Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software
p 2305 N94-23842
Free-surface/vorticity interaction
[AD-A273263] p 2335 N94-24686
Use of microwave polarimetry to enhance SAR images of the ocean surface
[AD-A273568] p 2419 N94-24944
Edge detection using a complex wavelet
[AD-A273699] p 2493 N94-25452
Synthetic vision system flight test results and lessons learned p 2429 N94-25492
The Radar Image Generation (RIG) model
p 2306 N94-25497
Radar E-O image fusion p 2306 N94-25503

RADAR MEASUREMENT
Mars subsurface sounding with a ground penetrating radar p 2608 N94-23393
HERACLITUS, phase 1. Harbour Entrance of Rotterdam Radar based Current Related Information for Traffic Guidance of Ships: Feasibility of deriving current profile data from sea surface observations in the Rotterdam (Netherlands) port entrance
[BCRS-93-04] p 2417 N94-24107
Mesospheric and lower thermospheric winds, temperatures densities, and volume emission rates
[NASA-CR-195147] p 2403 N94-24486

RADAR REFLECTORS
On the estimation of the correlation dimension and its application to radar reflector discrimination
[NASA-CR-4564] p 2309 N94-23304

RADAR SIGNATURES
Radar signature related radome techniques for flush-mounted HF-, VHF- and, UHF communication antennas
[PB93-204618] p 2294 N94-23742
High latitude cusp signature observations for southward IMF B sub Z
[AD-A273801] p 2406 N94-25536

RADAR TARGETS
Radar target discrimination by spectrum analysis
[AD-D015982] p 2301 N94-25040
Radar target discrimination systems using artificial neural network topology
[AD-D015984] p 2301 N94-25041

RADAR TRACKING
An improved gravity model for Mars: Goddard Mars Model-1 (GMM-1)
[NASA-TM-104584] p 2401 N94-23282
Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors
[AD-D016005] p 2302 N94-25058
IRIG radar calibration catalog. Version 2: The IRIG error model reference for radar calibrations
[AD-A273344] p 2303 N94-25155

RADARSAT
The down, release, and deployment of the RADARSAT SAR antenna p 2305 N94-23986

RADIAL FLOW
Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades
[PB93-226223] p 2317 N94-23114

RADIANCE
Algorithm-development activities
[NASA-CR-193225] p 2420 N94-23538
VNIR and SWIR transfer radiometers developed at NRLM for preflight laboratory cross-calibration
p 2365 N94-23610
Modelling TOVS radiances of synoptic systems
[NASA-CR-194847] p 2408 N94-23620
Evaluation of visual acuity with Gen 3 night vision goggles
[NASA-TM-108792] p 2431 N94-23974
The IRGen infrared data base modeler
p 2440 N94-25496

RADIANT FLUX DENSITY
Physical aspects of the visual stimulus
p 2431 N94-23978
An extended laser flash technique for thermal diffusivity measurement of high-temperature materials
p 2238 N94-25132

RADIANT HEATING
Strain gage measurement errors in the transient heating of structural components
[NASA-TM-104274] p 2376 N94-23487

RADIATION BELTS
Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments
[AD-A273639] p 2628 N94-25031
The CRRES time history data base: All sensors
[AD-A273737] p 2207 N94-25542

RADIATION COUNTERS
A measurement of the forward-backward asymmetry and sin(sup 2)(theta)(sub W) from the process Z(sup 0) (yields) (mu)(sup +)(mu)(sup (minus)) at (radical)s = 1.8 TeV
[DE94-001908] p 2532 N94-23018
Examination of the response capacity of a silicon pixel detector for ions and molecules in the energy area 100 to 300 keV
[MPE-241] p 2346 N94-25415

RADIATION DAMAGE
Irradiation damage behavior of low alloy steel wrought and weld materials
[DE94-000519] p 2239 N94-22999

RADIATION DETECTORS
Electro-weak, QCD and top physics at the Tevatron
[DE94-002304] p 2535 N94-24611
To perform a proof-of-concept study on the use of superheated drop detectors for the measurement of LET spectra in space environments
[BTI-92/3-31] p 2629 N94-24695
High energy gamma astronomy above 200 GeV
[MPI-PHE/93-04] p 2600 N94-25458

RADIATION EFFECTS
Report of the Joint Seminar on Solid State Physics, Atomic and Molecular Physics, and Materials Science in the Energy Region of Tandem Accelerators
[DE93-508268] p 2548 N94-22924
Low temperature diffusion of hydrogenic species in oxide crystals: Radiation induced diffusion
[DE94-000374] p 2558 N94-22957
A new automatic design method to develop multilayer thin film devices for high power laser applications
[DE93-632490] p 2347 N94-22967
Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009
Advanced materials for radiation-cooled rockets
p 2214 N94-23052
Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184
Generalized melting criterion for beam-induced amorphization
[DE94-001333] p 2560 N94-23189
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel
[DE94-000466] p 2242 N94-23457
Surface modification of sapphire for enhanced infrared window performance
[DE94-000333] p 2543 N94-23458
Research for electric energy systems
[DE94-001839] p 2293 N94-23719
Effect of irradiation on the stress corrosion cracking behavior of Alloy X-750 and Alloy 625
[DE94-001759] p 2244 N94-23792
The role of radiation in mesoscale flows: Physics, parameterizations, codes p 2413 N94-24389
Effects of ionizing radiation on modern ion exchange materials
[DE94-001569] p 2535 N94-24505
Highly-reliable fly-by-light/power-by-wire technology
p 2162 N94-25099
The CRRES time history data base: All sensors
[AD-A273737] p 2207 N94-25542

RADIATION HARDENING
A qualified radiation hardened nonvolatile memory for space and tactical weapons applications
[DE94-001211] p 2559 N94-23186

RADIATION MEASUREMENT
Atmospheric Radiation Measurement (ARM)/CART site p 2411 N94-24379

RADIATION PRESSURE
Contribution to the study of HF converters radiated disturbances
[ECL-92-34] p 2313 N94-25421

RADIATION PROTECTION
Towards a new radiation protection organization
[FOA-C-40304-4.3] p 2437 N94-24292

RADIATION SHIELDING
GOLF mechanisms p 2357 N94-24003
Magnetic shielding of interplanetary spacecraft against solar flare radiation
[NASA-CR-195539] p 2204 N94-24334

RADIATION TOLERANCE
Effects of ionizing radiation on modern ion exchange materials
[DE94-001569] p 2535 N94-24505

RADIATION TRANSPORT
Computational model of surface ablation from tokamak disruptions
[DE94-002204] p 2550 N94-23474
Improved gas core propulsion model
[DE94-000929] p 2220 N94-24511

RADIATIVE HEAT TRANSFER
Flames in dusty mixtures: Their structure and stability
[NASA-CR-191567] p 2317 N94-23089
Fully coupled nonlinear thermomechanical analysis including general contact in PALM2D
[DE94-001661] p 2568 N94-23216
Accuracy control in Monte Carlo radiative calculations
p 2321 N94-23639
Ignition and combustion characteristics of metallized propellants, phase 2
[NASA-CR-195107] p 2266 N94-24700

RADIATIVE TRANSFER
Modelling TOVS radiances of synoptic systems
[NASA-CR-194847] p 2408 N94-23620

Development of an analytical-numerical model to predict radiant emission or absorption
[NASA-CR-194860] p 2453 N94-23624
Thermal analysis of combinatorial solid geometry models using SINDA p 2323 N94-23650
Radiative forcing calculations for SF6 and CH4 using a correlated k-distribution transmission model
[DE94-001855] p 2397 N94-23700
Participation in TOMS missions
[NASA-CR-195110] p 2398 N94-24078
Atmospheric Radiation Measurement (ARM)/CART site p 2411 N94-24379
Session on modeling of radiative transfer processes
p 2414 N94-24397
LRAT: Lightning Radiative Transfer
p 2416 N94-24443
The annual pressure cycle on Mars: Results from the LMD Martian atmospheric general circulation model
p 2619 N94-24884
Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887

RADICALS
Potent solvents for C60 and their utility for the rapid acquisition of 13CNMR data for fullerenes
[AD-A273349] p 2235 N94-24925
Dispersion of Rh/Cu in a sol-gel matrix. Highly chemo- and stereoselective catalyst for the reduction of alkynes to Z-alkenes
[AD-A273306] p 2262 N94-25145

RADIO ALTIMETERS
Synthesis of passive microwave and radar altimeter data for estimating accumulation rates of polar snow
[NASA-CR-194864] p 2382 N94-23573

RADIO ANTENNAS
The MSAT spacecraft of Telesat Mobile Inc.
p 2207 N94-22742
Very low frequency and low frequency transmitting antenna parameter monitoring system
[AD-D015989] p 2302 N94-25049

RADIO ASTRONOMY
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
Voyager planetary radio astronomy studies
[NASA-CR-194776] p 2614 N94-24328
Infrared and SiO maser observations of OH/IR stars
[PB94-104890] p 2599 N94-24780
Investigation relative to the Roentgen Satellite (ROSAT)
[NASA-CR-195192] p 2600 N94-25269

RADIO ATTENUATION
Power attenuation characteristics as switch-over criterion in personal satellite mobile communications
p 2277 N94-22756

RADIO COMMUNICATION
The MSAT spacecraft of Telesat Mobile Inc.
p 2207 N94-22742
Power attenuation characteristics as switch-over criterion in personal satellite mobile communications
p 2277 N94-22756
Evolution of INMARSAT systems and applications: The land mobile experience p 2280 N94-22779
EUTELTRACS: The European experience on mobile satellite services p 2281 N94-22781
System services and architecture of the TMI satellite mobile data system p 2286 N94-22817
Pseudo-coherent demodulation for mobile satellite systems p 2287 N94-22819
Handover aspects for a Low Earth Orbit (LEO) CDMA Land Mobile Satellite (LMS) system
p 2288 N94-22824
Radio communication and wave propagation. A visit to the Netherlands in December 1992
[PB93-204360] p 2297 N94-24531
Conceptual communications system design in the 25.25-27.5 and 37.0-40.5 GHz frequency bands
p 2306 N94-25379

RADIO CONTROL
NASA advanced design program. Design and analysis of a radio-controlled flying wing aircraft
[NASA-CR-195515] p 2180 N94-24589

RADIO EMISSION
Voyager planetary radio astronomy studies
[NASA-CR-194776] p 2614 N94-24328

RADIO EQUIPMENT
Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply
[AD-A273149] p 2299 N94-24670
ELF communications system ecological monitoring program
[AD-A273456] p 2299 N94-24676

RADIO FREQUENCIES
Aeronautical audio broadcasting via satellite
p 2274 N94-22741
The MSAT spacecraft of Telesat Mobile Inc.
p 2207 N94-22742
Direct digital RF synthesis and modulation for MSAT mobile applications p 2285 N94-22804
Separable concatenated codes with iterative map decoding for Rician fading channels
p 2286 N94-22815
1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192

RADIO FREQUENCY INTERFERENCE
Diversity reception for advanced multi-satellite networks: A CDMA approach p 2286 N94-22816
Development of a multilayer interference simulation program for MSS systems p 2287 N94-22823
A method for interference mitigation in space communications scheduling p 2305 N94-23918
Analysis and surveillance performance at Chicago O'Hare Airport
[DOT/FAA/RD-92/29] p 2175 N94-24127
Error coding simulations p 2306 N94-24439
Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669

RADIO JETS (ASTRONOMY)
The 1404+286: A non-ideal calibrator for VLBI observations
[PB94-104908] p 2599 N94-24521

RADIO OBSERVATION
CO-to-H2 conversion factor in dwarf irregular galaxies
[REPT-333] p 2603 N94-24985
High spatial resolution observations of CO in CRL 618
[REPT-334] p 2604 N94-24986
The Nobeyama millimeter array survey for protoplanetary disks around protostar candidates and T Tauri stars in Taurus
[REPT-336] p 2604 N94-24987

RADIO RECEIVERS
Direct broadcast satellite-radio, space-segment/receiver tradeoffs p 2273 N94-22738
Direct broadcast satellite-radio, receiver development
p 2273 N94-22739
Measurements on the satellite-mobile channel at L and S bands p 2282 N94-22791
A study of satellite motion-induced multipath phenomena p 2283 N94-22794
A comparison between coherent and noncoherent mobile systems in large Doppler shift, delay spread, and C/I environment p 2287 N94-22818
A low noise 665 GHz SIS quasi-particle waveguide receiver
[NASA-CR-194735] p 2296 N94-24105
Northern Exposure 1992: An investigation of transauroral HF radio skywave propagation
[AD-A273363] p 2303 N94-25089

RADIO RELAY SYSTEMS
Satellite communications system
[CA-PATENT-APPL-SN-2053597] p 2297 N94-24183

RADIO SIGNALS
Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply
[AD-A273149] p 2299 N94-24670

RADIO SOURCES (ASTRONOMY)
100 GHz map of 3C 446
[PB94-104882] p 2599 N94-23705
The 1404+286: A non-ideal calibrator for VLBI observations
[PB94-104908] p 2599 N94-24521

RADIO TELEMETRY
The advanced orbiting systems testbed program: Results to date p 2197 N94-23907
Experimental verification of an acoustic telemetry link between an Aurora and CFAV quest
[DREA-TC-93-304] p 2202 N94-24121

RADIO TELESCOPES
Radioastron flight operations p 2502 N94-23861

RADIO TRANSMISSION
An introduction to digital modulation and OFDM techniques
[BBC-RD-1993/10] p 2295 N94-24086
Radio communication and wave propagation. A visit to the Netherlands in December 1992
[PB93-204360] p 2297 N94-24531
Comparison of HF groundwave propagation models
[AD-A273146] p 2299 N94-24668
Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply
[AD-A273149] p 2299 N94-24670
Northern Exposure 1992: An investigation of transauroral HF radio skywave propagation
[AD-A273363] p 2303 N94-25089
Conceptual communications system design in the 25.25-27.5 and 37.0-40.5 GHz frequency bands
p 2306 N94-25379

RADIO TRANSMITTERS
ELF communications system ecological monitoring program
[AD-A273456] p 2299 N94-24676

RADIO WAVES
Comparison of HF groundwave propagation models
[AD-A273146] p 2299 N94-24668

RADIOACTIVE DECAY
Low p(sub T) photon production in proton-nucleus collisions at 18 GeV/c
[DE94-001380] p 2532 N94-23007
Heavy flavour physics at LEP
[NIKHEF-H/92-19] p 2539 N94-25465
Weak interactions in a bilocal chiral theory
[DE93-616887] p 2539 N94-25477

RADIOCHEMISTRY
Fifty years of continuous improvement: What has DOE done for analytical chemistry?
[DE94-002539] p 2234 N94-24548

RADIOGRAPHY
Measurement of intact-core length of atomizing liquid jets by image deconvolution p 2210 N94-23029
An evaluation of Compton scatter imaging using COMSCAN
[DREP-TM-93-38] p 2372 N94-24136

RADIOISOTOPE BATTERIES
Development testing of the two-watt RTG heat source and Hastelloy-S/T-111 alloy compatibility studies
[DE94-002875] p 2243 N94-23784

RADIOMETERS
Eos cross-calibration radiometers
p 2383 N94-23601
Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror
p 2384 N94-23602
Infrared calibration p 2384 N94-23608
VNIR and SWIR transfer radiometers developed at NRLM for preflight laboratory cross-calibration
p 2385 N94-23610
In-flight cross-calibration of ASTER/TIR and MODIS-N
p 2385 N94-23611
ASTER, a multinational Earth observing concept
p 2389 N94-23840
High resolution encoder-motor used in the orbital spin scan radiometer, GOES VAS satellites
p 2209 N94-24038
Evidence for dust transport in Viking IR thermal mapper opacity data p 2620 N94-24892
An AVHRR cloud classification database typed by experts
[AD-A273560] p 2416 N94-25162
Advanced radiometric and interferometric milimeter-wave scene simulations p 2306 N94-25498

RADIOSONDES
Intercomparison of remote and balloon-borne sensors operated at JAPE-91 p 2527 N94-24210
Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992
[AD-A273400] p 2416 N94-25071
A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements
[AD-A273803] p 2406 N94-25537

RADOME MATERIALS
Radar signature related radome techniques for flush-mounted HF-, VHF- and, UHF communication antennas
[PB93-204618] p 2294 N94-23742

RADOMES
Radar signature related radome techniques for flush-mounted HF-, VHF- and, UHF communication antennas
[PB93-204618] p 2294 N94-23742

RAIL TRANSPORTATION
Vehicle/guideway interaction and ride comfort in maglev systems
[DE94-001319] p 2352 N94-22991
Performance analysis of the combined EDS maglev propulsion, levitation, and guidance system
[DE94-001346] p 2352 N94-22996
Rail Corrugations
[ILR-BER-59] p 2269 N94-23581
A rail corrugation theory which allows for contact patch size p 2269 N94-23582
A rail joint: The possible initiator of corrugation?
p 2269 N94-23583
A linear model for corrugation and its limit of validity
p 2269 N94-23584
Lateral high frequency oscillations and stability of a wheel rolling on a flexible track p 2269 N94-23585
Wear characteristics of technical dry rolling/sliding systems with relations to corrugation problems
p 2269 N94-23586
Surface analysis of corrugated rail treads
p 2270 N94-23587
Surface observations of stick-slip oscillations in tightly conformal wheel/rail contacts p 2270 N94-23588
Contact analysis of rough rail surfaces
p 2270 N94-23589

RAILGUN ACCELERATORS
The internal structure and dynamics of the railgun plasma armature between infinitely wide ablating rails
[DE94-001473] p 2198 N94-23208
A comparison of in-bore projectile motion from an electromagnetic railgun versus that of a conventional cannon barrel
[AD-A273473] p 2198 N94-24690
RAILS
Rail Corrugations
[ILR-BER-59] p 2269 N94-23581
A rail corrugation theory which allows for contact patch size p 2269 N94-23582
A rail joint: The possible initiator of corrugation?
p 2269 N94-23583
A linear model for corrugation and its limit of validity
p 2269 N94-23584
Lateral high frequency oscillations and stability of a wheel rolling on a flexible track p 2269 N94-23585
Wear characteristics of technical dry rolling/sliding systems with relations to corrugation problems
p 2269 N94-23586
Surface analysis of corrugated rail treads
p 2270 N94-23587
Surface observations of stick-slip oscillations in tightly conformal wheel/rail contacts p 2270 N94-23588
Contact analysis of rough rail surfaces
p 2270 N94-23589
RAIN
Adaptive data rate control TDMA systems as a rain attenuation compensation technique
p 2287 N94-22821
An analytic study of a two-phase laminar airfoil in simulated heavy rain p 2171 N94-23661
Estimation of the rain signal in the presence of large surface clutter
[NASA-CR-195105] p 2409 N94-24087
Precipitation measurement using SIR-C: A feasibility study. Investigation at nadir
[NASA-CR-195103] p 2410 N94-24126
CAPE for CaPE p 2416 N94-24409
Water cycle research associated with the CaPE hydrometeorology project (CHymP p 2416 N94-24414
Further studies to extend and test the area-time-integral technique applied to satellite data
[NASA-CR-195132] p 2415 N94-24705
Worst case analysis: Earth sensor assembly for the tropical rainfall measuring mission observatory
[NASA-CR-189320] p 2311 N94-24754
Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861
RAMAN SPECTRA
Numerical simulation and analysis of experimental results on stimulated Raman scattering in laser-plasma Hohlraum targets
[DE93-613719] p 2554 N94-25330
Measurement of the volume mass by spontaneous Raman scattering. Study of turbulent fluctuations of mixing in a subsonic free jet. Measurements in supersonic wind tunnels
[ISL-R-102/92] p 2339 N94-25462
RAMAN SPECTROSCOPY
Materials Science and Engineering
[DE94-003018] p 2228 N94-23493
Total light loss optic spectroscopy: Progress towards a fiber optic Raman organic vapor sensor
[DE94-002545] p 2234 N94-24549
Nondestructive evaluations
[DE94-003020] p 2373 N94-24613
Investigation of Raman beam cleanup and phase conjugation
[AD-A273157] p 2545 N94-24672
RANDOM ACCESS MEMORY
Crosstie random access memory element having associated read/write circuitry
[AD-D016027] p 2446 N94-24724
RANDOM NOISE
Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805
Separable concatenated codes with iterative map decoding for Rician fading channels
p 2286 N94-22815
A mixed map/variable structure observer for target tracking p 2157 N94-24263
An analysis of gamma ray burst time histories
[NASA-CR-195191] p 2629 N94-25199
RANDOM NUMBERS
Two-stage versus sequential sample-size determination in regression analysis of simulation experiments
[PB94-110558] p 2495 N94-24634
RANDOM PROCESSES
Logarithm of probability measures and infinite divisibility of sub-stable random vectors
[PB94-118627] p 2486 N94-23758
Correlation function estimator performance in non-Gaussian spherically invariant random processes
[AD-A273498] p 2496 N94-24951
RANDOM SAMPLING
Rao-Blackwell theorem in stereology and some counterexamples
[PB94-111713] p 2496 N94-24639
RANDOM VARIABLES
On the asymptotically uniform distribution modulo 1 of extreme order statistics
[MEMO-COSOR-91-38-REV] p 2493 N94-23142
Limiting distribution of fractional parts of extreme order statistics
[PB93-237733] p 2494 N94-23440
Characterizations of shift-invariant distributions based on summation modulo one
[PB93-237824] p 2481 N94-23442
Subset selection for the best of two populations: Tables of the expected subset size
[PB93-237857] p 2494 N94-23546
Subset selection with a generalized selection goal based on a loss function
[PB94-111192] p 2494 N94-23798
Some generalized subset selection procedures
[PB94-111655] p 2487 N94-23799
Infinite divisible and stable distributions modulo 1
[PB94-110640] p 2495 N94-23815
A comparison of approximate interval estimators for the Bernoulli parameter
[NASA-CR-191585] p 2458 N94-24680
Efficiency of subset selection of an epsilon-best uniform population relative to selection of the best one
[PB93-237741] p 2490 N94-24763
Topics in probability and dynamics
[AD-A273543] p 2496 N94-24931
RANDOM VIBRATION
Microwelding due to random vibration
p 2359 N94-24019
RANDOM WALK
Coherence lost? Not-so-fast escapes from the in-phase attractor of a set of globally coupled nonlinear oscillators
[DE94-000799] p 2557 N94-22940
RANGE ERRORS
Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268
RANGE FINDERS
Expansion-based passive ranging
p 2176 N94-25504
RANGEFINDING
EUTELTRACS: The European experience on mobile satellite services p 2281 N94-22781
Lightning studies using LDAR and LLP data
p 2416 N94-23238
Object recognition through image understanding for an autonomous mobile robot
[AD-A273206] p 2475 N94-24862
Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors
[AD-D016005] p 2302 N94-25058
Expansion-based passive ranging
p 2176 N94-25504
Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505
Validation of vision-based range estimation algorithms using helicopter flight data p 2442 N94-25506
RANKINE CYCLE
Utilization of recently developed codes for high power Brayton and Rankine cycle power systems
p 2222 N94-23641
RANKING
Solving the ranking and selection indifference-zone formulation for normal distributions using computer software
[AD-A273821] p 2496 N94-25518
RARE EARTH ELEMENTS
Development of infrared sensors using energy transfer/energy upconversion processes: Study of laser excited fluorescence in rare Earth ion doped crystals
[NASA-TM-108437] p 2233 N94-24073
RAREFIED GASES
Interferometry in rarefied gas flows
[ISL-CO-207/92] p 2318 N94-23160
RASTER SCANNING
Results of a laboratory experiment that tests rotating unbalanced-mass devices for scanning gimbaled payloads and free-flying spacecraft
[NASA-TP-3458] p 2269 N94-23574
RATIONAL FUNCTIONS
A rational elliptic surface related to the question of expressing squares as sum of consecutive squares
[W-9305] p 2479 N94-23139
Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface
[PB93-237691] p 2480 N94-23438
Approximation to nonlinear equations using nonlinear rational models
[RR-448] p 2492 N94-25306
RATIOS
The computation of R(sub 0) for discrete-time epidemic models with dynamic heterogeneity
[CWI-AM-R9301] p 2420 N94-23521
RATS
Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity
[PB93-232254] p 2420 N94-23454
Skeletal muscle metabolism in hypokinetic rats
[NASA-CR-195082] p 2420 N94-24124
In vitro system for studying metabolism of environmental chemicals in human cells
[AD-A273427] p 2421 N94-24688
RAWINSONDES
A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements
[AD-A273803] p 2406 N94-25537
RAY TRACING
Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS
p 2283 N94-22795
Proposed additions to the SHADOW ray-tracing code for general-asymmetric perfect-crystal optics
[DE94-001291] p 2560 N94-23188
Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464
Theoretical investigation of variable periodicity (graded) multilayers for hard x ray applications
[NASA-CR-194824] p 2543 N94-23502
Dynamic ray tracing and its application in triangulated media
[DE94-000875] p 2402 N94-23516
Accuracy control in Monte Carlo radiative calculations
p 2321 N94-23639
RAYLEIGH DISTRIBUTION
Control algorithms for effective operation of variable-speed wind turbines
[DE94-002607] p 2394 N94-23704
RAYLEIGH SCATTERING
Data analysis and interpretation of lunar dust exosphere p 2623 N94-25349
RAYLEIGH-RITZ METHOD
Mechanical and thermal buckling analysis of sandwich panels under different edge conditions
[NASA-TM-4535] p 2228 N94-23514
RC CIRCUITS
Carbon supercapacitors
[DE94-002652] p 2311 N94-24748
REACTING FLOW
Numerical parametric studies of spray combustion instability p 2212 N94-23041
A random distribution reacting mixing layer model
[NASA-CR-194445] p 2187 N94-23552
Upwind MacCormack Euler solver with non-equilibrium chemistry p 2326 N94-23672
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
A large eddy simulation scheme for turbulent reacting flows p 2330 N94-24154
The combustion program at CTR
p 2237 N94-24155
A transport equation for the scalar dissipation in reacting flows with variable density: First results
p 2331 N94-24157
Workshop on Computational Turbulence Modeling
[NASA-CP-10130] p 2333 N94-24460
Conservation equations for reacting gas flow
[PB94-111168] p 2334 N94-24574
Numerical solutions of the complete Navier-Stokes equations
[NASA-CR-194780] p 2337 N94-24858
LES, DNS and RANS for the analysis of high-speed turbulent reacting flows
[NASA-CR-195196] p 2337 N94-25094
REACTION BONDING
Selection of polymer binders and fabrication of SiC fiber-reinforced reaction-bonded silicon nitride matrix composites
[NASA-CR-194874] p 2255 N94-24223
REACTION KINETICS
Study of improved methods for predicting chemical equilibria
[DE94-001647] p 2568 N94-22719
A novel method for determination of transport parameters of H2 and O2 in PEMFCs
[DE94-001492] p 2389 N94-22962
Integrated hydrometallurgical jarosite treatment
[PB93-217990] p 2232 N94-22983
Reburning rich-lean kinetics
[PB93-220887] p 2232 N94-23100

Modelling of solid polymer and direct methanol fuel cells: Phenomenological equations and analytical solutions [PB93-224897] p 2390 N94-23102

Alloys for hydrogen storage in nickel/hydrogen and nickel/metal hydride batteries p 2391 N94-23353

Reaction of isocyanates with carboxylic acids and its application to polymer synthesis [PB94-118858] p 2254 N94-23763

Selection of polymer binders and fabrication of SiC fiber-reinforced reaction-bonded silicon nitride matrix composites [NASA-CR-194874] p 2255 N94-24223

Fracture kinetics analysis of empirical and semi-empirical corrosion fatigue relations p 2159 N94-24277

Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics [AD-A273504] p 2235 N94-24790

Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897

Reactive trace metals as indicators of subduction and ventilation processes in the ocean [AD-A273585] p 2419 N94-25164

REACTION PRODUCTS

Condensed-phase thermal decomposition of TATB investigated by Atomic Force Microscopy (AFM) and Simultaneous Thermogravimetric Modulated Beam Mass Spectrometry (STMBMS) [DE94-000396] p 2232 N94-23298

Metal-mullite reactions [DE94-002038] p 2244 N94-23811

REACTION TIME

Automated system function allocation and display format: Task information processing requirements p 2434 N94-24189

REACTION WHEELS

A combined Earth scanner and momentum wheel for attitude determination and control of small spacecraft p 2208 N94-24022

The low noise momentum wheel MW-X: EM design and predicted properties p 2360 N94-24024

Reactive thrust cruise for a geosynchronous satellite with minimum fuel consumption p 2158 N94-24271

Momentum management and torque distribution p 2159 N94-24272

REACTIVITY

Reburning rich-lean kinetics [PB93-220887] p 2232 N94-23100

Reactivity of ambident anions in the gas phase [PB93-232189] p 2533 N94-23713

Fundamental and experimental studies on the catalytic combustion of methane [PB94-112661] p 2233 N94-23736

Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films [AD-A273135] p 2234 N94-24772

Reactive trace metals as indicators of subduction and ventilation processes in the ocean [AD-A273585] p 2419 N94-25164

REACTOR DESIGN

Design and testing of a unique randomized gravity, continuous flow bioreactor p 2423 N94-25368

REACTOR MATERIALS

Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys [DE94-001466] p 2240 N94-23009

Performance assessment of low pressure nuclear thermal propulsion p 2217 N94-23070

REACTOR TECHNOLOGY

Start-up simulations of the PULSAR pulsed tokamak reactor [DE94-002634] p 2552 N94-24519

READERS

Harmonisation of man-machine interface experiments in the context of the development of PHARE advanced tools [PB93-204725] p 2430 N94-23744

READING

A multimedia adult literacy program: Combining NASA technology, instructional design theory, and authentic literacy concepts p 2585 N94-25384

READOUT

Progress on the design of a data push architecture for an array of optimized time tagging pixels [DE93-041011] p 2307 N94-22955

REAL GASES

Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination [PB93-224152] p 2559 N94-23109

REAL TIME OPERATION

A novel process monitoring and control system based on a neural manufacturing concept [DE94-001516] p 2471 N94-23011

Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop [PB93-220135] p 2407 N94-23129

CAMAC throughput of a new RISC-based data acquisition computer at the DIII-D tokamak [DE94-001113] p 2550 N94-23182

Towards real-time stereovision systems for planetary missions p 2370 N94-23422

Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software p 2305 N94-23842

SAMPEX payload operation control center implementation p 2197 N94-23843

PILOT: An intelligent distributed operations support system p 2508 N94-23895

Combining real-time monitoring and knowledge-based analysis in MARVEL p 2477 N94-23900

Real-time on-board orbit determination with DORIS p 2196 N94-23919

A real-time navigation monitoring expert system for the Space Shuttle Mission Control Center p 2202 N94-23921

XRTD: An X-Windows based, real-time radiometric display and analysis system p 2305 N94-23922

Kalman filtering applied to real-time monitoring of apogee maneuvers p 2196 N94-23923

SIMSAT: An object oriented architecture for real-time satellite simulation p 2197 N94-23940

Real-time holographic endoscopy [ISL-CO-203/92] p 2343 N94-24054

Making intelligent systems team players: Additional case studies [NASA-TM-104786] p 2473 N94-24068

Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field [NASA-CR-191490] p 2344 N94-24360

Real-time process logic [PB94-101441] p 2446 N94-24540

ASR-9 microburst detection algorithm [AD-A273591] p 2415 N94-24850

Performance measurements of the multimedia testbed on Mach 3.0: Experience writing real-time device drivers, servers, and applications [AD-A273600] p 2460 N94-24932

Reengineering real-time software systems [AD-A273408] p 2461 N94-25074

On chain coding of line drawings [ISBN-9-06-275778-2] p 2462 N94-25252

Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 6: Electric Power Industry [AD-A273668] p 2250 N94-25408

Expert system rule-base evaluation using real-time parallel processing [AD-A273701] p 2469 N94-25454

REATTACHED FLOW

A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670

Computation of turbulent flows over backward and forward-facing steps using a near-wall Reynolds stress model p 2172 N94-24145

RECEIVERS

Systems implications of L-band fade data statistics for LEO mobile systems p 2284 N94-22799

Low cost coherent demodulation for mobile satellite terminals p 2284 N94-22803

An optical ASK and FSK phase diversity transmission system [EUT-92-E-268] p 2542 N94-23171

Integration and test of high-speed transmitter electronics for free-space laser communications [NASA-TM-106295] p 2295 N94-24101

Effects of atmospheric variations on acoustic system performance p 2527 N94-24211

Comparison of measured and predicted pure tone propagation levels from JAPE-1: An evaluation of the performance of ASOPRAT p 2527 N94-24212

Simulation of adjacent channel interference in a UHF satellite system [AD-A273147] p 2299 N94-24669

Measurements and modeling of multitone, low-frequency acoustic data from the Arraial do Cabo range [AD-A273406] p 2530 N94-25073

RECEPTION DIVERSITY

Diversity reception for advanced multi-satellite networks: A CDMA approach p 2286 N94-22816

Isolated and coupled superquadric loop antennas for mobile communications applications p 2289 N94-22834

RECIPROCITY THEOREM

Electromagnetic scattering by inhomogeneous objects. Solution methods based upon reciprocity theorems of time-convolution and time-correlation type [PB94-111010] p 2294 N94-23729

RECIRCULATIVE FLUID FLOW

A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670

RECOIL ATOMS

Optical spin polarization and state-sensitive detection of a cesium atomic beam [ATR-92(8436)-1] p 2534 N94-24077

RECOMMENDATIONS

Ultraviolet, visible, and gravity astrophysics: A plan for the 1990's [NASA-NP-152] p 2603 N94-24973

RECONNAISSANCE

Design project: LONGBOW supersonic interceptor [NASA-CR-195510] p 2180 N94-24581

RECONNAISSANCE AIRCRAFT

UAV current technology and future trends p 2154 N94-24245

S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270

RECORDS MANAGEMENT

Fact-based enterprise information management using NIAM [DE93-041135] p 2591 N94-24501

RECOVERY

Galileo spacecraft anomaly and safing recovery p 2207 N94-23864

RECOVERY PARACHUTES

Regulated drag area parachute [AD-D015992] p 2170 N94-25051

RECRYSTALLIZATION

Characterization of 3-D particle distributions and effects on recrystallization studied by computer simulation [PB93-201408] p 2562 N94-23535

RECTANGULAR PANELS

Nonlinear equations of motion for a panel subject to external loads [AD-A273142] p 2170 N94-24773

RECURSIVE FUNCTIONS

Mean-value of product-form stochastic Petri net models of slotted-ring systems [PB94-110871] p 2494 N94-23749

The Adam language: Ada extended with support for multiway activities [NASA-CR-4565] p 2456 N94-24480

RECYCLING

Feasibility study on a CO2 global recycling system using natural energy [DE94-714889] p 2397 N94-23026

RED SHIFT

Using contour maps to search for red-shifted 511 keV features in BATSE GRB spectra p 2585 N94-24455

REDUCTION (CHEMISTRY)

Dispersion of Rh/Cu in a sol-gel matrix. Highly chemo- and stereoselective catalyst for the reduction of alkynes to Z-alkenes [AD-A273306] p 2262 N94-25145

The electrochemistry of the solvated electron: A study of its properties and of its applications [ETN-94-95313] p 2236 N94-25296

REDUNDANT COMPONENTS

Reliable redundant device for mechanisms p 2361 N94-24030

Reliability analysis of a repairable dependent parallel system [ETN-94-95312] p 2373 N94-25295

REED-SOLOMON CODES

Box codes of lengths 48 and 72 p 2292 N94-23265

REELS

Nearly uniform deployment/retrieval strategy for space tether systems p 2156 N94-24256

REENTRY EFFECTS

Analysis and effects of the advanced solid rocket motor on the Space Shuttle elements [NASA-CR-193879] p 2200 N94-24664

REENTRY VEHICLES

Development and application of an empirical probability distribution for the prediction error of re-entry body maximum dynamic pressure p 2207 N94-23653

REFINING

Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 4: Oil/Gas Pipeline [AD-A273665] p 2250 N94-25405

REFLECTANCE

Spatial and temporal variability of soil temperature, moisture and surface soil properties [NASA-CR-194109] p 2401 N94-23337

Theoretical investigation of variable periodicity (graded) multilayers for hard x ray applications [NASA-CR-194824] p 2543 N94-23502

Nimbus-7 Total Ozone Mapping Spectrometer (TOMS) data products user's guide
[NASA-RP-1323] p 2410 N94-24355

REFLECTION

An Earth albedo model: A mathematical model for the radiant energy input to an orbiting spacecraft due to the diffuse reflectance of solar radiation from the Earth below
[NASA-TM-104596] p 2195 N94-24497

The Radar Image Generation (RIG) model
p 2306 N94-25497

REFLECTOR ANTENNAS

Electrical performance of wire mesh for spacecraft deployable reflector antennas p 2275 N94-22744

K- and Ka-band mobile-vehicular satellite-tracking reflector antenna system for the NASA ACTS mobile terminal p 2289 N94-22831

Integrated reflector antenna design and analysis
[NASA-CR-195164] p 2300 N94-24678

Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas
[NASA-CR-195167] p 2301 N94-25005

REFRACTION

Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464

REFRACTIVITY

Design refinement of multilayer optical thin film devices with two optimization techniques
[DE93-634228] p 2542 N94-22979

Dimensional analysis of acoustically propagated signals p 2528 N94-24217

Conformal method of fabricating and optical waveguide on a semiconductor substrate
[AD-D015988] p 2546 N94-25043

Liquidus temperature and optical properties measurement by containerless techniques
p 2247 N94-25126

Optical properties and emissivities of liquid metals and alloys p 2248 N94-25129

REFRACTORY COATINGS

Molten salt reactor for potentiostatic electroplating
[AD-D016020] p 2258 N94-24720

REFRACTORY MATERIALS

Evaluation of A5Si3Z(x) intermetallics for use as high temperature structural materials
[DE93-041127] p 2227 N94-22977

Small rocket research and technology
p 2211 N94-23038

Advanced materials for radiation-cooled rockets
p 2214 N94-23052

Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics
[DE93-040094] p 2348 N94-23203

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations
[AD-A273662] p 2251 N94-25449

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues
[AD-A273663] p 2251 N94-25450

REFRACTORY METAL ALLOYS

An extended laser flash technique for thermal diffusivity measurement of high-temperature materials
p 2238 N94-25132

REFRACTORY METALS

New extensions in the development of deformation processed metal-metal matrix composites
[DE94-000692] p 2227 N94-23004

The effects of texture and strain on the r-va lue of heavy gauge tantalum plate
[DE94-000690] p 2242 N94-23541

REFRIGERANTS

US Department of Energy phaseout of CFC-refrigerants
[DE94-001668] p 2397 N94-23016

REFRIGERATING

US Department of Energy phaseout of CFC-refrigerants
[DE94-001668] p 2397 N94-23016

REFRIGERATORS

A study of element interaction in thermoacoustic engines
[AD-A273228] p 2569 N94-24777

REGENERATIVE COOLING

Flow visualization study in high aspect ratio cooling channels for rocket engines p 2213 N94-23049

Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556

Heat transfer in rocket engine combustion chambers and regeneratively cooled nozzles
[NASA-CR-195094] p 2220 N94-24471

REGENERATIVE FUEL CELLS

Primary and secondary electrical space power based on advanced PEM systems p 2392 N94-23357

PEM regenerative fuel cells p 2392 N94-23358

Effect of power system technology and mission requirements on high altitude long endurance aircraft
[NASA-CR-194455] p 2189 N94-25200

REGOLITH

Whole rock major element chemistry of KREEP basalt clasts in lunar breccia 15205: Implications for the petrogenesis of volcanic KREEP basalts
p 2614 N94-24365

Design of a lunar propellant processing facility. NASA/USRA advanced program
[NASA-CR-195502] p 2266 N94-24618

Vertical transport of water in the Martian boundary layer p 2622 N94-24902

REGRESSION ANALYSIS

Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean
[NASA-CR-194852] p 2408 N94-23542

Maximal type test statistics based on conditional processes
[PB94-111614] p 2494 N94-23771

First order conditions for the maximum likelihood estimation of an exact ARMA model
[PB94-110533] p 2495 N94-23814

Verification and validation of models
[PB94-110566] p 2456 N94-24507

Two-stage versus sequential sample-size determination in regression analysis of simulation experiments
[PB94-110558] p 2495 N94-24634

Generalized linear mixed models and their application in plant breeding research
[ETN-94-95335] p 2460 N94-25061

REGRESSION COEFFICIENTS

Space Shuttle Main Engine performance analysis
p 2222 N94-24444

REGULATIONS

US domestic and international regulatory issues
p 2275 N94-22748

Use of negotiated rulemaking in developing technical rules for low-Earth orbit mobile satellite systems
p 2276 N94-22750

NASA printing, duplicating, and copying management handbook
[NASA-NHB-1490.5] p 2590 N94-23971

REINFORCED PLASTICS

Fire-resistant barriers for composite materials
[AD-D016014] p 2230 N94-24735

Composites and textile reinforcement
[VTT-TIED-1424] p 2231 N94-25420

REINFORCED PLATES

Out of plane gradients in laminated composites
[NASA-CR-194875] p 2228 N94-23566

Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260

REINFORCED SHELLS

Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260

CORSS: Cylinder Optimization of Rings, Skin, and Stringers
[NASA-TP-3457] p 2490 N94-24727

REINFORCEMENT RINGS

CORSS: Cylinder Optimization of Rings, Skin, and Stringers
[NASA-TP-3457] p 2490 N94-24727

REINFORCING FIBERS

Creep deformation characteristics of ductile discontinuous fiber reinforced composites
[DE94-000697] p 2227 N94-23005

Development of silicon nitride composites with continuous fiber reinforcement
[DE94-001996] p 2227 N94-23022

Determination of fiber-matrix interface failure parameters from off-axis tests
[NASA-TM-109043] p 2241 N94-23274

Interface evaluation in ceramic composites
p 2255 N94-24231

CMC design consequences p 2256 N94-24238

Constitutive modelling of fiber-reinforced concrete under uniaxial tensile loading
[VTT-JULK-774] p 2379 N94-25385

Alternatives for reinforcement: Fiber composites
[VTT-TIED-1412] p 2230 N94-25386

The pressure loaded volumetric ceramic receiver 500 kW version design and construction
[DLR-MITT-93-02] p 2396 N94-25479

RELATIVISTIC PARTICLES

Relativistic hadrons in an external field
[ETN-94-95387] p 2538 N94-25259

RELATIVISTIC PLASMAS

A relativistic theory on wave propagation in inhomogeneous magnetoplasmas
[ETN-94-95322] p 2554 N94-25285

RELATIVISTIC THEORY

A relativistic theory on wave propagation in inhomogeneous magnetoplasmas
[ETN-94-95322] p 2554 N94-25285

RELATIVITY

Tensor-scalar cosmological models and their relaxation toward general relativity
[PB93-220796] p 2601 N94-23099

On BRST quantization of constrained systems
[ETN-94-95386] p 2570 N94-25258

RELAXATION (MECHANICS)

Structure and energetics of high index Fe, Al, Cu and Ni surfaces using equivalent crystal theory
[NASA-TM-106408] p 2249 N94-25171

RELAXATION METHOD (MATHEMATICS)

Relaxation schemes for Chebyshev spectral multigrid methods p 2484 N94-23688

RELAXATION TIME

Dipolar relaxation in a second-order nonlinear optical interpenetrating polymer network
[AD-A273626] p 2258 N94-24732

RELAY SATELLITES

The Olympus PAX, measurement of mechanism induced vibration p 2362 N94-24041

RELIABILITY

Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055

Connector mechanisms in compliance with extreme space conditions p 2360 N94-24025

Embodiment design for a multipropellant resistojet
[NASA-CR-195505] p 2221 N94-24834

RELIABILITY ANALYSIS

Phased-mission system analysis using Boolean algebraic methods
[NASA-CR-191564] p 2451 N94-23340

Specifying design conservatism: Worst case versus probabilistic analysis p 2374 N94-23939

Aviation system safety risk management tool analysis. Volume 2: Appendices
[AD-A273502] p 2173 N94-24864

Reliability analysis of a repairable dependent parallel system
[ETN-94-95312] p 2373 N94-25295

RELIABILITY ENGINEERING

Reliability enhancement of Navier-Stokes codes through convergence enhancement p 2216 N94-23064

Contribution to the evaluation of efficiency of a microprocessor functional test
[ETN-94-95176] p 2445 N94-23153

Aviation system safety risk management tool analysis. Volume 2: Appendices
[AD-A273502] p 2173 N94-24864

Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues
[AD-A273663] p 2251 N94-25450

Fault detection in HVAC systems using fuzzy models
[OUEL-1977/93] p 2373 N94-25475

RELIEF MAPS

Using contour maps to search for red-shifted 511 keV features in BATSE GRB spectra p 2585 N94-24455

REMANENCE

Photo-induced antiferromagnetic interlayer coupling in Fe superlattices with iron silicide spacers
[DE94-001345] p 2559 N94-22995

Comparative M-H characteristics of 1-5 and 2-17 type samarium-cobalt permanent magnets to 300 C
[NASA-CR-194440] p 2312 N94-24870

REMOTE CONTROL

Mars 96 rover: Science, instrumentation, and control
p 2369 N94-23395

The remote-operated autonomous-robot concept: From deep sea to outer space applications
p 2370 N94-23413

Sensing and modelling concepts for autonomous and remote mobile robot control p 2370 N94-23421

The European Space Agency standard for space packet utilisation p 2203 N94-23954

Crew interface analysis: Selected articles on space human factors research, 1987 - 1991
[NASA-TM-104756] p 2433 N94-24185

UAV current technology and future trends
p 2154 N94-24245

Generic drone control system
[AD-D015993] p 2184 N94-25052

REMOTE HANDLING

System for automatic transportation of aircraft on the ground
[CA-PATENT-1-322-361] p 2193 N94-24785

REMOTE MANIPULATOR SYSTEM

Illumination requirements for operating a space remote manipulator p 2435 N94-24195

Programmable display pushbuttons on the Space Station's telerobot control panel p 2435 N94-24198
The effects of spatially displaced visual feedback on remote manipulator performance p 2436 N94-24201
Admittance model for the shuttle remote manipulator system in four configurations
[NASA-CR-4555] p 2474 N94-24635
Modelling the Shuttle Remote Manipulator System: Another flexible model p 2371 N94-25350

REMOTE SENSING
The AGRHYMET data communications project
p 2280 N94-22776
A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research
[DE94-000565] p 2381 N94-23001
Integrated use of hydrological modelling and remote sensing in the province of Drenthe (The Netherlands): Possibilities and restrictions
[REPT-61] p 2382 N94-23148
Literature study on: Remote Fraunhofer luminescence detection of algal bloom in marine environments
[BCRS-92-25] p 2417 N94-23176
Optical component MAC Europe ground truth report: Flevoland 1991 (Netherlands)
[BCRS-92-27] p 2382 N94-23177
Application of ERS-1 active microwave instrumentation data to remote sensing of snow
[PB93-224756] p 2382 N94-23224
SeaWiFS technical report series. Volume 9: The simulated SeaWiFS data set, version 1
[NASA-TM-104566-VOL-9] p 2417 N94-23291
SeaWiFS technical report series. Volume 11: Analysis of selected orbit propagation models for the SeaWiFS mission
[NASA-TM-104566-VOL-11] p 2417 N94-23338
Rover in the Mars 96 mission p 2609 N94-23397
Lunar exploration rover program developments
[DE93-040759] p 2613 N94-23469
Remote sensing, imaging, and signal engineering
[DE94-003021] p 2382 N94-23494
The Fifth Calibration/Data Product Validation Panel Meeting
[NASA-TM-108270] p 2383 N94-23595
ASTER TIR subsystem and calibration
p 2385 N94-23612
Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734
NASDA's view of ground control in mission operations
p 2305 N94-23835
SPOT satellite family: Past, present, and future of the operations in the mission and control center
p 2500 N94-23846
SPOT4 Operational Control Center (CMP)
p 2197 N94-23856
Mission planning for an Earth observation low Earth orbiter: ERS-1 p 2503 N94-23868
MAMS data for the Convection and Moisture Experiment (CAMEX)
[NASA-TM-108435] p 2409 N94-24080
Estimation of the rain signal in the presence of large surface clutter
[NASA-CR-195105] p 2409 N94-24087
Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100
Intercomparison of remote and balloon-borne sensors operated at JAPE-91 p 2527 N94-24210
Preliminary analysis of the JAPE ground vehicle test data with an artificial neural network classifier
p 2529 N94-24222
Optimization of microscopic and macroscopic second order optical nonlinearities p 2226 N94-24354
Mapping Tomorrow's Resources: A symposium on the uses of remote sensing, Geographic Information Systems (GIS), and Global Positioning Systems (GPS) for natural resources management p 2387 N94-24357
Factors affecting the identification of phytoplankton groups by means of remote sensing
[NASA-TM-108799] p 2387 N94-24403
The measurement and analysis of leaf spectral reflectance of two stands of loblolly pine populations
p 2389 N94-24442
An investigation of current and future satellite and in-situ data for the remote sensing of the land surface energy balance
[NASA-CR-195138] p 2387 N94-24596
Nondestructive evaluations
[DE94-003020] p 2373 N94-24613
Hyperspectral imagery classification using a backpropagation neural network
[AD-A273615] p 2545 N94-24730
Method for selection of wavelength bands for multispectral classification
[PB93-204378] p 2388 N94-24741
Evaluation of the use of remote-sensing data to identify crop types and estimate irrigated acreage, Uvalde and Medina Counties, Texas, 1989
[PB93-193159] p 2388 N94-24809
Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-194858] p 2404 N94-24843
Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas
[NASA-CR-195167] p 2301 N94-25005
Remote vibration measurements at a sud aviation alouette 3 helicopter with a CW CO2-laser system
[AD-A273818] p 2190 N94-25516

REMOTE SENSORS
A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research
[DE94-000565] p 2381 N94-23001
PULSAUR 2
[NASA-CR-194832] p 2209 N94-23484
MODIS calibration p 2383 N94-23600
Eos cross-calibration radiometers
p 2383 N94-23601
Activities of NIST (National Inst. of Standards and Technology) p 2384 N94-23605
A fifteen years lifetime mechanism for an infrared Earth sensor p 2362 N94-24040
Intercomparison of remote and balloon-borne sensors operated at JAPE-91 p 2527 N94-24210

REMOTELY PILOTED VEHICLES
Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264
Overall system concepts in mission planning
p 2521 N94-25009
Generic drone control system
[AD-D015993] p 2184 N94-25052

RENORMALIZATION GROUP METHODS
Development and validation of RNG methodology for compressible turbulence
[AD-A273469] p 2337 N94-24929
The renormalization group for flag manifolds
[DE93-616846] p 2491 N94-25213

REPETITION
Two-stage versus sequential sample-size determination in regression analysis of simulation experiments
[PB94-110558] p 2495 N94-24634

REPORTS
Activities report to NATO
[ETN-94-95047] p 2318 N94-23227
Fiscal year 1993 scientific and technical reports, articles, papers, and presentations
[NASA-TM-108423] p 2590 N94-24079
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 21: US aerospace industry librarians and technical information specialists as information intermediaries: Results of the phase 2 survey
[NASA-TM-109064] p 2593 N94-24709

REPRODUCTION (COPYING)
NASA printing, duplicating, and copying management handbook
[NASA-NHB-1490.5] p 2590 N94-23971

REQUIREMENTS
The next Japanese solar satellite
p 2625 N94-22846
Requirements for future solar-physics missions that include UV instrumentation p 2625 N94-22851
Tools reference manual for a Requirements Specification Language (RSL), version 2.0
[NASA-CR-191461] p 2445 N94-23125
Rover requirements for the planet surface segment of the space exploration initiative p 2369 N94-23377
Electronic payloads for Martian missions: A preliminary assessment of technologies p 2610 N94-23408
An approach to the design of operations systems
p 2506 N94-23884
The Columbus logistics support at the APMC: Requirements and implementation aspects
p 2515 N94-23935

RESEARCH
The national geomagnetic initiative
[LC-93-85739] p 2401 N94-23344
Bibliography of Lewis Research Center technical publications announced in 1992
[NASA-TM-106035] p 2590 N94-23562
Index to FAA Office of Aviation Medicine Reports: 1961 through 1993
[DOT/FAA/AM-94/1] p 2426 N94-24093
RIACS/USRA
[NASA-CR-195117] p 2631 N94-25003
Research interests and broad agency announcement 94-1 of the Air Force Office of Scientific Research
[AD-A273410] p 2632 N94-25075
National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 2
[NASA-CR-188271-VOL-2] p 2636 N94-25367

RESEARCH AIRCRAFT
Close-up analysis of inflight ice accretion
[NASA-TM-106457] p 2172 N94-23523
A conceptual design of an unmanned test vehicle using an airbreathing propulsion system
[NASA-CR-195550] p 2189 N94-25085
X-31 aerodynamic characteristics determined from flight data p 2164 N94-25109
Nonlinear aerodynamic modeling using multivariate orthogonal functions p 2164 N94-25110

RESEARCH AND DEVELOPMENT
Progress in phases 2 and 3 of the Photovoltaic Manufacturing Technology Project (PVMaT)
[DE94-000206] p 2389 N94-22888
JPRS report: Science and technology. Central Eurasia: Space
[JPRS-USP-93-006] p 2194 N94-23015
NASA Propulsion Engineering Research Center, volume 2
[NASA-CR-194719-VOL-2] p 2209 N94-23028
Activities report to NATO
[ETN-94-95047] p 2318 N94-23227
Bibliography of Lewis Research Center technical publications announced in 1992
[NASA-TM-106035] p 2590 N94-23562
The RB211: The first 25 years
[PNR-90977] p 2187 N94-23570
Contributions of DOE weapons labs and NIST to semicondutor technology
[OTA-ITE-585] p 2630 N94-23572
Satellite communications systems and technology. Volume 1: Analytical chapters
[NASA-TM-109398] p 2293 N94-23627
Fiscal year 1993 scientific and technical reports, articles, papers, and presentations
[NASA-TM-108423] p 2590 N94-24079
Proceedings of Technology and Governance in the 1990's
[PB93-192904] p 2597 N94-24312
NASA high performance computing and communications program
[NASA-TM-4554] p 2591 N94-24337
Radio communication and wave propagation. A visit to the Netherlands in December 1992
[PB93-204360] p 2297 N94-24531
Structural dynamics division research and technology accomplishments for FY 1993 and plans for FY 1994
[NASA-TM-109036] p 2169 N94-24576
Nondestructive evaluations
[DE94-003020] p 2373 N94-24613
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 20: The use of selected information products and services by US aerospace engineers and scientists: Results of two surveys
[NASA-TM-109022] p 2592 N94-24649
NADA/DOD Aerospace Knowledge Diffusion Research Project. Report number 19: The US government technical report and the transfer of federally funded aerospace R/D: An analysis of five studies
[NASA-TM-109061] p 2592 N94-24660
Research interests and broad agency announcement 94-1 of the Air Force Office of Scientific Research
[AD-A273410] p 2632 N94-25075
National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 1
[NASA-CR-188271-VOL-1] p 2632 N94-25348

RESEARCH FACILITIES
Satellite communications systems and technology. Volume 2: Site reports
[NASA-TM-109399] p 2293 N94-23628
Suddenly, tomorrow came... A history of the Johnson Space Center
[NASA-SP-4307] p 2631 N94-24584
Advanced ballistic range technology
[NASA-CR-195198] p 2165 N94-25169
Activities of Academia Sinica
[DE93-614529] p 2541 N94-25335
Automatic pressure control system for the Wright Laboratory Compressor Research Facility
[AD-A273827] p 2194 N94-25522

RESEARCH MANAGEMENT
Satellite communications systems and technology. Volume 2: Site reports
[NASA-TM-109399] p 2293 N94-23628

Collaborating with our customers: NIST building and fire research laboratory [PB94-110194] p 2272 N94-24955

RESEARCH PROJECTS

Fiscal year 1993 scientific and technical reports, articles, papers, and presentations [NASA-TM-108423] p 2590 N94-24079

GRYPHON: Air launched space booster [NASA-CR-195497] p 2199 N94-25022

National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 2 [NASA-CR-188271-VOL-2] p 2636 N94-25367

RESEARCH VEHICLES

Configuration development study of the OSU 1 hypersonic research vehicle [NASA-CR-195522] p 2181 N94-24591

Design of a wheeled articulating land rover [NASA-CR-195520] p 2365 N94-24806

RESERVOIRS

Near-surface seismic imaging [PB94-119096] p 2404 N94-24647

RESIDUAL GAS

Hot hydrogen testing of metallic turbo pump materials [NASA-CR-193880] p 2244 N94-24066

RESIDUAL STRESS

Control of the internal stresses in plane elasticity [PB93-225514] p 2374 N94-23112

Analysis of local delaminations caused by angle ply matrix cracks [NASA-TM-109052] p 2228 N94-24083

Dynamic localization and second-order subgrid-scale models in large eddy simulations of channel flow p 2329 N94-24149

Feasibility study of shot-peening modeling [CTN-94-60926] p 2244 N94-24170

Birdstrike resistant crew enclosure program [AD-A273700] p 2463 N94-25453

RESIDUES

Chemical characterization of some aerobic liquids in CELSS p 2422 N94-23241

Analysis of impactor residues in tray clamps from the Long Duration Exposure Facility. Part 2: Clamps from Bay B of the satellite [NASA-TM-104784] p 2386 N94-24095

RESIN TRANSFER MOLDING

Composites and textile reinforcement [VTT-TIED-1424] p 2231 N94-25420

RESINS

Curing phthalonitrile resins with acid and amine [AD-D016021] p 2258 N94-24721

RESISTOJET ENGINES

Embodiment design for a multipropellant resistojet [NASA-CR-195505] p 2221 N94-24834

Design of a resistojet for Space Station Freedom [NASA-CR-195506] p 2221 N94-24979

RESONANCE

Analysis and experiments of a whistler-wave plasma thruster [DE94-001533] p 2209 N94-23012

An active antenna for ELF magnetic fields p 2303 N94-25192

Bottom quark production at the Z resonance [ISBN-9-09-006217-3] p 2538 N94-25255

RESONANCE LINES

Semiempirical studies of atomic structure [DE94-001588] p 2531 N94-22937

The resonance lines of MG2 as diagnostics of the upper solar chromosphere [NASA-CR-195084] p 2627 N94-24300

RESONANT FREQUENCIES

Liquid oscillations in a spherical system with sliding edges boundary by two conical solid surfaces in zero-gravity [LRT-WE-9-FB-5-1992] p 2318 N94-23197

Vibrations of variable cross section Timoshenko beams p 2160 N94-24279

The H(sub infinity) optimal controller design and reduction for the inertial hold mode of the attitude control system of the XTE spacecraft [NASA-CR-195137] p 2366 N94-24846

Magnetic Earth Ionosphere Resonant Frequencies [NASA-CR-195131] p 2303 N94-25191

An active antenna for ELF magnetic fields p 2303 N94-25192

RESONANT TUNNELING

Quantum tunneling transport of electrons in double-barrier heterostructures: Theory and modeling [ETN-94-95332] p 2565 N94-25059

RESONATORS

Spatiotemporal behavior and nonlinear dynamics in a phase conjugate resonator [NASA-CR-4567] p 2543 N94-23529

Internally folded scalable laser [AD-D015978] p 2350 N94-25216

RESOURCE ALLOCATION

Resource allocation planning with international components p 2520 N94-23963

RESOURCES MANAGEMENT

Planning: Management of predictability and uncertainty and keeping abreast of developments p 2520 N94-23967

Mapping Tomorrow's Resources: A symposium on the uses of remote sensing, Geographic Information Systems (GIS), and Global Positioning Systems (GPS) for natural resources management p 2387 N94-24357

A biological survey for the nation [LC-93-85920] p 2421 N94-24704

The HEC NexGen software development project [AD-A273512] p 2460 N94-24822

Investigating pyrolysis/incineration as a method of resource recovery from solid waste p 2444 N94-25375

RESPIRATORY SYSTEM

Chronic obstructive pulmonary disease p 2425 N94-23324

RETINA

Physical aspects of the visual stimulus p 2431 N94-23978

RETRIEVAL

Nearly uniform deployment/retrieval strategy for space tether systems p 2156 N94-24256

REUSABLE SPACECRAFT

An assessment of solid lubricant films for use in high temperature space applications p 2363 N94-24044

Conceptual design of a two stage to orbit spacecraft [NASA-CR-195536] p 2204 N94-24620

REVERSE ENGINEERING

Update of GRASP/Ada reverse engineering tools for Ada [NASA-CR-193890] p 2455 N94-24111

REVERSE FIELD PINCH

Chaos in plasma simulation and experiment [DE94-001574] p 2549 N94-22963

Plasma research in the Madison Symmetric Torus (MST) [DE94-002318] p 2549 N94-22976

Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data [DE94-001575] p 2550 N94-23211

REYNOLDS EQUATION

New concepts for Reynolds stress transport equation modeling of inhomogeneous flows p 2171 N94-24143

Carrying the mass flux terms exactly in the first and second moment equations of compressible turbulence [NASA-CR-191568] p 2335 N94-24712

REYNOLDS NUMBER

A method to simulate viscous diffusion of vorticity by convective transport of vortices at a non-solenoidal velocity [DE94-001777] p 2318 N94-23220

Unstructured grid large eddy simulation of wall bounded turbulent flows p 2329 N94-24151

Energy transfer and constrained simulations in isotropic turbulence p 2330 N94-24153

Stagnation region heat transfer: The influence of turbulence parameters, Reynolds number and body shape [NASA-TM-106504] p 2334 N94-24481

Interactive control in turbulent shear layers [AD-A273544] p 2336 N94-24793

Active control of oscillatory lift forces on a circular cylinder [AD-A273243] p 2338 N94-25140

REYNOLDS STRESS

Turbulence sensors for separated flows: Current capabilities, future requirements p 2315 N94-22853

Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models p 2216 N94-23062

A representation for the turbulent mass flux contribution to Reynolds-stress and two-equation closures for compressible turbulence [NASA-CR-191569] p 2319 N94-23302

Reliability in second moment turbulence closures revisited [NASA-TM-106469] p 2326 N94-24063

Toward modeling wingtip vortices p 2171 N94-24142

New concepts for Reynolds stress transport equation modeling of inhomogeneous flows p 2171 N94-24143

Turbulence modeling for non-equilibrium flows p 2328 N94-24144

Computation of turbulent flows over backward and forward-facing steps using a near-wall Reynolds stress model p 2172 N94-24145

Dynamic localization and second-order subgrid-scale models in large eddy simulations of channel flow p 2329 N94-24149

Sound radiation due to boundary layer transition p 2332 N94-24163

Effects of shock strength on shock turbulence interaction p 2332 N94-24165

Local isotropy in distorted turbulent boundary layers at high Reynolds number p 2332 N94-24166

Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis [NASA-CR-194795] p 2335 N94-24640

Carrying the mass flux terms exactly in the first and second moment equations of compressible turbulence [NASA-CR-191568] p 2335 N94-24712

RHENIUM

Advanced materials for radiation-cooled rockets p 2214 N94-23052

Surface compositional variations of Mo-47Re alloy as a function of temperature [NASA-TP-3402] p 2245 N94-25117

RHEOLOGY

Electro-rheology fluids and liquid fuel flow [AD-A273640] p 2337 N94-25032

Constraining proposed combinations of ice history and Earth rheology using VLBI determined baseline length rates in North America p 2405 N94-25205

RHODIUM

Dispersion of Rh/Cu in a sol-gel matrix. Highly chemo- and stereoselective catalyst for the reduction of alkynes to Z-alkenes [AD-A273306] p 2262 N94-25145

RHODIUM ALLOYS

Reduction of nitric oxide over platinum, rhodium and platinum-rhodium single crystal surfaces [PB93-230092] p 2232 N94-23482

RIBLETS

Coherent structures over grooved surfaces [ETN-94-95308] p 2339 N94-25291

RIBONUCLEIC ACIDS

The torsion space nucleic acids molecular mechanics program DUPLEX: Surveying conformation space by potential energy minimization [DE94-002441] p 2563 N94-24567

RICCATI EQUATION

A mixed H2/H(infinity) function for a discrete time system [MEMO-COSOR-92-36] p 2480 N94-23144

Coordinate-free interpretations of the optimal costs for Lq problems subject to implicit systems [PB94-118700] p 2473 N94-23760

Control of nonlinear systems represented in quasilinear form [NASA-CR-194840] p 2475 N94-24760

RICE

Rice cultivation and methane emission: Documentation of distributed geographic data sets [NASA-TM-104595] p 2381 N94-24800

RIEMANN MANIFOLD

Lacunary series as quadratic differentials in conformal dynamics [PB93-238061] p 2481 N94-23547

Applications of supersymmetric quantum mechanics [ETN-94-95385] p 2570 N94-25257

Deviation equations of Synge and Schild in spaces with affine connection and metric, and equations for gravitational waves detectors [DE93-616852] p 2571 N94-25339

RIGID STRUCTURES

A structural design decomposition method utilizing substructuring [NASA-TM-107750] p 2376 N94-23368

Pressure wall patch [NASA-CASE-MFS-28724-1] p 2203 N94-23824

Numerical analysis of the motion of a rigid body with an attached spring-mass-damper [AD-A273825] p 2379 N94-25520

RINGS (MATHEMATICS)

Orbit spaces over commutative rings and projectives as semi-isomorphisms [DE93-616822] p 2493 N94-25473

RISK

Aeromedical disposition for coronary artery disease p 2423 N94-23316

Arterial hypertension and the aviator p 2425 N94-23328

Risk identification and reduction in integrated product teams p 2497 N94-24407

In vitro system for studying metabolism of environmental chemicals in human cells [AD-A273427] p 2421 N94-24688

A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure [AD-A273488] p 2427 N94-24950

Integrated risk management p 2588 N94-25361

RIVERS
Hydraulics and morphology of mountain rivers: A literature survey. Communications on hydraulic and geotechnical engineering
[PB94-110772] p 2388 N94-24636
RL-10 ENGINES
Extended duration lunar lander
[NASA-CR-195527] p 2206 N94-24916
RLC CIRCUITS
Study of a system for producing a pulsed magnetic field (B 2T) with a frequency of 50 Hz
[ISL-N-601/92] p 2314 N94-25460
ROADS
Estimation of delays and emissions at four-way junctions with different forms of regulation, principally four-way mandatory stop
[PB94-105236] p 2398 N94-23813
ROBOT ARMS
Control of a serpentine manipulator with collision avoidance p 2368 N94-23232
Telerobotic rendezvous and docking vision system architecture
[NASA-CR-191329] p 2204 N94-23828
HERA (Hermes robot arm) overview
p 2357 N94-24005
The development of the HERA Test Facility (HTF)
p 2197 N94-24020
Robust stability of second-order systems
[NASA-CR-195175] p 2488 N94-24564
Autonomous Space Processor for Orbital Debris (ASPOD)
[NASA-CR-195521] p 2204 N94-24621
Human-like robots for space and hazardous environments
[NASA-CR-195549] p 2365 N94-24703
Research experience for undergraduates in robotics and materials
[AD-A273659] p 2368 N94-25436
ROBOT CONTROL
Normal forms of kinematic singularities of 3R robot manipulators
[MEMO-1124] p 2469 N94-22712
Control of a serpentine manipulator with collision avoidance p 2368 N94-23232
Rack Insertion End Effector (RIEE) automation
p 2368 N94-23242
The robotic Mars rover p 2608 N94-23390
Sensing and modelling concepts for autonomous and remote mobile robot control p 2370 N94-23421
Bond graph modeling, simulation, and reflex control of the Mars planetary automatic vehicle
p 2370 N94-23424
Experiments with a small behaviour controlled planetary rover p 2371 N94-23427
Telerobotic rendezvous and docking vision system architecture
[NASA-CR-191329] p 2204 N94-23828
Ground operation of robotics on Space Station Freedom p 2371 N94-23841
Development of a force feedback anthropomorphic teleoperation input device for control of robot hands
[NASA-CR-195109] p 2437 N94-24329
Autonomous Space Processor for Orbital Debris (ASPOD)
[NASA-CR-195521] p 2204 N94-24621
Human-like robots for space and hazardous environments
[NASA-CR-195549] p 2365 N94-24703
Preliminary results on time-varying feedback stabilization of a nonholonomic car-like mobile robot
[INRIA-RR-1512] p 2475 N94-24963
Advanced control structures: A transputer-based multi-robot system
[RR-468] p 2446 N94-25313
ROBOT DYNAMICS
Normal forms of kinematic singularities of 3R robot manipulators
[MEMO-1124] p 2469 N94-22712
Motion planning for a non-holonomic mobile in a dynamic workspace
[ETN-94-95180] p 2470 N94-22898
Contribution to geometric and dynamic modeling of parallel robots
[LAAS-93089] p 2470 N94-22904
An architecture for teleprogramming autonomous mobile robots at task level
[LAAS-93107] p 2470 N94-22906
Perception and 3D environment modeling for mobile robot autonomous navigation
[LAAS-93117] p 2471 N94-22908
Walking, jumping, and tumbling: More than one way to get around Mars p 2370 N94-23419
Perspective of creation of means for collecting information concerning transport situation
p 2370 N94-23420
Sensing and modelling concepts for autonomous and remote mobile robot control p 2370 N94-23421
Physical modeling and dynamic simulation of planet vehicles: Application to the motion prediction
p 2371 N94-23426
Human-like robots for space and hazardous environments
[NASA-CR-195549] p 2365 N94-24703
Preliminary results on time-varying feedback stabilization of a nonholonomic car-like mobile robot
[INRIA-RR-1512] p 2475 N94-24963
Advanced control structures: A transputer-based multi-robot system
[RR-468] p 2446 N94-25313
Genetic-based motion planning for articulated robotic manipulators
[RR-476] p 2368 N94-25322
ROBOT SENSORS
An evaluation of three-dimensional sensors for the extravehicular activity helper/retreiver
p 2444 N94-25369
ROBOTICS
Normal forms of kinematic singularities of 3R robot manipulators
[MEMO-1124] p 2469 N94-22712
Motion planning for a non-holonomic mobile in a dynamic workspace
[ETN-94-95180] p 2470 N94-22898
Contribution to geometric and dynamic modeling of parallel robots
[LAAS-93089] p 2470 N94-22904
Plan generation for flexible assembly systems
[PB93-217974] p 2267 N94-22981
Spline screw multiple rotations mechanism
[NASA-CASE-GSC-13452-1] p 2352 N94-23078
Split spline screw
[NASA-CASE-GSC-13434-1] p 2352 N94-23082
NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-194678] p 2571 N94-23230
Rack Insertion End Effector (RIEE) automation
p 2368 N94-23242
Missions, Technologies, and Design of Planetary Mobile Vehicles
[ISBN-2-85428-331-7] p 2605 N94-23373
The study of the mobile lunar explorer
p 2607 N94-23389
The robotic Mars rover p 2608 N94-23390
Electrical power technology for robotic planetary rovers p 2314 N94-23401
Mechanical design of a planetary rover
p 2369 N94-23403
Conceptual design and architecture of hexapod robotic vehicles for the (L)OVLA project p 2369 N94-23405
Automation technology for remote sample acquisition
p 2369 N94-23407
Evolving directions in NASA's planetary rover requirements and technology p 2370 N94-23414
Towards real-time stereovision systems for planetary missions p 2370 N94-23422
Mobility analysis, simulation, and scale model testing for the design of wheeled planetary rovers
p 2370 N94-23425
Lunar exploration rover program developments
[DE93-040759] p 2613 N94-23469
The instant sequencing task: Toward constraint-checking a complex spacecraft command sequence interactively p 2504 N94-23875
The Fifth European Space Mechanisms and Tribology Symposium
[ESA-SP-334] p 2355 N94-23985
Multipurpose clamping device with electrical connector for in orbit attachment of payloads p 2361 N94-24035
Human-like robots for space and hazardous environments
[NASA-CR-195549] p 2365 N94-24703
Design of a wheeled articulating land rover
[NASA-CR-195520] p 2365 N94-24806
Object recognition through image understanding for an autonomous mobile robot
[AD-A273206] p 2475 N94-24862
Design of a walking robot
[NASA-CR-195200] p 2367 N94-25274
Advanced control structures: A transputer-based multi-robot system
[RR-468] p 2446 N94-25313
An evaluation of three-dimensional sensors for the extravehicular activity helper/retreiver
p 2444 N94-25369
Robotics in a controlled, ecological life support system
p 2444 N94-25371
Research experience for undergraduates in robotics and materials
[AD-A273659] p 2368 N94-25436
ROBOTS
Normal forms of kinematic singularities of 3R robot manipulators
[MEMO-1124] p 2469 N94-22712
Plan generation for flexible assembly systems
[PB93-217974] p 2267 N94-22981
Graphical programming: A systems approach for telerobotic servicing of space assets
[DE93-019016] p 2472 N94-23201
Missions, Technologies, and Design of Planetary Mobile Vehicles
[ISBN-2-85428-331-7] p 2605 N94-23373
Lunar science strategy: Exploring the Moon with humans and machines p 2605 N94-23376
Robotic exploration of Moon and Mars
p 2606 N94-23379
Mission and system concepts for Mars robotic precursor missions p 2608 N94-23391
Planetary rover locomotion mechanisms
p 2369 N94-23404
The remote-operated autonomous-robot concept: From deep sea to outer space applications
p 2370 N94-23413
Walking, jumping, and tumbling: More than one way to get around Mars p 2370 N94-23419
Sensing and modelling concepts for autonomous and remote mobile robot control p 2370 N94-23421
Experiments with a small behaviour controlled planetary rover p 2371 N94-23427
Human-like robots for space and hazardous environments
[NASA-CR-195549] p 2365 N94-24703
Design of a wheeled articulating land rover
[NASA-CR-195520] p 2365 N94-24806
Object recognition through image understanding for an autonomous mobile robot
[AD-A273206] p 2475 N94-24862
Preliminary results on time-varying feedback stabilization of a nonholonomic car-like mobile robot
[INRIA-RR-1512] p 2475 N94-24963
Design of a walking robot
[NASA-CR-195200] p 2367 N94-25274
A soft robot interface
[OUEL-1948/92] p 2463 N94-25468
ROBUSTNESS (MATHEMATICS)
Nonlinear state space H(sub infinity) control theory
[MEMO-1119] p 2469 N94-22706
Identification for robust control using an H(sub infinity) norm
[EUT-92-E-261] p 2470 N94-22873
A reliable algorithm for optimal control synthesis
[NASA-CR-194809] p 2472 N94-23332
Descent and landing phase: Vision based robust spacecraft motion estimation and elevation modeling
p 2608 N94-23394
Failure-proof estimation under conditions of lack of information p 2158 N94-24267
Parametric uncertainty reduction in robust multivariable control
[AD-A273412] p 2460 N94-24927
Parametric uncertainty modeling for application to robust control p 2163 N94-25103
Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108
Practical evaluation of robust control for a class of nonlinear mechanical dynamic systems
[ISBN-9-03-860092-5] p 2475 N94-25224
ROCK INTRUSIONS
The transition from diapirism to dike intrusion: Implications for planetary volcanism
[NASA-CR-195133] p 2403 N94-24580
ROCKET ENGINE CASES
Impact damage in filament wound composite bottles
p 2231 N94-24421
Evaluation of advanced materials through experimental mechanics and modelling p 2374 N94-24454
Assessment of impact damage of composite rocket motor cases
[NASA-CR-195143] p 2220 N94-24595
Lightning tests and analyses of tunnel bond straps and shielded cables on the Space Shuttle solid rocket booster
[NASA-CR-193921] p 2200 N94-24801
ROCKET ENGINE DESIGN
Dual-bell altitude compensating nozzles
p 2215 N94-23057
Liquid rocket propulsion: Retrospective and prospects
p 2154 N94-24243
A minimum cost tolerance allocation method for rocket engines and robust rocket engine design
p 2222 N94-24419
Performance of the NASA cm ion thruster
[NASA-TM-106426] p 2221 N94-24770
ROCKET ENGINES
Small rocket research and technology
p 2211 N94-23038

An experimental study of characteristic combustion-driven flows for CFD validation p 2212 N94-23040
Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055
Brush seals for cryogenic applications p 2216 N94-23063
Reduction of the anode fall in a coaxial plasma thruster with an applied magnetic nozzle [DE94-000670] p 2218 N94-23283
An overview on the main available ceramic composites and their processing routes p 2255 N94-24229
The 33rd Israel Annual Conference on Aviation and Astronautics [ITN-94-85227] p 2153 N94-24241
A minimum cost tolerance allocation method for rocket engines and robust rocket engine design p 2222 N94-24419
Controller modeling and evaluation for PCV electro-mechanical actuator p 2371 N94-24441
Conceptual design of a two stage to orbit spacecraft [NASA-CR-195536] p 2204 N94-24620

ROCKET EXHAUST
Flame trench analysis of NLS vehicles p 2199 N94-23249
Development of an analytical-numerical model to predict radiant emission or absorption [NASA-CR-194860] p 2453 N94-23624
Using neural networks to assist in OPAD data analysis p 2477 N94-24452
Preliminary far-field plume sputtering characterization of the Stationary Plasma Thruster (SPT-100) [NASA-TM-106464] p 2221 N94-24766

ROCKET NOZZLES
Two stage turbine for rockets p 2215 N94-23059
Postflight hardware evaluation RSRM-29 (STS-54). Appendix D: Nozzle postfire data [NASA-CR-193898] p 2199 N94-24057
Postflight hardware evaluation RSRM-29 (STS-54). Appendix C: Nozzle PFORs [NASA-CR-193894] p 2219 N94-24064
Final postflight hardware evaluation report RSRM-32 (STS-57) [NASA-CR-193903] p 2200 N94-24065
Postflight hardware evaluation RSRM-29 (STS-54). Appendix E: Insulation postfire data [NASA-CR-193897] p 2200 N94-24067
Properties and processing characteristics of low density carbon cloth phenolic composites p 2231 N94-24450
Postflight hardware evaluation 360T021 (RSRM-21, STS-45), revision A [NASA-CR-193904] p 2201 N94-24965

ROCKET PROPELLANTS
Design of a lunar propellant processing facility. NASA/USRA advanced program [NASA-CR-195502] p 2266 N94-24618
Embodiment design for a multipropellant resistojet [NASA-CR-195505] p 2221 N94-24834

RODS
Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281

ROLL
A study of roll attractor and wing rock of delta wings at high angles of attack p 2164 N94-25111

ROLL FORMING
Weld cladding of hard surfaces [PB93-201598] p 2353 N94-23448
Lubrication in cold rolling: Numerical simulation using multigrid techniques [ISBN-9-09-005313-1] p 2262 N94-25230

ROLLER BEARINGS
NASA/Army rotorcraft transmission research, a review of recent significant accomplishments [NASA-TM-106508] p 2367 N94-25181

ROLLERS
Electromagnetic brake/clutch device [NASA-CASE-GSC-13502-1] p 2354 N94-23969

ROLLING CONTACT LOADS
Rail Corrugations [ILR-BER-59] p 2269 N94-23581
A rail corrugation theory which allows for contact patch size p 2269 N94-23582
A rail joint: The possible initiator of corrugation? p 2269 N94-23583
A linear model for corrugation and its limit of validity p 2269 N94-23584
Lateral high frequency oscillations and stability of a wheel rolling on a flexible track p 2269 N94-23585
Wear characteristics of technical dry rolling/sliding systems with relations to corrugation problems p 2269 N94-23586
Surface observations of stick-slip oscillations in tightly conformal wheel/rail contacts p 2270 N94-23588
Contact analysis of rough rail surfaces p 2270 N94-23589

ROLLING MOMENTS
Wear characteristics of technical dry rolling/sliding systems with relations to corrugation problems p 2269 N94-23586

RONCHI TEST
Design of a surface deformation measuring instrument for the Surface Tension Driven Convection Experiment (STDCE-2) [NASA-CR-194758] p 2343 N94-23285

ROOM TEMPERATURE
Selective hydrogen separation by palladium-based composite membranes [PB93-201671] p 2254 N94-23431
Laser-deposited biocompatible films and methods and apparatuses for producing same [AD-D016017] p 2350 N94-24952

ROOT-MEAN-SQUARE ERRORS
Integer cosine transform compression for Galileo at Jupiter: A preliminary look p 2292 N94-23266
Development and validation of RNG methodology for compressible turbulence [AD-A273469] p 2337 N94-24929

ROOTS OF EQUATIONS
A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667

ROSAT MISSION
Shocked clouds in the Cygnus Loop [NASA-CR-195190] p 2600 N94-25178
ROSAT observations of the x ray binary HD 154791 [NASA-CR-195189] p 2600 N94-25198
Investigation relative to the Roentgen Satellite (ROSAT) [NASA-CR-195192] p 2600 N94-25269
ROSAT mission planning using artificial intelligence methods [DLR-FB-93-14] p 2476 N94-25345

ROTARY WING AIRCRAFT
The future of rotary-wing aircraft p 2185 N94-25070
NASA/Army rotorcraft transmission research, a review of recent significant accomplishments [NASA-TM-106508] p 2367 N94-25181

ROTARY WINGS
Bent-tip blade for aircraft rotary-wing [CA-PATENT-1-315-259] p 2176 N94-23254
An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel [NASA-TM-106471] p 2166 N94-23299
The influence of elastic pitch variations on helicopter flight mechanics p 2161 N94-24286
Validation of the ROTAC code for the rotor noise prediction [PB93-204311] p 2529 N94-24514
Wind tunnel test of a variable-diameter tiltrotor (VDTR) model [NASA-CR-177629] p 2181 N94-24796
Dynamic analysis of pretwisted elastically-coupled rotor blades [NASA-TM-109070] p 2378 N94-24839
Study of the blade/vortex interaction: Acoustics, aerodynamics and models [ISL-R-104/92] p 2340 N94-25463

ROTATING FLUIDS
Acoustic and optical investigations of superfluid He-3 [PB93-224889] p 2523 N94-23101
Investigation of the asymptotic state of rotating turbulence using large-eddy simulation p 2330 N94-24152
Transient flows occurring during the accelerated crucible rotation technique [DE93-617049] p 2567 N94-25422

ROTATING SHAFTS
Viscous rotary damper p 2361 N94-24031
A novel rotary actuator for spacecraft p 2361 N94-24034

ROTATING STALLS
Analysis and characteristics of compressor stall precursor signals in forward and AFT swept high speed compressor [AD-A273820] p 2171 N94-25517

ROTATION
Spline screw multiple rotations mechanism [NASA-CASE-GSC-13452-1] p 2352 N94-23078
Projectile transverse motion and stability in electromagnetic induction launchers [DE94-001557] p 2198 N94-23210
Results of a laboratory experiment that tests rotating unbalanced-mass devices for scanning gimbaled payloads and free-flying spacecraft [NASA-TP-3458] p 2269 N94-23574

ROTATIONAL SPECTRA
Laboratory detection of C5S by pulsed-discharge-nozzle Fourier-transform microwave spectroscopy [JTN-94-80519] p 2235 N94-24984
CO-to-H2 conversion factor in dwarf irregular galaxies [REPT-333] p 2603 N94-24985
The Nobeyama millimeter array survey for protoplanetary disks around protostar candidates and T Tauri stars in Taurus [REPT-336] p 2604 N94-24987

ROTATIONAL STATES
Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects [NASA-CR-195126] p 2534 N94-24487

ROTOR AERODYNAMICS
Computation of the loads on the AH-1/OLS model rotor in forward flight and comparison with wind tunnel tests [ISL-CO-230/92] p 2176 N94-23146
The influence of elastic pitch variations on helicopter flight mechanics p 2161 N94-24286
Validation of the ROTAC code for the rotor noise prediction [PB93-204311] p 2529 N94-24514
A parametric study of harmonic rotor hub loads [NASA-CR-4558] p 2181 N94-24726
Two-dimensional CFD modeling of wave rotor flow dynamics [NASA-TM-106261] p 2189 N94-25185
Study of the blade/vortex interaction: Acoustics, aerodynamics and models [ISL-R-104/92] p 2340 N94-25463

ROTOR BLADES
The influence of elastic pitch variations on helicopter flight mechanics p 2161 N94-24286
Dynamic analysis of pretwisted elastically-coupled rotor blades [NASA-TM-109070] p 2378 N94-24839

ROTOR BLADES (TURBOMACHINERY)
Simulation of unsteady flows through stator and rotor blades of a gas turbine using the Chimera method p 2323 N94-23652

ROTOR BODY INTERACTIONS
Influence of backup bearings and support structure dynamics on the behavior of rotors with active supports [NASA-CR-195106] p 2365 N94-24751

ROTOR DYNAMICS
A technique to measure rotordynamic coefficients in hydrostatic bearings p 2215 N94-23061
A parametric study of harmonic rotor hub loads [NASA-CR-4558] p 2181 N94-24726
Influence of backup bearings and support structure dynamics on the behavior of rotors with active supports [NASA-CR-195106] p 2365 N94-24751
Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades [NASA-TM-108758] p 2182 N94-24953
A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 1: Model development and applications [NASA-CR-193916] p 2366 N94-24998
A finite-element-based perturbation model for the rotordynamic analysis of shrouded pump impellers: Part 2: User's guide [NASA-CR-193917] p 2366 N94-24999

ROTOR SPEED
An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel [NASA-TM-106471] p 2166 N94-23299

ROTORS
Sensorless, brushless motor to drive a sealed freon-ammonia pump p 2315 N94-24036
Influence of backup bearings and support structure dynamics on the behavior of rotors with active supports [NASA-CR-195106] p 2365 N94-24751
Two-dimensional CFD modeling of wave rotor flow dynamics [NASA-TM-106261] p 2189 N94-25185
Analysis and characteristics of compressor stall precursor signals in forward and AFT swept high speed compressor [AD-A273820] p 2171 N94-25517

ROVING VEHICLES
Missions, Technologies, and Design of Planetary Mobile Vehicles [ISBN-2-85428-331-7] p 2605 N94-23373
Soviet developments of planet rovers in period of 1964 - 1990 p 2369 N94-23374
Rover requirements for the planet surface segment of the space exploration initiative p 2369 N94-23377
Robotic exploration of Moon and Mars p 2606 N94-23379
Science strategy for Mars exploration p 2606 N94-23380
Mars 96 small rover: Mission strategy p 2606 N94-23381
A reference Martian mission for a long range rover p 2606 N94-23382
Science objectives for short-range rovers on Mars p 2606 N94-23383
Prospects for using mobile vehicles in missions to Mars and other planets p 2607 N94-23384
The robotic Mars rover p 2608 N94-23390

Mission and system design of a long range rover mission p 2608 N94-23392
Mars 96 rover: Science, instrumentation, and control p 2369 N94-23395
Rover in the Mars 96 mission p 2609 N94-23397
The new family of JPL planetary surface vehicles p 2369 N94-23398
Feasibility study of an automatic vehicle for planetary exploration p 2369 N94-23399
Rover: Autonomous concepts for Mars exploration p 2369 N94-23400
Electrical power technology for robotic planetary rovers p 2314 N94-23401
Development/drilling test of auger boring machine on board Mars rover for Mars exploration p 2369 N94-23402
Mechanical design of a planetary rover p 2369 N94-23403
Planetary rover locomotion mechanisms p 2369 N94-23404
Carbon monoxide fuel cells as a source for Mars rover electric power p 2314 N94-23409
The mass of massive rover software p 2464 N94-23410
Machines for moving in soil p 2369 N94-23411
Evolving directions in NASA's planetary rover requirements and technology p 2370 N94-23414
Dual rover concept for Mars exploration p 2370 N94-23415
Results of the Mojave tests of the Mars 96 rover p 2370 N94-23416
Mars 96 rover: Technical vision and navigation p 2370 N94-23417
Marsohkod movement control p 2370 N94-23418
Walking, jumping, and tumbling: More than one way to get around Mars p 2370 N94-23419
Perspective of creation of means for collecting information concerning transport situation p 2370 N94-23420
Sensing and modelling concepts for autonomous and remote mobile robot control p 2370 N94-23421
Towards real-time stereovision systems for planetary missions p 2370 N94-23422
A DTM-based path planning method for planetary rovers p 2370 N94-23423
Bond graph modeling, simulation, and reflex control of the Mars planetary automatic vehicle p 2370 N94-23424
Mobility analysis, simulation, and scale model testing for the design of wheeled planetary rovers p 2370 N94-23425
Physical modeling and dynamic simulation of planet vehicles: Application to the motion prediction p 2371 N94-23426
Experiments with a small behaviour controlled planetary rover p 2371 N94-23427
Operations concepts for Mars missions with multiple mobile spacecraft p 2501 N94-23852
Human-like robots for space and hazardous environments [NASA-CR-195549] p 2365 N94-24703
Design of a wheeled articulating land rover [NASA-CR-195520] p 2365 N94-24806

RUBIDIUM
Matter-wave interferometry with laser cooled atoms [AD-A273249] p 2536 N94-24717

RUDDERS
Cockpit control system conceptual design [NASA-CR-195543] p 2190 N94-24551

RUN TIME (COMPUTERS)
Linear time algorithm to schedule trees with communication delays optimally on two machines [PB93-237782] p 2451 N94-23441
Object distribution in orca using compile-time and run-time techniques [PB94-110574] p 2453 N94-23745
Runtime support and compilation methods for user-specified data distributions [NASA-CR-191587] p 2458 N94-24679

RUNGE-KUTTA METHOD
A multigrid multiblock solver for compressible turbulent flow [MEMO-1125] p 2315 N94-22713
Computation of propulsion-related flowfields using unstructured adaptive meshes p 2215 N94-23056
Reliability enhancement of Navier-Stokes codes through convergence enhancement p 2216 N94-23064
The theoretical accuracy of Runge-Kutta time discretizations for the initial boundary value problem: A careful study of the boundary error [NASA-CR-191561] p 2480 N94-23272
Differential algebraic equations [PB93-237618] p 2481 N94-23455
Compressible turbulent flow simulation with a multigrid multiblock method p 2342 N94-23694

RUNWAY CONDITIONS
The 94 GHz MMW imaging radar system p 2306 N94-25493

RUNWAYS
Performance of prefabricated geocomposite subdrainage system in an airport runway [DOT/FAA/RD-93/23] p 2192 N94-23303
Airport pavement test machine design and cost study [DOT/FAA/CT-93/51] p 2192 N94-24072

RUPTURING
Mechanical behavior of CMCs: Crack growth resistance and creep aspects p 2256 N94-24235
Ceramic matrix composite parts design p 2256 N94-24237

RURAL AREAS
Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop [PB93-220135] p 2407 N94-23129

RUSSIAN FEDERATION
Satellite communications systems and technology. Executive Summary [NASA-TM-109388] p 2293 N94-23622
Satellite communications systems and technology. Volume 1: Analytical chapters [NASA-TM-109398] p 2293 N94-23627

S

S WAVES
Measurements and modeling of multitone, low-frequency acoustic data from the Arraial do Cabo range [AD-A273406] p 2530 N94-25073
Downward extrapolation of multi-component seismic data [ISBN-9-09-005213-5] p 2405 N94-25229
Decomposition of multi-component measurements into P and S waves [ISBN-9-09-005197-X] p 2405 N94-25251
Parametric and nonparametric discriminants for regional earthquakes and explosions [AD-A273807] p 2406 N94-25538

S-2 AIRCRAFT
S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270

SADDLE POINTS
The cusp horseshoe and its bifurcations in the unfolding of an inclination-flip homoclinic orbit [W-9307] p 2480 N94-23141
Magnetic field-induced saddle point in GaAs/AlGaAs short period superlattices [REPT-A-2656] p 2568 N94-25515

SADDLES
The cusp horseshoe and its bifurcations in the unfolding of an inclination-flip homoclinic orbit [W-9307] p 2480 N94-23141

SAFETY
GPHS-RTG's in support of the Cassini mission [DE94-001445] p 2218 N94-23459
Impacts: NIST Building and Fire Research Laboratory (technical and societal) [PB94-113420] p 2270 N94-23737
An automated tool to facilitate code translation for software fault tree analysis [AD-A273205] p 2457 N94-24556
Waste minimization/pollution prevention at R/D facilities: A cradle-to-grave tracking and information system that will be implemented at Sandia National Laboratories [DE93-040330] p 2591 N94-24607

SAFETY DEVICES
Composite material impregnation unit [NASA-TM-107751] p 2254 N94-23486
Reach performance while wearing the Space Shuttle launch and entry suit during exposure to launch accelerations p 2436 N94-24204
Studies of Shuttle orbiter arrestment system [NASA-TP-3370] p 2177 N94-24304

SAFETY FACTORS
Specifying design conservatism: Worst case versus probabilistic analysis p 2374 N94-23939

SAFETY MANAGEMENT
Safety guidelines for the operation of the DREO 10 m EMP simulator DREMPS [DREO-TN-93-5] p 2193 N94-24117
TEM cell safety report [DREO-TN-93-9] p 2193 N94-24123
Collaborating with our customers: NIST building and fire research laboratory [PB94-110194] p 2272 N94-24955

SALINITY
A two-dimensional dispersion module for the TOUGH2 simulator [DE94-002262] p 2335 N94-24655
Examination of the physical, electrical, and microwave evolution of water into young sea ice [AD-A273559] p 2418 N94-24918

SAMARIUM
Comparative M-H characteristics of 1-5 and 2-17 type samarium-cobalt permanent magnets to 300 C [NASA-CR-194440] p 2312 N94-24870

SAMPLERS
Automation technology for remote sample acquisition p 2369 N94-23407

SAMPLING
Subset selection with a generalized selection goal based on a loss function [PB94-111192] p 2494 N94-23798
Verification and validation of models [PB94-110566] p 2456 N94-24507
Two-stage versus sequential sample-size determination in regression analysis of simulation experiments [PB94-110558] p 2495 N94-24634

SANDWICH STRUCTURES
Mechanical and thermal buckling analysis of sandwich panels under different edge conditions [NASA-TM-4535] p 2228 N94-23514

SAPPHIRE
High pressure Hugoniot of sapphire [DE94-001048] p 2558 N94-22946
Surface modification of sapphire for enhanced infrared window performance [DE94-000333] p 2543 N94-23458

SARSAT
The space operations at CNES p 2498 N94-23837

SATELLITE ALTIMETRY
Modes of ocean variability in the tropical Pacific as derived from Geosat altimetry [MPIM-103] p 2382 N94-23158
The effect of sub-surface volume scattering on the accuracy of ice-sheet altimeter retracking algorithms [NASA-CR-194825] p 2386 N94-24060

SATELLITE ANTENNAS
Investigations into deployment complications of the ERS-1 SAR antenna p 2305 N94-23996
Data relay system satellite: The development of an antenna pointing mechanism for the inter-orbit link antenna p 2359 N94-24015

SATELLITE ATTITUDE CONTROL
A combined Earth scanner and momentum wheel for attitude determination and control of small spacecraft p 2208 N94-24022
Reactive thrust cruise for a geosynchronous satellite with minimum fuel consumption p 2158 N94-24271
Momentum management and torque distribution p 2159 N94-24272
The H(sub infinity) optimal controller design and reduction for the inertial hold mode of the attitude control system of the XTE spacecraft [NASA-CR-195137] p 2366 N94-24846

SATELLITE COMMUNICATION
ESA personal communications and digital audio broadcasting systems based on non-geostationary satellites p 2273 N94-22737
Direct broadcast satellite-radio, space-segment/receiver tradeoffs p 2273 N94-22738
Electrical performance of wire mesh for spacecraft deployable reflector antennas p 2275 N94-22744
US domestic and international regulatory issues p 2275 N94-22748
International organizations to enable world-wide mobile satellite services p 2275 N94-22749
The possibilities for mobile and fixed services in the 20/30 GHz frequency bands p 2276 N94-22752
Use of the 30/20 GHz band by multipurpose satellite systems p 2276 N94-22753
Interworking and integration of the Inmarsat Standard-M with Pan-European GSM system p 2277 N94-22759
MSAT and cellular hybrid networking p 2278 N94-22762
Trends in mobile satellite communication p 2278 N94-22763
Optimizing space constellations for mobile satellite systems p 2278 N94-22764
Geostationary payload concepts for personal satellite communications p 2278 N94-22765
Applicability of different onboard routing and processing techniques to mobile satellite systems p 2278 N94-22767
Study of LEO-SAT microwave link for broad-band mobile satellite communication system p 2279 N94-22769
ROCSAT-1 telecommunication experiments p 2279 N94-22770
ACTS broadband aeronautical experiment p 2279 N94-22771
The FAA satellite communications program p 2279 N94-22772
ACTS mobile SATCOM experiments p 2280 N94-22774

Cockpit weather graphics using mobile satellite communications p 2280 N94-22775
Using satellite communications for a mobile computer network p 2280 N94-22777
Evolution of INMARSAT systems and applications: The land mobile experience p 2280 N94-22779
ACTS advanced system concepts and experimentation p 2280 N94-22780
EUTELTRACS: The European experience on mobile satellite services p 2281 N94-22781
The ORBCOMM data communications system p 2281 N94-22782
Implementation of a system to provide mobile satellite services in North America p 2281 N94-22784
The Iridium (tm) system: Personal communications anytime, anyplace p 2281 N94-22785
The Globalstar mobile satellite system for worldwide personal communications p 2282 N94-22786
Odyssey personal communications satellite system p 2282 N94-22787
INMARSAT's personal communicator system p 2282 N94-22788
The European Mobile System (EMS) p 2282 N94-22789
Land mobile satellite propagation measurements in Japan using ETS-V satellite p 2282 N94-22790
Measurements on the satellite-mobile channel at L and S bands p 2282 N94-22791
K-band mobile propagation measurements using ACTS p 2283 N94-22792
Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793
A study of satellite motion-induced multipath phenomena p 2283 N94-22794
Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS p 2283 N94-22795
Propagation model for the Land Mobile Satellite channel in urban environments p 2283 N94-22796
The Westinghouse Series 1000 Mobile Phone: Technology and applications p 2284 N94-22800
First satellite mobile communication trials using BLQS-CDMA p 2284 N94-22801
Channel and terminal description of the ACTS mobile terminal p 2284 N94-22802
Low cost coherent demodulation for mobile satellite terminals p 2284 N94-22803
Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805
Improved frame synchronization schemes for INMARSAT-B/M SCPC and TDM channels p 2285 N94-22806
Estimation of frequency offset in mobile satellite modems p 2285 N94-22807
A pattern jitter free AFC scheme for mobile satellite systems p 2285 N94-22809
A CDMA synchronisation scheme p 2285 N94-22810
A protocol for satellite access via use of spot-beams p 2286 N94-22811
A high quality voice coder with integrated echo canceller and voice activity detector for mobile satellite applications p 2286 N94-22812
Performance of the unique-word-reverse-modulation type demodulator for mobile satellite communications p 2286 N94-22813
Transmission over EHF mobile satellite channels p 2287 N94-22820
Adaptive data rate control TDMA systems as a rain attenuation compensation technique p 2287 N94-22821
Development of a multilayer interference simulation program for MSS systems p 2287 N94-22823
Study on networking issues of medium earth orbit satellite communications systems p 2288 N94-22825
The design and networking of dynamic satellite constellations for global mobile communication systems p 2288 N94-22826
Low earth orbit satellite/terrestrial mobile service compatibility p 2288 N94-22827
A practical system for regional mobile satellite services p 2288 N94-22828
Supercomputer networking for space science applications
[NASA-CR-194876] p 2465 N94-23085
Phase linearity of the 914H coupled-cavity traveling wave tube
[NASA-CR-191056] p 2290 N94-23087
Satellite communications systems and technology. Executive Summary
[NASA-TM-109388] p 2293 N94-23622
Satellite communications systems and technology. Volume 1: Analytical chapters
[NASA-TM-109398] p 2293 N94-23627
Satellite communications systems and technology. Volume 2: Site reports
[NASA-TM-109399] p 2293 N94-23628
Advanced technology for a satellite multichannel demultiplexer/demodulator
[NASA-CR-194435] p 2202 N94-23631
Multi-access laser communications terminal
[NASA-CR-191251] p 2295 N94-23830
Commonality of flight control systems for support of European telecommunications missions p 2304 N94-23834
The European Space Agency standard for space packet utilisation p 2203 N94-23954
Generalized three-dimensional simulation of ferruled coupled-cavity traveling-wave-tube dispersion and impedance characteristics
[NASA-TP-3389] p 2310 N94-24056
Satellite communications system
[CA-PATENT-APPL-SN-2053597] p 2297 N94-24183
The 33rd Israel Annual Conference on Aviation and Astronautics
[ITN-94-85227] p 2153 N94-24241
Error coding simulations p 2306 N94-24439
Comparison of HF groundwave propagation models
[AD-A273146] p 2299 N94-24668
Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669
Bounds and simulation results of 32-ary and 64-ary quadrature amplitude modulation for broadband-ISDN via satellite
[NASA-TM-106484] p 2202 N94-25095
Conceptual communications system design in the 25.25-27.5 and 37.0-40.5 GHz frequency bands p 2306 N94-25379
Modeling of the ground-to-SSFMB link networking features using SPW p 2306 N94-25381

SATELLITE CONFIGURATIONS
Mobilesat (tm): A world first p 2281 N94-22783

SATELLITE CONSTELLATIONS
Optimizing space constellations for mobile satellite systems p 2278 N94-22764
The design and networking of dynamic satellite constellations for global mobile communication systems p 2288 N94-22826

SATELLITE CONTROL
Commonality of flight control systems for support of European telecommunications missions p 2304 N94-23834
SPOT4 Operational Control Center (CMP) p 2197 N94-23856
A quick uplink, expandable executable for the NSSC-1 of the Hubble Space Telescope p 2305 N94-23859
NASDA knowledge-based network planning system p 2508 N94-23898
Kalman filtering applied to real-time monitoring of apogee maneuvers p 2196 N94-23923
MERCATOR: Methods and Realization for Control of the Attitude and the Orbit of spacecraft p 2202 N94-23925
The geo-control system for station keeping and colocation of geostationary satellites p 2464 N94-23927
Operational training for the mission operations at the Brazilian National Institute for Space Research (INPE) p 2429 N94-23933
GenSAA: A tool for advancing satellite monitoring with graphical expert systems p 2516 N94-23945
Iowa satellite project ISAT-1
[NASA-CR-195517] p 2206 N94-24838

SATELLITE DESIGN
Aeronautical audio broadcasting via satellite p 2274 N94-22741
A system architecture for an advanced Canadian wideband mobile satellite system p 2278 N94-22766
GPHS-RTG's in support of the Cassini mission
[DE94-001445] p 2218 N94-23459
An engineering database management system for spacecraft operations p 2517 N94-23951
A combined Earth scanner and momentum wheel for attitude determination and control of small spacecraft p 2208 N94-24022
The Submillimeter Wave Astronomy Satellite (SWAS) solar array system p 2361 N94-24029
The 33rd Israel Annual Conference on Aviation and Astronautics
[ITN-94-85227] p 2153 N94-24241
NPS alternate techsat satellite, design project for AE-4871
[NASA-CR-195512] p 2204 N94-24590
A small satellite design for deep space network testing and training
[NASA-CR-195526] p 2205 N94-24702
Iowa satellite project ISAT-1
[NASA-CR-195517] p 2206 N94-24838
Preliminary design of a satellite observation system for Space Station Freedom
[NASA-CR-195514] p 2209 N94-24840

SATELLITE DOPPLER POSITIONING
Mars 1994/1996: The French navigation tasks p 2195 N94-23924
Navigation of space VLBI missions: Radioastron and VSOP p 2513 N94-23926

SATELLITE GROUND SUPPORT
A European mobile satellite system concept exploiting CDMA and OBP p 2279 N94-22768
Kalman filtering applied to real-time monitoring of apogee maneuvers p 2196 N94-23923
The European Space Agency standard for space packet utilisation p 2203 N94-23954

SATELLITE GUIDANCE
Real-time on-board orbit determination with DORIS p 2196 N94-23919
TOPEX/Poseidon precision orbit determination production and expert system p 2196 N94-23920

SATELLITE IMAGERY
The AGRHYMET data communications project p 2280 N94-22776
Computer assisted analysis of auroral images obtained from high altitude polar satellites
[NASA-CR-194873] p 2400 N94-23084
Application of ERS-1 active microwave instrumentation data to remote sensing of snow
[PB93-224756] p 2382 N94-23224
SeaWiFS technical report series. Volume 11: Analysis of selected orbit propagation models for the SeaWiFS mission
[NASA-TM-104566-VOL-11] p 2417 N94-23338
Image pattern recognition supporting interactive analysis and graphical visualization
[NASA-CR-194878] p 2451 N94-23369
The Far Ultraviolet (FUV) auroral imager for the Inner Magnetospheric Imager (IMI) mission: Options p 2209 N94-24453
An AVHRR cloud classification database typed by experts
[AD-A273560] p 2416 N94-25162

SATELLITE INSTRUMENTS
Instrument interface description for NOAA 2000 instruments with European morning spacecraft and/or NOAA-OPQ spacecraft
[NASA-TM-109406] p 2208 N94-23478
Command/telemetry bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems
[NASA-TM-109407] p 2208 N94-23479
Low rate data bus general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT polar satellite systems
[NASA-TM-109408] p 2208 N94-23480
Earth Observing System (EOS) Advanced Microwave Sounding Unit-A (AMSU-A) schedule plan
[NASA-CR-194856] p 2585 N94-23563
Mission planning for an Earth observation low Earth orbiter: ERS-1 p 2503 N94-23868
Science planning and sequencing for Cassini p 2504 N94-23871
Connecting science and operations: The operations coordinator p 2504 N94-23874
A combined Earth scanner and momentum wheel for attitude determination and control of small spacecraft p 2208 N94-24022
Hubble Space Telescope high speed photometer science verification test report
[NASA-CR-189322] p 2205 N94-24710
High energy collimating fine grids for HESP program
[NASA-CR-189317] p 2209 N94-24767

SATELLITE NAVIGATION SYSTEMS
Satellite autonomous navigation and orbit determination using magnetometers p 2156 N94-24258
Differential GPS for air transport: Status p 2162 N94-25100

SATELLITE NETWORKS
Internetworking satellite and local exchange networks for personal communications applications p 2276 N94-22755
Integration of mobile satellite and cellular systems p 2277 N94-22757
Interworking evolution of mobile satellite and terrestrial networks p 2277 N94-22758
Interworking and integration of the Inmarsat Standard-M with Pan-European GSM system p 2277 N94-22759
Architectures and protocols for an integrated satellite-terrestrial mobile system p 2277 N94-22760
Handover procedures in integrated satellite and terrestrial mobile systems p 2277 N94-22761
Optimizing space constellations for mobile satellite systems p 2278 N94-22764
A system architecture for an advanced Canadian wideband mobile satellite system p 2278 N94-22766

Applicability of different onboard routing and processing techniques to mobile satellite systems p 2278 N94-22767

The ORBCOMM data communications system p 2281 N94-22782

Implementation of a system to provide mobile satellite services in North America p 2281 N94-22784

The Iridium (tm) system: Personal communications anytime, anyplace p 2281 N94-22785

The Globalstar mobile satellite system for worldwide personal communications p 2282 N94-22786

The European Mobile System (EMS) p 2282 N94-22789

Global coverage Mobile Satellite Systems: System availability versus channel propagation impairments p 2284 N94-22798

First satellite mobile communication trials using BLQS-CDMA p 2284 N94-22801

Improved frame synchronization schemes for INMARSAT-B/M SCPC and TDM channels p 2285 N94-22806

Diversity reception for advanced multi-satellite networks: A CDMA approach p 2286 N94-22816

Development of a multilayer interference simulation program for MSS systems p 2287 N94-22823

Handover aspects for a Low Earth Orbit (LEO) CDMA Land Mobile Satellite (LMS) system p 2288 N94-22824

Study on networking issues of medium earth orbit satellite communications systems p 2288 N94-22825

The design and networking of dynamic satellite constellations for global mobile communication systems p 2288 N94-22826

Low earth orbit satellite/terrestrial mobile service compatibility p 2288 N94-22827

A practical system for regional mobile satellite services p 2288 N94-22828

Multi-access laser communications terminal [NASA-CR-191251] p 2295 N94-23830

SATELLITE OBSERVATION

The AGRHYMET data communications project p 2280 N94-22776

Land mobile satellite propagation measurements in Japan using ETS-V satellite p 2282 N94-22790

SeaWiFS technical report series. Volume 9: The simulated SeaWiFS data set, version 1 [NASA-TM-104566-VOL-9] p 2417 N94-23291

Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean [NASA-CR-194852] p 2408 N94-23542

Evaluating NOAA satellite products for global climate monitoring p 2384 N94-23604

Validating a large geophysical data set: Experiences with satellite-derived cloud parameters p 2385 N94-23615

Experience of the JPL Exploratory Data Analysis Team at validating HIRS2/MSU cloud parameters p 2385 N94-23616

An overview of the UARS data validation effort p 2386 N94-23617

SPOT4 Operational Control Center (CMP) p 2197 N94-23856

AGENDA: A task organizer and scheduler p 2504 N94-23876

The effect of sub-surface volume scattering on the accuracy of ice-sheet altimeter retracking algorithms [NASA-CR-194825] p 2386 N94-24060

Factors affecting the identification of phytoplankton groups by means of remote sensing [NASA-TM-108799] p 2387 N94-24403

Further studies to extend and test the area-time-integral technique applied to satellite data [NASA-CR-195132] p 2415 N94-24705

Optimal gains for a single polar orbiting satellite p 2208 N94-24873

SATELLITE ORBITS

The design and networking of dynamic satellite constellations for global mobile communication systems p 2288 N94-22826

Low earth orbit satellite/terrestrial mobile service compatibility p 2288 N94-22827

Improved thermal force modeling for GPS satellites p 2207 N94-23259

Real-time on-board orbit determination with DORIS p 2196 N94-23919

SATELLITE ORIENTATION

Momentum management and torque distribution p 2159 N94-24272

SATELLITE PERTURBATION

SeaWiFS technical report series. Volume 11: Analysis of selected orbit propagation models for the SeaWiFS mission [NASA-TM-104566-VOL-11] p 2417 N94-23338

Numerical simulation of Ulysses nutation p 2207 N94-24017

Spacecraft vibrations due to mechanisms; measurements from Olympus on-station p 2207 N94-24018

SATELLITE POWER TRANSMISSION

WISPER: Wirless Space Power Experiment [NASA-CR-195538] p 2396 N94-24701

Iowa satellite project ISAT-1 [NASA-CR-195517] p 2206 N94-24838

SATELLITE ROTATION

Momentum management and torque distribution p 2159 N94-24272

SATELLITE SOUNDING

Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean [NASA-CR-194852] p 2408 N94-23542

Uncertainties in climate data sets [NASA-CR-194848] p 2408 N94-23577

TOVS Pathfinder product validation and intercomparison p 2384 N94-23603

Experience of the JPL Exploratory Data Analysis Team at validating HIRS2/MSU cloud parameters p 2385 N94-23616

Convective organization in the Pacific ITCZ: Merging OLR, TOVS, and SSM/I information [NASA-CR-194850] p 2408 N94-23619

Cloud-free aerosol optical depth determination over oceans from satellite radiometry [DE94-001897] p 2386 N94-23779

Implementation of a state of the art automated system for the production of cloud/water vapor motion winds from geostationary satellites [NASA-CR-195087] p 2410 N94-24125

SATELLITE TRACKING

K- and Ka-band mobile-vehicular satellite-tracking reflector antenna system for the NASA ACTS mobile terminal p 2289 N94-22831

Microstrip monopulse antenna for land mobile communications p 2289 N94-22833

Aeronautical satellite antenna steering using magnetic field sensors p 2289 N94-22836

The Telecommunications and Data Acquisition Report [NASA-CR-194766] p 2290 N94-23256

A review of GPS-based tracking techniques for TDRS orbit determination p 2196 N94-23257

New approaches for tracking earth orbiters using modified GPS ground receivers p 2196 N94-23258

Beam-waveguide antenna servo design issues for tracking low earth-orbiting satellites p 2292 N94-23268

Ground data system for Space Flyer Unit (SFU) p 2207 N94-23860

Radioastron flight operations p 2502 N94-23861

Navigation of space VLBI missions: Radioastron and VSOP p 2513 N94-23926

Worldwide vessel locating and tracking system, volume 1 [PB93-193217] p 2175 N94-24474

SATELLITE TRANSMISSION

Design and implementation considerations of a MSAT packet data network p 2280 N94-22778

The ORBCOMM data communications system p 2281 N94-22782

The Iridium (tm) system: Personal communications anytime, anyplace p 2281 N94-22785

K-band mobile propagation measurements using ACTS p 2283 N94-22792

Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793

A study of satellite motion-induced multipath phenomena p 2283 N94-22794

Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS p 2283 N94-22795

Iowa satellite project ISAT-1 [NASA-CR-195517] p 2206 N94-24838

SATELLITE-BORNE INSTRUMENTS

Prospects for improved instrumentation on future solar space missions p 2624 N94-22843

The next Japanese solar satellite p 2625 N94-22846

Interferometer scan unit mechanism definition p 2358 N94-24012

SATURN (PLANET)

Science planning and sequencing for Cassini p 2504 N94-23871

The Jet Propulsion Laboratory space exploration: Past, present and future p 2153 N94-24242

SAWTOOTH WAVEFORMS

LHCD (low hybrid current drive) experiment on the HT-6B tokamak [DE93-613720] p 2555 N94-25331

SCALARS

A transport equation for the scalar dissipation in reacting flows with variable density: First results p 2331 N94-24157

SCALE HEIGHT

The influence of orography on the transport of atmospheric constituents p 2619 N94-24886

Data analysis and interpretation of lunar dust exosphere p 2623 N94-25349

SCALE MODELS

Extinguishment of enclosed gas fires with water sprays [PB93-201663] p 2268 N94-23430

SCALING LAWS

Strong interactions studies with medium energy probes [DE94-001446] p 2540 N94-23791

Rime-, mixed- and glaze-ice evaluations of three scaling laws [NASA-TM-106461] p 2173 N94-24047

SCANNERS

Results of a laboratory experiment that tests rotating unbalanced-mass devices for scanning gimbaled payloads and free-flying spacecraft [NASA-TP-3458] p 2269 N94-23574

Interferometer scan unit mechanism definition p 2358 N94-24012

High precision double four bar linkage mechanism for interferometric linear scanning p 2359 N94-24013

SCANNING

Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas [NASA-CR-195167] p 2301 N94-25005

SCANNING ELECTRON MICROSCOPY

Influence of sintering atmospheres on the aluminum sintering characteristics [DE93-632412] p 2239 N94-22965

Microstructural analysis of the 2195 aluminum-lithium alloy welds p 2251 N94-24448

LPCVD of InN on GaAs(110) using HN3 and TMIn: Comparison with Si(100) results [AD-A273555] p 2235 N94-24917

Scanning probe surface modification [AD-A273178] p 2346 N94-25151

SCANNING TUNNELING MICROSCOPY

JOVE NASA-FIT program: Microgravity and aeronomy projects [NASA-CR-195121] p 2631 N94-24493

The 2-D polymerized Langmuir-Blodgett films studied by STM [AD-A273542] p 2261 N94-24930

Scanning probe lithography. 2: Selective chemical vapor deposition of copper into scanning tunneling microscope-defined patterns [AD-A273304] p 2547 N94-25144

Use of scanning tunneling microscope in corrosion studies [VTT-TIED-1416] p 2250 N94-25346

SCATTERING

Conductors with small Fermi energies and small gap energies [DE93-040887] p 2561 N94-23432

Momentum loss in proton-nucleus and nucleus-nucleus collisions [NASA-TP-3405] p 2540 N94-24305

Integral equations for the microstructures of supercritical fluids [DE94-002460] p 2535 N94-24569

Behavior of the intermittency exponents and a quark-gluon plasma formation in the heavy ion collisions [DE93-616869] p 2541 N94-25342

SCATTERING AMPLITUDE

Momentum and coordinate space three-nucleon potentials [DE93-040868] p 2531 N94-22951

Application and development of the Schwinger multichannel scattering theory and the partial differential equation theory of electron-molecule scattering [NASA-CR-194774] p 2536 N94-24798

SCATTERING CROSS SECTIONS

Inelastic electron scattering from surfaces [DE94-001368] p 2531 N94-22733

Pions and neutrinos as probes of the nucleon and nuclear few-body system [DE93-040127] p 2531 N94-22928

B-quark production at hadron colliders [DE94-001459] p 2534 N94-23806

Optical spin polarization and state-sensitive detection of a cesium atomic beam [ATR-92(8436)-1] p 2534 N94-24077

SCATTERING FUNCTIONS

Propagation model for the Land Mobile Satellite channel in urban environments p 2283 N94-22796

SCENE ANALYSIS

Extracting heading and temporal range from optic flow: Human performance issues p 2442 N94-25510

Optical information in landing scenes p 2442 N94-25511

SCHEDULES

Linear time algorithm to schedule trees with communication delays optimally on two machines [PB93-237782] p 2451 N94-23441

Earth Observing System (EOS) Advanced Microwave Sounding Unit-A (AMSU-A) schedule plan [NASA-CR-194856] p 2585 N94-23563

Preemptive scheduling in a two-stage multiprocessor flow shop is Np-hard [PB94-111648] p 2467 N94-23756

Three, four, five, six or the complexity of scheduling with communication delays [PB94-111630] p 2467 N94-23767

The mission events graphic generator software: A small tool with big results p 2464 N94-23893

ESSOPE: Towards S/C operations with reactive schedule planning p 2508 N94-23896

Panel to review EOSDIS plans [NASA-CR-195088] p 2387 N94-24303

SCHEDULING

Personnel shift assignment: Existence conditions and network models [MEMO-1116] p 2585 N94-22704

Using genetic algorithms for scheduling data flow graphs [EUT-92-E-266] p 2449 N94-23169

Linear time algorithm to schedule trees with communication delays optimally on two machines [PB93-237782] p 2451 N94-23441

Preemptive scheduling in a two-stage multiprocessor flow shop is Np-hard [PB94-111648] p 2467 N94-23756

Framework for interactive solving of meta-constraint satisfaction problems [PB94-118825] p 2585 N94-23761

Three, four, five, six or the complexity of scheduling with communication delays [PB94-111630] p 2467 N94-23767

Mission planning for an Earth observation low Earth orbiter: ERS-1 p 2503 N94-23868

Integrating payload design, planning, and control in the Dutch Utilisation Centre p 2207 N94-23869

Techniques and software for optimum and efficient mission science sequence development p 2504 N94-23872

Connecting science and operations: The operations coordinator p 2504 N94-23874

AGENDA: A task organizer and scheduler p 2504 N94-23876

NASDA knowledge-based network planning system p 2508 N94-23898

Constraint-based scheduling p 2510 N94-23904

A method for interference mitigation in space communications scheduling p 2305 N94-23918

Mission and science activity scheduling language p 2515 N94-23938

An intelligent planning and scheduling system for the HST servicing missions p 2520 N94-23964

Scheduling the future NASA Space Network: Experiences with a flexible scheduling prototype p 2520 N94-23965

Software reuse in spacecraft planning and scheduling systems p 2520 N94-23966

Planning: Management of predictability and uncertainty and keeping abreast of developments p 2520 N94-23967

Design and specification of a centralized manufacturing data management and scheduling system p 2577 N94-24416

Compositional architecture for simple design formally specified in DESIRE [PB94-119013] p 2474 N94-24543

Sensitivity analysis of list scheduling heuristics [PB93-237766] p 2468 N94-24764

Class of strong valid inequalities for the discrete lot-sizing and scheduling problem [PB93-237774] p 2459 N94-24765

Multiprocessor scheduling with communication delays [ETN-94-95346] p 2468 N94-25221

Conflict-free trajectory planning for air traffic control automation [NASA-TM-108790] p 2174 N94-25272

ROSAT mission planning using artificial intelligence methods [DLR-FB-93-14] p 2476 N94-25345

SCHLIEREN PHOTOGRAPHY

An experimental study of the flow field surrounding a subsonic jet in a cross flow [NASA-CR-194770] p 2317 N94-23072

SCHMIDT NUMBER

A random distribution reacting mixing layer model [NASA-CR-194445] p 2187 N94-23552

SCHROEDINGER EQUATION

Periodic nonlinear Schroedinger equation and invariant measures [PB93-238012] p 2487 N94-23775

On the connection of classical mechanics, physical kinetics and quantum theory [DE93-616823] p 2570 N94-25207

SCIENTIFIC SATELLITES

Connecting science and operations: The operations coordinator p 2504 N94-23874

Mission engineering p 2505 N94-23881

SCIENTIFIC VISUALIZATION

Software for scientific visualization: State of the art and experiences [PB93-225183] p 2449 N94-23111

Visualization of results from meteorological simulations on CRAY [PB93-201358] p 2451 N94-23443

GLview user's guide [PB93-201366] p 2452 N94-23444

A knowledge based system for scientific data visualization [NASA-CR-194879] p 2452 N94-23507

Simultaneous simulation and visualization using DGL [PB93-201341] p 2453 N94-23534

Multimission image processing and science data visualization p 2518 N94-23955

A white paper: NASA virtual environment research, applications, and technology [NASA-TM-109682] p 2428 N94-24855

SCIENTISTS

Women scientists and engineers employed in industry: Why so few? A report based on a conference [ISBN-0-309-04991-1] p 2585 N94-24698

SCINTILLATION COUNTERS

New concepts for Hgl2 scintillator gamma ray spectroscopy [NASA-CR-194819] p 2233 N94-24113

The L3 visualization system and its use in the Z(zero) line shape analysis [ETN-94-95382] p 2537 N94-25231

Bottom quark production at the Z resonance [ISBN-9-09-006217-3] p 2538 N94-25255

The data-acquisition and second level trigger system for ZEUS calorimeter [ETN-94-95384] p 2541 N94-25256

CsI(Tl)-photodiode detectors for spectroscopy at low radiation levels [MPI-PHE/92-22] p 2314 N94-25457

SCREW DISLOCATIONS

Internal friction associated with dislocation relaxations in virgin martensite [PB93-226280] p 2240 N94-23119

SCREWS

Spline screw multiple rotations mechanism [NASA-CASE-GSC-13452-1] p 2352 N94-23078

Split spline screw [NASA-CASE-GSC-13434-1] p 2352 N94-23082

SEA ICE

The effect of sub-surface volume scattering on the accuracy of ice-sheet altimeter retracking algorithms [NASA-CR-194825] p 2386 N94-24060

Examination of the physical, electrical, and microwave evolution of water into young sea ice [AD-A273559] p 2418 N94-24918

National Academy of Sciences-Academy of Sciences of the USSR Workshop on the Mechanics of Ice and its Applications [AD-A273338] p 2419 N94-25088

SEA LEVEL

Modes of ocean variability in the tropical Pacific as derived from Geosat altimetry [MPIM-103] p 2382 N94-23158

Analysis of vulnerability to the impacts of sea level rise: A case study for The Netherlands [PB94-111150] p 2399 N94-24573

SEA WATER

Symbiosis in marine luminous bacteria [AD-A273540] p 2422 N94-24791

SEALING

Viscoelastic analysis of seals for extended service life p 2371 N94-24408

SEALS (STOPPERS)

An application of small-gap equations in sealing devices p 2325 N94-23668

Viscous rotary damper p 2361 N94-24031

Seal assembly [CA-PATENT-163126888] p 2364 N94-24128

Simulation of cryogenic turbopump annular seals p 2371 N94-24440

SEARCH PROFILES

A comparison of Boolean-based retrieval to the WAIS system for retrieval of aeronautical information [NASA-CR-4569] p 2594 N94-25487

SEARCH RADAR

Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors [AD-D016005] p 2302 N94-25058

SEAS

Survival suit for submarine personnel: Summary of evaluation studies [PB93-204634] p 2430 N94-23743

SEATS

Design of a recumbent seating system [NASA-CR-195503] p 2438 N94-24786

Full-scale fire testing of seat component materials [AD-A273499] p 2174 N94-24941

SECONDARY FLOW

CFD analyses of coolant channel flowfields p 2214 N94-23050

Improving diffusing S-duct performance by secondary flow control [NASA-TM-106492] p 2170 N94-25182

SECULAR VARIATIONS

Geomagnetic field models incorporating physical constraints on the secular variation [NASA-CR-195165] p 2405 N94-24854

SEDIMENT TRANSPORT

Hydraulics and morphology of mountain rivers: A literature survey. Communications on hydraulic and geotechnical engineering [PB94-110772] p 2388 N94-24636

Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887

SEDIMENTS

Hydraulics and morphology of mountain rivers: A literature survey. Communications on hydraulic and geotechnical engineering [PB94-110772] p 2388 N94-24636

SEISMIC WAVES

Dynamic ray tracing and its application in triangulated media [DE94-000875] p 2402 N94-23516

Near-surface seismic imaging [PB94-119096] p 2404 N94-24647

Downward extrapolation of multi-component seismic data [ISBN-9-09-005213-5] p 2405 N94-25229

Decomposition of multi-component measurements into P and S waves [ISBN-9-09-005197-X] p 2405 N94-25251

Parametric and nonparametric discriminants for regional earthquakes and explosions [AD-A273807] p 2406 N94-25538

SEISMOGRAMS

Dynamic ray tracing and its application in triangulated media [DE94-000875] p 2402 N94-23516

SEISMOLOGY

Seafloor characterization/Galapagos propagating rift [AD-A273586] p 2419 N94-25165

SELECTION

Some generalized subset selection procedures [PB94-111655] p 2487 N94-23799

Solving the ranking and selection indifference-zone formulation for normal distributions using computer software [AD-A273821] p 2496 N94-25518

SELECTIVE FADING

Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793

SELECTIVE SURFACES

Radar signature related radome techniques for flush-mounted HF-, VHF- and, UHF communication antennas [PB93-204618] p 2294 N94-23742

SELF ORGANIZING SYSTEMS

The adaptive resonance theory network: (Clustering-) behaviour in relation with brainstem auditory evoked potential patterns [EUT-92-E-264] p 2470 N94-22877

Evolving recurrent perceptrons [AD-A273241] p 2496 N94-24778

SEMANTICS

Formal verification of digital circuits described in VHDL [ETN-94-95165] p 2306 N94-22883

Asynchronous rendezvous in distributed logic programming [PB93-220614] p 2448 N94-23096

Transition system specifications in stalk format with bisimulation as a congruence [PB94-110608] p 2453 N94-23707

Multi-set extended relational algebra: A formal approach to a practical issue [PB94-110830] p 2486 N94-23725

Logic of capabilities [PB94-110715] p 2473 N94-23747

Design and specification of a generic task model for solving boolean constraint satisfaction problems [PB94-118841] p 2486 N94-23762

SEMICONDUCTOR DEVICES

A qualified radiation hardened nonvolatile memory for space and tactical weapons applications [DE94-001211] p 2559 N94-23186

Sensors for process control Focus Team report
[DE93-040897] p 2560 N94-23204
CRRES microelectronics package flight data analysis
[NASA-TP-3423] p 2540 N94-23273
A multigrid solver for the semiconductor equations
p 2482 N94-23674

SEMICONDUCTOR DIODES
Tunable lasers pumped by visible laser diodes
[AD-D016000] p 2350 N94-25044

SEMICONDUCTOR LASERS
SFOLDA: A semiconductor LDA for measurements in complex flows p 2316 N94-22856
Laser linewidth measurement in the presence of RIN and using the recirculating self heterodyne method
[EUT-92-E-262] p 2347 N94-22874
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064)
[DE94-002000] p 2347 N94-22974
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1
[AD-A271081] p 2348 N94-23123
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers
[DE94-002293] p 2350 N94-24659
Matter-wave interferometry with laser cooled atoms
[AD-A273249] p 2536 N94-24717
Tunable lasers pumped by visible laser diodes
[AD-D016000] p 2350 N94-25044
The effects of optical feedback on polarization of vertical cavity surface emitting lasers
[AD-A273728] p 2351 N94-25445

SEMICONDUCTORS (MATERIALS)
Ultraviolet photosulfidation of III-V compound semiconductors for electronic passivation
[DE94-001417] p 2555 N94-22717
Report of the Joint Seminar on Solid State Physics, Atomic and Molecular Physics, and Materials Science in the Energy Region of Tandem Accelerators
[DE93-508268] p 2548 N94-22924
Physics with chemically and isotopically pure semiconductors
[DE93-040120] p 2557 N94-22926
Sensors for process control Focus Team report
[DE93-040897] p 2560 N94-23204
Modulation characteristics of a high-power semiconductor Master Oscillator Power Amplifier (MOPA)
[NASA-TM-104577] p 2308 N94-23281
Microgravity sciences application visiting scientist program
[NASA-CR-194804] p 2267 N94-23287
Observation of non-centrosymmetry and determination of polarity in III-V semiconductors
[PB93-201416] p 2561 N94-23503
Contributions of DOE weapons labs and NIST to semicondutor technology
[OTA-ITE-585] p 2630 N94-23572
A multigrid solver for the semiconductor equations
p 2482 N94-23674
Magnetic resonance studies of 3d transition metal impurities in compound semiconductors
[PB93-232197] p 2243 N94-23714
Disorder effects on small-polaron formation and hopping
[DE94-001205] p 2534 N94-23804
Pulsed Ion Beam Surface Analysis (PIBSA) as a means of in-situ real-time analysis of thin films during growth
[DE94-001276] p 2562 N94-23805
Effects of thermal-solutal convection on temperature and solutal fields under various gravitational orientations
p 2267 N94-24451
Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers
[DE94-002293] p 2350 N94-24659
SEMATECH, a case study: Analysis of a government-industry partnership
[AD-A273166] p 2586 N94-24683
Method of fabricating a receptor-based sensor
[AD-D016026] p 2344 N94-24723
The 5th Engineering Foundation Conference: Advanced Heterostructure Transistors
[AD-A273508] p 2312 N94-24819
LPCVD of InN on GaAs(110) using HN3 and TMIn: Comparison with Si(100) results
[AD-A273555] p 2235 N94-24917
Conformal method of fabricating and optical waveguide on a semiconductor substrate
[AD-D015968] p 2546 N94-25043
An overview of the measurements of thermophysical properties and some results on molten superalloys and semiconductors p 2248 N94-25128
Effect of high frequency field on the transport properties of superlattice
[DE93-617047] p 2568 N94-25447

SENSORIMOTOR PERFORMANCE
The role of visual context in manual target localization
p 2429 N94-25351
Mechanisms of eye-hand coordination
[AD-A273687] p 2428 N94-25437

SENSORY DISCRIMINATION
Auditory spectro-temporal pattern analysis
[AD-A273554] p 2427 N94-24865
On the auditory discrimination of spectral shape
[ETN-94-95306] p 2530 N94-25289

SENSORY PERCEPTION
Interpretation of evolutive environment by a multisensory perception machine
[LAAS-93111] p 2471 N94-22907
A white paper: NASA virtual environment research, applications, and technology
[NASA-TM-109682] p 2428 N94-24855

SEPARATED FLOW
Experimental Methods in Separated Flows
[ILR-MITT-260(1991)] p 2315 N94-22852
Turbulence sensors for separated flows: Current capabilities, future requirements p 2315 N94-22853
Measurement of kinematically unstationary separated flows p 2315 N94-22854
Pressure oscillation measurements in turbulent flows
p 2316 N94-22855
Turbulent separated flows above an obstacle in an open channel p 2316 N94-22859
A method for recognition of frequency cells in a cylinder flow influenced by wall effects p 2316 N94-22860
Leading-edge votex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques
[NASA-TP-3374] p 2166 N94-23512
Computation of turbulent flows over backward and forward-facing steps using a near-wall Reynolds stress model p 2172 N94-24145
Large-eddy simulation of flow in a plane, asymmetric diffuser p 2328 N94-24147
Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis
[NASA-CR-194795] p 2335 N94-24640
A vorticity dynamics based model for the turbulent dissipation: Model development and validation
[NASA-TM-106177] p 2336 N94-24713

SEPARATORS
Capillary electrokinetic separations with optical detection
[DE94-001639] p 2233 N94-23716
Systematic construction of trigonometric neural networks
[PB93-200228] p 2474 N94-24544

SEPTUM
Aortic valve disease p 2424 N94-23322

SEQUENCING
Science planning and sequencing for Cassini
p 2504 N94-23871
A packet-based concept for spacecraft command planning p 2504 N94-23873
The instant sequencing task: Toward constraint-checking a complex spacecraft command sequence interactively p 2504 N94-23875
AGENDA: A task organizer and scheduler
p 2504 N94-23876

SEQUENTIAL ANALYSIS
On the asymptotically uniform distribution modulo 1 of extreme order statistics
[MEMO-COSOR-91-38-REV] p 2493 N94-23142

SEQUENTIAL COMPUTERS
A method for the general simultaneous full decomposition of sequential machines: Algorithms and implementation
[EUT-92-E-267] p 2445 N94-23170
Transputer benchmarks and performance comparisons with other computing machines
[RR-467] p 2446 N94-25312

SERIES (MATHEMATICS)
Incomplete corrections in nonlinear problems
[PB93-225746] p 2479 N94-23106

SERIES EXPANSION
Approximate optimal guidance for the advanced launch system
[NASA-CR-4568] p 2198 N94-24752

SERUMS
Non-invasive optical detection of glucose in cell culture nutrient medium p 2422 N94-25357

SERVICE LIFE
NASA Lewis advanced IPV nickel-hydrogen technology p 2392 N94-23356
New method for increasing machine service-life, phase 2
[PB93-200707] p 2354 N94-23533
Impacts: NIST Building and Fire Research Laboratory (technical and societal)
[PB94-113420] p 2270 N94-23737
Viscoelastic analysis of seals for extended service life
p 2371 N94-24408
Performance of the NASA cm ion thruster
[NASA-TM-106426] p 2221 N94-24770
Embodiment design for a multipropellant resistojet
[NASA-CR-195505] p 2221 N94-24834
General aviation activity survey
[AD-A273284] p 2162 N94-24923
Reliability analysis of a repairable dependent parallel system
[ETN-94-95312] p 2373 N94-25295
Modelling early failures in Space Station Freedom
p 2374 N94-25372
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 5B: Corrosion: General issues
[AD-A273667] p 2250 N94-25407

SERVICES
Service description of communication systems supporting multi-media multi-user applications
[PB94-110855] p 2299 N94-24650

SERVOMECHANISMS
Plan generation for flexible assembly systems
[PB93-217974] p 2267 N94-22981
Beam-waveguide antenna servo design issues for tracking low earth-orbiting satellites
p 2292 N94-23268
The Columbus solar array mechanisms
p 2356 N94-23994
GOLF mechanisms p 2357 N94-24003
High precision double four bar linkage mechanism for interferometric linear scanning p 2359 N94-24013

SET THEORY
Generalized concavity in cooperative game theory: Characterizations in terms of the core
[MEMO-1121] p 2497 N94-22708
Making some issues of implicit knowledge explicit
[PB93-220606] p 2478 N94-22984
Median stabilization degree of a median algebra
[PB93-220010] p 2479 N94-23093
Characterization of measures with a convex range: A generalization of Lyapounov's theorem
[PB93-220523] p 2523 N94-23094
Linear algorithm for flattening list graphs
[PB93-220648] p 2448 N94-23097
How much integral action can a control system tolerate?
[OUEL-1923/92] p 2471 N94-23147
When an infinitely-renormalizable endomorphism of the interval can be smoothed
[PB93-238087] p 2481 N94-23548
Medians and steiner trees
[PB94-110616] p 2486 N94-23708
Relational algebra and equational proofs
[PB94-110822] p 2486 N94-23724
Multi-set extended relational algebra: A formal approach to a practical issue
[PB94-110830] p 2486 N94-23725
Subset selection with a generalized selection goal based on a loss function
[PB94-111192] p 2494 N94-23798
Some generalized subset selection procedures
[PB94-111655] p 2487 N94-23799
Infinite divisible and stable distributions modulo 1
[PB94-110640] p 2495 N94-23815
Reduced game properties of egalitarian division rules for cooperative games
[PB94-111689] p 2521 N94-24523
On the continuity of limit capacity of central Cantor sets
[DE93-613022] p 2523 N94-25328
The least energy critical set
[DE93-616820] p 2493 N94-25434

SEYFERT GALAXIES
The 1404+286: A non-ideal calibrator for VLBI observations
[PB94-104908] p 2599 N94-24521

SHAFTS (MACHINE ELEMENTS)
A technique to measure rotordynamic coefficients in hydrostatic bearings p 2215 N94-23061
Spline screw multiple rotations mechanism
[NASA-CASE-GSC-13452-1] p 2352 N94-23078
An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel
[NASA-TM-106471] p 2166 N94-23299
Zone fire modeling with natural building flows and a zero order shaft model
[PB94-112166] p 2270 N94-23735
Electromagnetic brake/clutch device
[NASA-CASE-GSC-13502-1] p 2354 N94-23969
Opening mechanism for ISO/CVV cover release
p 2357 N94-24001

Precision drive and speed reduction device
[AD-D016004] p 2367 N94-25046

SHALLOW WATER

Measurements and modeling of multitone, low-frequency acoustic data from the Arraial do Cabo range
[AD-A273406] p 2530 N94-25073

Analysis of modal evolution caused by a weakly range-dependent seabed in shallow water and its application to inversion for geoacoustic properties
[AD-A273656] p 2419 N94-25435

SHAPE MEMORY ALLOYS

Recharge mechanism based on shape memory alloy
p 2362 N94-24039

SHAPES

Gas-pressure forming of superplastic ceramic sheet
[DE94-001520] p 2252 N94-22930

Perception in flight: Shape and motion perception, space perception, spatial orientation, and visual vestibular interaction p 2429 N94-23979

Polymer morphologh p 2226 N94-24353

SHEAR FLOW

The role of the radial electric field in confinement and transport in H-mode and VH-mode discharges in the DIII-D tokamak
[DE94-002746] p 2551 N94-23782

The production of premixed flame surface area in turbulent shear flow p 2237 N94-24158

Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160

Local isotropy in distorted turbulent boundary layers at high Reynolds number p 2332 N94-24166

A vorticity dynamics based model for the turbulent dissipation: Model development and validation
[NASA-TM-106177] p 2336 N94-24713

SHEAR LAYERS

A random distribution reacting mixing layer model
[NASA-CR-194445] p 2187 N94-23552

Effect of initial droplet-size distributions on fuel-vapor profiles in a shear-layer flow p 2160 N94-24283

Interactive control in turbulent shear layers
[AD-A273544] p 2336 N94-24793

The effects of profiles on supersonic jet noise
[NASA-CR-195184] p 2530 N94-25177

SHEAR PROPERTIES

Control of the internal stresses in plane elasticity
[PB93-225514] p 2374 N94-23112

Dynamic analysis of pretwisted elastically-coupled rotor blades
[NASA-TM-109070] p 2378 N94-24839

Test methods for composites: A status report. Volume 3: Shear test methods
[AD-A273561] p 2230 N94-25163

SHEAR STRENGTH

Relationship of microstructure and mechanical properties for V-Cr-Ti alloys
[DE94-001431] p 2238 N94-22718

The mechanical property data base from an Air Force/Industry Cooperative Test Program on advanced aluminum alloys (7064 and CW67)
[AD-A273741] p 2251 N94-25531

SHEAR STRESS

The use of near-wall hot-wire probes for time-resolved skin-friction measurements p 2316 N94-22857

Method of determining shear stress employing a monomer-polymer laminate structure
[NASA-CASE-LAR-14654-2] p 2375 N94-23308

Skin friction measurement in complex flows using thin oil film techniques
[NASA-CR-194872] p 2327 N94-24098

Role of interfaces on the cyclic fatigue behaviour of ceramic matrix composites p 2256 N94-24234

Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260

Evaluation of the fracture resistance and durability of adhesive bonded joints p 2160 N94-24278

Use of photostress to characterize the mechanical behavior of weldments
[NASA-CR-195201] p 2378 N94-25267

SHELL THEORY

Energy estimates and asymptotic analysis in the theory of shells
[PB93-225738] p 2374 N94-23113

SHELLS (STRUCTURAL FORMS)

Counterrotating aircraft propulsor blades
[CA-PATENT-1-319-357] p 2186 N94-23255

SHELTERS

Manned Mars mission on-orbit operations FTS capabilities assessment
[NASA-CR-189328] p 2430 N94-23080

SHIP HULLS

Hydro-elastic analysis using a selection of commercial analysis programs
[PB94-118734] p 2376 N94-24478

SHIPS

HERACLITUS, phase 1. Harbour Entrance of Rotterdam Radar based Current Related Information for Traffic Guidance of Ships: Feasibility of deriving current profile data from sea surface observations in the Rotterdam (Netherlands) port entrance
[BCRS-93-04] p 2417 N94-24107

Free-surface/vorticity interaction
[AD-A273263] p 2335 N94-24686

SHOCK ABSORBERS

Preloaded launch locking devices for SILEX
p 2358 N94-24008

Landing gear with swivelling beam
[CA-PATENT-1323020] p 2176 N94-24181

Design of a recumbent seating system
[NASA-CR-195503] p 2438 N94-24786

SHOCK FRONTS

Energy transfer in solid explosives
[DE94-001523] p 2265 N94-23778

The plastic response of a cylindrical shell subjected to an internal blast wave with a finite width shock front
p 2154 N94-24246

The scattering and collision of gravitational waves in Friedmann-Robertson-Walker open universes
[MATHS-REPT-A-193] p 2406 N94-25430

SHOCK LOADS

Bridgman's concern
[DE93-040900] p 2558 N94-22953

Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database Shock Physics Index
[DE94-001679] p 2589 N94-23126

Bibliographic Retrieval System (BARS). Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database. Volume 1: UNIX version query guide customized application for INGRES
[DE94-001703] p 2589 N94-23127

Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database, Shock Physics Index (SPHINX) database, Volume 2: UNIX version user's guide
[DE94-001704] p 2589 N94-23128

SHOCK TESTS

Method for simulating a vehicle shock test: Design and realization of the required implementation tools
[ECL-92-14] p 2352 N94-22885

SHOCK TUBES

An investigation on a new technique to improve the performance of the shock tube/tunnel testing in the equilibrium interface condition p 2154 N94-24247

SHOCK TUNNELS

Shock tunnel studies of scramjet phenomena, supplement 7
[NASA-CR-191572] p 2319 N94-23513

Shock tunnel studies of scramjet phenomena, supplement 8
[NASA-CR-191573] p 2320 N94-23532

An investigation on a new technique to improve the performance of the shock tube/tunnel testing in the equilibrium interface condition p 2154 N94-24247

SHOCK WAVE INTERACTION

Experimental investigation of generic three-dimensional sidewall-compression scramjet inlets at Mach 6 in tetrafluoromethane
[NASA-TM-4497] p 2319 N94-23339

Effects of shock strength on shock turbulence interaction p 2332 N94-24165

Shocked clouds in the Cygnus Loop
[NASA-CR-195190] p 2600 N94-25178

Two-dimensional CFD modeling of wave rotor flow dynamics
[NASA-TM-106261] p 2189 N94-25185

The scattering and collision of gravitational waves in Friedmann-Robertson-Walker open universes
[MATHS-REPT-A-193] p 2406 N94-25430

SHOCK WAVE PROPAGATION

The scattering and collision of gravitational waves in Friedmann-Robertson-Walker open universes
[MATHS-REPT-A-193] p 2406 N94-25430

SHOCK WAVES

High pressure Hugoniot of sapphire
[DE94-001048] p 2558 N94-22946

Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database Shock Physics Index
[DE94-001679] p 2589 N94-23126

Bibliographic Retrieval System (BARS). Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database. Volume 1: UNIX version query guide customized application for INGRES
[DE94-001703] p 2589 N94-23127

Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database, Shock Physics Index (SPHINX) database, Volume 2: UNIX version user's guide
[DE94-001704] p 2589 N94-23128

Shock-induced turbulent flow in baffle systems
[DE94-001532] p 2319 N94-23470

Calibration of HYPULSE for hypervelocity air flows corresponding to flight Mach numbers 13.5, 15, and 17
[NASA-CR-191578] p 2192 N94-23564

Energy transfer in solid explosives
[DE94-001523] p 2265 N94-23778

Multiple shock initiation of LX-17
[DE94-001524] p 2265 N94-23807

Heat pipe vapor dynamics
[NASA-CR-194217] p 2327 N94-24096

Effects of shock strength on shock turbulence interaction p 2332 N94-24165

Scientific study in solar and plasma physics relative to rocket and balloon projects
[NASA-CR-193885] p 2627 N94-24461

Characteristic method for one-dimensional scalar hyperbolic conservation laws with stiff source terms
[PB93-237675] p 2491 N94-24954

A continuing search for a near-perfect numerical flux scheme. Part 1: AUSM+
[NASA-TM-106524] p 2338 N94-25180

SHORT TAKEOFF AIRCRAFT

Aircraft digital flight control technical review
p 2163 N94-25106

SHORT WAVE RADIATION

Cloud-free aerosol optical depth determination over oceans from satellite radiometry
[DE94-001897] p 2386 N94-23779

SHOT PEENING

Feasibility study of shot-peening modeling
[CTN-94-60926] p 2244 N94-24170

SHRINKAGE

The use of expanding monomers in carbon fibre composites
[ISBN-0-315-83550-8] p 2226 N94-22890

Drying deformable media: Kinetics, shrinkage and stresses
[ETN-94-95314] p 2236 N94-25302

SHUTTLE IMAGING RADAR

Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software
p 2305 N94-23842

Precipitation measurement using SIR-C: A feasibility study
[NASA-CR-195104] p 2409 N94-24048

Precipitation measurement using SIR-C: A feasibility study. Investigation at nadir
[NASA-CR-195103] p 2410 N94-24126

SICKNESSES

Chronic obstructive pulmonary disease
p 2425 N94-23324

SIDEBANDS

Direct digital RF synthesis and modulation for MSAT mobile applications p 2285 N94-22804

SIGNAL ANALYSIS

Automatic modulation recognition based on spatial pattern classification using artificial neural networks
[CTN-94-60897] p 2296 N94-24115

Detection and analysis of unbalanced QPSK in Gaussian noise, version 1.0
[DREO-12-020.1] p 2296 N94-24131

On the analysis of clear air radar echoes severely contaminated by clutter p 2306 N94-24423

Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-195128] p 2388 N94-24827

Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194785] p 2389 N94-24856

SIGNAL ANALYZERS

Dimensional analysis of acoustically propagated signals p 2528 N94-24217

Some subjects in digital audio, noise shaping, sample rate conversion, dynamic range compression and testing
[ISBN-9-09-005162-7] p 2530 N94-25220

SIGNAL DETECTION

Detection and analysis of unbalanced QPSK in Gaussian noise, version 1.0
[DREO-12-020.1] p 2296 N94-24131

Effects of atmospheric variations on acoustic system performance p 2527 N94-24211

Auditory spectro-temporal pattern analysis
[AD-A273554] p 2427 N94-24865

Evolving neural network connectivity
[AD-A273134] p 2490 N94-24921

Choice of filters for the detection of gravitational waves from coalescing binaries. 2: Detection in coloured noise
[DE93-616844] p 2604 N94-25211

A parallel algorithm for filtering gravitational waves from coalescing binaries
[DE93-616845] p 2604 N94-25212

SIGNAL DETECTORS

The detection performance of a long-term spectral integrator using normalized and quantized data
[DREP-TM-93-11] p 2455 N94-24130

SIGNAL DISTORTION

Night vision devices and characteristics p 2432 N94-23982

SIGNAL ENCODING

Algorithms for speech coding systems based on linear prediction [EUT-92-E-260] p 2447 N94-22731

Encoders for space applications p 2363 N94-24046

SIGNAL FADING

Power attenuation characteristics as switch-over criterion in personal satellite mobile communications p 2277 N94-22756

ROCSAT-1 telecommunication experiments p 2279 N94-22770

Land mobile satellite propagation measurements in Japan using ETS-V satellite p 2282 N94-22790

K-band mobile propagation measurements using ACTS p 2283 N94-22792

Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS p 2283 N94-22795

Systems implications of L-band fade data statistics for LEO mobile systems p 2284 N94-22799

Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805

Separable concatenated codes with iterative map decoding for Rician fading channels p 2286 N94-22815

Diversity reception for advanced multi-satellite networks: A CDMA approach p 2286 N94-22816

SIGNAL GENERATORS

SATCOM simulator speeds MSS deployment and lowers costs p 2287 N94-22822

Digital test signal generation: An accurate SNR calibration approach for the DSN p 2305 N94-23912

System for producing synchronized signals [AD-D016003] p 2302 N94-25057

SIGNAL MEASUREMENT

The detection performance of a long-term spectral integrator using normalized and quantized data [DREP-TM-93-11] p 2455 N94-24130

SIGNAL PROCESSING

Algorithms for speech coding systems based on linear prediction [EUT-92-E-260] p 2447 N94-22731

Cockpit weather graphics using mobile satellite communications p 2280 N94-22775

Odyssey personal communications satellite system p 2282 N94-22787

Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805

Performance of the unique-word-reverse-modulation type demodulator for mobile satellite communications p 2286 N94-22813

Progress on the design of a data push architecture for an array of optimized time tagging pixels [DE93-041011] p 2307 N94-22955

A dataflow analysis tool for parallel processing of algorithms [NASA-TM-109054] p 2448 N94-23086

Spur-reduced digital sinusoid synthesis p 2291 N94-23264

System identification using a wavelet-based approach [DE94-002191] p 2293 N94-23473

Fault tolerant onboard packet switch architecture for communication satellites: Shared memory per beam approach [NASA-TM-106397] p 2201 N94-23567

The HDTV digital audio matrix [BBC-RD-1993/9] p 2295 N94-24085

Automatic modulation recognition based on spatial pattern classification using artificial neural networks [CTN-94-60897] p 2296 N94-24115

ASPT software source code: ASPT signal excision software package [CTN-94-60904] p 2296 N94-24133

ASPT software source code: Development system package, library component [CTN-94-60905] p 2455 N94-24134

ASPT software source code: ASPT application software package, VME-C30 component [CTN-94-60906] p 2455 N94-24135

Dimensional analysis of acoustically propagated signals p 2528 N94-24217

PROPWR: A versatile tool for 1/3 octave processing and narrowband line tracking [DREA-TC-93-303] p 2297 N94-24298

Device for the selective detection of objects [CA-PATENT-1-308-179] p 2544 N94-24489

Nondestructive evaluations [DE94-003020] p 2373 N94-24613

Heterodyne array for measurement of target velocity [AD-D016025] p 2545 N94-24722

Crosstie random access memory element having associated read/write circuitry [AD-D016027] p 2446 N94-24724

Conveying digital data in noisy, unstable, multipath environments [AD-D015980] p 2301 N94-25038

Bridge type optoelectronic sample and hold circuit [AD-D015986] p 2312 N94-25042

Preprocessor and adaptive beamformer for linear-frequency modulation active signals [AD-D016008] p 2302 N94-25048

System for cancelling phase noise in an interferometric fiber optic sensor arrangement [AD-D015994] p 2345 N94-25053

Method and apparatus of generating sum or difference signals corresponding to an apparent beam in a monopulse radar system [AD-D015998] p 2302 N94-25056

Method and apparatus for determining target elevation angle, altitude and range, and the like in a monopulse radar system with reduced multipath errors [AD-D016005] p 2302 N94-25058

Psychophysical and signal-processing aspects of speech representation [ETN-94-95292] p 2302 N94-25077

Wide bandwidth differential amplifier [AD-D015985] p 2303 N94-25217

Some subjects in digital audio, noise shaping, sample rate conversion, dynamic range compression and testing [ISBN-9-09-005162-7] p 2530 N94-25220

On the quality of synthetic speech evaluation and improvements [ETN-94-95298] p 2304 N94-25234

Linear and nonlinear adaptive filtering and their application to speech intelligibility enhancement [ISBN-9-09-005342-5] p 2304 N94-25292

Adaptive noise cancellation using recurrent radial basis function networks [RR-472] p 2313 N94-25319

Digital data, composite video multiplexer and demultiplexer boards for an IBM PC/AT compatible computer p 2447 N94-25377

Modeling of the ground-to-SSFMB link networking features using SPW p 2306 N94-25381

SIGNAL RECEPTION

Layered parallel interface for an active antenna array [AD-D016002] p 2301 N94-25045

SIGNAL TO NOISE RATIOS

Estimation of frequency offset in mobile satellite modems p 2285 N94-22807

Theoretical and simulated performance for a novel frequency estimation technique p 2285 N94-22808

DS-SSMA capacity for a mobile satellite system p 2286 N94-22814

Beam-waveguide antenna servo design issues for tracking low earth-orbiting satellites p 2292 N94-23268

Digital test signal generation: An accurate SNR calibration approach for the DSN p 2305 N94-23912

Precipitation measurement using SIR-C: A feasibility study [NASA-CR-195104] p 2409 N94-24048

Precipitation measurement using SIR-C: A feasibility study. Investigation at nadir [NASA-CR-195103] p 2410 N94-24126

Detection and analysis of unbalanced QPSK in Gaussian noise, version 1.0 [DREO-12-020.1] p 2296 N94-24131

Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply [AD-A273149] p 2299 N94-24670

Improvement of system properties of a pulsed laser Doppler anemometer with respect to an optical amplifier [DLR-FB-93-19] p 2547 N94-25305

SIGNAL TRANSMISSION

Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793

Wide band fiber-optic communications p 2304 N94-23231

Preliminary analysis of amplitude and phase fluctuations in the JAPE multiple tone data to distances of 500 meters p 2528 N94-24216

Layered parallel interface for an active antenna array [AD-D016002] p 2301 N94-25045

SIGNATURES

Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles [NASA-CR-195163] p 2201 N94-24919

Special signature schemes [ETN-94-95296] p 2446 N94-25081

SIGNS AND SYMPTOMS

Screening for asymptomatic coronary heart disease p 2423 N94-23315

SIKORSKY AIRCRAFT

Wind tunnel test of a variable-diameter tiltrotor (VDTR) model [NASA-CR-177629] p 2181 N94-24796

SILICATES

The structure and spin dynamics of lanthanide-bearing silicate glasses [DE94-001320] p 2252 N94-22992

SILICIDES

Evaluation of A5Si3Z(x) intermetallics for use as high temperature structural materials [DE93-041127] p 2227 N94-22977

Photo-induced antiferromagnetic interlayer coupling in Fe superlattices with iron silicide spacers [DE94-001345] p 2559 N94-22995

Method of forming silicon structures with selectable optical characteristics [NASA-CASE-NPO-18625-1-CU] p 2563 N94-23972

SILICON

Density functional studies: First principles and semi-emperical calculations of clusters and surfaces [DE94-002836] p 2561 N94-23214

Magnetic resonance study of zinc-related defects in silicon with optimized EPR spectrometer [PB93-224640] p 2561 N94-23223

Quantitative analysis in the Al-Mg-Si system with small amounts of Mg and Si [PB93-201499] p 2241 N94-23446

Method of forming silicon structures with selectable optical characteristics [NASA-CASE-NPO-18625-1-CU] p 2563 N94-23972

Photonic technology for implementation of generalizable neural networks: A synthetic approach [AD-A273497] p 2474 N94-24622

Temperature dependent performance of Coplanar Waveguide (CPW) on substrates of various materials [NASA-TM-106505] p 2313 N94-25170

SILICON ALLOYS

Large-scale production of Si(0.8)Ge(0.2) thermoelectric alloys by mechanical alloying [DE94-000695] p 2243 N94-23753

SILICON CARBIDES

Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments [DE93-040161] p 2231 N94-22933

Theoretical considerations for Reaction-Formed Silicon Carbide (RFSC) formation by molten silicon infiltration into slurry-derived preforms [NASA-TM-106414] p 2222 N94-23500

An overview on the main available ceramic composites and their processing routes p 2255 N94-24229

Ceramic matrix composites: Challenges and opportunities p 2255 N94-24230

SILICON COMPOUNDS

Disilane LPCVD deposited silicon films: Deposition mechanisms, properties and capability of making transistors on thin films [LAAS-93156] p 2252 N94-22910

SILICON DIOXIDE

Glass-ceramic Li-Al-Si-O composition and process for its production [CA-PATENT-APPL-SN-2043757] p 2254 N94-24129

SILICON NITRIDES

Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis [PB93-217982] p 2347 N94-22982

Development of silicon nitride composites with continuous fiber reinforcement [DE94-001996] p 2227 N94-23022

Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas [NASA-CR-189214] p 2364 N94-24090

Selection of polymer binders and fabrication of SiC fiber-reinforced reaction-bonded silicon nitride matrix composites [NASA-CR-194874] p 2255 N94-24223

The mechanical properties of single crystal (alpha)-Si3N4 [DE94-002632] p 2563 N94-24517

SILICON RADIATION DETECTORS

Examination of the response capacity of a silicon pixel detector for ions and molecules in the energy area 100 to 300 keV [MPE-241] p 2346 N94-25415

SILICON TRANSISTORS

Disilane LPCVD deposited silicon films: Deposition mechanisms, properties and capability of making transistors on thin films [LAAS-93156] p 2252 N94-22910

SILICONES

Viscous rotary damper p 2361 N94-24031

SILVER
Thermomechanical processing of Ag-clad Bi2Sr2CaCu2O(x) superconductors
[DE94-002347] p 2563 N94-24624
SILVER ZINC BATTERIES
Aerospace applications of batteries
p 2390 N94-23346
SIMD (COMPUTERS)
Application of multigrid methods to the solution of liquid crystal equations on a SIMD computer
p 2484 N94-23686
SIMULATION
New welding and finishing procedures
[DE94-602022] p 2352 N94-23025
Robust stability of second-order systems
[NASA-CR-195175] p 2488 N94-24564
Solid rocket combustion simulator technology using the hybrid rocket for simulation
[NASA-CR-195142] p 2265 N94-24578
Admittance model for the shuttle remote manipulator system in four configurations
[NASA-CR-4555] p 2474 N94-24635
Numerical simulation of cylindrical, self-field MPD thrusters with multiple propellants
[NASA-CR-194458] p 2220 N94-24714
BEM solution for the simulation of axisymmetric viscous sintering
[PB93-237717] p 2336 N94-24761
Simulation of the vortex motion in the high T(c) superconductors
[DE93-617138] p 2567 N94-25403
SIMULATORS
Physical modeling and dynamic simulation of planet vehicles: Application to the motion prediction
p 2371 N94-23426
Micro SIL-1 simulator
[PB94-110889] p 2454 N94-23750
SIMSAT: An object oriented architecture for real-time satellite simulation p 2197 N94-23940
CF-18 AN/ALQ-126B-MG 13 IIP interface to the DREO Electronic Warfare Engagement Simulation Facility
[DREO-TN-93-4] p 2296 N94-24118
A study of the core module simulator floor capability
p 2380 N94-24418
Integration and evaluation of a simulator designed to be used within a dynamic prototyping environment
p 2198 N94-24436
A two-dimensional dispersion module for the TOUGH2 simulator
[DE94-002262] p 2335 N94-24655
X ray simulator theory support
[AD-A273613] p 2553 N94-24949
SINE WAVES
Spur-reduced digital sinusoid synthesis
p 2291 N94-23264
SINGLE CHANNEL PER CARRIER TRANSMISSION
Improved frame synchronization schemes for INMARSAT-B/M SCPC and TDM channels
p 2285 N94-22806
SINGLE CRYSTALS
The elastic and electromechanical properties of BaTiO3 single crystal through the ferroelectric transition
[DE94-001437] p 2557 N94-22927
Anomalous magnetoresistance behavior of superconducting Nd(2-x)Ce(x)CuO(4-y) single crystal
[DE94-000806] p 2558 N94-22941
Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination
[PB93-224152] p 2559 N94-23109
Proposed additions to the SHADOW ray-tracing code for general-asymmetric perfect-crystal optics
[DE94-001291] p 2560 N94-23188
Reduction of nitric oxide over platinum, rhodium and platinum-rhodium single crystal surfaces
[PB93-230092] p 2232 N94-23482
Inertial confinement fusion
[DE94-002602] p 2551 N94-23703
Polymer morpholoqh p 2226 N94-24353
The mechanical properties of single crystal (alpha)-Si3N4
[DE94-002632] p 2563 N94-24517
Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657
Two micron stimulated emission of activated insulating crystals
[REPT-94-002] p 2565 N94-25025
SINGLE STAGE TO ORBIT VEHICLES
Access to space studies p 2199 N94-24434
Configuration development study of the OSU 1 hypersonic research vehicle
[NASA-CR-195522] p 2181 N94-24591
A conceptual design of an unmanned test vehicle using an airbreathing propulsion system
[NASA-CR-195550] p 2189 N94-25065
Hypersonic vehicle control law development using H(infinity) and micron-synthesis p 2163 N94-25104
SINGULAR INTEGRAL EQUATIONS
The effects of anisotropy on the nonlinear behavior of bridged cracks in long strips
[NASA-CR-194453] p 2377 N94-24604
SINGULARITY (MATHEMATICS)
Normal forms of kinematic singularities of 3R robot manipulators
[MEMO-1124] p 2469 N94-22712
Coordinate-free interpretations of the optimal costs for Lq problems subject to implicit systems
[PB94-118700] p 2473 N94-23760
Non-trivial examples of real isolated singularity at the origin
[PB94-110939] p 2487 N94-23787
SINTERING
Influence of sintering atmospheres on the aluminum sintering characteristics
[DE93-632412] p 2239 N94-22965
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis
[PB93-217982] p 2347 N94-22982
Composite fiber structures for catalysts and electrodes
p 2393 N94-23364
Combustion synthesis and engineering of nanoparticles for electronic, structural and superconductor applications
[DE94-001865] p 2254 N94-23720
Modelling the ignition of boron/titanium particles
p 2159 N94-24273
Characteristics of products generated by selective sintering and stereolithography rapid prototyping processes p 2264 N94-24412
Thermomechanical processing of Ag-clad Bi2Sr2CaCu2O(x) superconductors
[DE94-002347] p 2563 N94-24624
BEM solution for the simulation of axisymmetric viscous sintering
[PB93-237717] p 2336 N94-24761
Solid state synthesis of Fe-B-Si alloys
[VTT-PUBS-118] p 2250 N94-25316
SIS (SUPERCONDUCTORS)
A low noise 665 GHz SIS quasi-particle waveguide receiver
[NASA-CR-194735] p 2296 N94-24105
SISO (CONTROL SYSTEMS)
Flight controller design using mixed H2/H infinity optimization with a singular H infinity constraint
[AD-A273831] p 2191 N94-25525
SIZE DISTRIBUTION
Particle size measurement for the control of industrial crystallizers
[PB94-119104] p 2562 N94-23766
Infrared sensors and systems for enhanced vision/autonomous landing applications
p 2439 N94-25491
SKIN FRICTION
The use of near-wall hot-wire probes for time-resolved skin-friction measurements p 2316 N94-22857
Skin friction measurement in complex flows using thin oil film techniques
[NASA-CR-194872] p 2327 N94-24098
Analytical skin friction and heat transfer formula for compressible internal flows
[NASA-CR-191185] p 2170 N94-25173
SKY WAVES
Northern Exposure 1992: An investigation of transauroral HF radio skywave propagation
[AD-A273363] p 2303 N94-25089
SLABS
A vibrating wire parallel to a type 2 superconducting slab of arbitrary thickness
[DE93-617134] p 2525 N94-25389
The effect of a transport current on the surface barrier of a uniaxial anisotropic superconducting slab
[DE93-617135] p 2566 N94-25390
Effects of a vibrating wire carrying DC current on a moving type 2 superconducting slab of arbitrary thickness
[DE93-617136] p 2566 N94-25391
SLAGS
Detection of velocity in high temperature liquid metals
p 2247 N94-25127
SLIDING FRICTION
Wear characteristics of technical dry rolling/sliding systems with relations to corrugation problems
p 2269 N94-23586
Surface observations of stick-slip oscillations in tightly conformal wheel/rail contacts p 2270 N94-23588
Development of a theory of the wear of ceramics
[DE94-002773] p 2254 N94-23783
Development of gears for space use
p 2360 N94-24021
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090
SLOT ANTENNAS
Radar signature related radome techniques for flush-mounted HF-, VHF- and, UHF communication antennas
[PB93-204618] p 2294 N94-23742
Spatial frequency multiplier with active linearly tapered slot antenna array
[NASA-TM-106494] p 2310 N94-24308
SLURRIES
Preparing polymeric matrix composites using an aqueous slurry technique
[NASA-CASE-LAR-14771-1] p 2252 N94-23076
Composite fiber structures for catalysts and electrodes
p 2393 N94-23364
Theoretical considerations for Reaction-Formed Silicon Carbide (RFSC) formation by molten silicon infiltration into slurry-derived preforms
[NASA-TM-106414] p 2222 N94-23500
SLURRY PROPELLANTS
Electro-rheology fluids and liquid fuel flow
[AD-A273640] p 2337 N94-25032
SMALL SCIENTIFIC SATELLITES
WISPER: Wirless Space Power Experiment
[NASA-CR-195538] p 2396 N94-24701
SMART STRUCTURES
Intelligent Material Systems and Structures (IMSS). Part 5: Fiber optic registration of deformation in carbon laminates 91/92
[PB93-204600] p 2544 N94-23723
Probabilistic assessment of smart composite structures
[NASA-TM-106358] p 2378 N94-25188
SMOKE
Chronic obstructive pulmonary disease
p 2425 N94-23324
Field models: Their present and future application in fire safety engineering
[PB93-201622] p 2269 N94-23506
Zone fire modeling with natural building flows and a zero order shaft model
[PB94-112166] p 2270 N94-23735
The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics
[AD-A273164] p 2262 N94-25136
SMOOTHING
Nonlinear smoothing for random fields
[MEMO-1110] p 2493 N94-22728
POISs3: A 3D poisson smoother of structured grids
[PB93-226231] p 2318 N94-23115
A nonconforming multigrid method using conforming subspaces p 2485 N94-23695
SNOW
Close-up analysis of inflight ice accretion
[NASA-TM-106457] p 2172 N94-23523
Synthesis of passive microwave and radar altimeter data for estimating accumulation rates of polar snow
[NASA-CR-194864] p 2382 N94-23573
Snow modeling, water resources, climate change
[PB93-201770] p 2399 N94-24633
SNOW COVER
Application of ERS-1 active microwave instrumentation data to remote sensing of snow
[PB93-224756] p 2382 N94-23224
SOBOLEV SPACE
Polynomials orthogonal with respect to an inner product involving differences
[PB94-110731] p 2489 N94-24572
SOCIAL FACTORS
Proceedings of Technology and Governance in the 1990's
[PB93-192904] p 2597 N94-24312
SOCIOLOGY
The evolution of the laser: A systems perspective on science, technology and society
[ETN-94-95319] p 2351 N94-25218
SODIUM CHLORIDES
Stress corrosion cracking properties of 15-5PH steel
p 2251 N94-23244
SODIUM HYDRIDES
Vacancy formation energy of Li(H, D) and Na(H, D) systems
[DE93-633452] p 2558 N94-22978
SODIUM HYDROXIDES
Aqueous alkaline cleaners: An alternative to organic solvents
[AD-A273510] p 2260 N94-24848
SOFTENING
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276

SOFTWARE ENGINEERING
An information retrieval logical model applied to the formalism of conceptual graphs: The ELEN prototype and its experimentation on a corpus of software components
[ETN-94-95162] p 2588 N94-22879
A general model for dynamic and complex information management: The ELEN prototype object manager for software engineering
[ETN-94-95163] p 2588 N94-22880
Definition and realization of a formal verification tool of LUSTRE programs: The LESAR system
[ETN-94-95164] p 2447 N94-22882
Software for scientific visualization: State of the art and experiences
[PB93-225183] p 2449 N94-23111
Guide to software configuration management
[ESA-PSS-05-09-ISSUE-1] p 2450 N94-23229
Cost benefits of advanced software: A review of methodology used at Kennedy Space Center
p 2464 N94-23240
Formal methods and digital systems validation for airborne systems
[NASA-CR-4551] p 2466 N94-23293
ATOS-1: Designing the infrastructure for an advanced spacecraft operations system p 2197 N94-23849
SPOT4 Operational Control Center (CMP)
p 2197 N94-23856
The Ulysses spacecraft control and monitoring concepts and realities p 2502 N94-23862
The Mars mapper science and mission planning tool
p 2503 N94-23867
VMPLOT: A versatile analysis tool for mission operations p 2507 N94-23891
The Advanced Technology Operations System: ATOS
p 2508 N94-23897
Making tomorrow's mistakes today: Evolutionary prototyping for risk reduction and shorter development time p 2197 N94-23902
SAO mission support software and data standards, version 1.0
[NASA-CR-193906] p 2454 N94-24050
Update of GRASP/Ada reverse engineering tools for Ada
[NASA-CR-193890] p 2455 N94-24111
Designers' models of the human-computer interface
p 2433 N94-24188
New computing systems, future computing environment, and their implications on structural analysis and design
p 2177 N94-24314
Integration and evaluation of a simulator designed to be used within a dynamic prototyping environment
p 2198 N94-24436
Evaluation of the efficiency and fault density of software generated by code generators p 2465 N94-24445
Hydro-elastic analysis using a selection of commercial analysis programs
[PB94-118734] p 2376 N94-24478
High-performance computing and communications
[DE94-002215] p 2457 N94-24566
An investigation of requirements traceability to support systems development
[AD-A273167] p 2458 N94-24684
A type-theoretic approach to higher-order modules with sharing
[AD-A273566] p 2458 N94-24693
A methodology for software cost estimation using machine learning techniques
[AD-A273158] p 2459 N94-24775
Intelligent systems and advanced user interfaces for design, operation, and maintenance of command management systems
[NASA-CR-195172] p 2459 N94-24797
The use of design automation software by government-contracted architect/engineer firms: A status report
[AD-A273181] p 2459 N94-24812
Reengineering real-time software systems
[AD-A273408] p 2461 N94-25074
Future directions in flight simulation: A user perspective p 2162 N94-25101
An implementation of the REpresentation and MAintenance of Process knowledge (REMAP) model in the knowledge-based software assistant concept demonstration system
[AD-A273207] p 2461 N94-25138
Reuse-Driven Software Processes Guidebook, version 02.00.03
[AD-A273644] p 2461 N94-25148
Reuse Adoption Guidebook, version 02.00.05
[AD-A273652] p 2461 N94-25149
Computerized testing system software conversion and development: Identifying software and hardware portability issues and solutions
[AD-A273489] p 2462 N94-25287
A prototype to automate the video subsystem routing for the video distribution subsystem of Space Station Freedom p 2306 N94-25353
Software engineering methodologies and tools
p 2465 N94-25382
A multimedia adult literacy program: Combining NASA technology, instructional design theory, and authentic literacy concepts p 2585 N94-25384
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2
[AD-A273703] p 2463 N94-25456
SOFTWARE RELIABILITY
Evaluation of the efficiency and fault density of software generated by code generators p 2465 N94-24445
A type-theoretic approach to higher-order modules with sharing
[AD-A273566] p 2458 N94-24693
SOFTWARE REUSE
Software reuse in spacecraft planning and scheduling systems p 2520 N94-23966
RITL: An information system for application reuse-in-the-large
[PB94-119088] p 2592 N94-24646
Intelligent systems and advanced user interfaces for design, operation, and maintenance of command management systems
[NASA-CR-195172] p 2459 N94-24797
Analyzing the properties of user interface software
[AD-A273601] p 2460 N94-24933
Reengineering real-time software systems
[AD-A273408] p 2461 N94-25074
Reuse-Driven Software Processes Guidebook, version 02.00.03
[AD-A273644] p 2461 N94-25148
Reuse Adoption Guidebook, version 02.00.05
[AD-A273652] p 2461 N94-25149
SOFTWARE TOOLS
A general model for dynamic and complex information management: The ELEN prototype object manager for software engineering
[ETN-94-95163] p 2588 N94-22880
Definition and realization of a formal verification tool of LUSTRE programs: The LESAR system
[ETN-94-95164] p 2447 N94-22882
Verification of synchronous sequential numerical material systems: Application of the LUSTRE language and of the LESAR verification tool
[ETN-94-95181] p 2447 N94-22899
Users manual for the Chameleon parallel programming tools
[DE94-001934] p 2465 N94-22973
A dataflow analysis tool for parallel processing of algorithms
[NASA-TM-109054] p 2448 N94-23086
Tools reference manual for a Requirements Specification Language (RSL), version 2.0
[NASA-CR-191461] p 2445 N94-23125
The TOPSIM 4 graphic user interface
[ESA-STM-247] p 2450 N94-23228
A framework for SFC/DC system data analysis
p 2523 N94-23234
The Automated Instrumentation and Monitoring System (AIMS) reference manual
[NASA-TM-108795] p 2452 N94-23510
Activity Catalog Tool (ACT) user manual, version 2.0
[NASA-CR-177634] p 2430 N94-23527
Simultaneous simulation and visualization using DGL
[PB93-201341] p 2453 N94-23534
Mean-value of product-form stochastic Petri net models of slotted-ring systems
[PB94-110871] p 2494 N94-23749
Magellan spacecraft and memory state tracking: Lessons learned, future thoughts p 2207 N94-23865
Integrating payload design, planning, and control in the Dutch Utilisation Centre p 2207 N94-23869
Making adaptable systems work for mission operations: A case study p 2506 N94-23883
The FOT tool kit concept p 2507 N94-23889
VMPLOT: A versatile analysis tool for mission operations p 2507 N94-23891
The mission events graphic generator software: A small tool with big results p 2464 N94-23893
Using SFOC to fly the Magellan Venus mapping mission p 2516 N94-23941
Expert diagnostics system as a part of analysis software for power mission operations p 2516 N94-23944
GenSAA: A tool for advancing satellite monitoring with graphical expert systems p 2516 N94-23945
From requirements to acceptance tests
p 2464 N94-23962
Software reuse in spacecraft planning and scheduling systems p 2520 N94-23966
Integration and evaluation of a simulator designed to be used within a dynamic prototyping environment
p 2198 N94-24436
Evaluation of the efficiency and fault density of software generated by code generators p 2465 N94-24445
Fact-based enterprise information management using NIAM
[DE93-041135] p 2591 N94-24501
MERILL: An equational reasoning system in standard ML: A user guide (prerelease version 0.4)
[PB93-204501] p 2456 N94-24534
An automated tool to facilitate code translation for software fault tree analysis
[AD-A273205] p 2457 N94-24556
High-performance computing and communications
[DE94-002215] p 2457 N94-24566
Timed coloured Petri nets and their application to logistics
[ETN-94-95310] p 2522 N94-25293
Genetic algorithms in control systems engineering
[RR-470] p 2463 N94-25315
Software engineering methodologies and tools
p 2465 N94-25382
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2
[AD-A273703] p 2463 N94-25456
SOHO MISSION
Ultra-clean high-precision mechanisms for the SUMER EUV spectrometer on SOHO p 2356 N94-23999
Width modulator mechanism for spectrometer entrance slits p 2357 N94-24002
GOLF mechanisms p 2357 N94-24003
The development of the SOHO SUMER mechanisms
p 2361 N94-24028
Examination of the response capacity of a silicon pixel detector for ions and molecules in the energy area 100 to 300 keV
[MPE-241] p 2346 N94-25415
SOIL MOISTURE
Estimates of monthly mean soil moisture for 1979-1989
[NASA-TM-104571] p 2407 N94-23132
Spatial and temporal variability of soil temperature, moisture and surface soil properties
[NASA-CR-194109] p 2401 N94-23337
Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734
Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991
[PB93-230654] p 2386 N94-23755
Session on coupled land surface/hydrological/atmospheric models
p 2414 N94-24395
SOIL SCIENCE
Spatial and temporal variability of soil temperature, moisture and surface soil properties
[NASA-CR-194109] p 2401 N94-23337
SOILS
Machines for moving in soil p 2369 N94-23411
Effect of land use change on the carbon cycle in Amazon soils
[NASA-CR-195168] p 2399 N94-24853
Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861
SOL-GEL PROCESSES
Photo-induced and electrooptic properties of (Pb,La)(Zr,Ti)O3 films for optical memories
[DE93-019820] p 2542 N94-23202
Glass-ceramic Li-Al-Si-O composition and process for its production
[CA-PATENT-APPL-SN-2043757] p 2254 N94-24129
Conformal method of fabricating and optical waveguide on a semiconductor substrate
[AD-D015988] p 2546 N94-25043
SOLAR ACTIVITY
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for February, March, 1993, and late data
[PB93-198323] p 2626 N94-23738
Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992, and miscellaneous
[PB93-198331] p 2627 N94-23739
Solar-geophysical data number 589, September 1993. Part 1: (Prompt reports). Data for August, July 1993, and late data
[PB94-117082] p 2628 N94-24993

SOLAR ARRAYS

The Fifth European Space Mechanisms and Tribology Symposium
[ESA-SP-334] p 2355 N94-23985

The Columbus solar array mechanisms
p 2356 N94-23994

Primary deployment mechanism for the European Polar Platform p 2207 N94-23995

The Submillimeter Wave Astronomy Satellite (SWAS) solar array system p 2361 N94-24029

Design of a new high-performance pointing controller for the Hubble Space Telescope
[NASA-CR-193891] p 2364 N94-24088

Optimal Space Station solar array gimbal angle determination via radial basis function neural networks
[NASA-TM-106482] p 2195 N94-24482

Thermal control system for Space Station Freedom photovoltaic power module
[NASA-TM-105650] p 2205 N94-24825

SOLAR ATMOSPHERE

Some challenging problems of the structured and dynamical solar atmosphere p 2624 N94-22838

Goals of ground-based solar observations
p 2624 N94-22840

Why put visible solar telescopes in space?
p 2600 N94-22850

The calculation of theoretical chromospheric models and the interpretation of solar spectra from rockets and spacecraft
[NASA-CR-195083] p 2626 N94-23569

An analysis of solar mesospheric temperatures for the upper stratosphere and mesosphere
[NASA-CR-194861] p 2626 N94-23626

The resonance lines of MG2 as diagnostics of the upper solar chromosphere
[NASA-CR-195084] p 2627 N94-24300

On the physics of waves in the solar atmosphere: Wave heating and wind acceleration
[NASA-CR-195197] p 2628 N94-25264

SOLAR CELLS

Polycrystalline thin film materials and devices
[DE93-018213] p 2389 N94-22862

Feasibility study on a CO2 global recycling system using natural energy
[DE94-714889] p 2397 N94-23026

Research on polycrystalline thin-film CuInGaSe2 solar cells
[DE94-000203] p 2560 N94-23205

Amorphous silicon PVMaT, phase 2A
[DE93-018221] p 2390 N94-23295

Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296

Transparent conducting thin films for spacecraft applications
[NASA-TM-106466] p 2218 N94-23370

JOVE NASA-FIT program: Microgravity and aeronomy projects
[NASA-CR-195121] p 2631 N94-24493

Thin film cadmium telluride photovoltaic cells
[DE94-000201] p 2395 N94-24509

Results of the 1993 NASA/JPL balloon flight solar cell calibration program
[NASA-CR-195158] p 2395 N94-24563

SOLAR COLLECTORS

Preliminary study concerning development of petroleum-substitution energy integration technology
[DE94-714902] p 2264 N94-23027

The hexagonal compound parabolic concentrator design and construction
[DLR-MITT-93-03] p 2396 N94-25464

The pressure loaded volumetric ceramic receiver 500 kW version design and construction
[DLR-MITT-93-02] p 2396 N94-25479

SOLAR CONVECTION (ASTRONOMY)

On the physics of waves in the solar atmosphere: Wave heating and wind acceleration
[NASA-CR-195197] p 2628 N94-25264

SOLAR CORONA

Scientific Requirements for Future Solar-Physics Space Missions
[ESA-SP-1157] p 2623 N94-22837

Keys to understanding the corona
p 2624 N94-22839

Prospects for future solar-wind missions
p 2624 N94-22841

The next Japanese solar satellite
p 2625 N94-22846

Solar physics and the Coronas project
p 2625 N94-22847

Requirements for future solar-physics missions with x ray instrumentation p 2625 N94-22849

Coronal abundances and their variation
[NASA-CR-194811] p 2626 N94-23276

Model development for Ulysses and SOHO
[NASA-CR-193884] p 2627 N94-24484

SOLAR CYCLES

Solar magnetic cycle
[NASA-CR-195202] p 2628 N94-25275

SOLAR ENERGY

Feasibility study on a CO2 global recycling system using natural energy
[DE94-714889] p 2397 N94-23026

Preliminary study concerning development of petroleum-substitution energy integration technology
[DE94-714902] p 2264 N94-23027

Power generation technology options for a Mars mission
[NASA-TM-106451] p 2220 N94-24681

SOLAR FLARES

Some challenging problems of the structured and dynamical solar atmosphere p 2624 N94-22838

The next Japanese solar satellite
p 2625 N94-22846

Excitation of XUV radiation in solar flares
[NASA-CR-193703] p 2627 N94-24094

Magnetic shielding of interplanetary spacecraft against solar flare radiation
[NASA-CR-195539] p 2204 N94-24334

Solar-geophysical data number 587, July 1993. Part 1: (Prompt reports). Data for June, May 1993, and late data
[PB93-232874] p 2628 N94-24989

Solar-geophysical data number 587, July 1993. Part 2: (Comprehensive reports). Data for January 1993, and miscellaneous
[PB93-232882] p 2628 N94-24990

Solar-geophysical data number 588, August 1993. Part 1: (Prompt reports). Data for July, June 1993, and late data
[PB94-109089] p 2628 N94-24991

Solar-geophysical data number 588, August 1993. Part 2: (Comprehensive reports). Data for February 1993, and miscellaneous
[PB94-109105] p 2628 N94-24992

Solar-geophysical data number 589, September 1993. Part 1: (Prompt reports). Data for August, July 1993, and late data
[PB94-117082] p 2628 N94-24993

Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994

Solar flares and magnetospheric particles: Investigations based upon the ONR-602 and ONR-604 experiments
[AD-A273639] p 2628 N94-25031

SOLAR FLUX

An analysis of solar mesospheric temperatures for the upper stratosphere and mesosphere
[NASA-CR-194861] p 2626 N94-23626

Numerical simulation of Ulysses nutation
p 2207 N94-24017

Kamiokande results on solar neutrinos and a supernova search
[ICRR-REPT-294-93-6] p 2627 N94-24961

Solar neutrinos: Real-time experiments
[ICRR-REPT-293-93-5] p 2627 N94-24962

SOLAR INSTRUMENTS

Polarization analysis of a balloon-borne solar magnetograph
[NASA-CR-193908] p 2345 N94-24852

SOLAR MAGNETIC FIELD

Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for February, March, 1993, and late data
[PB93-198323] p 2626 N94-23738

Solar-geophysical data number 587, July 1993. Part 1: (Prompt reports). Data for June, May 1993, and late data
[PB93-232874] p 2628 N94-24989

Solar-geophysical data number 588, August 1993. Part 1: (Prompt reports). Data for July, June 1993, and late data
[PB94-109089] p 2628 N94-24991

Solar-geophysical data number 589, September 1993. Part 1: (Prompt reports). Data for August, July 1993, and late data
[PB94-117082] p 2628 N94-24993

Solar magnetic cycle
[NASA-CR-195202] p 2628 N94-25275

SOLAR MAXIMUM MISSION

Coronal abundances and their variation
[NASA-CR-194811] p 2626 N94-23276

SOLAR NEUTRINOS

Recent results from the Soviet-American Gallium Experiment
[DE94-000677] p 2626 N94-23020

Accelerator-based neutrino oscillation searches
[DE94-000818] p 2626 N94-23515

Solar neutrinos: Real-time experiments
[ICRR-REPT-293-93-5] p 2627 N94-24962

SOLAR OPTICAL TELESCOPE

Width modulator mechanism for spectrometer entrance slits p 2357 N94-24002

SOLAR OSCILLATIONS

Some challenging problems of the structured and dynamical solar atmosphere p 2624 N94-22838

SOLAR PHYSICS

Scientific Requirements for Future Solar-Physics Space Missions
[ESA-SP-1157] p 2623 N94-22837

Some challenging problems of the structured and dynamical solar atmosphere p 2624 N94-22838

Keys to understanding the corona
p 2624 N94-22839

Goals of ground-based solar observations
p 2624 N94-22840

Prospects for future ground-based solar observations
p 2624 N94-22842

Prospects for improved instrumentation on future solar space missions p 2624 N94-22843

Solar physics within ESA's planning
p 2624 N94-22844

Solar physics within NASA's planning
p 2625 N94-22845

The next Japanese solar satellite
p 2625 N94-22846

Solar physics and the Coronas project
p 2625 N94-22847

Prospects for very-high-resolution solar physics with the Simuris inteferometric mission p 2625 N94-22848

Requirements for future solar-physics missions with x ray instrumentation p 2625 N94-22849

Why put visible solar telescopes in space?
p 2600 N94-22850

Requirements for future solar-physics missions that include UV instrumentation p 2625 N94-22851

The calculation of theoretical chromospheric models and the interpretation of solar spectra from rockets and spacecraft
[NASA-CR-195083] p 2626 N94-23569

Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for February, March, 1993, and late data
[PB93-198323] p 2626 N94-23738

Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992, and miscellaneous
[PB93-198331] p 2627 N94-23739

Model development for Ulysses and SOHO
[NASA-CR-193884] p 2627 N94-24484

Solar-geophysical data number 587, July 1993. Part 1: (Prompt reports). Data for June, May 1993, and late data
[PB93-232874] p 2628 N94-24989

Solar-geophysical data number 587, July 1993. Part 2: (Comprehensive reports). Data for January 1993, and miscellaneous
[PB93-232882] p 2628 N94-24990

Solar-geophysical data number 588, August 1993. Part 1: (Prompt reports). Data for July, June 1993, and late data
[PB94-109089] p 2628 N94-24991

Solar-geophysical data number 588, August 1993. Part 2: (Comprehensive reports). Data for February 1993, and miscellaneous
[PB94-109105] p 2628 N94-24992

Solar-geophysical data number 589, September 1993. Part 1: (Prompt reports). Data for August, July 1993, and late data
[PB94-117082] p 2628 N94-24993

Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994

On the physics of waves in the solar atmosphere: Wave heating and wind acceleration
[NASA-CR-195197] p 2628 N94-25264

SOLAR POWERED AIRCRAFT

Effect of power system technology and mission requirements on high altitude long endurance aircraft
[NASA-CR-194455] p 2189 N94-25200

SOLAR PROMINENCES

Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994

SOLAR PROTONS

Magnetic shielding of interplanetary spacecraft against solar flare radiation
[NASA-CR-195539] p 2204 N94-24334

SOLAR RADIATION

Flight solar calibrations using the Mirror Attenuator Mosaic (MAM): Low scattering mirror
p 2384 N94-23602

Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994

The hexagonal compound parabolic concentrator design and construction
[DLR-MITT-93-03] p 2396 N94-25464

SOLAR RADIO BURSTS
Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992, and miscellaneous
[PB93-198331] p 2627 N94-23739
Solar-geophysical data number 587, July 1993. Part 2: (Comprehensive reports). Data for January 1993, and miscellaneous
[PB93-232882] p 2628 N94-24990
Solar-geophysical data number 588, August 1993. Part 2: (Comprehensive reports). Data for February 1993, and miscellaneous
[PB94-109105] p 2628 N94-24992
Solar-geophysical data number 589, September 1993. Part 1: (Prompt reports). Data for August, July 1993, and late data
[PB94-117082] p 2628 N94-24993
Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994

SOLAR RADIO EMISSION
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for February, March, 1993, and late data
[PB93-198323] p 2626 N94-23738
Solar-geophysical data number 587, July 1993. Part 1: (Prompt reports). Data for June, May 1993, and late data
[PB93-232874] p 2628 N94-24989
Solar-geophysical data number 588, August 1993. Part 1: (Prompt reports). Data for July, June 1993, and late data
[PB94-109089] p 2628 N94-24991
Solar-geophysical data number 589, September 1993. Part 1: (Prompt reports). Data for August, July 1993, and late data
[PB94-117082] p 2628 N94-24993

SOLAR SENSORS
An Earth albedo model: A mathematical model for the radiant energy input to an orbiting spacecraft due to the diffuse reflectance of solar radiation from the Earth below
[NASA-TM-104596] p 2195 N94-24497

SOLAR SPECTRA
The calculation of theoretical chromospheric models and the interpretation of solar spectra from rockets and spacecraft
[NASA-CR-195083] p 2626 N94-23569
The resonance lines of MG2 as diagnostics of the upper solar chromosphere
[NASA-CR-195084] p 2627 N94-24300
The solar spectral irradiances from x ray to radio wavelengths
[NASA-CR-195203] p 2629 N94-25260

SOLAR SPECTROMETERS
Prospects for improved instrumentation on future solar space missions p 2624 N94-22843
Prospects for very-high-resolution solar physics with the Simuris inteferometric mission p 2625 N94-22848
Ultra-clean high-precision mechanisms for the SUMER EUV spectrometer on SOHO p 2356 N94-23999
Periscope mechanism for SWAN instrument
p 2357 N94-24000
Width modulator mechanism for spectrometer entrance slits p 2357 N94-24002
The development of the SOHO SUMER mechanisms
p 2361 N94-24028
High energy collimating fine grids for HESP program
[NASA-CR-189317] p 2209 N94-24767

SOLAR SYSTEM
Tensor-scalar cosmological models and their relaxation toward general relativity
[PB93-220796] p 2601 N94-23099

SOLAR SYSTEM EVOLUTION
Correlated petrographic, electron microprobe, and ion microprobe studies of selected primitive and processed phase assemblages in meteorites
[NASA-CR-194827] p 2601 N94-23499
A brief history of the universe
[DE93-616843] p 2604 N94-25210

SOLAR TEMPERATURE
An analysis of solar mesospheric temperatures for the upper stratosphere and mesosphere
[NASA-CR-194861] p 2626 N94-23626

SOLAR TERRESTRIAL INTERACTIONS
Solar-terrestrial environmental laboratory
p 2630 N94-23336
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for February, March, 1993, and late data
[PB93-198323] p 2626 N94-23738
Scientific study in solar and plasma physics relative to rocket and balloon projects
[NASA-CR-193885] p 2627 N94-24461
Solar-geophysical data number 587, July 1993. Part 1: (Prompt reports). Data for June, May 1993, and late data
[PB93-232874] p 2628 N94-24989
Solar-geophysical data number 588, August 1993. Part 1: (Prompt reports). Data for July, June 1993, and late data
[PB94-109089] p 2628 N94-24991

SOLAR WIND
Scientific Requirements for Future Solar-Physics Space Missions
[ESA-SP-1157] p 2623 N94-22837
Some challenging problems of the structured and dynamical solar atmosphere p 2624 N94-22838
Prospects for future solar-wind missions
p 2624 N94-22841
Evolution of large-scale plasma structures in comets: Kinematics and physics
[NASA-CR-194777] p 2601 N94-23251
Scientific study in solar and plasma physics relative to rocket and balloon projects
[NASA-CR-193885] p 2627 N94-24461
Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994
On the physics of waves in the solar atmosphere: Wave heating and wind acceleration
[NASA-CR-195197] p 2628 N94-25264
High latitude cusp signature observations for southward IMF B sub Z
[AD-A273801] p 2406 N94-25536

SOLAR X-RAYS
Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992, and miscellaneous
[PB93-198331] p 2627 N94-23739
Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994

SOLDERED JOINTS
Laser soldering of Sn plated brass integrator assembly housings
[DE94-001149] p 2270 N94-23790

SOLDERING
Laser soldering of Sn plated brass integrator assembly housings
[DE94-001149] p 2270 N94-23790

SOLDERS
Laser soldering of Sn plated brass integrator assembly housings
[DE94-001149] p 2270 N94-23790

SOLENOIDS
Structural analysis of a superconducting central solenoid for the Tokamak Physics Experiment
[DE94-001536] p 2549 N94-23014

SOLID ELECTROLYTES
Modelling of solid polymer and direct methanol fuel cells: Phenomenological equations and analytical solutions
[PB93-224897] p 2390 N94-23102
High power density proton exchange membrane fuel cells p 2393 N94-23359
The electrolyte challenge for a direct methanol-air polymer electrolyte fuel cell operating at temperatures up to 200 C p 2393 N94-23360
Advances in direct oxidation methanol fuel cells
p 2393 N94-23361

SOLID LUBRICANTS
New tribocoating combination for vacuum operation
p 2355 N94-23990
Tribological characteristics of ball bearings lubricated with a sputtered molybdenum disulphide film in a vacuum under a high thrust load p 2355 N94-23992
The tribology of some MoS2-lubricated engineering ceramics p 2356 N94-23993
Development of gears for space use
p 2360 N94-24021
An analytical ultra-high vacuum tribometer for solid lubricant studies p 2361 N94-24033
An assessment of solid lubricant films for use in high temperature space applications p 2363 N94-24044
The development of dry-lubricated ceramic cages
p 2363 N94-24045

SOLID PROPELLANT COMBUSTION
Design considerations of hybrid rockets
p 2156 N94-24254
Modelling the ignition of boron/titanium particles
p 2159 N94-24273

SOLID PROPELLANT IGNITION
Modelling the ignition of boron/titanium particles
p 2159 N94-24273

SOLID PROPELLANT ROCKET ENGINES
Final postflight hardware evaluation report RSRM-28 (STS-53)
[NASA-CR-193902] p 2200 N94-24112
Impact damage in filament wound composite bottles
p 2231 N94-24421
Micromechanical simulation of damage progression in carbon phenolic composites p 2231 N94-24446

SOLID PROPELLANTS
Burning rate of double-base propellant in the presence of plasma p 2155 N94-24252
Modelling the ignition of boron/titanium particles
p 2159 N94-24273
Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275

SOLID STATE
In situ and ex situ spectroelectrochemical and x ray absorption studies on rechargeable, chemically-modified and other MnO2 materials
[DE94-001387] p 2234 N94-24545
Thermomechanical processing of Ag-clad Bi2Sr2CaCu2O(x) superconductors
[DE94-002347] p 2563 N94-24624
Solid state Time Base Corrector (TBC)
[AD-D015981] p 2312 N94-25039

SOLID STATE DEVICES
Non-volatile, solid state bistable electrical switch
[NASA-CASE-NPO-17621-1-CU] p 2309 N94-23820
Mesoscopic phenomena in metallic point contacts
[ETN-94-95371] p 2313 N94-25286

SOLID STATE LASERS
Micro pulse laser radar
[NASA-CASE-GSC-13493-1] p 2294 N94-23827
Computer modeling of nonlinearities
p 2458 N94-24661
Temporal model of an optically pumped co-doped solid state laser
[NASA-TM-109680] p 2350 N94-24851
Nonlinear dynamical control of lasers
[AD-A273359] p 2350 N94-24938
Laser energized high voltage direct current power supply
[AD-D015977] p 2312 N94-25036

SOLID WASTES
Investigating pyrolysis/incineration as a method of resource recovery from solid waste
p 2444 N94-25375

SOLID-SOLID INTERFACES
Contribution to the interface micromechanical study and to the damage fundamental phenomena in glass fiber epoxy resin model composites
[ISAL-93-0027] p 2227 N94-23133
Interface evaluation in ceramic composites
p 2255 N94-24231
Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772

SOLIDIFICATION
Three-dimensional solidification and melting using magnetic field control p 2325 N94-23664
Workshop on the Thermophysical Properties of Molten Materials
[NASA-CP-10121] p 2246 N94-25120
Thermophysical property sensitivity effects in steel solidification p 2246 N94-25122
A thermodynamic approach to obtain materials properties for engineering applications
p 2248 N94-25131

SOLUBILITY
Di(hydroxyphenyl)- benzimidazole monomers
[NASA-CASE-LAR-14643-2] p 2253 N94-23305
Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2
[NASA-CR-193893] p 2229 N94-24224
Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344
Ultrastructure processing of macromolecular materials
[AD-A273413] p 2258 N94-24782
Center for advanced electrical and structural polymers
[AD-A273415] p 2259 N94-24783

SOLVATION
Structures of Cl(-)(H2O)(n) and F(-)(H2O)(n) (n equal to 2,3...15) clusters: Molecular dynamics computer simulations
[AD-A273474] p 2537 N94-24940
The electrochemistry of the solvated electron: A study of its properties and of its applications
[ETN-94-95313] p 2236 N94-25296

SOLVENTS
FTIR quantification of industrial hydraulic fluids in perchloroethylene p 2264 N94-23243
Phenylethynl-terminated poly(arylene ethers)
[NASA-CASE-LAR-14797-1] p 2253 N94-23307

Selection of polymer binders and fabrication of SiC fiber-reinforced reaction-bonded silicon nitride matrix composites

[NASA-CR-194874] p 2255 N94-24223

Ozone depletion, paradigms, and politics

[DE94-001600] p 2398 N94-24506

Aqueous alkaline cleaners: An alternative to organic solvents

[AD-A273510] p 2260 N94-24848

Potent solvents for C60 and their utility for the rapid acquisition of 13CNMR data for fullerenes

[AD-A273349] p 2235 N94-24925

SONAR

A tracking sonar sensor for vehicle guidance

[OUEL-1956/92] p 2472 N94-23179

Improved magnetostrictive transducer drive elements achieved by reduction of crystalline defects and improved crystalline orientation

[AD-A273391] p 2313 N94-25276

SONIC ANEMOMETERS

Comparison between 1-minute and 15-minute averages of turbulence parameters p 2528 N94-24218

SONIC BOOMS

Variability of measured sonic boom signatures. Volume 1: Technical report

[NASA-CR-191483-VOL-1] p 2526 N94-24172

Variability of measured sonic boom signatures. Volume 2: Data report

[NASA-CR-191483-VOL-2] p 2526 N94-24173

SOS (SEMICONDUCTORS)

Laser energized high voltage direct current power supply

[AD-D015977] p 2312 N94-25036

SOUND DETECTING AND RANGING

Ground characterization for JAPE

p 2527 N94-24213

JAPE 91: Influence of terrain masking of the acoustic propagation of helicopter noise p 2528 N94-24214

Acoustic target detection and classification using neural networks p 2529 N94-24221

Preliminary analysis of the JAPE ground vehicle test data with an artificial neural network classifier

p 2529 N94-24222

SOUND FIELDS

Beamforming in an acoustic shadow

p 2528 N94-24219

SOUND GENERATORS

Joint Acoustic Propagation Experiment (JAPE-91) Workshop

[NASA-CP-3231] p 2526 N94-24207

Joint Acoustic Propagation Experiment (JAPE)

p 2527 N94-24208

Some results gained from JAPE: An overview

p 2527 N94-24209

Effects of atmospheric variations on acoustic system performance p 2527 N94-24211

SOUND PRESSURE

Variability of measured sonic boom signatures. Volume 1: Technical report

[NASA-CR-191483-VOL-1] p 2526 N94-24172

Variability of measured sonic boom signatures. Volume 2: Data report

[NASA-CR-191483-VOL-2] p 2526 N94-24173

JAPE 91: Influence of terrain masking of the acoustic propagation of helicopter noise p 2528 N94-24214

SOUND PROPAGATION

Some results gained from JAPE: An overview

p 2527 N94-24209

Comparison of measured and predicted pure tone propagation levels from JAPE-1: An evaluation of the performance of ASOPRAT p 2527 N94-24212

Comparisons of calculated and measured helicopter noise near instrument hill p 2528 N94-24215

Preliminary analysis of amplitude and phase fluctuations in the JAPE multiple tone data to distances of 500 meters p 2528 N94-24216

Analysis of modal evolution caused by a weakly range-dependent seabed in shallow water and its application to inversion for geoacoustic properties

[AD-A273656] p 2419 N94-25435

SOUND RANGING

Some results gained from JAPE: An overview

p 2527 N94-24209

SOUND TRANSMISSION

Global acoustic mapping of ocean temperatures (GAMOT)

[AD-A273387] p 2418 N94-24719

Measurements and modeling of multitone, low-frequency acoustic data from the Arraial do Cabo range

[AD-A273406] p 2530 N94-25073

SOUND WAVES

Classical scattering theory of waves from the view point of an eigenvalue problem and application to target identification

[DE94-000472] p 2525 N94-23206

Chemically sensitive interfaces on SAW devices

[DE94-001832] p 2526 N94-23718

Similarity in wave propagation under a global relaxation law

[PB94-111028] p 2524 N94-23730

Analysis of time-domain acoustic wavefields in horizontally continuously layered configurations based on the modified Cagniard method

[PB94-111044] p 2524 N94-23731

Preliminary analysis of amplitude and phase fluctuations in the JAPE multiple tone data to distances of 500 meters p 2528 N94-24216

Dimensional analysis of acoustically propagated signals p 2528 N94-24217

Unstructured adaptive mesh computations of rotorcraft high-speed impulsive noise

[NASA-CR-195090] p 2529 N94-24307

The acoustic and instability waves of jets confined inside an acoustically lined rectangular duct

[NASA-CR-191586] p 2334 N94-24602

Responses of a finite baffled plate subject to turbulent and mean flow excitations

[NASA-CR-191570] p 2334 N94-24605

Global acoustic mapping of ocean temperatures (GAMOT)

[AD-A273387] p 2418 N94-24719

Preprocessor and adaptive beamformer for linear-frequency modulation active signals

[AD-D016008] p 2302 N94-25048

SOUNDING

Mars subsurface sounding with a ground penetrating radar p 2608 N94-23393

SOUNDING ROCKETS

PULSAUR 2

[NASA-CR-194832] p 2209 N94-23484

SOUTHERN HEMISPHERE

Northern hemisphere dust storms on Mars

p 2619 N94-24885

SOYBEANS

Chemical characterization of some aerobic liquids in CELSS p 2422 N94-23241

SPACE ADAPTATION SYNDROME

Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt?

[NASA-CR-188256] p 2427 N94-24227

SPACE CHARGE

Inverse free electron laser beat-wave accelerator research

[DE94-002597] p 2349 N94-23702

SPACE COMMERCIALIZATION

Space tourism: A flight of fantasy or the next major space product? Paper session 3: Products

[NASA-TM-109385] p 2194 N94-23710

National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers

[PB94-113487] p 2194 N94-23819

Access to space studies p 2199 N94-24434

NASA technology applications team: Applications of aerospace technology

[NASA-CR-194775] p 2597 N94-24494

Design of a lunar propellant processing facility. NASA/USRA advanced program

[NASA-CR-195502] p 2266 N94-24618

SPACE COMMUNICATION

The Telecommunications and Data Acquisition Report

[NASA-CR-194766] p 2290 N94-23256

Optical subnet concepts for the deep space network

p 2292 N94-23269

Future trends in NASA space operations

p 2498 N94-23836

A reference model for space data system interconnection services p 2305 N94-23847

Reliable transfer of data from ground to space

p 2305 N94-23908

Verification of technical elements of the advanced spacecraft based upon the CCSDS recommendation

p 2207 N94-23910

Digital test signal generation: An accurate SNR calibration approach for the DSN p 2305 N94-23912

A method for interference mitigation in space communications scheduling p 2305 N94-23918

New mission requirements methodologies for services provided by the Office of Space Communications

p 2519 N94-23961

Resource allocation planning with international components p 2520 N94-23963

Scheduling the future NASA Space Network: Experiences with a flexible scheduling prototype

p 2520 N94-23965

Failure detection and recovery in the assembly/contingency subsystem p 2306 N94-25360

SPACE DEBRIS

Power beaming to space using a nuclear reactor-pumped laser

[DE94-001208] p 2348 N94-23185

The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596

Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-58

[NASA-TM-109194] p 2200 N94-24577

Orbital debris and near-Earth environmental management: A chronology

[NASA-RP-1320] p 2598 N94-24644

Satellite situation report, volume 33, number 4

[NASA-TM-109677] p 2205 N94-24824

Design of orbital debris shields for oblique hypervelocity impact

[NASA-CR-195152] p 2205 N94-24828

SPACE ENVIRONMENT SIMULATION

Altitude simulation facility for testing large space motors p 2156 N94-24255

SPACE ERECTABLE STRUCTURES

Reliable redundant device for mechanisms

p 2361 N94-24030

SPACE EXPLORATION

Advanced nuclear thermal propulsion concepts

p 2217 N94-23068

Rover requirements for the planet surface segment of the space exploration initiative p 2369 N94-23377

Science strategy for Mars exploration

p 2606 N94-23380

Prospects for using mobile vehicles in missions to Mars and other planets p 2607 N94-23384

The robotic Mars rover p 2608 N94-23390

Mission and system concepts for Mars robotic precursor missions p 2608 N94-23391

Mission and system design of a long range rover mission p 2608 N94-23392

Mars 96 rover: Science, instrumentation, and control

p 2369 N94-23395

Balloon experiments at Mars 96 project

p 2608 N94-23396

Feasibility study of an automatic vehicle for planetary exploration p 2369 N94-23399

Electrical power technology for robotic planetary rovers p 2314 N94-23401

Walking machines for space p 2369 N94-23406

The mass of massive rover software

p 2464 N94-23410

Dual rover concept for Mars exploration

p 2370 N94-23415

Results of the Mojave tests of the Mars 96 rover

p 2370 N94-23416

The Jet Propulsion Laboratory space exploration: Past, present and future p 2153 N94-24242

NASA high performance computing and communications program

[NASA-TM-4554] p 2591 N94-24337

The 1993 NASA/ASEE Summer Faculty Fellowship Program

[NASA-CR-193862] p 2574 N94-24405

Demonstration of the feasibility of an integrated x ray laboratory for planetary exploration

[NASA-CR-177631] p 2598 N94-24832

The Ninth National Space Symposium

[ISBN-0-9616962-7-3] p 2598 N94-25006

The future of manned spaceflight

p 2195 N94-25067

SPACE FLIGHT

Mission engineering p 2505 N94-23881

Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt?

[NASA-CR-188256] p 2427 N94-24227

SPACE FLIGHT STRESS

Transfer of perceptual adaptation to space sickness: What enhances an individual's ability to adapt?

[NASA-CR-188256] p 2427 N94-24227

Artificial gravity in space flight

[AD-A273420] p 2427 N94-24928

SPACE HABITATS

Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion

[PB94-111374] p 2194 N94-23770

National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers

[PB94-113487] p 2194 N94-23819

Crew interface analysis: Selected articles on space human factors research, 1987 - 1991

[NASA-TM-104756] p 2433 N94-24185

Preliminary design of a universal Martian lander

[NASA-CR-195529] p 2206 N94-25007

SPACE LABORATORIES

Manned Space-laboratories Control Center (MSCC) operations concept p 2505 N94-23882

SPACE MAINTENANCE

An intelligent planning and scheduling system for the HST servicing missions p 2520 N94-23964

A simulation system for Space Station extravehicular activity p 2434 N94-24192
Design and simulation of EVA tools for first servicing mission of HST [NASA-CR-194784] p 2439 N94-24857

SPACE MISSIONS
Prospects for improved instrumentation on future solar space missions p 2624 N94-22843
Solar physics within NASA's planning p 2625 N94-22845
The next Japanese solar satellite p 2625 N94-22846
Prospects for very-high-resolution solar physics with the Simuris inteferometric mission p 2625 N94-22848
Requirements for future solar-physics missions with x ray instrumentation p 2625 N94-22849
Requirements for future solar-physics missions that include UV instrumentation p 2625 N94-22851
Mission and system concepts for Mars robotic precursor missions p 2608 N94-23391
Mission and system design of a long range rover mission p 2608 N94-23392
Electronic payloads for Martian missions: A preliminary assessment of technologies p 2610 N94-23408
OASIS-CC presentation p 2385 N94-23613
Commonality of flight control systems for support of European telecommunications missions p 2304 N94-23834
NASDA's view of ground control in mission operations p 2305 N94-23835
Future trends in NASA space operations p 2498 N94-23836
The space operations at CNES p 2498 N94-23837
Common front end systems for Space Shuttle and Space Station control centers at Johnson Space Center p 2305 N94-23838
Distributed science operations for JPL planetary missions p 2500 N94-23850
SCOS2: ESA's new generation of mission control systems p 2197 N94-23851
NASDA satellite mission operation system and operations p 2501 N94-23854
Mission activities planning for a Hermes mission by means of AI-technology p 2502 N94-23858
A review of mission planning systems p 2503 N94-23866
Techniques and software for optimum and efficient mission science sequence development p 2504 N94-23872
A packet-based concept for spacecraft command planning p 2504 N94-23873
Connecting science and operations: The operations coordinator p 2504 N94-23874
The instant sequencing task: Toward constraint-checking a complex spacecraft command sequence interactively p 2504 N94-23875
Generic mission planning concepts for space astronomy missions p 2505 N94-23878
A MOS for all seasons p 2505 N94-23879
An operations concept methodology to achieve low-cost mission operations p 2505 N94-23880
The Advanced Technology Operations System: ATOS p 2508 N94-23897
The application of total quality management principles to spacecraft mission operations p 2374 N94-23931
Mission operations and command assurance: Instilling quality into flight operations p 2374 N94-23932
Security aspects of space operations data p 2515 N94-23937
Mission and science activity scheduling language p 2515 N94-23938
Expert diagnostics system as a part of analysis software for power mission operations p 2516 N94-23944
Planning: Management of predictability and uncertainty and keeping abreast of developments p 2520 N94-23967
Estimating the Deep Space Network modification costs to prepare for future space missions by using major cost drivers p 2520 N94-23968
Space operations: Archiving space science data needs further management improvements. Report to the Chairman, Subcommittee on Investigations and Oversight, Committee on Science, Space, and Technology, House of Representatives [GAO/NSIAD-94-25] p 2591 N94-24092
Use of infrared telemetry as part of a nonintrusive inflight data collection system to collect human factors data p 2434 N94-24193
A mission to Mercury and a mission to the moons of Mars [NASA-CR-195530] p 2195 N94-24619
Ultraviolet, visible, and gravity astrophysics: A plan for the 1990's [NASA-NP-152] p 2603 N94-24973

SPACE NAVIGATION
Real-time on-board orbit determination with DORIS p 2196 N94-23919
TOPEX/Poseidon precision orbit determination production and expert system p 2196 N94-23920
A real-time navigation monitoring expert system for the Space Shuttle Mission Control Center p 2202 N94-23921
XRTD: An X-Windows based, real-time radiometric display and analysis system p 2305 N94-23922
Navigation of space VLBI missions: Radioastron and VSOP p 2513 N94-23926
Satellite autonomous navigation and orbit determination using magnetometers p 2156 N94-24258

SPACE OBSERVATIONS (FROM EARTH)
Scientific Requirements for Future Solar-Physics Space Missions [ESA-SP-1157] p 2623 N94-22837
Goals of ground-based solar observations p 2624 N94-22840
Prospects for future ground-based solar observations p 2624 N94-22842
Kamiokande results on solar neutrinos and a supernova search [ICRR-REPT-294-93-6] p 2627 N94-24961
Solar neutrinos: Real-time experiments [ICRR-REPT-293-93-5] p 2627 N94-24962
CO-to-H2 conversion factor in dwarf irregular galaxies [REPT-333] p 2603 N94-24985
High spatial resolution observations of CO in CRL 618 [REPT-334] p 2604 N94-24986

SPACE PERCEPTION
Perception and 3D environment modeling for mobile robot autonomous navigation [LAAS-93117] p 2471 N94-22908
Perception in flight: Shape and motion perception, space perception, spatial orientation, and visual vestibular interaction p 2429 N94-23979
Extracting heading and temporal range from optic flow: Human performance issues p 2442 N94-25510

SPACE PLASMAS
Prospects for very-high-resolution solar physics with the Simuris inteferometric mission p 2625 N94-22848
Evolution of large-scale plasma structures in comets: Kinematics and physics [NASA-CR-194777] p 2601 N94-23251
Development of a power electronics unit for the Space Station plasma contactor [NASA-TM-106486] p 2222 N94-25201

SPACE PLATFORMS
Ground data system for Space Flyer Unit (SFU) p 2207 N94-23860

SPACE POWER REACTORS
An F2D analysis of the Flow Instability Test (FIT) experiment [DE94-001420] p 2217 N94-23193
Assessment of an SP-100 bi-modal propulsion and power system [DE94-000889] p 2218 N94-23433
SP-100 heat transport technology development [DE94-000769] p 2218 N94-23452

SPACE PROCESSING
Processing of semicrystalline polymers p 2226 N94-24351

SPACE PROGRAMS
Solar physics and the Coronas project p 2625 N94-22847
National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers [PB94-113487] p 2194 N94-23819

SPACE RENDEZVOUS
Manned Mars mission on-orbit operations FTS capabilities assessment [NASA-CR-189328] p 2430 N94-23080

SPACE SHUTTLE BOOSTERS
Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61 [NASA-TM-109195] p 2199 N94-24059
Final postflight hardware evaluation report RSRM-32 (STS-57) [NASA-CR-193903] p 2200 N94-24065
Lightning tests and analyses of tunnel bond straps and shielded cables on the Space Shuttle solid rocket booster [NASA-CR-193921] p 2200 N94-24801
Postflight hardware evaluation (RSRM-29, STS-54) [NASA-CR-193895] p 2201 N94-24802

SPACE SHUTTLE MAIN ENGINE
SSME fuel preburner injector characterization p 2211 N94-23037
Flame trench analysis of NLS vehicles p 2199 N94-23249
Development of an analytical-numerical model to predict radiant emission or absorption [NASA-CR-194860] p 2453 N94-23624
System for Anomaly and Failure Detection (SAFD) system development [NASA-CR-193907] p 2372 N94-24174
CFD simulation of coaxial injectors p 2342 N94-24430
Space Shuttle Main Engine performance analysis p 2222 N94-24444
Using neural networks to assist in OPAD data analysis p 2477 N94-24452
Develop advanced nonlinear signal analysis topographical mapping system [NASA-CR-195128] p 2388 N94-24827

SPACE SHUTTLE MISSIONS
Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software p 2305 N94-23842
Final postflight hardware evaluation report RSRM-32 (STS-57) [NASA-CR-193903] p 2200 N94-24065

SPACE SHUTTLE ORBITERS
A real-time navigation monitoring expert system for the Space Shuttle Mission Control Center p 2202 N94-23921
Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61 [NASA-TM-109195] p 2199 N94-24059
Studies of Shuttle orbiter arrestment system [NASA-TP-3370] p 2177 N94-24304
Orbital docking system centerline color television camera system test [NASA-TM-104783] p 2205 N94-24625
Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles [NASA-CR-195163] p 2201 N94-24919

SPACE SHUTTLE PAYLOADS
Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software p 2305 N94-23842
The EURECA telecommanding chain: Experience with packet telecommand and telemetry systems p 2305 N94-23909

SPACE SHUTTLES
Hurricane risk assessment: Rollback or ride out p 2416 N94-23248
Implementing the space shuttle data processing system with the space generic open avionics architecture [NASA-CR-188254] p 2199 N94-23571
Common front end systems for Space Shuttle and Space Station control centers at Johnson Space Center p 2305 N94-23838
Ground data system for Space Flyer Unit (SFU) p 2207 N94-23860
Constraint-based scheduling p 2510 N94-23904
Liquid rocket propulsion: Retrospective and prospects p 2154 N94-24243
A compilation of technology spinoffs from the US Space Shuttle Program p 2578 N94-24424
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-58 [NASA-TM-109194] p 2200 N94-24577
Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle [NASA-TM-4533] p 2170 N94-24716
Parallel processing methods for space based power systems p 2222 N94-25352

SPACE STATION FREEDOM
Space Station Freedom (SSF) Data Management System (DMS) performance model data base [NASA-CR-188270] p 2590 N94-23289
Thermal control system for SSF sensor/electronics [SAND-92-0652C] p 2321 N94-23640
Ground operation of robotics on Space Station Freedom p 2371 N94-23841
Space Station Freedom ground data system: Design and operations p 2518 N94-23957
Connector mechanisms in compliance with extreme space conditions p 2360 N94-24025
Spacecraft crew procedures from paper to computers p 2433 N94-24186
Using computer graphics to design Space Station Freedom viewing p 2434 N94-24191
A simulation system for Space Station extravehicular activity p 2434 N94-24192
Space Station Freedom coupling tasks: An evaluation of their telerobotic and EVA compatibility p 2436 N94-24200
Simulation of the human-telerobot interface on the Space Station p 2436 N94-24202
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies p 2371 N94-24427
Optimal Space Station solar array gimbal angle determination via radial basis function neural networks [NASA-TM-106482] p 2195 N94-24482

Thermal control system for Space Station Freedom photovoltaic power module
[NASA-TM-105650] p 2205 N94-24825
Preliminary design of a satellite observation system for Space Station Freedom
[NASA-CR-195514] p 2209 N94-24840
Design of a resistojet for Space Station Freedom
[NASA-CR-195506] p 2221 N94-24979
A prototype to automate the video subsystem routing for the video distribution subsystem of Space Station Freedom p 2306 N94-25353
Modelling early failures in Space Station Freedom
p 2374 N94-25372
Modeling and analysis of selected space station communications and tracking subsystems
p 2306 N94-25374
Space Station flexible dynamics under plume impingement p 2208 N94-25383

SPACE STATION PAYLOADS
Columbus system support for telescience operations
p 2505 N94-23877

SPACE STATION POWER SUPPLIES
Thermal control system for Space Station Freedom photovoltaic power module
[NASA-TM-105650] p 2205 N94-24825

SPACE STATION STRUCTURES
Space Station flexible dynamics under plume impingement p 2208 N94-25383

SPACE STATIONS
Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion
[PB94-111374] p 2194 N94-23770
Common front end systems for Space Shuttle and Space Station control centers at Johnson Space Center
p 2305 N94-23838
Torque equilibrium attitudes for the Space Station
p 2208 N94-24449
Embodiment design for a multipropellant resistojet
[NASA-CR-195505] p 2221 N94-24834
Development of a power electronics unit for the Space Station plasma contactor
[NASA-TM-106486] p 2222 N94-25201
Failure detection and recovery in the assembly/contingency subsystem p 2306 N94-25360

SPACE STORAGE
Small rocket research and technology
p 2211 N94-23038

SPACE SUITS
Reach performance while wearing the Space Shuttle launch and entry suit during exposure to launch accelerations p 2436 N94-24204

SPACE TOOLS
Design and simulation of EVA tools for first servicing mission of HST
[NASA-CR-194784] p 2439 N94-24857

SPACE TRANSPORTATION
Flame trench analysis of NLS vehicles
p 2199 N94-23249
Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion
[PB94-111374] p 2194 N94-23770
National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers
[PB94-113487] p 2194 N94-23819
The 1993 NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-193862] p 2574 N94-24405
Access to space studies p 2199 N94-24434
Lunar transportation system
[NASA-CR-195540] p 2365 N94-24805
Space transfer vehicle concepts and requirements. Volume 4: Summary of special studies
[NASA-CR-193918] p 2201 N94-24970
The Ninth National Space Symposium
[ISBN-0-9616962-7-3] p 2598 N94-25006

SPACE TRANSPORTATION SYSTEM
A minimum cost tolerance allocation method for rocket engines and robust rocket engine design
p 2222 N94-24419
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
Future space transportation system architecture avionics requirements p 2162 N94-25098

SPACE TRANSPORTATION SYSTEM FLIGHTS
Common front end systems for Space Shuttle and Space Station control centers at Johnson Space Center
p 2305 N94-23838
Debris/Ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-61
[NASA-TM-109195] p 2199 N94-24059
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-58
[NASA-TM-109194] p 2200 N94-24577
Postflight hardware evaluation (RSRM-29, STS-54)
[NASA-CR-193895] p 2201 N94-24802

SPACE WEAPONS
A qualified radiation hardened nonvolatile memory for space and tactical weapons applications
[DE94-001211] p 2559 N94-23186

SPACE-TIME FUNCTIONS
Introduction to a behavioral approach for continuous time systems
[ETN-94-95301] p 2492 N94-25277
The scattering and collision of gravitational waves in Friedmann-Robertson-Walker open universes
[MATHS-REPT-A-193] p 2406 N94-25430

SPACEBORNE ASTRONOMY
Scientific Requirements for Future Solar-Physics Space Missions
[ESA-SP-1157] p 2623 N94-22837
Prospects for future ground-based solar observations
p 2624 N94-22842
Interferometric astronomy on the Moon
p 2601 N94-23378
Generic mission planning concepts for space astronomy missions p 2505 N94-23878
Hubble Space Telescope high speed photometer orbital verification
[NASA-CR-189333] p 2204 N94-24226
Structure in gamma ray burst time profiles: Correlations with other observables p 2579 N94-24431
LOLA: Lunar Optical Long-baseline Array. 1992-1993 space design
[NASA-CR-195533] p 2298 N94-24582
LOITA: Lunar Optical/Infrared Telescope Array
[NASA-CR-195532] p 2546 N94-24816
Investigation relative to the Roentgen Satellite (ROSAT)
[NASA-CR-195192] p 2600 N94-25269

SPACEBORNE EXPERIMENTS
Design of a surface deformation measuring instrument for the Surface Tension Driven Convection Experiment (STDCE-2)
[NASA-CR-194758] p 2343 N94-23285
PULSAUR 2
[NASA-CR-194832] p 2209 N94-23484
Columbus system support for telescience operations
p 2505 N94-23877
Spacecraft vibrations due to mechanisms; measurements from Olympus on-station
p 2207 N94-24018
Modeling of PCG fluid dynamics: Salient results
p 2224 N94-24345
Progress toward ultra-stable lasers for use in space
[NASA-TM-109678] p 2349 N94-24488

SPACEBORNE LASERS
Progress toward ultra-stable lasers for use in space
[NASA-TM-109678] p 2349 N94-24488

SPACEBORNE TELESCOPES
Scientific Requirements for Future Solar-Physics Space Missions
[ESA-SP-1157] p 2623 N94-22837
Prospects for improved instrumentation on future solar space missions p 2624 N94-22843
The next Japanese solar satellite
p 2625 N94-22846
Why put visible solar telescopes in space?
p 2600 N94-22850
Radioastron flight operations p 2502 N94-23861
An Earth observation telescope refocusing mechanism
p 2359 N94-24014
Precision Displacement Mechanism (PDM)
p 2360 N94-24026
LOLA: Lunar Optical Long-baseline Array. 1992-1993 space design
[NASA-CR-195533] p 2298 N94-24582
LOITA: Lunar Optical/Infrared Telescope Array
[NASA-CR-195532] p 2546 N94-24816

SPACECRAFT ANTENNAS
Electrical performance of wire mesh for spacecraft deployable reflector antennas p 2275 N94-22744
Precision Displacement Mechanism (PDM)
p 2360 N94-24026

SPACECRAFT BREAKUP
Orbital debris and near-Earth environmental management: A chronology
[NASA-RP-1320] p 2598 N94-24644

SPACECRAFT COMMUNICATION
Future trends in NASA space operations
p 2498 N94-23836
A user view of the EURECA ground segment
p 2499 N94-23844
The EURECA telecommanding chain: Experience with packet telecommand and telemetry systems
p 2305 N94-23909
Representing operations procedures using temporal dependency networks p 2305 N94-23914
Situation management in the Link Monitor and Control Operator Assistant (LMCOA) p 2305 N94-23915
Using Mach threads to control DSN operational sequences p 2477 N94-23916
Modeling and analysis of selected space station communications and tracking subsystems
p 2306 N94-25374

SPACECRAFT COMPONENTS
Metal band drives in spacecraft mechanisms
p 2355 N94-23987
Development of gears for space use
p 2360 N94-24021

SPACECRAFT CONFIGURATIONS
Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle
[NASA-TM-4533] p 2170 N94-24716
Near Earth asteroid rendezvous
[NASA-CR-195518] p 2195 N94-24808

SPACECRAFT CONSTRUCTION MATERIALS
Diffuse panel studies: Conclusions
p 2384 N94-23606
Establishment of computerized numerical databases on thermophysical and other properties of molten as well as solid materials and data evaluation and validation for generating recommended reliable reference data
p 2246 N94-25123

SPACECRAFT CONTAMINATION
Contamination control and plume assessment of low-energy thrusters
[NASA-TM-104585] p 2218 N94-23343
Microbiological analysis of debris from Space Transportation System (STS)-55 Spacelab D-2
[NASA-CR-193883] p 2421 N94-24310
Preliminary far-field plume sputtering characterization of the Stationary Plasma Thruster (SPT-100)
[NASA-TM-106464] p 2221 N94-24766

SPACECRAFT CONTROL
A user view of the EURECA ground segment
p 2499 N94-23844
SCOS2: ESA's new generation of mission control systems p 2197 N94-23851
Operations concepts for Mars missions with multiple mobile spacecraft p 2501 N94-23852
NASA/Goddard Space Flight Center's testbed for CCSDS compatible systems p 2197 N94-23855
The Ulysses spacecraft control and monitoring concepts and realities p 2502 N94-23862
The instant sequencing task: Toward constraint-checking a complex spacecraft command sequence interactively p 2504 N94-23875
AGENDA: A task organizer and scheduler
p 2504 N94-23876
A MOS for all seasons p 2505 N94-23879
AMFESYS: Modelling and diagnosis functions for operations support p 2506 N94-23887
ESSOPE: Towards S/C operations with reactive schedule planning p 2508 N94-23896
Customizing graphical user interface technology for spacecraft control centers p 2510 N94-23905
Automatic tools for system testing
p 2197 N94-23913
XRTD: An X-Windows based, real-time radiometric display and analysis system p 2305 N94-23922
The application of total quality management principles to spacecraft mission operations p 2374 N94-23931
Space Station Freedom ground data system: Design and operations p 2518 N94-23957
The 33rd Israel Annual Conference on Aviation and Astronautics
[ITN-94-85227] p 2153 N94-24241
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies
p 2371 N94-24427
An Earth albedo model: A mathematical model for the radiant energy input to an orbiting spacecraft due to the diffuse reflectance of solar radiation from the Earth below
[NASA-TM-104596] p 2195 N94-24497

SPACECRAFT DEFENSE
An engineering code to analyze hypersonic thermal management systems p 2320 N94-23636

SPACECRAFT DESIGN
Life cycle cost modeling of conceptual space vehicles
[NASA-CR-194813] p 2203 N94-23329
Soviet developments of planet rovers in period of 1964 - 1990 p 2369 N94-23374
Past US studies and developments for planetary rovers p 2369 N94-23375
Integrating payload design, planning, and control in the Dutch Utilisation Centre p 2207 N94-23869
A packet-based concept for spacecraft command planning p 2504 N94-23873
Long term trending of engineering data for the Hubble Space Telescope p 2516 N94-23942

An opening mechanism for the scientific airlock outer hatch p 2360 N94-24027
Crew interface analysis: Selected articles on space human factors research, 1987 - 1991
[NASA-TM-104756] p 2433 N94-24185
Conceptual design of a two stage to orbit spacecraft
[NASA-CR-195536] p 2204 N94-24620
WISPER: Wirless Space Power Experiment
[NASA-CR-195538] p 2396 N94-24701
Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle
[NASA-TM-4533] p 2170 N94-24716
Lunar transportation system
[NASA-CR-195540] p 2365 N94-24805
Near Earth asteroid rendezvous
[NASA-CR-195518] p 2195 N94-24808
Extended duration lunar lander
[NASA-CR-195527] p 2206 N94-24916
PERCIVAL mission to Mars
[NASA-CR-195541] p 2195 N94-24995
Preliminary design of a universal Martian lander
[NASA-CR-195529] p 2206 N94-25007
GRYPHON: Air launched space booster
[NASA-CR-195497] p 2199 N94-25022

SPACECRAFT DOCKING
Manned Mars mission on-orbit operations FTS capabilities assessment
[NASA-CR-189328] p 2430 N94-23080
Telerobotic rendezvous and docking vision system architecture
[NASA-CR-191329] p 2204 N94-23828
Docking mechanisms: An overview of different systems p 2357 N94-24004
Orbital docking system centerline color television camera system test
[NASA-TM-104783] p 2205 N94-24625

SPACECRAFT ELECTRONIC EQUIPMENT
Advanced mobile satellite communications using COMETS satellite in MM-wave and Ka-band
p 2288 N94-22829

SPACECRAFT ENVIRONMENTS
Connector mechanisms in compliance with extreme space conditions p 2360 N94-24025

SPACECRAFT GUIDANCE
A real-time navigation monitoring expert system for the Space Shuttle Mission Control Center
p 2202 N94-23921
Space Station Freedom ground data system: Design and operations p 2518 N94-23957
Satellite autonomous navigation and orbit determination using magnetometers p 2156 N94-24258
Intelligent systems and advanced user interfaces for design, operation, and maintenance of command management systems
[NASA-CR-195172] p 2459 N94-24797

SPACECRAFT INSTRUMENTS
Distributed science operations for JPL planetary missions p 2500 N94-23850
A packet-based concept for spacecraft command planning p 2504 N94-23873
An Earth albedo model: A mathematical model for the radiant energy input to an orbiting spacecraft due to the diffuse reflectance of solar radiation from the Earth below
[NASA-TM-104596] p 2195 N94-24497

SPACECRAFT LAUNCHING
Channel and terminal description of the ACTS mobile terminal p 2284 N94-22802
Hurricane risk assessment: Rollback or ride out
p 2416 N94-23248
GPHS-RTG's in support of the Cassini mission
[DE94-001445] p 2218 N94-23459
Galileo spacecraft anomaly and safing recovery
p 2207 N94-23864
A MOS for all seasons p 2505 N94-23879
HISPASAT launch and early operations phases: Computation and monitoring of geostationary satellite positioning p 2514 N94-23928
Preloaded launch locking devices for SILEX
p 2358 N94-24008
Reach performance while wearing the Space Shuttle launch and entry suit during exposure to launch accelerations p 2436 N94-24204
Design of an airborne launch vehicle for an air launched space booster
[NASA-CR-195534] p 2198 N94-24860

SPACECRAFT MAINTENANCE
Graphical programming: A systems approach for telerobotic servicing of space assets
[DE93-019016] p 2472 N94-23201
Task 1: Health management demonstration. Task 2: Process management environment and support of enterprise integration. Task 3: New algorithm development in the PME
[NASA-CR-188268] p 2430 N94-23290
Life cycle cost modeling of conceptual space vehicles
[NASA-CR-194813] p 2203 N94-23329
Ground operation of robotics on Space Station Freedom p 2371 N94-23841
A simulation system for Space Station extravehicular activity p 2434 N94-24192
Illumination requirements for operating a space remote manipulator p 2435 N94-24195
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies
p 2371 N94-24427
A comparative evaluation plan for the Maintenance, Inventory, and Logistics Planning (MILP) System Human-Computer Interface (HCI) p 2588 N94-25373

SPACECRAFT MANEUVERS
XRTD: An X-Windows based, real-time radiometric display and analysis system p 2305 N94-23922
Kalman filtering applied to real-time monitoring of apogee maneuvers p 2196 N94-23923

SPACECRAFT PERFORMANCE
Orbital Signature Analyzer (OSA): A spacecraft health/safety monitoring and analysis tool
p 2203 N94-23947

SPACECRAFT POSITION INDICATORS
Satellite autonomous navigation and orbit determination using magnetometers p 2156 N94-24258

SPACECRAFT POWER SUPPLIES
Power beaming to space using a nuclear reactor-pumped laser
[DE94-001208] p 2348 N94-23185
Aerospace applications of batteries
p 2390 N94-23346
Review of super Ni/Cd cell designs and performance
p 2391 N94-23348
Impedance measurements on a spiral-wound nickel/metal hydride cell cycled in a simulated Leo orbit
p 2392 N94-23355
NASA Lewis advanced IPV nickel-hydrogen technology p 2392 N94-23356
Primary and secondary electrical space power based on advanced PEM systems p 2392 N94-23357
A high performance H2-Cl2 fuel cell for space power applications p 2394 N94-23366
The mass of massive rover software
p 2464 N94-23410
Assessment of an SP-100 bi-modal propulsion and power system
[DE94-000889] p 2218 N94-23433
GPHS-RTG's in support of the Cassini mission
[DE94-001445] p 2218 N94-23459
Low power ground-based laser illumination for electric propulsion applications
[NASA-CR-194444] p 2219 N94-23555
A review of wiring system safety in space power systems
[NASA-CR-194439] p 2203 N94-23632
The Submillimeter Wave Astronomy Satellite (SWAS) solar array system p 2361 N94-24029
Near Earth asteroid rendezvous
[NASA-CR-195518] p 2195 N94-24808
Extended duration lunar lander
[NASA-CR-195527] p 2206 N94-24916
Parallel processing methods for space based power systems p 2222 N94-25352

SPACECRAFT PROPULSION
Advanced space propulsion concepts
p 2216 N94-23067
Advanced nuclear thermal propulsion concepts
p 2217 N94-23068
An antiproton driver for ICF propulsion
p 2217 N94-23069
Lewis Research Center R and D Facilities
[NASA-TM-109400] p 2630 N94-23135
Ovonic nickel metal hydride batteries for space applications p 2391 N94-23352
Assessment of an SP-100 bi-modal propulsion and power system
[DE94-000889] p 2218 N94-23433
The 33rd Israel Annual Conference on Aviation and Astronautics
[ITN-94-85227] p 2153 N94-24241
NPS alternate techsat satellite, design project for AE-4871
[NASA-CR-195512] p 2204 N94-24590
Numerical simulation of cylindrical, self-field MPD thrusters with multiple propellants
[NASA-CR-194458] p 2220 N94-24714
Near Earth asteroid rendezvous
[NASA-CR-195518] p 2195 N94-24808
Embodiment design for a multipropellant resistojet
[NASA-CR-195505] p 2221 N94-24834

SPACECRAFT RADIATORS
Heat pipe cooled heat rejection subsystem modelling for nuclear electric propulsion
[NASA-CR-191132] p 2219 N94-24061

SPACECRAFT REENTRY
Development and application of an empirical probability distribution for the prediction error of re-entry body maximum dynamic pressure p 2207 N94-23653

SPACECRAFT RELIABILITY
Task 1: Health management demonstration. Task 2: Process management environment and support of enterprise integration. Task 3: New algorithm development in the PME
[NASA-CR-188268] p 2430 N94-23290
The development of the SOHO SUMER mechanisms
p 2361 N94-24028
Reliable redundant device for mechanisms
p 2361 N94-24030
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-195128] p 2388 N94-24827

SPACECRAFT SHIELDING
Magnetic shielding of interplanetary spacecraft against solar flare radiation
[NASA-CR-195539] p 2204 N94-24334
Design of orbital debris shields for oblique hypervelocity impact
[NASA-CR-195152] p 2205 N94-24828

SPACECRAFT STABILITY
Numerical simulation of Ulysses nutation
p 2207 N94-24017
Spacecraft vibrations due to mechanisms; measurements from Olympus on-station
p 2207 N94-24018

SPACECRAFT STRUCTURES
The Submillimeter Wave Astronomy Satellite (SWAS) solar array system p 2361 N94-24029
Reliable redundant device for mechanisms
p 2361 N94-24030
Extended duration lunar lander
[NASA-CR-195527] p 2206 N94-24916

SPACECRAFT SURVIVABILITY
Development and application of an empirical probability distribution for the prediction error of re-entry body maximum dynamic pressure p 2207 N94-23653

SPACECRAFT TEMPERATURE
A comparison of TSS and TRASYS in form factor calculation p 2321 N94-23638

SPACECRAFT TRACKING
SpaceOps 1992: Proceedings of the Second International Symposium on Ground Data Systems for Space Mission Operations
[NASA-CR-194486] p 2497 N94-23832
Future trends in NASA space operations
p 2498 N94-23836
Magellan spacecraft and memory state tracking: Lessons learned, future thoughts p 2207 N94-23865
GSMS and space views: Advanced spacecraft monitoring tools p 2507 N94-23890
VMPLOT: A versatile analysis tool for mission operations p 2507 N94-23891
Combining real-time monitoring and knowledge-based analysis in MARVEL p 2477 N94-23900
Resource allocation planning with international components p 2520 N94-23963
Scheduling the future NASA Space Network: Experiences with a flexible scheduling prototype
p 2520 N94-23965
Modeling and analysis of selected space station communications and tracking subsystems
p 2306 N94-25374

SPACECRAFT TRAJECTORIES
Nearly uniform deployment/retrieval strategy for space tether systems p 2156 N94-24256

SPACECREWS
Mission activities planning for a Hermes mission by means of AI-technology p 2502 N94-23858
Crew interface analysis: Selected articles on space human factors research, 1987 - 1991
[NASA-TM-104756] p 2433 N94-24185
Use of infrared telemetry as part of a nonintrusive inflight data collection system to collect human factors data
p 2434 N94-24193
Illumination requirements for operating a space remote manipulator p 2435 N94-24195
Reach performance while wearing the Space Shuttle launch and entry suit during exposure to launch accelerations p 2436 N94-24204
Development of biomechanical models for human factors evaluations p 2437 N94-24205

SPACELAB
Microbiological analysis of debris from Space Transportation System (STS)-55 Spacelab D-2
[NASA-CR-193883] p 2421 N94-24310

SPALLATION
Optical model analyses of galactic cosmic ray fragmentation in hydrogen targets
[NASA-TP-3404] p 2540 N94-23509

SPATIAL DISTRIBUTION

Lightning studies using LDAR and LLP data p 2416 N94-23238

Spatial and temporal variability of soil temperature, moisture and surface soil properties [NASA-CR-194109] p 2401 N94-23337

Tools for visualizing landscape pattern for large geographic areas [DE94-001121] p 2388 N94-24757

Dynamics of the atmosphere of Mars: Review of some outstanding problems p 2620 N94-24888

Seafloor characterization/Galapagos propagating rift [AD-A273586] p 2419 N94-25165

SPATIAL FILTERING

Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS p 2283 N94-22795

Characterization of germanium stripe x ray lasers [DE93-019629] p 2347 N94-22867

SPATIAL RESOLUTION

Prospects for future ground-based solar observations p 2624 N94-22842

ASTER, a multinational Earth observing concept p 2389 N94-23840

Evaluation of image quality p 2443 N94-25514

SPECIFIC HEAT

Magnetic phases in UNiGe [DE94-000793] p 2239 N94-22939

Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124

A thermodynamic approach to obtain materials properties for engineering applications p 2248 N94-25131

Microwave techniques for physical property measurements p 2238 N94-25134

SPECIFIC IMPULSE

Analysis and experiments of a whistler-wave plasma thruster [DE94-001533] p 2209 N94-23012

CFD modeling of microwave electrothermal thrusters p 2216 N94-23066

Design considerations of hybrid rockets p 2156 N94-24254

SPECIFICATIONS

Setting test limits under prescribed consumer loss [MEMO-1107] p 2478 N94-22725

Tools reference manual for a Requirements Specification Language (RSL), version 2.0 [NASA-CR-191461] p 2445 N94-23125

Specifications of ETS, the Enhanced Transport Service [RR-907-I] p 2589 N94-23150

Towards the formal specification of the requirements and design of a processor interface unit: HOL listings [NASA-CR-191465] p 2466 N94-23252

Towards the formal verification of the requirements and design of a processor interface unit [NASA-CR-4522] p 2467 N94-24075

Design and specification of a centralized manufacturing data management and scheduling system p 2577 N94-24416

SPECTRA

Factors affecting the identification of phytoplankton groups by means of remote sensing [NASA-TM-108799] p 2387 N94-24403

SPECTRAL BANDS

ASTER, a multinational Earth observing concept p 2389 N94-23840

Excitation mechanisms for XUV and x ray lasers [DE93-617006] p 2351 N94-25482

SPECTRAL EMISSION

Voyager planetary radio astronomy studies [NASA-CR-194776] p 2614 N94-24328

Using contour maps to search for red-shifted 511 keV features in BATSE GRB spectra p 2585 N94-24455

Liquidus temperature and optical properties measurement by containerless techniques p 2247 N94-25126

Optical properties and emissivities of liquid metals and alloys p 2248 N94-25129

SPECTRAL LINE WIDTH

Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3 [DE93-613824] p 2566 N94-25332

SPECTRAL METHODS

Rigorous analysis of thick microstrip antennas and wire antennas embedded in a substrate [EUT-92-E-263] p 2290 N94-22876

Relaxation schemes for Chebyshev spectral multigrid methods p 2484 N94-23688

Multi-grid domain decomposition approach for solution of Navier-Stokes equations in primitive variable form p 2341 N94-23693

On the dynamics of approximating schemes for dissipative nonlinear equations p 2332 N94-24168

Triangular spectral elements for incompressible fluid flow [NASA-CR-191588] p 2490 N94-24914

SPECTRAL REFLECTANCE

Optical component MAC Europe ground truth report: Flevoland 1991 (Netherlands) [BCRS-92-27] p 2382 N94-23177

The measurement and analysis of leaf spectral reflectance of two stands of loblolly pine populations p 2389 N94-24442

SPECTROMETERS

Magnetic resonance study of zinc-related defects in silicon with optimized EPR spectrometer [PB93-224640] p 2561 N94-23223

Measurement of HO2 and other trace gases in the stratosphere using a high resolution far-infrared spectrometer [NASA-CR-195173] p 2404 N94-24738

Performance of inverse photoemission spectrometer with a new bandpass photon detector of narrow bandwidth and high sensitivity [REPT-A-2659] p 2345 N94-24977

Experimental characterization of the AFIT Neutron Facility [AD-A273822] p 2539 N94-25519

SPECTRORADIOMETERS

Concept of ASTER calibration requirement p 2384 N94-23609

The measurement and analysis of leaf spectral reflectance of two stands of loblolly pine populations p 2389 N94-24442

SPECTROSCOPIC ANALYSIS

Spectroscopic IR ellipsometry of 100 and 001 oriented YBa2Cu3O(7-delta) films [PB93-201481] p 2561 N94-23445

Ultrastructure processing of macromolecular materials [AD-A273413] p 2258 N94-24782

Electrochemical behavior of ion-plated TiN and Cu-Cr coatings [AD-A273411] p 2235 N94-24784

Investigation of the solid-solid surface adsorption of Eu2O3 on amorphous Al2O3 [DE93-613824] p 2566 N94-25332

SPECTROSCOPY

Inelastic electron scattering from surfaces [DE94-001368] p 2531 N94-22733

Flue gas cleaning by pulse corona streamer [EUT-93-E-272] p 2268 N94-23174

Evaluation of inorganic zinc-rich primers using Electrochemical Impedance Spectroscopy (EIS) p 2237 N94-23233

Strong interactions studies with medium energy probes [DE94-001446] p 2540 N94-23791

On the mechanism of action of 3',5'-cyclic adenosine monophosphate: A study of four- and five-coordinated phosphorus compounds, modelling the activated state of cAMP [ISBN-9-03-860222-7] p 2226 N94-25238

CsI(Tl)-photodiode detectors for spectroscopy at low radiation levels [MPI-PHE/92-22] p 2314 N94-25457

SPECTRUM ANALYSIS

Laser linewidth measurement in the presence of RIN and using the recirculating self heterodyne method [EUT-92-E-262] p 2347 N94-22874

Electron spectroscopic studies of the neutralization of slow multicharged ions during interactions with a metal surface [DE93-041046] p 2532 N94-22956

The soft x ray halo of the spiral galaxy NGC4631 [NASA-CR-194820] p 2601 N94-23537

A rail joint: The possible initiator of corrugation? p 2269 N94-23583

Data analysis and theoretical studies of the upper mesosphere and lower thermosphere [NASA-CR-195108] p 2402 N94-24089

An investigation into acceleration determination for airborne gravimetry using the global positioning system [ISBN-0-315-59470-5] p 2175 N94-24176

ACES spectral display software: Software description [SK-1600-99-003] p 2455 N94-24297

On the analysis of clear air radar echoes severely contaminated by clutter p 2306 N94-24423

The measurement and analysis of leaf spectral reflectance of two stands of loblolly pine populations p 2389 N94-24442

Optical wavelet transform processor [AD-A273625] p 2546 N94-24731

Method for selection of wavelength bands for multispectral classification [PB93-204378] p 2388 N94-24741

Laboratory detection of C5S by pulsed-discharge-nozzle Fourier-transform microwave spectroscopy [JTN-94-80519] p 2235 N94-24984

Radar target discrimination by spectrum analysis [AD-D015982] p 2301 N94-25040

On the hadron formation time in pion-nucleus interaction [DE93-616879] p 2539 N94-25476

High latitude cusp signature observations for southward IMF B sub Z [AD-A273801] p 2406 N94-25536

SPEECH

Algorithms for speech coding systems based on linear prediction [EUT-92-E-260] p 2447 N94-22731

SPEECH RECOGNITION

Performing speech recognition research with hypercard p 2306 N94-24194

Psychophysical and signal-processing aspects of speech representation [ETN-94-95292] p 2302 N94-25077

On the quality of synthetic speech evaluation and improvements [ETN-94-95298] p 2304 N94-25234

Linear and nonlinear adaptive filtering and their application to speech intelligibility enhancement [ISBN-9-09-005342-5] p 2304 N94-25292

SPEED CONTROL

Gas turbine and operating method of the same [CA-PATENT-APPL-SN-2043039] p 2188 N94-24490

SPHERES

Static image method for computing the electric potential due to sources in a layered sphere [PB93-224970] p 2308 N94-23105

Polarizability of gyrotropic sphere [PB93-225019] p 2524 N94-23131

Fingered bola body, bola with same, and methods of use [NASA-CASE-MSC-21967-1] p 2354 N94-23822

BEM solution for the simulation of axisymmetric viscous sintering [PB93-237717] p 2336 N94-24761

Experimental characterization of the AFIT Neutron Facility [AD-A273822] p 2539 N94-25519

SPHERICAL COORDINATES

Note on the use of spherical vectorfields in Clifford analysis [PB93-237667] p 2480 N94-23437

SPHEROIDS

Monoclonal antibodies directed against surface molecules of multicell spheroids [NASA-CR-195102] p 2420 N94-23633

SPIN DYNAMICS

The structure and spin dynamics of lanthanide-bearing silicate glasses [DE94-001320] p 2252 N94-22992

Spin fluctuations in an ordered Heisenberg ferromagnet with dipolar interactions [PB93-204493] p 2524 N94-24533

SPIN EXCHANGE

Derivation of the macroscopic rate equations for the driven diffusive Ising model at pair level of approximation [DE93-616839] p 2524 N94-25208

SPIN RESONANCE

Polarized structure functions of the nucleon in the resonance region [CEBAF-PR-94-001] p 2540 N94-24663

SPIN-LATTICE RELAXATION

Interplay of magnetic and superconducting heavy fermion ground states [DE94-000680] p 2240 N94-23003

SPIRAL ANTENNAS

Low cost antennas for MSAT vehicular applications p 2289 N94-22830

SPIRAL GALAXIES

The soft x ray halo of the spiral galaxy NGC4631 [NASA-CR-194820] p 2601 N94-23537

SPLINE FUNCTIONS

Relativistic configuration interaction calculation of the correlation energies of highly-charged ions [DE94-001055] p 2532 N94-22988

SPLINES

Spline screw multiple rotations mechanism [NASA-CASE-GSC-13452-1] p 2352 N94-23078

Split spline screw [NASA-CASE-GSC-13434-1] p 2352 N94-23082

SPOT (FRENCH SATELLITE)

The space operations at CNES p 2498 N94-23837

SPOT satellite family: Past, present, and future of the operations in the mission and control center p 2500 N94-23846

SPOT4 Operational Control Center (CMP) p 2197 N94-23856

AGENDA: A task organizer and scheduler p 2504 N94-23876

Real-time on-board orbit determination with DORIS p 2196 N94-23919

SPRAY CHARACTERISTICS
Droplet turbulence interactions under subcritical and supercritical conditions p 2211 N94-23036
Development of a droplet breakup model considering aerodynamic and droplet collision effects p 2213 N94-23045
Shear coaxial injector instability mechanisms p 2213 N94-23047
SPRAY NOZZLES
Extinguishment of enclosed gas fires with water sprays [PB93-201663] p 2268 N94-23430
SPRAYED COATINGS
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 2: Effect of spray parameters on the performance of several hafnia-yttria and zirconia-yttria coatings [NASA-TP-3296] p 2242 N94-23467
Plasma sprayed thermal barrier coatings: Production, characterization and testing [ISBN-9-03-860082-8] p 2555 N94-25439
SPRAYERS
Development of a droplet breakup model considering aerodynamic and droplet collision effects p 2213 N94-23045
Extinguishment of enclosed gas fires with water sprays [PB93-201663] p 2268 N94-23430
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
SPRAYING
Droplet turbulence interactions under subcritical and supercritical conditions p 2211 N94-23036
Numerical parametric studies of spray combustion instability p 2212 N94-23041
SPREAD SPECTRUM TRANSMISSION
ACTS advanced system concepts and experimentation p 2280 N94-22780
Odyssey personal communications satellite system p 2282 N94-22787
DS-SSMA capacity for a mobile satellite system p 2286 N94-22814
Coding for frequency hopped spread spectrum satellite communications [ECE-91-1] p 2296 N94-24132
Analysis of time-diversity combining methods for frequency-hopped signals [CU-DOE-92-09] p 2300 N94-24694
Composite sequences for rapid acquisition of direct-sequence spread spectrum signals [CTN-94-60901] p 2300 N94-24696
Coding for frequency hopped spread spectrum satellite communications [ECE-92-1] p 2300 N94-24697
SPUTNIK SATELLITES
The birth of NASA: The diary of T. Keith Glennan [NASA-SP-4105] p 2630 N94-23333
SPUTTERING
Research on polycrystalline thin-film CuInGaSe2 solar cells [DE94-000203] p 2560 N94-23205
Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules [DE94-000220] p 2390 N94-23296
Selective hydrogen separation by palladium-based composite membranes [PB93-201671] p 2254 N94-23431
The statistics of sputtering [DE94-001128] p 2243 N94-23715
Thin film cadmium telluride photovoltaic cells [DE94-000201] p 2395 N94-24509
Preliminary far-field plume sputtering characterization of the Stationary Plasma Thruster (SPT-100) [NASA-TM-106464] p 2221 N94-24766
Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition [DE93-613909] p 2555 N94-25333
STABILITY
Stable non-Gaussian diffusive profiles [PB93-238053] p 2489 N94-24610
Numerical analysis of the motion of a rigid body with an attached spring-mass-damper [AD-A273825] p 2379 N94-25520
STABILITY DERIVATIVES
LinAir: A multi-element discrete vortex Weissinger aerodynamic prediction method [NASA-TM-108786] p 2167 N94-23557
STABILITY TESTS
Stability analysis of anisotropic conical shells [PB94-119054] p 2377 N94-24645
Stability of premixed laminar flames in a stagnation point flow to general disturbances [AD-A273429] p 2234 N94-24673
STABILIZATION
Median stabilization degree of a median algebra [PB93-220010] p 2479 N94-23093
Stabilization of the external kink and other MHD issues [DE94-001541] p 2552 N94-24502
Genericity of stabilizability for time-delay systems [PB93-237725] p 2475 N94-24762
Preliminary results on time-varying feedback stabilization of a nonholonomic car-like mobile robot [INRIA-RR-1512] p 2475 N94-24963
STAGGERING
FAS multigrid calculations of three dimensional flow using non-staggered grids p 2341 N94-23675
STAGNATION POINT
Stability of hypersonic flow of a detonable gas mixture in the stagnation region of a blunt body and a forward facing step p 2154 N94-24248
Stagnation region heat transfer: The influence of turbulence parameters, Reynolds number and body shape [NASA-TM-106504] p 2334 N94-24481
Stability of premixed laminar flames in a stagnation point flow to general disturbances [AD-A273429] p 2234 N94-24673
Measurements of the influence of integral length scale on stagnation region heat transfer [NASA-TM-106503] p 2338 N94-25183
STAGNATION PRESSURE
Probe shapes that measure time-averaged streamwise momentum and cross-stream turbulence intensity [NASA-CASE-ARC-11934-1] p 2317 N94-23077
STAINLESS STEELS
Tensile properties of 21-6-9 stainless steel at elevated temperatures [DE94-001852] p 2240 N94-23017
Stress corrosion cracking properties of 15-5PH steel p 2251 N94-23244
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel [DE94-000466] p 2242 N94-23457
JBK-75 stainless steel machinability study [DE94-002268] p 2242 N94-23475
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies p 2371 N94-24427
Welding of niobium to stainless [DE94-003365] p 2365 N94-24614
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues [AD-A273663] p 2251 N94-25450
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3B: Corrosion: Specific issues [AD-A273664] p 2251 N94-25451
STANDARD DEVIATION
Estimates of monthly mean soil moisture for 1979-1989 [NASA-TM-104571] p 2407 N94-23132
STANDARDIZATION
High-rate data link general specification for the NOAA-OPQ polar orbiting environmental satellites and EUMETSAT satellite systems [NASA-TM-109384] p 2208 N94-23481
Definitions in use by the visible and near-infrared, and thermal working groups p 2383 N94-23598
Activities of NIST (National Inst. of Standards and Technology) p 2384 N94-23605
NASA/Goddard Space Flight Center's testbed for CCSDS compatible systems p 2197 N94-23855
Interoperability through standardization: Electronic mail, and X Window systems p 2575 N94-24406
A simulation and evaluation of NATO Standardization Agreement (STANAG) 4214 [AD-A273195] p 2297 N94-24554
Solid state Time Base Corrector (TBC) [AD-D015981] p 2312 N94-25039
STANDARDS
Guide to software configuration management [ESA-PSS-05-09-ISSUE-1] p 2450 N94-23229
Impacts: NIST Building and Fire Research Laboratory (technical and societal) [PB94-113420] p 2270 N94-23737
US tag for ISO/TC 108 mechanical vibration and shock: Minutes of the accredited Standards Committee on Mechanical Vibration and Shock, S2 [AD-A273015] p 2376 N94-23789
STANDING WAVE RATIOS
Phase linearity of the 914H coupled-cavity traveling wave tube [NASA-CR-191056] p 2290 N94-23087
STAR FORMATION
ROSAT observations of the x ray binary HD 154791 [NASA-CR-195189] p 2600 N94-25198
STATE ESTIMATION
A mixed map/variable structure observer for target tracking p 2157 N94-24263
STATIC CHARACTERISTICS
Extending substructure based iterative solvers to multiple load and repeated analyses [NASA-CR-194822] p 2466 N94-23504
STATIC LOADS
Foil bearings p 2371 N94-24415
Nonlinear equations of motion for a panel subject to external loads [AD-A273142] p 2170 N94-24773
STATIC PRESSURE
Bridgman's concern [DE93-040900] p 2558 N94-22953
Probe systems for measuring static pressure and turbulence intensity in fluid streams [NASA-CASE-ARC-11935-1] p 2319 N94-23306
Experimental cavity pressure measurements at subsonic and transonic speeds. Static-pressure results [NASA-TP-3358] p 2169 N94-24464
STATIC TESTS
Optimization of laminate orientation to enhance failure properties [ISBN-0-315-83539-7] p 2227 N94-22892
Summary of lift and lift/cruise fan powered lift concept technology [NASA-CR-177619] p 2176 N94-23489
Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe [AD-A273830] p 2571 N94-25524
STATICS
Mass properties measurement system: Dynamics and statics measurements p 2368 N94-23236
STATIONKEEPING
CNES organization for station positioning of geostationary satellites p 2501 N94-23857
The geo-control system for station keeping and colocation of geostationary satellites p 2464 N94-23927
Nearly uniform deployment/retrieval strategy for space tether systems p 2156 N94-24256
STATISTICAL ANALYSIS
Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination [PB93-224152] p 2559 N94-23109
Maximal type test statistics based on conditional processes [PB94-111614] p 2494 N94-23771
Decision making with imprecise probabilities [PB94-111622] p 2494 N94-23772
Asymptotic confidence intervals for the length of the shortt under random censoring [PB93-237816] p 2494 N94-23774
Some generalized subset selection procedures [PB94-111655] p 2487 N94-23799
Specifying design conservatism: Worst case versus probabilistic analysis p 2374 N94-23939
Computation of large-scale statistics in decaying isotropic turbulence p 2332 N94-24167
Attachment methods in composite joints - analysis of test results by controlled experiments method p 2158 N94-24269
Verification and validation of models [PB94-110566] p 2456 N94-24507
Tail processes under heavy random censorship with applications [PB94-110632] p 2495 N94-24508
A comparison of approximate interval estimators for the Bernoulli parameter [NASA-CR-191585] p 2458 N94-24680
Annual review of aircraft accident data. US general aviation calendar year 1990 [PB94-126869] p 2173 N94-24841
Statistical methods in physical oceanography [AD-A273612] p 2419 N94-24948
A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure [AD-A273488] p 2427 N94-24950
Correlation function estimator performance in non-Gaussian spherically invariant random processes [AD-A273498] p 2496 N94-24951
Neutron star mergers and gamma-ray bursts [NASA-CR-195176] p 2629 N94-25091
NASA STI program database: Journal coverage (1990-1992) [NASA-TM-109720] p 2593 N94-25168
Designs with a small number of runs for factorial experiments [ISBN-9-03-860162-X] p 2462 N94-25237
Solving the ranking and selection indifference-zone formulation for normal distributions using computer software [AD-A273821] p 2496 N94-25518

A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements
[AD-A273803] p 2406 N94-25537

STATISTICAL CORRELATION
Correlations in the actions of periodic orbits derived from quantum chaos
[DE93-616866] p 2571 N94-25340

STATISTICAL DECISION THEORY
Bayesian decision theory with imprecise prior probabilities applied to replacement problems
[PB93-237634] p 2481 N94-23456

STATISTICAL DISTRIBUTIONS
Limiting distribution of fractional parts of extreme order statistics
[PB93-237733] p 2494 N94-23440
Maximal type test statistics based on conditional processes
[PB94-111614] p 2494 N94-23771
Infinite divisible and stable distributions modulo 1
[PB94-110640] p 2495 N94-23815
A comparison of approximate interval estimators for the Bernoulli parameter
[NASA-CR-191585] p 2458 N94-24680
Infinitely divisible processes and their nonlinear functionals; a study of their structural, statistical and sample path properties and their prediction problems
[AD-A273468] p 2496 N94-25147

STATISTICAL MECHANICS
Fracture simulations via massively parallel molecular dynamics
[DE93-040159] p 2374 N94-22871

STATOR BLADES
Simulation of unsteady flows through stator and rotor blades of a gas turbine using the Chimera method
p 2323 N94-23652

STEADY FLOW
Detailed description of two calculation programs for incompressible, steady state boundary layer flows, applied to determine the aerodynamic characteristics of NACA12 and OA312 foils at low Reynolds numbers
[ISL-N-604/92] p 2171 N94-25461

STEADY STATE
On the estimation of the correlation dimension and its application to radar reflector discrimination
[NASA-CR-4564] p 2309 N94-23304
A direct approach to finding unknown boundary conditions in steady heat conduction
p 2322 N94-23645
A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667
Numerical solution of flame sheet problems with and without multigrid methods p 2237 N94-23683
Enhanced absorption cycle computer model
[DE94-001997] p 2271 N94-23793
Space Shuttle Main Engine performance analysis
p 2222 N94-24444

STEAM
Second law analysis of a conventional steam power plant p 2322 N94-23646
Evaluation of reducing gas turbine emissions through hydrogen-enhanced steam-injected combustion
[PB94-109873] p 2187 N94-23709

STEEL STRUCTURES
Fire safety engineering research in Norway
[PB93-201630] p 2268 N94-23429

STEELS
Thermal fatigue: A literature review
[PB93-226306] p 2375 N94-23120
Weld cladding of hard surfaces
[PB93-201598] p 2353 N94-23448
Impacts: NIST Building and Fire Research Laboratory (technical and societal)
[PB94-113420] p 2270 N94-23737
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090
Thermophysical property sensitivity effects in steel solidification p 2246 N94-25122
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448

STEERABLE ANTENNAS
Adaptive array antenna for satellite cellular and direct broadcast communications p 2275 N94-22745

STEERING
Aeronautical satellite antenna steering using magnetic field sensors p 2289 N94-22836
Cockpit control system conceptual design
[NASA-CR-195543] p 2190 N94-24551

STELLAR ATMOSPHERES
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
Model atmosphere analysis of selected luminous B stars
[NASA-CR-195098] p 2599 N94-24051
The solar spectral irradiances from x ray to radio wavelengths
[NASA-CR-195203] p 2629 N94-25260

STELLAR ENVELOPES
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
X ray enhancement of SN 1987A due to interaction with its ring-like nebula
[NIFS-265] p 2602 N94-24867
Observational studies of the clearing phase in proto-planetary disk systems
[NASA-CR-195182] p 2604 N94-25265

STELLAR EVOLUTION
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812

STELLAR LUMINOSITY
Model atmosphere analysis of selected luminous B stars
[NASA-CR-195098] p 2599 N94-24051

STELLAR MAGNETIC FIELDS
Protoplanetary disks: Theory and observation by millimeter and sub-millimeter arrays
[REPT-331] p 2603 N94-24983

STELLAR MAGNETOSPHERES
Two populations and models of gamma ray bursts
[NASA-CR-194762] p 2629 N94-22947

STELLAR MASS
Observational studies of the clearing phase in proto-planetary disk systems
[NASA-CR-195182] p 2604 N94-25265

STELLAR MASS ACCRETION
UV spectral variability in the Herbig Ae star HR 5999. 11: The accretion interpretation
[NASA-CR-189313] p 2599 N94-23334
Protoplanetary disks: Theory and observation by millimeter and sub-millimeter arrays
[REPT-331] p 2603 N94-24983

STELLAR MASS EJECTION
Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992, and miscellaneous
[PB93-198331] p 2627 N94-23739
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
Solar-geophysical data number 587, July 1993. Part 2: (Comprehensive reports). Data for January 1993, and miscellaneous
[PB93-232882] p 2628 N94-24990
Solar-geophysical data number 589, September 1993. Part 2: (Comprehensive reports). Data for March 1993, and miscellaneous
[PB94-117405] p 2628 N94-24994

STELLAR MODELS
The calculation of theoretical chromospheric models and the interpretation of solar spectra from rockets and spacecraft
[NASA-CR-195083] p 2626 N94-23569
Model atmosphere analysis of selected luminous B stars
[NASA-CR-195098] p 2599 N94-24051
Model development for Ulysses and SOHO
[NASA-CR-193884] p 2627 N94-24484

STELLAR OCCULTATION
Cloud, dust, and ozone vertical profiles from solar occultation measurements: Implications for dynamics
p 2617 N94-24877

STELLAR RADIATION
Nonequilibria in thermal emission from supernova remnants
[NIFS-264] p 2602 N94-24866
X ray enhancement of SN 1987A due to interaction with its ring-like nebula
[NIFS-265] p 2602 N94-24867

STELLAR SPECTRA
Voyager observations of globular clusters
[NASA-CR-194806] p 2598 N94-23330
Molecular abundances in the envelopes around evolved stars
[PB94-104916] p 2602 N94-23812
Infrared and SiO maser observations of OH/IR stars
[PB94-104890] p 2599 N94-24780

STELLAR STRUCTURE
Model development for Ulysses and SOHO
[NASA-CR-193884] p 2627 N94-24484

STELLAR TEMPERATURE
Model atmosphere analysis of selected luminous B stars
[NASA-CR-195098] p 2599 N94-24051
UV extinction and IR emission in diffuse H2 regions
[NASA-CR-195194] p 2600 N94-25270

STELLAR WINDS
X ray enhancement of SN 1987A due to interaction with its ring-like nebula
[NIFS-265] p 2602 N94-24867

STELLARATORS
Assessment of stellarators as reactors
[DE93-017775] p 2548 N94-22916
Overview of the ATF stellarator program
[DE94-000371] p 2550 N94-23462
Some theoretical problems of magnetic diagnostics in tokamaks and stellarators
[NIFS-262] p 2551 N94-24306
Pellet ablation in the large helical device
[NIFS-260] p 2551 N94-24358
Proposal of Modular Heliotron: Advanced modular helical system compatible with closed helical divertor
[NIFS-261] p 2552 N94-24458

STEPPING MOTORS
The development of the SOHO SUMER mechanisms
p 2361 N94-24028
Development of a Low-Temperature Gear Motor (LOG) p 2361 N94-24032

STEREOPHONICS
Head related transfer function pseudo-stereophony
[NASA-CASE-ARC-11919-1-NP] p 2525 N94-23312

STEREOSCOPIC VISION
Stereo for gazing and converging cameras. Part 1: Basic geometry
[OUEL-1915/92] p 2343 N94-23162
Towards real-time stereovision systems for planetary missions p 2370 N94-23422

STEREOSCOPY
Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505

STERILIZATION
Comparison of numerical simulation and experimental data for steam-in-place sterilization
p 2326 N94-23669

STIELTJES INTEGRAL
On the asymptotically uniform distribution modulo 1 of extreme order statistics
[MEMO-COSOR-91-38-REV] p 2493 N94-23142
Two-point PADE approximants for Stieltjes series
p 2490 N94-24768

STIFFENING
Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260
Stiffening of deployable space booms: Automated Protein Crystal Growth Facility
[NASA-CR-195547] p 2196 N94-24820

STIFFNESS
Ceramic matrix composite parts design
p 2256 N94-24237
Ultrasonic nondestructive evaluation as a tool for the development of aerospace structural ceramic composites p 2257 N94-24240
Post buckling behaviour of stiffened composite panels loaded in cyclic compression and shear
p 2157 N94-24260
Attachment methods in composite joints - analysis of test results by controlled experiments method
p 2158 N94-24269
Precision drive and speed reduction device
[AD-D016004] p 2367 N94-25046

STIFFNESS MATRIX
A multigrid solver for the semiconductor equations
p 2482 N94-23674
Wavelet multiresolution analyses adapted for the fast solution of boundary value ordinary differential equations
p 2485 N94-23691
Vibrations of variable cross section Timoshenko beams p 2160 N94-24279

STIMULATED EMISSION
Experimental and theoretical features of strong suppression and shifting phenomena in odd-photon resonant excitations and stimulated emissions
[DE94-000341] p 2535 N94-24510
Computer modeling of nonlinearities
p 2458 N94-24661
Two micron stimulated emission of activated insulating crystals
[REPT-94-002] p 2565 N94-25025
Numerical simulation and analysis of experimental results on stimulated Raman scattering in laser-plasma Hohlraum targets
[DE93-613719] p 2554 N94-25330

STIMULATION
Radar stimulator interface protocol, preliminary interface design and Doppler Beam Sharpening implementation
[DE94-002567] p 2453 N94-23701
Convective instabilities in traveling fronts of addition polymerization p 2226 N94-24352

STIRLING CYCLE
Controllability of free-piston Stirling engine/linear alternator driving a dynamic load
[NASA-TM-106497] p 2521 N94-24302
STIRRING
Hydrodynamics of stirred gas-liquid dispersions
[ETN-94-95368] p 2339 N94-25254
STOCHASTIC PROCESSES
Nonlinear smoothing for random fields
[MEMO-1110] p 2493 N94-22728
Mean-value of product-form stochastic Petri net models of slotted-ring systems
[PB94-110871] p 2494 N94-23749
A mixed map/variable structure observer for target tracking p 2157 N94-24263
Maximum likelihood modal parameter identification and realization of stochastic systems p 2157 N94-24265
Uniform limit theorems for marked point processes
[PB94-118726] p 2488 N94-24526
Probabilistic methods in problems of applied analysis
[PB94-110681] p 2495 N94-24571
Evolving neural network connectivity
[AD-A273134] p 2490 N94-24921
Change-point detection and adaptive control of time-varying systems
[AD-A273509] p 2475 N94-24943
Statistical methods in physical oceanography
[AD-A273612] p 2419 N94-24948
Determining neural network hidden layer size using evolutionary programming
[AD-A273242] p 2475 N94-25139
An exploratory stochastic model for toxic effects on cells
[AD-A273438] p 2422 N94-25146
An attempt at a macrorealistic quantum worldview
[DE93-616821] p 2570 N94-25206
Approximation to nonlinear equations using nonlinear rational models
[RR-448] p 2492 N94-25306
The anomalous transport caused by particles transverse drift
[DE93-613685] p 2554 N94-25329
STOICHIOMETRY
Laser-deposited biocompatible films and methods and apparatuses for producing same
[AD-D016017] p 2350 N94-24952
STOKES FLOW
Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface
[PB93-237691] p 2480 N94-23438
BEM solution for the simulation of axisymmetric viscous sintering
[PB93-237717] p 2336 N94-24761
STOPPING
General optimal stopping theorems for semi-Markov processes
[PB93-214989] p 2496 N94-24744
STORABLE PROPELLANTS
Small rocket research and technology
p 2211 N94-23038
STORAGE BATTERIES
Space Electrochemical Research and Technology
[NASA-CP-3228] p 2390 N94-23345
Primary and secondary electrical space power based on advanced PEM systems p 2392 N94-23357
High energy density aluminum-oxygen cell
p 2393 N94-23363
Overcharge and overdischarge protection of ambient temperature secondary lithium cells
[NASA-CASE-NPO-18343-1-CU] p 2310 N94-23823
STORAGE RINGS (PARTICLE ACCELERATORS)
Proceedings of the Fifth Users Meeting for the Advanced Photon Source
[DE93-040692] p 2531 N94-22948
STORAGE STABILITY
NASA Lewis advanced IPV nickel-hydrogen technology p 2392 N94-23356
STORAGE TANKS
Analysis and test of low profile aluminum aerospace tank dome
[NASA-TP-3442] p 2375 N94-23294
Flow and temperature distribution in a naturally stratified thermal storage tank
[AD-A273511] p 2336 N94-24821
Thermodynamic models for bounding pressurant mass requirements of cryogenic tanks
[NASA-TM-106476] p 2346 N94-25202
Metal hydride storage
[VTT-JULK-769] p 2396 N94-25417
STORMS
United States Weather Research Program (USWRP)
p 2411 N94-24375
STRAIN DISTRIBUTION
Ceramic matrix composites: Challenges and opportunities p 2255 N94-24230
Use of photostress to characterize the mechanical behavior of weldments
[NASA-CR-195201] p 2378 N94-25267
STRAIN ENERGY RELEASE RATE
Analysis of local delaminations caused by angle ply matrix cracks
[NASA-TM-109052] p 2228 N94-24083
STRAIN GAGES
Strain gage measurement errors in the transient heating of structural components
[NASA-TM-104274] p 2376 N94-23487
STRAIN HARDENING
Use of photostress to characterize the mechanical behavior of weldments
[NASA-CR-195201] p 2378 N94-25267
STRAIN MEASUREMENT
Strain gage measurement errors in the transient heating of structural components
[NASA-TM-104274] p 2376 N94-23487
Intelligent Material Systems and Structures (IMSS). Part 5: Fiber optic registration of deformation in carbon laminates 91/92
[PB93-204600] p 2544 N94-23723
Dual-purpose RTOF diffractometer facility at the ET-RR-1 reactor
[VTT-TIED-1425] p 2566 N94-25347
STRAIN RATE
Tensile properties of 21-6-9 stainless steel at elevated temperatures
[DE94-001852] p 2240 N94-23017
Stress corrosion cracking properties of 15-5PH steel
p 2251 N94-23244
Theory of extrusion: Advances and challenges
[PB93-201572] p 2241 N94-23447
Dynamic localization and second-order subgrid-scale models in large eddy simulations of channel flow
p 2329 N94-24149
On the deformation kinetics constitutive law of plastic deformation: The rate equation p 2161 N94-24289
Procedures for determining MATMOD-4V material constants
[DE94-002638] p 2245 N94-24520
High strain rate superplasticity in metals and composites
[DE94-001521] p 2229 N94-24547
Three-dimensional, inelastic response of single-edge notch bend specimens subjected to impact loading
[AD-A273302] p 2378 N94-25143
STRANGE ATTRACTORS
On the estimation of the correlation dimension and its application to radar reflector discrimination
[NASA-CR-4564] p 2309 N94-23304
STRAPS
Lightning tests and analyses of tunnel bond straps and shielded cables on the Space Shuttle solid rocket booster
[NASA-CR-193921] p 2200 N94-24801
STRATOCUMULUS CLOUDS
A regional analysis of cloudy mean spherical albedo over the marine stratocumulus region and the tropical Atlantic Ocean
[NASA-CR-194771] p 2409 N94-24049
STRATOSPHERE
An analysis of solar mesospheric temperatures for the upper stratosphere and mesosphere
[NASA-CR-194861] p 2626 N94-23626
The atmospheric effects of stratospheric aircraft: A third program report
[NASA-RP-1313] p 2398 N94-24104
Measurement of HO2 and other trace gases in the stratosphere using a high resolution far-infrared spectrometer
[NASA-CR-195173] p 2404 N94-24738
Carbon and hydrogen isotope composition and C-14 concentration in methane from sources and from the atmosphere: Implications for a global methane budget
[NASA-CR-195166] p 2399 N94-25092
Collection and evaluation of numerical models with the aim to investigate the impact of aircraft emissions
[DLR-MITT-93-06] p 2400 N94-25414
STREAM FUNCTIONS (FLUIDS)
Transition to turbulence in an elliptic vortex
p 2331 N94-24161
STRESS ANALYSIS
Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models
p 2216 N94-23062
Control of the internal stresses in plane elasticity
[PB93-225514] p 2374 N94-23112
Internal friction associated with dislocation relaxations in virgin martensite
[PB93-226280] p 2240 N94-23119
A numerical analysis of crack propagation in microcracking ceramic and ceramic composites
[DE94-001192] p 2253 N94-23183
Fully coupled nonlinear thermomechanical analysis including general contact in PALM2D
[DE94-001661] p 2568 N94-23216
Determination of fiber-matrix interface failure parameters from off-axis tests
[NASA-TM-109043] p 2241 N94-23274
Out of plane gradients in laminated composites
[NASA-CR-194875] p 2228 N94-23566
Contact analysis of rough rail surfaces
p 2270 N94-23589
Dynamic localization and second-order subgrid-scale models in large eddy simulations of channel flow
p 2329 N94-24149
Integrated stress and strength analysis of airplane structures using the data processing tool ISSY
p 2178 N94-24320
Buckling of circular cylindrical shells subjected to combined loads (axial compression, normal pressure, bending and transverse shear loading)
[PB93-215358] p 2378 N94-24745
FRANC2D: A two-dimensional crack propagation simulator. Version 2.7: User's guide
[NASA-CR-4572] p 2246 N94-25118
The complete stress field due to a dislocation located anywhere in two bonded quarter planes
[OUEL-1990/93] p 2379 N94-25478
STRESS CORROSION
Analysis of Alloy 600 and X-750 stress corrosion cracks
[DE94-001578] p 2238 N94-22936
Fracture kinetics analysis of empirical and semi-empirical corrosion fatigue relations p 2159 N94-24277
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 2: Process Industries Plant Operations
[AD-A273662] p 2251 N94-25449
Preceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 3A: Corrosion: Specific issues
[AD-A273663] p 2251 N94-25450
STRESS CORROSION CRACKING
Analysis of Alloy 600 and X-750 stress corrosion cracks
[DE94-001578] p 2238 N94-22936
Thermally activated low temperature creep and primary water stress corrosion cracking of NiCrFe alloys
[DE94-001756] p 2241 N94-23219
NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-194678] p 2571 N94-23230
Stress corrosion cracking properties of 15-5PH steel
p 2251 N94-23244
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel
[DE94-000466] p 2242 N94-23457
Effect of irradiation on the stress corrosion cracking behavior of Alloy X-750 and Alloy 625
[DE94-001759] p 2244 N94-23792
Feasibility study of shot-peening modeling
[CTN-94-60926] p 2244 N94-24170
Microstructure and micromechanical behaviour of CMCs p 2256 N94-24236
STRESS CYCLES
Fundamentals of fatigue analysis
[PB93-226264] p 2374 N94-23118
Review of super Ni/Cd cell designs and performance
p 2391 N94-23348
STRESS DISTRIBUTION
A numerical analysis of crack propagation in microcracking ceramic and ceramic composites
[DE94-001192] p 2253 N94-23183
Development of a theory of the wear of ceramics
[DE94-002773] p 2254 N94-23783
Ceramic matrix composites: Challenges and opportunities p 2255 N94-24230
Interface evaluation in ceramic composites
p 2255 N94-24231
Fracture kinetics analysis of empirical and semi-empirical corrosion fatigue relations p 2159 N94-24277
The complete stress field due to a dislocation located anywhere in two bonded quarter planes
[OUEL-1990/93] p 2379 N94-25478
STRESS FUNCTIONS
Stability analysis of anisotropic conical shells
[PB94-119054] p 2377 N94-24645
STRESS INTENSITY FACTORS
Fatigue life and crack growth prediction methodology
[NASA-TM-109044] p 2228 N94-23279
Effect of irradiation on the stress corrosion cracking behavior of Alloy X-750 and Alloy 625
[DE94-001759] p 2244 N94-23792
FRANC2D: A two-dimensional crack propagation simulator. Version 2.7: User's guide
[NASA-CR-4572] p 2246 N94-25118

STRESS MEASUREMENT
Method of determining shear stress employing a monomer-polymer laminate structure
[NASA-CASE-LAR-14654-2] p 2375 N94-23308
Skin friction measurement in complex flows using thin oil film techniques
[NASA-CR-194872] p 2327 N94-24098
Feasibility study of shot-peening modeling
[CTN-94-60926] p 2244 N94-24170
Alternatives for reinforcement: Fiber composites
[VTT-TIED-1412] p 2230 N94-25386
STRESS RELAXATION
Thermally activated low temperature creep and primary water stress corrosion cracking of NiCrFe alloys
[DE94-001756] p 2241 N94-23219
On the deformation kinetics constitutive law of plastic deformation: The rate equation p 2161 N94-24289
STRESS TENSORS
On the large eddy simulation of turbulent flows in complex geometry p 2329 N94-24148
Super Beltrami differentials and N equal to 4 superconformal anomalies
[DE93-613047] p 2491 N94-25166
STRESS WAVES
Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database Shock Physics Index
[DE94-001679] p 2589 N94-23126
Bibliographic Retrieval System (BARS). Sandia Shock Compression (SSC) database Shock Physics Index (SPHINX) database. Volume 1: UNIX version query guide customized application for INGRES
[DE94-001703] p 2589 N94-23127
STRESS-STRAIN DIAGRAMS
Constitutive modelling of fiber-reinforced concrete under uniaxial tensile loading
[VTT-JULK-774] p 2379 N94-25385
STRESS-STRAIN RELATIONSHIPS
The effects of texture and strain on the r-va lue of heavy gauge tantalum plate
[DE94-000690] p 2242 N94-23541
Material data representation of hysteresis loops for Hastelloy X using artificial neural networks
[NASA-TM-105990] p 2376 N94-23551
Microstructure and micromechanical behaviour of CMCs p 2256 N94-24236
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276
Evaluation of advanced materials through experimental mechanics and modelling p 2374 N94-24454
Test methods for composites: A status report. Volume 3: Shear test methods
[AD-A273561] p 2230 N94-25163
STRESSES
Drying deformable media: Kinetics, shrinkage and stresses
[ETN-94-95314] p 2236 N94-25302
STRETCHING
Intelligent Material Systems and Structures (IMSS). Part 5: Fiber optic registration of deformation in carbon laminates 91/92
[PB93-204600] p 2544 N94-23723
STRIATION
Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344
STRING THEORY
Flavor changing strings and domain walls
[DE93-633217] p 2532 N94-22970
The current status of observational constraints on cosmic strings
[DE94-001505] p 2601 N94-23010
The Casimir energy of the rigid string with massive ends
[DE93-616851] p 2492 N94-25338
Superconducting cosmic strings near the electroweak scale and cosmic-ray propagation
[MPI-PHE/93-05] p 2629 N94-25459
On the hadron formation time in pion-nucleus interaction
[DE93-616879] p 2539 N94-25476
STRINGERS
CORSS: Cylinder Optimization of Rings, Skin, and Stringers
[NASA-TP-3457] p 2490 N94-24727
STRIP MINING
Manned Mars mission on-orbit operations FTS capabilities assessment
[NASA-CR-189328] p 2430 N94-23080
STROKE VOLUME
Evaluation of bioimpedance for the measurement of physiologic variables as related to hemodynamic studies in space flight p 2427 N94-25378
STROUHAL NUMBER
Computational fluid mechanics
[NASA-CR-194765] p 2337 N94-24859
STRUCTURAL ANALYSIS
Probabilistic analysis of mechanical systems
[DE93-041145] p 2371 N94-22918
Structural analysis of a superconducting central solenoid for the Tokamak Physics Experiment
[DE94-001536] p 2549 N94-23014
Review of the probabilistic failure analysis methodology and other probabilistic approaches for application in aerospace structural design
[NASA-TP-3434] p 2376 N94-23342
A structural design decomposition method utilizing substructuring
[NASA-TM-107750] p 2376 N94-23368
A review of the Workshop on Fatigue Life Methodologies for Wind Turbines
[DE94-002039] p 2394 N94-23472
A prediction method for the compressive strength of impact damaged composite laminates
[CTN-94-60925] p 2229 N94-24137
New computing systems, future computing environment, and their implications on structural analysis and design p 2177 N94-24314
Integrated stress and strength analysis of airplane structures using the data processing tool ISSY p 2178 N94-24320
Structural design criteria for filament-wound composite shells
[NASA-CR-195125] p 2229 N94-24402
A study of the core module simulator floor capability p 2380 N94-24418
Hydro-elastic analysis using a selection of commercial analysis programs
[PB94-118734] p 2376 N94-24478
Stability analysis of anisotropic conical shells
[PB94-119054] p 2377 N94-24645
CORSS: Cylinder Optimization of Rings, Skin, and Stringers
[NASA-TP-3457] p 2490 N94-24727
Pre-design study of a general purpose vehicle simulator platform
[PB93-215366] p 2193 N94-24739
Conceptual design proposal: HUGO global range/mobility transport aircraft
[NASA-CR-195501] p 2181 N94-24787
Aircraft empennage structural detail design
[NASA-CR-195486] p 2183 N94-24969
Probabilistic assessment of smart composite structures
[NASA-TM-106358] p 2378 N94-25188
STRUCTURAL DESIGN
The history of development of molybdenum alloys for structural applications
[DE94-000389] p 2239 N94-22958
Control of the internal stresses in plane elasticity
[PB93-225514] p 2374 N94-23112
Review of the probabilistic failure analysis methodology and other probabilistic approaches for application in aerospace structural design
[NASA-TP-3434] p 2376 N94-23342
A structural design decomposition method utilizing substructuring
[NASA-TM-107750] p 2376 N94-23368
Strain gage measurement errors in the transient heating of structural components
[NASA-TM-104274] p 2376 N94-23487
A structural design methodology for large angle articulated trusses considering realistic joint modeling p 2376 N94-23560
An Earth observation telescope refocusing mechanism p 2359 N94-24014
The Submillimeter Wave Astronomy Satellite (SWAS) solar array system p 2361 N94-24029
CMC design consequences p 2256 N94-24238
Integrated approach in modelling, testing, and design of gradient-CVI derived CMC components p 2256 N94-24239
Aeroelastic, aeromechanical and vibration problems in helicopters p 2154 N94-24244
Application of concurrent engineering principles to aircraft structural design p 2178 N94-24321
Some practical problems in multidisciplinary design and optimisation p 2178 N94-24322
Current and future design methods for large transport aircraft p 2179 N94-24324
Impact damage in filament wound composite bottles p 2231 N94-24421
Active control of buildings during earthquakes
[NASA-TM-109033] p 2271 N94-24473
Pre-design study of a general purpose vehicle simulator platform
[PB93-215366] p 2193 N94-24739
Design of a recumbent seating system
[NASA-CR-195503] p 2438 N94-24786
Merits and limitations of optimality criteria method for structural optimization
[NASA-TP-3373] p 2378 N94-24845
Aircraft empennage structural detail design
[NASA-CR-195486] p 2183 N94-24969
Aircraft wing structural detail design (wing, aileron, flaps, and subsystems)
[NASA-CR-195487] p 2183 N94-24974
STRUCTURAL DESIGN CRITERIA
The Columbus solar array mechanisms p 2356 N94-23994
Primary deployment mechanism for the European Polar Platform p 2207 N94-23995
HERA (Hermes robot arm) overview p 2357 N94-24005
Preloaded launch locking devices for SILEX p 2358 N94-24008
The development of the HERA Test Facility (HTF) p 2197 N94-24020
The low noise momentum wheel MW-X: EM design and predicted properties p 2360 N94-24024
The Submillimeter Wave Astronomy Satellite (SWAS) solar array system p 2361 N94-24029
Multipurpose clamping device with electrical connector for in orbit attachment of payloads p 2361 N94-24035
Continuous gust response and sensitivity derivatives using state-space models p 2161 N94-24287
Structural design criteria for filament-wound composite shells
[NASA-CR-195125] p 2229 N94-24402
Merits and limitations of optimality criteria method for structural optimization
[NASA-TP-3373] p 2378 N94-24845
STRUCTURAL ENGINEERING
Impacts: NIST Building and Fire Research Laboratory (technical and societal)
[PB94-113420] p 2270 N94-23737
LSS systems planning and performance program
[NASA-CR-193882] p 2196 N94-24309
Frameworks for integrated airframe design p 2178 N94-24318
STRUCTURAL FAILURE
Probabilistic analysis of mechanical systems
[DE93-041145] p 2371 N94-22918
A study of the core module simulator floor capability p 2380 N94-24418
Impact damage in filament wound composite bottles p 2231 N94-24421
J-integral patch for finite element analysis of dynamic fracture due to impact of pressure vessels p 2381 N94-24429
STRUCTURAL MEMBERS
Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281
Reduction of structural loads using maneuver load control on the Advanced Fighter Technology Integration (AFTI)/F-111 mission adaptive wing
[NASA-TM-4526] p 2168 N94-24295
STRUCTURAL RELIABILITY
Impacts: NIST Building and Fire Research Laboratory (technical and societal)
[PB94-113420] p 2270 N94-23737
STRUCTURAL STRAIN
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276
STRUCTURAL VIBRATION
Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction
[NASA-CR-189645] p 2525 N94-23698
Control algorithms for effective operation of variable-speed wind turbines
[DE94-002607] p 2394 N94-23704
Microwelding due to random vibration p 2359 N94-24019
Vibrational power transmission analysis of machinery installations in ships with the objective of noise reduction
[ISVR-TR-216] p 2363 N94-24076
Responses of a finite baffled plate subject to turbulent and mean flow excitations
[NASA-CR-191570] p 2334 N94-24805
Influence of backup bearings and support structure dynamics on the behavior of rotors with active supports
[NASA-CR-195106] p 2365 N94-24751
Space Station flexible dynamics under plume impingement p 2208 N94-25383
Modeling of a large undamped space structure using time domain techniques
[AD-A273828] p 2206 N94-25523
STRUTS
Continuum representations of cellular solids
[DE94-001706] p 2375 N94-23217
Design of a recumbent seating system
[NASA-CR-195503] p 2438 N94-24786
STUDENTS
Design of an airborne launch vehicle for an air launched space booster
[NASA-CR-195534] p 2198 N94-24860
The Triton: Design concepts and methods
[NASA-CR-195542] p 2184 N94-25004

Magnetic Earth Ionosphere Resonant Frequencies
[NASA-CR-195131] p 2303 N94-25191

STYRENES

Microstructure of styrene methyl methacrylate copolymers grafted onto polybutadiene seeds
[ETN-94-95360] p 2262 N94-25225

SUBDUCTION (GEOLOGY)

Reactive trace metals as indicators of subduction and ventilation processes in the ocean
[AD-A273585] p 2419 N94-25164

SUBDWARF STARS

UV-bright stars in globular clusters
[NASA-CR-189324] p 2599 N94-24666

SUBLIMATION

On the stability of the process of formation of combustion generated particles by coagulation and simultaneous shrinkage due to particle oxidation p 2159 N94-24274

SUBMILLIMETER WAVES

Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-194858] p 2404 N94-24843

SUBROUTINE LIBRARIES (COMPUTERS)

Users manual for the Chameleon parallel programming tools
[DE94-001934] p 2465 N94-22973

ASPT software source code: Development system package, library component
[CTN-94-60905] p 2455 N94-24134

Horatio: Libraries for vision applications, release 2.0
[OUEL-1967/92] p 2593 N94-25326

SUBROUTINES

Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis
[NASA-CR-194795] p 2335 N94-24640

SUBSONIC FLOW

An experimental study of the flow field surrounding a subsonic jet in a cross flow
[NASA-CR-194770] p 2317 N94-23072

Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades
[PB93-226223] p 2317 N94-23114

Computational study of GA(W)-1: Airfoil near stall
[PB93-226249] p 2165 N94-23116

Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464

Unsteady jet flow computation towards noise prediction
[NASA-CR-194449] p 2153 N94-23553

Three dimensional study of an airplane wing and its wake in the subsonic regime
[ISBN-0-315-58963-9] p 2168 N94-24178

Development and validation of RNG methodology for compressible turbulence
[AD-A273469] p 2337 N94-24929

Sub-sonic flow about a slender profile in a tunnel having perforated walls
[AD-A273184] p 2170 N94-25137

A numerical investigation of the artificial compressibility method for the solution of the Navier-Stokes equations
[CRANFIELD-AERO-9213] p 2340 N94-25486

Off-design performance of crenulated blades in a linear compressor cascade
[AD-A273744] p 2340 N94-25534

SUBSONIC SPEED

Experimental cavity pressure measurements at subsonic and transonic speeds. Static-pressure results
[NASA-TP-3358] p 2169 N94-24464

Nonlinear aerodynamic modeling using multivariate orthogonal functions p 2164 N94-25110

SUBSTITUTES

US Department of Energy phaseout of CFC-refrigerants
[DE94-001668] p 2397 N94-23016

Ozone depletion, paradigms, and politics
[DE94-001600] p 2398 N94-24506

SUBSTRATES

Theoretical studies of wave propagation in multilayered piezoelectric media
[DE93-040273] p 2371 N94-22872

Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296

Method of determining shear stress employing a monomer-polymer laminate structure
[NASA-CASE-LAR-14654-2] p 2375 N94-23308

Hairy carbon electrodes studied by cyclic voltammetry and battery discharge testing p 2394 N94-23367

Infrared analysis of vapor phase deposited tricresylphosphate (TCP)
[NASA-TM-106423] p 2253 N94-23371

Method of forming silicon structures with selectable optical characteristics
[NASA-CASE-NPO-18625-1-CU] p 2563 N94-23972

Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772

Laser-deposited biocompatible films and methods and apparatuses for producing same
[AD-D016017] p 2350 N94-24952

Field emitter array
[AD-D016023] p 2303 N94-25150

SUBSTRUCTURES

Extending substructure based iterative solvers to multiple load and repeated analyses
[NASA-CR-194822] p 2466 N94-23504

SUCTION

Vortex generation and wave-vortex interaction over a concave plate with roughness and suction
[NASA-CR-191589] p 2337 N94-24869

SUD AVIATION AIRCRAFT

Remote vibration measurements at a sud aviation alouette 3 helicopter with a CW CO2-laser system
[AD-A273818] p 2190 N94-25516

SUDDEN IONOSPHERIC DISTURBANCES

Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for February, March, 1993, and late data
[PB93-198323] p 2626 N94-23738

Solar-geophysical data number 587, July 1993. Part 1: (Prompt reports). Data for June, May 1993, and late data
[PB93-232874] p 2628 N94-24989

SULFATES

Integrated hydrometallurgical jarosite treatment
[PB93-217990] p 2232 N94-22983

Cloud-free aerosol optical depth determination over oceans from satellite radiometry
[DE94-001897] p 2386 N94-23779

SULFIDATION

Ultraviolet photosulfidation of III-V compound semiconductors for electronic passivation
[DE94-001417] p 2555 N94-22717

SULFIDES

High-resolution soft x ray photoionization studies of selected molecules
[DE94-000568] p 2532 N94-23002

Spin fluctuations in an ordered Heisenberg ferromagnet with dipolar interactions
[PB93-204493] p 2524 N94-24533

Laboratory detection of C5S by pulsed-discharge-nozzle Fourier-transform microwave spectroscopy
[JTN-94-80519] p 2235 N94-24984

SULFUR

Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers
[DE94-002293] p 2350 N94-24659

SULFUR DIOXIDES

Participation in TOMS missions
[NASA-CR-195110] p 2398 N94-24078

Nimbus-7 Total Ozone Mapping Spectrometer (TOMS) data products user's guide
[NASA-RP-1323] p 2410 N94-24355

SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-195162] p 2599 N94-24988

SULFUR FLUORIDES

Radiative forcing calculations for SF6 and CH4 using a correlated k-distribution transmission model
[DE94-001855] p 2397 N94-23700

Research for electric energy systems
[DE94-001839] p 2293 N94-23719

SULFUR HEXAFLUORIDE

High-resolution soft x ray photoionization studies of selected molecules
[DE94-000568] p 2532 N94-23002

SUN

The calculation of theoretical chromospheric models and the interpretation of solar spectra from rockets and spacecraft
[NASA-CR-195083] p 2626 N94-23569

SUPERCOMPUTERS

Supercomputer networking for space science applications
[NASA-CR-194876] p 2465 N94-23085

Applications of CFD codes and supercomputers to aircraft design activities p 2177 N94-24316

High-performance computing and communications
[DE94-002215] p 2457 N94-24566

SUPERCONDUCTING CAVITY RESONATORS

Welding of niobium to stainless
[DE94-003365] p 2365 N94-24614

SUPERCONDUCTING FILMS

Spectroscopic IR ellipsometry of 100 and 001 oriented YBa2Cu3O(7-delta) films
[PB93-201481] p 2561 N94-23445

Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333

SUPERCONDUCTING MAGNETS

Assessment of stellarators as reactors
[DE93-017775] p 2548 N94-22916

Design of microchannels for cryostabilization of high temperature superconducting magnets
[DE94-001324] p 2559 N94-22993

Superconducting magnet system for the TPX Tokamak
[DE94-001535] p 2549 N94-23013

Structural analysis of a superconducting central solenoid for the Tokamak Physics Experiment
[DE94-001536] p 2549 N94-23014

Simple estimate of stored energy and conductor insulation voltage-withstand requirements for advanced solenoid magnet designs
[DE93-041048] p 2307 N94-23019

A system for managing information at ATLAS
[DE94-001337] p 2590 N94-23190

Normal zone propagation and thermal hydraulic quenchback in a cable-in-conduit superconductor
[DE94-002457] p 2271 N94-24568

SUPERCONDUCTING SUPER COLLIDER

B-quark production at hadron colliders
[DE94-001459] p 2534 N94-23806

The use of harmonics in 3-D magnetic fields
[DE94-002274] p 2299 N94-24656

SUPERCONDUCTIVITY

Anomalous magnetoresistance behavior of superconducting Nd(2-x)Ce(x)CuO(4-y) single crystal
[DE94-000806] p 2558 N94-22941

A valence-fluctuation theory of cuprate superconductivity
[DE94-000887] p 2558 N94-22942

Interplay of magnetic and superconducting heavy fermion ground states
[DE94-000680] p 2240 N94-23003

Muon spin relaxation studies of the interplay between magnetism and superconductivity in heavy fermion systems
[DE94-000700] p 2559 N94-23006

Structural analysis of a superconducting central solenoid for the Tokamak Physics Experiment
[DE94-001536] p 2549 N94-23014

Exact transformation of the anisotropic Ginzburg-Landau model and its consequences
[DE94-002208] p 2562 N94-23795

Reduction of hydrocarbon impurities in 200 l/h helium liquefier-refrigerator system
[NIFS-259] p 2271 N94-24459

Superconducting energy storage
[DE94-002248] p 2395 N94-24654

On superconductivity of alpha-(BEDT-TTF)2KHg(SCN)4
[REPT-A-2660] p 2564 N94-24978

Tunnelling in metallic contacts on high-T(c) superconductors: A story of charge carriers in YBa2Cu3O(7-delta) and Bi2CaSr2Cu2O(8+delta)
[ISBN-9-03-860142-5] p 2565 N94-25280

Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation
[DE93-617053] p 2567 N94-25424

Superconducting cosmic strings near the electroweak scale and cosmic-ray propagation
[MPI-PHE/93-05] p 2629 N94-25459

SUPERCONDUCTORS

A nonlinear degenerating parabolic problem from the theory of type 2 superconductors
[MEMO-1112] p 2555 N94-22730

Interplay of magnetic and superconducting heavy fermion ground states
[DE94-000680] p 2240 N94-23003

Muon spin relaxation studies of the interplay between magnetism and superconductivity in heavy fermion systems
[DE94-000700] p 2559 N94-23006

Normal zone propagation and thermal hydraulic quenchback in a cable-in-conduit superconductor
[DE94-002457] p 2271 N94-24568

Thermomechanical processing of Ag-clad Bi2Sr2CaCu2O(x) superconductors
[DE94-002347] p 2563 N94-24624

Superconducting energy storage
[DE94-002248] p 2395 N94-24654

On superconductivity of alpha-(BEDT-TTF)2KHg(SCN)4
[REPT-A-2660] p 2564 N94-24978

A vibrating wire parallel to a type 2 superconducting slab of arbitrary thickness
[DE93-617134] p 2525 N94-25389

Effects of a vibrating wire carrying DC current on a moving type 2 superconducting slab of arbitrary thickness
[DE93-617136] p 2566 N94-25391

SUPERCRITICAL AIRFOILS

JB-300: An advanced medium size transport for 2005
[NASA-CR-195499] p 2179 N94-24401

SUPERCRITICAL FLUIDS
Integral equations for the microstructures of supercritical fluids [DE94-002460] p 2535 N94-24569
SUPERCRITICAL WINGS
Reduction of structural loads using maneuver load control on the Advanced Fighter Technology Integration (AFTI)/F-111 mission adaptive wing [NASA-TM-4526] p 2168 N94-24295
SUPERFLUIDITY
Acoustic and optical investigations of superfluid He-3 [PB93-224889] p 2523 N94-23101
SUPERGRAVITY
The 2D supergravity and integrable systems [DE93-616848] p 2570 N94-25336
SUPERHEATING
Surface barrier of a uniaxial anisotropic type 2 superconducting cylinder [DE93-617137] p 2566 N94-25392
SUPERHIGH FREQUENCIES
The provision of spectrum for feeder links of non-geostationary mobile satellites p 2276 N94-22751
Measurements on the satellite-mobile channel at L and S bands p 2282 N94-22791
K-band mobile propagation measurements using ACTS p 2283 N94-22792
Performance of the X-/Ka/KABLE-band dichroic plate in the DSS-13 beam waveguide antenna p 2291 N94-23261
Precipitation measurement using SIR-C: A feasibility study. Investigation at nadir [NASA-CR-195103] p 2410 N94-24126
A small satellite design for deep space network testing and training [NASA-CR-195526] p 2205 N94-24702
SUPERLATTICES
High-T(c) superconducting superlattices [DE93-019200] p 2556 N94-22864
Report of the Joint Seminar on Solid State Physics, Atomic and Molecular Physics, and Materials Science in the Energy Region of Tandem Accelerators [DE93-508268] p 2548 N94-22924
Photo-induced antiferromagnetic interlayer coupling in Fe superlattices with iron silicide spacers [DE94-001345] p 2559 N94-22995
Quantum tunneling transport of electrons in double-barrier heterostructures: Theory and modeling [ETN-94-95332] p 2565 N94-25059
Effect of high frequency field on the transport properties of superlattice [DE93-617047] p 2568 N94-25447
SUPERNOVA REMNANTS
Nonequilibria in thermal emission from supernova remnants [NIFS-264] p 2602 N94-24866
X ray enhancement of SN 1987A due to interaction with its ring-like nebula [NIFS-265] p 2602 N94-24867
Shocked clouds in the Cygnus Loop [NASA-CR-195190] p 2600 N94-25178
Investigation relative to the Roentgen Satellite (ROSAT) [NASA-CR-195192] p 2600 N94-25269
SUPERNOVA 1987A
X ray enhancement of SN 1987A due to interaction with its ring-like nebula [NIFS-265] p 2602 N94-24867
SUPERNOVAE
Kamiokande results on solar neutrinos and a supernova search [ICRR-REPT-294-93-6] p 2627 N94-24961
SUPERPLASTICITY
Gas-pressure forming of superplastic ceramic sheet [DE94-001520] p 2252 N94-22930
Materials Science and Engineering [DE94-003018] p 2228 N94-23493
High strain rate superplasticity in metals and composites [DE94-001521] p 2229 N94-24547
The nanometer-scale mechanics of gold films [AD-A273307] p 2565 N94-25086
SUPERSONIC AIRCRAFT
Sabot high speed interceptor AE 4273 aircraft design [NASA-CR-195495] p 2183 N94-24971
SUPERSONIC BOUNDARY LAYERS
Relationship between transition and modes of instability in supersonic boundary layers [NASA-CR-4562] p 2336 N94-24725
SUPERSONIC COMBUSTION
Proceedings of Workshop on Laser Diagnostics in Fluid Mechanics and Combustion [AD-A272808] p 2347 N94-22914
SUPERSONIC COMBUSTION RAMJET ENGINES
Experimental investigation of generic three-dimensional sidewall-compression scramjet inlets at Mach 6 in tetrafluoromethane [NASA-TM-4497] p 2319 N94-23339
Shock tunnel studies of scramjet phenomena, supplement 7 [NASA-CR-191572] p 2319 N94-23513
Shock tunnel studies of scramjet phenomena, supplement 8 [NASA-CR-191573] p 2320 N94-23532
NASA/USRA advanced design program [NASA-CR-195548] p 2180 N94-24492
HYPULSE combustor analysis [NASA-CR-191579] p 2336 N94-24771
Effect of aeroelastic-propulsive interactions on flight dynamics of a hypersonic vehicle p 2164 N94-25113
SUPERSONIC FLIGHT
An experimental investigation of a Mach 3.0 high-speed civil transport at supersonic speeds [NASA-TP-3365] p 2169 N94-24311
SUPERSONIC FLOW
Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades [PB93-226223] p 2317 N94-23114
Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164
Effects of shock strength on shock turbulence interaction p 2332 N94-24165
Numerical solutions of the complete Navier-Stokes equations [NASA-CR-194780] p 2337 N94-24858
Development and validation of RNG methodology for compressible turbulence [AD-A273469] p 2337 N94-24929
Turbulence models and Reynolds analogy for two-dimensional supersonic compression ramp flow [NASA-TM-106474] p 2337 N94-25119
SUPERSONIC JET FLOW
Refraction of high frequency noise in an arbitrary jet flow [NASA-TM-106465] p 2525 N94-23464
The acoustic and instability waves of jets confined inside an acoustically lined rectangular duct [NASA-CR-191586] p 2334 N94-24602
The effects of profiles on supersonic jet noise [NASA-CR-195184] p 2530 N94-25177
SUPERSONIC NOZZLES
Supersonic minimum length nozzle design for dense gases p 2171 N94-23656
SUPERSONIC TRANSPORTS
Simplified, inverse, ejector design tool [NASA-CR-194438] p 2166 N94-23511
The atmospheric effects of stratospheric aircraft: A third program report [NASA-RP-1313] p 2398 N94-24104
Discrete sensitivity derivatives of the Navier-Stokes equations with a parallel Krylov solver [NASA-TM-106481] p 2265 N94-24301
An experimental investigation of a Mach 3.0 high-speed civil transport at supersonic speeds [NASA-TP-3365] p 2169 N94-24311
Integrated design and manufacturing for the high speed civil transport [NASA-CR-195511] p 2182 N94-24968
High-order technology: Applying technical excellence to new airplane development p 2185 N94-25069
SUPERSONIC TURBINES
Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models p 2216 N94-23062
Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades [PB93-226223] p 2317 N94-23114
SUPERSONIC WIND TUNNELS
Lewis Research Center R and D Facilities [NASA-TM-109400] p 2630 N94-23135
Improved pressure measurement system for calibration of the NASA LeRC 10x10 supersonic wind tunnel [NASA-TM-106470] p 2344 N94-24362
SUPERSONICS
Integrated design and manufacturing for the high speed civil transport [NASA-CR-195511] p 2182 N94-24968
SUPERSYMMETRY
Stitching the Yukawa quilt [PB93-204477] p 2569 N94-24532
Super Beltrami differentials and N equal to 4 superconformal anomalies [DE93-613047] p 2491 N94-25166
Applications of supersymmetric quantum mechanics [ETN-94-95385] p 2570 N94-25257
The 2D supergravity and integrable systems [DE93-616848] p 2570 N94-25336
SUPPORT SYSTEMS
Hypermedia support for engineering design system [PB93-226256] p 2449 N94-23117
Object oriented simulation implementation in support of robust system design [DE93-011687] p 2452 N94-23488
ATOS-1: Designing the infrastructure for an advanced spacecraft operations system p 2197 N94-23849
Influence of a new generation of operations support systems on current spacecraft operations philosophy: The users feedback p 2507 N94-23894
PILOT: An intelligent distributed operations support system p 2508 N94-23895
The Advanced Technology Operations System: ATOS p 2508 N94-23897
Telemetry ground system development via the component approach p 2203 N94-23949
Multi-sensoral approach to night flight: Perceptive and Cognitive limitations p 2432 N94-23981
Towards the formal specification of the requirements and design of a processor interface unit [NASA-CR-4521] p 2467 N94-24463
An investigation of requirements traceability to support systems development [AD-A273167] p 2458 N94-24684
SUPPORTS
Landing gear with swivelling beam [CA-PATENT-1323020] p 2176 N94-24181
SURFACE ACOUSTIC WAVE DEVICES
SAW based systems for mobile communications satellites p 2275 N94-22746
Chemically sensitive interfaces on SAW devices [DE94-001832] p 2526 N94-23718
SURFACE CRACKS
Matrix fatigue cracking mechanisms of alpha(2) TMC for hypersonic applications [NASA-TM-106506] p 2230 N94-25186
SURFACE DEFECTS
Surface modification of sapphire for enhanced infrared window performance [DE94-000333] p 2543 N94-23458
Design of novel catalysts for the partial oxidation of methane to methanol [PB94-114212] p 2235 N94-24920
Simulation studies for surfaces and materials strength [NASA-CR-195185] p 2565 N94-25093
SURFACE DIFFUSION
Diffusion on Cu surfaces p 2251 N94-24428
SURFACE DISTORTION
Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas [NASA-CR-195167] p 2301 N94-25005
SURFACE EMITTING LASERS
InGaAsP/InP based 1.3/1.55 micron vertical cavity surface emitting lasers for wavelength division multiplexed high speed distributed computing, phase 1 [AD-A271081] p 2348 N94-23123
The effects of optical feedback on polarization of vertical cavity surface emitting lasers [AD-A273728] p 2351 N94-25445
SURFACE ENERGY
Multilayer relaxation and surface structure of ordered alloys [NASA-TM-106433] p 2243 N94-23578
An investigation of current and future satellite and in-situ data for the remote sensing of the land surface energy balance [NASA-CR-195138] p 2387 N94-24596
Simulation studies for surfaces and materials strength [NASA-CR-195185] p 2565 N94-25093
Structure and energetics of high index Fe, Al, Cu and Ni surfaces using equivalent crystal theory [NASA-TM-106408] p 2249 N94-25171
SURFACE FINISHING
Weld cladding of hard surfaces [PB93-201598] p 2353 N94-23448
JBK-75 stainless steel machinability study [DE94-002268] p 2242 N94-23475
SURFACE IONIZATION
SALI chemical analysis of provided samples [NASA-CR-194138] p 2232 N94-23524
SURFACE LAYERS
Free energy profiles for Li(+) and I(-) ions approaching Pt(100) surface: A molecular dynamics study [AD-A273455] p 2536 N94-24675
Surface compositional variations of Mo-47Re alloy as a function of temperature [NASA-TP-3402] p 2245 N94-25117
Metallic multilayers: Experimental investigation of magnetic anisotropy and magnetic interlayer coupling [ETN-94-95364] p 2250 N94-25242
Tunnelling in metallic contacts on high-T(c) superconductors: A story of charge carriers in YBa2Cu3O(7-delta) and Bi2CaSr2Cu2O(8+delta) [ISBN-9-03-860142-5] p 2565 N94-25280

SURFACE NAVIGATION
Lunar rover navigation concepts p 2607 N94-23386
Mars 96 rover: Science, instrumentation, and control
p 2369 N94-23395
Mars 96 rover: Technical vision and navigation
p 2370 N94-23417
Marsohkod movement control p 2370 N94-23418
Experiments with a small behaviour controlled planetary rover p 2371 N94-23427
Mars 1994/1996: The French navigation tasks
p 2195 N94-23924
Worldwide vessel locating and tracking system, volume 1
[PB93-193217] p 2175 N94-24474
Design of a wheeled articulating land rover
[NASA-CR-195520] p 2365 N94-24806
SURFACE PROPERTIES
Atomic probes of surface structure and dynamics
[DE94-001651] p 2530 N94-22720
Influence of sintering atmospheres on the aluminum sintering characteristics
[DE93-632412] p 2239 N94-22965
SALI chemical analysis of provided samples
[NASA-CR-194138] p 2232 N94-23524
Surface and interfacial properties of polymer blends. A literature survey
[PB93-230191] p 2254 N94-23561
Chemically sensitive interfaces on SAW devices
[DE94-001832] p 2526 N94-23718
Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387
Thermal phase behavior of metal surfaces: X-ray scattering studies of Pt(001)
[DE94-002991] p 2245 N94-24612
Martian mesoscale circulations induced by variations in surface optical and thermal characteristics: A numerical study p 2622 N94-24899
A thermodynamic approach to obtain materials properties for engineering applications
p 2248 N94-25131
Scanning probe surface modification
[AD-A273178] p 2346 N94-25151
Selected bibliography 2: Diamond surface chemistry
[AD-A273518] p 2565 N94-25160
Use of scanning tunneling microscope in corrosion studies
[VTT-TIED-1416] p 2250 N94-25346
SURFACE REACTIONS
SALI chemical analysis of provided samples
[NASA-CR-194138] p 2232 N94-23524
Chemically sensitive interfaces on SAW devices
[DE94-001832] p 2526 N94-23718
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
Selection of polymer binders and fabrication of SiC fiber-reinforced reaction-bonded silicon nitride matrix composites
[NASA-CR-194874] p 2255 N94-24223
Synthesis and characterization of two-dimensional molecular recognition interfaces
[AD-A273177] p 2536 N94-24729
Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772
Adsorption, desorption, and decomposition of HCl and HBr on Ge(100): Competitive pairingand near-first-order desorption kinetics
[AD-A273504] p 2235 N94-24790
Surface chemistry of liquid metals
p 2249 N94-25133
Selected bibliography 2: Diamond surface chemistry
[AD-A273518] p 2565 N94-25160
SURFACE ROUGHNESS
Characteristics of surface roughness associated with leading edge ice accretion
[NASA-TM-106459] p 2166 N94-23522
A rail joint: The possible initiator of corrugation?
p 2269 N94-23583
Surface analysis of corrugated rail treads
p 2270 N94-23587
Contact analysis of rough rail surfaces
p 2270 N94-23589
Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991
[PB93-230654] p 2386 N94-23755
Interface evaluation in ceramic composites
p 2255 N94-24231
Vortex generation and wave-vortex interaction over a concave plate with roughness and suction
[NASA-CR-191589] p 2337 N94-24869
Examination of the physical, electrical, and microwave evolution of water into young sea ice
[AD-A273559] p 2418 N94-24918
The measurement of the film thickness and the roughness deformation of lubricated elastomers
[ETN-94-95293] p 2261 N94-25078
Surface-induced static undulations in multilayer films of liquid-crystalline polymers
[AD-A273517] p 2262 N94-25159
Analytical skin friction and heat transfer formula for compressible internal flows
[NASA-CR-191185] p 2170 N94-25173
SURFACE TEMPERATURE
Evaporation and combustion of LOX under supercritical and subcritical conditions p 2211 N94-23035
Spatial and temporal variability of soil temperature, moisture and surface soil properties
[NASA-CR-194109] p 2401 N94-23337
Lightning, atmospheric electricity, and climate change
[DE94-002003] p 2408 N94-23471
Synthesis of passive microwave and radar altimeter data for estimating accumulation rates of polar snow
[NASA-CR-194864] p 2382 N94-23573
An investigation of current and future satellite and in-situ data for the remote sensing of the land surface energy balance
[NASA-CR-195138] p 2387 N94-24596
Heat transfer and flow structure in end-wall boundary layers
[AD-A273470] p 2335 N94-24689
Investigation of the heat handling capabilities of DIII-D neutral beamline internal components
[DE94-001107] p 2553 N94-24756
Examination of the physical, electrical, and microwave evolution of water into young sea ice
[AD-A273559] p 2418 N94-24918
An extended laser flash technique for thermal diffusivity measurement of high-temperature materials
p 2238 N94-25132
The IRGen infrared data base modeler
p 2440 N94-25496
SURFACE TREATMENT
Diffusion of hydrogen in iron oxides
[DE93-632430] p 2239 N94-22966
Surface modification of sapphire for enhanced infrared window performance
[DE94-000333] p 2543 N94-23458
Repair of cracked aluminum aircraft structure with composite patches p 2156 N94-24259
Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346
Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657
Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333
Proceedings of the 12th International Congress: Corrosion Control for Low-Cost Reliability. Volume 1: Coatings
[AD-A273661] p 2251 N94-25448
SURFACE VEHICLES
EUTELTRACS: The European experience on mobile satellite services p 2281 N94-22781
Perception and 3D environment modeling for mobile robot autonomous navigation
[LAAS-93117] p 2471 N94-22908
Mars 1994/1996: The French navigation tasks
p 2195 N94-23924
SURFACE WATER
Performance of prefabricated geocomposite subdrainage system in an airport runway
[DOT/FAA/RD-93/23] p 2192 N94-23303
Free energy profiles for Li(+) and I(-) ions approaching Pt(100) surface: A molecular dynamics study
[AD-A273455] p 2536 N94-24675
SURFACE WAVES
Global ocean modeling on the Connection Machine
[DE94-000888] p 2417 N94-23517
Hydro-elastic analysis using a selection of commercial analysis programs
[PB94-118734] p 2376 N94-24478
SURFACTANTS
Measurement of interfacial tension by use of pendant drop video techniques
[DE93-000168] p 2345 N94-24831
SURVEILLANCE RADAR
Analysis and surveillance performance at Chicago O'Hare Airport
[DOT/FAA/RD-92/29] p 2175 N94-24127
SURVEYS
Space technology: A study of the significance of recognition for innovators of spinoff technologies. Commercial Space Expo-USA, 1993
[NASA-CR-194833] p 2596 N94-23528
Prototype Space Technology Hall of Fame exhibit at Technology 2003: Analysis of data from computer-based questionaire
[NASA-CR-194834] p 2596 N94-23540
Cross-calibration survey (VISNIR)
p 2383 N94-23599
Verification and validation of models
[PB94-110566] p 2456 N94-24507
Hydraulics and morphology of mountain rivers: A literature survey. Communications on hydraulic and geotechnical engineering
[PB94-110772] p 2388 N94-24636
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report number 20: The use of selected information products and services by US aerospace engineers and scientists: Results of two surveys
[NASA-TM-109022] p 2592 N94-24649
A biological survey for the nation
[LC-93-85920] p 2421 N94-24704
Evaluation of the UH-1N instrument panel
[AD-A273145] p 2186 N94-24774
General aviation activity survey
[AD-A273284] p 2162 N94-24923
Perceptions of organizational support and affectivity as predictors of job satisfaction
[DOT/FAA/AM-94/2] p 2429 N94-25442
SURVIVAL
Survival suit for submarine personnel: Summary of evaluation studies
[PB93-204634] p 2430 N94-23743
Aircraft evacuation testing: Research and technology issues
[PB94-107620] p 2173 N94-24750
SUSPENSION SYSTEMS (VEHICLES)
Vehicle/guideway interaction and ride comfort in maglev systems
[DE94-001319] p 2352 N94-22991
Vibration isolating engine mount
[CA-PATENT-1-320-710] p 2353 N94-23215
SWELLING
High specific energy, high capacity nickel-hydrogen cell design p 2391 N94-23350
Conceptual design of a device to measure hand swelling in a micro-gravity environment
[NASA-CR-195509] p 2437 N94-24330
SWEPT WINGS
Reduction of structural loads using maneuver load control on the Advanced Fighter Technology Integration (AFTI)/F-111 mission adaptive wing
[NASA-TM-4526] p 2168 N94-24295
SWIRLING
Decay of swirl in turbulent pipe flows
[ETN-94-95353] p 2339 N94-25248
SWITCHES
Picosecond High Pressure Gas Switch experiment
[DE93-040853] p 2307 N94-22950
Switch configuration for migration to optical fiber network p 2447 N94-23250
Viewing hybrid systems as products of control systems and automata
[NASA-CR-194792] p 2472 N94-23300
Non-volatile, solid state bistable electrical switch
[NASA-CASE-NPO-17621-1-CU] p 2309 N94-23820
Computer modeling of plasma flow switches-high current switching on Procyon
[DE93-040189] p 2311 N94-24500
X ray simulator theory support
[AD-A273613] p 2553 N94-24949
SWITCHING
Picosecond High Pressure Gas Switch experiment
[DE93-040853] p 2307 N94-22950
Viewing hybrid systems as products of control systems and automata
[NASA-CR-194792] p 2472 N94-23300
A prototype to automate the video subsystem routing for the video distribution subsystem of Space Station Freedom p 2306 N94-25353
SWITCHING CIRCUITS
Mobilesat (tm): A world first p 2281 N94-22783
Exciplex laser study: Discharge and magnetic switching systems
[PB93-199768] p 2349 N94-24629
Contribution to the study of HF converters radiated disturbances
[ECL-92-34] p 2313 N94-25421
Study of a system for producing a pulsed magnetic field (B 2T) with a frequency of 50 Hz
[ISL-N-601/92] p 2314 N94-25460
SYMBIOSIS
Symbiosis in marine luminous bacteria
[AD-A273540] p 2422 N94-24791
SYMBOLIC PROGRAMMING
ATOS-1: Designing the infrastructure for an advanced spacecraft operations system p 2197 N94-23849

SYMBOLS

Conveying digital data in noisy, unstable, multipath environments [AD-D015980] p 2301 N94-25038

SYMMETRICAL BODIES

On the effect of the damping coefficients on the trajectories of symmetric and non-symmetric stores p 2155 N94-24250

SYMMETRY

Transient analysis of conducting half-plane problem with noncausal scattering image [PB93-225027] p 2524 N94-23110

Observation of non-centrosymmetry and determination of polarity in III-V semiconductors [PB93-201416] p 2561 N94-23503

A working algorithm to isolate integrable surfaces in E cubed [SSCL-PREPRINT-761] p 2452 N94-23518

On BRST quantization of constrained systems [ETN-94-95386] p 2570 N94-25258

Weak interactions in a bilocal chiral theory [DE93-616887] p 2539 N94-25477

SYNAPSES

Customizable VLSI artificial neural network chips based on a novel technology [DE94-001418] p 2307 N94-23008

Electrophysiology of the rat nucleus accumbens: Local circuitry, neuromodulation and synaptic plasticity [PB93-232254] p 2420 N94-23454

SYNCHRONISM

Asynchronous timing and Doppler recovery in DSP based DPSK modems for fixed and mobile satellite applications p 2285 N94-22805

A CDMA synchronisation scheme p 2285 N94-22810

DS-SSMA capacity for a mobile satellite system p 2286 N94-22814

Incomplete corrections in nonlinear problems [PB93-225746] p 2479 N94-23106

Modeling parallelism and synchronization [ETN-94-95179] p 2465 N94-23134

Solid state Time Base Corrector (TBC) [AD-D015981] p 2312 N94-25039

System for producing synchronized signals [AD-D016003] p 2302 N94-25057

Modulation and synchronization technique for MF-TDMA system [NASA-CR-194448] p 2304 N94-25266

SYNCHRONOUS MOTORS

Design and application of electromechanical actuators for deep space missions [NASA-CR-195134] p 2365 N94-24842

SYNCHRONOUS PLATFORMS

Geostationary payload concepts for personal satellite communications p 2278 N94-22765

Global coverage Mobile Satellite Systems: System availability versus channel propagation impairments p 2284 N94-22798

A practical system for regional mobile satellite services p 2288 N94-22828

Advanced mobile satellite communications using COMETS satellite in MM-wave and Ka-band p 2288 N94-22829

CNES organization for station positioning of geostationary satellites p 2501 N94-23857

SYNCHRONOUS SATELLITES

The provision of spectrum for feeder links of non-geostationary mobile satellites p 2276 N94-22751

Multi-access laser communications terminal [NASA-CR-191251] p 2295 N94-23830

Commonality of flight control systems for support of European telecommunications missions p 2304 N94-23834

The geo-control system for station keeping and colocation of geostationary satellites p 2464 N94-23927

HISPASAT launch and early operations phases: Computation and monitoring of geostationary satellite positioning p 2514 N94-23928

SYNCHROTRON RADIATION

Proceedings of the Fifth Users Meeting for the Advanced Photon Source [DE93-040692] p 2531 N94-22948

Activities of Academia Sinica [DE93-614529] p 2541 N94-25335

SYNCHROTRONS

Inverse free electron laser beat-wave accelerator research [DE94-002597] p 2349 N94-23702

Low mass muon pair production in 450 GeV p-Be collisions [PB94-110699] p 2533 N94-23746

SYNOPTIC METEOROLOGY

Modelling TOVS radiances of synoptic systems [NASA-CR-194847] p 2408 N94-23620

Mesospheric and lower thermospheric winds, temperatures densities, and volume emission rates [NASA-CR-195147] p 2403 N94-24486

Analyzing Martian winds and tracer concentrations using Mars Observer data p 2619 N94-24883

Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992 [AD-A273400] p 2416 N94-25071

The evaluation of ASOS for the Kennedy Space Center's Shuttle Landing Facility [NASA-CR-195685] p 2416 N94-25271

SYNTAX

Design and specification of a generic task model for solving boolean constraint satisfaction problems [PB94-118841] p 2486 N94-23762

SYNTHESIS (CHEMISTRY)

Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis [PB93-217982] p 2347 N94-22982

Di(hydroxyphenyl)- 1,2,4-triazole monomers [NASA-CASE-LAR-14440-2] p 2252 N94-23075

Reaction of isocyanates with carboxylic acids and its application to polymer synthesis [PB94-118858] p 2254 N94-23763

Synthesis and in-vivo detection of boronated compounds for use in BNCT [DE94-001899] p 2233 N94-23780

New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane [PB94-112786] p 2233 N94-23801

Synthesis of soluble halogenated polyphenylenes: Mechanism for the coupling halogenated lithiobenzenes [AD-A273547] p 2257 N94-24558

Metal-catalyzed alkynylation of (Bromophenyl)Oligophenylenes: A rapid route to thermoset precursors of high density monolithic glass-like carbon [AD-A273219] p 2260 N94-24863

SYNTHETIC APERTURE RADAR

Optical component MAC Europe ground truth report: Flevoland 1991 (Netherlands) [BCRS-92-27] p 2382 N94-23177

Application of ERS-1 active microwave instrumentation data to remote sensing of snow [PB93-224756] p 2382 N94-23224

Mission planning for Shuttle Imaging Radar-C (SIR-C) with a real-time interactive planning software p 2305 N94-23842

The down, release, and deployment of the RADARSAT SAR antenna p 2305 N94-23986

Investigations into deployment complications of the ERS-1 SAR antenna p 2305 N94-23996

Precipitation measurement using SIR-C: A feasibility study. Investigation at nadir [NASA-CR-195103] p 2410 N94-24126

Free-surface/vorticity interaction [AD-A273263] p 2335 N94-24686

Use of microwave polarimetry to enhance SAR images of the ocean surface [AD-A273568] p 2419 N94-24944

Edge detection using a complex wavelet [AD-A273699] p 2493 N94-25452

The Radar Image Generation (RIG) model p 2306 N94-25497

SYSTEM EFFECTIVENESS

Automatic tools for system testing p 2197 N94-23913

SYSTEM FAILURES

A review of wiring system safety in space power systems [NASA-CR-194439] p 2203 N94-23632

A cross-disciplinary response to improve test activities: The corporate memory capitalization in Ariane4 test domain p 2508 N94-23899

System for Anomaly and Failure Detection (SAFD) system development [NASA-CR-193907] p 2372 N94-24174

Diagnosing process faults using neural network models [DE94-002633] p 2473 N94-24518

Develop advanced nonlinear signal analysis topographical mapping system [NASA-CR-195128] p 2388 N94-24827

Reliability analysis of a repairable dependent parallel system [ETN-94-95312] p 2373 N94-25295

SYSTEM GENERATED ELECTROMAGNETIC PULSES

Safety guidelines for the operation of the DREO 10 m EMP simulator DREMPS [DREO-TN-93-5] p 2193 N94-24117

TEM cell safety report [DREO-TN-93-9] p 2193 N94-24123

SYSTEM IDENTIFICATION

Experimental modification and identification of the DSS-13 antenna control system model p 2291 N94-23260

System identification using a wavelet-based approach [DE94-002191] p 2293 N94-23473

SYSTEMS ANALYSIS

APLAC: An object-oriented analog circuit simulator and design tool. 6.1 system simulations manual [PB93-224871] p 2450 N94-23226

A framework for SFC/DC system data analysis p 2523 N94-23234

Phased-mission system analysis using Boolean algebraic methods [NASA-CR-191564] p 2451 N94-23340

Systems engineering: A formal approach. Part 1: System concepts [PB93-225308] p 2268 N94-23476

GenSAA: A tool for advancing satellite monitoring with graphical expert systems p 2516 N94-23945

Operational characterisation of requirements and early validation environment for high demanding space systems p 2519 N94-23959

A review of ISEAS design p 2465 N94-24410

Systems engineering: A formal approach. Part 4: Analysis methods [PB94-101417] p 2271 N94-24475

Systems engineering: A formal approach. Part 3: Modeling methods [PB94-101409] p 2456 N94-24513

Analyzing the properties of user interface software [AD-A273601] p 2460 N94-24933

Expert system rule-base evaluation using real-time parallel processing [AD-A273701] p 2469 N94-25454

SYSTEMS COMPATIBILITY

Low earth orbit satellite/terrestrial mobile service compatibility p 2288 N94-22827

SYSTEMS ENGINEERING

SATCOM simulator speeds MSS deployment and lowers costs p 2287 N94-22822

Prospects for very-high-resolution solar physics with the Simuris inteferometric mission p 2625 N94-22848

Flexible framework for contingent information systems modelling [PB93-220549] p 2589 N94-23095

How much integral action can a control system tolerate? [OUEL-1923/92] p 2471 N94-23147

The design of a turbine vane cooling system used in the topping cycle [OUEL-1963/92] p 2353 N94-23164

Missions, Technologies, and Design of Planetary Mobile Vehicles [ISBN-2-85428-331-7] p 2605 N94-23373

The study of the mobile lunar explorer p 2607 N94-23389

The robotic Mars rover p 2608 N94-23390

Mission and system concepts for Mars robotic precursor missions p 2608 N94-23391

The new family of JPL planetary surface vehicles p 2369 N94-23398

Electronic payloads for Martian missions: A preliminary assessment of technologies p 2610 N94-23408

The Mars 96 balloon guiderope: An autonomous system in extreme environment conditions p 2369 N94-23412

Dual rover concept for Mars exploration p 2370 N94-23415

Bond graph modeling, simulation, and reflex control of the Mars planetary automatic vehicle p 2370 N94-23424

Systems engineering: A formal approach. Part 1: System concepts [PB93-225308] p 2268 N94-23476

A review of wiring system safety in space power systems [NASA-CR-194439] p 2203 N94-23632

Advanced design concepts for open distributed systems development [PB94-110897] p 2454 N94-23751

Design and specification of a generic task model for solving boolean constraint satisfaction problems [PB94-118841] p 2486 N94-23762

Automatic tools for system testing p 2197 N94-23913

Using Mach threads to control DSN operational sequences p 2477 N94-23916

Deep Space Network (DSN), Network Operations Control Center (NOCC) computer-human interfaces p 2447 N94-23917

A real-time navigation monitoring expert system for the Space Shuttle Mission Control Center p 2202 N94-23921

XRTD: An X-Windows based, real-time radiometric display and analysis system p 2305 N94-23922

Operability engineering in the Deep Space Network p 2514 N94-23930

Training: Plugging the information gaps p 2429 N94-23934

An overview of a generic multi-sensor integrated navigation system design
[CTN-94-60916] p 2174 N94-24120

Technology utilization office data base analysis and design p 2577 N94-24417

A minimum cost tolerance allocation method for rocket engines and robust rocket engine design p 2222 N94-24419

Systems engineering: A formal approach. Part 4: Analysis methods
[PB94-101417] p 2271 N94-24475

Systems engineering: A formal approach. Part 3: Modeling methods
[PB94-101409] p 2456 N94-24513

An automated tool to facilitate code translation for software fault tree analysis
[AD-A273205] p 2457 N94-24556

Systems engineering: A formal approach. Part 2: Frameworks
[PB94-101391] p 2489 N94-24615

RITL: An information system for application reuse-in-the-large
[PB94-119088] p 2592 N94-24646

What makes industries believe in formal methods
[PB94-110848] p 2272 N94-24648

An investigation of requirements traceability to support systems development
[AD-A273167] p 2458 N94-24684

Advanced avionics architecture and technology review. Executive summary and volume 1: Avionics tech nology. Volume 2: Avionics systems engineering
[AD-A273630] p 2186 N94-24733

Intelligent systems and advanced user interfaces for design, operation, and maintenance of command management systems
[NASA-CR-195172] p 2459 N94-24797

Integrated design and manufacturing for the high speed civil transport
[NASA-CR-195511] p 2182 N94-24968

Reuse-Driven Software Processes Guidebook, version 02.00.03
[AD-A273644] p 2461 N94-25148

New Technologies for Space Avionics, 1993
[NASA-CR-195157] p 2272 N94-25193

Appendix A: Proposed statement of work, 1994 p 2272 N94-25194

Appendix B: Rapid development approaches for system engineering and design p 2272 N94-25195

Appendix C: Rapid development approaches for system engineering and design p 2272 N94-25196

Design of gas bearing systems for precision applications
[ISBN-9-03-860112-3] p 2367 N94-25249

A soft robot interface
[OUEL-1948/92] p 2463 N94-25468

Stability questions in predictive control
[OUEL-1970/93] p 2477 N94-25469

SYSTEMS INTEGRATION

Channel and terminal description of the ACTS mobile terminal p 2284 N94-22802

Low earth orbit satellite/terrestrial mobile service compatibility p 2288 N94-22827

Resource allocation planning with international components p 2520 N94-23963

Cockpit/NVG visual integration issues p 2432 N94-23983

Integration and test of high-speed transmitter electronics for free-space laser communications
[NASA-TM-106295] p 2295 N94-24101

Integrated Airframe Design Technology
[AGARD-R-794] p 2177 N94-24313

Multi-disciplinary coupling for integrated design of propulsion systems p 2179 N94-24326

Declarative Object Manipulation Environment (DOME): Alpha version
[AD-A273233] p 2460 N94-24935

Passive millimeter-wave imaging p 2306 N94-25494

SYSTEMS MANAGEMENT

A framework for SFC/DC system data analysis p 2523 N94-23234

Link monitor and control operator assistant: A prototype demonstrating semiautomated monitor and control p 2292 N94-23267

SYSTEMS SIMULATION

SATCOM simulator speeds MSS deployment and lowers costs p 2287 N94-22822

Causal labeled transition systems: A new approach for describing the behavior of concurrent systems
[LAAS-93179] p 2447 N94-22911

Mathematical modeling of MCFC cells/stacks and networks
[DE94-001914] p 2390 N94-23212

A simulation system for Space Station extravehicular activity p 2434 N94-24192

From circuit to signal: Development of a piecewise linear simulator
[ISBN-9-09-005713-7] p 2462 N94-25263

SYSTOLIC PRESSURE

Autogenic-feedback training: A potential treatment for post-flight orthostatic intolerance in aerospace crews
[NASA-TM-108785] p 2426 N94-24102

T

T TAURI STARS

The Nobeyama millimeter array survey for protoplanetary disks around protostar candidates and T Tauri stars in Taurus
[REPT-336] p 2604 N94-24987

ROSAT observations of the x ray binary HD 154791
[NASA-CR-195189] p 2600 N94-25198

Observational studies of the clearing phase in proto-planetary disk systems
[NASA-CR-195182] p 2604 N94-25265

TABLES (DATA)

NASA STI program database: Journal coverage (1990-1992)
[NASA-TM-109720] p 2593 N94-25168

TABS (CONTROL SURFACES)

Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles
[NASA-TM-106450] p 2167 N94-23592

TACHYONS

The Casimir energy of the rigid string with massive ends
[DE93-616851] p 2492 N94-25338

TACTILE DISCRIMINATION

Investigation of hand capabilities under a variety of performance conditions and an attempt to explain performance differences p 2444 N94-25354

TAIL ASSEMBLIES

Aircraft empennage structural detail design
[NASA-CR-195496] p 2179 N94-24332

Aircraft empennage structural detail design
[NASA-CR-195486] p 2183 N94-24969

TAILLESS AIRCRAFT

NASA advanced design program. Design and analysis of a radio-controlled flying wing aircraft
[NASA-CR-195515] p 2180 N94-24589

TALC

Chromate-free talc chemical conversion coatings for aluminum alloys
[DE94-001567] p 2238 N94-22932

TANKS (COMBAT VEHICLES)

Preliminary analysis of the JAPE ground vehicle test data with an artificial neural network classifier p 2529 N94-24222

TANTALUM

Texture gradient effects in tantalum
[DE94-000689] p 2240 N94-23021

The effects of texture and strain on the r-va lue of heavy gauge tantalum plate
[DE94-000690] p 2242 N94-23541

X ray diffraction analysis of electrodeposited beta-tantalum
[AD-A273254] p 2249 N94-25142

TARGET ACQUISITION

Experimental evaluation of camouflage effectiveness in the thermal infrared
[FEL-93-A043] p 2381 N94-22896

Analysis of passive acoustic ranging of helicopters from the joint acoustic propagation experiment p 2529 N94-24220

Acoustic target detection and classification using neural networks p 2529 N94-24221

TARGET RECOGNITION

Imaging System (INEL) T805 prototype
[DE94-002807] p 2382 N94-23492

UAV current technology and future trends p 2154 N94-24245

Object recognition through image understanding for an autonomous mobile robot
[AD-A273206] p 2475 N94-24862

Radar target discrimination by spectrum analysis
[AD-D015982] p 2301 N94-25040

TARGETS

A mixed map/variable structure observer for target tracking p 2157 N94-24263

TASK COMPLEXITY

Pilot evaluation system p 2158 N94-24266

TASK PLANNING (ROBOTICS)

An architecture for teleprogramming autonomous mobile robots at task level
[LAAS-93107] p 2470 N94-22906

A system for the challenging task of collecting samples from a comet surface p 2358 N94-24007

Admittance model for the shuttle remote manipulator system in four configurations
[NASA-CR-4555] p 2474 N94-24635

TASKS

The role of visual context in manual target localization p 2429 N94-25351

TATB

Condensed-phase thermal decomposition of TATB investigated by Atomic Force Microscopy (AFM) and Simultaneous Thermogravimetric Modulated Beam Mass Spectrometry (STMBMS)
[DE94-000396] p 2232 N94-23298

TAURUS CONSTELLATION

ROSAT observations of the x ray binary HD 154791
[NASA-CR-195189] p 2600 N94-25198

TAXIING

System for automatic transportation of aircraft on the ground
[CA-PATENT-1-322-361] p 2193 N94-24785

TAYLOR SERIES

Application of body fitted-coordinates in heat conduction problems
[ETN-94-95338] p 2340 N94-25484

TDR SATELLITES

Utilizing a TDRS satellite for direct broadcast satellite-radio propagation experiments and demonstrations p 2274 N94-22740

A review of GPS-based tracking techniques for TDRS orbit determination p 2196 N94-23257

A method for interference mitigation in space communications scheduling p 2305 N94-23918

Modeling and analysis of selected space station communications and tracking subsystems p 2306 N94-25374

TEARING MODES (PLASMAS)

Effect of LHCD (low hybrid current drive) on tearing mode instability
[DE93-613700] p 2555 N94-25344

TECHNOLOGIES

Prototype Space Technology Hall of Fame exhibit at Technology 2003: Analysis of data from computer-based questionaire
[NASA-CR-194834] p 2596 N94-23540

TECHNOLOGY ASSESSMENT

Advanced display technologies in Russia, Ukraine, and Belarus. Viewgraphs p 2630 N94-22893

Making government work: Electronic delivery of Federal services
[OTA-TCT-578] p 2290 N94-23081

A review of European applications of artificial intelligence to space
[NASA-TM-108789] p 2453 N94-23568

Satellite communications systems and technology. Executive Summary
[NASA-TM-109388] p 2293 N94-23622

Satellite communications systems and technology. Volume 2: Site reports
[NASA-TM-109399] p 2293 N94-23628

Overview of molten carbonate fuel cell technology development
[DE94-001911] p 2394 N94-23781

A fifteen years lifetime mechanism for an infrared Earth sensor p 2362 N94-24040

Proceedings of Technology and Governance in the 1990's
[PB93-192904] p 2597 N94-24312

Overview of the status and progress in photovoltaics research in the United States
[DE94-000981] p 2395 N94-24512

Advanced avionics architecture and technology review. Executive summary and volume 1: Avionics tech nology. Volume 2: Avionics systems engineering
[AD-A273630] p 2186 N94-24733

The future of rotary-wing aircraft p 2185 N94-25070

US general aviation: The ingredients for a renaissance. A vision and technology strategy for US industry, NASA, FAA, universities p 2162 N94-25097

TECHNOLOGY TRANSFER

Space technology: A study of the significance of recognition for innovators of spinoff technologies. 1993 activities/1994, 1995 plans
[NASA-CR-194836] p 2596 N94-23526

Space technology: A study of the significance of recognition for innovators of spinoff technologies. Commercial Space Expo-USA, 1993
[NASA-CR-194833] p 2596 N94-23528

Contributions of DOE weapons labs and NIST to semicondutor technology
[OTA-ITE-585] p 2630 N94-23572

Proceedings of the NIST Conference on Reducing the Cost of Space Infrastructure and Operations: Part 1: Oral presentations and discussion
[PB94-111374] p 2194 N94-23770

The Electronics Quality/Reliability Center: Lessons learned from partnering with industry
[DE94-001501] p 2309 N94-23777

National Institute of Standards and Technology Conference on Reducing the Cost of Space Infrastructure and Operations. Part 2: Topical papers [PB94-113487] p 2194 N94-23819
Object-oriented technologies in a multi-mission data system p 2506 N94-23885
Activities involving aeronautical, space science, and technology support for minority institutions [NASA-CR-195095] p 2574 N94-24225
Technology utilization office data base analysis and design p 2577 N94-24417
A compilation of technology spinoffs from the US Space Shuttle Program p 2578 N94-24424
NASA tech brief evaluations [NASA-CR-195150] p 2597 N94-24829
Collaborating with our customers: NIST building and fire research laboratory [PB94-110194] p 2272 N94-24955
Spinoff 1993 [NASA-NP-211] p 2597 N94-25018
National Academy of Sciences-Academy of Sciences of the USSR Workshop on the Mechanics of Ice and its Applications [AD-A273338] p 2419 N94-25088
Advanced Information Processing System (AIPS) p 2165 N94-25115
Reuse Adoption Guidebook, version 02.00.05 [AD-A273652] p 2461 N94-25149
Wind climate and urban geometry [ISBN-9-03-860132-8] p 2416 N94-25261
National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 1 [NASA-CR-188271-VOL-1] p 2632 N94-25348

TECHNOLOGY UTILIZATION
The history of development of molybdenum alloys for structural applications [DE94-000389] p 2239 N94-22958
Power beaming to space using a nuclear reactor-pumped laser [DE94-001208] p 2348 N94-23185
Pushing technology to satisfy world applications [DE94-001365] p 2353 N94-23191
Influence of a new generation of operations support systems on current spacecraft operations philosophy: The users feedback p 2507 N94-23894
Technology utilization office data base analysis and design p 2577 N94-24417
NASA technology applications team: Applications of aerospace technology [NASA-CR-194775] p 2597 N94-24494
Space Technology: A study of the significance of recognition for innovators of spinoff technologies. A case study on the impact of the space technology hall of fame award [NASA-CR-194835] p 2597 N94-24496
Power generation technology options for a Mars mission [NASA-TM-106451] p 2220 N94-24681
NASA tech brief evaluations [NASA-CR-195150] p 2597 N94-24829
A white paper: NASA virtual environment research, applications, and technology [NASA-TM-109682] p 2428 N94-24855
Spinoff 1993 [NASA-NP-211] p 2597 N94-25018
High-order technology: Applying technical excellence to new airplane development p 2185 N94-25069

TECTONICS
GPS survey of the western Tien Shan [NASA-CR-195174] p 2175 N94-24826
Tectonic Evolution of Mars [NASA-CR-194714] p 2623 N94-24996
The geophysical signal of the martian global dichotomy p 2623 N94-24997

TELECOMMUNICATION
Global coverage Mobile Satellite Systems: System availability versus channel propagation impairments p 2284 N94-22798
Channel and terminal description of the ACTS mobile terminal p 2284 N94-22802
Code generation for the attribute evaluator of the protocol engine grammar processor unit [EUT-93-E-271] p 2450 N94-23173
The TOPSIM 4 graphic user interface [ESA-STM-247] p 2450 N94-23228
Advanced design concepts for open distributed systems development [PB94-110897] p 2454 N94-23751
A simulation and evaluation of NATO Standardization Agreement (STANAG) 4214 [AD-A273195] p 2297 N94-24554

The European Space Agency standard for space packet utilisation p 2203 N94-23954
Compression for an effective management of telemetry data p 2518 N94-23956
Use of infrared telemetry as part of a nonintrusive inflight data collection system to collect human factors data p 2434 N94-24193

TELEOPERATORS
Manned Mars mission on-orbit operations FTS capabilities assessment [NASA-CR-189328] p 2430 N94-23080
Telerobotic rendezvous and docking vision system architecture [NASA-CR-191329] p 2204 N94-23828
SAMPEX payload operation control center implementation p 2197 N94-23843
Columbus system support for telescience operations p 2505 N94-23877
Mars 1994/1996: The French navigation tasks p 2195 N94-23924
Connector mechanisms in compliance with extreme space conditions p 2360 N94-24025
Precision Displacement Mechanism (PDM) p 2360 N94-24026
Crew interface analysis: Selected articles on space human factors research, 1987 - 1991 [NASA-TM-104756] p 2433 N94-24185
Hand controller commonality evaluation process p 2435 N94-24197
Programmable display pushbuttons on the Space Station's telerobot control panel p 2435 N94-24198
Space Station Freedom coupling tasks: An evaluation of their telerobotic and EVA compatibility p 2436 N94-24200
The effects of spatially displaced visual feedback on remote manipulator performance p 2436 N94-24201
Development of a force feedback anthropomorphic teleoperation input device for control of robot hands [NASA-CR-195109] p 2437 N94-24329

TELEPHONES
The Iridium (tm) system: Personal communications anytime, anyplace p 2281 N94-22785
The Globalstar mobile satellite system for worldwide personal communications p 2282 N94-22786
Odyssey personal communications satellite system p 2282 N94-22787

TELEPHONY
Mobilesat (tm): A world first p 2281 N94-22783
INMARSAT's personal communicator system p 2282 N94-22788
A high quality voice coder with integrated echo canceller and voice activity detector for mobile satellite applications p 2286 N94-22812

TELEROBOTICS
An architecture for teleprogramming autonomous mobile robots at task level [LAAS-93107] p 2470 N94-22906
Manned Mars mission on-orbit operations FTS capabilities assessment [NASA-CR-189328] p 2430 N94-23080
Graphical programming: A systems approach for telerobotic servicing of space assets [DE93-019016] p 2472 N94-23201
The remote-operated autonomous-robot concept: From deep sea to outer space applications p 2370 N94-23413
Lunar exploration rover program developments [DE93-040759] p 2613 N94-23469
Ground operation of robotics on Space Station Freedom p 2371 N94-23841
Hand controller commonality evaluation process p 2435 N94-24197
Programmable display pushbuttons on the Space Station's telerobot control panel p 2435 N94-24198
Speech versus manual control of camera functions during a telerobotic task p 2436 N94-24199
Space Station Freedom coupling tasks: An evaluation of their telerobotic and EVA compatibility p 2436 N94-24200
The effects of spatially displaced visual feedback on remote manipulator performance p 2436 N94-24201
Simulation of the human-telerobot interface on the Space Station p 2436 N94-24202

TELESCOPES
Multi-access laser communications terminal [NASA-CR-191251] p 2295 N94-23830
ASTER, a multinational Earth observing concept p 2389 N94-23840
Data analysis and interpretation of lunar dust exosphere p 2623 N94-25349

TELEVISION CAMERAS
Orbital docking system centerline color television camera system test [NASA-TM-104783] p 2205 N94-24625

TELEVISION SYSTEMS
Mars 96 rover: Technical vision and navigation p 2370 N94-23417
Reducing video frame rate increases remote optimal focus time [NASA-TM-104018] p 2431 N94-23970
HORACE: Presentation-level protocol standard for digital transmission of monochrome television images [AD-A273395] p 2197 N94-25064

TELEVISION TRANSMISSION
HORACE: Presentation-level protocol standard for digital transmission of monochrome television images [AD-A273395] p 2197 N94-25064

TELLURIC CURRENTS
The influence of orography on the transport of atmospheric constituents p 2619 N94-24886

TEMPERATE REGIONS
Nonlinear dynamics applied to atmospheric prediction [AD-A273437] p 2404 N94-24674

TEMPERATURE CONTROL
An engineering code to analyze hypersonic thermal management systems p 2320 N94-23636
Thermal control system for SSF sensor/electronics [SAND-92-0652C] p 2321 N94-23640
Utilization of recently developed codes for high power Brayton and Rankine cycle power systems p 2222 N94-23641
Hubble Space Telescope high speed photometer orbital verification [NASA-CR-189333] p 2204 N94-24226
Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344

Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies
p 2371 N94-24427
Near Earth asteroid rendezvous
[NASA-CR-195518] p 2195 N94-24808
Thermal control system for Space Station Freedom photovoltaic power module
[NASA-TM-105650] p 2205 N94-24825
Thermistor controlled current source versatile temperature sensor
[AD-D015979] p 2345 N94-25037

TEMPERATURE DEPENDENCE
Electrical transport in La(2-x)Sr(x)CuO(4-y)
[DE93-040885] p 2556 N94-22912
Low temperature diffusion of hydrogenic species in oxide crystals: Radiation induced diffusion
[DE94-000374] p 2558 N94-22957
Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009
Tensile properties of 21-6-9 stainless steel at elevated temperatures
[DE94-001852] p 2240 N94-23017
Thermally activated low temperature creep and primary water stress corrosion cracking of NiCrFe alloys
[DE94-001756] p 2241 N94-23219
Conductors with small Fermi energies and small gap energies
[DE93-040887] p 2561 N94-23432
Physics of iron
[DE94-002002] p 2402 N94-23721
Disorder effects on small-polaron formation and hopping
[DE94-001205] p 2534 N94-23804
Temperature dependence of protein solubility-determination, application to crystallization, and growth kinetics studies p 2224 N94-24344
The mechanical properties of single crystal (alpha)-Si3N4
[DE94-002632] p 2563 N94-24517
Surface compositional variations of Mo-47Re alloy as a function of temperature
[NASA-TP-3402] p 2245 N94-25117

TEMPERATURE DISTRIBUTION
A random distribution reacting mixing layer model
[NASA-CR-194445] p 2187 N94-23552
An analysis of solar mesospheric temperatures for the upper stratosphere and mesosphere
[NASA-CR-194861] p 2626 N94-23626
A direct approach to finding unknown boundary conditions in steady heat conduction
p 2322 N94-23645
Convection equation modeling: A non-iterative direct matrix solution algorithm for use with SINDA
p 2323 N94-23651
Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657
Unsteady three-dimensional thermal field prediction in turbine blades using nonlinear BEM
p 2325 N94-23665
Flow and temperature distribution in a naturally stratified thermal storage tank
[AD-A273511] p 2336 N94-24821
Diagnostic calculations of the circulation in the Martian atmosphere p 2622 N94-24898
Two-dimensional modeling of thermal inversion layers in the middle atmosphere of Mars p 2622 N94-24900
Mars Observer: Applications to atmospheric transport
p 2623 N94-24904
Thermophysical property sensitivity effects in steel solidification p 2246 N94-25122
Hydride thermodynamic machines
[VTT-JULK-768] p 2571 N94-25416

TEMPERATURE EFFECTS
Discontinuous phase formation and selective attack of SiC materials exposed to low oxygen partial pressure environments
[DE93-040161] p 2231 N94-22933
Development of a computational testbed for numerical simulation of combustion instability
p 2213 N94-23046
Shear coaxial injector instability mechanisms
p 2213 N94-23047
Thermodynamics of nickel-cadmium and nickel-hydrogen batteries p 2391 N94-23349
A method to remove intercalates from bromine and iodine intercalated carbon fibers
[NASA-TM-106443] p 2222 N94-23591
Development of a theory of the wear of ceramics
[DE94-002773] p 2254 N94-23783
Laser soldering of Sn plated brass integrator assembly housings
[DE94-001149] p 2270 N94-23790
The mechanical properties of single crystal (alpha)-Si3N4
[DE94-002632] p 2563 N94-24517
Prediction of thermal cycling induced cracking in polmer matrix composites
[NASA-CR-195135] p 2229 N94-24579
Flex bearing UUEC, volume 2
[NASA-CR-193901] p 2365 N94-24588
Thermal phase behavior of metal surfaces: X-ray scattering studies of Pt(001)
[DE94-002991] p 2245 N94-24612
Crashworthiness analysis using advanced material models in DYNA3D
[DE94-002988] p 2229 N94-24632
Relationship between transition and modes of instability in supersonic boundary layers
[NASA-CR-4562] p 2336 N94-24725
Dipolar relaxation in a second-order nonlinear optical interpenetrating polymer network
[AD-A273626] p 2258 N94-24732
Measurement of electron temperature and density in the DIII-D neutral beam ion source arc chamber
[DE94-001099] p 2553 N94-24746
The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896
On superconductivity of alpha-(BEDT-TTF)2KHg(SCN)4
[REPT-A-2660] p 2564 N94-24978
Lattice dynamics of Ba(1-x)K(x)BiO3 as studied by neutron scattering and computer simulation
[DE93-617053] p 2567 N94-25424

TEMPERATURE GRADIENTS
Experimental evaluation of camouflage effectiveness in the thermal infrared
[FEL-93-A043] p 2381 N94-22896
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
Modelling TOVS radiances of synoptic systems
[NASA-CR-194847] p 2408 N94-23620
A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements
[AD-A273803] p 2406 N94-25537

TEMPERATURE INVERSIONS
Two-dimensional modeling of thermal inversion layers in the middle atmosphere of Mars p 2622 N94-24900

TEMPERATURE MEASUREMENT
A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research
[DE94-000565] p 2381 N94-23001
Droplet turbulence interactions under subcritical and supercritical conditions p 2211 N94-23036
Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor
[DE94-000331] p 2543 N94-23461
High temperature, oxidation resistant noble metal-Al alloy thermocouple
[NASA-CASE-LEW-15515-1] p 2343 N94-23826
Comparison between 1-minute and 15-minute averages of turbulence parameters p 2528 N94-24218
White-light, pressure, and temperature interferopolarimetric sensor featuring optical fibers
[PB93-199792] p 2545 N94-24631
Measurement of electron temperature and density in the DIII-D neutral beam ion source arc chamber
[DE94-001099] p 2553 N94-24746
Containerless measurements on liquids at high temperatures p 2238 N94-25125
Liquidus temperature and optical properties measurement by containerless techniques
p 2247 N94-25126
Temperature measurement using infrared imaging systems during turbine engine altitude testing
[NASA-TM-105871] p 2193 N94-25184
Hydride thermodynamic machines
[VTT-JULK-768] p 2571 N94-25416
Analysis of the effects of wake passage on heat transfer in a linear turbine cascade
[AD-A273729] p 2339 N94-25446

TEMPERATURE PROFILES
A pressurized thermogravimetric analyzer for use in studies of gas/solid systems
[DE94-001224] p 2342 N94-22989
Spatial and temporal variability of soil temperature, moisture and surface soil properties
[NASA-CR-194109] p 2401 N94-23337
An analysis of solar mesospheric temperatures for the upper stratosphere and mesosphere
[NASA-CR-194861] p 2626 N94-23626
Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893
Examination of the physical, electrical, and microwave evolution of water into young sea ice
[AD-A273559] p 2418 N94-24918

TEMPERATURE SENSORS
Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor
[DE94-000331] p 2543 N94-23461
White-light, pressure, and temperature interferopolarimetric sensor featuring optical fibers
[PB93-199792] p 2545 N94-24631
Thermistor controlled current source versatile temperature sensor
[AD-D015979] p 2345 N94-25037

TEMPORAL DISTRIBUTION
Spatial and temporal variability of soil temperature, moisture and surface soil properties
[NASA-CR-194109] p 2401 N94-23337
Dynamics of the atmosphere of Mars: Review of some outstanding problems p 2620 N94-24888
An analysis of gamma ray burst time histories
[NASA-CR-195191] p 2629 N94-25199

TEMPORAL RESOLUTION
Dimensional analysis of acoustically propagated signals p 2528 N94-24217
Temporal behavior of the electron density profile during limiter biasing in the HYBTOK-2 tokamak
[NIFS-257] p 2552 N94-24456
Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124
Evaluation of image quality p 2443 N94-25514

TENSILE DEFORMATION
The effects of texture and strain on the r-va lue of heavy gauge tantalum plate
[DE94-000690] p 2242 N94-23541

TENSILE PROPERTIES
Tensile properties of 21-6-9 stainless steel at elevated temperatures
[DE94-001852] p 2240 N94-23017
Effect of neutron irradiation on tensile properties of V-Cr-Ti alloys
[DE94-001433] p 2240 N94-23194
The effects of texture and strain on the r-va lue of heavy gauge tantalum plate
[DE94-000690] p 2242 N94-23541
Ceramic matrix composites: Challenges and opportunities p 2255 N94-24230
Test methods for composites: A status report. Volume 3: Shear test methods
[AD-A273561] p 2230 N94-25163

TENSILE STRENGTH
Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2
[NASA-CR-193893] p 2229 N94-24224
Assessment of impact damage of composite rocket motor cases
[NASA-CR-195143] p 2220 N94-24595
The mechanical property data base from an Air Force/Industry Cooperative Test Program on advanced aluminum alloys (7064 and CW67)
[AD-A273741] p 2251 N94-25531

TENSILE STRESS
Fracture simulations via massively parallel molecular dynamics
[DE93-040159] p 2374 N94-22871
Tensile properties of 21-6-9 stainless steel at elevated temperatures
[DE94-001852] p 2240 N94-23017

TENSILE TESTS
Stress corrosion cracking properties of 15-5PH steel
p 2251 N94-23244
Time dependent behavior of a graphite/thermoplastic composite and the effects of stress and physical aging
[NASA-TM-109047] p 2228 N94-23280
Grain-boundary microchemistry and intergranular cracking of irradiated austenitic stainless steel
[DE94-000466] p 2242 N94-23457
Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556
Test methods for composites: A status report. Volume 1: Tension test methods
[AD-A273501] p 2230 N94-24942

TENSOR ANALYSIS
Tensoral for post-processing users and simulation authors p 2333 N94-24169

TENSORS
Mass properties measurement system dynamics
p 2368 N94-23235
Tensoral for post-processing users and simulation authors p 2333 N94-24169

TERBIUM
Improved magnetostrictive transducer drive elements achieved by reduction of crystalline defects and improved crystalline orientation
[AD-A273391] p 2313 N94-25276

TERMINAL BALLISTICS
Bibliographic Retrieval System (BARS), Sandia Shock Compression (SSC) database Shock Physics Index [DE94-001679] p 2589 N94-23126
TERMINOLOGY
Glossary knowledge engineering [NLR-TP-91435-U] p 2471 N94-23137
Definitions in use by the visible and near-infrared, and thermal working groups p 2383 N94-23598
TERRAIN
K-band mobile propagation measurements using ACTS p 2283 N94-22792
Mobility analysis, simulation, and scale model testing for the design of wheeled planetary rovers p 2370 N94-23425
Joint Acoustic Propagation Experiment (JAPE) p 2527 N94-24208
Tools for visualizing landscape pattern for large geographic areas [DE94-001121] p 2388 N94-24757
TEST CHAMBERS
Dual-bell altitude compensating nozzles p 2215 N94-23057
Automatic pressure control system for the Wright Laboratory Compressor Research Facility [AD-A273827] p 2194 N94-25522
TEST EQUIPMENT
Airport pavement test machine design and cost study [DOT/FAA/CT-93/51] p 2192 N94-24072
An analysis of traditional operational testing to project how testing will be conducted in the future [AD-A273189] p 2372 N94-24553
TEST FACILITIES
The development of the HERA Test Facility (HTF) p 2197 N94-24020
TEM cell safety report [DREO-TN-93-9] p 2193 N94-24123
Altitude simulation facility for testing large space motors p 2156 N94-24255
LSS systems planning and performance program [NASA-CR-193882] p 2196 N94-24309
An analysis of traditional operational testing to project how testing will be conducted in the future [AD-A273189] p 2372 N94-24553
Collaborating with our customers: NIST building and fire research laboratory [PB94-110194] p 2272 N94-24955
TEST STANDS
NASA/Goddard Space Flight Center's testbed for CCSDS compatible systems p 2197 N94-23855
Design and application of electromechanical actuators for deep space missions [NASA-CR-195134] p 2365 N94-24842
Performance measurements of the multimedia testbed on Mach 3.0: Experience writing real-time device drivers, servers, and applications [AD-A273600] p 2460 N94-24932
The ISL rotor bench [ISL-R-108/92] p 2185 N94-25301
TEST VEHICLES
High energy density aluminum-oxygen cell p 2393 N94-23363
TESTS
Automatic tools for system testing p 2197 N94-23913
TETHERED SATELLITES
Nearly uniform deployment/retrieval strategy for space tether systems p 2156 N94-24256
TETHERING
Fingered bola body, bola with same, and methods of use [NASA-CASE-MSC-21967-1] p 2354 N94-23822
TETHERLINES
Nearly uniform deployment/retrieval strategy for space tether systems p 2156 N94-24256
TETRAHEDRONS
Structures of tetrahedrization: A mathematical and algorithmical point of view [ETN-94-95172] p 2480 N94-23166
TEXTILES
Composites and textile reinforcement [VTT-TIED-1424] p 2231 N94-25420
TEXTS
World processor: An interface for textual display and manipulation in virtual reality [PB94-118643] p 2592 N94-24642
TEXTURES
Texture gradient effects in tantalum [DE94-000689] p 2240 N94-23021
The effects of texture and strain on the r-va lue of heavy gauge tantalum plate [DE94-000690] p 2242 N94-23541
THALLIUM
CsI(Tl)-photodiode detectors for spectroscopy at low radiation levels [MPI-PHE/92-22] p 2314 N94-25457
THEOREM PROVING
Combinatory reduction systems: Introduction and survey [PB94-110582] p 2457 N94-24570
Exploiting structure: Introduction and motivation [NASA-CR-195136] p 2490 N94-24847
On the inversion of the n-dimensional Laplace transform [RR-461] p 2492 N94-25310
Extension problem for generalized multi-monogenic functions in Clifford analysis [DE93-616818] p 2493 N94-25433
A reachability test for systems over polynomial rings using Groebner bases [MEMO-COSOR-92-38] p 2493 N94-25527
THEOREMS
On the numerical computation of invariant manifolds [W-9306] p 2480 N94-23140
The cusp horseshoe and its bifurcations in the unfolding of an inclination-flip homoclinic orbit [W-9307] p 2480 N94-23141
A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667
The Third Twente Workshop on Graphs and Combinatorial Optimization [PB94-110947] p 2486 N94-23722
Egalitarian non-average contribution method for cooperative games [PB94-111705] p 2497 N94-23800
Tail processes under heavy random censorship with applications [PB94-110632] p 2495 N94-24508
Reduced game properties of egalitarian division rules for cooperative games [PB94-111689] p 2521 N94-24523
Tool sharing, part 3 [PB94-111697] p 2467 N94-24524
Polynomials orthogonal with respect to an inner product involving differences [PB94-110731] p 2489 N94-24572
THEORETICAL PHYSICS
Towards a theory of quark and lepton masses [DE94-001726] p 2533 N94-23218
Theoretical atomic physics for fusion [DE94-000712] p 2533 N94-23543
Heavy flavour physics at LEP [NIKHEF-H/92-19] p 2539 N94-25465
Orbit spaces over commutative rings and projectives as semi-isomorphisms [DE93-616822] p 2493 N94-25473
THERMAL ABSORPTION
The annual pressure cycle on Mars: Results from the LMD Martian atmospheric general circulation model p 2619 N94-24884
THERMAL ANALYSIS
A pressurized thermogravimetric analyzer for use in studies of gas/solid systems [DE94-001224] p 2342 N94-22989
Fully coupled nonlinear thermomechanical analysis including general contact in PALM2D [DE94-001661] p 2568 N94-23216
Improved thermal force modeling for GPS satellites p 2207 N94-23259
Mechanical and thermal buckling analysis of sandwich panels under different edge conditions [NASA-TM-4535] p 2228 N94-23514
The Fifth Annual Thermal and Fluids Analysis Workshop [NASA-CP-10122] p 2320 N94-23634
Advanced X ray Astrophysics Facility-Imaging (AXAF-I) thermal analyses using Integrated Thermal Analysis System (ITAS) program p 2320 N94-23635
Uncertainty analysis of diffuse-gray radiation enclosure problems: A hypersensitive case study p 2320 N94-23637
A comparison of TSS and TRASYS in form factor calculation p 2321 N94-23638
Accuracy control in Monte Carlo radiative calculations p 2321 N94-23639
Some useful innovations with TRASYS and SINDA-85 p 2322 N94-23647
Analysis of high vacuum systems using SINDA'85 p 2322 N94-23648
Thermal analysis of combinatorial solid geometry models using SINDA p 2323 N94-23650
Unsteady three-dimensional thermal field prediction in turbine blades using nonlinear BEM p 2325 N94-23665
Response-coefficient method for heat-conduction transients with time-dependent inputs p 2326 N94-23671
Thermal-fluid analysis of the fill and drain operations of a cryogenic fuel tank [NASA-TM-104273] p 2334 N94-24495
THERMAL BLOOMING
Internally folded scalable laser [AD-D015978] p 2350 N94-25216
THERMAL BUCKLING
Mechanical and thermal buckling analysis of sandwich panels under different edge conditions [NASA-TM-4535] p 2228 N94-23514
THERMAL CONDUCTIVITY
Fully coupled nonlinear thermomechanical analysis including general contact in PALM2D [DE94-001661] p 2568 N94-23216
Fire safety engineering research in Norway [PB93-201630] p 2268 N94-23429
Uncertainty analysis of diffuse-gray radiation enclosure problems: A hypersensitive case study p 2320 N94-23637
Features of a SINDA/FLUINT model of a liquid oxygen supply line p 2322 N94-23649
THERMAL CONTROL COATINGS
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 2: Effect of spray parameters on the performance of several hafnia-yttria and zirconia-yttria coatings [NASA-TP-3296] p 2242 N94-23467
Structural characterization and thermal cycling behaviour of EB-PVD thermal barrier coating systems [ISBN-0-315-83365-3] p 2257 N94-24468
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure [AD-A273403] p 2261 N94-25072
THERMAL CYCLING TESTS
Structural characterization and thermal cycling behaviour of EB-PVD thermal barrier coating systems [ISBN-0-315-83365-3] p 2257 N94-24468
Prediction of thermal cycling induced cracking in polmer matrix composites [NASA-CR-195135] p 2229 N94-24579
Synthesis of polyphenylenes via Bergman cyclization of enediyne monomers [AD-A273298] p 2260 N94-24924
THERMAL DECOMPOSITION
Condensed-phase thermal decomposition of TATB investigated by Atomic Force Microscopy (AFM) and Simultaneous Thermogravimetric Modulated Beam Mass Spectrometry (STMBMS) [DE94-000396] p 2232 N94-23298
THERMAL DEGRADATION
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers [DE94-002293] p 2350 N94-24659
THERMAL DIFFUSION
Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897
THERMAL DIFFUSIVITY
Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 2: Effect of spray parameters on the performance of several hafnia-yttria and zirconia-yttria coatings [NASA-TP-3296] p 2242 N94-23467
Containerless measurements on liquids at high temperatures p 2238 N94-25125
An extended laser flash technique for thermal diffusivity measurement of high-temperature materials p 2238 N94-25132
Microwave techniques for physical property measurements p 2238 N94-25134
THERMAL DISSOCIATION
Atomic probes of surface structure and dynamics [DE94-001651] p 2530 N94-22720
THERMAL EMISSION
Imaging XUV spectroscopy of a Z-pinch plasma in the former Soviet Union [DE93-040849] p 2549 N94-22949
ASTER, a multinational Earth observing concept p 2389 N94-23840
Nonequilibria in thermal emission from supernova remnants [NIFS-264] p 2602 N94-24868
Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887
Retrieval of temperature profiles from Martian infrared spectra p 2620 N94-24893
THERMAL ENERGY
Second law analysis of a conventional steam power plant p 2322 N94-23646
Ulysses log 1992 p 2502 N94-23863
Infrared sensors and systems for enhanced vision/autonomous landing applications p 2439 N94-25491

THERMAL ENVIRONMENTS
Development and experimental validation of computational methods to simulate abnormal thermal and structural environments
[DE94-000554] p 2268 N94-23000
THERMAL EXPANSION
Developments in materials for high-field magnets
[DE94-000761] p 2307 N94-22987
Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2
[NASA-CR-193893] p 2229 N94-24224
Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124
THERMAL FATIGUE
Thermal fatigue: A literature review
[PB93-226306] p 2375 N94-23120
Elevated temperature crack propagation
[NASA-TM-106490] p 2377 N94-24715
THERMAL INSULATION
Features of a SINDA/FLUINT model of a liquid oxygen supply line p 2322 N94-23649
Micromechanical simulation of damage progression in carbon phenolic composites p 2231 N94-24446
Thermal-fluid analysis of the fill and drain operations of a cryogenic fuel tank
[NASA-TM-104273] p 2334 N94-24495
THERMAL MAPPING
Temporal and spatial mapping of surface albedo and atmospheric dust opacity on Mars p 2619 N94-24887
Evidence for dust transport in Viking IR thermal mapper opacity data p 2620 N94-24892
Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897
Diagnostic calculations of the circulation in the Martian atmosphere p 2622 N94-24898
THERMAL PLASMAS
Analysis and experiments of a whistler-wave plasma thruster
[DE94-001533] p 2209 N94-23012
Modelling of thermal argon plasmas
[ETN-94-95363] p 2554 N94-25300
THERMAL PROTECTION
NASA/USRA advanced design program
[NASA-CR-195548] p 2180 N94-24492
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle mission STS-58
[NASA-TM-109194] p 2200 N94-24577
Configuration development study of the OSU 1 hypersonic research vehicle
[NASA-CR-195522] p 2181 N94-24591
Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles
[NASA-CR-195163] p 2201 N94-24919
Plasma sprayed thermal barrier coatings: Production, characterization and testing
[ISBN-9-03-860082-8] p 2555 N94-25439
Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe
[AD-A273830] p 2571 N94-25524
THERMAL RADIATION
Improved thermal force modeling for GPS satellites
p 2207 N94-23259
Uncertainty analysis of diffuse-gray radiation enclosure problems: A hypersensitive case study
p 2320 N94-23637
The IRGen infrared data base modeler
p 2440 N94-25496
THERMAL RESISTANCE
Advanced materials for radiation-cooled rockets
p 2214 N94-23052
THERMAL SHOCK
Plasma sprayed thermal barrier coatings: Production, characterization and testing
[ISBN-9-03-860082-8] p 2555 N94-25439
THERMAL STABILITY
Shear coaxial injector instability mechanisms
p 2213 N94-23047
Condensed-phase thermal decomposition of TATB investigated by Atomic Force Microscopy (AFM) and Simultaneous Thermogravimetric Modulated Beam Mass Spectrometry (STMBMS)
[DE94-000396] p 2232 N94-23298
Ceramic silicon-boron-carbon fibers from organic silicon-boron-polymers
[NASA-CASE-ARC-11956-1-SB] p 2253 N94-23311
A method to remove intercalates from bromine and iodine intercalated carbon fibers
[NASA-TM-106443] p 2222 N94-23591
Hubble Space Telescope high speed photometer orbital verification
[NASA-CR-189333] p 2204 N94-24226
An overview on the main available ceramic composites and their processing routes p 2255 N94-24229
CMC design consequences p 2256 N94-24238
Preparation and properties of translucent gamma-aluminium oxynitride
[ETN-94-95305] p 2263 N94-25281
THERMAL STRESSES
Thermal fatigue: A literature review
[PB93-226306] p 2375 N94-23120
Fully coupled nonlinear thermomechanical analysis including general contact in PALM2D
[DE94-001661] p 2568 N94-23216
Analysis of local delaminations caused by angle ply matrix cracks
[NASA-TM-109052] p 2228 N94-24083
Numerical modeling of physical vapor transport under microgravity conditions: Effect of thermal creep and stress p 2223 N94-24340
Strength and life of pressure vessels subjected to impacts and thermomechanical GFRP loading
[VTT-JULK-771] p 2379 N94-25418
THERMAL VACUUM TESTS
Thermal control system for SSF sensor/electronics
[SAND-92-0652C] p 2321 N94-23640
THERMISTORS
Thermistor controlled current source versatile temperature sensor
[AD-D015979] p 2345 N94-25037
THERMOCHEMISTRY
Thermochemistry of the actinides
[DE94-000895] p 2231 N94-22943
THERMOCLINES
Vertical motion in the SYNOP central array
[AD-A273593] p 2418 N94-24795
Flow and temperature distribution in a naturally stratified thermal storage tank
[AD-A273511] p 2336 N94-24821
THERMOCOUPLES
High temperature, oxidation resistant noble metal-Al alloy thermocouple
[NASA-CASE-LEW-15515-1] p 2343 N94-23826
Investigation of the heat handling capabilities of DIII-D neutral beamline internal components
[DE94-001107] p 2553 N94-24756
THERMODYNAMIC CYCLES
Enhanced absorption cycle computer model
[DE94-001997] p 2271 N94-23793
THERMODYNAMIC EFFICIENCY
CFD modeling of microwave electrothermal thrusters
p 2216 N94-23066
The effect of high altitude pressure on the power and efficiency of an airborne two-stroke engine
p 2155 N94-24253
THERMODYNAMIC EQUILIBRIUM
Thermodynamic models for bounding pressurant mass requirements of cryogenic tanks
[NASA-TM-106476] p 2346 N94-25202
THERMODYNAMIC PROPERTIES
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis
[PB93-217982] p 2347 N94-22982
Heat transfer in rocket combustion chambers
p 2214 N94-23051
Thermodynamics of nickel-cadmium and nickel-hydrogen batteries p 2391 N94-23349
Instrument interface description for NOAA 2000 instruments with European morning spacecraft and/or NOAA-OPQ spacecraft
[NASA-TM-109406] p 2208 N94-23478
The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596
Enhanced absorption cycle computer model
[DE94-001997] p 2271 N94-23793
Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2
[NASA-CR-193893] p 2229 N94-24224
Coupled land surface/hydrologic/atmospheric models
p 2413 N94-24387
A study of element interaction in thermoacoustic engines
[AD-A273228] p 2569 N94-24777
Flow and temperature distribution in a naturally stratified thermal storage tank
[AD-A273511] p 2336 N94-24821
Thermophysical properties of simple liquid metals: A brief review of theory p 2248 N94-25130
THERMODYNAMICS
Study of improved methods for predicting chemical equilibria
[DE94-001647] p 2568 N94-22719
Computational fluid dynamic modelling of cavitation
p 2215 N94-23060
Lewis Research Center R and D Facilities
[NASA-TM-109400] p 2630 N94-23135
Alloys for hydrogen storage in nickel/hydrogen and nickel/metal hydride batteries p 2391 N94-23353
Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556
Second law analysis of a conventional steam power plant p 2322 N94-23646
Improved gas core propulsion model
[DE94-000929] p 2220 N94-24511
Integral equations for the microstructures of supercritical fluids
[DE94-002460] p 2535 N94-24569
Stable non-Gaussian diffusive profiles
[PB93-238053] p 2489 N94-24610
Thermodynamic models for bounding pressurant mass requirements of cryogenic tanks
[NASA-TM-106476] p 2346 N94-25202
Phase structure of the two-dimensional phi(4) field theory within thermo-field dynamics
[DE93-616850] p 2570 N94-25337
Hydride thermodynamic machines
[VTT-JULK-768] p 2571 N94-25416
THERMOELECTRIC GENERATORS
SP-100 heat transport technology development
[DE94-000769] p 2218 N94-23452
Development testing of the two-watt RTG heat source and Hastelloy-S/T-111 alloy compatibility studies
[DE94-002875] p 2243 N94-23784
THERMOELECTRIC MATERIALS
Large-scale production of Si(0.8)Ge(0.2) thermoelectric alloys by mechanical alloying
[DE94-000695] p 2243 N94-23753
THERMOELECTRICITY
Thermoelectric cooled, purge-and-trap device for enhancing the utility of fiber optic VOC sensors
[DE94-001772] p 2541 N94-22722
Large-scale production of Si(0.8)Ge(0.2) thermoelectric alloys by mechanical alloying
[DE94-000695] p 2243 N94-23753
THERMOGRAPHY
Fiber optic temperature sensor using a Y2O2S:Eu thermographic phosphor
[DE94-000331] p 2543 N94-23461
THERMOGRAVIMETRY
A pressurized thermogravimetric analyzer for use in studies of gas/solid systems
[DE94-001224] p 2342 N94-22989
Potent solvents for C60 and their utility for the rapid acquisition of 13CNMR data for fullerenes
[AD-A273349] p 2235 N94-24925
THERMOMECHANICAL TREATMENT
Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550
Thermomechanical processing of Ag-clad Bi2Sr2CaCu2O(x) superconductors
[DE94-002347] p 2563 N94-24624
THERMOPHYSICAL PROPERTIES
Workshop on the Thermophysical Properties of Molten Materials
[NASA-CP-10121] p 2246 N94-25120
Thermophysical property sensitivity effects in steel solidification p 2246 N94-25122
Establishment of computerized numerical databases on thermophysical and other properties of molten as well as solid materials and data evaluation and validation for generating recommended reliable reference data
p 2246 N94-25123
Dynamic measurements of thermophysical properties of metals and alloys at high temperatures by subsecond pulse heating techniques p 2247 N94-25124
An overview of the measurements of thermophysical properties and some results on molten superalloys and semiconductors p 2248 N94-25128
Thermophysical properties of simple liquid metals: A brief review of theory p 2248 N94-25130
Microwave techniques for physical property measurements p 2238 N94-25134
Electrostatic levitation technology for thermophysical properties of molten materials p 2238 N94-25135
THERMOPLASTIC RESINS
Surface and interfacial properties of polymer blends. A literature survey
[PB93-230191] p 2254 N94-23561
THERMOPLASTICITY
Full-scale fire testing of seat component materials
[AD-A273499] p 2174 N94-24941
THERMOSETTING RESINS
Metal-catalyzed alkynylation of brominated polyphenylenes: Thermoset precursors of high density monolithic glassy carbon
[AD-A273232] p 2259 N94-24789
Metal-catalyzed alkynylation of (Bromophenyl)Oligophenylenes: A rapid route to thermoset precursors of high density monolithic glass-like carbon
[AD-A273219] p 2260 N94-24863

THERMOSPHERE
Data analysis and theoretical studies of the upper mesosphere and lower thermosphere
[NASA-CR-195108] p 2402 N94-24089
Mesospheric and lower thermospheric winds, temperatures densities, and volume emission rates
[NASA-CR-195147] p 2403 N94-24486
THICK PLATES
Performance of the X-/Ka/KABLE-band dichroic plate in the DSS-13 beam waveguide antenna
p 2291 N94-23261
THICKNESS
Echocardiographic findings in trained aircrew: The effect of +Gz on cardiac structure (working group 18)
p 2424 N94-23320
Left ventricular hypertrophy and athlete's heart
p 2424 N94-23321
Examination of the physical, electrical, and microwave evolution of water into young sea ice
[AD-A273559] p 2418 N94-24918
THIN FILMS
Advanced research and technology development of MCFCs
[DE94-001918] p 2389 N94-22723
Polycrystalline thin film materials and devices
[DE93-018213] p 2389 N94-22862
Disilane LPCVD deposited silicon films: Deposition mechanisms, properties and capability of making transistors on thin films
[LAAS-93156] p 2252 N94-22910
A new automatic design method to develop multilayer thin film devices for high power laser applications
[DE93-632490] p 2347 N94-22967
Design refinement of multilayer optical thin film devices with two optimization techniques
[DE93-634228] p 2542 N94-22979
Customizable VLSI artificial neural network chips based on a novel technology
[DE94-001418] p 2307 N94-23008
A novel process monitoring and control system based on a neural manufacturing concept
[DE94-001516] p 2471 N94-23011
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200
Research on polycrystalline thin-film CuInGaSe2 solar cells
[DE94-000203] p 2560 N94-23205
Amorphous silicon PVMaT, phase 2A
[DE93-018221] p 2390 N94-23295
Novel two-stage selenization methods for fabrication of thin-film CIS cells and submodules
[DE94-000220] p 2390 N94-23296
Transparent conducting thin films for spacecraft applications
[NASA-TM-106466] p 2218 N94-23370
Infrared analysis of vapor phase deposited tricresylphosphate (TCP)
[NASA-TM-106423] p 2253 N94-23371
Selective hydrogen separation by palladium-based composite membranes
[PB93-201671] p 2254 N94-23431
Pulsed Ion Beam Surface Analysis (PIBSA) as a means of in-situ real-time analysis of thin films during growth
[DE94-001276] p 2562 N94-23805
Skin friction measurement in complex flows using thin oil film techniques
[NASA-CR-194872] p 2327 N94-24098
Ordered organic thin films self-assembled from the vapor phase p 2223 N94-24339
Low-gravity electrodeposition and growth of polymer thin films with large third-order optical nonlinearities by electrochemical processes for devices: Thiophene-based polymers p 2225 N94-24346
Polydiacetylene thin films for nonlinear optical applications p 2225 N94-24347
Nonlinear optical thin films p 2225 N94-24349
Diffusion on Cu surfaces p 2251 N94-24428
Thin film cadmium telluride photovoltaic cells
[DE94-000201] p 2395 N94-24509
Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657
Electrochemically mediated polymerization of 2-pentadecylaniline confined to a planar liquid-liquid interface
[AD-A273541] p 2259 N94-24792
Ferroelectric thin films 3
[AD-A273394] p 2565 N94-25027
The nanometer-scale mechanics of gold films
[AD-A273307] p 2565 N94-25086
The nanostructure of multilayered films: A NMR study
[ETN-94-95347] p 2262 N94-25222
Metallic multilayers: Experimental investigation of magnetic anisotropy and magnetic interlayer coupling
[ETN-94-95364] p 2250 N94-25242
Laser ablation and deposition of metals
[ETN-94-95311] p 2351 N94-25294
Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333
Template synthesis of electronically conductive polymers
[AD-A273673] p 2263 N94-25409
THIN WALLED SHELLS
Energy estimates and asymptotic analysis in the theory of shells
[PB93-225738] p 2374 N94-23113
The plastic response of a cylindrical shell subjected to an internal blast wave with a finite width shock front
p 2154 N94-24246
THIOLS
Interactions between organized, surface-confined monolayers and vapor-phase probe molecules. 7: Comparison of self-assemblying organomercaptan monolayers deposited on gold from liquid and vapor phases
[AD-A273196] p 2535 N94-24555
Synthesis and characterization of two-dimensional molecular recognition interfaces
[AD-A273177] p 2536 N94-24729
Chemically sensitive interfacial force microscopy: Contact potential measurements of self-assembling monolayer films
[AD-A273135] p 2234 N94-24772
THOMSON SCATTERING
1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192
Characterization of heat transport and radiation hydrodynamics in collisional laser plasmas using collective Thomson scattering
[DE94-001502] p 2349 N94-23209
THREE AXIS STABILIZATION
Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264
THREE DIMENSIONAL BODIES
Extracting projective information from single views of 3D point sets
[OUEL-1973/93] p 2464 N94-25471
THREE DIMENSIONAL FLOW
Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055
Development and application of new algorithms for the simulation of viscous compressible flows with moving bodies in three dimensions
[AD-A273514] p 2338 N94-25157
THREE DIMENSIONAL MODELS
Mobility analysis, simulation, and scale model testing for the design of wheeled planetary rovers
p 2370 N94-23425
A structural design methodology for large angle articulated trusses considering realistic joint modeling
p 2376 N94-23560
Unsteady three-dimensional thermal field prediction in turbine blades using nonlinear BEM
p 2325 N94-23665
Analysis of time-domain acoustic wavefields in horizontally continuously layered configurations based on the modified Cagniard method
[PB94-111044] p 2524 N94-23731
Generalized three-dimensional simulation of ferruled coupled-cavity traveling-wave-tube dispersion and impedance characteristics
[NASA-TP-3389] p 2310 N94-24056
Conceptual design of a device to measure hand swelling in a micro-gravity environment
[NASA-CR-195509] p 2437 N94-24330
Recent developments in the mathematical modelling and physical understanding of transport and dispersion in aquatic systems, with special reference to tidal waters
[PB94-111135] p 2418 N94-24600
Multiannual simulations with the Mars climate model
p 2618 N94-24881
Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap
p 2621 N94-24895
Image analysis technology applied to problems in crystallography
[AD-A273516] p 2566 N94-25288
THREE DIMENSIONAL MOTION
Quantitative assessment of human motion using video motion analysis p 2436 N94-24203
Heat transfer and flow structure in end-wall boundary layers
[AD-A273470] p 2335 N94-24689
THRESHOLD VOLTAGE
Generic microelectronic smart sensor platform for detection of toxic, hazardous, and flammable gases
[DE93-017626] p 2343 N94-23200
The role of emitter states in magnetotunneling through double-barrier resonant-tunneling diodes at high magnetic fields
[REPT-A-2658] p 2564 N94-24959
THRUST BEARINGS
Spline screw multiple rotations mechanism
[NASA-CASE-GSC-13452-1] p 2352 N94-23078
THRUST CHAMBERS
Small rocket flowfield diagnostic chambers
p 2210 N94-23030
An experimental study of characteristic combustion-driven flows for CFD validation
p 2212 N94-23040
Numerical investigation of two- and three-dimensional heat transfer in expander cycle engines
p 2213 N94-23048
Advanced materials for radiation-cooled rockets
p 2214 N94-23052
Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556
STE thrust chamber technology: Main injector technology program and nozzle Advanced Development Program (ADP)
[NASA-CR-193919] p 2221 N94-25019
THRUST VECTOR CONTROL
Thrust vectoring theory, laboratory and flight tests
p 2155 N94-24251
Development of high-angle-of-attack nose-down pitch control margin design guidelines for combat aircraft
p 2164 N94-25107
THRUSTORS
Optimization of energy transfer in microwave electrothermal thrusters p 2216 N94-23065
CFD modeling of microwave electrothermal thrusters
p 2216 N94-23066
Advanced space propulsion concepts
p 2216 N94-23067
Stationary plasma thruster plume characteristics
[NASA-CR-194454] p 2219 N94-24361
THULIUM
Investigation of the optical and laser properties of Tm and Ho in YAG anf YLF
[REPT-94-001] p 2563 N94-24404
Excited state dynamics of thulium ions in yttrium aluminum garnets
[NASA-CR-195159] p 2564 N94-25024
THUNDERSTORMS
Lightning studies using LDAR and LLP data
p 2416 N94-23238
TIDES
Dynamics of the atmosphere of Mars: Review of some outstanding problems p 2620 N94-24888
TILES
Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles
[NASA-CR-195163] p 2201 N94-24919
TILT ROTOR AIRCRAFT
Wind tunnel test of a variable-diameter tiltrotor (VDTR) model
[NASA-CR-177629] p 2181 N94-24796
Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades
[NASA-TM-108758] p 2182 N94-24953
TILTING ROTORS
Aeroelastic response and stability of tiltrotors with elastically-coupled composite rotor blades
[NASA-TM-108758] p 2182 N94-24953
TIME CONSTANT
Rime-, mixed- and glaze-ice evaluations of three scaling laws
[NASA-TM-106461] p 2173 N94-24047
TIME DEPENDENCE
Feedback linearization of parametrized nonlinear time-varying systems
[MEMO-1126] p 2470 N94-22714
The theoretical accuracy of Runge-Kutta time discretizations for the initial boundary value problem: A careful study of the boundary error
[NASA-CR-191561] p 2480 N94-23272
Time dependent behavior of a graphite/thermoplastic composite and the effects of stress and physical aging
[NASA-TM-109047] p 2228 N94-23280
Response-coefficient method for heat-conduction transients with time-dependent inputs
p 2326 N94-23671
Computation of large-scale statistics in decaying isotropic turbulence p 2332 N94-24167
A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure
[AD-A273488] p 2427 N94-24950
Preliminary results on time-varying feedback stabilization of a nonholonomic car-like mobile robot
[INRIA-RR-1512] p 2475 N94-24963

TIME DIVISION MULTIPLE ACCESS
Adaptive data rate control TDMA systems as a rain attenuation compensation technique
p 2287 N94-22821
Modulation and synchronization technique for MF-TDMA system
[NASA-CR-194448] p 2304 N94-25266
TIME DIVISION MULTIPLEXING
Improved frame synchronization schemes for INMARSAT-B/M SCPC and TDM channels
p 2285 N94-22806
TIME LAG
Measurement of multipath delay profile in land mobile satellite channels p 2283 N94-22793
Linear time algorithm to schedule trees with communication delays optimally on two machines
[PB93-237782] p 2451 N94-23441
Genericity of stabilizability for time-delay systems
[PB93-237725] p 2475 N94-24762
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194785] p 2389 N94-24856
TIME MEASUREMENT
Solid state Time Base Corrector (TBC)
[AD-D015981] p 2312 N94-25039
TIME OF FLIGHT SPECTROMETERS
Dual-purpose RTOF diffractometer facility at the ET-RR-1 reactor
[VTT-TIED-1425] p 2566 N94-25347
TIME OPTIMAL CONTROL
Throughput time control and due date reliability in tool and die shops
[ISBN-9-03-860182-4] p 2587 N94-25283
TIME SERIES ANALYSIS
A review of the Workshop on Fatigue Life Methodologies for Wind Turbines
[DE94-002039] p 2394 N94-23472
First order conditions for the maximum likelihood estimation of an exact ARMA model
[PB94-110533] p 2495 N94-23814
Dimensional analysis of acoustically propagated signals p 2528 N94-24217
TIME SIGNALS
Progress on the design of a data push architecture for an array of optimized time tagging pixels
[DE93-041011] p 2307 N94-22955
TIMING DEVICES
Modulation and synchronization technique for MF-TDMA system
[NASA-CR-194448] p 2304 N94-25266
TIMOSHENKO BEAMS
Vibrations of variable cross section Timoshenko beams p 2160 N94-24279
TIN OXIDES
Surface chemistry of liquid metals
p 2249 N94-25133
TIP SPEED
An overview of a model rotor icing test in the NASA Lewis Icing Research Tunnel
[NASA-TM-106471] p 2166 N94-23299
TIP VANES
The design of a turbine vane cooling system used in the topping cycle
[OUEL-1963/92] p 2353 N94-23164
TIROS SATELLITES
TOVS Pathfinder product validation and intercomparison p 2384 N94-23603
TISSUES (BIOLOGY)
Cellular and tissue injury during nonfreezing cold injury and frostbite
[AD-A270883] p 2423 N94-22732
TITAN
Science planning and sequencing for Cassini
p 2504 N94-23871
TITAN LAUNCH VEHICLES
Liquid rocket propulsion: Retrospective and prospects
p 2154 N94-24243
TITANATES
The elastic and electromechanical properties of BaTiO3 single crystal through the ferroelectric transition
[DE94-001437] p 2557 N94-22927
TITANIUM ALLOYS
Relationship of microstructure and mechanical properties for V-Cr-Ti alloys
[DE94-001431] p 2238 N94-22718
Evaluation of A5Si3Z(x) intermetallics for use as high temperature structural materials
[DE93-041127] p 2227 N94-22977
New extensions in the development of deformation processed metal-metal matrix composites
[DE94-000692] p 2227 N94-23004
Effect of neutron irradiation on tensile properties of V-Cr-Ti alloys
[DE94-001433] p 2240 N94-23194
Environmentally assisted cracking of high strength beta titanium alloys
[AD-A273598] p 2245 N94-24823
Matrix fatigue cracking mechanisms of alpha(2) TMC for hypersonic applications
[NASA-TM-106506] p 2230 N94-25186
TITANIUM BORIDES
Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275
TITANIUM CARBIDES
In-vacuum performance of Fomblin Z25-lubricated, 52100 steel bearings with TiC-coated balls
p 2358 N94-24011
TITANIUM COMPOUNDS
Status of the development of rechargeable lithium cells p 2392 N94-23354
TITANIUM NITRIDES
Electrochemical behavior of ion-plated TiN and Cu-Cr coatings
[AD-A273411] p 2235 N94-24784
TOBACCO
Chronic obstructive pulmonary disease
p 2425 N94-23324
TOKAMAK DEVICES
Massachusetts Institute of Technology Plasma Fusion Center 1992-1993 report to the President
[DE94-001725] p 2548 N94-22721
Active probing of plasma edge turbulence and feedback studies on the Texas Experimental Tokamak (TEXT)
[DE94-001017] p 2548 N94-22945
Superconducting magnet system for the TPX Tokamak
[DE94-001535] p 2549 N94-23013
Structural analysis of a superconducting central solenoid for the Tokamak Physics Experiment
[DE94-001536] p 2549 N94-23014
CAMAC throughput of a new RISC-based data acquisition computer at the DIII-D tokamak
[DE94-001113] p 2550 N94-23182
1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192
Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data
[DE94-001575] p 2550 N94-23211
Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435
Computational model of surface ablation from tokamak disruptions
[DE94-002204] p 2550 N94-23474
The role of the radial electric field in confinement and transport in H-mode and VH-mode discharges in the DIII-D tokamak
[DE94-002746] p 2551 N94-23782
Performance characteristics of the DIII-D advanced divertor cryopump
[DE94-002745] p 2354 N94-23797
Fusion plasma theory project summaries
[DE94-001712] p 2551 N94-23808
IPP Prague Contributions to the IAEA Technical Committee Meeting on Research Using Small Tokamaks
[IPPCZ-329] p 2551 N94-24293
Some theoretical problems of magnetic diagnostics in tokamaks and stellarators
[NIFS-262] p 2551 N94-24306
Pellet ablation in the large helical device
[NIFS-260] p 2551 N94-24358
Temporal behavior of the electron density profile during limiter biasing in the HYBTOK-2 tokamak
[NIFS-257] p 2552 N94-24456
Stabilization of the external kink and other MHD issues
[DE94-001541] p 2552 N94-24502
Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD
[DE94-001565] p 2552 N94-24504
Start-up simulations of the PULSAR pulsed tokamak reactor
[DE94-002634] p 2552 N94-24519
Tokamak Physics Experiment (TPX) cost and performance trade studies using supercode
[DE94-002720] p 2553 N94-24628
Investigation of the heat handling capabilities of DIII-D neutral beamline internal components
[DE94-001107] p 2553 N94-24756
Fluid velocity and electromagnetic forces measured by a rotating Langmuir probe in the scrape off layer of JFT-2M
[OUEL-1968/92] p 2554 N94-25327
LHCD (low hybrid current drive) experiment on the HT-6B tokamak
[DE93-613720] p 2555 N94-25331
Effect of LHCD (low hybrid current drive) on tearing mode instability
[DE93-613700] p 2555 N94-25344
TOLERANCES (MECHANICS)
Damage tolerance of pressurized graphite/epoxy tape cylinders under uniaxial and biaxial loading
[NASA-CR-195101] p 2377 N94-24587
TOLLMIEN-SCHLICHTING WAVES
Computational fluid mechanics
[NASA-CR-194765] p 2337 N94-24859
TOOLS
A system for the challenging task of collecting samples from a comet surface p 2358 N94-24007
TOPEX
TOPEX/Poseidon precision orbit determination production and expert system p 2196 N94-23920
TOPOGRAPHY
A DTM-based path planning method for planetary rovers p 2370 N94-23423
Nonlinear dynamics applied to atmospheric prediction
[AD-A273437] p 2404 N94-24674
Tools for visualizing landscape pattern for large geographic areas
[DE94-001121] p 2388 N94-24757
Seafloor characterization/Galapagos propagating rift
[AD-A273586] p 2419 N94-25165
TOPOLOGY
Supercomputer networking for space science applications
[NASA-CR-194876] p 2465 N94-23085
Structures of tetrahedrization: A mathematical and algorithmical point of view
[ETN-94-95172] p 2480 N94-23166
Lacunary series as quadratic differentials in conformal dynamics
[PB93-238061] p 2481 N94-23547
When an infinitely-renormalizable endomorphism of the interval can be smoothed
[PB93-238087] p 2481 N94-23548
Non-trivial examples of real isolated singularity at the origin
[PB94-110939] p 2487 N94-23787
Tools for visualizing landscape pattern for large geographic areas
[DE94-001121] p 2388 N94-24757
Quantum optical aspects of topological phases, such as Berry's phase
[AD-A273632] p 2570 N94-25028
Radar target discrimination systems using artificial neural network topology
[AD-D015984] p 2301 N94-25041
The fundamental group of the complement of complexified real arrangements
[DE93-616847] p 2491 N94-25214
TOPPING CYCLE ENGINES
The design of a turbine vane cooling system used in the topping cycle
[OUEL-1963/92] p 2353 N94-23164
TOROIDAL PLASMAS
Chaos in plasma simulation and experiment
[DE94-001574] p 2549 N94-22963
Plasma research in the Madison Symmetric Torus (MST)
[DE94-002318] p 2549 N94-22976
Fluctuations and confinement in ATF
[DE94-000485] p 2549 N94-22998
Superconducting magnet system for the TPX Tokamak
[DE94-001535] p 2549 N94-23013
1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192
Fusion plasma theory project summaries
[DE94-001712] p 2551 N94-23808
Pellet ablation in the large helical device
[NIFS-260] p 2551 N94-24358
Stabilization of the external kink and other MHD issues
[DE94-001541] p 2552 N94-24502
Plasma initiation in a tokamak with conducting superstructure: First results from Alcator C-MOD
[DE94-001565] p 2552 N94-24504
TORQUE
Spline screw multiple rotations mechanism
[NASA-CASE-GSC-13452-1] p 2352 N94-23078
A novel rotary actuator for spacecraft
p 2361 N94-24034
Establishing a relationship between maximum torque production of isolated joints to simulate EVA ratchet push-pull maneuver: A case study p 2437 N94-24206
The effect of high altitude pressure on the power and efficiency of an airborne two-stroke engine
p 2155 N94-24253
Torque equilibrium attitudes for the Space Station
p 2208 N94-24449

TORQUE MOTORS
Low melting temperature alloy deployment mechanism
p 2356 N94-23997
Development of a Low-Temperature Gear Motor (LOG) p 2361 N94-24032
High resolution encoder-motor used in the orbital spin scan radiometer, GOES VAS satellites
p 2209 N94-24038

TORSION
The torsion space nucleic acids molecular mechanics program DUPLEX: Surveying conformation space by potential energy minimization
[DE94-002441] p 2563 N94-24567

TORUSES
Plasma research in the Madison Symmetric Torus (MST)
[DE94-002318] p 2549 N94-22976
Number of moduli of families of curves on toric surfaces
[PB93-230381] p 2479 N94-23121

TOTAL ENERGY SYSTEMS
Diffusion on Cu surfaces p 2251 N94-24428

TOTAL OZONE MAPPING SPECTROMETER
Participation in TOMS missions
[NASA-CR-195110] p 2398 N94-24078
Nimbus-7 Total Ozone Mapping Spectrometer (TOMS) data products user's guide
[NASA-RP-1323] p 2410 N94-24355

TOTAL QUALITY MANAGEMENT
The application of total quality management principles to spacecraft mission operations p 2374 N94-23931
Mission operations and command assurance: Instilling quality into flight operations p 2374 N94-23932

TOUCH
Mechanisms of eye-hand coordination
[AD-A273687] p 2428 N94-25437

TOXICITY
Exploratory report nickel and nickel compounds
[PB93-223998] p 2242 N94-23496
Exploratory report antimony and antimony compounds
[PB93-224004] p 2397 N94-23497
In vitro system for studying metabolism of environmental chemicals in human cells
[AD-A273427] p 2421 N94-24688
A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure
[AD-A273488] p 2427 N94-24950
The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics
[AD-A273164] p 2262 N94-25136
An exploratory stochastic model for toxic effects on cells
[AD-A273438] p 2422 N94-25146

TOXINS AND ANTITOXINS
An exploratory stochastic model for toxic effects on cells
[AD-A273438] p 2422 N94-25146

TRACE CONTAMINANTS
Ethylene trace-gas techniques for high-speed flows
[NASA-TM-106491] p 2169 N94-24335

TRACE ELEMENTS
Ethylene trace-gas techniques for high-speed flows
[NASA-TM-106491] p 2169 N94-24335
A dynamic melting model for the origin of Apollo 15 olivine-normative and quartz-normative mare basalts
p 2615 N94-24371
Measurement of HO2 and other trace gases in the stratosphere using a high resolution far-infrared spectrometer
[NASA-CR-195173] p 2404 N94-24738
Rice cultivation and methane emission: Documentation of distributed geographic data sets
[NASA-TM-104595] p 2381 N94-24800
Reactive trace metals as indicators of subduction and ventilation processes in the ocean
[AD-A273585] p 2419 N94-25164

TRACKING (POSITION)
A tracking sonar sensor for vehicle guidance
[OUEL-1956/92] p 2472 N94-23179
An adaptive multigrid model for hurricane track prediction p 2416 N94-23687
A mixed map/variable structure observer for target tracking p 2157 N94-24263
Predictive head movement tracking using innovations generated by Kalman filters
[ISBN-0-315-83371-8] p 2427 N94-24467

TRACKING FILTERS
Predictive head movement tracking using innovations generated by Kalman filters
[ISBN-0-315-83371-8] p 2427 N94-24467

TRACKING NETWORKS
Resource allocation planning with international components p 2520 N94-23963
Scheduling the future NASA Space Network: Experiences with a flexible scheduling prototype
p 2520 N94-23965

TRACKING STATIONS
NASDA satellite mission operation system and operations p 2501 N94-23854
Radioastron flight operations p 2502 N94-23861

TRADEOFFS
Squaring-down and the problems of almost-zeros for continuous-time systems
[PB93-237758] p 2489 N94-24608
Tokamak Physics Experiment (TPX) cost and performance trade studies using supercode
[DE94-002720] p 2553 N94-24628

TRAFFIC
Estimation of delays and emissions at four-way junctions with different forms of regulation, principally four-way mandatory stop
[PB94-105236] p 2398 N94-23813

TRAILING EDGE FLAPS
Reduction of structural loads using maneuver load control on the Advanced Fighter Technology Integration (AFTI)/F-111 mission adaptive wing
[NASA-TM-4526] p 2168 N94-24295

TRAILING EDGES
Off-design performance of crenulated blades in a linear compressor cascade
[AD-A273744] p 2340 N94-25534

TRAINING AIRCRAFT
Aircraft wing structure detail design
[NASA-CR-195485] p 2180 N94-24498
Cockpit control system
[NASA-CR-195488] p 2190 N94-24957
Aircraft wing structural detail design (wing, aileron, flaps, and subsystems)
[NASA-CR-195487] p 2183 N94-24974
Design project: Viper
[NASA-CR-195484] p 2184 N94-25021

TRAINING DEVICES
Intelligent tutoring and aiding in satellite ground control p 2443 N94-23929
Aircraft empennage structural detail design
[NASA-CR-195496] p 2179 N94-24332
Cockpit control system conceptual design
[NASA-CR-195543] p 2190 N94-24551

TRAINING EVALUATION
KSC management training system project
p 2574 N94-23246

TRAJECTORIES
Decoupling problems around a trajectory: From linearity to nonlinearity
[MEMO-1115] p 2469 N94-22703

TRAJECTORY ANALYSIS
Path planning by querying persistent stores of trajectory segments
[NASA-CR-194789] p 2451 N94-23301
On the effect of the damping coefficients on the trajectories of symmetric and non-symmetric stores
p 2155 N94-24250
Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268
NASA/USRA advanced design program
[NASA-CR-195548] p 2180 N94-24492
NASA LaRC Workshop on Guidance, Navigation, Controls, and Dynamics for Atmospheric Flight, 1993
[NASA-CP-10127] p 2162 N94-25096

TRAJECTORY CONTROL
Marsohkod movement control p 2370 N94-23418

TRAJECTORY MEASUREMENT
Comparison of c.t.s. based prediction of store trajectory with flight test data p 2158 N94-24268

TRAJECTORY OPTIMIZATION
Perspective of creation of means for collecting information concerning transport situation
p 2370 N94-23420
A DTM-based path planning method for planetary rovers p 2370 N94-23423
Approximate optimal guidance for the advanced launch system
[NASA-CR-4568] p 2198 N94-24752
Optimal RTLS abort trajectories for an HL-20 personnel launch vehicle p 2165 N94-25114

TRAJECTORY PLANNING
Motion planning for a non-holonomic mobile in a dynamic workspace
[ETN-94-95180] p 2470 N94-22898
Path planning by querying persistent stores of trajectory segments
[NASA-CR-194789] p 2451 N94-23301
Perspective of creation of means for collecting information concerning transport situation
p 2370 N94-23420
A DTM-based path planning method for planetary rovers p 2370 N94-23423
Physical modeling and dynamic simulation of planet vehicles: Application to the motion prediction
p 2371 N94-23426
Conflict-free trajectory planning for air traffic control automation
[NASA-TM-108790] p 2174 N94-25272

TRANSDUCERS
Improved magnetostrictive transducer drive elements achieved by reduction of crystalline defects and improved crystalline orientation
[AD-A273391] p 2313 N94-25276

TRANSFER FUNCTIONS
Head related transfer function pseudo-stereophony
[NASA-CASE-ARC-11919-1-NP] p 2525 N94-23312
Squaring-down and the problems of almost-zeros for continuous-time systems
[PB93-237758] p 2489 N94-24608
Exploiting structure: Introduction and motivation
[NASA-CR-195136] p 2490 N94-24847

TRANSFER ORBITS
Theory and computation of optimal low- and medium-thrust transfers
[NASA-CR-194812] p 2217 N94-23275
Assessment of an SP-100 bi-modal propulsion and power system
[DE94-000889] p 2218 N94-23433
HISPASAT launch and early operations phases: Computation and monitoring of geostationary satellite positioning p 2514 N94-23928

TRANSFORMATIONS (MATHEMATICS)
Implementation and parallelization of fast matrix multiplication for a fast Legendre transform
[DE94-002184] p 2478 N94-22975
Integer cosine transform compression for Galileo at Jupiter: A preliminary look p 2292 N94-23266
System identification using a wavelet-based approach
[DE94-002191] p 2293 N94-23473
Relational algebra and equational proofs
[PB94-110822] p 2486 N94-23724
Exact transformation of the anisotropic Ginzburg-Landau model and its consequences
[DE94-002208] p 2562 N94-23795
Quasiconformal mappings, operators on Hilbert space, and local formulae for characteristic classes
[PB93-238079] p 2488 N94-24536
Optical wavelet transform processor
[AD-A273625] p 2546 N94-24731
Deviation equations of Synge and Schild in spaces with affine connection and metric, and equations for gravitational waves detectors
[DE93-616852] p 2571 N94-25339
DCT quantization matrices visually optimized for individual images p 2442 N94-25509

TRANSIENT HEATING
Strain gage measurement errors in the transient heating of structural components
[NASA-TM-104274] p 2376 N94-23487
Advanced X ray Astrophysics Facility-Imaging (AXAF-I) thermal analyses using Integrated Thermal Analysis System (ITAS) program p 2320 N94-23635
Response-coefficient method for heat-conduction transients with time-dependent inputs
p 2326 N94-23671

TRANSIENT RESPONSE
Transient analysis of circuits including frequency-dependent components using transgyrator and convolution
[PB93-225001] p 2308 N94-23130

TRANSISTOR AMPLIFIERS
Cryogenic, low-noise high electron mobility transistor amplifiers for the Deep Space Network
p 2291 N94-23262

TRANSISTORS
Floating well based design methodology aimed to improve latch-up immunity in a CMOS/DMOS smart power technology
[LAAS-93093] p 2556 N94-22905
Fabrication of sub-40-nm p-n junctions for 0.18 micron MOS device applications using a cluster-tool-compatible, nanosecond thermal doping technique
[DE94-001608] p 2309 N94-23520

TRANSITION FLOW
Transition to turbulence in an elliptic vortex
p 2331 N94-24161
Vortical structure in a forced plane mixing layer
p 2331 N94-24162
Sound radiation due to boundary layer transition
p 2332 N94-24163
Center for modeling of turbulence and transition: Research briefs, 1993
[NASA-TM-106383] p 2333 N94-24336
Workshop on Computational Turbulence Modeling
[NASA-CP-10130] p 2333 N94-24460
Relationship between transition and modes of instability in supersonic boundary layers
[NASA-CR-4562] p 2336 N94-24725

Computational fluid mechanics
[NASA-CR-194765] p 2337 N94-24859

TRANSITION METALS

Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics
[DE93-040094] p 2348 N94-23203

Density functional studies: First principles and semi-emperical calculations of clusters and surfaces
[DE94-002836] p 2561 N94-23214

Magnetic resonance studies of 3d transition metal impurities in compound semiconductors
[PB93-232197] p 2243 N94-23714

New methane chemistry synthesis of materials for reversible uptake and useful functionalization of methane
[PB94-112786] p 2233 N94-23801

TRANSITION POINTS

Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009

TRANSITION TEMPERATURE

Anisotropic uniaxial pressure effects in YBa2Cu3O(7-delta)
[DE94-001456] p 2557 N94-22929

Anomalous magnetoresistance behavior of superconducting Nd(2-x)Ce(x)CuO(4-y) single crystal
[DE94-000806] p 2558 N94-22941

Irradiation damage behavior of low alloy steel wrought and weld materials
[DE94-000519] p 2239 N94-22999

Effects of neutron irradiation and hydrogen on ductile-brittle transition temperatures of V-Cr-Ti alloys
[DE94-001466] p 2240 N94-23009

Development of small punch testing technique and its application to evaluation of mechanical properties degradation
[DE94-001193] p 2375 N94-23184

TRANSLATING

Projectile transverse motion and stability in electromagnetic induction launchers
[DE94-001557] p 2198 N94-23210

An automated tool to facilitate code translation for software fault tree analysis
[AD-A273205] p 2457 N94-24556

TRANSMISSION ELECTRON MICROSCOPY

Magnetic properties and transmission electron microscopy investigations of Nd-Fe-B-Co-Al melt spun ribbons
[PB93-201531] p 2561 N94-23428

Ge-Au eutectic bonding of Ge (100) single crystals
[DE94-002281] p 2564 N94-24657

TRANSMISSION LINES

Layered parallel interface for an active antenna array
[AD-D016002] p 2301 N94-25045

Temperature dependent performance of Coplanar Waveguide (CPW) on substrates of various materials
[NASA-TM-106505] p 2313 N94-25170

TRANSMISSION LOSS

Comparison of HF groundwave propagation models
[AD-A273146] p 2299 N94-24668

Design and testing of ubitron amplifier tubes
[AD-A273297] p 2311 N94-24818

TRANSMISSION RATE (COMMUNICATIONS)

Adaptive data rate control TDMA systems as a rain attenuation compensation technique
p 2287 N94-22821

Compression for an effective management of telemetry data p 2518 N94-23956

Reducing video frame rate increases remote optimal focus time
[NASA-TM-104018] p 2431 N94-23970

A small satellite design for deep space network testing and training
[NASA-CR-195526] p 2205 N94-24702

Delay-insensitive communication
[ETN-94-95315] p 2304 N94-25303

TRANSMISSIONS (MACHINE ELEMENTS)

Metal band drives in spacecraft mechanisms
p 2355 N94-23987

NASA/Army rotorcraft transmission research, a review of recent significant accomplishments
[NASA-TM-106508] p 2367 N94-25161

TRANSMITTER RECEIVERS

The Globalstar mobile satellite system for worldwide personal communications p 2282 N94-22786

Integration and test of high-speed transmitter electronics for free-space laser communications
[NASA-TM-106295] p 2295 N94-24101

Analog communication transmitter and receiver test procedures
[AD-A273423] p 2300 N94-24687

Layered parallel interface for an active antenna array
[AD-D016002] p 2301 N94-25045

Method and apparatus of generating sum or difference signals corresponding to an apparent beam in a monopulse radar system
[AD-D015998] p 2302 N94-25056

TRANSMITTERS

Systems implications of L-band fade data statistics for LEO mobile systems p 2284 N94-22799

Performance of the unique-word-reverse-modulation type demodulator for mobile satellite communications
p 2286 N94-22813

TRANSONIC COMPRESSORS

Analysis and characteristics of compressor stall precursor signals in forward and AFT swept high speed compressor
[AD-A273820] p 2171 N94-25517

TRANSONIC FLOW

Issac, Jason Cherian ses in transonic flow
[NASA-CR-194837] p 2167 N94-24052

Evaluation of turbulence models in the PARC code for transonic diffuser flows
[NASA-TM-106391] p 2168 N94-24084

Experimental study of a turbulent boundary layer in presence of external manipulators of NACA 0009 profile in the transonic regime
[ISBN-0-315-57633-2] p 2333 N94-24177

TRANSONIC NOZZLES

Development of a code for wall contour design in the transonic region of axisymmetric and square nozzles
[NASA-CR-194857] p 2167 N94-23625

TRANSONIC SPEED

Experimental cavity pressure measurements at subsonic and transonic speeds. Static-pressure results
[NASA-TP-3358] p 2169 N94-24464

TRANSPARENCE

Transparent conducting thin films for spacecraft applications
[NASA-TM-106466] p 2218 N94-23370

TRANSPIRATION

Integrated use of hydrological modelling and remote sensing in the province of Drenthe (The Netherlands): Possibilities and restrictions
[REPT-61] p 2382 N94-23148

TRANSPONDERS

ROCSAT-1 telecommunication experiments
p 2279 N94-22770

Odyssey personal communications satellite system
p 2282 N94-22787

TRANSPORT AIRCRAFT

Pilot-vehicle interface
[DOT/FAA/CT-92/21] p 2430 N94-23083

Influence of active controls on the design process of a large transport aircraft p 2178 N94-24323

Current and future design methods for large transport aircraft p 2179 N94-24324

JB-300: An advanced medium size transport for 2005
[NASA-CR-195499] p 2179 N94-24401

NASA/USRA University Advanced Design Program, 1992-1993. The Diamondback: A simulated commercial air transportation study
[NASA-CR-195523] p 2180 N94-24462

The cetaceopteryx: A global range military transport aircraft
[NASA-CR-195519] p 2181 N94-24711

Conceptual design proposal: HUGO global range/mobility transport aircraft
[NASA-CR-195501] p 2181 N94-24787

Pilot-vehicle interface handbook, chapter 19. Volume 2: Digital systems validation
[DOT/FAA/CT-88/10-VOL-2] p 2438 N94-24830

Dumbo heavy lifter aircraft
[NASA-CR-195500] p 2182 N94-24915

The AC-120: The advanced commercial transport
[NASA-CR-195491] p 2182 N94-24966

A global range military transport: The ostrich
[NASA-CR-195494] p 2183 N94-24972

Weasel works SA-150: Design study of a 100 to 150 passenger transport aircraft
[NASA-CR-195489] p 2183 N94-24975

The RTL-46: A simulated commercial air transportation study
[NASA-CR-195524] p 2184 N94-25017

C-17 lot 3 production contract
[AD-A273180] p 2174 N94-25153

TRANSPORT PROPERTIES

Atomic-scale structure of grain boundaries: Correlations to grain boundary properties
[DE94-001289] p 2558 N94-22990

Modelling of solid polymer and direct methanol fuel cells: Phenomenological equations and analytical solutions
[PB93-224897] p 2390 N94-23102

Investigation of evolution-related aspects of bacterial rhodopsins
[NASA-CR-194826] p 2420 N94-23501

Comparison of numerical simulation and experimental data for steam-in-place sterilization
p 2326 N94-23669

Two-point PADE approximants for Stieltjes series
p 2490 N94-24768

Evidence for dust transport in Viking IR thermal mapper opacity data p 2620 N94-24892

Dust transport in the Martian atmosphere
p 2621 N94-24894

Modelling of thermal argon plasmas
[ETN-94-95363] p 2554 N94-25300

Effect of high frequency field on the transport properties of superlattice
[DE93-617047] p 2568 N94-25447

TRANSPORT THEORY

Numerical modeling of physical vapor transport under microgravity conditions: Effect of thermal creep and stress p 2223 N94-24340

Conservation equations for reacting gas flow
[PB94-111168] p 2334 N94-24574

The transition from diapirism to dike intrusion: Implications for planetary volcanism
[NASA-CR-195133] p 2403 N94-24580

The anomalous transport caused by particles transverse drift
[DE93-613685] p 2554 N94-25329

Collection and evaluation of numerical models with the aim to investigate the impact of aircraft emissions
[DLR-MITT-93-06] p 2400 N94-25414

Applications of the homogenization method to flow and transport in porous media
[BER-9110] p 2340 N94-25467

TRANSPORTATION

A multilevel cost-space approach to solving the balanced long transportation problem p 2483 N94-23678

TRANSPUTERS

A parallel PROLOG system for distributed memory multiprocessor
[ETN-94-95173] p 2465 N94-23167

High performance, low cost, self-contained, multipurpose PC based ground systems
p 2516 N94-23943

Transputer benchmarks and performance comparisons with other computing machines
[RR-467] p 2446 N94-25312

Advanced control structures: A transputer-based multi-robot system
[RR-468] p 2446 N94-25313

Horatio: Libraries for vision applications, release 2.0
[OUEL-1967/92] p 2593 N94-25326

Parallel processing methods for space based power systems p 2222 N94-25352

The transputer
[AD-A273688] p 2446 N94-25438

TRANSVERSE ACCELERATION

A comparison of in-bore projectile motion from an electromagnetic railgun versus that of a conventional cannon barrel
[AD-A273473] p 2198 N94-24690

TRAPPED PARTICLES

Fluctuations and confinement in ATF
[DE94-000485] p 2549 N94-22998

TRAVELING SALESMAN PROBLEM

On some approximately balanced combinatorial cooperative games
[MEMO-1113] p 2493 N94-22702

TRAVELING WAVE AMPLIFIERS

Inverse free electron laser beat-wave accelerator research
[DE94-002597] p 2349 N94-23702

TRAVELING WAVE TUBES

Phase linearity of the 914H coupled-cavity traveling wave tube
[NASA-CR-191056] p 2290 N94-23087

Generalized three-dimensional simulation of ferruled coupled-cavity traveling-wave-tube dispersion and impedance characteristics
[NASA-TP-3389] p 2310 N94-24056

TRAVELING WAVES

The characterization of reaction-convection-diffusion processes by travelling waves
[MEMO-1111] p 2273 N94-22729

Inverse free electron laser beat-wave accelerator research
[DE94-002597] p 2349 N94-23702

TREADS

Rail Corrugations
[ILR-BER-59] p 2269 N94-23581

Surface analysis of corrugated rail treads
p 2270 N94-23587

TREES (MATHEMATICS)

Causal labeled transition systems: A new approach for describing the behavior of concurrent systems
[LAAS-93179] p 2447 N94-22911

The explicit computation of integration algorithms and first integrals for ordinary differential equations with polynomials coefficients using trees
[NASA-CR-194787] p 2448 N94-23074

Medians and steiner trees
[PB94-110616] p 2486 N94-23708
The Third Twente Workshop on Graphs and Combinatorial Optimization
[PB94-110947] p 2486 N94-23722
Irreducible core of a minimum cost spanning tree game
[PB94-110962] p 2489 N94-24653
Data structures and amortized complexity in a functional setting
[ETN-94-95307] p 2476 N94-25290

TREND ANALYSIS
Long term trending of engineering data for the Hubble Space Telescope p 2516 N94-23942

TRIANGLES
Toughness and triangle-free graphs
[MEMO-1127] p 2478 N94-22715

TRIANGULATION
Structures of tetrahedrization: A mathematical and algorithmical point of view
[ETN-94-95172] p 2480 N94-23166
Dynamic ray tracing and its application in triangulated media
[DE94-000875] p 2402 N94-23516
An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554
Expansion-based passive ranging
p 2176 N94-25504

TRIATOMIC MOLECULES
Energy transfer in solid explosives
[DE94-001523] p 2265 N94-23778

TRIBOLOGY
A rail corrugation theory which allows for contact patch size p 2269 N94-23582
A linear model for corrugation and its limit of validity
p 2269 N94-23584
Lateral high frequency oscillations and stability of a wheel rolling on a flexible track p 2269 N94-23585
Surface analysis of corrugated rail treads
p 2270 N94-23587
Surface observations of stick-slip oscillations in tightly conformal wheel/rail contacts p 2270 N94-23588
Contact analysis of rough rail surfaces
p 2270 N94-23589
An application of small-gap equations in sealing devices p 2325 N94-23668
The Fifth European Space Mechanisms and Tribology Symposium
[ESA-SP-334] p 2355 N94-23985
New tribocoating combination for vacuum operation
p 2355 N94-23990
Tribological behaviour of fluorinated resins and polyimide resins sliding over a metallic surface in liquid nitrogen
p 2355 N94-23991
Tribological characteristics of ball bearings lubricated with a sputtered molybdenum disulphide film in a vacuum under a high thrust load p 2355 N94-23992
The tribology of some MoS2-lubricated engineering ceramics p 2356 N94-23993
HERA (Hermes robot arm) overview
p 2357 N94-24005
Thermal vacuum performance of cycloid and harmonic gearboxes with solid (MoS2) and liquid (Braycote 601) lubrication p 2358 N94-24009
Tribological characterization of spatial wet lubricants under vacuum p 2264 N94-24010
In-vacuum performance of Fomblin Z25-lubricated, 52100 steel bearings with TiC-coated balls
p 2358 N94-24011
Development of gears for space use
p 2360 N94-24021
New pin-on-disk equipment for vacuum tribometry
p 2360 N94-24023
An analytical ultra-high vacuum tribometer for solid lubricant studies p 2361 N94-24033
An assessment of solid lubricant films for use in high temperature space applications p 2363 N94-24044
The development of dry-lubricated ceramic cages
p 2363 N94-24045
Investigation of the ultrafiltration technique using military greases
[AD-A273633] p 2261 N94-25029
Lubrication in cold rolling: Numerical simulation using multigrid techniques
[ISBN-9-09-005313-1] p 2262 N94-25230

TRIGGER CIRCUITS
VLSI-based video event triggering for image data compression
[NASA-TM-106500] p 2345 N94-25116
The data-acquisition and second level trigger system for ZEUS calorimeter
[ETN-94-95384] p 2541 N94-25256

TRIGONOMETRIC FUNCTIONS
Systematic construction of trigonometric neural networks
[PB93-200228] p 2474 N94-24544

TRIMERS
Electrochemical and electronic properties of neural and oxidized soluble orthogonally-fused thiophene oligomers
[AD-A273283] p 2260 N94-24815

TRIVALENT IONS
Excited state dynamics of thulium ions in yttrium aluminum garnets
[NASA-CR-195159] p 2564 N94-25024

TROPICAL METEOROLOGY
Diagnostic budgets of analyzed and modelled tropical plumes
[NASA-CR-194853] p 2409 N94-23621
Observational and modeling studies of heat, moisture, precipitation and global-scale circulation patterns
[NASA-CR-195148] p 2415 N94-24485
Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992
[AD-A273400] p 2416 N94-25071

TROPICAL REGIONS
Modal structure of variations in the tropical climate system. Part 2: Origins of the low-frequency mode
[MPIM-96] p 2407 N94-23199
Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean
[NASA-CR-194852] p 2408 N94-23542
Convective organization in the Pacific ITCZ: Merging OLR, TOVS, and SSM/I information
[NASA-CR-194850] p 2408 N94-23619
A regional analysis of cloudy mean spherical albedo over the marine stratocumulus region and the tropical Atlantic Ocean
[NASA-CR-194771] p 2409 N94-24049
Worst case analysis: Earth sensor assembly for the tropical rainfall measuring mission observatory
[NASA-CR-189320] p 2311 N94-24754
Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861

TROPOSPHERE
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-194810] p 2397 N94-23277
Tropospheric Ozone Lidar Intercomparison Experiment, TROLIX 1991
[MPIM-102] p 2402 N94-24108
Implementation of a state of the art automated system for the production of cloud/water vapor motion winds from geostationary satellites
[NASA-CR-195087] p 2410 N94-24125
Northern hemisphere tropospheric mid-latitude circulation after violent volcanic eruptions
[MPIM-107] p 2403 N94-24491
The influence of orography on the transport of atmospheric constituents p 2619 N94-24886

TRUSSES
A structural design methodology for large angle articulated trusses considering realistic joint modeling
p 2376 N94-23560

TUMORS
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-195102] p 2420 N94-23633
Annual research progress report, fiscal year 1992. Volume 2: Department of Clinical Investigation
[AD-A273584] p 2427 N94-24945

TUNABLE LASERS
Compact free electron lasers for medical applications
[AD-A273609] p 2350 N94-24934
Tunable lasers pumped by visible laser diodes
[AD-D016000] p 2350 N94-25044

TUNGSTEN
High energy collimating fine grids for HESP program
[NASA-CR-189317] p 2209 N94-24767

TUNGSTEN FLUORIDES
The reaction mechanism of W-CVD in Si
[ETN-94-95329] p 2261 N94-25084

TUNING
Compact free electron lasers for medical applications
[AD-A273609] p 2350 N94-24934
A theoretical investigation of electrically tunable birefringent optical filters as the special discriminator in hyperspectral imaging systems
[AD-A273743] p 2547 N94-25533

TUNNEL DIODES
The role of emitter states in magnetotunneling through double-barrier resonant-tunneling diodes at high magnetic fields
[REPT-A-2658] p 2564 N94-24959

TURBINE BLADES
Two stage turbine for rockets p 2215 N94-23059
The use of transition region characteristics to improve the numerical simulation of heat transfer in bypass transitional flows
[NASA-TM-106445] p 2320 N94-23525
Unsteady three-dimensional thermal field prediction in turbine blades using nonlinear BEM
p 2325 N94-23665
Nondestructive evaluations
[DE94-003020] p 2373 N94-24613

TURBINE PUMPS
SSME fuel preburner injector characterization
p 2211 N94-23037
Computational Fluid Dynamics (CFD) applications in rocket propulsion analysis and design
p 2214 N94-23054
Two stage turbine for rockets p 2215 N94-23059
Brush seals for cryogenic applications
p 2216 N94-23063
Foil bearings p 2371 N94-24415
Simulation of cryogenic turbopump annular seals
p 2371 N94-24440
Advanced launch system. Advanced development oxidizer turbopump program
[NASA-CR-193920] p 2367 N94-25174

TURBINES
Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models
p 2216 N94-23062

TURBOCOMPRESSORS
Turbine engine with induced pre-swirl at the compressor inlet
[CA-PATENT-1-317-467] p 2186 N94-23253
The 3-D numerical study of airflow in the compressor/combustor prediffuser and dump diffuser of an industrial gas turbine p 2324 N94-23660
Analysis and characteristics of compressor stall precursor signals in forward and AFT swept high speed compressor
[AD-A273820] p 2171 N94-25517
Off-design performance of crenulated blades in a linear compressor cascade
[AD-A273744] p 2340 N94-25534

TURBOFAN AIRCRAFT
Conceptual design proposal: HUGO global range/mobility transport aircraft
[NASA-CR-195501] p 2181 N94-24787

TURBOFAN ENGINES
Rolls-Royce in perspective: Past, present and future
[PNR-90882] p 2187 N94-23519
The RB211: The first 25 years
[PNR-90977] p 2187 N94-23570
A comparison of two multi-variable integrator windup protection schemes
[NASA-CR-194436] p 2190 N94-23590
JB-300: An advanced medium size transport for 2005
[NASA-CR-195499] p 2179 N94-24401
Fan noise research at NASA
[NASA-TM-106512] p 2530 N94-25172

TURBOFANS
Fan noise research at NASA
[NASA-TM-106512] p 2530 N94-25172

TURBOMACHINERY
Foil bearing research at Penn State
p 2215 N94-23058
An analysis for high Reynolds number inviscid/viscid interactions in cascades
[NASA-CR-4519] p 2169 N94-24606

TURBOPROP ENGINES
Wing mounted unducted fan engine
[CA-PATENT-1323353] p 2188 N94-24180
S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270
The AC-120: The advanced commercial transport
[NASA-CR-195491] p 2182 N94-24966

TURBULENCE
Droplet turbulence interactions under subcritical and supercritical conditions p 2211 N94-23036
Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models
p 2216 N94-23062
Probe shapes that measure time-averaged streamwise momentum and cross-stream turbulence intensity
[NASA-CASE-ARC-11934-1] p 2317 N94-23077
Computational study of GA(W)-1: Airfoil near stall
[PB93-226249] p 2165 N94-23116
Probe systems for measuring static pressure and turbulence intensity in fluid streams
[NASA-CASE-ARC-11935-1] p 2319 N94-23306
The use of transition region characteristics to improve the numerical simulation of heat transfer in bypass transitional flows
[NASA-TM-106445] p 2320 N94-23525
Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993
[PB93-410407] p 2173 N94-24062

Annual research briefs, 1993 — Center for Turbulence Research
[NASA-CR-194755] p 2327 N94-24138
Stretch-induced quenching in flame-vortex interactions p 2237 N94-24156
On streak spacing in wall-bounded turbulent flows p 2331 N94-24159
Transition to turbulence in an elliptic vortex p 2331 N94-24161
Vortical structure in a forced plane mixing layer p 2331 N94-24162
Sound radiation due to boundary layer transition p 2332 N94-24163
Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164
Tensoral for post-processing users and simulation authors p 2333 N94-24169
Center for modeling of turbulence and transition: Research briefs, 1993
[NASA-TM-106383] p 2333 N94-24336
Workshop on Computational Turbulence Modeling
[NASA-CP-10130] p 2333 N94-24460
Development and validation of RNG methodology for compressible turbulence
[AD-A273469] p 2337 N94-24929
High lift aerodynamics
[NASA-CR-195183] p 2184 N94-25268

TURBULENCE EFFECTS
Evaluation of turbulence models in the PARC code for transonic diffuser flows
[NASA-TM-106391] p 2168 N94-24084
Variability of measured sonic boom signatures. Volume 1: Technical report
[NASA-CR-191483-VOL-1] p 2526 N94-24172
Variability of measured sonic boom signatures. Volume 2: Data report
[NASA-CR-191483-VOL-2] p 2526 N94-24173
Effects of atmospheric variations on acoustic system performance p 2527 N94-24211
Stagnation region heat transfer: The influence of turbulence parameters, Reynolds number and body shape
[NASA-TM-106504] p 2334 N94-24481

TURBULENCE METERS
Experimental Methods in Separated Flows
[ILR-MITT-260(1991)] p 2315 N94-22852
Turbulence sensors for separated flows: Current capabilities, future requirements p 2315 N94-22853

TURBULENCE MODELS
Reliability in second moment turbulence closures revisited
[NASA-TM-106469] p 2326 N94-24063
Evaluation of turbulence models in the PARC code for transonic diffuser flows
[NASA-TM-106391] p 2168 N94-24084
Annual research briefs, 1993 — Center for Turbulence Research
[NASA-CR-194755] p 2327 N94-24138
Toward modeling wingtip vortices p 2171 N94-24142
New concepts for Reynolds stress transport equation modeling of inhomogeneous flows p 2171 N94-24143
Turbulence modeling for non-equilibrium flows p 2328 N94-24144
Computation of turbulent flows over backward and forward-facing steps using a near-wall Reynolds stress model p 2172 N94-24145
Large eddy simulation of a boundary layer with concave streamwise curvature p 2328 N94-24146
Large-eddy simulation of flow in a plane, asymmetric diffuser p 2328 N94-24147
The combustion program at CTR p 2237 N94-24155
Computation of large-scale statistics in decaying isotropic turbulence p 2332 N94-24167
Center for modeling of turbulence and transition: Research briefs, 1993
[NASA-TM-106383] p 2333 N94-24336
Workshop on Computational Turbulence Modeling
[NASA-CP-10130] p 2333 N94-24460
Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis
[NASA-CR-194795] p 2335 N94-24640
A vorticity dynamics based model for the turbulent dissipation: Model development and validation
[NASA-TM-106177] p 2336 N94-24713
Computational fluid mechanics
[NASA-CR-194765] p 2337 N94-24859
LES, DNS and RANS for the analysis of high-speed turbulent reacting flows
[NASA-CR-195196] p 2337 N94-25094
Development and application of new algorithms for the simulation of viscous compressible flows with moving bodies in three dimensions
[AD-A273514] p 2338 N94-25157
Decay of swirl in turbulent pipe flows
[ETN-94-95353] p 2339 N94-25248

TURBULENT BOUNDARY LAYER
Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator
[NASA-TM-106468] p 2166 N94-23485
An analytic study of a two-phase laminar airfoil in simulated heavy rain p 2171 N94-23661
Adaptive nonlinear polynomial neural networks for control of boundary layer/structural interaction
[NASA-CR-189645] p 2525 N94-23698
Optimal feedback control of turbulent channel flow p 2327 N94-24139
Boundary layer receptivity and control p 2327 N94-24141
New concepts for Reynolds stress transport equation modeling of inhomogeneous flows p 2171 N94-24143
Local isotropy in distorted turbulent boundary layers at high Reynolds number p 2332 N94-24166
Experimental study of a turbulent boundary layer in presence of external manipulators of NACA 0009 profile in the transonic regime
[ISBN-0-315-57633-2] p 2333 N94-24177
Experimental cavity pressure measurements at subsonic and transonic speeds. Static-pressure results
[NASA-TP-3358] p 2169 N94-24464
Heat transfer and flow structure in end-wall boundary layers
[AD-A273470] p 2335 N94-24689
Interactive control in turbulent shear layers
[AD-A273544] p 2336 N94-24793
Coherent structures over grooved surfaces
[ETN-94-95308] p 2339 N94-25291

TURBULENT COMBUSTION
A random distribution reacting mixing layer model
[NASA-CR-194445] p 2187 N94-23552
The combustion program at CTR p 2237 N94-24155
Stretch-induced quenching in flame-vortex interactions p 2237 N94-24156
A transport equation for the scalar dissipation in reacting flows with variable density: First results p 2331 N94-24157
Study of streamwise vorticity-stirred combustion
[NASA-CR-194450] p 2234 N94-24565
Numerical solutions of the complete Navier-Stokes equations
[NASA-CR-194780] p 2337 N94-24858

TURBULENT DIFFUSION
Eddy mixing coefficient values derived from simulations with the NASA Ames Mars GCM p 2617 N94-24875
Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897

TURBULENT FLOW
A multigrid multiblock solver for compressible turbulent flow
[MEMO-1125] p 2315 N94-22713
Experimental Methods in Separated Flows
[ILR-MITT-260(1991)] p 2315 N94-22852
Turbulence sensors for separated flows: Current capabilities, future requirements p 2315 N94-22853
Measurement of kinematically unstationary separated flows p 2315 N94-22854
Pressure oscillation measurements in turbulent flows p 2316 N94-22855
SFOLDA: A semiconductor LDA for measurements in complex flows p 2316 N94-22856
The use of near-wall hot-wire probes for time-resolved skin-friction measurements p 2316 N94-22857
Turbulent separated flows above an obstacle in an open channel p 2316 N94-22859
A photogrammetric solution to a particular problem
[NASA-TP-3415] p 2381 N94-22961
Efficiency and reliability enhancements in propulsion flowfield modeling p 2215 N94-23055
Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models p 2216 N94-23062
Shock-induced turbulent flow in baffle systems
[DE94-001532] p 2319 N94-23470
The use of transition region characteristics to improve the numerical simulation of heat transfer in bypass transitional flows
[NASA-TM-106445] p 2320 N94-23525
The 3-D CFD modeling of gas turbine combustor-integral bleed flow interaction p 2189 N94-23658
A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670
Compressible turbulent flow simulation with a multigrid multiblock method p 2342 N94-23694
Reliability in second moment turbulence closures revisited
[NASA-TM-106469] p 2326 N94-24063
Thermohydrodynamic analysis of cryogenic liquid turbulent flow fluid film bearings
[NASA-CR-194869] p 2363 N94-24081
Annual research briefs, 1993 — Center for Turbulence Research
[NASA-CR-194755] p 2327 N94-24138
Optimal feedback control of turbulent channel flow p 2327 N94-24139
Drag reduction at a plane wall p 2327 N94-24140
Toward modeling wingtip vortices p 2171 N94-24142
Computation of turbulent flows over backward and forward-facing steps using a near-wall Reynolds stress model p 2172 N94-24145
On the large eddy simulation of turbulent flows in complex geometry p 2329 N94-24148
Toward large eddy simulation of turbulent flow over an airfoil p 2172 N94-24150
Unstructured grid large eddy simulation of wall bounded turbulent flows p 2329 N94-24151
Investigation of the asymptotic state of rotating turbulence using large-eddy simulation p 2330 N94-24152
Energy transfer and constrained simulations in isotropic turbulence p 2330 N94-24153
A large eddy simulation scheme for turbulent reacting flows p 2330 N94-24154
The combustion program at CTR p 2237 N94-24155
Stretch-induced quenching in flame-vortex interactions p 2237 N94-24156
A transport equation for the scalar dissipation in reacting flows with variable density: First results p 2331 N94-24157
The production of premixed flame surface area in turbulent shear flow p 2237 N94-24158
On streak spacing in wall-bounded turbulent flows p 2331 N94-24159
Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164
Effects of shock strength on shock turbulence interaction p 2332 N94-24165
Local isotropy in distorted turbulent boundary layers at high Reynolds number p 2332 N94-24166
Computation of large-scale statistics in decaying isotropic turbulence p 2332 N94-24167
Joint Acoustic Propagation Experiment (JAPE-91) Workshop
[NASA-CP-3231] p 2526 N94-24207
Center for modeling of turbulence and transition: Research briefs, 1993
[NASA-TM-106383] p 2333 N94-24336
Workshop on Computational Turbulence Modeling
[NASA-CP-10130] p 2333 N94-24460
Responses of a finite baffled plate subject to turbulent and mean flow excitations
[NASA-CR-191570] p 2334 N94-24605
Implementation of the Baldwin-Barth turbulence model into the ZETA code and its diagnosis
[NASA-CR-194795] p 2335 N94-24640
Carrying the mass flux terms exactly in the first and second moment equations of compressible turbulence
[NASA-CR-191568] p 2335 N94-24712
Interactive control in turbulent shear layers
[AD-A273544] p 2336 N94-24793
Numerical solutions of the complete Navier-Stokes equations
[NASA-CR-194780] p 2337 N94-24858
Development and validation of RNG methodology for compressible turbulence
[AD-A273469] p 2337 N94-24929
The influence of flow type, particle type and gravity on orthokinetic coagulation
[ETN-94-95333] p 2267 N94-25060
LES, DNS and RANS for the analysis of high-speed turbulent reacting flows
[NASA-CR-195196] p 2337 N94-25094
The effects of profiles on supersonic jet noise
[NASA-CR-195184] p 2530 N94-25177
Measurements of the influence of integral length scale on stagnation region heat transfer
[NASA-TM-106503] p 2338 N94-25183
Measurement of the volume mass by spontaneous Raman scattering. Study of turbulent fluctuations of mixing in a subsonic free jet. Measurements in supersonic wind tunnels
[ISL-R-102/92] p 2339 N94-25462
Direct measurement of turbulent dissipation rate using dual laser doppler velocimeters
[AD-A273740] p 2340 N94-25530

TURBULENT HEAT TRANSFER
Turbulence models and Reynolds analogy for two-dimensional supersonic compression ramp flow
[NASA-TM-106474] p 2337 N94-25119

TURBULENT JETS
Spray formation processes of impinging jet injectors p 2212 N94-23042
Transient Ejector Analysis (TEA) code user's guide
[NASA-TM-106310] p 2186 N94-23466

TURBULENT MIXING
Shock-induced turbulent flow in baffle systems
[DE94-001532] p 2319 N94-23470
A random distribution reacting mixing layer model
[NASA-CR-194445] p 2187 N94-23552
Eddy mixing coefficient values derived from simulations with the NASA Ames Mars GCM p 2617 N94-24875

TURBULENT WAKES
LDA measurements of the unsteady near wake behind an airfoil undergoing transient and periodic pitching motions
[ISL-CO-215/92] p 2165 N94-23161
Decay of swirl in turbulent pipe flows
[ETN-94-95353] p 2339 N94-25248
High lift aerodynamics
[NASA-CR-195183] p 2184 N94-25268

TURING MACHINES
Verification of synchronous sequential numerical material systems: Application of the LUSTRE language and of the LESAR verification tool
[ETN-94-95181] p 2447 N94-22899

TVD SCHEMES
Unified approach for incompressible flows
p 2342 N94-25356

TWO DIMENSIONAL FLOW
A theoretical evaluation of aluminum gel propellant two-phase flow losses on vehicle performance
p 2210 N94-23031
Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades
[PB93-226223] p 2317 N94-23114
Upwind MacCormack Euler solver with non-equilibrium chemistry p 2326 N94-23672
Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160
Transition to turbulence in an elliptic vortex
p 2331 N94-24161
Turbulence models and Reynolds analogy for two-dimensional supersonic compression ramp flow
[NASA-TM-106474] p 2337 N94-25119
Two-dimensional CFD modeling of wave rotor flow dynamics
[NASA-TM-106261] p 2189 N94-25185

TWO DIMENSIONAL MODELS
An F2D analysis of the Flow Instability Test (FIT) experiment
[DE94-001420] p 2217 N94-23193
X ray simulator theory support
[AD-A273613] p 2553 N94-24949
Modelling of premixed laminar flames
[ETN-94-95317] p 2236 N94-25284
Modelling of thermal argon plasmas
[ETN-94-95363] p 2554 N94-25300
Two-dimensional pattern analysis and classification using a complex orthogonal estimation algorithm
[RR-475] p 2463 N94-25321

TWO FLUID MODELS
Mixing and unmixedness in plasma jets 1: Near-field analysis p 2323 N94-23655
Three-dimensional solidification and melting using magnetic field control p 2325 N94-23664

TWO PHASE FLOW
A theoretical evaluation of aluminum gel propellant two-phase flow losses on vehicle performance
p 2210 N94-23031
Numerical parametric studies of spray combustion instability p 2212 N94-23041
Performance assessment of low pressure nuclear thermal propulsion p 2217 N94-23070
Studies of two phase flow
[NASA-CR-195099] p 2267 N94-23594
An analytic study of a two-phase laminar airfoil in simulated heavy rain p 2171 N94-23661
Three-dimensional solidification and melting using magnetic field control p 2325 N94-23664
Dispersion of fire suppression agents discharged from high pressure vessels: Establishing initial/boundary conditions for the flow outside the vessel
[PB94-103660] p 2172 N94-23810
Validation of a nonintrusive optical technique for the measurement of liquid mass distribution in a two-phase spray p 2548 N94-24420
Ignition and combustion characteristics of metallized propellants, phase 2
[NASA-CR-195107] p 2266 N94-24700

TWO STAGE TURBINES
Two stage turbine for rockets p 2215 N94-23059

U

U BENDS
Analysis of Alloy 600 and X-750 stress corrosion cracks
[DE94-001578] p 2238 N94-22936

U.S.S.R. SPACE PROGRAM
Soviet developments of planet rovers in period of 1964 - 1990 p 2369 N94-23374
Mars 96 small rover: Mission strategy
p 2606 N94-23381
Radioastron flight operations p 2502 N94-23861

UH-1 HELICOPTER
Aviation system safety risk management tool analysis. Volume 2: Appendices
[AD-A273502] p 2173 N94-24864

UH-60A HELICOPTER
Aviation system safety risk management tool analysis. Volume 2: Appendices
[AD-A273502] p 2173 N94-24864

ULTRAHIGH FREQUENCIES
The European Mobile System (EMS)
p 2282 N94-22789
Measurements on the satellite-mobile channel at L and S bands p 2282 N94-22791
K-band mobile propagation measurements using ACTS p 2283 N94-22792
Systems implications of L-band fade data statistics for LEO mobile systems p 2284 N94-22799
Microstrip monopulse antenna for land mobile communications p 2289 N94-22833
L-band mobile terminal antennas for helicopters
p 2289 N94-22835
Radar signature related radome techniques for flush-mounted HF-, VHF- and, UHF communication antennas
[PB93-204618] p 2294 N94-23742
Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669
Electromagnetic interference impact of the proposed emitters for the High Frequency Active Auroral Research Program (HAARP)
[AD-A273401] p 2301 N94-24926

ULTRAHIGH VACUUM
An analytical ultra-high vacuum tribometer for solid lubricant studies p 2361 N94-24033
Surface chemistry of liquid metals
p 2249 N94-25133

ULTRASONIC FLAW DETECTION
Nondestructive evaluations
[DE94-003020] p 2373 N94-24613
Demonstration of polyscann ultrasonic butt-fusion inspection system for polyethylene pipes
[AD-A273279] p 2373 N94-24814

ULTRASONIC SCANNERS
Conceptual design of a device to measure hand swelling in a micro-gravity environment
[NASA-CR-195509] p 2437 N94-24330

ULTRASONIC TESTS
Fiber optic detection of laser generated ultrasound for materials characterization
[ISBN-0-315-83541-9] p 2541 N94-22891
Acoustic and optical investigations of superfluid He-3
[PB93-224889] p 2523 N94-23101
Strength, acoustic evaluation and metallurgy of diffusion bonds
[DE94-001804] p 2243 N94-23717
Ultrasonic nondestructive evaluation as a tool for the development of aerospace structural ceramic composites p 2257 N94-24240
Fiber optic detection of ultrasound and its application to cure monitoring
[ISBN-0-315-83424-2] p 2544 N94-24466

ULTRASONIC WAVE TRANSDUCERS
Fiber optic detection of ultrasound and its application to cure monitoring
[ISBN-0-315-83424-2] p 2544 N94-24466

ULTRASONICS
Ultrasonic process for curing adhesives
[AD-A273175] p 2259 N94-24788

ULTRAVIOLET ABSORPTION
In situ and ex situ spectroelectrochemical and x ray absorption studies on rechargeable, chemically-modified and other MnO2 materials
[DE94-001387] p 2234 N94-24545

ULTRAVIOLET ASTRONOMY
Scientific Requirements for Future Solar-Physics Space Missions
[ESA-SP-1157] p 2623 N94-22837
Requirements for future solar-physics missions that include UV instrumentation p 2625 N94-22851
Voyager observations of globular clusters
[NASA-CR-194806] p 2598 N94-23330
UV spectral variability in the Herbig Ae star HR 5999. 11: The accretion interpretation
[NASA-CR-189313] p 2599 N94-23334
The resonance lines of MG2 as diagnostics of the upper solar chromosphere
[NASA-CR-195084] p 2627 N94-24300
UV-bright stars in globular clusters
[NASA-CR-189324] p 2599 N94-24666
Ultraviolet, visible, and gravity astrophysics: A plan for the 1990's
[NASA-NP-152] p 2603 N94-24973
Shocked clouds in the Cygnus Loop
[NASA-CR-195190] p 2600 N94-25178

ULTRAVIOLET DETECTORS
Electrophoresis in open capillaries: Some fundamental aspects
[ETN-94-95290] p 2236 N94-25232

ULTRAVIOLET RADIATION
The possible effects of the natural and induced space environment on the optical and thermal properties of EOS surfaces p 2207 N94-23596
UV extinction and IR emission in diffuse H2 regions
[NASA-CR-195194] p 2600 N94-25270

ULTRAVIOLET SPECTRA
Voyager observations of globular clusters
[NASA-CR-194806] p 2598 N94-23330
UV spectral variability in the Herbig Ae star HR 5999. 11: The accretion interpretation
[NASA-CR-189313] p 2599 N94-23334
SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-195162] p 2599 N94-24988

ULTRAVIOLET SPECTROMETERS
The development of the SOHO SUMER mechanisms
p 2361 N94-24028

ULTRAVIOLET SPECTROSCOPY
Width modulator mechanism for spectrometer entrance slits p 2357 N94-24002

ULTRAVIOLET TELESCOPES
UV-bright stars in globular clusters
[NASA-CR-189324] p 2599 N94-24666

ULYSSES MISSION
The Ulysses spacecraft control and monitoring concepts and realities p 2502 N94-23862
Ulysses log 1992 p 2502 N94-23863
Numerical simulation of Ulysses nutation
p 2207 N94-24017

UNDERGROUND EXPLOSIONS
Parametric and nonparametric discriminants for regional earthquakes and explosions
[AD-A273807] p 2406 N94-25538

UNDERWATER ACOUSTICS
Diffraction analysis of transient acoustic waves: Half-plane in a layered medium
[PB94-110988] p 2526 N94-23726
Measurements and modeling of multitone, low-frequency acoustic data from the Arraial do Cabo range
[AD-A273406] p 2530 N94-25073
Analysis of modal evolution caused by a weakly range-dependent seabed in shallow water and its application to inversion for geoacoustic properties
[AD-A273656] p 2419 N94-25435

UNIQUENESS
Multigrid methods for a semilinear PDE in the theory of pseudoplastic fluids p 2341 N94-23689

UNITED STATES
Making government work: Electronic delivery of Federal services
[OTA-TCT-578] p 2290 N94-23081

UNIVERSE
Tensor-scalar cosmological models and their relaxation toward general relativity
[PB93-220796] p 2601 N94-23099
A brief history of the universe
[DE93-616843] p 2604 N94-25210

UNIVERSITIES
Magnetic Earth Ionosphere Resonant Frequencies
[NASA-CR-195131] p 2303 N94-25191
National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 1
[NASA-CR-188271-VOL-1] p 2632 N94-25348

UNIVERSITY PROGRAM
Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100
NPS alternate techsat satellite, design project for AE-4871
[NASA-CR-195512] p 2204 N94-24590
A mission to Mercury and a mission to the moons of Mars
[NASA-CR-195530] p 2195 N94-24619
VLCT-13: A commercial transport for the 21st Century
[NASA-CR-195492] p 2181 N94-24803
Stiffening of deployable space booms: Automated Protein Crystal Growth Facility
[NASA-CR-195547] p 2196 N94-24820
Design of an airborne launch vehicle for an air launched space booster
[NASA-CR-195534] p 2198 N94-24860
RIACS/USRA
[NASA-CR-195117] p 2631 N94-25003

The Triton: Design concepts and methods
[NASA-CR-195542] p 2184 N94-25004
Activities of Academia Sinica
[DE93-614529] p 2541 N94-25335
National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 1
[NASA-CR-188271-VOL-1] p 2632 N94-25348
Strategies for recruiting additional African Americans into the NASA JSC summer faculty fellows program
p 2585 N94-25362
Image remapping strategies applied as protheses for the visually impaired p 2444 N94-25363
National Aeronautics and Space Administration (NASA)/American Society for Engineering Education (ASEE) Summer Faculty Fellowship Program, 1993, volume 2
[NASA-CR-188271-VOL-2] p 2636 N94-25367

UNIX (OPERATING SYSTEM)
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2
[AD-A273703] p 2463 N94-25456

UNMANNED SPACECRAFT
PERCIVAL mission to Mars
[NASA-CR-195541] p 2195 N94-24995

UNSTEADY AERODYNAMICS
Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion
[NASA-TM-109681] p 2167 N94-23975
Issac, Jason Cherian ses in transonic flow
[NASA-CR-194837] p 2167 N94-24052
An analysis for high Reynolds number inviscid/viscid interactions in cascades
[NASA-CR-4519] p 2169 N94-24606
Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773

UNSTEADY FLOW
Measurement of kinematically unstationary separated flows p 2315 N94-22854
A new experimental apparatus for the study of the unsteady flowfield over an airfoil in pitching and heaving motions using laser Doppler anemometry
[ISL-CO-229/92] p 2165 N94-23149
Unsteady jet flow computation towards noise prediction
[NASA-CR-194449] p 2153 N94-23553
Simulation of unsteady flows through stator and rotor blades of a gas turbine using the Chimera method
p 2323 N94-23652
Transient studies of capillary-induced flow
p 2325 N94-23662
A multilevel adaptive projection method for unsteady incompressible flow p 2341 N94-23690
Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion
[NASA-TM-109681] p 2167 N94-23975
Sound radiation due to boundary layer transition
p 2332 N94-24163
Free-surface/vorticity interaction
[AD-A273263] p 2335 N94-24686
Computational fluid mechanics
[NASA-CR-194765] p 2337 N94-24859
Two-dimensional CFD modeling of wave rotor flow dynamics
[NASA-TM-106261] p 2189 N94-25185

UNSTEADY STATE
Unsteady three-dimensional thermal field prediction in turbine blades using nonlinear BEM
p 2325 N94-23665

UPGRADING
S-2E Tracker maritime patrol aircraft re-engine and system upgrade program p 2158 N94-24270

UPLINKING
The provision of spectrum for feeder links of non-geostationary mobile satellites
p 2276 N94-22751
A quick uplink, expandable executable for the NSSC-1 of the Hubble Space Telescope p 2305 N94-23859
Voyager uplink planning in the interstellar mission era
p 2305 N94-23870
Reliable transfer of data from ground to space
p 2305 N94-23908
The EURECA telecommanding chain: Experience with packet telecommand and telemetry systems
p 2305 N94-23909

UPPER ATMOSPHERE
Prediction of three sigma maximum dispersed density for aerospace applications p 2207 N94-23654

UPPER ATMOSPHERE RESEARCH SATELLITE (UARS)
An overview of the UARS data validation effort
p 2386 N94-23617

UPPER STAGE ROCKET ENGINES
Two stage turbine for rockets p 2215 N94-23059

UPPER SURFACE BLOWING
An experimental investigation of the effect of upper surface blowing on dynamic stall
[NASA-CR-194863] p 2165 N94-22894

UPWIND SCHEMES (MATHEMATICS)
Locally modified Bott-scheme for highly convective flows
[MPIM-99] p 2400 N94-23157
Upwind MacCormack Euler solver with non-equilibrium chemistry p 2326 N94-23672
A continuing search for a near-perfect numerical flux scheme. Part 1: AUSM+
[NASA-TM-106524] p 2338 N94-25180

URANIUM
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064)
[DE94-002000] p 2347 N94-22974

URANIUM ALLOYS
Magnetic phases in UNiGe
[DE94-000793] p 2239 N94-22939
Interplay of magnetic and superconducting heavy fermion ground states
[DE94-000680] p 2240 N94-23003

URANIUM ISOTOPES
Evaluation of uranium transitions for isotopically-selective laser induced fluorescence with diode lasers (technical report for ST064)
[DE94-002000] p 2347 N94-22974

URANUS (PLANET)
The Jet Propulsion Laboratory space exploration: Past, present and future p 2153 N94-24242

URBAN PLANNING
Wind climate and urban geometry
[ISBN-9-03-860132-8] p 2416 N94-25261

USER MANUALS (COMPUTER PROGRAMS)
Users manual for the Chameleon parallel programming tools
[DE94-001934] p 2465 N94-22973
Programming in Fortran M
[DE94-000541] p 2450 N94-23207
GLview user's guide
[PB93-201366] p 2452 N94-23444
The Automated Instrumentation and Monitoring System (AIMS) reference manual
[NASA-TM-108795] p 2452 N94-23510
Activity Catalog Tool (ACT) user manual, version 2.0
[NASA-CR-177634] p 2430 N94-23527
SPDB (science processing database): Quick reference guide p 2383 N94-23597
Automatic modulation recognition based on spatial pattern classification using artificial neural networks
[CTN-94-60897] p 2296 N94-24115
MERILL: An equational reasoning system in standard ML: A user guide (prerelease version 0.4)
[PB93-204501] p 2456 N94-24534
DARPA DICE manufacturing optimization
[AD-A273345] p 2461 N94-25156

USER REQUIREMENTS
Proceedings of the Third International Mobile Satellite Conference (IMSC 1993)
[NASA-CR-194516] p 2273 N94-22735
Canadian aeronautical mobile data trials
p 2279 N94-22773
The Westinghouse Series 1000 Mobile Phone: Technology and applications p 2284 N94-22800
Software for scientific visualization: State of the art and experiences
[PB93-225183] p 2449 N94-23111
Training: Plugging the information gaps
p 2429 N94-23934
From requirements to acceptance tests
p 2464 N94-23962
The use of analytical models in human-computer interface design p 2434 N94-24190
Worldwide vessel locating and tracking system, volume 1
[PB93-193217] p 2175 N94-24474
A usage profile and evaluation of a wide-area distributed file system
[AD-A273590] p 2593 N94-24946
Human factors of mission planning systems: Applications and implementation p 2522 N94-25011
Factors influencing perceived usability and utility of LIBERTAS at Cranfield: Implications for system modification and user education
[CRANFIELD-AERO-9212] p 2594 N94-25485

UTILITIES
Statistical procedures for corrosion studies
[PB93-199412] p 2244 N94-23802
Superconducting energy storage
[DE94-002248] p 2395 N94-24654

UTILIZATION
Prospects for using mobile vehicles in missions to Mars and other planets p 2607 N94-23384
Unmanned lunar rovers: Utilization for exploration
p 2607 N94-23387

V

V/STOL AIRCRAFT
Transient Ejector Analysis (TEA) code user's guide
[NASA-TM-106310] p 2186 N94-23466

VACUUM CHAMBERS
New pin-on-disk equipment for vacuum tribometry
p 2360 N94-24023

VACUUM EFFECTS
Static adhesion in preloaded contacts subjected to long-term vacuum exposure p 2363 N94-24043

VACUUM SYSTEMS
Analysis of high vacuum systems using SINDA'85
p 2322 N94-23648

VACUUM TESTS
Tribological characterization of spatial wet lubricants under vacuum p 2264 N94-24010
In-vacuum performance of Fomblin Z25-lubricated, 52100 steel bearings with TiC-coated balls
p 2358 N94-24011

VALENCE
A valence-fluctuation theory of cuprate superconductivity
[DE94-000887] p 2558 N94-22942

VALIDITY
TOVS Pathfinder product validation and intercomparison p 2384 N94-23603
Validating a large geophysical data set: Experiences with satellite-derived cloud parameters p 2385 N94-23615
Experience of the JPL Exploratory Data Analysis Team at validating HIRS2/MSU cloud parameters
p 2385 N94-23616
An overview of the UARS data validation effort
p 2386 N94-23617

VANADIUM ALLOYS
Relationship of microstructure and mechanical properties for V-Cr-Ti alloys
[DE94-001431] p 2238 N94-22718
Effect of neutron irradiation on tensile properties of V-Cr-Ti alloys
[DE94-001433] p 2240 N94-23194

VAPOR DEPOSITION
Disilane LPCVD deposited silicon films: Deposition mechanisms, properties and capability of making transistors on thin films
[LAAS-93156] p 2252 N94-22910
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis
[PB93-217982] p 2347 N94-22982
Ordered organic thin films self-assembled from the vapor phase p 2223 N94-24339
Structural characterization and thermal cycling behaviour of EB-PVD thermal barrier coating systems
[ISBN-0-315-83365-3] p 2257 N94-24468
Thin film cadmium telluride photovoltaic cells
[DE94-000201] p 2395 N94-24509
Photoinduced charge separation in solid state and molecular systems
[DE94-001727] p 2563 N94-24537
LPCVD of InN on GaAs(110) using HN3 and TMIn: Comparison with Si(100) results
[AD-A273555] p 2235 N94-24917
Intelligent control of chemical vapor deposition processes
[AD-A273356] p 2261 N94-24937
The reaction mechanism of W-CVD in Si
[ETN-94-95329] p 2261 N94-25084
Scanning probe lithography. 2: Selective chemical vapor deposition of copper into scanning tunneling microscope-defined patterns
[AD-A273304] p 2547 N94-25144
Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A273698] p 2263 N94-25489

VAPOR PHASES
Ultraviolet photosulfidation of III-V compound semiconductors for electronic passivation
[DE94-001417] p 2555 N94-22717
High-resolution soft x ray photoionization studies of selected molecules
[DE94-000568] p 2532 N94-23002
Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics
[DE93-040094] p 2348 N94-23203

Infrared analysis of vapor phase deposited tricresylphosphate (TCP)
[NASA-TM-106423] p 2253 N94-23371

Numerical modeling of physical vapor transport under microgravity conditions: Effect of thermal creep and stress p 2223 N94-24340

CFD simulation of coaxial injectors
p 2342 N94-24430

VAPOR PRESSURE

Experimental and analytical study of cryogenic propellant boiloff to develop and verify alternate pressurization concepts for Space Shuttle external tank using a scaled down tank p 2266 N94-23657

VAPORIZING

LOX droplet vaporization in a supercritical forced convective environment p 2211 N94-23034

Evaporation and combustion of LOX under supercritical and subcritical conditions p 2211 N94-23035

Droplet turbulence interactions under subcritical and supercritical conditions p 2211 N94-23036

Fundamental rocket injector/spray programs at the Phillips Laboratory p 2211 N94-23039

Development of a computational testbed for numerical simulation of combustion instability
p 2213 N94-23046

Vaporization behavior of non-stoichiometric refractory carbide materials and direct observations of the vapor phase using laser diagnostics
[DE93-040094] p 2348 N94-23203

VAPORS

Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090

VARACTOR DIODES

Planar varactor frequency multiplier devices with blocking barrier
[NASA-CASE-NPO-18428-1-CU] p 2310 N94-23821

VARIABILITY

Estimates of monthly mean soil moisture for 1979-1989
[NASA-TM-104571] p 2407 N94-23132

Convective organization in the Pacific ITCZ: Merging OLR, TOVS, and SSM/I information
[NASA-CR-194850] p 2408 N94-23619

GEWEX Water Vapor Project (GVaP)
p 2411 N94-24378

Two-stage versus sequential sample-size determination in regression analysis of simulation experiments
[PB94-110558] p 2495 N94-24634

VARIANCE (STATISTICS)

Analysis of open-loop conical scan pointing error and variance estimators p 2291 N94-23263

Two-stage versus sequential sample-size determination in regression analysis of simulation experiments
[PB94-110558] p 2495 N94-24634

Correlation function estimator performance in non-Gaussian spherically invariant random processes
[AD-A273498] p 2496 N94-24951

VARIATIONAL PRINCIPLES

A geometric weighted elliptic grid regeneration method for 3D unstructured ALE hydrodynamics
[DE94-000309] p 2448 N94-22980

Forced vibrations of a non-viscous drop
[MPIS-24/1992] p 2318 N94-23198

Application and development of the Schwinger multichannel scattering theory and the partial differential equation theory of electron-molecule scattering
[NASA-CR-194774] p 2536 N94-24798

Modelling the Shuttle Remote Manipulator System: Another flexible model p 2371 N94-25350

VARIATIONS

Measurement of the volume mass by spontaneous Raman scattering. Study of turbulent fluctuations of mixing in a subsonic free jet. Measurements in supersonic wind tunnels
[ISL-R-102/92] p 2339 N94-25462

VAX COMPUTERS

The Ulysses spacecraft control and monitoring concepts and realities p 2502 N94-23862

VECTOR ANALYSIS

Characterization of measures with a convex matrix-k-range
[PB93-220655] p 2479 N94-23098

Note on the use of spherical vectorfields in Clifford analysis
[PB93-237667] p 2480 N94-23437

Polytopic vector analysis in igneous petrology: Application to lunar petrogenesis p 2615 N94-24368

VECTOR DOMINANCE MODEL

New evaluation of hadronic contributions to the anomalous magnetic moment of charged leptons
[DE93-634394] p 2536 N94-24844

VECTOR MESONS

Momentum and coordinate space three-nucleon potentials
[DE93-040868] p 2531 N94-22951

Gauge invariance and the electromagnetic current of composite pions
[DE93-040869] p 2532 N94-22952

VECTOR PROCESSING (COMPUTERS)

Algorithm on addition chains with restricted memory
[PB94-118692] p 2454 N94-23759

VECTOR QUANTIZATION

A constrained joint source/channel coder design and vector quantization of nonstationary sources
[NASA-CR-195145] p 2301 N94-24707

VECTOR SPACES

Characterization of measures with a convex range: A generalization of Lyapounov's theorem
[PB93-220523] p 2523 N94-23094

The cusp horseshoe and its bifurcations in the unfolding of an inclination-flip homoclinic orbit
[W-9307] p 2480 N94-23141

Note on the use of spherical vectorfields in Clifford analysis
[PB93-237667] p 2480 N94-23437

The fundamental group of the complement of complexified real arrangements
[DE93-616847] p 2491 N94-25214

Deviation equations of Synge and Schild in spaces with affine connection and metric, and equations for gravitational waves detectors
[DE93-616852] p 2571 N94-25339

VECTORS (MATHEMATICS)

Implementation and parallelization of fast matrix multiplication for a fast Legendre transform
[DE94-002184] p 2478 N94-22975

Nested Krylov methods and preserving the orthogonality p 2483 N94-23681

Logarithm of probability measures and infinite divisibility of sub-stable random vectors
[PB94-118627] p 2486 N94-23758

VEGETATION

The AGRHYMET data communications project
p 2280 N94-22776

Atmospheric flow in heterogeneous vegetated regions
[W-9303] p 2401 N94-23175

Effect of land use change on the carbon cycle in Amazon soils
[NASA-CR-195168] p 2399 N94-24853

Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861

VEGETATION GROWTH

Microbial biofilm formation and its consequences for the CELSS program
[NASA-CR-195146] p 2438 N94-24706

VEGETATIVE INDEX

Session on coupled land surface/hydrological/atmospheric models
p 2414 N94-24395

VEHICLE WHEELS

Landing gear with swivelling beam
[CA-PATENT-1323020] p 2176 N94-24181

VELOCITY DISTRIBUTION

Turbulent separated flows above an obstacle in an open channel p 2316 N94-22859

Shear coaxial injector instability mechanisms
p 2213 N94-23047

A representation for the turbulent mass flux contribution to Reynolds-stress and two-equation closures for compressible turbulence
[NASA-CR-191569] p 2319 N94-23302

Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator
[NASA-TM-106468] p 2166 N94-23465

A random distribution reacting mixing layer model
[NASA-CR-194445] p 2187 N94-23552

Solution of mixed convection heat transfer from isothermal in-line fins p 2321 N94-23644

Evaluation of turbulence models in the PARC code for transonic diffuser flows
[NASA-TM-106391] p 2168 N94-24084

Vortical structure in a forced plane mixing layer
p 2331 N94-24162

Stagnation region heat transfer: The influence of turbulence parameters, Reynolds number and body shape
[NASA-TM-106504] p 2334 N94-24481

A two-dimensional dispersion module for the TOUGH2 simulator
[DE94-002262] p 2335 N94-24655

A diagnostic model to estimate winds and small-scale drag from Mars Observer PMIRR data
p 2617 N94-24874

The effects of profiles on supersonic jet noise
[NASA-CR-195184] p 2530 N94-25177

VELOCITY MEASUREMENT

Experimental Methods in Separated Flows
[ILR-MITT-260(1991)] p 2315 N94-22852

Pressure oscillation measurements in turbulent flows
p 2316 N94-22855

SFOLDA: A semiconductor LDA for measurements in complex flows p 2316 N94-22856

An experimental study of characteristic combustion-driven flows for CFD validation
p 2212 N94-23040

Studies of two phase flow
[NASA-CR-195099] p 2267 N94-23594

On the determination of local instantaneous averages in particulate flow measurements p 2325 N94-23663

Vortical structure in a forced plane mixing layer
p 2331 N94-24162

Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field
[NASA-CR-191490] p 2344 N94-24360

Heterodyne array for measurement of target velocity
[AD-D016025] p 2545 N94-24722

Detection of velocity in high temperature liquid metals
p 2247 N94-25127

Direct measurement of turbulent dissipation rate using dual laser doppler velocimeters
[AD-A273740] p 2340 N94-25530

VENTILATION

Reactive trace metals as indicators of subduction and ventilation processes in the ocean
[AD-A273585] p 2419 N94-25164

VENTS

Design of a resistojet for Space Station Freedom
[NASA-CR-195506] p 2221 N94-24979

Reactive trace metals as indicators of subduction and ventilation processes in the ocean
[AD-A273585] p 2419 N94-25164

VENUS (PLANET)

SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-195162] p 2599 N94-24988

VENUS ATMOSPHERE

SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-195162] p 2599 N94-24988

VENUS SURFACE

SO2 on Venus: A final cross-calibration with Pioneer Venus
[NASA-CR-195162] p 2599 N94-24988

VERTICAL DISTRIBUTION

Cloud, dust, and ozone vertical profiles from solar occultation measurements: Implications for dynamics
p 2617 N94-24877

Results from the VISA project
[AD-A273752] p 2406 N94-25540

VERTICAL LANDING

Summary of lift and lift/cruise fan powered lift concept technology
[NASA-CR-177619] p 2176 N94-23489

VERTICAL MOTION

Vertical motion in the SYNOP central array
[AD-A273593] p 2418 N94-24795

VERTICAL TAKEOFF

Summary of lift and lift/cruise fan powered lift concept technology
[NASA-CR-177619] p 2176 N94-23489

VERY HIGH FREQUENCIES

The ORBCOMM data communications system
p 2281 N94-22782

Radar signature related radome techniques for flush-mounted HF-, VHF- and, UHF communication antennas
[PB93-204618] p 2294 N94-23742

VERY LARGE ARRAY (VLA)

Interferometric astronomy on the Moon
p 2601 N94-23378

Conceptual design and architecture of hexapod robotic vehicles for the (L)OVLA project p 2369 N94-23405

VERY LARGE SCALE INTEGRATION

Customizable VLSI artificial neural network chips based on a novel technology
[DE94-001418] p 2307 N94-23008

Mixed analog-digital description and simulation: Proposition for VHDL-analogue
[RR-908-I] p 2450 N94-23180

Area-power-delay trade-off in logic synthesis
[ISBN-9-09-005332-8] p 2461 N94-25080

VERY LONG BASE INTERFEROMETRY

Radioastron flight operations p 2502 N94-23861

Navigation of space VLBI missions: Radioastron and VSOP p 2513 N94-23926

The 1404+286: A non-ideal calibrator for VLBI observations
[PB94-104908] p 2599 N94-24521

LOITA: Lunar Optical/Infrared Telescope Array
[NASA-CR-195532] p 2546 N94-24816

Constraining proposed combinations of ice history and Earth rheology using VLBI determined baseline length rates in North America p 2405 N94-25205

VERY LOW FREQUENCIES

Very low frequency and low frequency transmitting antenna parameter monitoring system [AD-D015989] p 2302 N94-25049

VESTIBULES

Perception in flight: Shape and motion perception, space perception, spatial orientation, and visual vestibular interaction p 2429 N94-23979

The role of visual context in manual target localization p 2429 N94-25351

VHSIC (CIRCUITS)

Formal verification of digital circuits described in VHDL [ETN-94-95165] p 2306 N94-22883

Micro SIL-1 simulator [PB94-110889] p 2454 N94-23750

Japanese aerospace science and technology 1992. A bibliography with indexes [NASA-SP-7104] p 2631 N94-24585

VIBRATION

Time-frequency domain analysis of vibration signals for machinery diagnostics.(4): Interpretation using image processing techniques [OUEL-1953/92] p 2353 N94-23178

Energy transfer in solid explosives [DE94-001523] p 2265 N94-23778

US tag for ISO/TC 108 mechanical vibration and shock: Minutes of the accredited Standards Committee on Mechanical Vibration and Shock, S2 [AD-A273015] p 2376 N94-23789

Vibrational power transmission analysis of machinery installations in ships with the objective of noise reduction [ISVR-TR-216] p 2363 N94-24076

Aeroelastic, aeromechanical and vibration problems in helicopters p 2154 N94-24244

Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles [NASA-CR-195163] p 2201 N94-24919

A vibrating wire parallel to a type 2 superconducting slab of arbitrary thickness [DE93-617134] p 2525 N94-25389

Effects of a vibrating wire carrying DC current on a moving type 2 superconducting slab of arbitrary thickness [DE93-617136] p 2566 N94-25391

Remote vibration measurements at a sud aviation alouette 3 helicopter with a CW CO2-laser system [AD-A273818] p 2190 N94-25516

Modeling of a large undamped space structure using time domain techniques [AD-A273828] p 2206 N94-25523

Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe [AD-A273830] p 2571 N94-25524

VIBRATION DAMPING

Vibration isolating engine mount [CA-PATENT-1-320-710] p 2353 N94-23215

Low noise electric motor p 2315 N94-23989

Vibrational power transmission analysis of machinery installations in ships with the objective of noise reduction [ISVR-TR-216] p 2363 N94-24076

Aeroelastic, aeromechanical and vibration problems in helicopters p 2154 N94-24244

Numerical analysis of the motion of a rigid body with an attached spring-mass-damper [AD-A273825] p 2379 N94-25520

VIBRATION EFFECTS

Microwelding due to random vibration p 2359 N94-24019

Modeling of PCG fluid dynamics: Salient results p 2224 N94-24345

Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe [AD-A273830] p 2571 N94-25524

VIBRATION ISOLATORS

Vibration isolating engine mount [CA-PATENT-1-320-710] p 2353 N94-23215

Prediction of pressure drop in fluid tuned mounts using analytical and computational techniques p 2321 N94-23643

The low noise momentum wheel MW-X: EM design and predicted properties p 2360 N94-24024

Vibrational power transmission analysis of machinery installations in ships with the objective of noise reduction [ISVR-TR-216] p 2363 N94-24076

Modeling of PCG fluid dynamics: Salient results p 2224 N94-24345

VIBRATION MEASUREMENT

Spacecraft vibrations due to mechanisms; measurements from Olympus on-station p 2207 N94-24018

The Olympus PAX, measurement of mechanism induced vibration p 2362 N94-24041

Remote vibration measurements at a sud aviation alouette 3 helicopter with a CW CO2-laser system [AD-A273818] p 2190 N94-25516

VIBRATION METERS

Spacecraft vibrations due to mechanisms; measurements from Olympus on-station p 2207 N94-24018

The Olympus PAX, measurement of mechanism induced vibration p 2362 N94-24041

VIBRATION MODE

Microwelding due to random vibration p 2359 N94-24019

Maximum likelihood modal parameter identification and realization of stochastic systems p 2157 N94-24265

Development of a nondestructive vibration technique for bond assessment of Space Shuttle tiles [NASA-CR-195163] p 2201 N94-24919

Space Station flexible dynamics under plume impingement p 2208 N94-25383

VIBRATION TESTS

Data relay system satellite: The development of an antenna pointing mechanism for the inter-orbit link antenna p 2359 N94-24015

Remote vibration measurements at a sud aviation alouette 3 helicopter with a CW CO2-laser system [AD-A273818] p 2190 N94-25516

Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe [AD-A273830] p 2571 N94-25524

VIBRATIONAL STATES

Radiative properties of molecular nitrogen ions produced by helium Penning ionization and argon effects [NASA-CR-195126] p 2534 N94-24487

VIBRATORY LOADS

A parametric study of harmonic rotor hub loads [NASA-CR-4558] p 2181 N94-24726

VIDEO COMMUNICATION

Deployable video conference table [NASA-CASE-ARC-11950-1] p 2192 N94-23310

A constrained joint source/channel coder design and vector quantization of nonstationary sources [NASA-CR-195145] p 2301 N94-24707

A protctype to automate the video subsystem routing for the video distribution subsystem of Space Station Freedom p 2306 N94-25353

VIDEO COMPRESSION

VLSI-based video event triggering for image data compression [NASA-TM-106500] p 2345 N94-25116

VIDEO DATA

Close-up analysis of inflight ice accretion [NASA-TM-106457] p 2172 N94-23523

Measurement of interfacial tension by use of pendant drop video techniques [DE93-000168] p 2345 N94-24831

Preliminary design of a satellite observation system for Space Station Freedom [NASA-CR-195514] p 2209 N94-24840

VLSI-based video event triggering for image data compression [NASA-TM-106500] p 2345 N94-25116

VIDEO EQUIPMENT

Preliminary design of a satellite observation system for Space Station Freedom [NASA-CR-195514] p 2209 N94-24840

Conceptual design of an astronaut hand anthropometry device [NASA-CR-195490] p 2439 N94-24956

VIDEO SIGNALS

Image processing for acquisition of fluid rest time in the running of an artificial heart valve p 2316 N94-22858

Reducing video frame rate increases remote optimal focus time [NASA-TM-104018] p 2431 N94-23970

Solid state Time Base Corrector (TBC) [AD-D015981] p 2312 N94-25039

Digital data, composite video multiplexer and demultiplexer boards for an IBM PC/AT compatible computer p 2447 N94-25377

VIEWING

Using the SPICE system to help plan and interpret space science observations p 2517 N94-23950

Using computer graphics to design Space Station Freedom viewing p 2434 N94-24191

Illumination requirements for operating a space remote manipulator p 2435 N94-24195

VIKING MARS PROGRAM

Mars Operational Environmental Satellite (MOES): A post-Mars Observer discovery mission p 2620 N94-24890

VINYL POLYMERS

Humidity effects on soluble core mechanical and thermal properties (polyvinyl alcohol/microballoon composite) type CG extendospheres, volume 2 [NASA-CR-193893] p 2229 N94-24224

VIRTUAL REALITY

Spatial interpretation of NASA's Marshall Space Flight Center Payload Operations Control Center using virtual reality technology p 2198 N94-24432

World processor: An interface for textual display and manipulation in virtual reality [PB94-118643] p 2592 N94-24642

A white paper: NASA virtual environment research, applications, and technology [NASA-TM-109682] p 2428 N94-24855

VISCOELASTICITY

Nonlocal models in continuum mechanics [DE93-040146] p 2316 N94-22870

Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160

Viscoelastic analysis of seals for extended service life p 2371 N94-24408

VISCOPLASTICITY

Theory of extrusion: Advances and challenges [PB93-201572] p 2241 N94-23447

VISCOSITY

Local grid refinement method for the euler equations [PB93-223329] p 2317 N94-22985

Polyimide processing additives [NASA-CASE-LAR-13669-2] p 2252 N94-23079

A multilevel adaptive projection method for unsteady incompressible flow p 2341 N94-23690

Direct simulation of isothermal-wall supersonic channel flow p 2172 N94-24164

Electro-rheology fluids and liquid fuel flow [AD-A273640] p 2337 N94-25032

Containerless measurements on liquids at high temperatures p 2238 N94-25125

VISCOUS DAMPING

Viscous rotary damper p 2361 N94-24031

VISCOUS FLOW

Molecular gas dynamics applied to low-thrust propulsion p 2214 N94-23053

Two-dimensional Navier-Stokes computations of subsonic and supersonic flows through turbine cascades [PB93-226223] p 2317 N94-23114

Transient Ejector Analysis (TEA) code user's guide [NASA-TM-106310] p 2186 N94-23466

An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids [NASA-TM-106437] p 2481 N94-23554

A dual reciprocal boundary element formulation for viscous flows p 2325 N94-23666

Heat pipe vapor dynamics [NASA-CR-194217] p 2327 N94-24096

Drag reduction at a plane wall p 2327 N94-24140

Transition to turbulence in an elliptic vortex p 2331 N94-24161

An analysis for high Reynolds number inviscid/viscid interactions in cascades [NASA-CR-4519] p 2169 N94-24606

Carrying the mass flux terms exactly in the first and second moment equations of compressible turbulence [NASA-CR-191568] p 2335 N94-24712

Development and application of new algorithms for the simulation of viscous compressible flows with moving bodies in three dimensions [AD-A273514] p 2338 N94-25157

VISCOUS FLUIDS

Nonlinear dynamics applied to atmospheric prediction [AD-A273437] p 2404 N94-24674

The hydrodynamics of a moving fluid-liquid contact line [ETN-94-95352] p 2339 N94-25247

VISIBILITY

Validation of a second generation conspicuity meter [IZF-1993-A-11] p 2542 N94-22895

A model-based approach for detection of objects in low resolution passive-millimeter wave images p 2442 N94-25507

Results from the VISA project [AD-A273752] p 2406 N94-25540

VISIBLE INFRARED SPIN SCAN RADIOMETER

Interferometer scan unit mechanism definition p 2358 N94-24012

VISION

Vision impairment and corrective considerations of civil airmen [DOT/FAA/AM-93/21] p 2426 N94-23623

Image remapping strategies applied as protheses for the visually impaired p 2444 N94-25363

VISUAL ACUITY

Evaluation of visual acuity with Gen 3 night vision goggles [NASA-TM-108792] p 2431 N94-23974

Cockpit/NVG visual integration issues p 2432 N94-23983

VISUAL CONTROL

Eye-gaze control of the computer interface: Discrimination of zoom intent [DE94-000480] p 2429 N94-22997

The effects of spatially displaced visual feedback on remote manipulator performance p 2436 N94-24201

VISUAL DISCRIMINATION
Quality metrics for sensor images p 2443 N94-25513

VISUAL OBSERVATION
Observational studies of the clearing phase in proto-planetary disk systems [NASA-CR-195182] p 2604 N94-25265

VISUAL PERCEPTION
Validation of a second generation conspicuity meter [IZF-1993-A-11] p 2542 N94-22895
A knowledge based system for scientific data visualization [NASA-CR-194879] p 2452 N94-23507
Some background information on perceptual color matching pertinent to computer applications [PB93-200327] p 2445 N94-23788
Visual Problems in Night Operations [AGARD-LS-187] p 2431 N94-23976
Multi-sensoral approach to night flight: Perceptive and Cognitive limitations p 2432 N94-23981
Cockpit/NVG visual integration issues p 2432 N94-23983
Night vision goggle illusions and visual training p 2432 N94-23984
Luminance-brightness mapping: The missing decades [ETN-94-95351] p 2428 N94-25298
Synthetic vision system flight test results and lessons learned p 2429 N94-25492
Extracting heading and temporal range from optic flow: Human performance issues p 2442 N94-25510
Optical information in landing scenes p 2442 N94-25511

VISUAL STIMULI
Physical aspects of the visual stimulus p 2431 N94-23978

VISUAL TASKS
Automated system function allocation and display format: Task information processing requirements p 2434 N94-24189

VOICE COMMUNICATION
Proceedings of the Third International Mobile Satellite Conference (IMSC 1993) [NASA-CR-194516] p 2273 N94-22735
ROCSAT-1 telecommunication experiments p 2279 N94-22770
Mobilesat (tm): A world first p 2281 N94-22783
First satellite mobile communication trials using BLQS-CDMA p 2284 N94-22801
A protocol for satellite access via use of spot-beams p 2286 N94-22811
Performance of the unique-word-reverse-modulation type demodulator for mobile satellite communications p 2286 N94-22813
On the quality of synthetic speech evaluation and improvements [ETN-94-95298] p 2304 N94-25234

VOICE CONTROL
Speech versus manual control of camera functions during a telerobotic task p 2436 N94-24199

VOICE DATA PROCESSING
A high quality voice coder with integrated echo canceller and voice activity detector for mobile satellite applications p 2286 N94-22812
Linear and nonlinear adaptive filtering and their application to speech intelligibility enhancement [ISBN-9-09-005342-5] p 2304 N94-25292

VOIDS
Analysis of a proposed Compton backscatter imaging technique [DE93-040537] p 2371 N94-22935
Analysis of Alloy 600 and X-750 stress corrosion cracks [DE94-001578] p 2238 N94-22936

VOLATILITY
Isothiazolone volatility study of a water bottom from fuel treated with Kathon (tm) FP1.5 biocide [AD-A273165] p 2266 N94-24728

VOLCANOES
Northern hemisphere tropospheric mid-latitude circulation after violent volcanic eruptions [MPIM-107] p 2403 N94-24491
Electromagnetic field changes as a precursory phenomena of earthquakes and volcanic eruptions [REPT-157] p 2405 N94-24980

VOLCANOLOGY
Basaltic Volcanism and Ancient Planetary Crusts [NASA-CR-193151] p 2614 N94-24363
Lunar mare volcanism: Mixing of distinct, mantle source regions with KREEP-like component p 2615 N94-24370
Northern hemisphere tropospheric mid-latitude circulation after violent volcanic eruptions [MPIM-107] p 2403 N94-24491
The transition from diapirism to dike intrusion: Implications for planetary volcanism [NASA-CR-195133] p 2403 N94-24580
Seafloor characterization/Galapagos propagating rift [AD-A273586] p 2419 N94-25165

VOLT-AMPERE CHARACTERISTICS
The role of emitter states in magnetotunneling through double-barrier resonant-tunneling diodes at high magnetic fields [REPT-A-2658] p 2564 N94-24959

VOLTAGE REGULATORS
Electrochemical sulfur passivation of visible (approximately 670nm) AlGaInP lasers [DE94-002293] p 2350 N94-24659
Laser energized high voltage direct current power supply [AD-D015977] p 2312 N94-25036

VOLTERRA EQUATIONS
Modeling transonic aerodynamic response using nonlinear systems theory for use with modern control theory p 2164 N94-25112

VOLUME
The effect of sub-surface volume scattering on the accuracy of ice-sheet altimeter retracking algorithms [NASA-CR-194825] p 2386 N94-24060

VORTEX GENERATORS
A method for recognition of frequency cells in a cylinder flow influenced by wall effects p 2316 N94-22860
Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator [NASA-TM-106468] p 2166 N94-23465
Vortex generation and wave-vortex interaction over a concave plate with roughness and suction [NASA-CR-191589] p 2337 N94-24869
Improving diffusing S-duct performance by secondary flow control [NASA-TM-106492] p 2170 N94-25182

VORTEX LATTICE METHOD
Computation of the loads on the AH-1/OLS model rotor in forward flight and comparison with wind tunnel tests [ISL-CO-230/92] p 2176 N94-23146
LinAir: A multi-element discrete vortex Weissinger aerodynamic prediction method [NASA-TM-108786] p 2167 N94-23557

VORTEX SHEDDING
Active control of oscillatory lift forces on a circular cylinder [AD-A273243] p 2338 N94-25140

VORTEX SHEETS
The acoustic and instability waves of jets confined inside an acoustically lined rectangular duct [NASA-CR-191586] p 2334 N94-24602
The effects of profiles on supersonic jet noise [NASA-CR-195184] p 2530 N94-25177

VORTICES
A photogrammetric solution to a particular problem [NASA-TP-3415] p 2381 N94-22961
Acoustic and optical investigations of superfluid He-3 [PB93-224889] p 2523 N94-23101
A method to simulate viscous diffusion of vorticity by convective transport of vortices at a non-solenoidal velocity [DE94-001777] p 2318 N94-23220
Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator [NASA-TM-106468] p 2166 N94-23465
Feasibility of detecting aircraft wake vortices using passive microwave radiometers [NASA-CR-191553] p 2343 N94-23498
Leading-edge votex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques [NASA-TP-3374] p 2166 N94-23512
LinAir: A multi-element discrete vortex Weissinger aerodynamic prediction method [NASA-TM-108786] p 2167 N94-23557
Numerical analysis of a vortex controlled diffuser p 2324 N94-23659
Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion [NASA-TM-109681] p 2167 N94-23975
Toward modeling wingtip vortices p 2171 N94-24142
Large eddy simulation of a boundary layer with concave streamwise curvature p 2328 N94-24146
Dynamic localization and second-order subgrid-scale models in large eddy simulations of channel flow p 2329 N94-24149
Toward large eddy simulation of turbulent flow over an airfoil p 2172 N94-24150
Unstructured grid large eddy simulation of wall bounded turbulent flows p 2329 N94-24151
Investigation of the asymptotic state of rotating turbulence using large-eddy simulation p 2330 N94-24152
A large eddy simulation scheme for turbulent reacting flows p 2330 N94-24154
Stretch-induced quenching in flame-vortex interactions p 2237 N94-24156
On streak spacing in wall-bounded turbulent flows p 2331 N94-24159
Numerical simulation of non-Newtonian free shear flows p 2331 N94-24160
Transition to turbulence in an elliptic vortex p 2331 N94-24161
Vortical structure in a forced plane mixing layer p 2331 N94-24162
Free-surface/vorticity interaction [AD-A273263] p 2335 N94-24686
Vortex generation and wave-vortex interaction over a concave plate with roughness and suction [NASA-CR-191589] p 2337 N94-24869
Eddy mixing coefficient upper limit derived from the photochemical balance of O2 p 2621 N94-24897
Simulation of the vortex motion in the high T(c) superconductors [DE93-617138] p 2567 N94-25403
A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements [AD-A273803] p 2406 N94-25537

VORTICITY
A method to simulate viscous diffusion of vorticity by convective transport of vortices at a non-solenoidal velocity [DE94-001777] p 2318 N94-23220
Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator [NASA-TM-106468] p 2166 N94-23465
LinAir: A multi-element discrete vortex Weissinger aerodynamic prediction method [NASA-TM-108786] p 2167 N94-23557
Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles [NASA-TM-106450] p 2167 N94-23592
Diagnostic budgets of analyzed and modelled tropical plumes [NASA-CR-194853] p 2409 N94-23621
Transition to turbulence in an elliptic vortex p 2331 N94-24161
Vortical structure in a forced plane mixing layer p 2331 N94-24162
Study of streamwise vorticity-stirred combustion [NASA-CR-194450] p 2234 N94-24565
Nonlinear dynamics applied to atmospheric prediction [AD-A273437] p 2404 N94-24674
Free-surface/vorticity interaction [AD-A273263] p 2335 N94-24686

VORTICITY EQUATIONS
An adaptive multigrid model for hurricane track prediction p 2416 N94-23687
A vorticity dynamics based model for the turbulent dissipation: Model development and validation [NASA-TM-106177] p 2336 N94-24713

VOYAGER PROJECT
Voyager uplink planning in the interstellar mission era p 2305 N94-23870
Techniques and software for optimum and efficient mission science sequence development p 2504 N94-23872

VOYAGER 1 SPACECRAFT
The Jet Propulsion Laboratory space exploration: Past, present and future p 2153 N94-24242

VOYAGER 2 SPACECRAFT
The Jet Propulsion Laboratory space exploration: Past, present and future p 2153 N94-24242

VSAT (NETWORK)
A European mobile satellite system concept exploiting CDMA and OBP p 2279 N94-22768
Modulation and synchronization technique for MF-TDMA system [NASA-CR-194448] p 2304 N94-25266

W

WAKES
Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator [NASA-TM-106468] p 2166 N94-23465
Three dimensional study of an airplane wing and its wake in the subsonic regime [ISBN-0-315-58963-9] p 2168 N94-24178
Free-surface/vorticity interaction [AD-A273263] p 2335 N94-24686
Analysis of the effects of wake passage on heat transfer in a linear turbine cascade [AD-A273729] p 2339 N94-25446

WALKING MACHINES
Walking machines for space p 2369 N94-23406

Design of a walking robot [NASA-CR-195200] p 2367 N94-25274

WALL FLOW

Experimental Methods in Separated Flows [ILR-MITT-260(1991)] p 2315 N94-22852

A method for recognition of frequency cells in a cylinder flow influenced by wall effects p 2316 N94-22860

Numerical investigation of two- and three-dimensional heat transfer in expander cycle engines p 2213 N94-23048

Flow visualization study in high aspect ratio cooling channels for rocket engines p 2213 N94-23049

Computation of flows in a turn-around duct and a turbine cascade using advanced turbulence models p 2216 N94-23062

Development of a code for wall contour design in the transonic region of axisymmetric and square nozzles [NASA-CR-194857] p 2167 N94-23625

Supersonic minimum length nozzle design for dense gases p 2171 N94-23656

Unstructured grid large eddy simulation of wall bounded turbulent flows p 2329 N94-24151

Sub-sonic flow about a slender profile in a tunnel having perforated walls [AD-A273184] p 2170 N94-25137

Analytical skin friction and heat transfer formula for compressible internal flows [NASA-CR-191185] p 2170 N94-25173

WALL TEMPERATURE

Numerical investigation of two- and three-dimensional heat transfer in expander cycle engines p 2213 N94-23048

Flow visualization study in high aspect ratio cooling channels for rocket engines p 2213 N94-23049

WALLS

Pressure wall patch [NASA-CASE-MFS-28724-1] p 2203 N94-23824

WARFARE

Night operations p 2431 N94-23977

WARNING SYSTEMS

Robust, wide-range hydrogen sensor for use in commercial, space, and government applications [DE93-040902] p 2342 N94-22954

Lightning studies using LDAR and LLP data p 2416 N94-23238

Towards a new radiation protection organization [FOA-C-40304-4.3] p 2437 N94-24292

WASTE DISPOSAL

Aqueous alkaline cleaners: An alternative to organic solvents [AD-A273510] p 2260 N94-24848

WASTE ENERGY UTILIZATION

Investigating pyrolysis/incineration as a method of resource recovery from solid waste p 2444 N94-25375

WASTE TREATMENT

Investigating pyrolysis/incineration as a method of resource recovery from solid waste p 2444 N94-25375

WASTE UTILIZATION

Investigating pyrolysis/incineration as a method of resource recovery from solid waste p 2444 N94-25375

WATER

Analysis of Alloy 600 and X-750 stress corrosion cracks [DE94-001578] p 2238 N94-22936

Recent advances in SPE (tm) water electrolyzer p 2393 N94-23362

Extinguishment of enclosed gas fires with water sprays [PB93-201663] p 2268 N94-23430

Extinguishment of combustible porous solids by water droplets [PB93-198893] p 2270 N94-23740

GEWEX Continental-scale International Project (GCIP) p 2411 N94-24376

Water cycle research associated with the CaPE hydrometeorology project (CHymP p 2416 N94-24414

Impact of the CO2 and H2O clouds of the Martian polar hood on the polar energy balance p 2618 N94-24880

Vertical transport of water in the Martian boundary layer p 2622 N94-24902

Examination of the physical, electrical, and microwave evolution of water into young sea ice [AD-A273559] p 2418 N94-24918

WATER BALANCE

An investigation of current and future satellite and in-situ data for the remote sensing of the land surface energy balance [NASA-CR-195138] p 2387 N94-24596

WATER CIRCULATION

Recent developments in the mathematical modelling and physical understanding of transport and dispersion in aquatic systems, with special reference to tidal waters [PB94-111135] p 2418 N94-24600

WATER COLOR

Algorithm-development activities [NASA-CR-193225] p 2420 N94-23538

Factors affecting the identification of phytoplankton groups by means of remote sensing [NASA-TM-108799] p 2387 N94-24403

WATER FLOW

Performance of prefabricated geocomposite subdrainage system in an airport runway [DOT/FAA/RD-93/23] p 2192 N94-23303

Transient studies of capillary-induced flow p 2325 N94-23662

WATER IMMERSION

Transient studies of capillary-induced flow p 2325 N94-23662

WATER MANAGEMENT

High power density proton exchange membrane fuel cells p 2393 N94-23359

WATER POLLUTION

Chemical characterization of some aerobic liquids in CELSS p 2422 N94-23241

Exploratory report nickel and nickel compounds [PB93-223998] p 2242 N94-23496

Exploratory report antimony and antimony compounds [PB93-224004] p 2397 N94-23497

WATER QUALITY

Statistical procedures for corrosion studies [PB93-199412] p 2244 N94-23802

A chemical sensor and biosensor based totally automated water quality monitor for extended space flight: Step 1 p 2443 N94-24447

WATER RESOURCES

GEWEX Continental-scale International Project (GCIP) p 2411 N94-24376

Snow modeling, water resources, climate change [PB93-201770] p 2399 N94-24633

The HEC NexGen software development project [AD-A273512] p 2460 N94-24822

WATER TREATMENT

Statistical procedures for corrosion studies [PB93-199412] p 2244 N94-23802

WATER VAPOR

Implementation of a state of the art automated system for the production of cloud/water vapor motion winds from geostationary satellites [NASA-CR-195087] p 2410 N94-24125

GEWEX Water Vapor Project (GVaP) p 2411 N94-24378

Water cycle research associated with the CaPE hydrometeorology project (CHymP p 2416 N94-24414

Mars Operational Environmental Satellite (MOES): A post-Mars Observer discovery mission p 2620 N94-24890

Mars Observer: Applications to atmospheric transport p 2623 N94-24904

WATER WAVES

VIERS-1, phase 3 [BCRS-92-24] p 2381 N94-23145

Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels [NASA-CR-194858] p 2404 N94-24843

WATERSHEDS

Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop [PB93-220135] p 2407 N94-23129

WAVE ATTENUATION

Similarity in wave propagation under a global relaxation law [PB94-111028] p 2524 N94-23730

Fiber optical angular sensor: Literature study and experimental results [PB93-204345] p 2545 N94-24529

Temperature dependent performance of Coplanar Waveguide (CPW) on substrates of various materials [NASA-TM-106505] p 2313 N94-25170

WAVE DIFFRACTION

Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS p 2283 N94-22795

Transient analysis of conducting half-plane problem with noncausal scattering image [PB93-225027] p 2524 N94-23110

Diffraction analysis of transient acoustic waves: Half-plane in a layered medium [PB94-110988] p 2526 N94-23726

WAVE DISPERSION

Similarity in wave propagation under a global relaxation law [PB94-111028] p 2524 N94-23730

Analysis for the computational modeling of finite cladding and lossy coating effects in fibers [PB94-111085] p 2544 N94-23732

WAVE EQUATIONS

Classical scattering theory of waves from the view point of an eigenvalue problem and application to target identification [DE94-000472] p 2525 N94-23206

Multigrid and cyclic reduction applied to the Helmholtz equation p 2304 N94-23676

Similarity in wave propagation under a global relaxation law [PB94-111028] p 2524 N94-23730

Decomposition of multi-component measurements into P and S waves [ISBN-9-09-005197-X] p 2405 N94-25251

WAVE FRONT DEFORMATION

Sodium-layer laser guide stars [DE93-019621] p 2349 N94-23490

WAVE FRONTS

Spatiotemporal behavior and nonlinear dynamics in a phase conjugate resonator [NASA-CR-4567] p 2543 N94-23529

Convective instabilities in traveling fronts of addition polymerization p 2226 N94-24352

WAVE FUNCTIONS

Calculations of Bose-Einstein correlations from Relativistic Quantum Molecular Dynamics [DE94-000794] p 2569 N94-23453

Weak interactions in a bilocal chiral theory [DE93-616887] p 2539 N94-25477

WAVE GENERATION

On the physics of waves in the solar atmosphere: Wave heating and wind acceleration [NASA-CR-195197] p 2628 N94-25264

WAVE INTERACTION

Vortex generation and wave-vortex interaction over a concave plate with roughness and suction [NASA-CR-191589] p 2337 N94-24869

WAVE PROPAGATION

The characterization of reaction-convection-diffusion processes by travelling waves [MEMO-1111] p 2273 N94-22729

Ray and wave optics modeling of laboratory x ray lasers [DE93-019940] p 2541 N94-22868

Theoretical studies of wave propagation in multilayered piezoelectric media [DE93-040273] p 2371 N94-22872

Tracking sharp interface of two fluids by the CIP (Cubic-Interpolated Propagation) scheme [DE93-508322] p 2319 N94-23460

Shock-induced turbulent flow in baffle systems [DE94-001532] p 2319 N94-23470

Similarity in wave propagation under a global relaxation law [PB94-111028] p 2524 N94-23730

Analysis of time-domain acoustic wavefields in horizontally continuously layered configurations based on the modified Cagniard method [PB94-111044] p 2524 N94-23731

Generalized three-dimensional simulation of ferruled coupled-cavity traveling-wave-tube dispersion and impedance characteristics [NASA-TP-3389] p 2310 N94-24056

Radio communication and wave propagation. A visit to the Netherlands in December 1992 [PB93-204360] p 2297 N94-24531

Near-surface seismic imaging [PB94-119096] p 2404 N94-24647

Downward extrapolation of multi-component seismic data [ISBN-9-09-005213-5] p 2405 N94-25229

Decomposition of multi-component measurements into P and S waves [ISBN-9-09-005197-X] p 2405 N94-25251

A relativistic theory on wave propagation in inhomogeneous magnetoplasmas [ETN-94-95322] p 2554 N94-25285

Arbitrary-order numerical schemes for linear hyperbolic systems [CRANFIELD-AERO-9211] p 2523 N94-25480

WAVE SCATTERING

The effect of sub-surface volume scattering on the accuracy of ice-sheet altimeter retracking algorithms [NASA-CR-194825] p 2386 N94-24060

The scattering and collision of gravitational waves in Friedmann-Robertson-Walker open universes [MATHS-REPT-A-193] p 2406 N94-25430

WAVEGUIDE ANTENNAS

The Telecommunications and Data Acquisition Report [NASA-CR-194766] p 2290 N94-23256

Performance of the X-/Ka/KABLE-band dichroic plate in the DSS-13 beam waveguide antenna p 2291 N94-23261

Beam-waveguide antenna servo design issues for tracking low earth-orbiting satellites p 2292 N94-23268

WAVEGUIDE LASERS
Manufacturing and characterization of GaAs/AlGaAs multiple quantumwell ridge waveguide lasers
[EUT-92-E-265] p 2348 N94-23168
WAVEGUIDES
Generalized three-dimensional simulation of ferruled coupled-cavity traveling-wave-tube dispersion and impedance characteristics
[NASA-TP-3389] p 2310 N94-24056
A low noise 665 GHz SIS quasi-particle waveguide receiver
[NASA-CR-194735] p 2296 N94-24105
Total light loss optic spectroscopy: Progress towards a fiber optic Raman organic vapor sensor
[DE94-002545] p 2234 N94-24549
Temperature dependent performance of Coplanar Waveguide (CPW) on substrates of various materials
[NASA-TM-106505] p 2313 N94-25170
WAVELENGTH DIVISION MULTIPLEXING
Wide band fiber-optic communications
p 2304 N94-23231
WAVELET ANALYSIS
On the Daubechies-based wavelet differentiation matrix
[NASA-CR-191583] p 2479 N94-23090
System identification using a wavelet-based approach
[DE94-002191] p 2293 N94-23473
Wavelet multiresolution analyses adapted for the fast solution of boundary value ordinary differential equations
p 2485 N94-23691
On the differentiation matrix for Daubechies-based wavelets on an interval
[NASA-CR-191582] p 2487 N94-24291
Optical wavelet transform processor
[AD-A273625] p 2546 N94-24731
Edge detection using a complex wavelet
[AD-A273699] p 2493 N94-25452
WAVERIDERS
Design project: LONGBOW supersonic interceptor
[NASA-CR-195510] p 2180 N94-24581
Sabot high speed interceptor AE 4273 aircraft design
[NASA-CR-195495] p 2183 N94-24971
WEAK INTERACTIONS (FIELD THEORY)
Photon-photon collisions at the next linear collider: Theory
[DE93-041025] p 2534 N94-23803
New evaluation of hadronic contributions to the anomalous magnetic moment of charged leptons
[DE93-634394] p 2536 N94-24844
Weak interactions in a bilocal chiral theory
[DE93-616887] p 2539 N94-25477
WEAPON SYSTEMS
A qualified radiation hardened nonvolatile memory for space and tactical weapons applications
[DE94-001211] p 2559 N94-23186
Early manufacturing considerations in design
p 2177 N94-24315
WEAPONS DEVELOPMENT
Advanced Capability Exhaust Systems/Integrated Product Development for advanced nozzles (ACES/IPD)
[AD-A273209] p 2189 N94-24776
WEAR
New method for increasing machine service-life, phase 2
[PB93-200707] p 2354 N94-23533
A rail corrugation theory which allows for contact patch size p 2269 N94-23582
A linear model for corrugation and its limit of validity
p 2269 N94-23584
Surface analysis of corrugated rail treads
p 2270 N94-23587
Development of a theory of the wear of ceramics
[DE94-002773] p 2254 N94-23783
New tribocoating combination for vacuum operation
p 2355 N94-23990
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090
WEAR RESISTANCE
JBK-75 stainless steel machinability study
[DE94-002268] p 2242 N94-23475
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090
Development of high temperature liquid lubricants for low-heat rejection: Heavy duty diesel engines
[NASA-CR-191197] p 2258 N94-24753
A preliminary evaluation of the phosphazene resin PPZ
[AD-A273674] p 2263 N94-25410
WEAR TESTS
A colour image processing algorithm to identify copper-based particles in filter debris samples
[DREP-TM-93-19] p 2455 N94-24122
WEATHER
Cockpit weather graphics using mobile satellite communications p 2280 N94-22775
Aircraft accident report: In-flight engine separation. Japan Airlines, Inc., flight 46E, Boeing 747-121, N473EV, Anchorage, Alaska, 31 March 1993
[PB93-410407] p 2173 N94-24062
United States Weather Research Program (USWRP)
p 2411 N94-24375
Aviation Weather Program (AWP)
p 2411 N94-24380
ASR-9 microburst detection algorithm
[AD-A273591] p 2415 N94-24850
WEATHER FORECASTING
Urban/rural application of weather radar for flow forecasting. Proceedings of the Informal CEc -Workshop
[PB93-220135] p 2407 N94-23129
Lightning studies using LDAR and LLP data
p 2416 N94-23238
United States Weather Research Program (USWRP)
p 2411 N94-24375
Aviation Weather Program (AWP)
p 2411 N94-24380
Scientific goals of the Cooperative Multiscale Experiment (CME) p 2411 N94-24381
Examples of data assimilation in mesoscale models
p 2412 N94-24384
Session on validation of coupled models
p 2414 N94-24399
CAPE for CaPE p 2416 N94-24409
Modeling and data assimilation for Mars Observer
p 2620 N94-24889
Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992
[AD-A273400] p 2416 N94-25071
WEATHER MODIFICATION
NOAA Federal/State Cooperative Program in Atmospheric Modification Research. Collected publication titles and abstracts
[PB93-198125] p 2396 N94-22913
WEIBULL DENSITY FUNCTIONS
Durability evaluation of ceramic components using CARES/LIFE
[NASA-TM-106475] p 2258 N94-24682
WEIGHT ANALYSIS
NASA/USRA advanced design program
[NASA-CR-195548] p 2180 N94-24492
WEIGHT MEASUREMENT
Mass properties measurement system dynamics
p 2368 N94-23235
Mass properties measurement system: Dynamics and statics measurements p 2368 N94-23236
WEIGHT REDUCTION
NASA Lewis advanced IPV nickel-hydrogen technology p 2392 N94-23356
The mass of massive rover software
p 2464 N94-23410
WEIGHTING FUNCTIONS
Optimal gains for a single polar orbiting satellite
p 2208 N94-24873
The Casimir energy of the rigid string with massive ends
[DE93-616851] p 2492 N94-25338
WEIGHTLESSNESS
Response of an anchored annular cylindrical liquid layer to various axial excitations in zero-gravity
[LRT-WE-9-FB-3-1992] p 2266 N94-23195
Liquid oscillations in a spherical system with sliding edges boundary by two conical solid surfaces in zero-gravity
[LRT-WE-9-FB-5-1992] p 2318 N94-23197
Artificial gravity in space flight
[AD-A273420] p 2427 N94-24928
Loading, electromyograph, and motion during exercise
p 2427 N94-25359
Development of a model to assess orthostatic responses p 2427 N94-25376
WEIGHTLESSNESS SIMULATION
Design and testing of a unique randomized gravity, continuous flow bioreactor p 2423 N94-25368
WELD STRENGTH
Strength, acoustic evaluation and metallurgy of diffusion bonds
[DE94-001804] p 2243 N94-23717
Weldability of Accelerated-Cooled (AcC) high strength TMCP steel X80
[VTT-TIED-1413] p 2251 N94-25419
WELD TESTS
Plasma ARC keyhole welding of aluminum
[PB93-201606] p 2353 N94-23449
Use of photostress to characterize the mechanical behavior of weldments
[NASA-CR-195201] p 2378 N94-25267
WELDABILITY
Weldability of Accelerated-Cooled (AcC) high strength TMCP steel X80
[VTT-TIED-1413] p 2251 N94-25419
WELDED JOINTS
Plasma ARC keyhole welding of aluminum
[PB93-201606] p 2353 N94-23449
Strength, acoustic evaluation and metallurgy of diffusion bonds
[DE94-001804] p 2243 N94-23717
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies
p 2371 N94-24427
Microstructural analysis of the 2195 aluminum-lithium alloy welds p 2251 N94-24448
Use of photostress to characterize the mechanical behavior of weldments
[NASA-CR-195201] p 2378 N94-25267
Weldability of Accelerated-Cooled (AcC) high strength TMCP steel X80
[VTT-TIED-1413] p 2251 N94-25419
WELDING
New welding and finishing procedures
[DE94-602022] p 2352 N94-23025
Weld cladding of hard surfaces
[PB93-201598] p 2353 N94-23448
Microwelding due to random vibration
p 2359 N94-24019
Weld fracture criteria for computer simulation
p 2251 N94-24425
Microstructural analysis of the 2195 aluminum-lithium alloy welds p 2251 N94-24448
Welding of niobium to stainless
[DE94-003365] p 2365 N94-24614
The importance of properties in modeling
p 2246 N94-25121
WETTING
An analytic study of a two-phase laminar airfoil in simulated heavy rain p 2171 N94-23661
WHEAT
Chemical characterization of some aerobic liquids in CELSS p 2422 N94-23241
WHEELS
A rail corrugation theory which allows for contact patch size p 2269 N94-23582
Surface observations of stick-slip oscillations in tightly conformal wheel/rail contacts p 2270 N94-23588
WHISTLERS
Analysis and experiments of a whistler-wave plasma thruster
[DE94-001533] p 2209 N94-23012
WHITE NOISE
Nonlinear smoothing for random fields
[MEMO-1110] p 2493 N94-22728
Separable concatenated codes with iterative map decoding for Rician fading channels
p 2286 N94-22815
Coherence lost? Not-so-fast escapes from the in-phase attractor of a set of globally coupled nonlinear oscillators
[DE94-000799] p 2557 N94-22940
A mixed H2/H(infinity) function for a discrete time system
[MEMO-COSOR-92-36] p 2480 N94-23144
Detection and analysis of unbalanced QPSK in Gaussian noise, version 1.0
[DREO-12-020.1] p 2296 N94-24131
WICKS
Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe
[AD-A273830] p 2571 N94-25524
WIDEBAND COMMUNICATION
NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-194678] p 2571 N94-23230
Wide band fiber-optic communications
p 2304 N94-23231
Northern Exposure 1992: An investigation of transauroral HF radio skywave propagation
[AD-A273363] p 2303 N94-25089
WIENER HOPF EQUATIONS
Diffraction analysis of transient acoustic waves: Half-plane in a layered medium
[PB94-110988] p 2526 N94-23726
Wiener-Hopf factorization of rational matrix functions in terms of realizations: An alternative version
[ETN-94-95380] p 2491 N94-25245
WIGGLER MAGNETS
Properties of the transfer matrices of deflecting magnet systems for free electron laser
[DE93-508257] p 2347 N94-22922
Inverse free electron laser beat-wave accelerator research
[DE94-002597] p 2349 N94-23702
Compact free electron lasers for medical applications
[AD-A273609] p 2350 N94-24934

WIND (METEOROLOGY)
The AGRHYMET data communications project
p 2280 N94-22776
Implementation of a state of the art automated system for the production of cloud/water vapor motion winds from geostationary satellites
[NASA-CR-195087] p 2410 N94-24125
A diagnostic model to estimate winds and small-scale drag from Mars Observer PMIRR data
p 2617 N94-24874
Analyzing Martian winds and tracer concentrations using Mars Observer data p 2619 N94-24883
Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap
p 2621 N94-24895
Wind climate and urban geometry
[ISBN-9-03-860132-8] p 2416 N94-25261
WIND DIRECTION
Combined 1991 and 1992 Robinson-22B (R-22) parking test results
[AD-A273550] p 2193 N94-24559
WIND EFFECTS
CAPE for CaPE p 2416 N94-24409
WIND MEASUREMENT
A field evaluation of remote sensor measurements of wind, temperature, and moisture for ARM integrated sounding system research
[DE94-000565] p 2381 N94-23001
WIND PROFILES
Implementation and evaluation of the new wind algorithm in NASA's 50 MHz doppler radar wind profiler
[NASA-CR-194880] p 2408 N94-23576
CAPE for CaPE p 2416 N94-24409
Analyzing Martian winds and tracer concentrations using Mars Observer data p 2619 N94-24883
WIND SHEAR
ASR-9 microburst detection algorithm
[AD-A273591] p 2415 N94-24850
WIND TUNNEL APPARATUS
Doppler global velocimetry: Development of a flight research instrumentation system for application to non-intrusive measurements of the flow field
[NASA-CR-191490] p 2344 N94-24360
WIND TUNNEL CALIBRATION
Improved pressure measurement system for calibration of the NASA LeRC 10x10 supersonic wind tunnel
[NASA-TM-106470] p 2344 N94-24362
WIND TUNNEL MODELS
Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545
WIND TUNNEL STABILITY TESTS
Supersonic aerodynamic characteristics of a circular body Earth-to-Orbit vehicle
[NASA-TM-4533] p 2170 N94-24716
WIND TUNNEL TESTS
An experimental study of the flow field surrounding a subsonic jet in a cross flow
[NASA-CR-194770] p 2317 N94-23072
Summary of lift and lift/cruise fan powered lift concept technology
[NASA-CR-177619] p 2176 N94-23489
Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545
Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion
[NASA-TM-109681] p 2167 N94-23975
Lift augmentation on a delta wing via leading edge fences and the Gurney flap
[NASA-CR-194793] p 2168 N94-24103
Vortical structure in a forced plane mixing layer
p 2331 N94-24162
Local isotropy in distorted turbulent boundary layers at high Reynolds number p 2332 N94-24166
An experimental investigation of a Mach 3.0 high-speed civil transport at supersonic speeds
[NASA-TP-3365] p 2169 N94-24311
Aerodynamic characteristics and pressure distributions for an executive-jet baseline airfoil section
[NASA-TM-4529] p 2169 N94-24586
Wind tunnel test of a variable-diameter tiltrotor (VDTR) model
[NASA-CR-177629] p 2181 N94-24796
Measurements of the influence of integral length scale on stagnation region heat transfer
[NASA-TM-106503] p 2338 N94-25183
Measurement of the volume mass by spontaneous Raman scattering. Study of turbulent fluctuations of mixing in a subsonic free jet. Measurements in supersonic wind tunnels
[ISL-R-102/92] p 2339 N94-25462
Off-design performance of crenulated blades in a linear compressor cascade
[AD-A273744] p 2340 N94-25534
WIND TUNNELS
Automatic pressure control system for the Wright Laboratory Compressor Research Facility
[AD-A273827] p 2194 N94-25522
WIND TURBINES
A review of the Workshop on Fatigue Life Methodologies for Wind Turbines
[DE94-002039] p 2394 N94-23472
Control algorithms for effective operation of variable-speed wind turbines
[DE94-002607] p 2394 N94-23704
WIND VELOCITY
VIERS-1, phase 3
[BCRS-92-24] p 2381 N94-23145
Control algorithms for effective operation of variable-speed wind turbines
[DE94-002607] p 2394 N94-23704
Comparison between 1-minute and 15-minute averages of turbulence parameters p 2528 N94-24218
A nighttime structure model of atmospheric optical turbulence, c2(n), derived from thermosonde and high resolution rawinsonde measurements
[AD-A273803] p 2406 N94-25537
WIND VELOCITY MEASUREMENT
Implementation and evaluation of the new wind algorithm in NASA's 50 MHz doppler radar wind profiler
[NASA-CR-194880] p 2408 N94-23576
Implementation of a state of the art automated system for the production of cloud/water vapor motion winds from geostationary satellites
[NASA-CR-195087] p 2410 N94-24125
WINDOWS (COMPUTER PROGRAMS)
XRTD: An X-Windows based, real-time radiometric display and analysis system p 2305 N94-23922
Interoperability through standardization: Electronic mail, and X Window systems p 2575 N94-24406
Horatio: Libraries for vision applications, release 2.0
[OUEL-1967/92] p 2593 N94-25326
WINDS ALOFT
Mesospheric and lower thermospheric winds, temperatures densities, and volume emission rates
[NASA-CR-195147] p 2403 N94-24486
WINDSHIELDS
Cockpit/NVG visual integration issues
p 2432 N94-23983
Birdstrike resistant crew enclosure program
[AD-A273700] p 2463 N94-25453
WING FLAPS
Aircraft wing structural detail design (wing, aileron, flaps, and subsystems)
[NASA-CR-195487] p 2183 N94-24974
WING NACELLE CONFIGURATIONS
An experimental investigation of a Mach 3.0 high-speed civil transport at supersonic speeds
[NASA-TP-3365] p 2169 N94-24311
WING PLANFORMS
The Triton: Design concepts and methods
[NASA-CR-195542] p 2184 N94-25004
WING PROFILES
The Gold Rush: A simulated commercial air transportation study
[NASA-CR-195528] p 2184 N94-25002
WING TIPS
Bent-tip blade for aircraft rotary-wing
[CA-PATENT-1-315-259] p 2176 N94-23254
Toward modeling wingtip vortices
p 2171 N94-24142
WINGS
An experimental investigation of the effect of upper surface blowing on dynamic stall
[NASA-CR-194863] p 2165 N94-22894
POISs3: A 3D poisson smoother of structured grids
[PB93-226231] p 2318 N94-23115
Leading-edge votex-system details obtained on F-106B aircraft using a rotating vapor screen and surface techniques
[NASA-TP-3374] p 2166 N94-23512
LinAir: A multi-element discrete vortex Weissinger aerodynamic prediction method
[NASA-TM-108786] p 2167 N94-23557
Aircraft wing structure detail design
[NASA-CR-195485] p 2180 N94-24498
Aircraft wing structural detail design (wing, aileron, flaps, and subsystems)
[NASA-CR-195487] p 2183 N94-24974
WIRE
Wear reduction in ceramic bearings by surface generated pyrolytic carbon continuously replenished by ethylene gas
[NASA-CR-189214] p 2364 N94-24090
A vibrating wire parallel to a type 2 superconducting slab of arbitrary thickness
[DE93-617134] p 2525 N94-25389
Effects of a vibrating wire carrying DC current on a moving type 2 superconducting slab of arbitrary thickness
[DE93-617136] p 2566 N94-25391
WIRE CLOTH
Electrical performance of wire mesh for spacecraft deployable reflector antennas p 2275 N94-22744
WIRELESS COMMUNICATION
Odyssey personal communications satellite system
p 2282 N94-22787
Reduced cost alternatives to premise wiring using ATM and microcellular technologies p 2314 N94-23239
WIRING
NASA/ASEE Summer Faculty Fellowship Program
[NASA-CR-194678] p 2571 N94-23230
Reduced cost alternatives to premise wiring using ATM and microcellular technologies p 2314 N94-23239
A review of wiring system safety in space power systems
[NASA-CR-194439] p 2203 N94-23632
Lightning tests and analyses of tunnel bond straps and shielded cables on the Space Shuttle solid rocket booster
[NASA-CR-193921] p 2200 N94-24801
WORKING FLUIDS
Enhanced absorption cycle computer model
[DE94-001997] p 2271 N94-23793
Weld joint concepts for on-orbit repair of Space Station Freedom fluid system tube assemblies
p 2371 N94-24427
WORKLOADS (PSYCHOPHYSIOLOGY)
Investigation of time and intensity effects in operator workload and performance
[CTN-94-60927] p 2433 N94-24171
Pilot evaluation system p 2158 N94-24266
An examination of the operational error database for air route traffic control centers
[DOT/FAA/AM-93/22] p 2175 N94-24472
New Advances in Mission Planning and Rehearsal Systems
[AGARD-LS-192] p 2521 N94-25008
Human factors of mission planning systems: Theory and concepts p 2521 N94-25010
Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505
WORKSTATIONS
Deployable video conference table
[NASA-CASE-ARC-11950-1] p 2192 N94-23310
The Automated Instrumentation and Monitoring System (AIMS) reference manual
[NASA-TM-108795] p 2452 N94-23510
Customizing graphical user interface technology for spacecraft control centers p 2510 N94-23905
High performance, low cost, self-contained, multipurpose PC based ground systems
p 2516 N94-23943
CADBIT 2: Computer-aided design for built-in test, volume 1
[AD-A273702] p 2463 N94-25455
CADBIT 2: Computer-aided design for built-in test, volume 2
[AD-A273703] p 2463 N94-25456
Engineering workstation: Sensor modeling
p 2441 N94-25500

X

X RAY ABSORPTION
Applications of x ray absorption fine structure to the in situ study of the effect of cobalt in nickel hydrous oxide electrodes for fuel cells and rechargeable batteries
p 2391 N94-23347
In situ and ex situ spectroelectrochemical and x ray absorption studies on rechargeable, chemically-modified and other MnO2 materials
[DE94-001387] p 2234 N94-24545
X RAY ANALYSIS
Phase transformations in Cu-Zr multilayers
[DE94-000393] p 2241 N94-23297
Evaluation of ovostatin and ovostatin assay
p 2422 N94-24437
X RAY ASTRONOMY
Excitation of XUV radiation in solar flares
[NASA-CR-193703] p 2627 N94-24094
Shocked clouds in the Cygnus Loop
[NASA-CR-195190] p 2600 N94-25178
Investigation relative to the Roentgen Satellite (ROSAT)
[NASA-CR-195192] p 2600 N94-25269
X RAY ASTROPHYSICS FACILITY
Advanced X ray Astrophysics Facility-Imaging (AXAF-I) thermal analyses using Integrated Thermal Analysis System (ITAS) program p 2320 N94-23635

SAO mission support software and data standards, version 1.0
[NASA-CR-193906] p 2454 N94-24050

X RAY BINARIES
Flux measurements using the BATSE spectroscopic detectors p 2580 N94-24435
ROSAT observations of the x ray binary HD 154791
[NASA-CR-195189] p 2600 N94-25198

X RAY DENSITY MEASUREMENT
Engine materials characterization and damage monitoring by using x ray technologies
[NASA-TP-3328] p 2372 N94-24074

X RAY DETECTORS
Characterization of CCD-based imaging x ray detectors for diffraction experiments
[DE93-041343] p 2556 N94-22921

X RAY DIFFRACTION
Characterization of CCD-based imaging x ray detectors for diffraction experiments
[DE93-041343] p 2556 N94-22921
Application of maximum entropy and irreducible cluster integrals to joint probability distributions for x ray structure determination
[PB93-224152] p 2559 N94-23109
Modifications to 8x8 dynamical theory: Polarizations redefined according to x ray diffraction convention
[DE94-001290] p 2560 N94-23187
Proposed additions to the SHADOW ray-tracing code for general-asymmetric perfect-crystal optics
[DE94-001291] p 2560 N94-23188
Demonstration of the feasibility of an integrated x ray laboratory for planetary exploration
[NASA-CR-177631] p 2598 N94-24832
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072
X ray diffraction analysis of electrodeposited beta-tantalum
[AD-A273254] p 2249 N94-25142

X RAY FLUORESCENCE
Demonstration of the feasibility of an integrated x ray laboratory for planetary exploration
[NASA-CR-177631] p 2598 N94-24832

X RAY IMAGERY
Requirements for future solar-physics missions with x ray instrumentation p 2625 N94-22849

X RAY INSPECTION
Engine materials characterization and damage monitoring by using x ray technologies
[NASA-TP-3328] p 2372 N94-24074
An evaluation of Compton scatter imaging using COMSCAN
[DREP-TM-93-38] p 2372 N94-24136

X RAY LASERS
Characterization of germanium stripe x ray lasers
[DE93-019629] p 2347 N94-22867
Ray and wave optics modeling of laboratory x ray lasers
[DE93-019940] p 2541 N94-22868
Inertial confinement fusion
[DE94-002602] p 2551 N94-23703
Excitation mechanisms for XUV and x ray lasers
[DE93-617006] p 2351 N94-25482

X RAY OPTICS
Ray and wave optics modeling of laboratory x ray lasers
[DE93-019940] p 2541 N94-22868
Theoretical investigation of variable periodicity (graded) multilayers for hard x ray applications
[NASA-CR-194824] p 2543 N94-23502
Germanium x ray phase plates for the production of circularly polarized x rays
[DE94-002908] p 2545 N94-24550
Investigate zero-stress replicated optics
[NASA-CR-193889] p 2545 N94-24665
Soft x ray optics by pulsed laser deposition
[NASA-CR-195139] p 2546 N94-24967

X RAY SCATTERING
Thermal phase behavior of metal surfaces: X-ray scattering studies of Pt(001)
[DE94-002991] p 2245 N94-24612

X RAY SOURCES
The soft x ray halo of the spiral galaxy NGC4631
[NASA-CR-194820] p 2601 N94-23537
X ray simulator theory support
[AD-A273613] p 2553 N94-24949
Investigation relative to the Roentgen Satellite (ROSAT)
[NASA-CR-195192] p 2600 N94-25269

X RAY SPECTRA
High-resolution soft x ray photoionization studies of selected molecules
[DE94-000568] p 2532 N94-23002
1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192

X RAY SPECTROSCOPY
Requirements for future solar-physics missions with x ray instrumentation p 2625 N94-22849
Imaging XUV spectroscopy of a Z-pinch plasma in the former Soviet Union
[DE93-040849] p 2549 N94-22949
Investigate zero-stress replicated optics
[NASA-CR-193889] p 2545 N94-24665
LPCVD of InN on GaAs(110) using HN3 and TMIn: Comparison with Si(100) results
[AD-A273555] p 2235 N94-24917
The structure and catalytic properties of supported platinum catalysts
[ETN-94-95357] p 2236 N94-25250

X RAY TIMING EXPLORER
The H(sub infinity) optimal controller design and reduction for the inertial hold mode of the attitude control system of the XTE spacecraft
[NASA-CR-195137] p 2366 N94-24846

X RAYS
IPP Prague Contributions to the IAEA Technical Committee Meeting on Research Using Small Tokamaks
[IPPCZ-329] p 2551 N94-24293
High energy collimating fine grids for HESP program
[NASA-CR-189317] p 2209 N94-24767
Nonequilibria in thermal emission from supernova remnants
[NIFS-264] p 2602 N94-24866
X ray enhancement of SN 1987A due to interaction with its ring-like nebula
[NIFS-265] p 2602 N94-24867
High precision x ray lithographic masks
[AD-A273342] p 2346 N94-25154
Excitation mechanisms for XUV and x ray lasers
[DE93-617006] p 2351 N94-25482

XENON
Contamination control and plume assessment of low-energy thrusters
[NASA-TM-104585] p 2218 N94-23343
Power console development for NASA's electric propulsion outreach program
[NASA-TM-106428] p 2218 N94-23372
Performance evaluation of the Russian SPT-100 thruster at NASA LeRC
[NASA-TM-106401] p 2219 N94-23630
Performance of the NASA cm ion thruster
[NASA-TM-106426] p 2221 N94-24770

XENON CHLORIDE LASERS
Microwave excitation of pulsed high pressure gas discharge lasers
[DLR-FB-93-12] p 2351 N94-25304

Y

YAG LASERS
Investigation of the optical and laser properties of Tm and Ho in YAG anf YLF
[REPT-94-001] p 2563 N94-24404
Progress toward ultra-stable lasers for use in space
[NASA-TM-109678] p 2349 N94-24488

YANG-MILLS THEORY
On BRST quantization of constrained systems
[ETN-94-95386] p 2570 N94-25258

YBCO SUPERCONDUCTORS
Anisotropic uniaxial pressure effects in YBa2Cu3O(7-delta)
[DE94-001456] p 2557 N94-22929
Processing of YBCO superconductors for improved levitation force
[DE94-001326] p 2559 N94-22994
Conductors with small Fermi energies and small gap energies
[DE93-040887] p 2561 N94-23432
Spectroscopic IR ellipsometry of 100 and 001 oriented YBa2Cu3O(7-delta) films
[PB93-201481] p 2561 N94-23445
Investigation and application of microwave electron cyclotron resonance plasma physical vapour deposition
[DE93-613909] p 2555 N94-25333
Critical currents in YBaCuO-ceramics
[DE93-617140] p 2263 N94-25404

YEAST
Design and testing of a unique randomized gravity, continuous flow bioreactor p 2423 N94-25368

YIELD
Setting test limits under prescribed consumer loss
[MEMO-1107] p 2478 N94-22725

YIELD STRENGTH
Relationship of microstructure and mechanical properties for V-Cr-Ti alloys
[DE94-001431] p 2238 N94-22718
Effect of neutron irradiation on tensile properties of V-Cr-Ti alloys
[DE94-001433] p 2240 N94-23194
Use of photostress to characterize the mechanical behavior of weldments
[NASA-CR-195201] p 2378 N94-25267

YLF LASERS
Investigation of the optical and laser properties of Tm and Ho in YAG anf YLF
[REPT-94-001] p 2563 N94-24404

YTTRIA-STABILIZED ZIRCONIA
Combustion synthesis and engineering of nanoparticles for electronic, structural and superconductor applications
[DE94-001865] p 2254 N94-23720
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072

YTTRIUM ALLOYS
New extensions in the development of deformation processed metal-metal matrix composites
[DE94-000692] p 2227 N94-23004

YTTRIUM COMPOUNDS
Influences of nitrogen absorption on the magnetic properties of YFe2, YFe3 and Y6Fe23
[REPT-A-2654] p 2564 N94-24958

YTTRIUM OXIDES
Processing of YBCO superconductors for improved levitation force
[DE94-001326] p 2559 N94-22994
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072

YTTRIUM-ALUMINUM GARNET
Excited state dynamics of thulium ions in yttrium aluminum garnets
[NASA-CR-195159] p 2564 N94-25024

YUKAWA POTENTIAL
Stitching the Yukawa quilt
[PB93-204477] p 2569 N94-24532
On the transverse size of a fast moving nucleon
[DE93-616891] p 2539 N94-25481

Z

ZETA PINCH
Imaging XUV spectroscopy of a Z-pinch plasma in the former Soviet Union
[DE93-040849] p 2549 N94-22949
Computer modeling of plasma flow switches-high current switching on Procyon
[DE93-040189] p 2311 N94-24500
X ray simulator theory support
[AD-A273613] p 2553 N94-24949

ZINC
Integrated hydrometallurgical jarosite treatment
[PB93-217990] p 2232 N94-22983
Magnetic resonance study of zinc-related defects in silicon with optimized EPR spectrometer
[PB93-224640] p 2561 N94-23223
Evaluation of inorganic zinc-rich primers using Electrochemical Impedance Spectroscopy (EIS)
p 2237 N94-23233
The effects of zinc borate addition on the flammability characteristics of polyester, vinyl ester, and epoxy glass reinforced plastics
[AD-A273164] p 2262 N94-25136

ZINC COATINGS
Evaluation of inorganic zinc-rich primers using Electrochemical Impedance Spectroscopy (EIS)
p 2237 N94-23233

ZIRCONIUM ALLOYS
Phase transformations in Cu-Zr multilayers
[DE94-000393] p 2241 N94-23297

ZIRCONIUM OXIDES
An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072

ZONAL FLOW (METEOROLOGY)
Diagnostic calculations of the circulation in the Martian atmosphere p 2622 N94-24898

PERSONAL AUTHOR INDEX

Typical Personal Author Index Listing

ALEXOPOULOS, JIM S. .... p 436 N94-12023

PERSONAL AUTHOR
PAGE NUMBER
ACCESSION NUMBER

Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

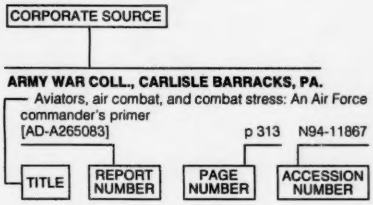
CORPORATE SOURCE INDEX

Typical Corporate Source Index Listing



ARMY WAR COLL., CARLISLE BARRACKS, PA.
Aviators, air combat, and combat stress: An Air Force commander's primer
[AD-A265083] p 313 N94-11867

Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

ABLE ENGINEERING CO., INC., SANTA BARBARA, CA.
A novel rotary actuator for spacecraft
p 2361 N94-24034

ACADEMIA SINICA, BEIJING (CHINA).
LHCD (low hybrid current drive) experiment on the HT-6B tokamak
[DE93-613720] p 2555 N94-25331
Activities of Academia Sinica
[DE93-614529] p 2541 N94-25335

ACADEMY OF SCIENCES (USSR), ALMA-ATA.
Nearly uniform deployment/retrieval strategy for space tether systems p 2156 N94-24256

ACADEMY OF SCIENCES (USSR), MOSCOW.
Solar physics and the Coronas project
p 2625 N94-22847
Mars 96 small rover: Mission strategy
p 2606 N94-23381
Mars 96 rover: Science, instrumentation, and control
p 2369 N94-23395
Balloon experiments at Mars 96 project
p 2608 N94-23396
Results of the Mojave tests of the Mars 96 rover
p 2370 N94-23416
Mars 96 rover: Technical vision and navigation
p 2370 N94-23417

ACADEMY OF SCIENCES (USSR), SAINT PETERSBURG.
Soviet developments of planet rovers in period of 1964 - 1990 p 2369 N94-23374
Machines for moving in soil p 2369 N94-23411
Marsohkod movement control p 2370 N94-23418
Perspective of creation of means for collecting information concerning transport situation
p 2370 N94-23420

ACOUSTICAL SOCIETY OF AMERICA, NEW YORK, NY.
US tag for ISO/TC 108 mechanical vibration and shock: Minutes of the accredited Standards Committee on Mechanical Vibration and Shock, S2
[AD-A273015] p 2376 N94-23789

ADVANCED RESEARCH AND APPLICATIONS CORP., SUNNYVALE, CA.
Demonstration of the feasibility of an integrated x ray laboratory for planetary exploration
[NASA-CR-177631] p 2598 N94-24832

ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).
Cardiopulmonary Aspects in Aerospace Medicine
[AGARD-LS-189] p 2423 N94-23313
Visual Problems in Night Operations
[AGARD-LS-187] p 2431 N94-23976
Aircraft flight safety: A bibliography
[AGARD-R-805] p 2173 N94-24091
Introduction of Ceramics into Aerospace Structural Composites
[AGARD-R-795] p 2255 N94-24228
Integrated Airframe Design Technology
[AGARD-R-794] p 2177 N94-24313
New Advances in Mission Planning and Rehearsal Systems
[AGARD-LS-192] p 2521 N94-25008

AERO-DESIGN AND DEVELOPMENT LTD., REHOVOTH (ISRAEL).
Aerodynamic models for performance calculations of modern technology propellers p 2161 N94-24285

AEROJET-GENERAL CORP., AZUSA, CA.
Earth Observing System (EOS) Advanced Microwave Sounding Unit-A (AMSU-A) schedule plan
[NASA-CR-194856] p 2585 N94-23563

AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
Proceedings of Workshop on Laser Diagnostics in Fluid Mechanics and Combustion
[AD-A272808] p 2347 N94-22914

AEROSPACE CORP., EL SEGUNDO, CA.
Optical spin polarization and state-sensitive detection of a cesium atomic beam
[ATR-92(8436)-1] p 2534 N94-24077

AEROSPACE MEDICAL RESEARCH LABS., BROOKS AFB, TX.
Artificial gravity in space flight
[AD-A273420] p 2427 N94-24928

AEROSPACE MEDICAL RESEARCH LABS., WILLIAMS AFB, AZ.
Night operations p 2431 N94-23977
Night vision goggle illusions and visual training
p 2432 N94-23984

AEROSPACE MEDICAL RESEARCH LABS., WRIGHT-PATTERSON AFB, OH.
Night vision devices and characteristics
p 2432 N94-23982
Cockpit/NVG visual integration issues
p 2432 N94-23983

AEROSPATIALE, CANNES (FRANCE).
Rover: Autonomous concepts for Mars exploration
p 2369 N94-23400
Data relay system satellite: The development of an antenna pointing mechanism for the inter-orbit link antenna p 2359 N94-24015

AI SIGNAL RESEARCH, INC., HUNTSVILLE, AL.
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-195128] p 2388 N94-24827
Develop advanced nonlinear signal analysis topographical mapping system
[NASA-CR-194785] p 2389 N94-24856

AIR FORCE FLIGHT DYNAMICS LAB., WRIGHT-PATTERSON AFB, OH.
Nonlinear equations of motion for a panel subject to external loads
[AD-A273142] p 2170 N94-24773

AIR FORCE FLIGHT TEST CENTER, EDWARDS AFB, CA.
Analysis of the effects of wake passage on heat transfer in a linear turbine cascade
[AD-A273729] p 2339 N94-25446

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OH.
Transient studies of capillary-induced flow
p 2325 N94-23662
Third Annual Foreign Acquisitions Workshop: Improving Access to Foreign Gray Literature
[NASA-TM-109683] p 2593 N94-24759
Infrared fluorescence studies of electronic-to-vibrational energy transfer in a Br2:NO system
[AD-A273727] p 2539 N94-25443
The effects of optical feedback on polarization of vertical cavity surface emitting lasers
[AD-A273728] p 2351 N94-25445
Analysis and characteristics of compressor stall precursor signals in forward and AFT swept high speed compressor
[AD-A273820] p 2171 N94-25517
Solving the ranking and selection indifference-zone formulation for normal distributions using computer software
[AD-A273821] p 2496 N94-25518
Experimental characterization of the AFIT Neutron Facility
[AD-A273822] p 2539 N94-25519
Numerical analysis of the motion of a rigid body with an attached spring-mass-damper
[AD-A273825] p 2379 N94-25520
Diffusion in electronegative discharges with magnetic fields
[AD-A273826] p 2304 N94-25521
Automatic pressure control system for the Wright Laboratory Compressor Research Facility
[AD-A273827] p 2194 N94-25522
Modeling of a large undamped space structure using time domain techniques
[AD-A273828] p 2206 N94-25523
Effect of longitudinal vibration on the capillary limit of a wrapped screen wick copper/water heat pipe
[AD-A273830] p 2571 N94-25524
Flight controller design using mixed H2/H infinity optimization with a singular H infinity constraint
[AD-A273831] p 2191 N94-25525
Steady motions of rigid body satellites in a central gravitational field
[AD-A273742] p 2206 N94-25532
A theoretical investigation of electrically tunable birefringent optical filters as the special discriminator in hyperspectral imaging systems
[AD-A273743] p 2547 N94-25533
Off-design performance of crenulated blades in a linear compressor cascade
[AD-A273744] p 2340 N94-25534
Shielded Coil Electrodynamic Propulsion (SCEP). A feasibility study
[AD-A273824] p 2314 N94-25539

AIR FORCE MATERIALS LAB., WRIGHT-PATTERSON AFB, OH.
Aircraft digital flight control technical review
p 2163 N94-25106

AIR FORCE OFFICE OF SCIENTIFIC RESEARCH, BOLLING AFB, WASHINGTON, DC.
Research interests and broad agency announcement 94-1 of the Air Force Office of Scientific Research
[AD-A273410] p 2632 N94-25075

Quasiconformal mappings, operators on Hilbert space, and local formulae for characteristic classes [PB93-238079] p 2488 N94-24536

Stable non-Gaussian diffusive profiles [PB93-238053] p 2489 N94-24610

INSTITUT FRANCO-ALLEMAND DE RECHERCHES, SAINT-LOUIS (FRANCE).

Computation of the loads on the AH-1/OLS model rotor in forward flight and comparison with wind tunnel tests [ISL-CO-230/92] p 2176 N94-23146

A new experimental apparatus for the study of the unsteady flowfield over an airfoil in pitching and heaving motions using laser Doppler anemometry [ISL-CO-229/92] p 2165 N94-23149

Interferometry in rarefied gas flows [ISL-CO-207/92] p 2318 N94-23160

LDA measurements of the unsteady near wake behind an airfoil undergoing transient and periodic pitching motions [ISL-CO-215/92] p 2165 N94-23161

Real-time holographic endoscopy [ISL-CO-203/92] p 2343 N94-24054

JAPE 91: Influence of terrain masking of the acoustic propagation of helicopter noise p 2528 N94-24214

Validation of the ROTAC code for the rotor noise prediction [PB93-204311] p 2529 N94-24514

The ISL rotor bench [ISL-R-108/92] p 2185 N94-25301

Study of a system for producing a pulsed magnetic field (B 2T) with a frequency of 50 Hz [ISL-N-601/92] p 2314 N94-25460

Detailed description of two calculation programs for incompressible, steady state boundary layer flows, applied to determine the aerodynamic characteristics of NACA12 and OA312 foils at low Reynolds numbers [ISL-N-604/92] p 2171 N94-25461

Measurement of the volume mass by spontaneous Raman scattering. Study of turbulent fluctuations of mixing in a subsonic free jet. Measurements in supersonic wind tunnels [ISL-R-102/92] p 2339 N94-25462

Study of the blade/vortex interaction: Acoustics, aerodynamics and models [ISL-R-104/92] p 2340 N94-25463

INSTITUT NATIONAL DE RECHERCHE D'INFORMATIQUE ET D'AUTOMATIQUE, VALBONNE (FRANCE).

Preliminary results on time-varying feedback stabilization of a nonholonomic car-like mobile robot [INRIA-RR-1512] p 2475 N94-24963

INSTITUT NATIONAL DES SCIENCES APPLIQUEES, LYON (FRANCE).

Role of interfaces on the cyclic fatigue behaviour of ceramic matrix composites p 2256 N94-24234

INSTITUT NATIONAL DES SCIENCES APPLIQUEES DE LYON, VILLEURBANNE (FRANCE).

Damage under monotonic or cyclic loads of new AlSiFe alloys prepared by the Osprey (tm) process [ISAL-93-0008] p 2239 N94-22972

Contribution to the interface micromechanical study and to the damage fundamental phenomena in glass fiber epoxy resin model composites [ISAL-93-0027] p 2227 N94-23133

INSTITUT NATIONAL POLYTECHNIQUE, GRENOBLE (FRANCE).

Motion planning for a non-holonomic mobile in a dynamic workspace [ETN-94-95180] p 2470 N94-22898

Verification of synchronous sequential numerical material systems: Application of the LUSTRE language and of the LESAR verification tool [ETN-94-95181] p 2447 N94-22899

Resolution of Markov models on distributed memory machines [ETN-94-95182] p 2444 N94-22900

Design of integrated architectures for low level image processing [ETN-94-95183] p 2445 N94-22901

Modeling parallelism and synchronization [ETN-94-95179] p 2465 N94-23134

Logic synthesis on programmable networks [ETN-94-95174] p 2449 N94-23151

Installation of an artificial neural network on distributed memory microprocessors [ETN-94-95175] p 2471 N94-23152

Contribution to the evaluation of efficiency of a microprocessor functional test [ETN-94-95176] p 2445 N94-23153

AMICAL: An aid for architectural synthesis and exploration of control circuits [ETN-94-95177] p 2308 N94-23154

A type declarative system for PROLOG [ETN-94-95178] p 2449 N94-23155

Generation of modules for control communication circuits: A design study used in the framework of the safe vehicle PROMETHEUS [ETN-94-95171] p 2308 N94-23165

Structures of tetrahedrization: A mathematical and algorithmical point of view [ETN-94-95172] p 2480 N94-23166

A parallel PROLOG system for distributed memory multiprocessor [ETN-94-95173] p 2465 N94-23167

INSTITUTE FOR AEROSPACE RESEARCH, OTTAWA (ONTARIO).

A prediction method for the compressive strength of impact damaged composite laminates [CTN-94-60925] p 2229 N94-24137

INSTITUTE FOR COMPUTER APPLICATIONS IN SCIENCE AND ENGINEERING, HAMPTON, VA.

Flames in dusty mixtures: Their structure and stability [NASA-CR-191567] p 2317 N94-23089

On the Daubechies-based wavelet differentiation matrix [NASA-CR-191583] p 2479 N94-23090

Dynamic data distributions in Vienna Fortran [NASA-CR-191575] p 2448 N94-23092

The theoretical accuracy of Runge-Kutta time discretizations for the initial boundary value problem: A careful study of the boundary error [NASA-CR-191561] p 2480 N94-23272

On the Gibbs phenomenon 3: Recovering exponential accuracy in a sub-interval from a spectral partial sum of a piecewise analytic function [NASA-CR-191560] p 2480 N94-23278

A representation for the turbulent mass flux contribution to Reynolds-stress and two-equation closures for compressible turbulence [NASA-CR-191569] p 2319 N94-23302

Phased-mission system analysis using Boolean algebraic methods [NASA-CR-191564] p 2451 N94-23340

Automated parallelization of timed Petri-net simulations [NASA-CR-191574] p 2451 N94-23341

Experience with parametric binary dissection [NASA-CR-191552] p 2473 N94-23558

On the differentiation matrix for Daubechies-based wavelets on an interval [NASA-CR-191582] p 2487 N94-24291

The acoustic and instability waves of jets confined inside an acoustically lined rectangular duct [NASA-CR-191586] p 2334 N94-24602

Responses of a finite baffled plate subject to turbulent and mean flow excitations [NASA-CR-191570] p 2334 N94-24605

Fast simulation of packet loss rates in a shared buffer communications switch [NASA-CR-191556] p 2457 N94-24638

Runtime support and compilation methods for user-specified data distributions [NASA-CR-191587] p 2458 N94-24679

A comparison of approximate interval estimators for the Bernoulli parameter [NASA-CR-191585] p 2458 N94-24680

Carrying the mass flux terms exactly in the first and second moment equations of compressible turbulence [NASA-CR-191568] p 2335 N94-24712

An integrated runtime and compile-time approach for parallelizing structured and block structured applications [NASA-CR-191554] p 2458 N94-24740

Projection techniques for iterative solution of A(bar x) equals (bar b) with successive right-hand sides [NASA-CR-191571] p 2490 N94-24836

Vortex generation and wave-vortex interaction over a concave plate with roughness and suction [NASA-CR-191589] p 2337 N94-24869

Triangular spectral elements for incompressible fluid flow [NASA-CR-191588] p 2490 N94-24914

Research in progress and other activities of the Institute for Computer Applications in Science and Engineering [NASA-CR-191576] p 2444 N94-25090

LinAir: A multi-element discrete vortex Weissinger aerodynamic prediction method [NASA-TM-108786] p 2167 N94-23557

A review of European applications of artificial intelligence to space [NASA-TM-108789] p 2453 N94-23568

Exercise, exercise training, and the immune system. A compendium of research (1902-1991) [NASA-TM-108778] p 2426 N94-23575

Constraint-based scheduling p 2510 N94-23904

Reducing video frame rate increases remote optimal focus time [NASA-TM-104018] p 2431 N94-23970

Evaluation of visual acuity with Gen 3 night vision goggles [NASA-TM-108792] p 2431 N94-23974

Compressibility effects on dynamic stall of airfoils undergoing rapid transient pitching motion [NASA-TM-109681] p 2167 N94-23975

Autogenic-feedback training: A potential treatment for post-flight orthostatic intolerance in aerospace crews [NASA-TM-108785] p 2426 N94-24102

Investigation of the asymptotic state of rotating turbulence using large-eddy simulation p 2330 N94-24152

On streak spacing in wall-bounded turbulent flows p 2331 N94-24159

Transition to turbulence in an elliptic vortex p 2331 N94-24161

Factors affecting the identification of phytoplankton groups by means of remote sensing [NASA-TM-108799] p 2387 N94-24403

The evolution of energy-transducing systems. Studies with an extremely halophilic archaebacterium [NASA-CR-193803] p 2422 N94-24807

The evolution of energy-transducing systems. Studies with archaebacteria [NASA-CR-195129] p 2422 N94-24811

Impact of the CO2 and H2O clouds of the Martian polar hood on the polar energy balance p 2618 N94-24880

Multiannual simulations with the Mars climate model p 2618 N94-24881

Regarding tracer transport in Mars' winter atmosphere in the presence of nearly stationary, forced planetary waves p 2618 N94-24882

Dust transport in the Martian atmosphere p 2621 N94-24894

The role of atmospheric heat transport in the seasonal carbon dioxide cycle p 2621 N94-24896

Vertical transport of water in the Martian boundary layer p 2622 N94-24902

The Mars Aerial Platform (MAP) mission p 2622 N94-24903

Effect of an extendable slat on the stall behavior of a VR-12 airfoil [NASA-TP-3407] p 2171 N94-25187

Conflict-free trajectory planning for air traffic control automation [NASA-TM-108790] p 2174 N94-25272

Proceedings of the Workshop on Augmented Visual Display (AVID) Research [NASA-CP-10128] p 2439 N94-25490

Application of aircraft navigation sensors to enhanced vision systems p 2176 N94-25495

Engineering workstation: Sensor modeling p 2441 N94-25500

Image fusion p 2441 N94-25501

Expansion-based passive ranging p 2176 N94-25504

Multiple-camera/motion stereoscopy for range estimation in helicopter flight p 2441 N94-25505

Validation of vision-based range estimation algorithms using helicopter flight data p 2442 N94-25506

DCT quantization matrices visually optimized for individual images p 2442 N94-25509

Extracting heading and temporal range from optic flow: Human performance issues p 2442 N94-25510

Optical information in landing scenes p 2442 N94-25511

Sensor fusion display evaluation using information integration models in enhanced/synthetic vision applications p 2443 N94-25512

Quality metrics for sensor images p 2443 N94-25513

Evaluation of image quality p 2443 N94-25514

Power console development for NASA's electric propulsion outreach program
[NASA-TM-106428] p 2218 N94-23372

Electrical power technology for robotic planetary rovers p 2314 N94-23401

Refraction of high frequency noise in an arbitrary jet flow
[NASA-TM-106465] p 2525 N94-23464

Measurements and modeling of flow structure in the wake of a low profile wishbone vortex generator
[NASA-TM-106468] p 2166 N94-23465

Transient Ejector Analysis (TEA) code user's guide
[NASA-TM-106310] p 2186 N94-23466

Characterization and durability testing of plasma-sprayed zirconia-yttria and hafnia-yttria thermal barrier coatings. Part 2: Effect of spray parameters on the performance of several hafnia-yttria and zirconia-yttria coatings
[NASA-TP-3296] p 2242 N94-23467

Theoretical considerations for Reaction-Formed Silicon Carbide (RFSC) formation by molten silicon infiltration into slurry-derived preforms
[NASA-TM-106414] p 2222 N94-23500

Characteristics of surface roughness associated with leading edge ice accretion
[NASA-TM-106459] p 2166 N94-23522

Close-up analysis of inflight ice accretion
[NASA-TM-106457] p 2172 N94-23523

The use of transition region characteristics to improve the numerical simulation of heat transfer in bypass transitional flows
[NASA-TM-106445] p 2320 N94-23525

Investigation of a subsonic-arc-attachment thruster using segmented anodes
[NASA-TM-106419] p 2219 N94-23531

Holographic testing of composite propfans for a cruise missile wind tunnel model
[NASA-TM-105271] p 2187 N94-23545

Characterization of the microstructure of Nb-1wt.%Zr-0.1wt.%C tubes as affected by thermomechanical processing
[NASA-TM-106381] p 2242 N94-23550

Material data representation of hysteresis loops for Hastelloy X using artificial neural networks
[NASA-TM-105990] p 2376 N94-23551

An implicit numerical scheme for the simulation of internal viscous flows on unstructured grids
[NASA-TM-106437] p 2481 N94-23554

Effect of hydrogen exposure on a Cu-8 Cr-4 Nb alloy
[NASA-TM-106429] p 2243 N94-23556

Bibliography of Lewis Research Center technical publications announced in 1992
[NASA-TM-106035] p 2590 N94-23562

Fault tolerant onboard packet switch architecture for communication satellites: Shared memory per beam approach
[NASA-TM-106397] p 2201 N94-23567

Multilayer relaxation and surface structure of ordered alloys
[NASA-TM-106433] p 2243 N94-23578

A method to remove intercalates from bromine and iodine intercalated carbon fibers
[NASA-TM-106443] p 2222 N94-23591

Effect of delta tabs on mixing and axis switching in jets from asymmetric nozzles
[NASA-TM-106450] p 2167 N94-23592

Optimization of orifice geometry for cross-flow mixing in a cylindrical duct
[NASA-TM-106436] p 2481 N94-23593

Performance evaluation of the Russian SPT-100 thruster at NASA LeRC
[NASA-TM-106401] p 2219 N94-23630

The Fifth Annual Thermal and Fluids Analysis Workshop
[NASA-CP-10122] p 2320 N94-23634

A comparison of TSS and TRASYS in form factor calculation p 2321 N94-23638

Utilization of recently developed codes for high power Brayton and Rankine cycle power systems
p 2222 N94-23641

A comparative study of computational solutions to flow over a backward-facing step p 2326 N94-23670

Method and apparatus for producing a thermal atomic oxygen beam
[NASA-CASE-LEW-15614-1] p 2534 N94-23825

High temperature, oxidation resistant noble metal-Al alloy thermocouple
[NASA-CASE-LEW-15515-1] p 2343 N94-23826

Rime-, mixed- and glaze-ice evaluations of three scaling laws
[NASA-TM-106461] p 2173 N94-24047

Generalized three-dimensional simulation of ferruled coupled-cavity traveling-wave-tube dispersion and impedance characteristics
[NASA-TP-3389] p 2310 N94-24056

Reliability in second moment turbulence closures revisited
[NASA-TM-106469] p 2326 N94-24063

Miniature convection cooled plug-type heat flux gauges
[NASA-TM-106483] p 2344 N94-24069

A solar photovoltaic power system for use in Antarctica
[NASA-TM-106417] p 2395 N94-24071

Engine materials characterization and damage monitoring by using x ray technologies
[NASA-TP-3328] p 2372 N94-24074

CFD assessment of orifice aspect ratio and mass flow ratio on jet mixing in rectangular ducts
[NASA-TM-106434] p 2187 N94-24082

Evaluation of turbulence models in the PARC code for transonic diffuser flows
[NASA-TM-106391] p 2168 N94-24084

Roles, uses, and benefits of general aviation aircraft in aerospace engineering education
[NASA-TM-106463] p 2153 N94-24100

Integration and test of high-speed transmitter electronics for free-space laser communications
[NASA-TM-106295] p 2295 N94-24101

Discrete sensitivity derivatives of the Navier-Stokes equations with a parallel Krylov solver
[NASA-TM-106481] p 2265 N94-24301

Controllability of free-piston Stirling engine/linear alternator driving a dynamic load
[NASA-TM-106497] p 2521 N94-24302

Spatial frequency multiplier with active linearly tapered slot antenna array
[NASA-TM-106494] p 2310 N94-24308

Probabilistic simulation of concurrent engineering of propulsion systems p 2177 N94-24317

Multi-disciplinary coupling for integrated design of propulsion systems p 2179 N94-24326

Ethylene trace-gas techniques for high-speed flows
[NASA-TM-106491] p 2169 N94-24335

Center for modeling of turbulence and transition: Research briefs, 1993
[NASA-TM-106383] p 2333 N94-24336

Improved pressure measurement system for calibration of the NASA LeRC 10x10 supersonic wind tunnel
[NASA-TM-106470] p 2344 N94-24362

Workshop on Computational Turbulence Modeling
[NASA-CP-10130] p 2333 N94-24460

Stagnation region heat transfer: The influence of turbulence parameters, Reynolds number and body shape
[NASA-TM-106504] p 2334 N94-24481

Optimal Space Station solar array gimbal angle determination via radial basis function neural networks
[NASA-TM-106482] p 2195 N94-24482

Application of fault detection techniques to spiral bevel gear fatigue data
[NASA-TM-106467] p 2364 N94-24483

Mixing characteristics of directly opposed rows of jets injected normal to a crossflow in a rectangular duct
[NASA-TM-106477] p 2188 N94-24594

Power generation technology options for a Mars mission
[NASA-TM-106451] p 2220 N94-24681

Durability evaluation of ceramic components using CARES/LIFE
[NASA-TM-106475] p 2258 N94-24682

A vorticity dynamics based model for the turbulent dissipation: Model development and validation
[NASA-TM-106177] p 2336 N94-24713

Elevated temperature crack propagation
[NASA-TM-106490] p 2377 N94-24715

Preliminary far-field plume sputtering characterization of the Stationary Plasma Thruster (SPT-100)
[NASA-TM-106464] p 2221 N94-24766

Performance of the NASA cm ion thruster
[NASA-TM-106426] p 2221 N94-24770

Thermal control system for Space Station Freedom photovoltaic power module
[NASA-TM-105650] p 2205 N94-24825

Merits and limitations of optimality criteria method for structural optimization
[NASA-TP-3373] p 2378 N94-24845

Bounds and simulation results of 32-ary and 64-ary quadrature amplitude modulation for broadband-ISDN via satellite
[NASA-TM-106484] p 2202 N94-25095

VLSI-based video event triggering for image data compression
[NASA-TM-106500] p 2345 N94-25116

Turbulence models and Reynolds analogy for two-dimensional supersonic compression ramp flow
[NASA-TM-106474] p 2337 N94-25119

Workshop on the Thermophysical Properties of Molten Materials
[NASA-CP-10121] p 2246 N94-25120

Temperature dependent performance of Coplanar Waveguide (CPW) on substrates of various materials
[NASA-TM-106505] p 2313 N94-25170

Structure and energetics of high index Fe, Al, Cu and Ni surfaces using equivalent crystal theory

Evolving recurrent perceptrons
[AD-A273241] p 2496 N94-24778

Evolving neural network connectivity
[AD-A273134] p 2490 N94-24921

Determining neural network hidden layer size using evolutionary programming
[AD-A273242] p 2475 N94-25139

Active control of oscillatory lift forces on a circular cylinder
[AD-A273243] p 2338 N94-25140

NAVAL MEDICAL RESEARCH INST., BETHESDA, MD.

A statistical analysis of recent Naval Experimental Diving Unit (NEDU) single-depth human exposures to 100 percent oxygen at pressure
[AD-A273488] p 2427 N94-24950

NAVAL POSTGRADUATE SCHOOL, MONTEREY, CA.

Multigrid methods for a semilinear PDE in the theory of pseudoplastic fluids p 2341 N94-23689

An analysis of traditional operational testing to project how testing will be conducted in the future
[AD-A273189] p 2372 N94-24553

A simulation and evaluation of NATO Standardization Agreement (STANAG) 4214
[AD-A273195] p 2297 N94-24554

An automated tool to facilitate code translation for software fault tree analysis
[AD-A273205] p 2457 N94-24556

Design project: LONGBOW supersonic interceptor
[NASA-CR-195510] p 2180 N94-24581

NPS alternate techsat satellite, design project for AE-4871
[NASA-CR-195512] p 2204 N94-24590

Comparison of HF groundwave propagation models
[AD-A273146] p 2299 N94-24668

Simulation of adjacent channel interference in a UHF satellite system
[AD-A273147] p 2299 N94-24669

Mitigation of EMI/RFI produced by a 1.2 kW uninterruptible power supply
[AD-A273149] p 2299 N94-24670

SEMATECH, a case study: Analysis of a government-industry partnership
[AD-A273166] p 2586 N94-24683

An investigation of requirements traceability to support systems development
[AD-A273167] p 2458 N94-24684

Crosstalk analysis of synchronous and asynchronous optical chip interconnects with direct detection
[AD-A273261] p 2311 N94-24685

Free-surface/vorticity interaction
[AD-A273263] p 2335 N94-24686

A numerical study of airplanes flying in proximity
[AD-A273373] p 2173 N94-24718

Evaluation of the UH-1N instrument panel
[AD-A273145] p 2186 N94-24774

A methodology for software cost estimation using machine learning techniques
[AD-A273158] p 2459 N94-24775

Information systems strategy in air transport
[AD-A273125] p 2173 N94-24781

Conceptual design proposal: HUGO global range/mobility transport aircraft
[NASA-CR-195501] p 2181 N94-24787

Near Earth asteroid rendezvous
[NASA-CR-195518] p 2195 N94-24808

Object recognition through image understanding for an autonomous mobile robot
[AD-A273206] p 2475 N94-24862

Dumbo heavy lifter aircraft
[NASA-CR-195500] p 2182 N94-24915

Parametric uncertainty reduction in robust multivariable control
[AD-A273412] p 2460 N94-24927

Sabot high speed interceptor AE 4273 aircraft design
[NASA-CR-195495] p 2183 N94-24971

Observed and Navy operational global model climatologies of synoptic disturbances over the tropical western Pacific during winter 1991-1992
[AD-A273400] p 2416 N94-25071

An x ray diffraction investigation of alpha-Al2O2 addition to Yttria Stabilized Zirconia (YSZ) thermal barrier coatings subject to destabilizing vanadium pentoxide (V2O5) exposure
[AD-A273403] p 2261 N94-25072

Reengineering real-time software systems
[AD-A273408] p 2461 N94-25074

An implementation of the REpresentation and MAintenance of Process knowledge (REMAP) model in the knowledge-based software assistant concept demonstration system
[AD-A273207] p 2461 N94-25138
An exploratory stochastic model for toxic effects on cells
[AD-A273438] p 2422 N94-25146

NAVAL RESEARCH LAB., WASHINGTON, DC.
Measurements and modeling of multitone, low-frequency acoustic data from the Arraial do Cabo range
[AD-A273406] p 2530 N94-25073
Northern Exposure 1992: An investigation of transauroral HF radio skywave propagation
[AD-A273363] p 2303 N94-25089
An AVHRR cloud classification database typed by experts
[AD-A273560] p 2416 N94-25162

NAVAL SURFACE WARFARE CENTER, DAHLGREN, VA.
State-of-the-art engineering aeroprediction methods with emphasis on new semiempirical techniques for predicting nonlinear aerodynamics on complete missile configurations
[AD-A273680] p 2171 N94-25411

NEBRASKA UNIV., LINCOLN.
A constrained joint source/channel coder design and vector quantization of nonstationary sources
[NASA-CR-195145] p 2301 N94-24707

NEBRASKA UNIV., OMAHA.
Investigation of hand capabilities under a variety of performance conditions and an attempt to explain performance differences p 2444 N94-25354

NEVADA UNIV., RENO.
Second law analysis of a conventional steam power plant p 2322 N94-23646

NEW BRUNSWICK UNIV., FREDERICTON.
An investigation into acceleration determination for airborne gravimetry using the global positioning system
[ISBN-0-315-59470-5] p 2175 N94-24176
A constrained optimization technique for arbitrary antenna arrays and various performance indices
[ISBN-0-315-59455-1] p 2297 N94-24179

NEW ENERGY AND INDUSTRIAL TECHNOLOGY DEVELOPMENT ORGANIZATION, TOKYO (JAPAN).
Feasibility study on a CO2 global recycling system using natural energy

p 2357 N94-24000
Solid state synthesis of Fe-B-Si alloys
[VTT-PUBS-118] p 2250 N94-25316
Use of scanning tunneling microscope in corrosion studies
[VTT-TIED-1416] p 2250 N94-25346
Dual-purpose RTOF diffractometer facility at the ET-RR-1 reactor
[VTT-TIED-1425] p 2566 N94-25347
Constitutive modelling of fiber-reinforced concrete under uniaxial tensile loading
[VTT-JULK-774] p 2379 N94-25385
Alternatives for reinforcement: Fiber composites
[VTT-TIED-1412] p 2230 N94-25386
Hydride thermodynamic machines
[VTT-JULK-768] p 2571 N94-25416
Metal hydride storage
[VTT-JULK-769] p 2396 N94-25417
Strength and life of pressure vessels subjected to impacts and thermomechanical GFRP loading
[VTT-JULK-771] p 2379 N94-25418
Weldability of Accelerated-Cooled (AcC) high strength TMCP steel X80
[VTT-TIED-1413] p 2251 N94-25419
Composites and textile reinforcement
[VTT-TIED-1424] p 2231 N94-25420
Frost effects on the microstructure of high strength concrete, and methods for their analysis
[VTT-PUBS-126] p 2379 N94-25529

TECHNICAL UNIV. OF DENMARK, LYNGBY.
Reburning rich-lean kinetics
[PB93-220887] p 2232 N94-23100

TECHNION - ISRAEL INST. OF TECH., HAIFA.
Enhanced absorption cycle computer model
[DE94-001997] p 2271 N94-23793
Stability of hypersonic flow of a detonable gas mixture in the stagnation region of a blunt body and a forward facing step p 2154 N94-24248
Thrust vectoring theory, laboratory and flight tests
p 2155 N94-24251
Design considerations of hybrid rockets
p 2156 N94-24254
Satellite autonomous navigation and orbit determination using magnetometers p 2156 N94-24258
Decentralized autonomous attitude determination using an inertially stabilized payload p 2157 N94-24264
Maximum likelihood modal parameter identification and realization of stochastic systems p 2157 N94-24265
Failure-proof estimation under conditions of lack of information p 2158 N94-24267
Modelling the ignition of boron/titanium particles
p 2159 N94-24273
On the stability of the process of formation of combustion generated particles by coagulation and simultaneous shrinkage due to particle oxidation p 2159 N94-24274
Experimental investigation of ignition of boron/titanium composite particles p 2159 N94-24275
Mean stress models for low cycle fatigue of a nickel-base superalloy p 2159 N94-24276
Vibrations of variable cross section Timoshenko beams p 2160 N94-24279
Global dynamic stability of a shallow arch by poincare-like simple cell mapping p 2160 N94-24280
Inverse dynamics of a rigid rod system as a simplified model of flexible beam p 2160 N94-24281
Transient phenomena in laminar spray combustion
p 2160 N94-24282
Effect of initial droplet-size distributions on fuel-vapor profiles in a shear-layer flow p 2160 N94-24283

Multiple flames in counterflow spray combustion p 2161 N94-24284
The influence of elastic pitch variations on helicopter flight mechanics p 2161 N94-24286
Continuous gust response and sensitivity derivatives using state-space models p 2161 N94-24287
TECHNISCHE HOCHSCHULE, AACHEN (GERMANY).
Measurement of kinematically unstationary separated flows p 2315 N94-22854
TECHNISCHE HOGESCHOOL, DELFT (NETHERLANDS).
Nested Krylov methods and preserving the orthogonality p 2483 N94-23681
TECHNISCHE HOGESCHOOL, TWENTE (NETHERLANDS).
Compressible turbulent flow simulation with a multigrid multiblock method p 2342 N94-23694
TECHNISCHE HOGESCHOOL TWENTE, ENSCHEDE (NETHERLANDS).
Relational algebra and equational proofs [PB94-110822] p 2486 N94-23724
Multi-set extended relational algebra: A formal approach to a practical issue [PB94-110830] p 2486 N94-23725
Mean-value of product-form stochastic Petri net models of slotted-ring systems [PB94-110871] p 2494 N94-23749
Micro SIL-1 simulator [PB94-110889] p 2454 N94-23750
Advanced design concepts for open distributed systems development [PB94-110897] p 2454 N94-23751
Design and implementation issues of end-to-end protocols in high-speed networks [PB94-110905] p 2467 N94-23752
Non-trivial examples of real isolated singularity at the origin [PB94-110939] p 2487 N94-23787
Concepts and techniques for an active database approach to office procedure support [PB94-110749] p 2590 N94-23816
TECHNISCHE PHYSISCHE DIENST TNO-TH, DELFT (NETHERLANDS).
The pre-development of the Aristoteles calibration mechanism p 2209 N94-24006
TECHNISCHE UNIV., BERLIN (GERMANY).
Experimental Methods in Separated Flows [ILR-MITT-260(1991)] p 2315 N94-22852
Pressure oscillation measurements in turbulent flows p 2316 N94-22855
The use of near-wall hot-wire probes for time-resolved skin-friction measurements p 2316 N94-22857
Image processing for acquisition of fluid rest time in the running of an artificial heart valve p 2316 N94-22858
Rail Corrugations [ILR-BER-59] p 2269 N94-23581
A linear model for corrugation and its limit of validity p 2269 N94-23584
Wear characteristics of technical dry rolling/sliding systems with relations to corrugation problems p 2269 N94-23586
Surface analysis of corrugated rail treads p 2270 N94-23587
Contact analysis of rough rail surfaces p 2270 N94-23589
TECHNISCHE UNIV., BRUNSWICK (GERMANY).
Lateral high frequency oscillations and stability of a wheel rolling on a flexible track p 2269 N94-23585
TECHNISCHE UNIV., DELFT (NETHERLANDS).
Plan generation for flexible assembly systems [PB93-217974] p 2267 N94-22981
Particle formation in a laser-heated aerosol reactor. Application to silicon and silicon nitride synthesis [PB93-217982] p 2347 N94-22982
Integrated hydrometallurgical jarosite treatment [PB93-217990] p 2232 N94-22983
Shell buckling research at Delft, 1976 - 1992 [PB93-224442] p 2375 N94-23221
Diffraction analysis of transient acoustic waves: Half-plane in a layered medium [PB94-110988] p 2526 N94-23726
Compatibility relations and the finite-element formulation of electromagnetic field problems [PB94-110996] p 2294 N94-23727
Study of a local absorbing boundary condition for the modeling of an infinite external domain in the time-domain finite-element package FEMAXT [PB94-111002] p 2294 N94-23728
Electromagnetic scattering by inhomogeneous objects. Solution methods based upon reciprocity theorems of time-convolution and time-correlation type [PB94-111010] p 2294 N94-23729
Similarity in wave propagation under a global relaxation law [PB94-111028] p 2524 N94-23730
Analysis of time-domain acoustic wavefields in horizontally continuously layered configurations based on the modified Cagniard method [PB94-111044] p 2524 N94-23731
Analysis for the computational modeling of finite cladding and lossy coating effects in fibers [PB94-111085] p 2544 N94-23732
FEMAX finite-element package for computing three-dimensional time-domain electromagnetic fields in inhomogeneous media [PB94-111093] p 2294 N94-23733
Efficient interpolation of velocity and flux components defined on 2- and 3-dimensional non-cartesian grids [PB94-118619] p 2486 N94-23757
Logarithm of probability measures and infinite divisibility of sub-stable random vectors [PB94-118627] p 2486 N94-23758
Reaction of isocyanates with carboxylic acids and its application to polymer synthesis [PB94-118858] p 2254 N94-23763
Particle size measurement for the control of industrial crystallizers [PB94-119104] p 2562 N94-23766
Polynomials orthogonal with respect to an inner product involving differences [PB94-110731] p 2489 N94-24572
Time-domain analysis of conduction and displacement current distributions in inhomogeneous and anisotropic layered media [PB94-111036] p 2403 N94-24592
Edge elements, their advantages and disadvantages [PB94-111069] p 2298 N94-24593
Finite-element modelling of three-dimensional electromagnetic fields using edge and nodal elements [PB94-111077] p 2298 N94-24597
Hydraulics and morphology of mountain rivers: A literature survey. Communications on hydraulic and geotechnical engineering [PB94-110772] p 2388 N94-24636
Finite-element method for computing three-dimensional electromagnetic fields in inhomogeneous media (1993) [PB94-111101] p 2298 N94-24637
Solution of the discretized incompressible Navier-Stokes equations with iterative methods [PB94-118635] p 2335 N94-24641
World processor: An interface for textual display and manipulation in virtual reality [PB94-118643] p 2592 N94-24642
Stability analysis of anisotropic conical shells [PB94-119054] p 2377 N94-24645
RITL: An information system for application reuse-in-the-large [PB94-119088] p 2592 N94-24646
Near-surface seismic imaging [PB94-119096] p 2404 N94-24647
Pre-design study of a general purpose vehicle simulator platform [PB93-215366] p 2193 N94-24739
Buckling of circular cylindrical shells subjected to combined loads (axial compression, normal pressure, bending and transverse shear loading) [PB93-215358] p 2378 N94-24745
Mechanisms of droplet formation [ISBN-9-06-275765-0] p 2338 N94-25227
Microscopic dynamics in dense helium-neon mixtures: Neutron scattering, kinetic theory and computer simulations [ISBN-9-07-386105-5] p 2537 N94-25228
Downward extrapolation of multi-component seismic data [ISBN-9-09-005213-5] p 2405 N94-25229
Decomposition of multi-component measurements into P and S waves [ISBN-9-09-005197-X] p 2405 N94-25251
On chain coding of line drawings [ISBN-9-06-275778-2] p 2462 N94-25252
On the characterization and optimization of high-speed silicon bipolar transistors [ETN-94-95367] p 2313 N94-25253
Hydrodynamics of stirred gas-liquid dispersions [ETN-94-95368] p 2339 N94-25254
Mesoscopic phenomena in metallic point contacts [ETN-94-95371] p 2313 N94-25286
Coherent structures over grooved surfaces [ETN-94-95308] p 2339 N94-25291
TECHNISCHE UNIV., EINDHOVEN (NETHERLANDS).
Algorithms for speech coding systems based on linear prediction [EUT-92-E-260] p 2447 N94-22731
Electromagnetic field strength prediction in an urban environment: A useful tool for the planning of LMSS p 2283 N94-22795
Identification for robust control using an H(sub infinity) norm [EUT-92-E-261] p 2470 N94-22873
Laser linewidth measurement in the presence of RIN and using the recirculating self heterodyne method [EUT-92-E-262] p 2347 N94-22874
Rigorous analysis of thick microstrip antennas and wire antennas embedded in a substrate [EUT-92-E-263] p 2290 N94-22876
The adaptive resonance theory network: (Clustering-) behaviour in relation with brainstem auditory evoked potential patterns [EUT-92-E-264] p 2470 N94-22877
Multidisciplinary specification and design of microelectronics in products [EUT-93-E-269] p 2308 N94-23136
On the asymptotically uniform distribution modulo 1 of extreme order statistics [MEMO-COSOR-91-38-REV] p 2493 N94-23142
On non-informativeness in a classical Bayesian inference problem [MEMO-COSOR-92-35] p 2494 N94-23143
A mixed H2/H(infinity) function for a discrete time system [MEMO-COSOR-92-33] p 2480 N94-23144
Manufacturing and characterization of GaAs/AlGaAs multiple quantumwell ridge waveguide lasers [EUT-92-E-265] p 2348 N94-23168
Using genetic algorithms for scheduling data flow graphs [EUT-92-E-266] p 2449 N94-23169
A method for the general simultaneous full decomposition of sequential machines: Algorithms and implementation [EUT-92-E-267] p 2445 N94-23170
An optical ASK and FSK phase diversity transmission system [EUT-92-E-268] p 2542 N94-23171
PROGRIL: A language for the definition of protocol grammars [EUT-93-E-270] p 2449 N94-23172
Code generation for the attribute evaluator of the protocol engine grammar processor unit [EUT-93-E-271] p 2450 N94-23173
Flue gas cleaning by pulse corona streamer [EUT-93-E-272] p 2268 N94-23174
Note on the use of spherical vectorfields in Clifford analysis [PB93-237667] p 2480 N94-23437
Mathematical addenda to Hopper's model of plane stokes flow driven by capillarity on a free surface [PB93-237691] p 2480 N94-23438
Stability behavior of systems obtained by index-reduction [PB93-237709] p 2481 N94-23439
Limiting distribution of fractional parts of extreme order statistics [PB93-237733] p 2494 N94-23440
Linear time algorithm to schedule trees with communication delays optimally on two machines [PB93-237782] p 2451 N94-23441
Characterizations of shift-invariant distributions based on summation modulo one [PB93-237824] p 2481 N94-23442
Differential algebraic equations [PB93-237618] p 2481 N94-23455
Bayesian decision theory with imprecise prior probabilities applied to replacement problems [PB93-237634] p 2481 N94-23456
Systems engineering: A formal approach. Part 1: System concepts [PB93-225308] p 2268 N94-23476
Subset selection for the best of two populations: Tables of the expected subset size [PB93-237857] p 2494 N94-23546
Preemptive scheduling in a two-stage multiprocessor flow shop is Np-hard [PB94-111648] p 2467 N94-23756
Three, four, five, six or the complexity of scheduling with communication delays [PB94-111630] p 2467 N94-23767
Exercises in multiprogramming [PB94-101458] p 2454 N94-23768
Review of a variational method applied to magnetoelastic buckling problems [PB94-111184] p 2562 N94-23769
Maximal type test statistics based on conditional processes [PB94-111614] p 2494 N94-23771
Decision making with imprecise probabilities [PB94-111622] p 2494 N94-23772
Asymptotic confidence intervals for the length of the shortt under random censoring [PB93-237816] p 2494 N94-23774
Subset selection with a generalized selection goal based on a loss function [PB94-111192] p 2494 N94-23798
Some generalized subset selection procedures [PB94-111655] p 2487 N94-23799

Infinite divisible and stable distributions modulo 1
[PB94-110640] p 2495 N94-23815
Typechecker for bijective pure type systems
[PB94-110814] p 2454 N94-23817
Systems engineering: A formal approach. Part 4: Analysis methods
[PB94-101417] p 2271 N94-24475
Tail processes under heavy random censorship with applications
[PB94-110632] p 2495 N94-24508
Systems engineering: A formal approach. Part 3: Modeling methods
[PB94-101409] p 2456 N94-24513
Sequential composition, action prefixes and process prefix
[PB94-101433] p 2488 N94-24539
Real-time process logic
[PB94-101441] p 2446 N94-24540
Discrete-time H(infinity) control problem with strictly proper measurement feedback
[NASA-CR-195089] p 2473 N94-24542
Probabilistic methods in problems of applied analysis
[PB94-110681] p 2495 N94-24571
Conservation equations for reacting gas flow
[PB94-111168] p 2334 N94-24574
Some maximality results for effect-valued measures
[PB94-111176] p 2569 N94-24575
Squaring-down and the problems of almost-zeros for continuous-time systems
[PB93-237758] p 2489 N94-24608
Discrete time minimum entropy H(infinity) control problem
[PB93-237808] p 2474 N94-24609
Systems engineering: A formal approach. Part 2: Frameworks
[PB94-101391] p 2489 N94-24615
Controlled invariance of nonlinear systems: Nonexact forms speak louder than exact forms
[PB93-237790] p 2475 N94-24755
BEM solution for the simulation of axisymmetric viscous sintering
[PB93-237717] p 2336 N94-24761
Genericity of stabilizability for time-delay systems
[PB93-237725] p 2475 N94-24762
Efficiency of subset selection of an epsilon-best uniform population relative to selection of the best one
[PB93-237741] p 2490 N94-24763
Sensitivity analysis of list scheduling heuristics
[PB93-237766] p 2468 N94-24764
Class of strong valid inequalities for the discrete iot-sizing and scheduling problem
[PB93-237774] p 2459 N94-24765
Characteristic method for one-dimensional scalar hyperbolic conservation laws with stiff source terms
[PB93-237675] p 2491 N94-24954
Quantum tunneling transport of electrons in double-barrier heterostructures: Theory and modeling
[ETN-94-95332] p 2565 N94-25059
The influence of flow type, particle type and gravity on orthokinetic coagulation
[ETN-94-95333] p 2267 N94-25060
Generalized linear mixed models and their application in plant breeding research
[ETN-94-95335] p 2460 N94-25061
The design of the EMPS multiprocessor executive for distributed computing
[ETN-94-95336] p 2468 N94-25062
Binary block codes for correcting asymmetric or unidirectional errors
[ETN-94-95337] p 2460 N94-25063
The increase of the controllability of production organizations
[ISBN-9-03-860161-1] p 2586 N94-25076
Psychophysical and signal-processing aspects of speech representation
[ETN-94-95292] p 2302 N94-25077
The measurement of the film thickness and the roughness deformation of lubricated elastomers
[ETN-94-95293] p 2261 N94-25078
Algebraic-geometric codes and their decoding algorithms
[ETN-94-95294] p 2491 N94-25079
Area-power-delay trade-off in logic synthesis
[ISBN-9-09-005332-8] p 2461 N94-25080
Special signature schemes
[ETN-94-95296] p 2446 N94-25081
Computer simulation of low energy scattering
[ETN-94-95326] p 2537 N94-25082
PLANET: A hierarchical network simulator
[ISBN-9-09-005693-9] p 2313 N94-25083
The reaction mechanism of W-CVD in Si
[ETN-94-95329] p 2261 N94-25084
The evolution of the laser: A systems perspective on science, technology and society
[ETN-94-95319] p 2351 N94-25218
Understanding and facilitating discovery learning in computer-based simulation environment
[ISBN-9-03-860242-1] p 2462 N94-25219
Some subjects in digital audio, noise shaping, sample rate conversion, dynamic range compression and testing
[ISBN-9-09-005162-7] p 2530 N94-25220
Multiprocessor scheduling with communication delays
[ETN-94-95346] p 2468 N94-25221
The nanostructure of multilayered films: A NMR study
[ETN-94-95347] p 2262 N94-25222
Soil pollution at former industrial sites, the heritage of 150 years of industrial development in Noord-Brabant, The Netherlands
[ISBN-9-09-005758-7] p 2400 N94-25223
Practical evaluation of robust control for a class of nonlinear mechanical dynamic systems
[ISBN-9-03-860092-5] p 2475 N94-25224
Microstructure of styrene methyl methacrylate copolymers grafted onto polybutadiene seeds
[ETN-94-95360] p 2262 N94-25225
Models of trace theory systems
[ETN-94-95361] p 2468 N94-25226
Electrophoresis in open capillaries: Some fundamental aspects
[ETN-94-95290] p 2236 N94-25232
Capillary electrophoresis of biomolecules: Theory, instrumentation and applications
[ETN-94-95297] p 2236 N94-25233
On the quality of synthetic speech evaluation and improvements
[ETN-94-95298] p 2304 N94-25234
Production control and demand management in capacitated flow process industries
[ISBN-9-03-860211-1] p 2586 N94-25235
Particle nucleation and growth in butadiene emulsion polymerization
[ETN-94-95300] p 2262 N94-25236
Designs with a small number of runs for factorial experiments
[ISBN-9-03-860162-X] p 2462 N94-25237
On the mechanism of action of 3',5'-cyclic adenosine monophosphate: A study of four- and five-coordinated phosphorus compounds, modelling the activated state of cAMP
[ISBN-9-03-860222-7] p 2226 N94-25238
Ultracold atoms in traps and fountains
[ETN-94-95325] p 2537 N94-25239
Intramultiplet mixing for Ne(**)(3p)+He at superthermal energies
[ETN-94-95327] p 2538 N94-25240
Excitation balances and transport in an inductively coupled plasma
[ETN-94-95330] p 2554 N94-25241
Metallic multilayers: Experimental investigation of magnetic anisotropy and magnetic interlayer coupling
[ETN-94-95364] p 2250 N94-25242
The hydrodynamics of a moving fluid-liquid contact line
[ETN-94-95352] p 2339 N94-25247
Decay of swirl in turbulent pipe flows
[ETN-94-95353] p 2339 N94-25248
Design of gas bearing systems for precision applications
[ISBN-9-03-860112-3] p 2367 N94-25249
The structure and catalytic properties of supported platinum catalysts
[ETN-94-95357] p 2236 N94-25250
Wind climate and urban geometry
[ISBN-9-03-860132-8] p 2416 N94-25261
MIMO system identification for H(infinity) robust control: A frequency domain approach with minimum error bounds
[ETN-94-95354] p 2476 N94-25262
From circuit to signal: Development of a piecewise linear simulator
[ISBN-9-09-005713-7] p 2462 N94-25263
Introduction to a behavioral approach for continuous time systems
[ETN-94-95301] p 2492 N94-25277
Designing parallel programs of parameterized granularity
[ETN-94-95302] p 2468 N94-25278
Relevant costs or full costs? Explaining why managers use capacity cost allocations for short term decisions
[ISBN-9-06-215364-X] p 2587 N94-25279
Tunnelling in metallic contacts on high-T(c) superconductors: A story of charge carriers in YBa2Cu3O(7-delta) and Bi2CaSr2Cu2O(8+delta)
[ISBN-9-03-860142-5] p 2565 N94-25280
Preparation and properties of translucent gamma-aluminium oxynitride
[ETN-94-95305] p 2263 N94-25281
A design method for parallel programs
[ETN-94-95331] p 2469 N94-25282
Throughput time control and due date reliability in tool and die shops
[ISBN-9-03-860182-4] p 2587 N94-25283
Modelling of premixed laminar flames
[ETN-94-95317] p 2236 N94-25284
A relativistic theory on wave propagation in inhomogeneous magnetoplasmas
[ETN-94-95322] p 2554 N94-25285
On the auditory discrimination of spectral shape
[ETN-94-95306] p 2530 N94-25289
Data structures and amortized complexity in a functional setting
[ETN-94-95307] p 2476 N94-25290
Coherent structures over grooved surfaces
[ETN-94-95308] p 2339 N94-25291
Linear and nonlinear adaptive filtering and their application to speech intelligibility enhancement
[ISBN-9-09-005342-5] p 2304 N94-25292
Timed coloured Petri nets and their application to logistics
[ETN-94-95310] p 2522 N94-25293
Laser ablation and deposition of metals
[ETN-94-95311] p 2351 N94-25294
Reliability analysis of a repairable dependent parallel system
[ETN-94-95312] p 2373 N94-25295
The electrochemistry of the solvated electron: A study of its properties and of its applications
[ETN-94-95313] p 2236 N94-25296
On the origin of 1/f noise in epitaxial GaAs
[ISBN-9-09-006067-7] p 2566 N94-25297
Luminance-brightness mapping: The missing decades
[ETN-94-95351] p 2428 N94-25298
Evaluation of multiaxial fracture models for technical ceramics
[ISBN-9-03-860192-1] p 2263 N94-25299
Modelling of thermal argon plasmas
[ETN-94-95363] p 2554 N94-25300
Drying deformable media: Kinetics, shrinkage and stresses
[ETN-94-95314] p 2236 N94-25302
Delay-insensitive communication
[ETN-94-95315] p 2304 N94-25303
The use of knowledge systems
[ETN-94-95318] p 2477 N94-25431
Plasma sprayed thermal barrier coatings: Production, characterization and testing
[ISBN-9-03-860082-8] p 2555 N94-25439
Application of body fitted-coordinates in heat conduction problems
[ETN-94-95338] p 2340 N94-25484
Product forms as a solution base for queueing systems
[MEMO-COSOR-92-37] p 2477 N94-25526
A reachability test for systems over polynomial rings using Groebner bases
[MEMO-COSOR-92-38] p 2493 N94-25527

TECHNISCHE UNIV., MUNICH (GERMANY).
Walking machines for space p 2369 N94-23406

TECHNISCHE UNIV., TWENTE (NETHERLANDS).
ACOS: The performance based approach to build a parallel complex object server
[PB93-223816] p 2465 N94-22986
Simple calculus of finite probabilistic processes
[PB93-223782] p 2493 N94-23108
The Third Twente Workshop on Graphs and Combinatorial Optimization
[PB94-110947] p 2486 N94-23722
Egalitarian non-average contribution method for cooperative games
[PB94-111705] p 2497 N94-23800
Reduced game properties of egalitarian division rules for cooperative games
[PB94-111689] p 2521 N94-24523
Tool sharing, part 3
[PB94-111697] p 2467 N94-24524
Investigation on interval edge-coloring of graphs
[PB94-110913] p 2488 N94-24541
What makes industries believe in formal methods
[PB94-110848] p 2272 N94-24648
Service description of communication systems supporting multi-media multi-user applications
[PB94-110855] p 2299 N94-24650
Criterion for some Hamiltonian graphs to be hamilton-connected
[PB94-110921] p 2489 N94-24651
The Third Twente Workshop on Graphs and Combinatorial Optimization: Abstracts and late extended abstracts
[PB94-110954] p 2489 N94-24652
Irreducible core of a minimum cost spanning tree game
[PB94-110962] p 2489 N94-24653
Correct and efficient interface for logical query languages with complex objects
[PB93-211175] p 2593 N94-24743

Validation activities for LOTOS based on static data flow analysis
[PB94-110863] p 2459 N94-24758

Photonic technology for implementation of generalizable neural networks: A synthetic approach
[AD-A273497] p 2474 N94-24622
Symbiosis in marine luminous bacteria
[AD-A273540] p 2422 N94-24791
UNIVERSITY OF SOUTHERN ILLINOIS, CARBONDALE.
A theorem regarding roots of the zero-order Bessel function of the first kind p 2325 N94-23667
Electro-rheology fluids and liquid fuel flow
[AD-A273640] p 2337 N94-25032
UNIVERSITY OF SOUTHERN MISSISSIPPI, BAY SAINT LOUIS.
An efficient data assimilation algorithm with a gaussian covariance structure
[AD-A273152] p 2418 N94-24671
UNIVERSITY OF SOUTHERN MISSISSIPPI, HATTIESBURG.
Convective instabilities in traveling fronts of addition polymerization p 2226 N94-24352
UNIVERSITY OF SOUTHWESTERN LOUISIANA, LAFAYETTE.
Vectorization and parallelization of the finite strip method for dynamic Mindlin plate problems p 2483 N94-23679
UNIVERSITY OF WESTERN CAROLINA, CULLOWHEE, NC.
Hurricane risk assessment: Rollback or ride out p 2416 N94-23248
UNIVERSITY OF WESTERN ONTARIO, LONDON.
Segregation and oxidation studies of Al-Li and Al-Mg alloys
[ISBN-0-315-83993-7] p 2244 N94-24469
UTAH STATE UNIV., LOGAN.
Calibration of a helium-cooled infrared spatial radiometer and grating spectrometer p 2384 N94-23607
Infrared calibration p 2384 N94-23608
Mapping Tomorrow's Resources: A symposium on the uses of remote sensing, Geographic Information Systems (GIS), and Global Positioning Systems (GPS) for natural resources management p 2387 N94-24357
UTILITY POWER GROUP, CHATSWORTH, CA.
Amorphous silicon PVMaT, phase 2A
[DE93-018221] p 2390 N94-23295
UTRECHT STATE UNIV. (NETHERLANDS).
Sequential composition, action prefixes and process prefix
[PB94-101433] p 2488 N94-24539
Real-time process logic
[PB94-101441] p 2446 N94-24540

V

VACHON (WILLIAM A.) AND ASSOCIATES, INC., MANCHESTER, MA.
Control algorithms for effective operation of variable-speed wind turbines
[DE94-002607] p 2394 N94-23704
VANDERBILT UNIV., NASHVILLE, TN.
Stiffening of deployable space booms: Automated Protein Crystal Growth Facility
[NASA-CR-195547] p 2196 N94-24820
VIABLE SYSTEMS, INC., MEDFIELD, MA.
The study of dopant segregation behavior during the growth of GaAs in microgravity
[NASA-CR-193905] p 2267 N94-23549
VICTORIA UNIV. (BRITISH COLUMBIA).
Coding for frequency hopped spread spectrum satellite communications
[ECE-91-1] p 2296 N94-24132
Coding for frequency hopped spread spectrum satellite communications
[ECE-92-1] p 2300 N94-24697
VIGYAN RESEARCH ASSOCIATES, INC., HAMPTON, VA.
Cockpit weather graphics using mobile satellite communications p 2280 N94-22775
A study of roll attractor and wing rock of delta wings at high angles of attack p 2164 N94-25111
VIRGINIA COMMONWEALTH UNIV., RICHMOND.
Modelling early failures in Space Station Freedom p 2374 N94-25372
VIRGINIA POLYTECHNIC INST. AND STATE UNIV., BLACKSBURG.
Spatiotemporal behavior and nonlinear dynamics in a phase conjugate resonator
[NASA-CR-4567] p 2543 N94-23529
Issac, Jason Cherian ses in transonic flow
[NASA-CR-194837] p 2167 N94-24052
Design of a vehicle based system to prevent ozone loss
[NASA-CR-195498] p 2180 N94-24479
LOLA: Lunar Optical Long-baseline Array. 1992-1993 space design
[NASA-CR-195533] p 2298 N94-24582
LOITA: Lunar Optical/Infrared Telescope Array
[NASA-CR-195532] p 2546 N94-24816

Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas
[NASA-CR-195167] p 2301 N94-25005

VIRGINIA UNIV., CHARLOTTESVILLE.

Out of plane gradients in laminated composites
[NASA-CR-194875] p 2228 N94-23566

Chromospheric activity in agol binaries
[AD-A273546] p 2602 N94-24557

Environmentally assisted cracking of high strength beta titanium alloys
[AD-A273598] p 2245 N94-24823

VON KARMAN INST. FOR FLUID DYNAMICS, RHODE-SAINT-GENESE (BELGIUM).

Activities report to NATO
[ETN-94-95047] p 2318 N94-23227

VRIJE UNIV., AMSTERDAM (NETHERLANDS).

Making some issues of implicit knowledge explicit
[PB93-220606] p 2478 N94-22984

Median stabilization degree of a median algebra
[PB93-220010] p 2479 N94-23093

Characterization of measures with a convex range: A generalization of Lyapounov's theorem
[PB93-220523] p 2523 N94-23094

Flexible framework for contingent information systems modelling
[PB93-220549] p 2589 N94-23095

Asynchronous rendezvous in distributed logic programming
[PB93-220614] p 2448 N94-23096

Linear algorithm for flattening list graphs
[PB93-220648] p 2448 N94-23097

Characterization of measures with a convex matrix-k-range
[PB93-220655] p 2479 N94-23098

Transition system specifications in stalk format with bisimulation as a congruence
[PB94-110608] p 2453 N94-23707

Object distribution in orca using compile-time and run-time techniques
[PB94-110574] p 2453 N94-23745

Logic of capabilities
[PB94-110715] p 2473 N94-23747

Epistemic logic for defeasible reasoning using a meta-level architecture metaphor
[PB94-110723] p 2473 N94-23748

Extension of the critical path method
[PB94-118817] p 2488 N94-24527

Modular approach to project management
[PB94-118833] p 2586 N94-24528

Compositional architecture for simple design formally specified in DESIRE
[PB94-119013] p 2474 N94-24543

Combinatory reduction systems: Introduction and survey
[PB94-110582] p 2457 N94-24570

Non-brittleness of a DESIRE-model for an office assignment task
[PB94-119021] p 2489 N94-24643

General optimal stopping theorems for semi-Markov processes
[PB93-214989] p 2496 N94-24744

VRIJE UNIV., BRUSSELS (BELGIUM).

Arc consistency problem: An exercise in parallel programming with shared objects
[PB94-110590] p 2466 N94-23706

Framework for interactive solving of meta-constraint satisfaction problems
[PB94-118825] p 2585 N94-23761

Design and specification of a generic task model for solving boolean constraint satisfaction problems
[PB94-118841] p 2486 N94-23762

Structured constraint satisfaction
[PB94-119039] p 2497 N94-23764

Two applications of a generic task model for solving boolean constraint satisfaction problems
[PB94-119047] p 2487 N94-23765

W

WAGENINGEN AGRICULTURAL UNIV. (NETHERLANDS).

Methodology for the assessment of surface resistance and soil water storage variability at mesoscale based on remote sensing measurements. A case study with HAPEX-EFEDA data. UNESCO-International Hydrological Program 4
[PB94-111721] p 2386 N94-23734

Groundtruth collection for the JPL-SAR and ERS-1 campaign in Flevoland and Veluwe, Netherlands, 1991
[PB93-230654] p 2386 N94-23755

WAKE FOREST UNIV., WINSTON-SALEM, NC.

Expanding the KATE toolbox p 2477 N94-23247

WALLACE (T. L.), NASHVILLE, TN.

Development of an analytical-numerical model to predict radiant emission or absorption
[NASA-CR-194860] p 2453 N94-23624

WARWICK UNIV., COVENTRY (ENGLAND).

Microstructure and micromechanical behaviour of CMCs p 2256 N94-24236

WASHINGTON STATE PATROL, BELLEVUE.

Using satellite communications for a mobile computer network p 2280 N94-22777

WASHINGTON UNIV., SAINT LOUIS, MO.

Two populations and models of gamma ray bursts
[NASA-CR-194762] p 2629 N94-22947

Micromechanical simulation of damage progression in carbon phenolic composites p 2231 N94-24446

WASHINGTON UNIV., SEATTLE.

Atomic probes of surface structure and dynamics
[DE94-001651] p 2530 N94-22720

A reliable algorithm for optimal control synthesis
[NASA-CR-194809] p 2472 N94-23332

Dynamics of the atmosphere of Mars: Review of some outstanding problems p 2620 N94-24888

WEIZMANN INST. OF SCIENCE, REHOVOTH (ISRAEL).

Correlations in the actions of periodic orbits derived from quantum chaos
[DE93-616866] p 2571 N94-25340

WEST VIRGINIA STATE COLL., CHARLESTON.

Magnetic Earth Ionosphere Resonant Frequencies
[NASA-CR-195131] p 2303 N94-25191

WEST VIRGINIA UNIV., MORGANTOWN.

Determination of the stability and control derivatives of the NASA F/A-18 HARV using flight data
[NASA-CR-194838] p 2190 N94-24804

Preliminary design of a universal Martian lander
[NASA-CR-195529] p 2206 N94-25007

WESTERN AEROSPACE LABS., INC., MONTE SERENO, CA.

Activity Catalog Tool (ACT) user manual, version 2.0
[NASA-CR-177634] p 2430 N94-23527

WESTINGHOUSE ELECTRIC CORP., BALTIMORE, MD.

MSAT and cellular hybrid networking
p 2278 N94-22762

Implementation of a system to provide mobile satellite services in North America p 2281 N94-22784

The Westinghouse Series 1000 Mobile Phone: Technology and applications p 2284 N94-22800

Advanced technology for a satellite multichannel demultiplexer/demodulator
[NASA-CR-194435] p 2202 N94-23631

WESTINGHOUSE ELECTRIC CORP., PITTSBURGH, PA.

Contaminant effects in solid oxide fuel cells
[DE94-002963] p 2395 N94-23785

WESTINGHOUSE ELECTRIC CORP., SUNNYVALE, CA.

Radar E-O image fusion p 2306 N94-25503

WESTINGHOUSE IDAHO NUCLEAR CO., INC., IDAHO FALLS.

Quality data validation: Comprehensive approach to environmental data validation
[DE94-000925] p 2589 N94-22944

Improved gas core propulsion model
[DE94-000929] p 2220 N94-24511

WESTINGHOUSE SCIENCE AND TECHNOLOGY CENTER, PITTSBURGH, PA.

Crystal growth of organics for nonlinear optical applications p 2225 N94-24348

WICHITA STATE UNIV., KS.

Microstructural analysis of the 2195 aluminum-lithium alloy welds p 2251 N94-24448

WINAND STARING CENTRE, WAGENINGEN (NETHERLANDS).

Integrated use of hydrological modelling and remote sensing in the province of Drenthe (The Netherlands): Possibilities and restrictions
[REPT-61] p 2382 N94-23148

WISCONSIN UNIV., MADISON.

Organometallic chemistry of bimetallic compounds
[DE94-002313] p 2238 N94-22897

Chaos in plasma simulation and experiment
[DE94-001574] p 2549 N94-22963

Plasma research in the Madison Symmetric Torus (MST)
[DE94-002318] p 2549 N94-22976

A measurement of the forward-backward asymmetry and sin(sup 2)(theta)(sub W) from the process Z(sup 0) (yields) (mu)(sup +)(mu)(sup (minus)) at (radical)s = 1.8 TeV
[DE94-001908] p 2532 N94-23018

1993 annual report for the Phaedrus-T RF current drive experiments
[DE94-001369] p 2550 N94-23192

Chaos and simple determinism in reversed field pinch plasmas: Nonlinear analysis of numerical simulation and experimental data
[DE94-001575] p 2550 N94-23211

Nonlinear ion-mixing-mode particle transport in the dissipative trapped electron regime
[DE94-000989] p 2533 N94-23435

Atmospheric moisture fields derived by satellite observations over the tropical Pacific Ocean
[NASA-CR-194852] p 2408 N94-23542

A nonconforming multigrid method using conforming subspaces p 2485 N94-23695

Implementation of a state of the art automated system for the production of cloud/water vapor motion winds from geostationary satellites
[NASA-CR-195087] p 2410 N94-24125

Hubble Space Telescope high speed photometer orbital verification
[NASA-CR-189333] p 2204 N94-24226

An investigation of current and future satellite and in-situ data for the remote sensing of the land surface energy balance
[NASA-CR-195138] p 2387 N94-24596

Hubble Space Telescope high speed photometer science verification test report
[NASA-CR-189322] p 2205 N94-24710

Mars Operational Environmental Satellite (MOES): A post-Mars Observer discovery mission
p 2620 N94-24890

A thermodynamic approach to obtain materials properties for engineering applications
p 2248 N94-25131

WISCONSIN UNIV., MILWAUKEE.

Inelastic electron scattering from surfaces
[DE94-001368] p 2531 N94-22733

WISCONSIN UNIV., PLATTEVILLE.

Response-coefficient method for heat-conduction transients with time-dependent inputs
p 2326 N94-23671

WOODS HOLE OCEANOGRAPHIC INST., MA.

Global acoustic mapping of ocean temperatures (GAMOT)
[AD-A273387] p 2418 N94-24719

Seafloor characterization/Galapagos propagating rift
[AD-A273586] p 2419 N94-25165

Analysis of modal evolution caused by a weakly range-dependent seabed in shallow water and its application to inversion for geoacoustic properties
[AD-A273656] p 2419 N94-25435

WOODS HOLE RESEARCH CENTER, MA.

Human impacts on soil carbon dynamics of deep-rooted Amazonian forests
[NASA-CR-195127] p 2399 N94-24861

WORCESTER POLYTECHNIC INST., HOLDEN, MA.

NASA advanced design program. Design and analysis of a radio-controlled flying wing aircraft
[NASA-CR-195515] p 2180 N94-24589

WORCESTER POLYTECHNIC INST., MA.

Conceptual design of a two stage to orbit spacecraft
[NASA-CR-195536] p 2204 N94-24620

WRIGHT LAB., WRIGHT-PATTERSON AFB, OH.

A fully automated stage for optical waveguide measurements
[AD-A273042] p 2542 N94-22915

An engineering code to analyze hypersonic thermal management systems p 2320 N94-23636

Ultrasonic nondestructive evaluation as a tool for the development of aerospace structural ceramic composites p 2257 N94-24240

Early manufacturing considerations in design
p 2177 N94-24315

Robust, nonlinear, high angle-of-attack control design for a supermaneuverable vehicle p 2164 N94-25108

A comparison of free-space and fiber mixer performances
[AD-A273558] p 2547 N94-25161

Structure of cholesteryl-4-vinylbenzoate
[AD-A273686] p 2567 N94-25441

Expert system rule-base evaluation using real-time parallel processing
[AD-A273701] p 2469 N94-25454

Direct measurement of turbulent dissipation rate using dual laser doppler velocimeters
[AD-A273740] p 2340 N94-25530

The mechanical property data base from an Air Force/Industry Cooperative Test Program on advanced aluminum alloys (7064 and CW67)
[AD-A273741] p 2251 N94-25531

WRIGHT RESEARCH DEVELOPMENT CENTER, WRIGHT-PATTERSON AFB, OH.

Interface evaluation in ceramic composites
p 2255 N94-24231

Micromechanical failure modes in brittle matrix composites p 2255 N94-24232

WYOMING UNIV., LARAMIE.

Three-dimensional numerical simulation of near-surface flows over the Martian north polar cap
p 2621 N94-24895

Failure detection and recovery in the assembly/contingency subsystem p 2306 N94-25360

An evaluation of three-dimensional sensors for the extravehicular activity helper/retreiver
p 2444 N94-25369

X

XSIRIUS SCIENTIFIC, INC., CAMARILLO, CA.
New concepts for HgI2 scintillator gamma ray spectroscopy
[NASA-CR-194819] p 2233 N94-24113

Y

YALE UNIV., NEW HAVEN, CT.
Implementing abstract multigrid or multilevel methods
p 2483 N94-23682
Numerical solution of flame sheet problems with and without multigrid methods p 2237 N94-23683
Fundamental and experimental studies on the catalytic combustion of methane
[PB94-112661] p 2233 N94-23736
Fast fourier transforms of piecewise constant functions
[AD-A272648] p 2456 N94-24535
Fractal geometry in physics
[AD-A273271] p 2523 N94-24936
Generalized Gaussian quadrature rules for systems of arbitrary functions
[AD-A273610] p 2491 N94-24947

YAMAGUCHI UNIV. (JAPAN).
Robotic exploration of Moon and Mars
p 2606 N94-23379

YOKOHAMA NATIONAL UNIV. (JAPAN).
Influences of nitrogen absorption on the magnetic properties of YFe2, YFe3 and Y6Fe23
[REPT-A-2654] p 2564 N94-24958

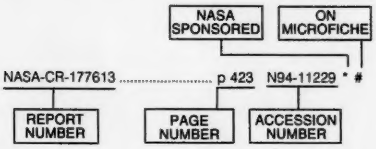
Z

ZURICH UNIV. (SWITZERLAND).
A multigrid solver for the semiconductor equations
p 2482 N94-23674

REPORT NUMBER INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 32 NUMBER 6

Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

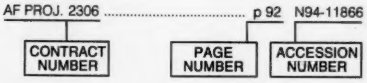
CONTRACT NUMBER INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 32 NUMBER 6

Typical Contract Number Index Listing



Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *NASA Open Volumes on Aerospace (NOVA). NOVA* is issued on the 15th of each month and is available from the NASA Center for AeroSpace Information, at the address below.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *NOVA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

> **16 SPACE TRANSPORTATION**
>
> Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance*. For space suits see *54 Man/System Technology and Life Support.*

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

COLOR COPIES

An increasing number of NASA scientific and technical reports are being produced with color graphs, charts, illustrations, and photographs. An indication that a document has color pages follows the source and pricing (SAP) information in the *STAR* citation.

Registered users of the NASA Scientific and Technical Information Program will receive ordered documents with color at no additional cost, as long as stock copies of the document are available. Otherwise, an additional fee of $2.00 per color page will be charged. The NASA Center for AeroSpace Information staff will contact registered users to determine individual user's needs.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 76344 Eggenstein-Leopoldshafen, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *NOVA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI) at $94.00/domestic, $117.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $54.00/domestic, $65.00/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.
